In accordance with the shareholders resolution dated March 23, 2018 it was agreed to increase the social capital for an amount of $ 18,507,800 and $20,215,000 increase which is presented as part of shareholders equity.

NOTE 15.- GOING CONCERN

During the year ended at March 31 2020, the Company suffered a net loss of $141,448,676. Furthermore, the Company has lost two of the third parts of the total of its capital stock and, in accordance with Mexican law this may be cause for its dissolution, at the legal request of any interested party with outstanding credits.

The Company has the full support of Mahindra U.S.A. Inc. to ensure the Company´s financial business continuity, at the time that there is no notice of any legal interest of any third party to ask for the Company´s dissolution.

Therefore, Mahindra Mexico, S. de R. L. de C. V. financial statements do not have to include any adjustments that might from the outcome of this uncertainty, because Mahindra U.S.A. Inc. will continue to support the company in Mexico financially. Also, Mahindra U.S.A. Inc. consider increase the investment in the equity during the year that will end on March 2021.

Actions to support Mexican operations:

a) Principal Actions – Twelve Months:

- Capital Infusion to pay all existing obligations and provide operating cash flow.
- Discount policy & oversight to ensure discounts are in line with current approved promotions.
- Retail financing subsidy reduced from 14% to 7%.
- Marketing cost reduction.
- Interest cost reduction through working capital reduction.
- Credit policy placed in which no tractor is to dispatch without receipt of payment.
- Enforce further policies to ensure internal controls.

b) Principal Actions – More than Twelve Months:

- Market review and adjustment to ensure products are in line with customer needs.
- Pricing review based on market trends and cost analysis.

NOTE 16.- SUBSEQUENT EVENTS

Due to the novel Coronavirus outbreak, there has been significant effects in the world's economy. In Mexico, particularly, the exchange rate of the US dollar against the Mexican peso raised to a 28.6% increase from December 31, 2019 to March 31, 2020. Giving the difficulty predicting when the exchange rate becomes more stable, the Company's monetary position denominated in US dollars could impact significantly its financial costs as of the date of release of these financial statements and during the next few months.

NOTE 17.- NEW ACCOUNTING PRONOUNCEMENTS FOR THE YEAR ENDED MARCH 31, 2019:

At the date of issuance of these financial statements, the Entity is in the process of determining the effects of these new standards on its financial information.

The company considers that these provisions will not have material effects in the presentation of its financial statements and disclosures in the explanatory notes.

These notes are an integral part of the financial statements.

INDEPENDENT AUDITORS' REPORT

Dear Directors of
Mahindra do Brasil Industrial Ltda.
Dois Irmãos – RS – Brazil

Opinion

We have audited the individual financial statements of **Mahindra do Brasil Industrial Ltda.**, which comprise the balance sheet as of March 31, 2020 and the related income statements, statements of changes in stockholders' equity and cash flows for the year then ended, as well as the summary of significant accounting practices and other explanatory notes.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of **Mahindra do Brasil Industrial Ltda.** on March 31, 2020, the performance of its operations and its cash flows for the year then ended, in accordance with accounting practices adopted in Brazil.

Basis for opinion

Our audit was conducted in accordance with Brazilian and international auditing standards. Our responsibilities, in accordance with such standards, are described in the following section entitled "Auditor's Responsibilities for the Audit of Financial Statements." We are independent of the Company, in accordance with the relevant ethical principles set forth in the Professional Code of Ethics of the Accountant and the professional standards issued by the Federal Accounting Council, and we comply with the other ethical responsibilities in accordance with these standards. We believe that the audit evidence we have obtained is sufficient and appropriate to substantiate our opinion.

Another subjects

Pryor year audit

The financial statements of Mahindra do Brasil Industrial Ltda. for the year ended March 31, 2019, were examined by us and our report was issued on April 15, 2019 containing an emphasis paragraph about realization of deferred tax credits.

Management and governance responsibilities of the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting practices adopted in Brazil and for the internal controls that it has determined to be necessary to enable the preparation of financial statements free of material misstatement, whether caused by fraud or error.

In preparing the financial statements, management is responsible for evaluating the Company's ability to continue operating, disclosing, when applicable, matters related to its operational continuity and the use of this accounting basis in the preparation of the financial statements, unless Management intends to liquidate the Company or cease its operations, or has no realistic alternative to avoid closing the operations.

Those responsible for the governance of the Company are those responsible for supervising the process of preparing the financial statements.

Responsibilities of the auditor for the audit of the financial statements

Our objectives are to obtain reasonable assurance that the financial statements, taken as a whole, are free from material misstatement, whether caused by fraud or error, and issue an audit report containing our opinion. Reasonable security is a high level of security, but not a guarantee that the audit conducted in accordance with Brazilian and international auditing standards will always detect any relevant material misstatements. Distortions may be due to fraud or error and are considered relevant when, individually or jointly, they can influence, from a reasonable perspective, the economic decisions of the users taken based on the referred financial statements.

As part of the audit conducted in accordance with Brazilian and international auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. Besides that:

- We identify and evaluate the risks of material misstatement in the financial statements, whether caused by fraud or error, we plan and perform audit procedures in response to such risks, and we obtain audit evidence appropriate and sufficient to substantiate our opinion. The risk of not detecting material misstatement resulting from fraud is greater than that of error, since fraud may involve circumvention of internal controls, collusion, falsification, omission or false intentional representations.
- We obtain an understanding of the internal controls relevant to the audit to plan audit procedures appropriate to the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal controls.
- We evaluate the adequacy of the accounting policies used and the reasonableness of the accounting estimates and respective disclosures made by management.
- We conclude on the adequacy of the management's use of the accounting basis for operational continuity and, based on the audit evidence obtained, whether there is a material uncertainty regarding events or conditions that may raise significant doubt regarding the capacity for operational continuity of the Company. If we conclude that there is material uncertainty, we should draw attention in our audit report to the respective disclosures in the financial statements or include any change in our opinion if the disclosures are inadequate. Our findings are based on the audit evidence obtained up to the date of our report. However, future events or conditions may cause the Company to no longer be in operational continuity.
- We evaluate the overall presentation, structure and content of financial statements, including disclosures, and whether the financial statements represent the related transactions and events in a manner consistent with the appropriate presentation objective.

We communicate with those responsible for governance regarding, inter alia, the planned scope, timing of the audit and significant audit findings, including any significant weaknesses in the internal controls we have identified during our work.

Porto alegre, RS, April 15, 2020.

EXPLANATORY NOTES FOR MARCH 2020 FINANCIAL STATEMENTS

IN THOUSANDS OF BRAZILIAN REAIS OF BRAZIL, UNLESS OTHERWISE INDICATED

1. Operational Context

Mahindra do Brasil Industrial Ltda is a Brazilian company headquartered in Dois Irmãos, RS, at 10 de Setembro street, 1097, Downtown. The company was incorporated in 2016.

The company's main activity is the manufacture of agricultural tractors, parts and accessories as well as trade of new and used automobiles, vans and utilities; Retail trade of new cars, vans and utilities; Retail trade of parts and accessories used for motor vehicles; Wholesale of machinery, apparatus and equipment for agricultural use; parts and pieces; Maintenance and repair services of motor vehicles; Installation of industrial machinery; Manufacture of other appliances, not specified or included elsewhere in this chapter; Wholesale trade of new parts and accessories for motor vehicles; Other holding companies, except holding companies; Other service activities rendered mainly to companies not specified above; Motor vehicle or motor vehicle headlamp and hopper services.

The company presented a loss in the amount of R$ 35,112 in the year ended March 31, 2020. This amount, although high, is still a reflection of the acquisition of the representative of Mahindra in Brazil, in 2016. From that, was necessary to adjust the balance sheets to local legislation and other important adjustments, so that we can start the next fiscal year in a transparent manner and without any influence of previous results, resulting from that business model. The parent company, through a strategic meeting, defined the investment plan in Mahindra Brasil for the coming years, including the launch of new products, in addition to financial capitalization in the amount of approximately R $ 36,937 thousand (USD 6,250 thousand) until May 2020. These actions show synergy and complete and unrestricted confidence in the agricultural segment, in addition to the maintenance and longevity of business in the country.

Potential effects of Covid-19 on the financial statements

The Company is evaluating the potential impacts on its future business, which may arise from the arrival of the "Covid-19" pandemic in Brazil. However, so far, it has not identified any event that could significantly impact its operational activities, as it has adopted the determinations of the Ministry of Health regarding the reduction of exposure of its employees.

2. Summary of major accounting policies

The main accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied in all years presented, unless otherwise stated.

These financial statements were approved by the board of directors on March 31, 2019.

2.1 Basis for preparation

The preparation of financial statements requires the use of certain critical accounting estimates and also the exercise of judgment by management in the process of applying the Company's accounting policies. Those areas that require a higher level of judgment and are more complex, as well as the areas in which assumptions and estimates are significant for the financial statements, are disclosed in Note 2.15.

(a) Financial Statements

The financial statements were prepared in accordance with accounting practices adopted in Brazil, including pronouncements, guidelines and interpretations issued by the Accounting Pronouncements Committee (CPC) and approved by the Federal Accounting Council (CFC) in accordance with Laws 6.404/1976 and 11.638/2007.

2.2 Exchange of foreign currency

Functional currency and presentation currency

The items included in the Company's financial statements are measured using the currency of the principal economic environment in which the Company operates ("the functional currency"). The financial statements are prepared in Reais (R$) and presented in Rupees (INR), which is the Company's functional currency.

Foreign Currency transactions

Transactions in foreign currency are translated to the Brazilian Real by the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated into the functional currency at the exchange rate calculated on that date. Exchange rate gain or loss on monetary items is the difference between the amortized cost of the functional currency at the beginning of the period, adjusted for interest and actual payments during the period, and the amortized cost in foreign currency at the exchange rate at the end of the reporting period. Foreign currency differences resulting from the conversion are recognized in profit or loss.

2.3 Calculation of Results

The results of operations are determined in accordance with the accrual basis.

2.4 Cash and Cash equivalents

They are comprised of financial resources held in cash, banks account movement and financial investments. Short-term investments are valued at cost, plus income earned through the balance sheet date. These financial instruments are used for trading and are recorded at realizable values (Note 4).

2.5 Financial Assets and Liabilities

Classification and measurement

The Company classifies its financial assets under the following categories: loans and receivables are measured at fair value through profit or loss. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets in the initial recognition.

Loans and receivables

Included in this category are receivables that are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with a maturity of more than 12 months after the balance sheet date (these are classified in noncurrent assets). The Company's receivables comprise trade accounts receivable, other accounts receivable and cash and cash equivalents, other than short-term investments. Receivables are recorded at amortized cost using the effective interest rate method.

Financial assets measured at fair value through profit or loss

Financial assets measured at fair value through profit or losses are financial assets held for active and frequent trading. Assets in this category are classified in current assets. Gains or losses arising from changes in the fair value of financial assets measured at fair value through profit or loss are presented in the statement of operations under "Financial income" in the period in which they occur. They refer primarily to short-term financial investments.

2.6 Non-derivative financial liabilities

The Company recognizes debt securities issued and subordinated liabilities initially on the date they are originated. All other financial liabilities are initially recognized on the trade date on which the Company becomes a party to the contractual provisions of the instrument. The Company lowers a financial liability when it has its contractual obligations withdrawn, cancelled or expired.

Financial assets and liabilities are offset and the net amount is presented in the balance sheet only when the Company has the legal right to offset the amounts and intends to settle on a net basis or to

EXPLANATORY NOTES FOR MARCH 2020 FINANCIAL STATEMENTS

IN THOUSANDS OF BRAZILIAN REAIS OF BRAZIL, UNLESS OTHERWISE INDICATED

realize the asset and pay the liability simultaneously. The Company has the following non-derivative financial liabilities: loans with related parties, suppliers, loans and other accounts payable.

These financial liabilities are initially recognized at fair value plus any attributable transaction costs. After initial recognition, these financial liabilities are measured at amortized cost using the effective interest method.

2.7 Inventory

The cost of inventories is based on the weighted average principle and includes expenses incurred in the acquisition of inventories, production and processing costs and other costs incurred in bringing them to their existing locations and conditions.

Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and selling expenses.

2.8 Fixed Assets

(a) Classification and measurement

The Company opted to revalue the fixed assets at deemed cost on October 31, 2016. The effects of attributed cost decreased fixed assets and offset against shareholders' equity, net of tax effects (Note 10).

After the transition of CPCs (Accounting Board), fixed asset items are measured at historical cost of acquisition or construction, less accumulated depreciation and accumulated impairment losses.

Cost includes expenses that are directly attributable to the acquisition of an asset. Purchased software that is an integral part of the functionality of an equipment is capitalized as part of that equipment.

Gains and losses on the sale of an item of fixed assets are determined by comparing the proceeds from the sale with the book value of fixed asset and are recognized net of other income in the statement of income.

(b) Subsequent Cost

The replacement cost of a component of fixed asset is recognized in the carrying amount of the item if it is probable that the economic benefits incorporated into the component will flow to the Company and that its cost can be measured reliably. The carrying amount of the component that has been replaced by another is decreased. The maintenance costs of fixed assets are recognized in the income statement as incurred.

(c) Depreciation

Depreciation is recognized in the statement of income based on the straight-line method with respect to the estimated useful lives of each part of an item of fixed assets, since this method is the one that most closely reflects the consumption pattern of future economic benefits incorporated in the asset.

2.9 Impairment

The Company analyzes the existence of evidence that the carrying amount of an asset will not be recovered. If evidence is identified, the Company estimates the recoverable amount of the asset. The recoverable value of an asset is the greater of: (a) its fair value less costs that would be incurred to sell it, and (b) its value in use. The value in use is equivalent to the discounted cash flows (before taxes) derived from the continuous use of the asset until the end of its useful life.

When the carrying amount of the asset exceeds its recoverable amount, the Company recognizes a reduction in the carrying amount of this asset (impairment). For the assets recorded at cost, the impairment is recorded in the income statement for the period. If the recoverable amount of an asset is not determined individually, the recoverable value of the cash-generating unit to which the asset belongs.

2.10 Provisions

A provision is recognized based on a past event and whether the Company has a legal or constructive obligation that can be reliably estimated and it is probable that an economic resource will be required to settle the obligation. Provisions are cleared by discounting expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and liabilities specific risks.

Financial liabilities are classified as financial liabilities at fair value through profit or loss, as the case may be. The Company determines the classification of its financial liabilities at the time of its initial recognition. The Company's financial liabilities include accounts payable to suppliers, tax and labor liabilities.

2.11 Paid-in Capital

The shares are all paid up and classified as owners' equity. The mandatory minimum dividends, when existing, as defined in the bylaws are recognized as liabilities.

2.12 Operational Revenues

Operating income from the sale of goods in the ordinary course of business is measured at the fair value of the consideration received or receivable. Operating income is recognized when there is convincing evidence that: (i) the most significant risks and benefits inherent in the ownership of the assets have been transferred to the buyer, which in the case of the Company is at the time the products are delivered to their customers; (ii) it is probable that the financial economic benefits will flow to the Company; (iii) that the associated costs and possible return of goods can be estimated reliably, (iv) that there is no continuous involvement with the goods sold, (v) and that the value Of operating revenue can be measured reliably. If discounts are likely to be granted and the amount can be measured reliably, then the discount is recognized as a reduction in operating revenue as sales are recognized.

2.13 Financial incomes and expenses

Financial income basically comprises interest income, discounts, income from financial investments, gains from exchange variation.

Financial expenses include interest expenses, financial expenses and loans and financing, as well as the respective exchange rate variations.

2.14 Income Tax and Social Contribution

Current and deferred income tax and social contribution are calculated based on the rates of 15%, plus an additional 10% on taxable income in excess of R$ 240 thousand for income tax and 9% on taxable income for social contribution. Their calculation considers the offsetting of tax losses and negative basis of social contribution, limited to 30% of the actual profit.

2.15 Critical accounting estimates and judgments

Accounting estimates and judgments are continuously evaluated and are based on historical experience and other factors, including expectations of future events, which are considered reasonable for the circumstances.

Based on assumptions, the Company makes estimates regarding the future. By definition, the resulting accounting estimates will rarely equal their actual results. Estimates and assumptions that present a significant risk, with a probability of causing a material adjustment in the carrying amounts of assets and liabilities for the next fiscal year, are contemplated below:

2.16 New Rules

Effective January 1, 2019, CPC 06 (R2) - Leasing Operations (Correlation with IFRS 16) takes effect. Assets and liabilities arising from leasing initially are measured based on present value and recorded as assets of use rights and liabilities as lease obligations. Leased assets are depreciated by the linear method, considering the term of the lease or the useful life of the asset, being the choice for the shortest period. The Company's management evaluated this standard and concluded that it does not significantly affect the balances recorded by the company.

3. Financial Risk Management

(a) Overview

The Company is exposed to the following risks arising from the use of financial instruments:

- Credit risks
- Liquidity risks
- Market risks
- Currency risk
- Operational risks

We present information on the Company's exposure to each of the risks mentioned above, the Company's objectives, policies and processes for the measurement and risk management, and the Company's capital management. Additional quantitative disclosures are included throughout these financial statements.

(b) Risk management Structure

Management has overall responsibility for the establishment and supervision of the Company's risk management structure. Risk management policies are established to identify and analyze the risks faced by the Company, to define appropriate risk limits and controls, and to monitor risks and adherence to limits. Risk management policies and systems are frequently reviewed to reflect changes in market conditions and in the Company's activities. The Company, through its standards and training and management procedures, has the objective of developing a disciplined and constructive control environment in which all employees understand their roles and obligations.

(c) Credit Risks

Credit risk is the risk of financial loss of the Company if a customer or counterparty in a financial instrument fails to comply with its contractual obligations, which arise mainly from customer receivables and investment securities.

Customers' receivables and other receivables

The Company's exposure to credit risk is mainly influenced by the individual characteristics of each client. However, management also considers the demographics of the customer base, including the credit risk of the region where clients operate, as these factors may have an influence on credit risk.

Management has established a credit policy in which all new customers have their credit capacity individually analyzed before the terms and conditions of payment and delivery of the Company are offered. The analysis includes external evaluations, when available, including prior analysis of the banking register made by the financial institutions themselves. Purchasing limits are set for each customer, guaranteed by financial institutions, which represent the maximum outstanding amount without requiring prior approval, these limits are periodically revised. Customers who fail to meet the established credit limit may only operate with the Company on an advance payment basis. Once the transaction is approved by the financial institution, the sale is carried out and the risk becomes entirely the financial institution.

In the monitoring of Customers' credit risk, they are grouped according to their credit characteristics, including geographic location, maturity and previous financial difficulties.

(d) Liquidity Risks

Liquidity risks is the Company's risk of finding difficulties to comply with its obligations associated with its financial liabilities that are settled with cash payments or with another financial asset. The Company's approach to liquidity management is to ensure as much as possible that it always has sufficient liquidity to meet its obligations under normal and stressful conditions without causing unacceptable losses or risks of damaging the Company's reputation.

Based on the calculation of the Liquidity indexes, the current liquidity ratio corresponds to 0,68 as of March 31, 2019, a result that shows that there would be no remaining "cash and banks" available for a possible liquidation of the short term bonds, if necessary.

(e) Market Risks

Market risk is the risk that changes in market prices, such as exchange rates, interest rates and stock prices, may impact on the Company's earnings or the value of its holdings in financial instruments. The purpose of market risk management is to manage and control exposures to market risks, within acceptable parameters, while optimizing return.

The Company complies with financial obligations to manage market risks. All these operations are conducted within the guidelines established by the Administration.

(f) Currency Risks

The Company is subject to currency risk in purchases and loans and financing denominated in a currency other than its functional currency, the Real (R$). The currency in which these transactions are primarily denominated is the US dollar.

With respect to other monetary assets and liabilities denominated in foreign currency, the Company guarantees that its net exposure is maintained at an acceptable level to treat short-term instabilities.

(g) Operational Risks

Operational risks are the risks of direct or indirect losses arising from a variety of causes associated with Company processes, personnel, technology and infrastructure and external factors, except for credit, market and liquidity risks, such as those arising from legal and regulatory requirements and generally accepted standards of business behavior. Operating risks arise from all operations of the Company.

The Company's objective is to manage operational risks to avoid the occurrence of financial losses and damages to its reputation, as well as to seek cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The main responsibility for the development and implementation of controls to address operational risks is assigned to top management. The responsibility is supported by the development of the Company's general standards for the management of operational risks in the following areas:

- Requirements for adequate segregation of duties, including independent clearance of operations;
- Requirements for the reconciliation and monitoring of operations;
- Compliance with regulatory and legal requirements;
- Documentation of controls and procedures;
- Requirements for the periodic assessment of operational risks faced and the adequacy of controls and procedures to deal with identified risks;
- Requirements to report operational losses and corrective actions proposed;
- Development of contingency plans;
- Professional training and development;
- Ethical and commercial standards;
- Risk mitigation, including insurance when effective.

(h) Capital Management

The Management has been monitoring the loss generated by the operation in order to mitigate its causes and generate returns on capital, which the Company defines as results of operating activities divided by total owners' equity.

EXPLANATORY NOTES FOR MARCH 2020 FINANCIAL STATEMENTS

IN THOUSANDS OF BRAZILIAN REAIS OF BRAZIL, UNLESS OTHERWISE INDICATED

Owners provide advances for future capital increase when necessary and / or contributions to maintain cash flow and sustain investments, whichever is more profitable for the Company.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors of
Hisarlar Makina Sanayi ve Ticaret A.Ş.

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of Hisarlar Makina Sanayi ve Ticaret A. Ş. ("the Company") and its subsidiary ("the Group"), which comprise the consolidated statement of financial position as at 31 December 2019, and the consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at 31 December 2019, and its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with International Financial Reporting Standards.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

Without our opinion, as described in Note 2.3 to the consolidated financial statements, we draw attention to the fact that the Group has completed the period ended 31 December 2019 with a net loss of TL 57.089.186 (31 December 2018: TL 66.111.399), accumulated losses has reached TL 250.919.518 (31 December 2018: TL 185.479.652), short-term liabilities has exceeded current assets by TL 89.740.060 (31 December 2018: TL 143.857.707). Together with the effect of the accumulated losses and period loss, total capital and restricted profit reserves is unsecured in accordance with Article 376 of Turkish Commercial Law. The actions taken by the management in 2019, regarding the aforementioned fact and the plans for the future periods are explained in detail in Note 2.3.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a

going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

The accompanying notes are an integral part of these consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2019

Amounts are expressed in Turkish Lira (TL)

1. ORGANIZATION AND OPERATIONS OF THE GROUP

Hisarlar Makina Sanayi ve Ticaret A.Ş. (the “Company” or “Hisarlar Makina”) is the parent company. The address of Hisarlar Makina’s registered office is: Eskişehir - Bursa Yolu 20. km. 26550 M. Çukurhisar, Eskişehir, Turkey.

The Company was established in 1973. Following the production of the tractor safety cab in Turkey in 1974, the first serial production has started in 1977. Hisarlar Makina started its first export activities of safety cabs to Netherlands in 1985 and to Austria in 1987. Hisarlar Makina realizes export sales over Hisarlar Pazarlama. In 2006, shareholders established Hisarlar Kabin in order to carry out production of tractor safety cabs and agricultural machines within the newly established company. After this demerge, Hisarlar Makina started to specialize in the production of welded components. As of 2 January 2012, Hisarlar Makina has been remerged with Hisarlar Kabin. Hisarlar Makina’s customers include manufacturers operating mainly in agriculture, construction, textile and automotive sectors. Additionally, Hisarlar Makina provides engineering support, design, prototyping, serial production, painting and final assembly to its customers.

As of 18 December 2012 the Company and its shareholders signed a loan agreement with European Bank for Reconstruction and Development (“EBRD”) and Nakina Finance S.A.R.L. (“Nakina”) (together the “Investors”). Depending upon this loan agreement, the shareholders of the Company has transferred 15.7% of their shares in the Company to EBRD and Nakina. According to the shareholders agreement signed between the parties, Investors have put option in order to transfer back the shares in the period starting from 1 January 2020 to 31 May 2020 when the repayments of the loans are finalized and the annual financial statements for the year ending 31 December 2019 are delivered to the Investors. The Group was experiencing liquidity problems due to the delays on its collections. Accordingly, as of 31 August 2016, the Group was unable to pay its cheques. Subsequently, some banks have recalled their loans commencing September 8th, 2016. Together with the recall of the loans, notification has been sent to all suppliers and customer in accordance with Article 89/1 of the Execution and Bankruptcy Law. Some suppliers have started to apply legal follow-up. Following all these developments, the Group was involved in the strategic partnership process and signed a Letter of Interest. During 2017, the Group has completed strategic partnership agreement with Mahindra Overseas Investment (“Mahindra”). Following the completion of this agreement, all borrowings including EBRD and Nakina loans that were subject to covenants are paid on 30 March 2017. Also Mahindra became new ultimate controlling party for the Group with 75% shares.

The Company has acquired 90% of the shares of Hisarlar Pazarlama İthalat ve İhracat A.Ş. (“Hisarlar Pazarlama”) from the shareholders of the Company on 14 August 2012. Hisarlar Pazarlama was under common control by the Company since the beginning of its operations until March 2017. In March 2017, the Company has acquired remaining 10% of Hisarlar Pazarlama shares. In addition, Hisarlar Kabin has been merged with Hisarlar Makina on 2 January 2012 as stated above.

Hisarlar Pazarlama started its operations in 2003 and operates in the import and export, marketing and market research activities of the products of Hisarlar Makina. Hisarlar Pazarlama mainly makes exports of different vehicles, machines and components to Europe and other continents of the world. Hisarlar Pazarlama’s customers include firms producing agricultural machines, construction machines, material handling equipments, special purpose vehicles, textile machines, medical equipment and automotives manufacturers. The address of the Hisarlar Pazarlama’s registered office is: Eskişehir - Bursa Yolu 20. km. 26550 M.Çukurhisar, Eskişehir, Turkey.

As of 31 December 2019, the Group employed 575 people (31 December 2018: 750).

2. BASIS OF PRESENTATION OF CONSOLIDATED FINANCIAL STATEMENTS

2.1 Basis of Presentation

The consolidated financial statements have been prepared on the historical cost basis except for the fair measurement of certain non-current assets.

In order to determine the historical cost, the fair values paid for assets are considered.

2.2 Statement of Compliance

The consolidated financial statements have been prepared in accordance International Financial Reporting Standards (“IFRS”).

