Brings together VMware, Intel and Dell Technologies to enable secure and personalised remote working experiences

New Delhi – November 19, 2020: Tech Mahindra, a leading provider of digital transformation, consulting, and business re-engineering services and solutions, announced the launch of **WORKSPACE NXT** (Workplace as a Service), the latest version of its next-generation integrated digital workplace solution for enterprises globally. The digital workplace solution brings together VMware, Intel and Dell Technologies to enable secure and personalized remote working experiences.

WORKSPACE NXT is designed to deliver the highest level of security using hybrid workspace delivery model that leverages virtualization, enterprise mobility and context aware security. As part of this collaboration, Tech Mahindra will leverage solutions including VMware Workspace One, Dell EMC VxRail and Horizon platform to enable remote work and drive seamless productivity, anytime on any device. Further, Intel Optane persistent memory will accelerate underlying infrastructure of enterprises resulting in superior performance, efficiencies and cost benefits.

Lakshmanan Chidambaram, President, Americas Strategic Verticals, Tech Mahindra, said, *“With remote working as the new normal, enterprises have to manage rising security threats while also ensuring remote access to enterprise resources. WORKSPACE NXT will facilitate this by deploying a secure and stable digital workspace solution without compromising on security and user experience. The collaboration with VMWare, Dell and Intel is in line with our TechMNxt charter and is*

aimed at developing a comprehensive digital workspace solution which will simplify the deployment and management for the end user across industry verticals.”

WORKSPACE NXT allows integration of access control, application management and multi-platform endpoint management which can be leveraged for remote working across various industries including construction, manufacturing, healthcare and energy.

David Kluzak, Vice President, Global Strategic Alliances, VMware, said, *“By combining VMware Workspace ONE with Tech Mahindra’s WORKSPACE NXT platform, customers are afforded a high level of security and an exceptional user experience for their digital workspaces. VMware and Tech Mahindra are enabling organizations to embrace the new work from anywhere reality. Tech Mahindra, under its TechMNxt charter, continues to focus on leveraging next-generation technologies to disrupt and enable digital transformation, and to build cutting-edge technology solutions and services for customers globally.”*

Jeremy Rader, General Manager, Digital Transformation and Scale Solutions, Data Platforms Group, Intel, said, *“Now more than ever, enterprises are searching for reliable, more secure remote work solutions that deliver the user experience needed by employees to stay highly productive. Built with Intel Xeon Scalable processors and Intel Optane persistent memory, Tech Mahindra’s WORKSPACE NXT solution is able to provide high user density and lower cost per virtual desktop while meeting or exceeding the users’ performance expectations.”*

Rajesh Janey, Senior Vice President, Global Alliances, Asia Pacific and Japan, Dell Technologies, said, *“We believe that virtual workspaces will be the new order of the day. Our technologies are particularly designed for connected workspaces giving employees the flexibility to work securely from anywhere, anytime on any device. Tech Mahindra’s WORKSPACE NXT is meant to deliver high productivity whilst optimizing costs. Our alliances with global system integrator partners like Tech Mahindra enable enterprises to embark on a unified workspaces journey with a broad array of features and functionality. Customers now can empower their remote workers with Dell’s wide endpoint portfolio.”*

As part of its TechMNxt charter, Tech Mahindra is focused on leveraging next generation technologies to deliver tangible business value and cater to customer’s evolving and dynamic needs

for solving real business problems.
