Stablecoins can reduce transaction cost and processing time while providing auditability and enhancing security during digital payments

New Delhi, April 05, 2021: Tech Mahindra Ltd., a leading provider of digital transformation, consulting, and business reengineering services and solutions, and Quantoz, the Netherlands-based innovative blockchain technology application incubator, specialised in building and implementing blockchain-based solutions, are set to launch ‘Stablecoin-As-A-Service’ blockchain solution for global banks and financial institutions. The usage of Stablecoins as a payment mechanism has significant potential to reduce transaction costs and processing time while providing auditability and enhancing security.

This collaboration is in consideration of the [OCC](#) (Office of the Comptroller of Currency) announcement allowing federally chartered US banks to use stablecoins for standard functions like payments and transactions. This will accelerate the regulated use of blockchain and has the potential to boost its adoption across the banking vertical.

Stablecoins are digital tokens that offer stability by pegging their value to certain assets like fiat currency or commodities. In addition to optimising

digital payments, stablecoins also enable enhanced functionalities like IoT (Internet of Things) payments, micropayments, programmable payments and cross spending across payment ecosystems.

Rajesh Dhuddu, Blockchain and Cybersecurity Practice Leader, Tech

Mahindra, said, *“The recent OCC (office of the comptroller of currency) announcement promoting the use of stablecoins for the settlement of financial transactions by banks will spur demand and drive innovation in global payments. Tech Mahindra’s strategic collaboration with Quantoz will enable lower transaction processing costs, bring in military-grade security and drive faster settlements. Banks can benefit significantly from stablecoins as they will help them compete with fintech, that are transforming payment systems and prevent the exit of customers to other avenues for payments and money remittances.”*

As part of the engagement, Tech Mahindra will help customers integrate Quantoz’ NEXUS platform into their legacy infrastructure enabling automated token, crypto and fiat transaction processing for a variety of banking and payment functions. The platform can handle multiple functions like loyalty management, remittances, ecosystem payments and treasury management.

Henri de Jong, Chief Business Development Officer of Quantoz, said,

“Quantoz has focused on the interface between the classical financial world and blockchain technology from the very beginning. With our recent ISO 27001 certification for information security management and our compliance-by-design methodology, we believe we have a superior stablecoin offering that can bring numerous benefits for standard banking services. We look forward to bringing our solution to new US customers together with TechMahindra as we have previously successfully cooperated on other projects.”

Blockchain continues to grow as a major pillar in Tech Mahindra's digital transformation portfolio and is increasingly crossing its wide range of business verticals. As part of NXT.NOW framework, which aims to enhance 'Human Centric Experience', Tech Mahindra focuses on investing in emerging technologies and solutions that enable digital transformation and meet the evolving needs of the customer. Tech Mahindra provides a holistic framework called 'Block Ecosystem' comprised of various levers: Block Studio, Block Engage, Block Talk, Block Geeks, Block Accelerate, Block Access and Block Value, which can be used to create industry-leading applications that unlock significant value for clients.