2.3 Going Concern Assumptions and Management Plans

The consolidated financial statements of the Group are prepared on a going concern basis, which presumes the realization of assets and settlement of liabilities in the normal course of operations and in the foreseeable future. As of 31 December 2019, the Group’s short-term liabilities exceeds its current assets by TL 89.740.060 (31 December 2018: TL 143.857.707) based on the accompanying consolidated financial statements. In addition, the Group has completed the period ended 31 December 2019 with a net loss of TL 57.089.186 (31 December 2018: TL 66.111.399), total accumulated losses has reached TL 250.919.518 (31 December 2018: TL 185.479.652). Together with the effect of the accumulated losses and period loss, total of capital and restricted profit reserves is unsecured in accordance with Article 376 of Turkish Commercial Law. As of 31 December 2016, the Group had experienced liquidity problems due to the negative impact of the increase in foreign exchange rates on its loans and the negative operating income due to the maturity increases in sales transactions. Meanwhile, some loans of the Group were subject to certain covenants due to the contracts. According to these covenants, Group shall achive some performance criterion and shall satisfy spesific qualitative and quantitative criterion. As of 31 December 2016, the Group was in breach regarding certain loan covenants and no waiver letter had been provided regarding these breaches. Some creditors also had recalled their loans since the Group could not fulfill its payment obligations. The Group was involved in the strategic partnership process and signed a Letter of Interest. During 2017, the Group has completed strategic partnership agreement with Mahindra Overseas Investment (“Mahindra”). Following the completion of this agreement, all borrowings including EBRD and Nakina loans that were subject to covenants are closed on 30 March 2017. Mahindra became new ultimate controlling party for the Group with 75,1% ownership. Also, in 2018, the Group’s paid-in capital has increased by TL 70,000,000 (2017: TL 63,732,770) and Mahindra’s ownership hs incrased to 77,18%. Meanwhile there was an increase in paid-in capital of the Group amounting to TL 120.000.000 during 2019 (2018: TL 70.000.000) and Mahindra’s ownership has increased to 86,8%. The revenues of the Group has increased from TL 177.726.620 in 2018 to TL 197.133.387 in 2019. The group has increasing orders from customers in Metal Fabircation and Agriculture Machinery. As a results of these developments, the Group Management believes that the financial indicators of the Group will be positive and it can continue for the forseeable future.The Group foresees an increase of 70% in exports and 20% in the domestic market with new countries and projects added to its portfolio in the 2020 sales budget.

2.4 Functional Currency

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each entity are expressed in Turkish Lira, which is the functional, and presentation currency of the Company and the reporting currency for the consolidated financial statements.

2.5 Comparative Information and Restatement of Prior Period Consolidated Financial Statements

Consolidated financial statements of the Group have been prepared comparatively with prior period in order to give information about financial position and performance trends. If the presentation or classification of the financial statements is changed, in order to maintain consistency, financial statements of the prior periods are also reclassified in line with the related changes. The Group do not have any material reclassifications and corrections in current year.

2.6 Basis of Consolidation

As of 31 December 2019 and 31 December 2018, details of the Company's subsidiary are as follows:

	Group's proportion of ownership and voting power held (%)			
Subsidiary	**2019**	**2018**	**Place of incorporation and operation**	**Principle activity**
Hisarlar Pazarlama	100	100	Eskişehir	Trading

The accompanying consolidated financial statements include the financial statements of the Company and entity controlled by the Company (its subsidiary). Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Company, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiary is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Where necessary, adjustments are made to the financial statements of subsidiary to bring their accounting policies into line with those used by other members of the Group.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

2.7 Changes in the Accounting Policies

The signficant changes that were made on accounting policies applied retrospectively and the financial statements of preceding period are restated. No changes has been observed at the accounting policies of the Group in the current year.

2.8 Changes in Accounting Estimates and Errors

If changes in accounting estimates are related to only one period, the changes are applied prospectively in the current period in which changes are made. If changes in accounting estimates are related to future periods, the changes are applied prospectively both in the current period in which changes are made and also in future periods. No changes has been observed at the accounting estimates of the Group in the current year.

The accounting misstatements which are identified are applied retrospectively and consolidated financial statements of preceding period are restated. No material misstatement has been observed in order to restate the financial statements of the Group in the current year.

2.9 New and Amended International Financial Reporting Standards

a) Amendments to IFRSs that are mandatorily effective from 2019 year

IFRS 16	*Leases*
IFRS Interpretation 23	*Uncertainty over Income Tax Treatments*
Amendments to IAS 28	*Long-term Interests in Associates and Joint Ventures*
Amendments to IAS 19 Employee Benefits	*Plan Amendment, Curtailment or Settlement*
Annual Improvements to IFRS	*Amendments to IFRS 3 Business Combinations,*
Standards 2015–2017 Cycle	*IFRS 11 Joint Arrangements, IAS 12 Income Taxes and IAS 23 Borrowing Costs*

IFRS 16 *Leases*

General impact of application of IFRS 16 Leases

IFRS 16 provides a comprehensive model for the identification of lease arrangements and their treatment in the financial statements for both lessors and lessees. IFRS 16 supersedes the current lease guidance including IAS 17 Leases and the related Interpretations for accounting periods beginning on or after 1 January 2019. The date of initial application of IFRS 16 for the Group is 1 January 2019 retrospectively taking into account the cumulative effect in the financial statements.

In contrast to lessee accounting, IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17.

Impact of the new definition of a lease

The Group made use of the practical expedient available on transition to IFRS 16 not to reassess whether a contract is or contains a lease. Accordingly, the definition of a lease in accordance with IAS 17 and IFRS Interpretation 4 continue to apply to those leases entered or modified before 1 January 2019.

The change in definition of a lease mainly relates to the concept of control. IFRS 16 distinguishes between leases and service contracts on the basis of whether the use of an identified asset is controlled by the customer. Control is considered to exist if the customer has:

– The right to obtain substantially all of the economic benefits from the use of an identified asset; and

– The right to direct the use of that asset.

The Group applied the definition of a lease and related guidance set out in IFRS 16 to all lease contracts entered into or modified on or after 1 January 2019 (whether it is a lessor or a lessee in the lease contract).

Impact on Lessee Accounting

Operating leases

IFRS 16 changes how the Group accounts for leases previously classified as operating leases under IAS 17, which were off-balance sheet.

On initial application of IFRS 16, for all leases (except as noted below), the Group has:

a) Recognised right-of-use assets and lease liabilities in the consolidated statement of financial position, initially measured at the present value of the future lease payments;

b) Recognised depreciation of right-of-use assets and interest on lease liabilities in the consolidated statement of profit or loss;

c) Separated the total amount of cash paid into a principal portion (presented within financing activities) and interest (presented within operating activities) in the consolidated cash flow statement.

Lease incentives (e.g. rent-free period) are recognised as part of the measurement of the right-of-use assets and lease liabilities whereas under IAS 17 they resulted in the recognition of a lease liability incentive, amortised as a reduction of rental expenses on a straight-line basis.

Under IFRS 16, right-of-use assets are tested for impairment in accordance with IAS 36 Impairment of Assets. This will replace the previous requirement to recognise a provision for onerous lease contracts.

For short-term leases (lease term of 12 months or less) and leases of low-value assets (such as personal computers and office furniture), the Group opted to recognise a lease expense on a straight-line basis as permitted by IFRS 16.

As at 1 January 2019, implication of IFRS 16 has no significant impact on the financial statements of the Company.

Finance leases

The main differences between IFRS 16 and IAS 17 with respect to assets formerly held under a finance lease is the measurement of the residual value guarantees provided by the lessee to the lessor. TFRS 16 requires that the Group recognises as part of its lease liability only the amount expected to be payable under a residual value guarantee, rather than the maximum amount guaranteed as required by IAS 17.

Impact on Lessor Accounting

Under IFRS 16, a lessor continues to classify leases as either finance leases or operating leases and account for those two types of leases differently. However, IFRS 16 has changed and expanded the disclosures required, in particular regarding how a lessor manages the risks arising from its residual interest in leased assets.

Under IFRS 16, an intermediate lessor accounts for the head lease and the sublease as two separate contracts.

IFRS Interpretation 23 *Uncertainty over Income Tax Treatments*

This interpretation addresses the determination of taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates, when there is uncertainty over income tax treatments under IAS 12.

Amendments to IAS 28 *Long-term Interests in Associates and Joint Ventures*

This amendment clarifies that an entity applies IFRS 9 Financial Instruments to long-term interests in an associate or joint venture that form part of the net investment in the associate or joint venture but to which the equity method is not applied.

Amendments to IAS 19 *Plan Amendment, Curtailment or Settlement*

The amendments clarify that the past service cost (or of the gain or loss on settlement) is calculated by measuring the defined benefit liability (asset) using updated assumptions and comparing benefits offered and plan assets before and after the plan amendment (or curtailment or settlement) but ignoring the effect of the asset ceiling (that may arise when the defined benefit plan is in a surplus position).

Annual Improvements to IFRS Standards 2015–2017 Cycle

Annual Improvements to IFRS Standards 2015–2017 Cycle include amendments to IFRS 3 Business Combinations and IFRS 11 Joint Arrangements in when a party that participates in, but does not have joint control of, IAS 12 Income Taxes; income tax consequences of dividends in profit or loss, and IAS 23 Borrowing Costs in capitalized borrowing costs.

These standards, amendments and improvements have no impact on the financial position and performance of the Company.

b) New and revised International Financial Reporting Standards in issue but not yet effective

The Group has not yet adopted the following standards and amendments and interpretations to the existing standards:

IFRS 17	*Insurance Contracts*
Amendments to IFRS 3	*Definition of a Business*
Amendments to IAS 1 and IAS 8	*Definition of Material*
Amendments to IFRS 9, IAS 39 and IFRS 7	*Interest Rate Benchmark Reform*

IFRS 17 Insurance Contracts

IFRS 17 requires insurance liabilities to be measured at a current fulfillment value and provides a more uniform measurement and presentation approach for all insurance contracts. These requirements are designed to achieve the goal of a consistent, principle-based accounting for insurance contracts. IFRS 17 supersedes IFRS 4 Insurance Contracts as of 1 January 2021.

Amendments to IFRS 3 *Definition of a Business*

The definition of "business" is important because the accounting for the acquisition of an activity and asset group varies depending on whether the group is a business or only an asset group. The definition of "business" in IFRS 3 Business Combinations standard has been amended. With this change:

- By confirming that a business should include inputs and a process; clarified that the process should be essential and that the process and inputs should contribute significantly to the creation of outputs.
- The definition of a business has been simplified by focusing on the definition of goods and services offered to customers and other income from ordinary activities.
- An optional test has been added to facilitate the process of deciding whether a company acquired a business or a group of assets.

Amendments to IAS 1 and IAS 8 *Definition of Material*

The amendments in Definition of Material (Amendments to IAS 1 and IAS 8) clarify the definition of 'material' and align the definition used in the Conceptual Framework and the standards.

Amendments to IFRS 9, IAS 39 and IFRS 7 *Interest Rate Benchmark Reform*

The amendments clarify that entities would continue to apply certain hedge accounting requirements assuming that the interest rate benchmark on which the hedged cash flows and cash flows from the hedging instrument are based will not be altered as a result of interest rate benchmark reform.

2.10 Summary of Significant Accounting Policies

Related Parties

A related party is a person or entity that is related to the entity that is preparing its financial statements

a) A person or a close member of that person's family is related to a reporting entity if that person:

  (i) has control or joint control over the reporting entity;

  (ii) has significant influence over the reporting entity; or

  (iii) is a member of the key management personnel of the reporting entity or of a parent of the reporting entity.

(b) An entity is related to a reporting entity if any of the following conditions applies:

  (i) The entity and the reporting entity are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

(ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).

(iii) Both entities are joint ventures of the same third party.

(iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

(v) The entity is a post-employment benefit plan for the benefit of employees of either the reporting entity or an entity related to the reporting entity. If the reporting entity is itself such a plan, the sponsoring employers are also related to the reporting entity.

(vi) The entity is controlled or jointly controlled by a person identified in (a).

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

Revenue

The core principle of revenue recognition is that the Group should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the Standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation

Accordingly, Revenue is recognized when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer.

Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The Group recognizes revenue when it transfers control of a product or service to a customer.

The Group evaluates the agricultural machinery, welded components and cabins that it has committed in each contract with the customers and determines each commitment to transfer the said products or services as a separate performance obligation. For each performance obligation, it is determined at the beginning of the contract that the performance of the performance obligation will be satisfied in time or at a point of time. If the Group transfers the control of a goods or service over time and thus fulfills the performance obligations related to the related sales over time, it measures the progress of the satisfaction of the performance obligations in full and takes the proceeds to the financial statements.

The Group, as it satisfies the performance obligation by transferring a committed product or service to its customer, records the transaction price corresponding to this performance obligation as revenue in consolidated financial statements. The goods or services are transferred when the goods or services are checked (or passed) by the customers. The Group evaluates the transfer of control of the goods or services sold to the customer,

- ownership of the Group's right to collect goods or services,
- the ownership of the property of the customer,
- transfer of the ownership of the goods or services,
- the ownership of significant risks and rewards arising from the ownership of the property of the customer,
- takes into account the customer's acceptance of goods or services.

Rent Income

Rental income is recognized in the financial statements on a monthly basis.

Dividend and interest income

Dividend income from equity investments is recognized when the shareholders' right to receive dividends is established (as long as the Company can obtain economic benefits and the revenue can be measured reliably).

Interest income from financial assets is recognized when it is probable that the Company will obtain economic benefits and that the revenue can be measured reliably. Interest income is accrued in the relevant period at the effective interest rate that reduces the estimated cash inflows from the financial asset to the carrying amount of the asset during the expected life of the remaining principal amount.

Inventories

Inventories are stated at the lower of cost or net realizable value. The cost of inventories is determined on a weighted average basis. Net realizable value represents the estimated selling price less all estimated costs of completion and costs necessary to make a sale. When the net realizable value of inventory is less than cost, the inventory is written down to the net realizable value and the expense is included in statement of income/(loss) in the period the write-down or loss occurred. When the circumstances that previously caused inventories to be written down below cost no longer exist or when there is clear evidence of an increase in net realizable value because of changed economic circumstances, the amount of the write-down is reversed. The reversal amount is limited to the amount of the original write-down.

Property, plant and equipment

Land, buildings, plant, machinery and equipment are stated in the balance sheet at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The fair value at the date of revaluation is the estimated amount for which a property could be exchanged on the date of the valuation between a willing buyer and a willing seller in an arm's length transaction. Fair value determination is based on the market and cost approaches using quoted market prices for similar items when available and in some cases, using replacement cost when appropriate.

Any revaluation increase arising on the revaluation of such land, buildings and plant, machinery and equipment is credited in equity to the properties revaluation reserve, except to the extent that it reverses a revaluation decrease for the same asset previously recognized in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously charged. A decrease in carrying amount arising on the revaluation of such land, buildings and plant, machinery and equipment is charged to profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.

Depreciation on revalued buildings and plant, machinery and equipment is charged to profit or loss. On the subsequent sale or retirement of a revalued property, the related revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings. No transfer is made from the revaluation reserve to retained earnings except when an asset is derecognized.

Properties in the course of construction for production, rental or administrative purposes, or for purposes not yet determined, are carried at cost, less any recognized impairment loss. Cost includes professional fees. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Freehold land is not depreciated. Motor vehicles, furniture and fixtures, and leasehold improvements are carried at cost less accumulated depreciation and any accumulated impairment losses. Depreciation is charged so as to write off the cost or valuation of assets, other than land and properties under construction, over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at each year end, with the effect of any changes in estimate accounted for on a prospective basis.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets or, where shorter, the term of the relevant lease.

The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognized in profit or loss.

Leasing

The Group has applied IFRS 16 using the cumulative catch-up approach and therefore comparative information has not been restated and is presented under IAS 17. The details of accounting policies under both IAS 17 and IFRS 16 are presented separately below.

Policies applicable from 1 January 2019

The Group as lessee

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- fixed lease payments (including in-substance fixed payments), less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the lessee under residual value guarantees;
- the exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the consolidated statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

The Group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- a lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate at the effective date of the modification

The Group did not make any such adjustments during the periods presented.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Group expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the consolidated statement of financial position.

The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, Plant and Equipment' policy.

Variable rents that do not depend on an index or rate are not included in the measurement of the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in 'Other expenses' in profit or loss.

As a practical expedient, IFRS 16 permits a lessee not to separate non-lease components, and instead account for any lease and associated non-lease components as a single arrangement. The Group has not used this practical expedient. For a contracts that contain a lease component and one or more additional lease or non-lease components, the Group allocates the consideration in the contract to each lease component on the basis of the relative stand-alone price of the lease component and the aggregate stand-alone price of the non-lease components.

The Group as lessor

The Group enters into lease agreements as a lessor with respect to some of its investment properties. The Group also rents equipment to retailers necessary for the presentation and customer fitting and testing of footwear and equipment manufactured by the Group.

Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

When the Group is an intermediate lessor, it accounts for the head lease and the sublease as two separate contracts. The sublease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

When a contract includes lease and non-lease components, the Group applies IFRS 15 to allocate the consideration under the contract to each component.

Leasing Policy Applied Until 31 December 2018

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

The Group as lessor

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

The Group as lessee

Assets held under finance leases are initially recognized as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Group's general policy on borrowing costs.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Intangible assets

Computer software

Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortized over their estimated useful lives (3-5 years).

Internally-generated intangible assets – research and development expenditure

Expenditure on research activities is recognized as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognized if, and only if, all of the following have been demonstrated:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale;
- The intention to complete the intangible asset and use or sell it;
- The ability to use or sell the intangible asset;
- How the intangible asset will generate probable future economic benefits;
- The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- The ability to measure reliably the expenditure attributable to the intangible asset during its development

The amount initially recognized for internally-generated intangible assets is the sum of expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognized, development expenditure is charged to profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortization and accumulated impairment losses, on the same basis as intangible assets acquired separately.

Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

Financial assets

At initial recognition, Group measures a financial asset at its fair value plus or minus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset. When the Group uses settlement date accounting for an asset that is subsequently measured at amortised cost, the asset is recognised initially at its fair value on the trade date.

The Group reclassifies financial assets as subsequently measured at amortised cost, fair value through other comprehensive income or fair value through profit or loss on the basis of both:

a) the Group's business model for managing the financial assets and

b) the contractual cash flow characteristics of the financial asset.

When, and only when, the Group changes its business model for managing financial assets, it reclassifies all affected financial assets. The Group applies the reclassification prospectively from the reclassification date. The Group does not restate any previously recognised gains, losses (including impairment gains or losses) or interest.

Financial assets measured at amortised cost

A financial asset is measured at amortised cost if both of the following conditions are met:

(a) the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and

(b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Interest revenue of financial assets measured at amortised cost is calculated by using the effective interest method. This is calculated by applying the effective interest rate to the gross carrying amount of a financial asset except for:

(a) purchased or originated credit-impaired financial assets. For those financial assets, the Group applies the credit-adjusted effective interest rate to the amortised cost of the financial asset from initial recognition.

(b) financial assets that are not purchased or originated credit-impaired financial assets but subsequently have become credit-impaired financial assets. For those financial assets, the Group applies the effective interest rate to the amortised cost of the financial asset in subsequent reporting periods.

When the contractual cash flows of a financial asset are renegotiated or otherwise modified and the renegotiation or modification does not result in the derecognition of that financial asset, the Group recalculates the gross carrying amount of the financial asset and recognises a modification gain or loss in profit or loss.

The Group directly reduces the gross carrying amount of a financial asset when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

IAS 39 and IFRS 9 comparison based on the classification for financial assets and liabilities are given in Note 2.9

Financial assets measured at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following conditions are met:

(a) the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and

(b) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A gain or loss on a financial asset measured at fair value through other comprehensive income is recognised in other comprehensive income, except for impairment gains or losses and foreign exchange gains and losses, until the financial asset is derecognised or reclassified. When the financial asset is derecognised the cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. If the financial asset is reclassified out of the fair value through other comprehensive income measurement category, the Group accounts for the cumulative gain or loss that was previously recognised in other comprehensive income in consolidated financial statements. Interest calculated using the effective interest method is recognised in profit or loss.

At initial recognition, the Group may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value of an investment in an equity instrument that is not held for trading.

Financial assets measured at fair value through profit or loss

A financial asset shall be measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income.

Impairment

The Group recognises a loss allowance for *expected credit* losses on financial assets that are measured at amortized cost or fair value through other comprehensive income.

The Group applies the impairment requirements for the recognition and measurement of a loss allowance for financial assets that are measured at fair value through other comprehensive income. However, the loss allowance is recognised in other comprehensive income and does not reduce the carrying amount of the financial asset in the consolidated statement of financial position.

At each reporting date, the Group measures the loss allowance for a financial instrument at an amount equal to the *lifetime expected credit losses* if the credit risk on that financial instrument has increased significantly since initial recognition.

If, at the reporting date, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses except for purchased or originated credit impaired financial assets. For purchased or originated credit-impaired financial assets, the Group only recognises the cumulative changes in lifetime expected credit losses since initial recognition as a loss allowance at the reporting date.

The Group measures the loss allowance at an amount equal to lifetime expected credit losses for trade receivables and other receivables that do not contain a significant financing component, which is referred as simplified approach.

Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date. For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate.

Derivative financial instruments

The Group enters into a variety of derivative financial instruments to manage its exposure to foreign exchange rate risks with foreign exchange forward contracts.

Derivatives are recognised initially at fair value at the date a derivative contract is entered into and are subsequently remeasured to their fair value at each reporting date. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

A derivative with a positive fair value is recognised as a financial asset whereas a derivative with a negative fair value is recognised as a financial liability. Derivatives are not offset in the financial statements unless the Group has both legal right and intention to offset. A derivative is presented as a non-current asset or a non-current liability if the remaining maturity of the instrument is more than 12 months and it is not expected to be realised or settled within 12 months. Other derivatives are presented as current assets or current liabilities.

Financial liabilities

At initial recognition, the Group measures a financial liability at its fair value plus or minus, in the case of a financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the issue of the financial liability.

The Group classifies all financial liabilities as subsequently measured at amortised cost, except for:

(a) financial liabilities at fair value through profit or loss: Such liabilities, including derivatives that are liabilities, are subsequently measured at fair value.

(b) financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies. If a transfer does not result in derecognition because the Group has retained substantially all the risks and rewards of ownership of the transferred asset, the Group continues to recognise the transferred asset in its entirety and recognises a financial liability for the consideration received. In subsequent periods, the Group recognises any income on the transferred asset and any expense incurred on the financial liability.

(c) contingent consideration recognised by an acquirer in a business combination to which IFRS 3 applies. Such contingent consideration is subsequently be measured at fair value with changes recognised in profit or loss.

The Group does not reclassify any financial liability.

Foreign currency transactions

The individual financial statements of each Group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each entity are expressed in TL, which is the functional currency of the Group, and the presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than TL (foreign currencies) are recorded at the rates of exchange prevailing on the dates of the transactions. At each balance sheet date, monetary items denominated in foreign currencies are retranslated at the rates prevailing on the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined.

Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Gains and losses arising on settlement and translation of foreign currency items are included in the consolidated statement of comprehensive income.

Exchange differences are recognised in profit or loss in the period in which they arise except for:

- Exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets where they are regarded as an adjustment to interest costs on those foreign currency borrowings;

- Exchange differences on transactions entered into in order to hedge certain foreign currency risks (see below for hedging accounting policies); and

- Exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur, which form part of the net investment in a foreign operation, and which are recognised in the foreign currency translation reserve and recognised in profit or loss on disposal of the net investment.

Events after the reporting period

Events after the reporting period are those events that occur between the balance sheet date and the date when the financial statements are authorized for issue, even if they occur after an announcement related with the profit for the year or public disclosure of other selected financial information.

The Group adjusts the amounts recognized in its financial statements if adjusting events occur after the balance sheet date.

Provisions, Contingent Assets and Liabilities

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Investment property

Investment properties are properties held to earn rentals and/or for capital appreciation, including property under construction for such purposes. Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value. Gains or losses arising from changes in the fair values of investment properties are included in the profit or loss in the year in which they arise.

The Group's investment properties are valued by external, independent valuation companies on a periodic basis. The fair values are based on market values, being the estimated amount for which a property could be exchanged on the date of the valuation between a willing buyer and a willing seller in an arm's length transaction and discounted cash flows expected to be received. In arriving at an estimate of cash flows, the Group considers its occupancy rate, lease commitment factors and the economic life of the investment property.

When the use of a property changes such that it is reclassified as property, plant and equipment, its fair value at the date of reclassification becomes its cost for subsequent accounting.

If owner occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under "Property, Plant and Equipment" up to the date of change in use.

Investment properties are derecognized when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in profit or loss in the year of retirement or disposal. Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, the Group accounts for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use. No assets held under operating lease have been classified as investment properties.

Taxation and deferred income taxes

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the comprehensive income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the balance sheet date.

Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases which is used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized.

Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the balance sheet date. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset realized. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Current and deferred tax for the period

Current and deferred tax are recognized as in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity.

Employment benefits

Termination and retirement benefits

Under Turkish law and union agreements, lump sum payments are made to employees retiring or involuntarily leaving the Company. Such payments are considered as being part of defined retirement benefit plan as per International Accounting Standard No. 19 (revised) “Employee Benefits” (“IAS 19”).

The retirement benefit obligation recognized in the consolidated financial statements represents the present value of the defined benefit obligation. Calculated whole actuarial gains and loses are recognized in other comprehensive income.

Statement of cash flows

Current period statement of cash flows is categorized and reported as operating, investing and financing.

Share capital and dividends

Common shares are classified as equity. Dividends on common shares are recognised in equity in the period in which they are approved and declared.

2.11 Critical accounting judgments and key sources of estimation uncertainty

Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is discussed below:

Useful lives of property, plant and equipment and intangible assets

The Group reviews the estimated useful lives of its property, plant and equipment and intangible assets at the end of each reporting period. The Group takes into consideration the intended use of the property, plant and equipment and intangible assets, the advancement in technology related to the particular type of property, plant and equipment as well as other factors that may require management to extend or shorten the useful lives and the assets’ related depreciation.

The Group considers the useful lives of property, plant and equipment and intangible assets as described in Note 9 and 10.

Determination of fair values of property, plant and equipment

The fair values of property, plant and equipment are based on valuations, performed by independent valuers, who hold recognized and relevant professional qualifications. The valuations are based primarily on comparable fair market value of lands and, estimating costs to rebuild the building in the new economic conditions.

Calculation for loss allowance

When measuring ECL the Group uses reasonable and supportable forward looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other.

Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, taking into account cash flows from collateral and integral credit enhancements.

Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions and expectations of future conditions.

Judgements in determining the timing of satisfaction of performance obligations

Management takes into account the detailed conditions stated in IFRS 15, in particular the control of goods and services, to the customer regarding the fulfillment of the performance obligations and the recording of the allocated transaction costs as revenue.

Internally-generated intangible assets

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognized only if the technical feasibility and the intention to complete the intangible asset, the ability to use or sell the intangible asset are demonstrated, how the intangible asset will generate probable future economic benefits is determined, adequate technical, financial and other resources to complete the development and to use or sell the intangible asset is available and the expenditure attributable to the intangible asset during its development can be reliably measured. Other development expenditures that do not meet these criteria are recognized as expense when incurred. The Group Management considers that the internally-generated intangible assets will generate economic benefits and management is confident that the carrying amount of the assets will be recovered in full.

Deferred taxes

Deferred tax assets and liabilities are recorded using substantially enacted tax rates for the effect of temporary differences between book and tax bases of assets and liabilities. Based on available evidence, both positive and negative, it is determined whether it is probable that all or a portion of the deferred tax assets will be realized. If based on the weight of all available evidence, it is the Group’s belief that taxable profit will not be available sufficient to utilize some portion of these deferred tax assets, then some portion of or all of the deferred tax assets is not recognized.

3. INTERESTS IN OTHER ENTITIES

Subsidiaries

Details of the Group's material subsidiaries as of 31 December 2019 and 2018 are as follows:

Name of subsidiary	Operation	Place of incorporation and operation	Proportion of ownership interest and (%) 31 December 2019	31 December 2018
Hisarlar Pazarlama	Trade	Eskişehir	**100**	100

The summarised financial information below represents amounts before intragroup eliminations.

	2019 Hisarlar Pazarlama	2018 Hisarlar Pazarlama
Current assets	**19.437.023**	22.092.503
Non current assets	**93.466**	32.971
Current liabilities	**(4.302.612)**	(6.071.437)
Equity attributable to owners of the Company	**(15.227.877)**	(16.054.037)
Revenue	**123.083.218**	92.262.343
Expenses	**(123.909.378)**	(92.789.130)
Profit / loss for the year	**(826.160)**	(526.787)

4. RELATED PARTY TRANSACTIONS

The non-trade receivables from related parties arise mainly from financial needs of the related parties and are due in 60 days. The receivables are unsecured in nature and bear no interest.

The trade payables to related parties arise mainly from purchase transactions and are due two months after the date of purchase. The payables bear no interest and are payable under normal terms.

The non-trade payables to related parties arise mainly from financial needs of the Group and are due in 120 days. The payables are unsecured in nature and bear no interest.

5. TRADE RECEIVABLES AND PAYABLES

a) Trade Receivables:

As at the balance sheet date, trade receivables of the Group are summarized below:

	31 December 2019	31 December 2018
Current trade receivables		
Trade receivables	**31.688.754**	38.990.269
Notes receivable	**12.178.576**	23.675.514
Trade receivables from related parties (Note 4)	**2.562.957**	2.416.344
Expected credit losses (-)	**(526.206)**	(235.548)
Allowance for doubtful receivables (-)	**(17.080.870)**	(13.770.495)
	28.823.211	51.076.084

The average credit period is 122 days (31 December 2018: 139 days). No interest is charged for the overdue trade receivables. No collateral is received for trade receivables.

As of 31 December 2019, trade receivables of TL (17.080.870) (31 December 2018: TL 13.770.495) were considered as impaired and a provision was provided for these trade receivables.

Movement in the allowance for doubtful receivables are as follows:

	1 January-31 December 2019	1 January-31 December 2018
Balance at beginning of the year, 1 January	**13.770.495**	11.546.746
Period charge (Note: 18)	**3.318.142**	2.625.099
Collections	**(7.767)**	(401.350)
Closing balance, 31 December	**17.080.870**	13.770.495

Explanations on nature and level of risks of trade receivables are disclosed in Note 24.

b) Trade Payables:

As of balance sheet date, the details of the Group's trade payables are as follows:

<u>Short term trade payables</u>	**31 December 2019**	31 December 2018
Trade payables	**28.626.620**	36.372.201
Notes payables	**–**	24.247
Trade payables to related parties (Note: 4)	**329.403**	–
Expense accruals	**2.342.751**	1.088.520
	31.298.774	37.484.968

The average credit period on purchases of goods and services is 77 days and no interest is charged by vendors on the outstanding balance (31 December 2018: 96 days).

6. OTHER RECEIVABLES AND PAYABLES

a) Other Receivables:

Other Current Receivables	**31 December 2019**	31 December 2018
Deposits and guarantees given	**540.975**	718.045
Due from personnel	**73.064**	104.246
Other current receivables	**2.629.752**	2.638.842
	3.243.791	3.461.133

Other Non-current Receivables	**31 December 2019**	31 December 2018
Deposits and guarantees given	**61.216**	396.914
	61.216	396.914

7. INVENTORIES

The following useful lives are used in the calculation of depreciation:

	Useful life
Buildings	50 years
Plant, machinery and equipment	5-12 years
Motor vehicles	5 years
Furniture and fixtures	3-10 years
Leasehold improvements	12-15 years

Depreciation expense of TL 6.427.711 has been charged to cost of sales (31 December 2018: TL 11.531.240), TL 330.995 to research and development expenses (31 December 2018: TL 140.142), TL 110.718 to selling and marketing expenses (31 December 2018: TL 115.404) and TL 1.969.139 to general administrative expenses (31 December 2018: TL 350.802).

An independent valuation on the Group's land, buildings and machinery was done by Vera Gayrimenkul Değerleme ve Danışmanlık A.Ş., independent valuers not connected with the Group, on 8 December 2016. Vera Gayrimenkul Değerleme ve Danışmanlık A.Ş. is one of the accredited independent valuers by the Capital Markets Board of Turkey. Fair values of the Group's land were estimated based on valuation techniques which conform to International Valuation Standards in main principles which take into account comparable fair market value of land that share similar characteristics to the Group's assets. For the determination of fair value of buildings, cost method has been applied. Cost method includes estimating the costs to rebuild the building in the new economic conditions. Physical condition, maintenance, performance, position in the sector and storage capacity factors which may effect the fair value are considered, detailed market research is performed and current economic conditions for the country is considered for property, plant and equipment. The fair value hierarchy level of these lands and buildings are level 2.

If land, buildings and plant,machinery and equipment were stated on the historical cost basis, the amounts would be as follows:

	31 December 2019	31 December 2018
Cost	**124.505.988**	115.791.818
Accumulated depreciation	**(56.717.351)**	(50.431.714)
Net book value	**67.788.637**	65.360.104

The following useful lives are used in the calculation of depreciation:

	Useful life
Capitalised development costs	5 years
Other intangible assets	3-5 years

Amortization expense of TL 1.179.708 has been charged to cost of sales (31 December 2018: TL 1.074.464), TL 60.749 to research and development expenses (31 December 2018: TL 13.058), TL 20.321 to selling and marketing expenses (31 December 2018: TL 10.753) and TL 361.407 to administrative expenses (31 December 2018: TL 32.688).

11. INVESTMENT PROPERTY

	1 January-31 December 2019	1 January-31 December 2018
Opening value	**1.643.000**	1.643.000
Closing value	**1.643.000**	1.643.000

Investment properties of the Group are composed of several lands located in Eskişehir.

The fair value of the Group's investment property has been arrived at on the basis of a valuation carried out by Vera Gayrimenkul Değerleme ve Danışmanlık A.Ş., independent valuers not connected with the Group, on 8 December 2016. Vera Gayrimenkul Değerleme ve Danışmanlık A.Ş. is one of the accredited independent valuers by the Capital Markets Board of Turkey. The valuation, which conforms to International Valuation Standards in main principles, was arrived at by reference to market evidence of transaction prices for similar properties. The fair value hierarchy level of these assets are level 2.

12. COMMITMENTS AND CONTINGENCIES

Guarantees, Pledges and Mortgages ("GPM") position of the Company as of 31 December 2019 and 31 December 2018 are as follows:

31 December 2019	**TL equivalent**
A. Total Amount of GPM given on behalf of the legal entity	
– *Letters of guarantee*	**9.711.216**
– *Mortgages*	**–**

Defined benefit obligations	**–**	774.369
	1.426.678	2.088.707

Long-term provisions for employee benefits

	31 December 2019	31 December 2018
Defined benefit obligations	**8.813.847**	7.116.154
	8.813.847	7.116.154

Defined Benefit Obligations

Under Turkish Labor Law, the Group is required to pay termination benefits to each employee who has completed certain years of service and whose employment is terminated without due cause, is called up for military service, dies or achieves the retirement age (58 for women and 60 for men).

The amount payable consists of one month's salary limited to a maximum of TL 6.379,86 (2018: TL 5.434,42) for each period of service at 31 December 2019.

Retirement pay liability is not subject to any kind of funding legally. Provision for retirement pay liability is calculated by estimating the present value of probable liability amount arising due to retirement of employees. IAS 19 *Employee Benefits* stipulates the development of company's liabilities by using actuarial valuation methods under defined benefit plans. In this direction, actuarial assumptions used in calculation of total liabilities are described as follows:

The principal assumption is that the maximum liability for each year of service will increase parallel with inflation. Thus, the discount rate applied represents the expected real rate after adjusting for the anticipated effects of future inflation. Consequently, in the accompanying financial statements as at 31 December 2019, the provision has been calculated by estimating the present value of the future probable obligation of the Company arising from the retirement of the employees. The provisions at the respective balance sheet dates have been calculated with the assumption of an annual inflation rate of 8% and a discount rate of 12,5%, resulting in a real discount rate of approximately 4,17% (31 December 2018: discount rate of approximately 5,45%). Estimated amount of retirement pay not paid due to voluntary leaves and retained in the Company is also taken into consideration. The rate of voluntary leaves and retained in the Company is taken between %7,73 for 0-15 years employee and %0 for more than 16 years employees. Ceiling for retirement pay is revised semi-annually. Ceiling amount of TL 6.730,15 (1 January 2019: 6.017,60) which is in effect since 1 January 2020 is used in the calculation of Group's provision for retirement pay liability.

Movement of provisions for employee benefits

	1 January-31 December 2019	1 January-31 December 2018
Provision at 1 January	**7.890.523**	7.122.345

Income tax recognised directly in equity

	1 January- 31 December 2019	1 January- 31 December 2018
Deferred tax		
Arising on income and expense taken directly to equity:		
– Actuarial gains and losses	**(326.972)**	(153.006)
Total deferred tax recognised directly in equity	**(326.972)**	(153.006)

Corporate Tax

The Group is subject to Turkish corporate taxes. Provision is made in the accompanying financial statements for the estimated charge based on the Group's results for the years and periods. Turkish tax legislation does not permit a parent company and its subsidiary to file a consolidated tax return. Therefore, provisions for taxes, as reflected in the accompanying consolidated financial statements, have been calculated on a separate-entity basis.

Corporate tax is applied on taxable corporate income, which is calculated from the statutory accounting profit by adding back non-deductible expenses, and deducting exempt income, non-taxable income and other incentives (previous years losses, if any, and investment incentives utilized, if preferred).

The effective tax rate in 2019 is 22% (2018: 22%).

In Turkey, advance tax returns are filed on a quarterly basis. Advance corporate income tax rate applied in 2019 is 22% (2018: 22%). Losses can be carried forward for offset against future taxable income for up to 5 years. However, losses cannot be carried back for offset against profits from previous periods.

Furthermore, there is no procedure for a final and definitive agreement on tax assessments. Companies file their tax returns between 1-25 April following the close of the accounting year to which they relate. Tax authorities may, however, examine such returns and the underlying accounting records and may revise assessments within five years.

The Law numbered 7061 on Amendment of Certain Taxes and Laws and Other Acts was published on the Official Gazette dated December 5, 2017 and numbered 30261. Article 5 entitled "Exceptions" of the Corporate Tax Law has been amended in Article 89 of the Law. In accordance with (a) clause in the first paragraph of the Article, the exemption of 75% applied to gains from the sales of lands and buildings held by the entities for two full years has been reduced to rate of 50%. This regulation has been effective from 5 December 2017.

Income Witholding Tax

In addition to corporate taxes, companies should also calculate income withholding taxes and funds surcharge on any dividends distributed, except for companies receiving dividends who are Turkish residents and Turkish branches of foreign companies. Income withholding tax applied in between 24 April 2003 – 22 July 2006 is 10% and commencing from 22 July 2006, this rate has been changed to 15% upon the Council of Minister's' Resolution No: 2006/10731. Undistributed dividends incorporated in share capital are not subject to income withholding tax.

Withholding tax at the rate of 19,8% is still applied to investment allowances relating to investment incentive certificates obtained prior to 24 April 2003. Subsequent to this date, the investments without investment incentive certificates do not qualify for tax allowance.

Deferred tax:

The Group recognizes deferred tax assets and liabilities based upon temporary differences arising between its financial statements as reported for IFRS purposes and its statutory tax financial statements. These differences usually result in the recognition of revenue and expenses in different reporting periods for IFRS and tax purposes and they are given below.

Tax rate used in the calculation of deferred tax assets and liabilities was %22 over temporary timing differences expected to be reversed in 2018, 2019 and 2020, and %20 over temporary timing differences expected to be reversed in 2021 and the following years (2018: 20%).

Deferred tax (assets)/liabilities:	**31 December 2019**	31 December 2018
Restatement and depreciation/ amortization differences of property, plant and equipment and other intangible assets	**(3.297.583)**	(778.225)
Provision for employment termination benefits	**(1.762.769)**	(1.578.105)
Provisions for legal cases	**(194.858)**	(171.268)
Provision for doubtful receivables	**(574.796)**	(811.030)
Unused vacation liabilities	**(285.336)**	(262.868)
Discount of notes receivable/ payable (net)	**(100.425)**	(370.043)
Accruals for loans	**(24.019)**	(22.315)
Other	**(398.616)**	(193.155)
	(6.638.402)	(4.187.009)

Movement of deferred tax (assets) / liabilities for year ended 31 December 2019 and 31 December 2018 are as follows:

Movement of deferred tax (asset)/ liabilities:	**1 January- 31 December 2019**	1 January- 31 December 2018
Opening balance as of 1 January	**(4.187.009)**	(954.177)
Charged to income	**(2.124.421)**	(3.079.826)
Charged to equity	**(326.972)**	(153.006)
Closing balance at 31 December	**(6.638.402)**	(4.187.009)

Current period tax reconciliation is as follows:

Tax Reconciliation:	**1 January- 31 December 2019**	1 January- 31 December 2018
Profit/(loss) for the period	**(59.213.607)**	(69.191.225)
Tax at the domestic income tax rate of 22% (2018:22%)	**(13.026.994)**	(15.222.070)
Tax effects of:		
– expenses that are not deductible	**2.091.194**	1.007.476
– unrecognized deferred tax assets over tax losses	**12.530.340**	14.314.234
– other	**(471.896)**	(228.271)
– non taxable adjustments	**(3.247.065)**	(2.951.195)
	(2.124.421)	(3.079.826)

Expiration schedule of carry forward tax losses is as follows:

	31 December 2019	31 December 2018
Expiring in 2020	**–**	4.385.057
Expiring in 2021	**32.781.718**	32.781.718
Expiring in 2022	**29.145.507**	29.145.507
Expiring in 2023	**65.064.698**	65.064.698
Expiring in 2024	**56.956.091**	–
	183.948.014	131.376.980

23. FINANCIAL INSTRUMENTS

Financial Liabilities

The detail of borrowings of the Group as of 31 December 2019 and 31 December 2018 is as follows:

Financial Liabilities	**31 December 2019**	31 December 2018
a) Bank Borrowings	**132.279.439**	193.752.574
b) Obligations Under Finance Leases	**673.924**	2.929.221
	132.953.363	196.681.795

a) Bank Borrowings:

The detail of borrowings is as follows:

Currency Type	Weighted Average Effective Interest Rate	**31 December 2019**	
		Current	**Non-current**
TL	13,09%	**132.279.439**	**–**
		132.279.439	**–**

Currency Type	Weighted Average Effective Interest Rate	31 December 2018	
		Current	Non-current
TL	25,26%	189.048.956	–
EUR	0,65%	4.703.618	–
		193.752.574	–

The redemption schedule of the borrowings as of 31 December 2019 and 31 December 2018 is as follows:

The borrowings are repayable as follows:

	31 December 2019	31 December 2018
To be paid within 1 year	**132.279.439**	193.752.574
	132.279.439	193.752.574

As of 31 December 2019 and 31 December 2018, the movement of bank borrowings is as follows:

			Non-Cash Changes			
	1 January 2019	**Net Cash Flow**	**Change in Interest Accrual**	**Foreign exchange differences**	**Debt conversion into captial**	**31 December 2019**
Bank Borrowings	**193.752.574**	**(65.404.394)**	**2.790.476**	**1.140.783**	**–**	**132.279.439**
	193.752.574	**(65.404.394)**	**2.790.476**	**1.140.783**	**–**	**132.279.439**

			Non-Cash Changes			
	1 January 2018	Net Cash Flow	Change in Interest Accrual	Foreign exchange differences	Debt conversion into captial	31 December 2018
Bank Borrowings	179.062.347	13.192.928	888.964	608.335	–	193.752.574
	179.062.347	13.192.928	888.964	608.335	–	193.752.574

b) Obligations Under Finance Leases:

	Minimum lease payments		**Present value of minimum lease payments**	
	31 December 2019	31 December 2018	**31 December 2019**	31 December 2018
<u>Finance Lease Payables</u>				
Amounts payable under finance leases	**696.421**	3.225.585	**673.924**	2.929.221
Within one year	**696.421**	2.532.906	**673.924**	2.262.652
In the second to fifth years	**–**	692.679	**–**	666.569
Less : Future finance charges	**(22.497)**	(296.364)	**–**	–
Present value of finance lease obligations	**673.924**	2.929.221	**673.924**	2.929.221
Less: Amounts due to settlement within twelve months (shown under current liabilities)			**(673.924)**	(2.262.652)
Amounts due for settlement after 12 months			**–**	666.569

The interest rates of the finance leases are fixed for all lease periods at the contract date. The weighted average effective contractual interest rate is approximately 6% for TL and 13% for EUR (31 December 2018: 22% for TL and 8% for EUR)

24. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

a) Capital risk management

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximizing the return to stakeholders through the optimization of the debt and equity balance.

The Group controls its capital using the net debt/total capital ratio. This ratio is calculated as net debt divided by the total capital amount. Net debt is calculated as total liability amount less cash and cash equivalents. Total capital is calculated as shareholders' equity plus the net debt amount as presented in the balance sheet.

As of 31 December 2019 and 31 December 2018 net debt / total capital ratio is as follows:

	1 January-31 December 2019	1 January-31 December 2018
Total Debts (Note: 23)	**132.953.363**	196.681.795
Less: Cash and Cash Equivalents (Note: 27)	**(2.070.344)**	(615.264)
Net Debt	**130.883.019**	196.066.531
Total Equity	**7.156.704**	(54.446.226)
Total Capital	**138.039.723**	141.620.305
Total Debt/Total Capital Ratio	**96%**	100%

b) Financial risk factors

The risks of the Group, resulted from operations, include market risk, credit risk and liquidity risk. The Group's risk management program generally seeks to minimize the effects of uncertainty in financial market on financial performance of the Group.

b.1) Credit risk management

Credit risk refers to the risk that counterparty will default on its contractual obligations resulting in financial loss to the Group. Financial instruments of the Group that will result in concentration of credit risk mainly include cash and cash equivalents and trade receivables. The Group's maximum exposure to credit risk is the same as the amounts recognized in the consolidated financial statements.

The Group has cash and cash equivalents at several financial institutions. The Group manages this risk by continuously evaluating the reliability of these financial institutions.

Credit risk arising from trade receivables is limited due to the large number of customers and the policy of the Group to limit the credit amount of customers. The Group generally prefers to collect cheques to increse the credit limits of its customers except its dealers.

Credit risk of financial instruments	**Receivables**				
	Trade Receivables		**Other Receivables**		
31 December 2019	**Third Party**	**Related Party**	**Third Party**	**Related Party**	**Bank Deposits**

Explanations on the credit quality of financial assets

Credit quality of financial assets that are past due but not impaired, which is evaluated based on external evaluations and retrospective internal evaluations, is as follows:

Aging of overdue receivables is as follows:

31 December 2019	**Receivables**		
	Trade receivables	**Other receivables**	**Total**
Up to 1 year	**3.288.534**	**–**	**3.288.534**
Past due 1-5 year	**43.843**	**–**	**43.843**
Total past due receivables	**3.332.377**	**–**	**3.332.377**
Secured portion of receivables by gurantees, etc.	**–**	**–**	**–**

31 December 2018	**Receivables**		
	Trade receivables	**Other receivables**	**Total**
Up to 1 year	2.706.059	–	2.706.059
Past due 1-5 year	18.889	–	18.889
Total past due receivables	2.724.948	–	2.724.948
Secured portion of receivables by gurantees, etc.	**–**	**–**	**–**

b.2) Liquidity risk management

Ultimate control for liquidity risk management rests with the Board of Directors, which aims to maintain an appropriate liquidity risk management framework for the Company's short, medium and long-term funding and liquidity management requirements.

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The table includes both interest and principal cash flows.

The maturities of the financial liabilities determined with respect to the contracts including the expected interest payments as of 31 December 2019 and 2018 is as follows:

31 December 2019

Contructual maturity analysis	**Net book value**	**Net cash outflows (I+II+III)**	**1-3 months (I)**	**3 months-1 year (II)**	**1-5 years (III)**
Non- derivative

b.3.1) Market risk management

The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates and interest rates. Foreign currency risk is managed through balancing the liabilities and receivables in foreign currencies.

Market risk exposures of the Group are measured using sensitivity analysis.

There has been no change to the Group's exposure to market risks or the manner in which it manages and measures the risk.

b.3.2) Foreign currency risk management

Transactions in foreign currencies expose the Group to foreign currency risk. Foreign currency risk is managed by balancing the liabilities and receivables in foreign currencies.

As of 31 December 2019 and 2018 the foreign currency denominated assets and liabilities of monetary and non-monetary items are as follows:

		31 December 2019	
	USD	**Euro**	**Total TL Equivalent**
Cash and Cash Equivalents	**754**	**153.688**	**1.026.595**
Trade Receivables	**399.680**	**1.904.958**	**15.043.291**
Given Advances	**4.915**	**527.340**	**3.536.322**
Obligation Under Finance Leases	**–**	**(42.616)**	**(283.419)**
Trade Payables	**(1.719.000)**	**(458.498)**	**(13.260.492)**
Net Foreign Currency Position	**(1.313.651)**	**2.084.872**	**6.062.297**

		31 December 2018	
	USD	**Euro**	**Total TL Equivalent**
Cash and Cash Equivalents	1.094	12.240	79.539
Trade Receivables	358.606	3.109.715	20.631.952
Bank Borrowings	–	(780.295)	(4.703.618)
Obligation Under Finance Leases	–	(100.772)	(607.453)
Trade Payables	(2.487.998)	(769.434)	(17.727.258)
Net Foreign Currency Position	(2.128.298)	1.471.454	(2.326.838)

The following table details the Group's sensitivity to a 20% increase and decrease in USD, and EURO. 20% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 20% change in foreign currency rates. A negative number indicates an decrease in profit or loss.

	USD Effect		**EUR Effect**	
	2019	2018	**2019**	2018
Profit or Loss	**(1.560.670)**	(2.239.353)	**2.773.130**	1.773.985

b.3.3) Interest rate risk management

The Group is exposed to interest rate risk as entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings. The related risks are managed through natural methods which are resulting from the netting of receivables and liabilities dependent to interest rates. The interest rates of financial assets and liabilities are stated in the related notes.

Interest rate sensitivity

The sensitivity analysis of financial instruments is presented below:

Interest Position Table

	31 December 2019	31 December 2018
Financial Instruments with Fixed Interest Rate		
Financial Borrowings	**103.679.439**	107.247.574
Other Financial Liabilities	**673.924**	2.929.221
Financial Instruments with Floating Interest Rate		
Financial Borrowings	**28.600.000**	86.505.000

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the balance sheet date. For floating rate liabilities, the analysis is prepared assuming the amount of liability outstanding at the balance sheet date was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Group's:

Profit for the year ended 31 December 2019 would decrease/increase by TL 139.495 (2018: TL 17.040) This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings.

NOTES FOR THE CALENDAR YEAR 2019

1. **General Declarations**

- The Books of Accounts of Hisarlar İthalat İhracat Pazarlama Anonim Şirketi (Hispa) are not required to be audited as per Turkish Commercial Code as it does not satisfy the minimum criteria set for Independent audit. Consequently, the Books of Accounts are maintained under Turkish Tax Procedure Law (VUK).
- The financial year is identical to the calendar year.
- The income statement has been prepared according to the nature of expense method.
- The functional currency of the company is measured using the currency of the economic environment in which the company operates.

2. **Accounting and Valuation Principles**

2.1 Inventories

Trade Goods are balanced at acquisition cost. Write-downs to the lower market value have been made where necessary.

2.2 Receivables, other assets and liquid funds

Trade Receivables, other assets and liquid funds are balanced at face value.

2.3 Liabilities

Trade payables are shown at their repayment values.

2.4 Currency Translation

All foreign currency balances are restated at the closing forex buy rate as indicated by Türkiye Cumhuriyet Merkez Bankası.

2.5 Revenues

Export revenues are recorded once the goods clear the Turkey Customs.

3. **Parent Company**

Hispa is a wholly owned subsidiary of HİSARLAR MAKİNA SANAYİ VE TİCARET A.Ş.

INDEPENDENT AUDITORS REPORT ON FINANCIAL STATEMENTS

To the board of directors of Erkunt Traktör Sanayi Anonim Şirketi

Opinion

We have audited the financial statements of Erkunt Traktör Sanayii A.Ş., which comprise the statement of financial position as at December 31, 2019, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at December 31,2019 , and of its financial performance and its cash flows for the year then ended in accordance with Turkish Accounting Standards.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Code of Ethics for Independent Auditors issued by Public Oversight, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key Audit Issues	How the Issues Dealt with in the Audit
Trade Receivables The Company's trade receivables from non-related parties are an important part of total assets. The Company management takes into account the collaterals received from customers, past collection performances, maturity analysis, disputes or claims regarding receivables when assessing the recoverability of trade receivables. As a result of these evaluations, the determination of doubtful receivables and the provisions for these receivables and the determination of the receivable values that have been reduced (reducing deferred financial expenses) as of the date of the financial statements are realized by the assumptions and estimations of the management. For these reasons, Trade Receivables are defined as one of the significant audit subjects by us. Accounting principles and amounts related to trade receivables in financial statements are **Note 2.08 Summary of Significant Accounting Policies, 2.03 Changes on Accounting Policies and Footnote 10 Trade Receivables and Payables.** Are explained in detail.	When designing audit procedures to address this key issue of auditing, the accounting policies applied by the Company's management regarding Trade Receivables are considered to comply with TAS and related legislation. Company within the framework of this evaluation; – The existence and accuracy of the trade receivable balances from non-related parties with the direct validation letters were tested. – Aggregate aging study was analyzed analytically and the collection turnover rate was determined, compared with the previous period and the provision for doubtful receivables was tested. – The collection risk is analyzed by analyzing the overdue receivables. – Exchange rate differences of foreign currency indexed receivables have been recalculated. – Guarantee letters received from customers have been tested. – It has been investigated whether there is a legal dispute regarding the receivables and the provision of doubtful receivable has been evaluated by taking a written declaration about the proceedings from the Company lawyers.

Revenue Periodicity	The following audit procedures have been applied to register the revenue during our audit:
Revenue is recognized when significant risks and returns are transferred to the buyer. Due to the nature of the operations of the Company, there are products that have been completed, delivered to the customer and the delivery price has not been realized although the sales price has been collected. As of the reporting date, the products in this case are located in the Company's inventory areas. The ownership rights and risks of these non-transferable products can be transferred to the customer. According to the above-mentioned explanations, the principle of the periodicity of sales is determined as the key audit subject whether the revenue of the products in this situation is recorded in the correct period. The Company's accounting policies and amounts related to revenue are disclosed in **Note 2.08.17** and **Note 28**.	– The design and implementation of controls related to the revenue process were evaluated. The Company's sales and delivery procedures were analyzed. – The provisions regarding the commercial and shipping conditions in the contracts with the customers were examined and the timing of the revenue to be included in the financial statements for different shipping arrangements was evaluated. – The financial verification procedures focused on the evaluation of the situations where the income was invoiced but not earned. – Revenue is analyzed by increasing rates and the accuracy of Revenue items has been checked by increasing sample revenue verification tests.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

In an independent audit, the responsibilities of us independent auditors are:

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We have informed those charged with governance that we have complied with the ethical provisions regarding independence. We have also communicated to all those charged with governance all relations and other matters that may be considered to have an effect on independence and, if any, relevant measures.

Among the issues that are reported to those charged with governance, we specify the most important issues in the independent audit of the financial statements of the current period, namely the key audit topics. We may decide not report relevant matter if the legislation does not allow the disclosure of the matter to the public or if there are exceptional circumstances where it is reasonably expected to have negative outcomes on public interest.

Report on Other Legal and Regulatory Requirements

1) In accordance with the fourth paragraph of Article 402 of the Turkish Commercial Code, no material issue has been found regarding the bookkeeping schedule of the Company for the period 1 January – 31 December 2019, which does not conform to the financial statements of the Company and the Articles of Association.

2) In accordance with the fourth paragraph of Article 402 of the Turkish Commercial Code, the Board of Directors has made the required explanations within the scope of the audit and issued the requested documents.

The responsible auditor Metin ETKİN is responsible for carrying out this independent audit.

NOTES TO THE FINANCIAL STATEMENTS FOR THE PERIOD OF JANUARY 01 - DECEMBER 31, 2019
(The currency is expressed in Turkish Lira ("TL") unless otherwise stated.)

1 The Company's Organization and Field of Activity

Erkunt Traktör Sanayii A.Ş. was established September,12,2003; and located at Organized Industrial Zone Batıhun St. No: 2-4 Sincan/Ankara.

The main activity of the company is the production, sales, maintenance and repair of agricultural machinery, engines and transfer units, machinery and equipment.

The capital structure of the Company is stated below.

	31.12.2019		31.12.2018	
Shareholders	**Share Amount**	**Share Ratio (%)**	Share Amount	Share Ratio (%)
Mahindra Overseas Investment Company	**200,000,000**	**100.00**	190,000,000	100.00
Total	**200,000,000**	**100.00**	190,000,000	100.00

The company does not have a branch.

The number of averagely employees as of; December 31,2019: 327 (December 31,2018: 350 employees)

As of November 30, 2017 Erkunt Traktör Sanayii A.Ş.'s shares are transferred to Mahindra Overseas Investment Company.

The financial statements for the period January 01 - December 31, 2019 were signed by chairman of the Board of Directors Rajesh Ganesh Jejurikar,vice chairman of the Board of Directors Nikhil Sohoni, member of the Board of Directors Harish Prakash Gopal Wakankar, member of the Board of Directors Hemant Sikka on February 05, 2020. The General Assembly has the authority to change financial statements.

2. Summary of Significant Accounting Policies

2.01 Basic Presentation Principles

The Company's headquarters and subsidiaries in Turkey maintain and prepare their accounting records and legal financial statements in Turkish Lira in accordance with the terms of the Uniform Chart of Accounts issued by the Turkish Commercial Code ("TCC") and the Ministry of Finance of the Republic of Turkey ("Ministry of Finance").

Declaration of Conformity to Turkish Accounting Standards.

The accompanying financial statements have been prepared in accordance with the Turkish Accounting Standards ("TAS/TFRS") issued by the Public Oversight, Accounting and Auditing Standards Authority ("POA") and their annexes and interpretations thereof.

The financial statements have been presented in accordance with the TAS Taxonomy of 2019 approved by the Board of Directors, dated 15 April 2019.

2. Summary of Significant Accounting Policies

2.01 Basic Presentation Principles

The Company's financial statements are presented in the functional currency of the primary economic environment in which it operates.

The Company's financial performance and results of operations are expressed in Turkish Lira, which is the functional currency of the Company and the presentation currency of the financial statements.

2.02 Correcting the financial statement in the high inflation periods

Before the Turkish code of commerce no: 6102 and the legislative decree no: 660 and the related legislation, with a decision taken by the capital markets board ("SPK") in 17.March.2005, for the companies which have activities in Turkey and which issue financial statement according to the SPK accounting standards, because it was announced that it is not required to apply the inflation accounting such that it is in effect as from 01.01.2005, as from that date, the application of issuance and presentation of the financial statements according to the Turkish accounting standard 29 "Financial reporting in the high inflationist economies" was terminated.

2.03 Changes in Accounting Policies

In case of changes and errors in the accounting policies and accounting estimates, material changes and detected material accounting errors are applied retroactively and the financial statements for the previous period are reissued. If the changes in the accounting policies affect the previous periods, such policy is also retroactively applied in the financial statements as if it is always used. There is not any change in the Company's accounting policies.

2.04 Comperative Information and Adjustment of the Previous Financial Statements

Company applied TFRS 16 "Leases Standard" fort he first time as of 1 January 2019. For leases previously classified as operating leases under TAS 17, the financial statements reflect a right of use asset over an amount equal to the lease obligation adjusted for the amount of all lease payments prepaid or accrued as of January 1, 2019.
Statement of financial status of the application of TFRS 16 as of December 31, 2019 and effects of profit or loss for the period ended on the same date are presented below. The implementation of the standard has no significant impact on the other comprehensive income statement and cash flow statement.

The company has reflected a right of use asset over an amount equal to its lease obligation adjusted for the amount of all lease payments previously prepaid or accrued as of January 1, 2019 in the financial statements for leases previously classified as operating leases under TAS 17. In this context, the application of the TFRS 16 Leases standard has no impact on the company's prior years profits as of January 1, 2019.

2.05 *Changes in the Accounting Estimates*

Accounting estimates are made based on reliable information and reasonable estimate methods. However, in case of any change in the conditions under which the estimate is made, obtaining new information or occurrence of additional developments, estimates are reviewed. If effect of the change in the accounting estimate is related to one period only, it is reflected to the financial statements to be considered in calculation of the profit or loss for the period in the current period or both in the period of the change and the following periods on a retrospective basis if it is also related to the following periods.

Nature and amount of a change in the accounting estimate, which change has an effect on the result of operations for the current period or expected to affect the following periods, are disclosed in the notes to the financial statements except for any cases where it is not possible to estimate such effect for the following periods. There is no change in the accounting estimates in the current period.

2.06 *Significant Accounting Evaluations, Estimates and Assumptions*

In the preparation of the financial statements, the Company Management is required to make assumptions and estimates that will affect the reported amounts of assets and liabilities, the probable liabilities and commitments as of the balance sheet date and the income and expenses in the reporting period. Actual results may differ from estimates. Estimates are regularly reviewed, necessary corrections are made and reflected in the profit or loss table in the period in which they are realized.

The interpretations that could have a significant effect on the amounts reflected in the financial statements and the assumptions made by taking into account the actual sources of the existing or future estimates are as follows:

a) The retirement pay liability is determined using actuarial assumptions (discount rates, future salary increases and employee turnover rates). These assumptions are reviewed at each balance sheet date and revised if necessary. **(Note:25)**

b) The Company depreciated its tangible assets by using the straight-line depreciation method in accordance with the useful life. Expected useful life residual value and amortization method are reviewed every year for possible effects of changes in estimates and are accounted for on a prospective basis if there is a change in estimates. **(Note:2.08.04-2.08.05)**

c) Provisions for bad debt reflect the amounts which the Company's management believes to recover future losses for any receivables which are outstanding as of the date of balance sheet with a risk of non-collection in the framework of the current economic conditions. When impairment of receivables is evaluated, past performances of debtors, their credibility on the market and performances between the date of balance sheet and date of approval of the financial statements and renegotiated conditions are also considered. The information regarding the relevant provisions as of the date of balance sheet is given in **Note: 10**.

d) In the case of impairment of inventories, the physical characteristics of the inventories and how much they have come from the past are assessed, the utility of the inventories is determined based on the opinion of the technical staff and provisions are made for the items that are estimated to be unavailable. For calculating the net realizable value of inventories, average selling prices are used.

e) The Company has made deferred tax calculation in accordance with TAS and TFRS and reflected to the financial statements.

f) Company management, In accordance with the best estimates in the light of legal advisors and expert opinion regarding cases described in detail at Note: 23, has made provision in the financial statements.

g) The Group signs additional maintenance and warranty contracts with customers following the end of the warranty period. The supplementary maintenance and warranty contract income or loss is recorded according to the accrual rate by means of the proportion of the employee who has passed since the beginning of the contract during the life of the contract, to the total duration of the contract. The part of the maintenance contract income that is not accrued is accounted for in short/long term deferred income in the balance sheet.

2.07 Netting/Offsetting

The financial assets and liabilities are shown at their net values in the balance sheet if there is a legal right of netting, they are paid on a net basis or may be collected or acquisition of the asset and satisfaction of the liability may occur concurrently.

2.08 Summary of Important Accounting Policies

Summary of the important accounting policies applied during preparation of the financial statements is as follows:

2.08.01 Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand, cash in hand, short-term cash and cash equivalents, which are not held for investment or other purposes, are readily convertible into cash within a short period of time and have high liquidity and are unlikely to change in value. (Note 6). It is included in fixed assets if it has cash or similar assets used for payment of debts or for other reasons within twelve months after the balance sheet date.

2.08.02 Trade Receivables

Trade receivables originated by the Company by way of providing goods or services directly to a debtor are carried at amortized cost using the effective yield method and if the provision for doubtful receivables is deducted. Short-term trade receivables with no stated interest rate are measured at the invoice amount if the interest accrual effect is insignificant.

Notes and tem checks classified as trade receivables are carried at amortized cost using the effective interest rate at the balance sheet date.

The provision for doubtful receivables is reflected in the records as expense. Provision is the amount that is estimated by the Company management and considered to cover the possible damages that may arise from the economic condition or the risk it carries for the account.

2.08.03 Inventories

Inventories are reflected in the financial statements at the lower of acquisition cost or net realizable value. Costs included in inventories are material, labor and general production costs. Cost is calculated by weighted average method.

Net realizable value is the estimated cost of completion of an ordinary business activity and the estimated cost of sales Total required to realize the sale.

2.08.04 Property, Plant and Equipment

Property, plant and equipment are carried at cost, restated for the effects of inflation as of December 31, 2004 and items purchased at January 1, 2005 less any accumulated depreciation for the items purchased before January 1, 2005 Property, plant and equipment are depreciated on a straight-line basis over their useful lives.

The depreciation rates determined by considering the useful lives of the tangible assets are as follows:

Type	Useful Life (Year)
Buildings	10-50 years
Land improvements	10-25 years
Machinery, Plant and Equipment	3-24 years
Vehicles	3-14 years
Fixtures	2-50 years
Other Tangible Fixed Assets	2-20 years

The expected useful life residual value and amortization method is reviewed every year for the possible effects of the changes emerged in the predictions and if there is a change in the forecasts, it is recognized prospectively.

The profits and losses occurring because of selling of fixed assets are determined by comparing the net book value and sales price and included in the operations profit.

2.08.05 Intangible Assets and Goodwill

The tangible assets, excluding the ones included in the financial statement with the realistic value, are indicated over the costs values corrected according to the effects of the inflation as of December 31st, 2004 for the items purchased before the January 1st, 2905 and by deducing the accumulated amortization from the purchasing cost value for the items purchased after the January 1st, 2005. The fixed assets are subjected to amortization according to the useful life principle with the direct amortization method.

Expected useful life and amortization method are reviewed annually and the changes in estimates are accounted for on a prospective basis to determine the possible effects of changes in estimates.

Depreciation rates determined by considering useful lives of intangible assets are below:

	Useful Life (Year)
Rights	3-15 years
Research and Development Expenditure	5-15 years
Leasehold Improvements	2-10 years
Other Intengible Assets	3-7 years

2.08.06 Borrowing Costs

When the assets which it takes a substantial amount of time to make ready for usage and selling are in question, the borrowing costs which can be directly correlated with purchasing, making or production are had to be included in the cost of the asset until the related asset is made ready for usage or selling. The financial investment income, obtained by using the part of the credit, related with the credit, not spent yet in the financial investments for a temporary period is offset from the borrowing costs suitable for capitalization. All of the other borrowing costs are recorded in the income statement in the period when they occur. The company does not have any financing costs capitalized during the period.

2.08.07 Impairment of Assets

The assets which have infinite life are not subjected to amortization. The impairment test is applied for these assets. For the assets subjected to amortization, in case that situations or events take place where it is not possible to recover the book value, test of impairment of assets is applied. In case that the book value of the asset exceeds the recoverable value, the provision for impairment is made and recorded. The recoverable amount is the bigger one of the realistic value obtained after deducing the costs of sale and the value in usage. In order to evaluate the value lowness, the assets are grouped in the lowest level where there are cash flows which can be defined separately. The assets which are not financial, which are subjected to the impairment are reviewed for the possible cancellation of the impairment of assets in every reporting date.

2.08.08 Effect of Changes in the Exchange Rates

Foreign currency transactions realized during the year are translated into Turkish Lira at the date of the transactions. Assets and liabilities denominated in foreign currencies are translated into Turkish Lira at the rates prevailing at the balance sheet date. Foreign exchange gains/losses arising from the translation and collection of foreign currency transactions are included in the income statement.

The Company's financial statements are presented in the currency of the primary economic environment in which it operates. The financial performance and operating results of the Company are expressed in TL, which is the functional currency. Transactions in foreign currencies during the preparation of the Company's financial statements are recorded based on the exchange rates at the transaction date. Monetary assets and liabilities indexed at the balance sheet are translated into Turkish Lira at the rates prevailing at the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated into Turkish Lira based on the exchange rates at the date when the fair value was determined. Non-monetary items in foreign currency measured in terms of historical cost are not retranslated. Exchange differences are recognized as profit or loss in the period in which they incur.

2.08.09 Taxes Calculated on the Corporate Profit

Income tax expense/revenue is represented by sum of the current tax expense/revenue and deferred tax expense (or revenue).

Current tax

Current year's tax liability is calculated on the taxable portion of the profit for the period. Taxable profit does not include income or expense items taxable or deductible in the other years and items which are not taxable or deductible, so it differs from the profit stated in the income statement. The company's current tax liability was calculated by the tax rate legalized or substantially legalized as of the date of balance sheet.

Deferred tax

Deferred tax liability or asset are defined by calculating tax effects of temporary differences between amounts of the assets and liabilities indicated in the financial statements and their amounts considered in calculation of the legal tax base according to the balance sheet method by considering the legalized tax rates.

Deferred tax liabilities are calculated for all taxable temporary differences but deferred tax assets represented by deductible temporary differences are calculated provided that it is highly probable to benefit from such differences by gaining taxable profit in the future. No deferred tax liability or asset is calculated for temporary timing differences caused by inclusion of assets or liabilities, other than goodwill or business mergers, in the financial statements for the first time and which do not affect both trade and financial profit or loss.

Deferred tax liabilities are calculated for all of taxable temporary differences which are associated with investments in the affiliates and subsidiaries and shares in business partnerships except for any cases where the Company may control elimination of the temporary differences and there is a low possibility for elimination of such different in the near future. Deferred tax assets arising from the taxable temporary differences associated with such investments and shares are calculated provided that it is highly probable to benefit from these differences by gaining sufficient taxable profit in the near future and it is possible to eliminate such differences in the future.

Book value of deferred tax asset is reviewed as of each date of balance sheet. Book value of deferred tax asset is reduced to the extent that it is not possible to gain financial profit at a level to allow for acquisition of the benefit to be provided by all or part of it.

Deferred tax assets and liabilities are calculated on the tax rates (tax adjustments) expected to be effective in the period when the asset are realized or the liabilities are satisfied and legalized or substantially legalized as of the date of balance sheet. During calculation of deferred tax assets and liabilities, tax results of the methods estimated by the Company for recovering book values of the assets as of the date of balance sheet or satisfaction of its liabilities are considered.

Deferred tax assets and liabilities ate set off if there is a legal right to set off the current tax assets against the current tax liabilities or such assets and liabilities are associated with the income tax collected by the same tax authority or the Company intends to pay them by setting off the current tax assets against the current tax liabilities.

Current and deferred tax for the period

Except for those associated with the items directly recognized as a receivable or debt in the equity (in this case, deferred tax for the relevant items is also recognized in the equity directly) or arising from the first recognition of business mergers, the current tax and deferred tax for the period are recognized as an income or expense in the income statement. In business mergers, tax effect is considered in calculation of goodwill or calculation of the portion of the share acquired by the purchaser at the fair value of the definable assets, liabilities and contingent payables of the purchased affiliate in excess of the purchasing cost.

The taxes in the financial statements include the change in the current period taxes and deferred taxes. The Company calculates current and deferred tax on the results of the period.

Netting tax assets and liabilities

The amounts of corporate tax payable are defined as net amounts as they are associated with the pre-paid corporate tax amounts.

2.08.10 Trade payables

The finance income included in the liabilities is calculated by considering the effective interest rate of the related debt and the effective interest rate, and the amounts are shown in the financial statements in the financial statements.

2.08.11 Leasing transactions

I) *Financial leasing transactions*

Financial leases are described which the lessor retains all the risks and benefits pertaining to the goods. Financial leases are taken into the accounts according to lower current market value or minimum lease payments. The liability arising from a financial leasing transaction is separated into interest payable and principal debt in order to determine a fixed interest rate on the remaining balance. The costs and expenses incurred at the initial acquisition of the fixed asset subject to financial leasing are added to the cost.

II) *Operational leasing transactions*

Rental contracts in which the lessor holds all risks and benefits of the property are called operational leases.

Company as leaseholder:

Operational leasing payments are charged to the record as expense according to the normal method during the lease term. As of December 31,2019 the operating lease expense is TL 1.518.596 (31.12.2018: TL 533.409)

Company as leasor:

Operational leasing collection are charged to the record as income according to the normal method during the lease term. As of December 31, 2019, the Company has no operational leasing income (31 December 2018: None).

2.08.12 *Retirement and Provision for Severance Pay*

As required by the labor law valid in Turkey, the retirement and indemnity provisions are allocated as they incur in the financial statements attached. According to the UMS 19 "Benefits provided to the employees", which was updated, the payments of the type in question are characterized as described retirement benefit plans.

In the attached financial statements, the seniority indemnity liability is reflected to the financial statements as the amount found by discounting with the suitable interest rate, purified of the inflation rate, in order to calculate the value of the retirement indemnity to be paid in the future years in the date of the balance sheet.

2.08.13 *Investments in Affiliates*

Investments in Affiliates are accounted for by the equity method of accounting. These are entities over which the Group generally has between 20% and 50% of voting rights or has significant influence, but does not have control on these affiliates' operations. Unrealized gains that result from intercompany transactions between the Group and its Associates are eliminated on consolidation, whereas unrealized losses are eliminated unless they do not address any impairment. Equity accounting is discontinued when the carrying amount of the investment in an Associate reaches zero, unless the Group has incurred obligations or guaranteed obligations in respect of the Associates. Such Associates are accounted at fair value if the fair value can be determined objectively; otherwise, they are accounted at cost.

According to equity method of accounting, subsidiaries are recorded initially at acquisition cost, and subsequently the amount of the parent's interest in the associate's shareholders' equity is reflected to financial statements by either adding the increase in the amount to the investment amount or subtracting the losses from the investment amount.

2.08.14 *Financial instruments*

2.08.14,01 *Financial assets*

The financial investments are recognized over the amount remained after deducing the expenditures which can be directly correlated with the purchasing transaction from the realistic value, except the financial assets, the realistic value difference of which is reflected to the profit or loss and which are put into the records over the realistic value. The investments are put into the records or removed from the records in the date of the transaction which depends on a contract which carry the delivery condition of the investment instrument according to the period determined by the related market. The financial assets are classified as the "financial assets, the realistic value difference of which is reflected to the profit or loss", the "financial assets held until maturity", the "financial assets, ready for selling", and the "credits and receivables.

<u>Effective interest method</u>

The effective interest method is the method of valuing the financial asset with the amortized cost and distributing the related interest income to the period with which it is related. The efficient interest rate is the ratio which reduces the predicted cash total to be collected in the expected life of the financial instrument or, if it is suitable, during a shorter time period to the net present day value of the related financial asset.

The revenues related with the financial assets classified outside than the financial assets, the realistic value difference of which is reflected to the profit or loss are calculated by using the efficient interest method.

a) The financial assets, the realistic value difference of which is reflected to the profit or loss

The financial assets, the realistic value difference of which is reflected to the profit or loss are the financial assets, which are held for trading. When a financial asset is acquired for disposing of in the short term, it is classified in the category in question. The financial assets mentioned, which form the derivative products, which are not determined as an efficient hedging instrument are classified as the financial assets, the realistic value difference of which is reflected to the profit or loss. The assets included in this category are classified as current assets.

b) The financial assets held until maturity

The borrowing instruments, with constant maturity, which the Company has the means and intent to hold until maturity, having a constant or determinable payment plan are classified as the financial assets to be held until maturity. The investments to be held until maturity are put into the records by deducing the value lowness amount from the amortized cost amount according to the efficient interest method and the related revenues are calculated by using efficient interest rate.

c) The financial assets ready for sale

The financial assets ready for sale consist of the financial assets which are not financial assets to be held until maturity or with trading purpose. The financial assets ready for sale are valued with realistic value provided that they can be reliably measured after put into the records. The securities, the realistic value of which can't be measured reliably and which don't have an active market, are indicated with cost value. The profits or losses, related with the financial assets ready for sale, are included in the income statement of the related period. The changes taken place in the fair value such assets are indicated in the equity accounts. In case that the related asset is disposed of or there is impairment, the amount in the equity accounts is transferred to the income statement as profit/loss. Provision for Impairment which is arisen from the investments for the financial instruments based on equity which are classified as financial asset ready for sale and which is recognized in the income statement may not be cancelled in the income statement in the subsequent periods. Except the financial instruments based on equity, which is classified as ready for sale, if the impairment loss decreases in the next period and the decrease can be correlated with an event which occurs after the recognition of the impairment loss, the impairment loss, recognized beforehand, may be cancelled in the income statement. The

Company doesn't have a financial asset ready for sale.

d) Credits and receivables

Trade, other receivables and credits, which have constant and determinable payments, not transacted in the market, are classified in this category. The credits and receivables are indicated by deducing impairment amount over the cost discounted by using the effective interest method.

Impairment of financial assets

The financial assets or financial asset companies, other than the financial assets, the realistic value difference of which is reflected to the profit or loss, are subjected to evaluation on whether there are indicators or not that they subjected to impairment in every date of balance sheet. In case that one or more than one incident occurs after the first recognition of the financial asset and there are an objective indicator that the related financial asset is subjected to impairment as a negative result of the incident in questions on the future cash flows of the financial asset or asset group, which can be predicted reliably, the impairment loss occurs.

The impairment amount for the credits and receivables is the difference between the present day value of the predicted cash flows expected in the future calculated by discounting over the effective interest rate of the financial asset and its book value.

Except the commercial receivables which the book value is decreased through using a reserve account, for all financial assets, the impairment is directly deduced from the recorded value of the related financial asset. In case that the commercial receivable can't be collected, the amount in question is discarded by deducing from the reserve account. The changes in the reserve account are recognized in the income statement.

Except the financial instruments based on equity, ready for sale, if the impairment loss decreases in the next period and if the decrease can be correlated with an incident taking place after the recognition of the impairment loss, the impairment loss, recognized beforehand is cancelled in the income statement such that it doesn't exceed the amortized cost amount which it would reach if the impairment of the investment never recognized in the date when the impairment is to be cancelled.

The increase occurred after the impairment of the realistic value of the financial instruments based on equity, ready for sale is recognized directly in the equities.

Cash and cash equivalents

Cash and cash equivalent items are the cash, current account and the other short term investments, with the maturities of three months or less than three months as from the purchasing date, which can be converted into cash immediately and which do not have impairment risk substantially and high liquidity.

2.08.14,02 *Financial Liabilities*

The financial obligations and equity instruments of the Company are classified based on the arrangements based on contract, the description principle of an instrument depending on a financial obligation and equity. The contract representing the right on the assets, remained after deducing all liabilities of the Company is a financial instrument based on equity. The accounting policies which can be applied for certain financial obligations and financial instruments based on equity are stated below.

The financial liabilities are classified as the financial liabilities the realistic value difference of which is reflected to the profit or loss or the other financial liabilities.

a) The financial liabilities the realistic value difference of which is reflected to the profit or loss

The financial liabilities the realistic value difference of which is reflected to the profit or loss are recorded with the realistic value and revalued with the realistic value in the date of the balance sheet in every reporting period. The change in the realistic value is recognized in the income statement. The net gains or losses recognized in the income statement also cover the amount of the interest paid for the financial liability in question.

b) The other financial liabilities

The other financial liabilities are recognized with the realistic value, purified of the transaction costs at the start. The other financial liabilities are recognized over the cost amount which is amortized by using the efficient interest method together with the interest cost calculated over the efficient interest rate in the subsequent periods.

The efficient interest method is the method of calculating the amortized costs of the financial liability and distributing the related interest expenditure to the period with which it is related. The efficient interest rate is the ratio which reduces the predicted cash total to be paid in the expected life of the financial instrument or, if it is suitable, during a shorter time period to the net present day value of the related financial liability.

***2.08.15* Provisions, Contingent liabilities and assets**

If the Company has a liability arising from the past events, sources involving economic benefit may be disposed from the Company for satisfaction of such liability and amount of such liability may be estimated reliably, the relevant liability is included in the financial statements as a provision. Contingent liabilities are always subject to assessment for finding if the possibility of disposing the sources involving economic benefit from the Company is possible. If the possibility of disposing the sources involving economic benefit from the Company occurs for the items processed as a contingent liability in the future, such contingent liability is included in the financial statements for the period of the change in the possibility as a provision except for the circumstances of failure in reliable estimate.

The Company indicates such liability in the notes if the contingent liabilities become possible but it is not possible to reliably estimate amount of the sources involving economic benefit. Any asset which arises from the past events and shall be confirmed by finding if one or more unclear event(s) existence of which is not fully under the control of the Company is considered as a contingent asset. The contingent assets are disclosed in the notes in case of a high possibility of the Company's acquisition of the sources involving economic benefit.

Where it is expected that all or part of the economic benefits used to pay the amount of provision are covered by the third parties, is recognized as an asset if this amount shall be repaid finally and the amount is calculated reliably.

2.08.16 Related Parties

For the purpose of these financial statements, partners, senior level directors and members of the board of directors, their families and the companies controlled by them or their affiliates, subsidiaries and partnerships are considered and stated as related parties. The transactions entered into with the related parties because of the ordinary activities were performed with the prices compatible with the market conditions. The detailed description performed with the related parties is given in the **Note.38**.

2.08.17 Recording incomes

Revenues

Revenue is recognized when it is probable that an economic result will be obtained from the operations of the Company and the amount of revenue can be measured reliably. Revenues, deductions, value added tax and sales taxes are clearly shown after deduction. The following criteria must be met in order for income to be generated.

İncome derived from the sale of goods is recognized when the following conditions are satisfied:

- The revenue amount can be measured reliably,
- It is possible that the economic benefits related with the transaction will be obtained by the enterprise,
- The level of completion of the transaction can be measured reliably as of the end of the reporting period, and;
- The costs incurred and required for completing the transaction can be measured reliably.

2.08.18 Cash Flow Statement

Cash and cash equivalents are the cash money, current account and the other short termed investments, the maturity of 3 months or less than 3 months as from the purchasing date, which can be converted into cash immediately and don't have a substantial amount of value change risk, with a high liquidity.

In the cash flow statement, the cash flows related with the period are classified and reported based on the operation, investment and financial activities.

The cash flows arisen from the operational activities indicates the cash flows arisen from the main activities of the Company. The cash flows related with the investment activities indicate the cash flows which the Company uses and obtains in the investment activities (asset investments and financial investments). The cash flows related with the finance activities indicate the resources which the Company uses in the finance activities and the repayment of these resources.

2.08.19 Profit/loss per share

Profit per share is determined by dividing the net profit to the weighted average number of the shares existing in the related period.

The companies in Turkey can increase their capitals through "bonus share" they distributed from the previous year profits to the shareholders. When the profit per share is calculated, this bonus share issuance is considered as issued shares.

Therefore the weighted number of share average used for the profit per share is obtained by retrospectively applying the bonus issuance of the shares.

2.08.20 Events after balance sheet date

It refers the events emerging on behalf of or on the detriment to the Company between the date of the balance sheet and the date of authorization for publishing the balance sheet. In case that there are new evidences that the events in question exist as of the date of balance sheet or the related events emerge after the date of the balance sheet, the Company describes the issues in question in the **Note.41**.

The Company, in case that events requiring correction emerge after the date of the balance sheet, corrects the amounts put into the financial statements according to this new situation.

2.09 Going Concern

The Company prepares its financial statements on the basis of going concern.

2.10 New and Revised Turkish Financial Reporting Standards

New standards and interpretations

i) Standards, amendments and interpretations effective as at 31 December 2019

Amendment to IFRS 9, 'Financial instruments'; effective from annual periods beginning on or after 1 January 2019. This amendment confirm two points: (1) that reasonable compensation for prepayments can be both negative or positive cash flows when considering whether a financial asset solely has cash flows that are principal and interest and (2) that when a financial liability measured at amortised cost is modified without this resulting in de-recognition, a gain or loss should be recognised immediately in profit or loss. The gain or loss is calculated as the difference between the original contractual cash flows and the modified cash flows discounted at the original effective interest rate. This means that the difference cannot be spread over the remaining life of the instrument which may be a change in practice from IAS 39.

Amendment to IAS 28, 'Investments in associates and joint venture'; effective from annual periods beginning on or after 1 January 2019. These amendments clarify that companies account for long-term interests in associate or joint venture to which the equity method is not applied using IFRS 9.

IFRIC 23, 'Uncertainty over income tax treatments'; effective from annual periods beginning on or after 1 January 2019. This IFRIC clarifies how the recognition and measurement requirements of IAS 12 'Income taxes', are applied where there is uncertainty over income tax treatments. The IFRS IC had clarified previously that IAS 12, not IAS 37 'Provisions, contingent liabilities and contingent assets', applies to accounting for uncertain income tax treatments. IFRIC 23 explains how to recognise and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment. An uncertain tax treatment is any tax treatment applied by an entity where there is uncertainty over whether that treatment will be accepted by the tax authority. For example, a decision to claim a deduction for a specific expense or not to include a specific item of income in a tax return is an uncertain tax treatment if its acceptability is uncertain under tax law. IFRIC 23 applies to all aspects of income tax accounting where there is an uncertainty regarding the treatment of an item, including taxable profit or loss, the tax bases of assets and liabilities, tax losses and credits and tax rates.

Annual improvements 2015-2017; effective from annual periods beginning on or after 1 January 2019. These amendments include minor changes to:

IFRS 3, 'Business combinations', – a company remeasures its previously held interest in a joint operation when it obtains control of the business.

IFRS 11, 'Joint arrangements', – a company does not remeasure its previously held interest in a joint operation when it obtains joint control of the business.

IAS 12, 'Income taxes' – a company accounts for all income tax consequences of dividend payments in the same way.

IAS 23, 'Borrowing costs' – a company treats as part of general borrowings any borrowing originally made to develop an asset when the asset is ready for its intended use or sale.

Amendments to IAS 19, 'Employee benefits' on plan amendment, curtailment or settlement'; effective from annual periods beginning on or after 1 January 2019. These amendments require an entity to:

- Use updated assumptions to determine current service cost and net interest for the reminder of the period after a plan amendment, curtailment or settlement and
- Recognise in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the impact of the asset ceiling.

ii) Standards, amendments and interpretations that are issued but not effective as at 31 December 2019:

Amendments to IAS 1 and IAS 8 on the definition of material; effective from Annual periods beginning on or after 1 January 2020. These amendments to IAS 1, 'Presentation of financial statements', and IAS 8, 'Accounting policies, changes in accounting estimates and errors', and consequential amendments to other IFRSs:

- Use a consistent definition of materiality throughout IFRSs and the Conceptual Framework for Financial Reporting
- Clarify the explanation of the definition of material and
- Incorporate some of the guidance in IAS 1 about immaterial information.

Amendments to IFRS 3 - definition of a business; effective from Annual periods beginning on or after 1 January 2020. This amendment revises the definition of a business. According to feedback received by the IASB, application of the current guidance is commonly thought to be too complex, and it results in too many transactions qualifying as business combinations.

Amendments to IFRS 9, IAS 39 and IFRS 7 – Interest rate benchmark reform; effective from Annual periods beginning on or after 1 January 2020. These amendments provide certain reliefs in connection with interest rate benchmark reform. The reliefs relate to hedge accounting and have the effect that IBOR reform should not generally cause hedge accounting to terminate. However, any hedge ineffectiveness should continue to be recorded in the income statement. Given the pervasive nature of hedges involving IBOR-based contracts, the reliefs will affect companies in all industries.

IFRS 17, 'Insurance contracts'; effective from annual periods beginning on or after 1 January 2021. This standard replaces IFRS 4, which currently permits a wide variety of practices in accounting for insurance contracts. IFRS 17 will fundamentally change the accounting by all entities that issue insurance contracts and investment contracts with discretionary participation features.

The Company does not expected material impact of new standards and interpretations on Company's accounting policies.

3. Business Mergers

None.

4. Shares in Other Businesses

The Company's Shares in Other Businesses as the end of the period are as follows:

	31.12.2019	31.12.2018
Erkunt Sanayi A.Ş.	**%35**	%35

5. Reporting per Department

None.

6. Cash and Cash Equivalents

The Company's Cash and Cash Equivalents as the end of the period re as follows:

	31.12.2019	31.12.2018
Cash	**17,299**	22,569
Banks	**9,463,620**	2,315,687
– *Demand Deposit*	**9,463,620**	2,315,687
Other Liquid Assets	**3,543**	37,827
Total	**9,484,462**	2,376,083

The Company has 4,929,145 TL blocked on Cash and Cash Equivalents as of 31.12.2019 (31.12.2018: 2,269,326 TL).

As per the application of TFRS 9, 393 TL has been associated with current period profit/loss, which is the default for deposits in the Bank (31.12.2018: 180 TL).

7. Financial Investments

None.

8. Financial Liabilities

The Company's Current and Non-Current Financial Liabilities at the end of periods are explained below:

Current Financial Liabilities

Account Name	31.12.2019	31.12.2018
Loans	**110,977,335**	63,886,983
Credit Cards	**313,045**	121,684
Short-Term Installments of Long-Term Loans	**–**	–
Short Term Financial Leasing Payables	**–**	–
Liabilities From Operating Lease (*)	**488,438**	–
Total	**111,778,818**	64,008,667

Non-Current Financial Liabilities

Loans	–	–
Financial Leasing Payables	–	–
Liabilities From Operating Lease (*)	**2,016,724**	–
Total	**2,016,724**	–
Total Financial Liabilities	**113,795,542**	64,008,667

(*) Short-term and long-term debts consisting of operating leases assessed under TFRS 16.

a) The effective interest rates of financial liabilities on the basis of currency unit are as follows;

31.12.2019

Type	Amount of Foreign Currency	TL Amount	Effective Interest Rate
TL Loans	**–**	**94,374,043**	**%0**
EUR Loans	**2,500,000**	**16,603,292**	**%0.14**
Total	**2,500,000**	**110,977,335**	

31.12.2018

Type	Amount of Foreign Currency	TL Amount	Effective Interest Rate
TL Loans	-	64,008,667	%25.14-%28.41
Total	-	64,008,667	

9. Other Financial Liabilities

The Company has no Other Financial Liability as ends of periods.

10. Trade Receivables and Payables

The Company's Short Term Trade Receivables at the ends of the period are disclosed below:

Account Name	31.12.2019	31.12.2018
Trade Receivables	**42,021,148**	29,106,103
Notes Receivables	**26,622,649**	32,191,384
Rediscount of Notes Receivables (-)	**(919,241)**	(2,376,169)
Doubtful Trade Receivables	**16,336,244**	10,554,136
Provision for Doubtful Trade Receivables (-)	**(16,336,244)**	(10,554,136)
Total	**67,724,556**	58,921,318

The average collection time of trade receivables as of December 31, 2019 is 34 days (December 31, 2018: 65 days)

The company has no collateral obtained from the related parties.

Provisions for doubtful trade receivables are as follows:

Account Name	01.01.2019 31.12.2019	01.01.2018 31.12.2018
Begining of Period	**10,554,136**	8,316,454
TFRS 9 Correction	**194,674**	1,941,791
İncrease during the period	**6,106,650**	295,891
Provisions no longer required	**(519,216)**	–
Period Ended	**16,336,244**	10,554,136

Due to the application of TFRS 9, 194,672 TL of trade receivables is associated with current period's profit/loss for non-payment risk.

The Company has no Long Term Trade Receivables as at the end of periods.

The Company's Short Term Trade Payables at the ends of the period are disclosed below:

Account Name	31.12.2019	31.12.2018
Supplier	**46,498,951**	27,375,915
Rediscount of Note Payable	**(860,959)**	(1,648,591)
Trade Payables to Related Parties	**7,776,188**	8,293,841
Total	**53,414,180**	34,021,165

As of December 31,2019, the average maturity of trade payables is 58 days (31.12.2018: 94 days)

The Company has no Long Term Trade Payables as at the end of periods.

The company has no collateral given to the suppliers and related parties.

11. Other Receivables and Payables

Short Term Other Receivables of the Company as of the period ends are as follows:

Account Name	31.12.2019	31.12.2018
Deposits and Guarantees Given	**21,816**	7,200
Receivables from Tax Office	**7,535,542**	9,563,983
Total	**7,557,358**	9,571,183

The Company does not have Long Term Other Receivables as of the end of periods.

Short Term Other Payables of the Company as of period ends are explained below.

Account Name	31.12.2019	31.12.2018
Other Payables*	**4,936,622**	2,166,782
Other Payables to Related Parties	**7,080**	–
Total	**4,943,702**	2,166,782

* The balance of other payables TL 4,936,622 (31.12.2018: TL 2,166,782) consist of the credits used on behalf of the customers.

The Company does not have Long Term Other Payables as of the end of periods.

The company has no collateral given for short term and long term payables.

12. Derivative Instruments

Derivative Instruments of the Company as of the end of the period are explained below:

Account Name	31.12.2019	31.12.2018
Assets Related To Derivative Financial Instruments	**515.820**	–
Total	**515,820**	–

13. Inventories

Inventories of the Company as of the end of the period are explained below:

Account Name	31.12.2019	31.12.2018
Raw Materials and Supplies	**21,725,300**	20,295,398
Semi-Finished Goods	**2,497,913**	2,519,153
Finished Goods	**16,229,287**	12,084,572
Merchandise	**252,681**	931,057
Goods in Transit	**9,883,800**	8,867,841
Provision for Impairment of Inventory(-)	**(151,177)**	(75,573)
Total	**50,437,804**	44,622,448

Movement of provision for impairment of inventory is as follows:

	31.12.2019	31.12.2018
Beginning of the Period	**75,573**	65,377
Increase During the Period	**75,604**	10,196
End of the Period	**151,177**	75,573

14. Biological Assets

None.

15. Prepaid Expenses and Deferred Incomes

The Short Term Prepaid Expenses at the periods ended are as follows:

Account Name	31.12.2019	31.12.2018
Prepaid Expenses	**563,223**	1,946,740
Advances Given	**10,032,212**	3,359,372
Total	**10,595,435**	5,306,112

The Company doesn't have Long Term Prepaid Expenses at the periods ended.

The Short Term Deferred Income at the periods ended are as follows:

Account Name	31.12.2019	31.12.2018
Deferred Income	**6,471,502**	–
Advances Received	**2,668,364**	1,166,432
Total	**9,139,866**	1,166,432

The Company doesn't have Long Term Deferred Income at the periods ended.

16. Investments Valued by Equity Method

Investments Valued by Equity Method as of periods ended are explained below;

Affiliate	**Participation rate (%)**	**Provision for Loses**	**31.12.2019 Net Book Value**
Erkunt Sanayii A.Ş.	%35	–	**60,058,086**
Total	–	–	**60,058,086**

Affiliate	Participation rate (%)	Provision for Loses	31.12.2018 Net Book Value
Erkunt Sanayii A.Ş.	%35	–	52,843,419
Total	–	–	52,843,419

The gains/(losses) from associates accounted for using the equity method are explained below.

	01.01.2019 31.12.2019	01.01.2018 31.12.2018
Beginning of the Period	**52,843,419**	39,365,744
Arising from Dividend Distribution	**9,078,472**	13,771,036
Other Accumulated Comprehensive Income that will not be Reclassified in Profit or Loss	**(1,863,805)**	(293,361)
End of Period	**60,058,086**	52,008,250

The financial statement summary of the investment valued by the equity method as of 31.12.2019 and 31.12.2018 as follows:

	31.12.2019	31.12.2018
Current Asset	**113,866,799**	153,799,133
Non-Current Asset	**145,761,850**	121,186,697
Total Asset	**259,628,649**	274,985,830
Current Liability	**53,491,531**	112,733,836
Non-Current Liability	**34,542,588**	11,270,797
Equity	**171,594,530**	150,981,197
Total Liability	**259,628,649**	274,985,830

17. Investment Property

None.

18. Property, Plant and Equipment

The Company's property, plant and equipment at the end of periods are as follows:

31.12.2019

Cost:	**01.01.2019**	**Additions**	**Disposals**	**Transfers**	**31.12.2019**

The total insurance amount of the assets as of 31.12.2019 is TL 29,212,418. (31.12.2018: TL 56,792).

24. Commitments

None.

25. Employee Benefits

Long-Term Provisions for Employee Benefits provided to the employees as of the period ended are as follows:

Provision for Severance Payments:

Account Name	**31.12.2019**	31.12.2018
Provision for Severance Payments	**1,760,521**	1,559,572

In accordance with the provisions of the Labor Law in effect, it is obligatory to pay the legal severance pays entitled by those of employees whose employment contracts are terminated with a right of severance pay. These indemnities are calculated on the wage for 30 days per working year based on the wage on the date of resignation or dismissal. Severance pay payable as of December 31,2019 is subject to the ceiling of TL 6,730.15 (31.12.2018: TL 6,017.60).

The severance pay liability is not subject to any funding legally.

The severance pay liability is calculated according to estimate of present value of future possible liability of the Company due to retirement of the employees. TMS 19 (“Benefits to Employees”) stipulates development of liabilities by using the actuarial valuation methods under the defined benefit plans. Accordingly, the actuarial assumptions used in calculation of total liabilities are stated below:

The principal assumption is that the maximum liability for each year of service will increase in line with inflation. Therefore, the discount rate applied represents the expected real rate after the correction of future inflation effects. At December 31,2019, the provision in the accompanying financial statements is calculated by estimating the present value of the future probable obligation of the Company arising from the retirement of the employees. As of December 31,2019, the provision is calculated with a annual inflation rate of 8,5%, interest rate of 11,5%, and real discount rate of %2,76.

The movements of the provision for severance pay during the period are as follows:

	31.12.2019	31.12.2018
Opening Balance	**1,559,572**	1,356,761
Current Service Cost	**238,919**	206,479
Interest Cost	**205,765**	134,204
Loss due to Payment/ Reduction of Benefits/ Dismissal	**1,137,056**	145,613
Actuarial Gain/(Loss)	**260,630**	51,902
Payment	**(1,641,421)**	(335,387)
Closing Balance	**1,760,521**	1,559,572

26. Assets and Liabilities for the Current Period Tax

iii) Restricted Reserves from Profit

Restricted reserves from profits consist of legal reserves.

The legal reserves consist of first and second legal reserves, appropriated in accordance with the Turkish Commercial Code (TCC). The TCC stipulates that the first legal reserve is appropriated out of historical statutory profits at the rate of 5% per annum, until the total reserve reaches 20% of the Company’s historical paid-in share capital. The second legal reserve is appropriated at the rate of 10% per annum of all cash distributions in excess of 5% of the historical paid-in share capital. Under TCC, the legal reserves are not available for distribution unless they exceed 50% of the historical paid-in share capital but may be used to offset losses in the event that historical general reserve is exhausted.

Account Name	31.12.2019	31.12.2018
Legal Reserves	**3,442,629**	3,442,629

i) Current Period Legal Provision for Tax

Advance tax in Turkey is calculated and accrued quarterly. Accordingly, a provisional tax of 20% is calculated over the corporate earnings in the course of taxation of the Company's earnings for the year 2016 in the advance tax period.

Under Turkish tax law, losses can be carried forward for a maximum period of 5 years to be deducted from the taxable profit to be generated in future years. However, losses cannot be deducted retrospectively from profits from previous years.

In accordance with Article 20 of the Corporate Tax Law, the Corporate Tax; the taxpayer is subject to the declaration. There is no definitive and conciliatory procedure for tax assessment in Turkey. Companies prepare their tax declarations by 25 April of the year following the account closing period of the relevant year. The tax authorities can review these statements and the underlying accounting records within 5 years.

The current tax provision of the Company is calculated as follows:

Account Name	01.01.2019 31.12.2019	01.01.2018 31.12.2018
Trading Profit/(Loss) in Legal Records	(54,355,135)	(60,346,018)
Additions to Base	1,866,626	1,891,577
According to the provisions of article 11 of KVK Lawfully Unaccepted Expenses	1,064,971	1,364,167
Donations	600	2,220
Special Communication Tax	8,827	9,722
Other	792,228	515,468
Discounts of base (-)	–	–
Research and Development Discount	–	–
Donations	–	–
Financial Profit/(Loss) in Legal Records	(52,488,509)	(58,454,441)
Current Period Legal Tax Provision	–	–

Income Tax Withholding:

In addition to the corporate tax, it is also required to calculate income tax withholding on dividends other than those distributed to the full taxpayer corporations which gained dividend and declared these dividends as a part of the corporate income and branches of foreign companies in Turkey if distributed. Income tax withholding rate was increased from 15% pursuant to the Cabinet Decree No. 2009/14592 published at the Official Gazette dated 12.01.2009.

ii) Deferred Tax

Deferred tax is determined by calculating the temporary differences between the carrying amounts of assets and liabilities in the financial statements and the amounts considered in the statutory tax base, taking into account the tax rates of the tax effects according to the balance sheet method.

Deferred tax liabilities are recognized for all taxable temporary differences, whereas deferred tax assets resulting from deductible temporary differences are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary difference can be utilized. Deferred tax liabilities or assets arising from the initial recognition of assets or liabilities other than goodwill or business combinations in respect of temporary timing differences that do not affect both the commercial and financial profit or loss are not recognized.

Deferred tax liabilities are calculated for all taxable temporary differences that are attributable to investments in subsidiaries and associates and joint ventures, except where the Company is able to control the reversal of temporary differences and the probability of such reversal in the near future is low. Deferred income tax assets resulting from taxable temporary differences associated with such investments and shares are calculated on the condition that it is highly probable that future taxable profit will be available against which the deductible income can be utilized and that it is probable that future taxable profit will be available against which the deductible temporary difference can be utilized.

Deferred tax assets and liabilities are calculated over the tax rates (tax regulations) that are enacted or substantively enacted at the balance sheet date that are expected to be valid for the period when the assets are realized or the liabilities are fulfilled. During the calculation of deferred tax assets and liabilities, the tax consequences of the Company's method of recovering its carrying amount or estimating its carrying value as of the balance sheet date are taken into account.

39. Nature and Level of Risks Attributable to Financial Instruments

Financial Risk Management Objectives and Policies

The main financial instruments used by the Company are bank loans, financial leases, cash and short term bank deposits. The main purpose of using these tools is to create financing for the Company's operations. The Company also has financial instruments, such as trade receivables and trade payables, which arise directly from operations.

Financial Risk Management Objectives and Policies

The risks arising from the instruments used are foreign currency risk, interest risk, credit risk and liquidity risk. The Company management manages these risks as follows. The Company also monitors the market risk that may arise from the use of financial instruments.

Foreign Currency Risk

Foreign currency risk arises from the fact that the Company has liabilities in USD and EURO.

The Company also has foreign currency risk arising from the transactions it has made. These risks arise from the purchase and sale of goods and services in foreign currencies and the use of foreign currency denominated bank credits. The exposure of the Company to foreign currency risk arises from loans that it has used and from finance lease obligations. To minimize this risk, the company monitors its financial position, cash inflows and outflows with detailed cash flow statements.

The Company's foreign currency position as at December 31,2019 and December 31,2018 is as follows:

Credit risk

The credit risk is the risk of incurring damages financially by one of the parties, which have mutual relationship, as a result of failing to perform the obligation, related with a financial instrument, by the other party. The company endeavors to manage the credit risk by limiting the transactions made with certain parties and continuously evaluating the credibility of the parties with which she has relationships. The total credit risk of the company is indicated in the financial situation statement.

Credit risk intensification is related with the certain companies having activities in the similar business areas and being in the same geographical region or the changes which may take place economically, politically or in the similar other conditions affecting the obligations of these companies arisen from the contract in the framework of similar economic conditions. The intensification of the credit risk indicates the sensitivity of the performance of the company to the developments affecting a certain sector or geographical region.

The company endeavors to manage the credit risk by avoiding unwanted intensification of her sales and service activities on persons or companies in the sector or region in the area of the new subject of activity. The company also gets warranty from the customers when she considers this as necessary.

Liquidity Risk

Liquidity risk is the risk that a Company can not meet its funding needs. Prudent liquidity risk management is to provide adequate cash and cash equivalents, to enable funding with the credit limits granted by reliable lenders and to close open positions. The Company provides funding by balancing cash inflows and outflows through the establishment of credit lines in the business environment.

The table below shows the maturity distribution of the Company's non-derivative financial liabilities.

Other Payables	2,166,782	2,166,782	2,166,782	–	–
Total	100,196,614	101,912,351	37,903,684	64,008,667	–

Interest Risk

The Company is exposed to an interest rate risk arising from the impact of changes in the interest rates of the underlying assets and liabilities. The risk is managed by natural hedges that balance the assets and liabilities with interest rate sensitivity. The Company carries out studies to ensure that borrowing is done at the most favorable rates to minimize the interest rate risk.

The Company's interest position table as of December 31,2019 and December 31,2018 is as follows:

Fixed Interest Financial Instruments	**31.12.2019**	31.12.2018
Financial Assets	**–**	–
Financial Liabilities	**110,977,335**	63,886,983

Variable Interest Financial Instruments	**31.12.2019**	31.12.2018
Financial Assets	**–**	–
Financial Liabilities	**–**	–

Since the Company does not have any variable rate instruments as of December 31,2019 and December 31, 2018, there is no interest rate risk.

Price Risk

Price risk is due to exchange rate, interest rate and market risk. The Group manages this risk by receiving foreign currency and balancing its liabilities and interest bearing assets and liabilities. Market risk is closely monitored by the Group's management through current market information and appropriate valuation methods.

Capital Management

In capital management, the Group aims to increase its profit by using the balance of debt and equity most efficiently while trying to maintain the continuity of its activities on the one hand. The Group's capital structure consists of debt, cash and cash equivalents and equity, and equity items including profit reserves.

Risks associated with each capital class together with the cost of capital of the Group are assessed by the Group's senior management. During these reviews, senior management evaluates the risks associated with each class of capital together with the cost of capital and submits to the Board of Directors the ones that are subject to the decision of the Board of Directors.

The Group's general strategy is not different from Previous Period.

Fair Value

Fair value is the amount at which an asset is traded between willing parties in a current transaction.

Financial assets and liabilities denominated in foreign currencies are translated at the foreign exchange rates that approximate the market prices at the balance sheet date.

The following methods and assumptions are used in estimating the fair value of each financial instrument when it is possible to determine the fair value.

Financial Assets

Due to their short-term nature and being subject to insignificant credit risk, it is considered that they are close to the fair values of cash and cash equivalents and the carrying values of accrued interest and other financial assets. Trade receivables are considered to approximate their fair values subsequent to the original provision for doubtful receivables.

Financial Liabilities

Due to their short-term nature, trade payables and other monetary liabilities are considered to approximate their carrying values. Bank loans are stated at discounted cost and transaction costs are added to the initial cost of the loans. It is considered that the fair values of the loans are expressed by the values they bear because the interest rates on them are updated considering the changing market conditions. Due to their short-term nature, it is foreseen that the fair value of trade payables is close to the value they bear.

40. Financial instruments (realistic value explanations and descriptions in the framework of the hedging accounting)

Fair Value of Financial Instruments

The fair value of the financial assets and liabilities is determined as follows:

– Level 1: Financial assets and liabilities are valued at quoted prices traded on the active market for the same assets and liabilities.

– Level 2: Financial assets and liabilities are valued at inputs that are used to determine the price of the asset or liability that is observable directly or indirectly in the market, other than the quoted price at the first level.

– Level 3: Financial assets and liabilities are valued at inputs that are not based on observable inputs in the market for the fair value of an asset or liability.

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than a compulsory sale or liquidation, and is best determined by a market price, if any.

The estimated fair values of financial instruments are determined using available market information and appropriate valuation methodologies. However, in the interpretation of market data in the fair value estimation, discretion is used. Consequently, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange.

41. Events after balance sheet date

None.

42. The other issues which substantially affect the financial statements or are required to be described in terms of making the financial statements clear, interpretable and understandable

None.

43. Restatement of Prior Year Financial Statements

There is no regulation arrangement on financial statements of December 31, 2019 referring International Accounting “Number 8” Accounting Policies, Changes and Errors in Accounting Estimates “(“ IAS 8 “).

INDEPENDENT AUDITORS REPORT

To the Shareholders of Directors
of Erkunt Sanayi Anonim Şirketi

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Erkunt Sanayi A.Ş. (“the Company”), which comprise the statement of financial position as at December 31,2019, the statements of profit or loss and other comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at December 31,2019, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors’ Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in (jurisdiction), and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company’s financial reporting process.

Key Audit Issues

Key Audit Issues are the most important issues in the independent audit of the financial statements for the current period according to our professional judgment and profession. As a whole, significant auditing subjects are dealt with within the framework of the independent audit of the financial statements and our opinion on the financial statements and we do not provide a separate opinion on these matters.

<table>
<tr><td>Trade Receivables</td><td></td></tr>
<tr><td>
The Company’s trade receivables from non-related parties are an important part of total assets.

The Company management takes into account the collaterals received from customers, past collection performances, maturity analysis, disputes or claims regarding receivables when assessing the recoverability of trade receivables. As a result of these evaluations, the determination of doubtful receivables and the provisions for these receivables and the determination of the receivable values that have been reduced (reducing deferred financial expenses) as of the date of the financial statements are realized by the assumptions and estimations of the management.

For these reasons, Trade Receivables are defined as one of the significant audit subjects by us.

Accounting principles and amounts related to trade receivables in financial statements are Note 2.09.02 Summary of Significant Accounting Policies, 2.04 Changes on Accounting Policies and Footnote 10 Trade Receivables and Payables. Are explained in detail.
</td><td>
When designing audit procedures to address this key issue of auditing, the accounting policies applied by the Company’s management regarding Trade Receivables are considered to comply with TAS and related legislation.

Company within the framework of this evaluation;

– The existence and accuracy of the trade receivable balances from non-related parties with the direct validation letters were tested.

– Aggregate aging study was analyzed analytically and the collection turnover rate was determined, compared with the previous period and the provision for doubtful receivables was tested.

– The collections made after the reporting period have been tested by selecting samples.

– The collection risk is analyzed by analyzing the overdue receivables.

– Exchange rate differences of foreign currency indexed receivables have been recalculated.

– Guarantee letters received from customers have been tested.

– It has been investigated whether there is a legal dispute regarding the receivables and the provision of doubtful receivable has been evaluated by taking a written declaration about the proceedings from the Company lawyers.

– It has been investigated expected credit loss model and calculations process.
</td></tr>
</table>

Useful lives of Tangible and Intangible assets, Depreciation and Capitalization of Ongoing Investments Principles	
As explained in Note 18, the carrying value of Tangible Fixed Assets is TL 120.717.293 as of December 31, 2019. The Company has to periodically determine whether there is a change in the useful lives of Tangible Fixed Assets and to disclose the estimated useful lives that will determine the future depreciation amounts. It is important for our audit that these transactions contain important judgments and this issue has been determined as the subject of the key audit by us.	The procedures that we apply in relation to the values of tangible fixed assets in the financial statements include the planning of the tests on the accounting process of the depreciation calculations and the evaluation of the effectiveness of the operation. In addition, depreciation amounts were tested by recalculation and the useful lives of capitalized assets were evaluated. The appropriateness of depreciation expense for Tangible Fixed Assets according to IAS 16 has been questioned. Activation principles within the scope of account IAS 16 "Tangible Fixed Assets" related to investments transferred to the Machinery, Plant and Equipment account have been made available to use.

Revenue Periodicity	
Revenue is recognized when significant risks and returns are transferred to the buyer. Due to the nature of the operations of the Company, there are products that have been completed, delivered to the customer and the delivery price has not been realized although the sales price has been collected. As of the reporting date, the products in this case are located in the Company's inventory areas. The ownership rights and risks of these non-transferable products can be transferred to the customer. According to the above-mentioned explanations, the principle of the periodicity of sales is determined as the key audit subject whether the revenue of the products in this situation is recorded in the correct period. The Company's accounting policies and amounts related to revenue are disclosed in **Note 2.09.17 and Note 28.**	The following audit procedures have been applied to register the revenue during our audit: – The design and implementation of controls related to the revenue process were evaluated. The Company's sales and delivery procedures were analyzed. – The provisions regarding the commercial and shipping conditions in the contracts with the customers were examined and the timing of the revenue to be included in the financial statements for different shipping arrangements was evaluated. – The financial verification procedures focused on the evaluation of the situations where the income was invoiced but not earned. – Revenue is analyzed by increasing rates and the accuracy of Revenue items has been checked by increasing sample revenue verification tests.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to

modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Reports on Other Responsibilities Arising from Regulatory Requirements

1) In accordance with paragraph 4 of Article 402 of the TCC, no significant matter has come to our attention that causes us to believe that the Company's bookkeeping activities for the period 1 January - 31 December 2019 and financial statements are not in compliance with the code and provisions of the Company's articles of association in relation to financial reporting.

2) In accordance with paragraph 4 of Article 402 of the TCC, the Board of Directors of the Company submitted to us the necessary explanations and provided required documents within the context of audit.

The responsible auditor who conducting and finalizing of this independent audit is Metin ETKİN.

GÜRELİ YEMİNLİ MALİ MÜŞAVİRLİK VE BAĞIMSIZ DENETİM HİZMETLERİ A.Ş.

Total	**15,120,000**	**100.0**	15,120,000	100.0

The number of employees as of December 31, 2019 is 1.287 employees. (December 31, 2018: 1.310 employees)

The financial statements for the period 1 January-31 December 2019 have been approved by the Board of Directors on March 5, 2020. The financial statements will be finalized by the approval of the General Assembly.

2. Basis of Presentation of the Financial Statements

2.01 Basic Presentation Principles

The Company's headquarters and subsidiaries in Turkey maintain and prepare their accounting records and legal financial statements in Turkish Lira in accordance with the terms of the Uniform Chart of Accounts issued by the Turkish Commercial Code ("TCC") and the Ministry of Finance of the Republic of Turkey ("Ministry of Finance").

Declaration of Conformity to Turkish Accounting Standards

The accompanying financial statements public oversight accounting and Auditing Standards Authority ("UPS"), which was introduced by the Turkish accounting standards ("Tas/TFRs") and has been prepared in accordance with the interpretations.

The financial statements are presented in accordance with the 2019 TMS taxonomy, which was published in accordance with the ups's decision of 15 April 2019

The financial statements of the company are presented in functional currency which is valid in the basic economic environment in which it operates

The company's financial position and operating results are expressed in Turkish lira, which is the current currency of the company and is the presentation unit for the financial statements

2.02 Correcting the Financial Statement in the High Inflation Periods

Before the Turkish code of commerce no: 6102 and the legislative decree no: 660 and the related legislation, with a decision taken by the capital markets board ("SPK") in March 17,2005, for the companies which have activities in Turkey and which issue financial statement according to the SPK accounting standards, because it was announced that it is not required to apply the inflation accounting such that it is in effect as from January 1,2005, as from that date, the application of issuance and presentation of the financial statements according to the Turkish accounting standard 29 "Financial reporting in the high inflationist economies" was terminated.

2.03 Consolidation Principles

Subsidiaries, The Parent Company has the right to use more than 50% of the voting rights of the shares in the companies, either directly and/or indirectly, as a result of the ownership and/or control of other companies; or companies that have the power and power to control the financial and operating policies in the interests of the Parent Company through the use of de facto control over the financial and operating policies, without having the authority to exercise more than 50% of the voting rights.

The Company does not have any subsidiaries as of December 31,2019. (December 31, 2018: None).

Investments in affiliates; were accounted for using the equity method from equity. These are entities in which the Company generally owns between 20% and 50% of the voting rights, or the Company has significant influence over the Company's activities, as opposed to having control. Unrealized gains on transactions between the Company and its Subsidiary are eliminated to the extent of the Company's interest in the associate and unrealized losses are restated if the transaction does not impair the carrying amount of the asset. The Company has not continued the equity method in case the carrying value of the investment in the associate is zero or the significant effect of the Company is terminated, unless the Company has entered into an obligation or commitment with respect to the Participation. The carrying amount of an investment at the date on which the significant effect is incurred is recognized at fair value when the fair value can be reliably measured thereafter,

Equity method; It is the method of recording to the financial statements by recording the acquisition cost of the associates at the initial acquisition cost and increasing or decreasing the amount to show the part of the equity of the subsidiary from the equity of the subsidiary.

Affiliates	**Capital**	**Participation Rate**	**Participation Amount**	**Accounting Amount**
Kumsan Döküm Malzemeleri San. ve Tic. A.Ş.	1,200,000	25.1%	1,213,453	Shares Received from Equity Method

Financial Fixed Assets; If the direct or indirect share of the Company is less than 20% or more than 20%, the Company does not have any significant influence or it is not important for the financial statements; financial assets that are not traded in organized markets and whose fair values cannot be reliably measured and which the Company does not intend to sell are reflected in the financial statements at cost after deducting impairment losses. Available-for-sale financial assets that are traded on structured markets and that its fair value can be reliably measured are recognized at fair value. (December 31,2017: None). Details of Company's financial asset is disclosed in Note 7.

2.04 Changes in Accounting Policies

In case of changes and errors in the accounting policies and accounting estimates, material changes and detected material accounting errors are applied retroactively and the financial statements for the previous period are reissued. If the changes in the accounting policies affect the previous periods, such policy is also retroactively applied in the financial statements as if it is always used.

The Company started to apply the IAS 16 Leases Standard on January 1, 2019 for the first time. In accordance with IAS 17, for leases classified as operating leases, as of January 1, 2019, the Company has reflected in the financial statements an asset right over an amount equal to the lease obligation, which was adjusted for the amount of all prepaid or accrued lease payments.

The effects of the application of IAS 16 to the statement of financial position dated December 31,2019 and the statement of profit or loss for the accounting period ending on the same date are presented below. The application of the standard does not have a significant effect on the other comprehensive income statement and the cash flow statement.

Net profit	**26,434,404**	**(495,912)**	**25,938,492**

In accordance with IAS 17, for leases classified as operating leases, as of January 1, 2019, the Company has reflected in the financial statements an asset right over an amount equal to the lease obligation, which was adjusted for the amount of all prepaid or accrued lease payments. In this context, the application of IFRS 16 Leases Standard has no effect on the Company's previous years' profits of 1 January 2019.

2.05 Comparative Information and Adjustment of the Financial Statements for the Previous Periods

Accounting estimates are based on reliable information and reasonable estimation methods. However, estimates are reviewed as a result of changes to the forecasted conditions, acquisition of new information, or additional developments. The effect of the change in the accounting estimate is reflected in the financial statements to reflect only the period profit or loss for the current period in which the change is made and for future periods if both the change and the future periods are considered.

The nature and amount of a change in the accounting estimate that is expected to have an effect on the results of operations in the current period or that would have an impact on future periods is disclosed in the notes to the financial statements, except where it is not possible to estimate the effect of the future periods.

The financial statements of the Company are prepared comparatively with the prior period in order to enable the determination of the financial situation and performance trends.

Where necessary, changes in the reclassification of the current period are applied to the prior financial statements in order to be consistent.

2.06 Changes in the Accounting Estimates

Accounting estimates are made based on reliable information and reasonable estimate methods. However, in case of any change in the conditions under which the estimate is made, obtaining new information or occurrence of additional developments, estimates are reviewed. If effect of the change in the accounting estimate is related to one period only, it is reflected to the financial statements to be considered in calculation of the profit or loss for the period in the current period or both in the period of the change and the following periods on a retrospective basis if it is also related to the following periods.

Nature and amount of a change in the accounting estimate, which change has an effect on the result of operations for the current period or expected to affect the following periods, are disclosed in the notes to the financial statements except for any cases where it is not possible to estimate such effect for the following periods. There is no change in the accounting estimates in the current period.

2.07 Significant Accounting Evaluations, Estimates and Assumptions

In the preparation of the financial statements, the Company Management is required to make assumptions and estimates that will affect the reported amounts of assets and liabilities, the probable liabilities and commitments as of the balance sheet date and the income and expenses in the reporting period. Actual results may differ from estimates. Estimates are regularly reviewed, necessary corrections are made and reflected in the profit or loss table in the period in which they are realized.

The interpretations that could have a significant effect on the amounts reflected in the financial statements and the assumptions made by taking into account the actual sources of the existing or future estimates are as follows:

a) The retirement pay liability is determined using actuarial assumptions (discount rates, future salary increases and employee turnover rates). These assumptions are reviewed at each balance sheet date and revised if necessary. **(Note:24)**

b) The Company depreciated its tangible assets by using the straight-line depreciation method in accordance with the useful life. Expected useful life residual value and amortization method are reviewed every year for possible effects of changes in estimates and are accounted for on a prospective basis if there is a change in estimates. **(Note:2.09.04)**

c) Provisions for bad debt reflect the amounts which the Company's management believes to recover future losses for any receivables which are outstanding as of the date of balance sheet with a risk of non-collection in the framework of the current economic conditions. When impairment of receivables is evaluated, past performances of debtors, their credibility on the market and performances between the date of balance sheet and date of approval of the financial statements and renegotiated conditions are also considered. The information regarding the relevant provisions as of the date of balance sheet is given in **Note: 10.**

d) In the case of impairment of inventories, the physical characteristics of the inventories and how much they have come from the past are assessed, the utility of the inventories is determined based on the opinion of the technical staff and provisions are made for the items that are estimated to be unavailable. For calculating the net realizable value of inventories, average selling prices are used. **(Not:13)**

e) The Company has made deferred tax calculation in accordance with TAS and TFRS and reflected to the financial statements.

f) Company management, In accordance with the best estimates in the light of legal advisors and expert opinion regarding cases described in detail at **Note: 22**, has made provision in the financial statements.

2.08 Netting/Offsetting

The financial assets and liabilities are shown at their net values in the balance sheet if there is a legal right of netting, they are paid on a net basis or may be collected or acquisition of the asset and satisfaction of the liability may occur concurrently.

2.09 Summary of Important Accounting Policies

Summary of the important accounting policies applied during preparation of the financial statements is as follows:

2.09.01 Cash and Cash Equivalents

Cash and cash equivalents comprise cash on hand, cash in hand, short-term cash and cash equivalents, which are not held for investment or other purposes, are readily convertible into cash within a short period of time and have high liquidity and are unlikely to change in value. (Note 6). It is included in fixed assets if it has cash or similar assets used for payment of debts or for other reasons within twelve months after the balance sheet date.

2.09.02 Trade Receivables

Trade receivables originated by the Company by way of providing goods or services directly to a debtor are carried at amortized cost using the effective yield method and if the provision for doubtful receivables is deducted. Short-term trade receivables with no stated interest rate are measured at the invoice amount if the interest accrual effect is insignificant.

Notes and term checks classified as trade receivables are carried at amortized cost using the effective interest rate at the balance sheet date.

The provision for doubtful receivables is reflected in the records as expense. Provision is the amount that is estimated by the Company management and considered to cover the possible damages that may arise from the economic condition or the risk it carries for the account.

2.09.03 Inventories

Inventories are reflected in the financial statements at the lower of acquisition cost or net realizable value. Costs included in inventories are material, labor and general production costs. Cost is calculated by weighted average method.

Net realizable value is the estimated cost of completion of an ordinary business activity and the estimated cost of sales Total required to realize the sale.

2.09.04 Tangible Fixed Assets

Property, plant and equipment are carried at cost, restated for the effects of inflation as of December 31, 2004 and items purchased at January 1, 2005 less any accumulated depreciation for the items purchased before January 1, 2005 Property, plant and equipment are depreciated on a straight-line basis over their useful lives.

The depreciation rates determined by considering the useful lives of the tangible assets are as follows:

	Useful Life (Year)
Buildings	5-50
Land improvements	4-50
Machinery, Plant and Equipment	2-15
Vehicles	5
Fixtures	2-15
Other Tangible Fixed Assets	3

The expected useful life residual value and amortization method is reviewed every year for the possible effects of the changes emerged in the predictions and if there is a change in the forecasts, it is recognized prospectively.

The profits and losses occurring because of selling of fixed assets are determined by comparing the net book value and sales price and included in the operations profit.

2.09.05 Intangible Fixed Assets

The tangible assets, excluding the ones included in the financial statement with the realistic value, are indicated over the costs values corrected according to the effects of the inflation as of December 31st, 2004 for the items purchased before the January 1st, 2005 and by deducing the accumulated amortization from the purchasing cost value for the items purchased after the January 1st, 2005. The fixed assets are subjected to amortization according to the useful life principle with the direct amortization method.

Expected useful life and amortization method are reviewed annually and the changes in estimates are accounted for on a prospective basis to determine the possible effects of changes in estimates.

Depreciation rates determined by considering useful lives of intangible assets are below:

	Useful Life (Year)
Rights	3-15

2.09.06 Borrowing Costs

When the assets which it takes a substantial amount of time to make ready for usage and selling are in question, the borrowing costs which can be directly correlated with purchasing, making or production are had to be included in the cost of the asset until the related asset is made ready for usage or selling. The financial investment income, obtained by using the part of the credit, related with the credit, not spent yet in the financial investments for a temporary period is offset from the borrowing costs suitable for capitalization. All of the other borrowing costs are recorded in the income statement in the period when they occur. The company does not have any financing costs capitalized during the period.

2.09.07 Impairment of Assets

The assets which have infinite life are not subjected to amortization. The impairment test is applied for these assets. For the assets subjected to amortization, in case that situations or events take place where it is not possible to recover the book value, test of impairment of assets is applied. In case that the book value of the asset exceeds the recoverable value, the provision for impairment is made and recorded. The recoverable amount is the bigger one of the realistic value obtained after deducing the costs of sale and the value in usage. In order to evaluate the value lowness, the assets are grouped in the lowest level where there are cash flows which can be defined separately. The assets which are not financial, which are subjected to the impairment are reviewed for the possible cancellation of the impairment of assets in every reporting date.

2.09.08 Effect of Changes in the Exchange Rates

Foreign currency transactions realized during the year are translated into Turkish Lira at the date of the transactions. Assets and liabilities denominated in foreign currencies are translated into Turkish Lira at the rates prevailing at the balance sheet date. Foreign exchange gains/losses arising from the translation and collection of foreign currency transactions are included in the income statement.

Foreign currency transactions realized during the year are translated into Turkish Lira at the date of the transactions. Assets and liabilities denominated in foreign currencies are translated into Turkish Lira at the rates prevailing at the balance sheet date. Foreign exchange gains/losses arising from the translation and collection of foreign currency transactions are included in the income statement.

The Company's financial statements are presented in the currency of the primary economic environment in which it operates. The financial performance and operating results of the Company are expressed in TL, which is the functional currency.

Transactions in foreign currencies during the preparation of the Company's financial statements are recorded based on the exchange rates at the transaction date. Monetary assets and liabilities indexed at the balance sheet are translated into Turkish Lira at the rates prevailing at the balance sheet date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated into Turkish Lira based on the exchange rates at the date when the fair value was determined. Non-monetary items in foreign currency measured in terms of historical cost are not retranslated. Exchange differences are recognized as profit or loss in the period in which they incur.

2.09.09 Taxes Calculated on the Corporate Profit

Income tax expense/revenue is represented by sum of the current tax expense/ revenue and deferred tax expense (or revenue).

Current tax

Current year's tax liability is calculated on the taxable portion of the profit for the period. Taxable profit does not include income or expense items taxable or deductible in the other years and items which are not taxable or deductible, so it differs from the profit stated in the income statement. The company's current tax liability was calculated by the tax rate legalized or substantially legalized as of the date of balance sheet.

Deferred tax

Deferred tax liability or asset are defined by calculating tax effects of temporary differences between amounts of the assets and liabilities indicated in the financial statements and their amounts considered in calculation of the legal tax base according to the balance sheet method by considering the legalized tax rates.

Deferred tax liabilities are calculated for all taxable temporary differences but deferred tax assets represented by deductible temporary differences are calculated provided that it is highly probable to benefit from such differences by gaining taxable profit in the future. No deferred tax liability or asset is calculated for temporary timing differences caused by inclusion of assets or liabilities, other than goodwill or business mergers, in the financial statements for the first time and which do not affect both trade and financial profit or loss.

Deferred tax liabilities are calculated for all of taxable temporary differences which are associated with investments in the affiliates and subsidiaries and shares in business partnerships except for any cases where the Company may control elimination of the temporary differences and there is a low possibility for elimination of such different in the near future. Deferred tax assets arising from the taxable temporary differences associated with such investments and shares are calculated provided that it is highly probable to benefit from these differences by gaining sufficient taxable profit in the near future and it is possible to eliminate such differences in the future.

Book value of deferred tax asset is reviewed as of each date of balance sheet. Book value of deferred tax asset is reduced to the extent that it is not possible to gain financial profit at a level to allow for acquisition of the benefit to be provided by all or part of it.

Deferred tax assets and liabilities are calculated on the tax rates (tax adjustments) expected to be effective in the period when the asset are realized or the liabilities are satisfied and legalized or substantially legalized as of the date of balance sheet. During calculation of deferred tax assets and liabilities, tax results of the methods estimated by the Company for recovering book values of the assets as of the date of balance sheet or satisfaction of its liabilities are considered.

Deferred tax assets and liabilities ate set off if there is a legal right to set off the current tax assets against the current tax liabilities or such assets and liabilities are associated with the income tax collected by the same tax authority or the Company intends to pay them by setting off the current tax assets against the current tax liabilities.

Current and deferred tax for the period

Except for those associated with the items directly recognized as a receivable or debt in the equity (in this case, deferred tax for the relevant items is also recognized in the equity directly) or arising from the first recognition of business mergers, the current tax and deferred tax for the period are recognized as an income or expense in the income statement. In business mergers, tax effect is considered in calculation of goodwill or calculation of the portion of the share acquired by the purchaser at the fair value of the definable assets, liabilities and contingent payables of the purchased affiliate in excess of the purchasing cost.

The taxes in the financial statements include the change in the current period taxes and deferred taxes. The Company calculates current and deferred tax on the results of the period.

Netting tax assets and liabilities

The amounts of corporate tax payable are defined as net amounts as they are associated with the pre-paid corporate tax amounts.

2.09.10 Trade Payables

The finance income included in the liabilities is calculated by considering the effective interest rate of the related debt and the effective interest rate, and the amounts are shown in the financial statements in the financial statements.

2.09.11 Leasing Transactions

At inception of a contract, the Company assesses whether a contract is, or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, The Company assess whether:

(a) the contract involved the use of an identified asset – this may be specified explicitly or implicitly.

(b) the asset should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a substantive substitution right, the asset is not identified.

(c) the Company has the right to obtain substantially all of the economic benefits from the use of an asset throughout the period of use; and

(d) the Company has the right to direct use of the asset. The Company concludes to have the right of use, when it is predetermined how and for what purpose the Company will use the asset. The Company has the right to direct use of asset if either:

The Company has the right to operate (or to have the right to direct others to operate) the asset over its useful life and the lessor does not have the rights to change the terms to operate or;

The Company designed the asset (or the specific features) in a way that predetermines how and for what purpose it is used

Right of use asset

At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

The right of use asset is initially recognized at cost comprising of:

(a) amount of the initial measurement of the lease liability;

(b) any lease payments made at or before the commencement date, less any lease incentives received;

(c) any initial direct costs incurred by the Company;

To apply a cost model, the Company measure the right-of-use asset at cost:

(a) less any accumulated depreciation and any accumulated impairment losses; and

(b) adjusted for any remeasurement of the lease liability.

The Company applies the straight-line method to depreciate the right of use. If the lease transfers ownership of the underlying asset to the lessee by the end of the lease term or if the cost of the right-of-use asset reflects that the lessee will exercise a purchase option, the Company depreciate the right-of-use asset from the commencement date to the end of the useful life of the underlying asset. Otherwise, The Company depreciate the right-of-use asset from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

The Company apply IAS 36 Impairment of Assets to determine whether the right-of-use asset is impaired and to account for any impairment loss identified.

Lease Liability

At the commencement date, The Company measure the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discountedusing the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company use the lessee's incremental borrowing rate.

At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

(a) fixed payments, less any lease incentives receivable;

(b) variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;

(c) the exercise price of a purchase option if the Company is reasonably certain to exercise that option; and

(d) payments of penalties for terminating the lease, if the lease term reflects the Company exercising an option to terminate the lease.

After the commencement date, the Company measure the lease liability by:

(a) increasing the carrying amount to reflect interest on the lease liability;

(b) reducing the carrying amount to reflect the lease payments made; and

(c) remeasuring the carrying amount to reflect any reassessment or lease modifications, or to reflect revised insubstance fixed lease payments.

Interest on the lease liability in each period during the lease term is the amount that produces a constant periodic rate of interest on the remaining balance of the lease liability. The Company determine the revised discount rate as the interest rate implicit in the lease for the remainder of the lease term, if that rate can be readily determined, or the lessee's incremental borrowing rate at the date of reassessment, if the interest rate implicit in the lease cannot be readily determined. After the commencement date, The Company remeasure the lease liability to reflect changes to the lease payments. The Company recognise the amount of the remeasurement of the lease liability as an adjustment to the rightof-use asset.

The Company shall remeasure the lease liability by discounting the revised lease payments using a revised discount rate, if either:

(a) There is a change in the lease term. The Company determine the revised lease payments on the basis of the revised lease term; or

(b) There is a change in the assessment of an option to purchase the underlying asset. The Company determine the revised lease payments to reflect the change in amounts payable under the purchase option..

The Company determine the revised discount rate as the interest rate implicit in the lease for the remainder of the lease term, if that rate can be readily determined, or the lessee's incremental borrowing rate at the date of reassessment, if the interest rate implicit in the lease cannot be readily determined.

The Company remeasure the lease liability by discounting the revised lease payments, if either:

(a) There is a change in the amounts expected to be payable under a residual value guarantee. The Company determine the revised lease payments to reflect the change in amounts expected to be payable under the residual value guarantee.

(b) There is a change in future lease payments resulting from a change in an index or a rate used to determine those payments. The Company remeasure the lease liability to reflect those revised lease payments only when there is a change in the cash flows.

The Company determine the revised lease payments for the remainder of the lease term based on the revised contractual payments. In that case, the Company use an unchanged discount rate.

The Company account for a lease modification as a separate lease if both:

(a) The restructuring extends the scope of the leasing by including the right of use of one or more underlying assets, and

(b) The lease payment amount increases as much as the appropriate adjustments to the price mentioned individually so that the increase in scope reflects the individual price and the terms of the relevant agreement.

The Company does not have financial leasing transactions. Operational financial leasing transactions are below;

Rental contracts in which the lessor holds all risks and benefits of the property are called operational leases. As of December 31,2019, the operating lease income of the Company is TL 72,000 (December 31,2018: TL 70,800). As of December 31, 2018, the operational leasing expenses of the Company is TL 526,429 (December 31,2018: TL 3,203,350).

2.09.12 Retirement and Provision for Severance Pay

As required by the labor law valid in Turkey, the retirement and indemnity provisions are allocated as they incur in the financial statements attached. According to the UMS 19 "Benefits provided to the employees", which was updated, the payments of the type in question are characterized as described retirement benefit plans.

In the attached financial statements, the seniority indemnity liability is reflected to the financial statements as the amount found by discounting with the suitable interest rate, purified of the inflation rate, in order to calculate the value of the retirement indemnity to be paid in the future years in the date of the balance sheet.

2.09.13 Research and Development Expenses

Research expenditures are recorded as expenses when they occur. Development costs recorded in the prior period cannot be capitalized in the following period. Development costs are treated as intangible assets if they have the following criteria:

– If the costs associated with the product can be clearly defined and reliably measured,

– If the technical capability/feasibility of the product can be measured,

– If the product is to be sold or used within the company,

– If there is a potential market for the product, or if it can be proven to be internally usable,

– If sufficient technical, financial and other necessary resources are available for the completion of the project.

Costs of development projects that meet the above criteria are capitalized and amortized on a straight-line basis over the life of the project.

2.09.14 Financial Instruments

2.09.14.01 Financial Assets

According to TFRS 9, when a financial asset is first recognized in financial statements; measured over the amortized cost; borrowing instruments measured by reflecting Fair Value (FV) difference in other comprehensive income; FV is classified as being measured by reflecting other comprehensive income - equity instruments or FV difference reflected in profit or loss. The classification of financial assets in accordance with TFRS 9 is generally based on the business model used by the entity for the management of financial assets and the contractual cash flows of the financial asset. Under the standard, the obligation to leave the embedded derivatives from the financial asset has been eliminated and the manner in which a hybrid contract will be classified as a whole should be evaluated.

A financial asset is measured at amortized cost if both of the following conditions are met and the FV is not classified as measured by the difference in profit or loss.

– The retention of the financial asset in a business model aimed at collecting contractual cash flows and,

– The contractual terms of the financial asset lead to cash flows that include interest payments on principal and principal balance on certain dates.

A debt instrument is measured by reflecting the FV difference on other comprehensive income if both of the following conditions are met and the FV is not classified as measured by the difference in profit or loss:

– The retention of the contractual cash flows of the financial asset and a business model aimed at selling the financial assets and,

– The contractual terms of the financial asset lead to cash flows that include interest payments on principal and principal balance on certain dates.

In the initial recognition of investments in equity instruments that are not held for trading, it is possible to make an irrevocable preference for subsequent changes in fair value to be presented in other comprehensive income. The choice of this selection can be made on each investment basis.

All financial assets that are not measured by the above mentioned amortized cost or by reflecting the FV difference in other comprehensive income are measured by reflecting to FV difference profit or loss. These include all derivative financial assets. In the event that financial assets are recognized for the first time in their financial statements, a financial asset is recognized at fair value through profit or loss in the event of a can be defined as reflected and a financial asset can be irrevocably measured at fair value through profit or loss on the condition that it eliminates or significantly reduces an accounting mismatch.

In the first measurement of the financial assets other than those whose fair value changes are reflected to the profit or loss (except for the trade receivables that are measured at the transaction cost on the first time in the financial statements and which does not have an important financing component), the transaction costs which can be directly related to the acquisition or issuance of them are also added to the measured fair value.

Trade Receivables

Trade receivables and notes and post-dated checks classified within trade receivables which are recognized at original invoice amount are measured at amortized cost using the effective interest rate method. Short term trade receivables without specified interest rate, are measured at invoice amount when the interest accrual effect is immaterial.

A credit risk provision for trade receivables is established if there is objective evidence that the Company will not be able to collect all amounts due. The allowance is an estimated amount which is difference between existing receivable and collectible amount. Collectible amount is the discounted value of trade receivables, all cash flows including collections from guarantees by using original effective interest rate.

A credit risk provision for trade receivables is established if there is objective evidence that the Company will not be able to collect all such receivables. The allowance for doubtful receivables is established through a provision charged to expenses. Provision is made when there is objective evidence that the Company will not be able to collect the debts. The allowance is an estimated amount that management believes to be adequate to absorb possible future losses on existing receivables that may become uncollectible due to current economic conditions and inherent risks in the receivables. Bad debts are written off when identified. Provision for doubtful receivables is recognized as an expense when identified.

If a portion or the entire amount of a receivable is collected after provided for a provision, the collected amount is deducted from total provision and is recognized as an income in the comprehensive income statement.

Company has preferred to apply “simplified approach” defined in IFRS 9 for the recognition of impairment losses on trade receivables, carried at amortised cost and that do not comprise of any significant finance component (those with maturity less than 12 months). In accordance with the simplified approach, Company measures the loss allowances regarding its trade receivables at an amount equal to “lifetime expected credit losses” except incurred credit losses in which trade receivables are already impaired for a specific reason.

Derivative financial instruments

Derivative financial instruments are initially recognised in the balance sheet at cost and subsequently are re-measured at their fair value. The derivative instruments of the Company mainly consist of foreign exchange forward contracts and related transactions. These derivative transactions, even though providing effective economic hedges under the Company risk management position, do not generally qualify for hedge accounting, therefore treated as ‘derivative financial instruments held for trading. Any gains or losses arising from changes in the fair value of such kind of financial instruments are recognized under statement of profit and loss.

Impairments on financial assets

Financial assets are assessed at each balance sheet date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, and only if, there is objective evidence of impairment as a result of one or more events that had occurred after the initial recognition of the asset and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. For loans and receivables impairment loss has been incurred the amount of the loss is measured as the difference between the asset’s carrying amount and the present value of estimated future cash flows.

Except for trade receivables, which is reduced through the use of an allowance account, impairment on all other financial assets are directly written off in the related account. In case trade receivables cannot be collected, the related amount is written off from allowance account. The change in allowance account is accounted in the comprehensive income statement.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and at banks and short-term highly liquid and the risk of value change is not material investments including time deposits generally having original maturities of three months or less.

Bank accounts consist of time and demand deposit accounts and the related interest accrued. The Turkish Lira balances are stated at face values and the foreign currency balances are translated into Turkish Lira at the foreign currency rate issued by the Central Bank as at the report date. Time deposit accounts are stated as calculated by adding accrued interest as of balance sheet date on the principle amount.

2.09.14.02 Financial Liabilities

TFRS 9 substantially retains the provisions in TAS 39 for the classification and measurement of financial liabilities. However, financial assets held for maturity, loans and receivables and available-for-sale financial assets, the previous TAS 39 classification categories have been removed.

The implementation of TFRS 9 didn’t have a significant impact on the Company’s accounting policies related to its financial liabilities and derivative financial instruments.

The Company’s financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument. The contract representing the right in the assets of the Company after deducting all of its liabilities is an equity-based financial instrument. The accounting policies applied for certain financial liabilities and equity instruments are as follows.

Financial liabilities are classified as financial liabilities at fair value through profit or loss or other financial liabilities.

a) Financial liabilities whose fair value difference is recognized in the profit/loss accounts

Financial liabilities at fair value through profit or loss are recognized initially at fair value and are revalued at fair value at each balance sheet date. The change in fair value is recognized in the income statement. The net gain or loss recognized in the income statement also includes the amount of interest paid for that particular financial liability.

b) Other Financial Liabilities

Other financial liabilities, including financial liabilities, are initially accounted at fair value, net of transaction costs.

Other financial liabilities are accounted for at amortized cost using effective interest method in the following periods together with interest expense calculated at effective interest rate.

The effective interest method is the calculation of the amortized cost of the financial liability and the way in which the relevant interest expense is related to the amortization. Effective interest rate; reduces the estimated cash payments to be made in the future over the expected life of the financial instrument or, where appropriate, for a shorter period of time, to the net present value of the related financial liability.

2.09.15 Provisions, Contingent Liabilities and Assets

If the Company has a liability arising from the past events, sources involving economic benefit may be disposed from the Company for satisfaction of such liability and amount of such liability may be estimated reliably, the relevant liability is included in the financial statements as a provision. Contingent liabilities are always subject to assessment for finding if the possibility of disposing the sources involving economic benefit from the Company is possible. If the possibility of disposing the sources involving economic benefit from the Company occurs for the items processed as a contingent liability in the future, such contingent liability is included in the financial statements for the period of the change in the possibility as a provision except for the circumstances of failure in reliable estimate.

The Company indicates such liability in the notes if the contingent liabilities become possible but it is not possible to reliably estimate amount of the sources involving economic benefit. Any asset which arises from the past events and shall be confirmed by finding if one or more unclear event(s) existence of which is not fully under the control of the Company is considered as a contingent asset. The contingent assets are disclosed in the notes in case of a high possibility of the Company’s acquisition of the sources involving economic benefit.

Where it is expected that all or part of the economic benefits used to pay the amount of provision are covered by the third parties, is recognized as an asset if this amount shall be repaid finally and the amount is calculated reliably.

2.09.16 Related Parties

For the purpose of these financial statements, partners, senior level directors and members of the board of directors, their families and the companies controlled by them or their affiliates, subsidiaries and partnerships are considered and stated as related parties. The transactions entered into with the related parties because of the ordinary activities were performed with the prices compatible with the market conditions. The detailed description performed with the related parties is given in the **Note: 37**.

2.09.17 Revenue recognition

Company recognizes revenue when the goods or services is transferred to the customer and when performance obligation is fulfilled. Goods is counted to be transferred when the control belongs to the customer.

Company recognizes revenue based on the following main principles:

a) Identification of customer contracts

b) Identification of performance obligations

c) Determination of transaction price in the contract

d) Allocation of price to performance obligations

e) Recognition of revenue when the performance obligations are fulfilled

Company recognized revenue from its customers only when all of the following criteria are met:

a) The parties to the contract have approved the contract (in writing, orally or in accordance with other customary business practices) and are committed to perform their respective obligations,

b) Company can identify each party's rights regarding the goods or services to be transferred,

c) Company can identify the payment terms for the goods or services to be transferred;

d) The contract has commercial substance,

e) It is probable that Company will collect the consideration to which it will be entitled in exchange for the goods or services that will be transferred to the customer.

In evaluating whether collectability of an amount of consideration is probable, an entity shall consider only the customer's ability and intention to pay that amount of consideration when it is due.

Service revenue is recognized in the period services given. Service revenue in the context of repair maintenance agreements for more than one year are recognized in equal installments (straight line method) during the agreement periods and amounts belonging to the following periods are booked as deferred revenue.

When the arrangement effectively constitutes a financing transaction, the fair value of the consideration is determined by discounting all future receipts using an imputed rate of interest. The difference between the fair value and the nominal amount of the consideration is recognized on an accrual basis as financial income.

Interest income is recognised using the effective interest rate until maturity and considering the effective interest rate.

2.09.18 Cash Flow Statement

Cash and cash equivalents are the cash money, current account and the other short termed investments, the maturity of 3 months or less than 3 months as from the purchasing date, which can be converted into cash immediately and don't have a substantial amount of value change risk, with a high liquidity.

In the cash flow statement, the cash flows related with the period are classified and reported based on the operation, investment and financial activities.

The cash flows arisen from the operational activities indicates the cash flows arisen from the main activities of the Company. The cash flows related with the investment activities indicate the cash flows which the Company uses and obtains in the investment activities (asset investments and financial investments). The cash flows related with the finance activities indicate the resources which the Company uses in the finance activities and the repayment of these resources.

2.09.19 Earning/Loss per Share

Profit per share is determined by dividing the net profit to the weighted average number of the shares existing in the related period.

The companies in Turkey can increase their capitals through "bonus share" they distributed from the previous year profits to the shareholders. When the profit per share is calculated, this bonus share issuance is considered as issued shares.

Therefore the weighted number of share average used for the profit per share is obtained by retrospectively applying the bonus issuance of the shares.

2.09.20 Events After Balance Sheet Date

It refers the events emerging on behalf of or on the detriment to the Company between the date of the balance sheet and the date of authorization for publishing the balance sheet. In case that there are new evidences that the events in question exist as of the date of balance sheet or the related events emerge after the date of the balance sheet, the Company describes the issues in question in the **Note: 40.**

The Company, in case that events requiring correction emerge after the date of the balance sheet, corrects the amounts put into the financial statements according to this new situation.

2.09.21 Investment Property

Investment properties are held for the purpose of rentals or gains on valuation and are stated at cost subsequent to their recognition as asset after deduction of accumulated depreciation and accumulated impairment losses. Detailed information about Investment Properties included in **Note 17.**

Depreciation rates determined by considering useful lifes of Investment Property is follows

	Use ful Life (Year)
Buildings	39-50

2.10 Going Concern

The Company prepares its financial statements on the basis of going concern

2.11 New and Revised International Financial Reporting Standards

New standards and interpretations

i) Standards, amendments and interpretations effective as at 31 December 2019

Amendment to IFRS 9, 'Financial instruments'; effective from annual periods beginning on or after 1 January 2019. This amendment confirm two points: (1) that reasonable compensation for prepayments can be both negative or positive cash flows when considering whether a financial asset solely has cash flows that are principal and interest and (2) that when a financial liability measured at amortised cost is modified without this resulting in de-recognition, a gain or loss should be recognised immediately in profit or loss. The gain or loss is calculated as the difference between the original contractual cash flows and the modified cash flows discounted at the original effective interest rate. This means that the difference cannot be spread over the remaining life of the instrument which may be a change in practice from IAS 39.

Amendment to IAS 28, 'Investments in associates and joint venture'; effective from annual periods beginning on or after 1 January 2019. These amendments clarify that companies account for long-term interests in associate or joint venture to which the equity method is not applied using IFRS 9.

IFRIC 23, 'Uncertainty over income tax treatments'; effective from annual periods beginning on or after 1 January 2019. This IFRIC clarifies how the recognition and measurement requirements of IAS 12 'Income taxes', are applied where there is uncertainty over income tax treatments. The IFRS IC had clarified previously that IAS 12, not IAS 37 'Provisions, contingent liabilities and contingent assets', applies to accounting for uncertain income tax treatments. IFRIC 23 explains how to recognise and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment. An uncertain tax treatment is any tax treatment applied by an entity where there is uncertainty over whether that treatment will be accepted by the tax authority. For example, a decision to claim a deduction for a specific expense or not to include a specific item of income in a tax return is an uncertain tax treatment if its acceptability is uncertain under tax law. IFRIC 23 applies to all aspects of income tax accounting where there is an uncertainty regarding the treatment of an item, including taxable profit or loss, the tax bases of assets and liabilities, tax losses and credits and tax rates.

Annual improvements 2015-2017; effective from annual periods beginning on or after 1 January 2019. These amendments include minor changes to:

- IFRS 3, 'Business combinations', – a company remeasures its previously held interest in a joint operation when it obtains control of the business.
- IFRS 11, 'Joint arrangements', – a company does not remeasure its previously held interest in a joint operation when it obtains joint control of the business.
- IAS 12, 'Income taxes' – a company accounts for all income tax consequences of dividend payments in the same way.
- IAS 23, 'Borrowing costs' – a company treats as part of general borrowings any borrowing originally made to develop an asset when the asset is ready for its intended use or sale.

Amendments to IAS 19, 'Employee benefits' on plan amendment, curtailment or settlement'; effective from annual periods beginning on or after 1 January 2019. These amendments require an entity to:

- Use updated assumptions to determine current service cost and net interest for the reminder of the period after a plan amendment, curtailment or settlement and
- Recognise in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the impact of the asset ceiling.

ii) Standards, amendments and interpretations that are issued but not effective as at 31 December 2019:

A**mendments to IAS 1 and IAS 8 on the definition of material**; effective from Annual periods beginning on or after 1 January 2020. These amendments to IAS 1, 'Presentation of financial statements', and IAS 8, 'Accounting policies, changes in accounting estimates and errors', and consequential amendments to other IFRSs:

- Use a consistent definition of materiality throughout IFRSs and the Conceptual Framework for Financial Reporting
- Clarify the explanation of the definition of material and
- Incorporate some of the guidance in IAS 1 about immaterial information.

Amendments to IFRS 3 - definition of a business; effective from Annual periods beginning on or after 1 January 2020. This amendment revises the definition of a business. According to feedback received by the IASB, application of the current guidance is commonly thought to be too complex, and it results in too many transactions qualifying as business combinations.

Amendments to IFRS 9, IAS 39 and IFRS 7 – Interest rate benchmark reform; effective from Annual periods beginning on or after 1 January 2020. These amendments provide certain reliefs in connection with interest rate benchmark reform. The reliefs relate to hedge accounting and have the effect that IBOR reform should not generally cause hedge accounting to terminate. However, any hedge ineffectiveness should continue to be recorded in the income statement. Given the pervasive nature of hedges involving IBOR-based contracts, the reliefs will affect companies in all industries.

IFRS 17, 'Insurance contracts'; effective from annual periods beginning on or after 1 January 2021. This standard replaces IFRS 4, which currently permits a wide variety of practices in accounting for insurance contracts. IFRS 17 will fundamentally change the accounting by all entities that issue insurance contracts and investment contracts with discretionary participation features.

The Company does not expected material impact of new standards and interpretations on Company's accounting policies.

3. Business Mergers

None.

4. Shares in Other Businesses

None.

5. Reporting per Department

None.

6. Cash and Cash Equivalents

The Company's Cash and Cash Equivalents as of December 31, 2019 and 2018 are as follows:

Account Name	**December 31, 2019**	December 31, 2018
Cash	**13,620**	11,029
Banks	**8,458,023**	10,425,025
– Demand deposit	**8,458,023**	1,371,257
– Term deposit (under three months)	**–**	9,053,768
Total	**8,471,643**	10,436,054

The Company has no blocked on Cash and Cash Equivalents as of December 31, 2019 (December 31, 2018: None).

There are no term deposits at the period ended December 31, 2019.(Time deposits are; TL 220,000 and interest rate is 21.50%, USD 75,000 equivalent as TL 394,568 and interest rate is 1.75%, EUR 1,400,000 equivalent as TL 8,439,200 and interest rate is 1.28%. The total amount of overnight time deposits are as TL 9,053,867 due within one month at most as of December 31, 2018.

7. Financial Investments

The Company has no Short-Term Financial Investments as of December 31, 2019.

The Company's Long Term Financial Investments as of December 31, 2019 are as follows:

Account Name	**December 31, 2019**	December 31, 2018
Financial Investments	**–**	173
Provision (-)	**–**	(173)
Total	**–**	–

8. Borrowings

The Company's Short Term Financial Liabilities as of December 31,2019 and 2018 are as follows:

Short-Term Borrowings

Account Name	**December 31, 2019**	December 31, 2018

Total		**357,193**			

There are no restrictions or mortgages on assets as of December 31,2019 and 2018.

23. Commitments

None. (December 31,2018: None).

24. Employee Benefits

The long-term provisions provided to employees as of December 31,2019 and 2018 are as follows:

Long-term	December 31, 2019	December 31, 2018
Provision for severance pay	**19,809,395**	10,867,580
Total	**19,809,395**	10,867,580

In accordance with the provisions of the Labor Law in effect, it is obligatory to pay the legal severance pays entitled by those of employees whose employment contracts are terminated with a right of severance pay. These indemnities are calculated on the wage for 30 days per working year based on the wage on the date of resignation or dismissal. Severance pay payable as of December 31, 2019 is subject to the ceiling of 6,730.15 TL (December 31, 2018: 6,017.60 TL)

The severance pay liability is not subject to any funding legally.

The severance pay liability is calculated according to estimate of present value of future possible liability of the Company due to retirement of the employees. TMS 19 ("Benefits to Employees") stipulates development of liabilities by using the actuarial valuation methods under the defined benefit plans. Accordingly, the actuarial assumptions used in calculation of total liabilities are stated below:

The principal assumption is that the maximum liability for each year of service will increase in line with inflation. Therefore, the discount rate applied represents the expected real rate after the correction of future inflation effects. at December 31,2019, the provision in the accompanying financial statements is calculated by estimating the present value of the future probable obligation of the Company arising from the retirement of the employees. As of December 31,2019, provisions are calculated by 8,50% discount rate by the assumptions of 19,50% yearly inflation rate and 2.76 % real discount rate. (December 31,2018: provisions are calculated by 15.00 % discount rate by the assumptions of 19.50 % yearly inflation rate and 3.91 % real discount rate).

The movements of the provision for severance pay as of December 31,2019 and 2018 are as follows:

	January 1- December 31, 2019	January 1- December 31, 2018
January 1 (beginning of period)	**10,867,580**	9,141,465
Payment	**(3,759,794)**	(2,187,056)
Interest cost	**1,852,646**	1,528,657
Current service cost	**4,192,514**	1,687,840

Total	**27,374,848**	30,562,418

The Company's Expenses from Financing Activities as of December 31,2019 and 2018 are as follows:

Account Name	January 1- December 31, 2019	January 1- December 31, 2018
Interest Expenses	**(8.077.516)**	(8.169.589)
Foreign exchange losses	**(21.658.870)**	(30.849.323)
Total	**(29.736.386)**	(39.018.912)

There are no capitalized financial costs during the period.

34. Non-current Assets or Disposal Groups Classified as Held for Sale

None. (December 31,2018: None).

35. Income Taxes

The provision for corporation income tax of the Company's as of December 31,2019 and 2018 are as follows:

Account Name	31 Aralık 2019	31 Aralık 2018
Provision for corporation income tax	**5,450,553**	7,650,507
Prepaid taxes and funds	**(5,450,553)**	(7,650,507)
Corporation tax payable	**–**	–

The tax deduction (or income) of the Company consists of current tax expense and deferred tax expense (or income).

Account Name	January 1- December 31, 2019	January 1- December 31, 2018
Current period legal tax provision	**(5,450,553)**	(7,650,507)
Deferred tax income/(expense)	**228,973**	(863,523)
Total	**(5,221,580)**	(8,514,030)

i) Current Period Legal Provision for Tax

Advance tax in Turkey is calculated and accrued quarterly. Accordingly, a provisional tax of 20% is calculated over the corporate earnings in the course of taxation of the Company's earnings for the year 2018 in the advance tax period.

Under Turkish tax law, losses can be carried forward for a maximum period of 5 years to be deducted from the taxable profit to be generated in future years. However, losses cannot be deducted retrospectively from profits from previous years.

The advance tax in Turkey is calculated and accrued by quarterly periods. In compliance with this, a tax at the rate of 20% was calculated over the earnings of the company at the stage of taxation of the earnings of the Company for 2017 within the advance tax period.

In Turkey, the corporate tax rate is 22% for 2018 (2017: 20%). However, the corporate tax rate of 20% shall be applied as 22% for the earnings of the company for the taxation periods of 2018, 2019 and 2020 of the companies (the account periods starting within the relevant year for the companies to which special account period is assigned) pursuant to the Provisional Article 10 added to the Corporate Tax Law.

Furthermore, a part of 75% of the earnings arising from the sale of the participation shares included in the assets of the companies for at least two full years and of the founding certificates, dividend right certificates and stock rights of their properties (immovable properties) which they own for the same period is exempt from the corporate tax as of 31 December 2017. In addition to this, this rate was reduced from 75% to 50% in terms of the immovable properties with the amendment made with the law no 7061 and this rate shall be used as 50% in the tax returns to be prepared from 2018. Therefore, whereas 75% exemption was applied to the deferred tax liabilities regarding the revaluation value increase earnings of the tangible fixed assets before the relevant law amendment, this tax exemption was calculated and recognized by using the rate of 50% and considered as the comprehensive income/(expense) factor in the financial statements dated 31 December 2017.

In accordance with the Turkish tax law, the losses can be carried forward for maximum 5 years in order to be deducted from the taxable profit to occur in the forthcoming years. However, the losses may not be deducted from the profits that occurred in the previous years, retrospectively.

Pursuant to the article 20 of the Corporate Tax Law, the Corporate Tax is levied upon the declaration of the taxpayer. There is no final and strict reconciliation procedure related to the tax assessment in Turkey. The companies prepare their tax returns until 25 April of the year following the account closure period of the relevant year. These returns and the accounting records which form the basis of these returns can be examined and changes within 5 years by the Tax Office.

The current tax provision of the Company is calculated as follows:

Account Name	January 1- December 31, 2019	January 1- December 31, 2018
Trading profit/(loss) in legal records	**35,808,174**	45,243,435
Additions to base	**585,890**	631,574
Non allowable expenses	**585,890**	631,574
Discounts of base (-)	**(3,760,419)**	(2,337,880)
Affiliate earnings	**(3,759,794)**	(2,187,055)

Other discounts and Exceptions	–	(150,600)
Donations and aids	**(625)**	(225)
Financial profit/(loss) in legal records	**32,633,645**	43,537,129
Corporate tax base as article 32/a	**(10,323,401)**	(12,106,890)
Basis to general ratio of corporate tax base	**22,310,244**	31,430,239
Adavance tax after incentive	**(4,908,254)**	(6,914,653)
Corporate tax law 32/a sourced incentive	**(542,299)**	(735,854)
Provision for corporation income tax	**(5,450,553)**	(7,650,507)

Income Tax Withholding:

In addition to the corporate tax, it is also required to calculate income tax withholding on dividends other than those distributed to the full taxpayer corporations which gained dividend and declared these dividends as a part of the corporate income and branches of foreign companies in Turkey if distributed. Income tax withholding rate was increased from 15% pursuant to the Cabinet Decree No. 2009/14592 published at the Official Gazette dated January 12, 2009.

ii) Deferred Tax

Deferred tax is determined by calculating the temporary differences between the carrying amounts of assets and liabilities in the financial statements and the amounts considered in the statutory tax base, taking into account the tax rates of the tax effects according to the balance sheet method.

Deferred tax liabilities are recognized for all taxable temporary differences, whereas deferred tax assets resulting from deductible temporary differences are recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary difference can be utilized. Deferred tax liabilities or assets arising from the initial recognition of assets or liabilities other than goodwill or business combinations in respect of temporary timing differences that do not affect both the commercial and financial profit or loss are not recognized.

Deferred tax liabilities are calculated for all taxable temporary differences that are attributable to investments in subsidiaries and associates and joint ventures, except where the Company is able to control the reversal of temporary differences and the probability of such reversal in the near future is low. Deferred income tax assets resulting from taxable temporary differences associated with such investments and shares are calculated on the condition that it is highly probable that future taxable profit will be available against which the deductible income can be utilized and that it is probable that future taxable profit will be available against which the deductible temporary difference can be utilized.

The carrying amount of the deferred tax asset is reviewed at each balance sheet date. The recorded value of the deferred tax asset is reduced to the extent that it is unlikely that it will be possible to obtain a financial profit that would allow the gain of the benefit to be provided in part or in full.

Deferred tax assets and liabilities are calculated over the tax rates (tax regulations) that are enacted or substantively enacted at the balance sheet date that are expected to be valid for the period when the assets are realized or the liabilities are fulfilled. During the calculation of deferred tax assets and liabilities, the tax consequences of the Company's method of recovering its carrying amount or estimating its carrying value as of the balance sheet date are taken into account.

Due to the reason that the applicable tax rate was changed as 22% for 3 years as of 1 January 2018, the tax rate of 22% was used for the temporary differences expected to be realized/closed within 3 years (within the years of 2018, 2019 and 2020) in the deferred tax calculation as of 31 December 2017. However, as the applicable corporate tax rate is 20% for the period after 2020, the tax rate of 20% was used for the temporary differences expected to be realized/closed after 2020.

Deferred income tax assets and liabilities are recognized when there is a legally recognized right to offset current tax assets or liabilities in current tax assets or when the related assets and liabilities are related to the income tax collected by the same tax authority or when there is an intention to pay by offsetting the Company's current tax assets and liabilities is deducted.

	Accumulated Temporary Differences By Years		**Accumulated Deferred Tax Assets/(Liabilities) By Years**	
Account Name	**December 31, 2019**	December 31, 2018	**December 31, 2019**	December 31, 2018

c) Benefits and Salaries provided to senior management

The gross benefit provided by the senior management as of December 31,2019 is 2,916,982 TL (December 31,2018: 2,002,274 TL)

38. Nature and Level of Risks Attributable to Financial Instruments

Financial Risk Management Objectives and Policies

The main financial instruments used by the Company are bank loans, financial leases, cash and short term bank deposits. The main purpose of using these tools is to create financing for the Company's operations. The Company also has financial instruments, such as trade receivables and trade payables, which arise directly from operations.

The risks arising from the instruments used are foreign currency risk, interest risk, credit risk and liquidity risk. The Company management manages these risks as follows. The Company also monitors the market risk that may arise from the use of financial instruments.

Foreign Currency Risk

Foreign currency risk arises from the fact that the Company has liabilities in USD, EURO and GBP.

The Company also has foreign currency risk arising from the transactions it has made. These risks arise from the purchase and sale of goods and services in foreign currencies and the use of foreign currency denominated bank credits. The exposure of the Company to foreign currency risk arises from loans that it has used and from finance lease obligations. To minimize this risk, the company monitors its financial position, cash inflows and outflows with detailed cash flow statements.

The following tables show the Company's net foreign exchange position in balance sheet with changes in exchange rates.

Credit risk

The credit risk is the risk of incurring damages financially by one of the parties, which have mutual relationship, as a result of failing to perform the obligation, related with a financial instrument, by the other party. The company endeavors to manage the credit risk by limiting the transactions made with certain parties and continuously evaluating the credibility of the parties with which she has relationships. The total credit risk of the company is indicated in the financial situation statement.

Credit risk intensification is related with the certain companies having activities in the similar business areas and being in the same geographical region or the changes which may take place economically, politically or in the similar other conditions affecting the obligations of these companies arisen from the contract in the framework of similar economic conditions. The intensification of the credit risk indicates the sensitivity of the performance of the company to the developments affecting a certain sector or geographical region.

The company endeavors to manage the credit risk by avoiding unwanted intensification of her sales and service activities on persons or companies in the sector or region in the area of the new subject of activity. The company also gets warranty from the customers when she considers this as necessary.

Liquidity Risk

Liquidity risk is the risk that a Company can not meet its funding needs. Prudent liquidity risk management is to provide adequate cash and cash equivalents, to enable funding with the credit limits granted by reliable lenders and to close open positions. The Company provides funding by balancing cash inflows and outflows through the establishment of credit lines in the business environment.

The table below shows the maturity distribution of the Company's non-derivative financial liabilities.

December 31,2019

Other Payables	809,553	820,550	692,858	127,692	–
Total	99,546,269	99,546,269	99,418,577	127,692	–

Interest Risk

The Company is exposed to an interest rate risk arising from the impact of changes in the interest rates of the underlying assets and liabilities. The risk is managed by natural hedges that balance the assets and liabilities with interest rate sensitivity. The Company carries out studies to ensure that borrowing is done at the most favorable rates to minimize the interest rate risk.

The Company's interest position table as of December 31,2019 and December 31,2018 is as follows:

Fixed Interest Financial Instruments	December 31, 2019	December 31, 2018
Financial Assets	–	9,053,768
Financial Liabilities	5,220,877	28,347,592

Variable Interest Financial Instruments	December 31, 2019	December 31, 2018
Financial Assets	–	–
Financial Liabilities	–	–

Since the Company does not have any variable rate instruments as of December 31, 2019 and December 31, 2018, there is no interest rate risk.

Price Risk

Price risk is due to exchange rate, interest rate and market risk. The Group manages this risk by receiving foreign currency and balancing its liabilities and interest bearing assets and liabilities. Market risk is closely monitored by the Group's management through current market information and appropriate valuation methods.

Capital Management

In capital management, the Group aims to increase its profit by using the balance of debt and equity most efficiently while trying to maintain the continuity of its activities on the one hand. The Group's capital structure consists of debt, cash and cash equivalents and equity, and equity items including profit reserves.

Risks associated with each capital class together with the cost of capital of the Group are assessed by the Group's senior management. During these reviews, senior management evaluates the risks associated with each class of capital together with the cost of capital and submits to the Board of Directors the ones that are subject to the decision of the Board of Directors.

The Group's general strategy is not different from Previous Period.

Fair Value

Fair value is the amount at which an asset is traded between willing parties in a current transaction.

Financial assets and liabilities denominated in foreign currencies are translated at the foreign exchange rates that approximate the market prices at the balance sheet date.

The following methods and assumptions are used in estimating the fair value of each financial instrument when it is possible to determine the fair value.

Financial Assets

Due to their short-term nature and being subject to insignificant credit risk, it is considered that they are close to the fair values of cash and cash equivalents and the carrying values of accrued interest and other financial assets. Trade receivables are considered to approximate their fair values subsequent to the original provision for doubtful receivables.

Financial Liabilities

Due to their short-term nature, trade payables and other monetary liabilities are considered to approximate their carrying values. Bank loans are stated at discounted cost and transaction costs are added to the initial cost of the loans. It is considered that the fair values of the loans are expressed by the values they bear because the interest rates on them are updated considering the changing market conditions. Due to their short-term nature, it is foreseen that the fair value of trade payables is close to the value they bear.

39. Financial instruments (realistic value explanations and descriptions in the framework of the hedging accounting)

Fair Value of Financial Instruments

The fair value of the financial assets and liabilities is determined as follows:

- Level 1: Financial assets and liabilities are valued at quoted prices traded on the active market for the same assets and liabilities.
- Level 2: Financial assets and liabilities are valued at inputs that are used to determine the price of the asset or liability that is observable directly or indirectly in the market, other than the quoted price at the first level.
- Level 3: Financial assets and liabilities are valued at inputs that are not based on observable inputs in the market for the fair value of an asset or liability.

There are no level classifications of assets and liabilities that are designated with their fair values (December 31,2018: None).

Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than a compulsory sale or liquidation, and is best determined by a market price, if any.

The estimated fair values of financial instruments are determined using available market information and appropriate valuation methodologies. However, in the interpretation of market data in the fair value estimation, discretion is used. Consequently, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange.

40. Events after the date of the balance sheet

None.

41. The other issues which substantially affect the financial statements or are required to be described in terms of making the financial statements clear, interpretable and understandable

None.

Independent Auditors' Report

To the Members of
Mahindra & Mahindra Financial Services Limited

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the standalone financial statements of Mahindra & Mahindra Financial Services Limited ("the Company"), which comprise the standalone balance sheet as at 31 March 2020, and the standalone statement of profit and loss (including other comprehensive income), standalone statement of changes in equity and standalone statement of cash flows for the year then ended, and notes to the standalone financial statements, including a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the Standalone Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Standalone Financial Statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2020, and profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Standalone Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Standalone Financial Statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter

As described in Note 50.2 (i) to the standalone financial statements, in respect of accounts overdue but standard at 29 February 2020 where moratorium benefit has been granted, the staging of those accounts as on 31 March 2020 is based on the days past due status as on 29 February 2020 in accordance with the Reserve Bank of India COVID-19 Regulatory Package. Further, as described in Note 50.2 (ii) to the standalone financial statements, the extent to which the COVID-19 pandemic will impact the Company's financial performance is dependent on future developments, which are highly uncertain. Our opinion is not modified in respect of the above matters.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Standalone Financial Statements of the current year. These matters were addressed in the context of our audit of the Standalone Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Description of Key Audit Matter

<table>
<tr><td colspan="2">Impairment Loss Allowance
Refer notes 2.11 (h) and 50.2 to the Standalone Financial Statements</td></tr>
<tr><td>The key audit matter</td><td>How the matter was addressed in our audit</td></tr>
<tr><td>The Company has recognized impairment loss allowance of Rs. 308,948.66 lakhs as at 31 March 2020 and has recognized an expense for Rs. 121,710.59 lakhs in its statement of profit and loss.

The determination of impairment loss allowance is inherently judgmental and relies on managements' best estimate due to the following:
• Increased level of data inputs for capturing the historical data to calculate the Probability of Default ('PDs') and Loss Given Default ("LGD") and the completeness and accuracy of that data
• Use of management overlays for considering the probability weighted scenarios, the forward looking macro-economic factors, economic environment and the timing of cash flows</td><td>We performed the following key audit procedures:
• Performed process walkthroughs to identify the key systems, applications and controls used in the impairment allowance processes.
• Assessed the design and implementation of controls in respect of the Company's impairment allowance process such as the timely recognition of impairment loss, the completeness and accuracy of reports used in the impairment allowance process and management review processes over the calculation of impairment allowance and the related disclosures on credit risk management.
• Obtained understanding of management's revised processes, systems and controls implemented in relation to impairment allowance process, particularly in view of staging freeze as on 29 February 2020 as per board approved policy read with RBI COVID-19 regulatory package</td></tr>
</table>

Impairment Loss Allowance **Refer notes 2.11 (h) and 50.2 to the Standalone Financial Statements**	
The key audit matter	**How the matter was addressed in our audit**
• Criteria selected to identify significant increase in credit risk, particularly in respect of moratorium benefit given to eligible borrowers, as per the Company's board approved policy, read with the RBI COVID 19 regulatory package. • In relation to COVID-19 pandemic, judgements and assumptions include the extent and duration of the pandemic, the impacts of actions of governments and other authorities, and the responses of businesses and consumers in different industries, along with the associated impact on the global economy The underlying forecasts and assumptions used in the estimates of impairment loss allowance are subject to uncertainties which are often outside the control of the Company. The extent to which the COVID-19 pandemic will impact the Company's current estimate of impairment loss allowances is dependent on future developments, which are highly uncertain at this point. Given the size of loan portfolio relative to the balance sheet and the impact of impairment allowance on the financial statements, we have considered this as a key audit matter.	• Tested the relevant general IT and applications controls over key systems used in the impairment allowance processes. • Evaluated whether the methodology applied by the Company is compliant with the requirements of the relevant accounting standards and confirmed that the calculations are performed in accordance with the approved methodology, including checking mathematical accuracy of the workings. • Tested the periods considered for capturing underlying data as base to PD and LGD calculations are in line with Company's recent experience of past observed periods. • Tested the accuracy of the key inputs used in the calculation and independently evaluated the reasonableness of the assumptions made. • Challenged completeness and validity of management overlays, particularly in response to COVID 19 with assistance of our financial risk modelling experts by critically evaluating the risks that have been addressed by management through overlays and also considering whether there are other risks not captured which require additional overlays. We also tested management's workings supporting the overlay quantum. • Assessed whether the disclosures on key judgements, assumptions and quantitative data with respect to impairment loss allowance in the financial statements are appropriate and sufficient.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the Standalone Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Standalone Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Standalone Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Standalone Financial Statements that give a true and fair view of the state of affairs, profit and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Financial Statements, management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Standalone Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to Standalone Financial Statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Standalone Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone Financial Statements, including the disclosures, and whether the Standalone Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Standalone Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

(A) As required by Section 143(3) of the Act, we report that:

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

c) The standalone balance sheet, the standalone statement of profit and loss (including other comprehensive income), the standalone statement of changes in equity and the standalone statement of cash flows dealt with by this Report are in agreement with the books of account;

d) In our opinion, the aforesaid Standalone Financial Statements comply with the Ind AS specified under section 133 of the Act;

e) On the basis of the written representations received from the directors as on 31 March 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2020 from being appointed as a director in terms of Section 164(2) of the Act.

f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

(B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations as at 31 March 2020 on its financial position in its Standalone Financial Statements - Refer Note 44 to the Standalone Financial Statements;

ii. The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts- Refer Note 48 to the Standalone Financial Statements;

iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

(C) With respect to the matter to be included in the Auditors' Report under section 197(16):

In our opinion and according to the information and explanations given to us, the remuneration paid by the Company to its directors during the current year is in accordance with the provisions of Section 197 of the Act. The remuneration paid to any director is not in excess of the limit laid down under Section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

ANNEXURE A TO THE INDEPENDENT AUDITOR'S REPORT 31 MARCH 2020

The Annexure referred to in Independent Auditor's Report to the members of the Company on the financial statements for the year ended 31 March 2020, we report that:

i. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) The fixed assets are physically verified by the management according to a programme of phased verification, which in our opinion is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the programme, the fixed assets have been physically verified by management during the year and no material discrepancies were noticed on such verification.

(c) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.

ii. The Company is in the business of providing Non-Banking Finance Services and consequently, does not hold any inventory. Accordingly, paragraph 3(ii) of the Order is not applicable to the Company.

iii. According to the information and explanations given to us and based on the audit procedures conducted by us, the Company has not granted any loans, secured or unsecured to companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Act. Accordingly, paragraph 3(iii) of the Order is not applicable to the Company.

viii. According to the information and explanations given to us and based on our examination of the records, the Company has not defaulted in the repayment of outstanding dues to financial institution, bank, or debenture holder during the year. The Company did not have any borrowings from the government during the year.

ix. According to the information and explanations given to us and based on our examination of the records, the Company has utilised the money raised during the year, by way of terms loans for the purpose for which they were raised. During the year, the Company has not raised moneys by way of initial public offer or further public offer.

x. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, except for 80 cases aggregating Rs. 172.89 lakhs which largely pertains to misappropriation of cash, we have neither come across any instance of fraud by the Company or any material instance of fraud on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of such case by management.

xi. According to the information and explanations give to us and based on our examination of the records of the Company, the Company has paid/provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Act.

xii. In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable to the Company.

xiii. According to the information and explanations given to us and on the basis of our examination of the records of the Company, transactions with the related parties are in compliance with section 177 and 188 of the Act where applicable and the details of such transactions have been disclosed in the financial statements, as required by the applicable accounting standards.

xiv. According to the information and explanations given to us and based on our examination of the records, the Company has not made preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and accordingly, paragraph 3(xiv) of the Order is not applicable to the Company.

xv. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3(xv) of the Order is not applicable to the Company.

xvi. According to the information and explanations given to us, the Company has registered as required, under Section 45-IA of the Reserve Bank of India Act, 1934.

ANNEXURE B TO THE INDEPENDENT AUDITORS' REPORT ON THE STANDALONE FINANCIAL STATEMENTS OF MAHINDRA & MAHINDRA FINANCIAL SERVICES LIMITED FOR THE YEAR ENDED 31 MARCH 2020

Report on the internal financial controls with reference to the aforesaid standalone financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

Referred to in paragraph A(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date

Opinion

We have audited the internal financial controls with reference to financial statements of Mahindra & Mahindra Financial Services Limited ("the Company") as of 31 March 2020 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2020, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

1 COMPANY INFORMATION

Mahindra & Mahindra Financial Services Limited ('the Company'), incorporated in India, is a public limited company, headquartered in Mumbai. The Company is a Non-Banking Financial Company ('NBFC') engaged in providing asset finance through its pan India branch network. The Company is registered as a Systemically Important Deposit Accepting NBFC as defined under Section 45-IA of the Reserve Bank of India ('RBI') Act, 1934 with effect from 4 September 1998. The equity shares of the Company are listed on the National Stock Exchange ("NSE") and the Bombay Stock Exchange ("BSE") in India. The Company is a subsidiary of Mahindra & Mahindra Limited.

The Company's registered office is at Gateway Building, Apollo Bunder, Mumbai 400001, India.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Statement of compliance and basis for preparation and presentation of financial statements

These standalone or separate financial statements of the Company have been prepared in accordance with the Indian Accounting Standards ("Ind AS") as per the Companies (Indian Accounting Standards) Rules 2015 as amended and notified under section 133 of the Companies Act, 2013 ("the Act"), and in conformity with the accounting principles generally accepted in India and other relevant provisions of the Act. Further, the Company has complied with all the directions related to Implementation of Indian Accounting Standards prescribed for Non-Banking Financial Companies (NBFCs) in accordance with the RBI notification no. RBI/2019-20/170 DOR NBFC).CC.PD.No.109/22.10.106/2019-20 dated 13 March 2020.

Any application guidance/clarifications/directions issued by RBI or other regulators are implemented as and when they are issued/ applicable.

These standalone or separate financial statements have been approved by the Company's Board of Directors and authorized for issue on 15 May 2020.

2.2 Functional and presentation currency

These financial statements are presented in Indian Rupees ('INR' or 'Rs.') which is also the Company's functional currency. All amounts are rounded-off to the nearest lakhs, unless otherwise indicated.

2.3 Basis of measurement

The financial statements have been prepared on a historical cost convention and on an accrual basis, except for certain financial instruments which are measured at fair values as required by relevant Ind AS.

2.4 Measurement of fair values

A number of Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has established policies and procedures with respect to the measurement of fair values. Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2.5 Use of estimates and judgements and Estimation uncertainity

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income, expenses and the disclosures of contingent assets and liabilities. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognized prospectively.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were issued. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Following are areas that involved a higher degree of estimate and judgement or complexity in determining the carrying amount of some assets and liabilities.

Effective Interest Rate (EIR) Method

The Company recognizes interest income/expense using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loans given/taken. This estimation, by nature, requires an element of judgement regarding the expected behaviour and life-cycle of the instruments, as well as expected changes to other fee income/expense that are integral parts of the instrument.

Impairment of Financial Assets

The measurement of impairment losses on loan assets and commitments, requires judgement, in estimating the amount and timing of future cash flows and recoverability of collateral values while determining the impairment losses and assessing a significant increase in credit risk.

The Company's Expected Credit Loss (ECL) calculation is the output of a complex model with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL model that are considered accounting judgements and estimates include:

- The Company's criteria for assessing if there has been a significant increase in credit risk
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL model, including the various formulae and the choice of inputs
- Selection of forward-looking macroeconomic scenarios and their probability weights, to derive the economic inputs into the ECL model
- Management overlay used in circumstances where management judges that the existing inputs, assumptions and model techniques do not capture all the risk factors relevant to the Company's lending portfolios.

It has been the Company's policy to regularly review its model in the context of actual loss experience and adjust when necessary (refer note 50).

Provisions and other contingent liabilities

The reliable measure of the estimates and judgments pertaining to litigations and the regulatory proceedings in the ordinary course of the Company's business are disclosed as contingent liabilities.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

Provision for income tax and deferred tax assets:

The Company uses estimates and judgements based on the relevant rulings in the areas of allocation of revenue, costs, allowances and disallowances which is exercised while determining the provision for income tax, including the amount expected to be paid/recoverd for uncertain tax positions. A deferred tax asset is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilized. Accordingly, the Company exercises its judgement to reassess the carrying amount of deferred tax assets at the end of each reporting period.

Defined Benefit Plans:

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

Estimation uncertainty relating to the global health pandemic from COVID-19:

The ongoing COVID-19 pandemic has increased the estimation uncertainty in the preparation of these Financial Statements.

The estimation uncertainty is associated with:

- the extent and duration of the disruption to business arising from the actions by governments, businesses and consumers to contain the spread of the virus;
- the extent and duration of the expected economic downturn (and forecasts for key economic factors including GDP, employment and house prices). This includes the disruption to capital markets, deteriorating credit, liquidity concerns, increasing unemployment, declines in consumer discretionary spending, reductions in production because of decreased demand, and other restructuring activities; and
- the effectiveness of government and central bank measures that have and will be put in place to support businesses and consumers through this disruption and economic downturn.

The Company has developed various accounting estimates in these Financial Statements based on forecasts of economic conditions which reflect expectations and assumptions as at 31 March 2020 about future events that the Management believe are reasonable in the circumstances. There is a considerable degree of judgement involved in preparing forecasts. The underlying assumptions are also subject to uncertainties which are often outside the control of the Company. Accordingly, actual economic conditions are likely to be different from those forecast since anticipated events frequently do not occur as expected, and the effect of those differences may significantly impact accounting estimates included in these financial statements.

The significant accounting estimates impacted by these forecasts and associated uncertainties are predominantly related to expected credit losses, fair value measurement, and recoverable amount assessments of non-financial assets.

The impact of the COVID-19 pandemic on each of these accounting estimates is discussed further in the relevant note to these Financial Statements. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions (refer note 50).

2.6 Revenue recognition:

a) Recognition of interest income on loans

Interest income is recognized in Statement of profit and loss using the effective interest method for all financial instruments measured at amortized cost, debt instruments measured at FVOCI and debt instruments designated at FVTPL. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument.

The calculation of the effective interest rate includes transaction costs and fees that are an integral part of the contract. Transaction costs include incremental costs that are directly attributable to the acquisition of financial asset.

If expectations regarding the cash flows on the financial asset are revised for reasons other than credit risk, the adjustment is recorded as a positive or negative adjustment to the carrying amount of the asset in the balance sheet with an increase or reduction in interest income. The adjustment is subsequently amortized through Interest income in the Statement of profit and loss.

The Company calculates interest income by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets.

When a financial asset becomes credit-impaired, the Company calculates interest income by applying the effective interest rate to the net amortized cost of the financial asset. If the financial asset cures and is no longer credit-impaired, the Company reverts to calculating interest income on a gross basis.

Additional interest and interest on trade advances, are recognized when they become measurable and when it is not unreasonable to expect their ultimate collection.

Income from bill discounting is recognized over the tenure of the instrument so as to provide a constant periodic rate of return.

b) Subvention income

Subvention income received from manufacturer/dealers at the inception of the loan contracts which is directly attributable to individual loan contracts in respect of vehicles financed is recognized in the Statement of profit and loss using the effective interest method over the tenor of such loan contracts measured at amortized cost. In case of subvention income which is subject to confirmation from manufacturer and received later than inception date is recognized in the Statement of profit and loss using straight line method over the tenor of such loan contracts.

c) Rental Income

Income from operating leases is recognized in the Statement of profit and loss on a straight-line basis over the lease term. In certain lease arrangements, variable rental charges are also recognized over and above minimum commitment charges based on usage pattern and make/model of the asset.

d) Fee and commission income:

Fee based income are recognized when they become measurable and when it is probable to expect their ultimate collection.

Commission and brokerage income earned for the services rendered are recognized as and when they are due.

e) Dividend and interest income on investments:

- Dividends are recognized in Statement of profit and loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.
- Interest income from investments is recognized when it is certain that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable.

2.7 Property, Plant and Equipments (PPE)

PPE are stated at cost of acquisition (including incidental expenses), less accumulated depreciation and accumulated impairment loss, if any.

Assets held for sale or disposals are stated at the lower of their net book value and net realizable value.

Advances paid towards the acquisition of PPE outstanding at each balance sheet date are disclosed separately under other non-financial assets. Capital work in progress comprises the cost of PPE that are not ready for its intended use at the reporting date.

Depreciation on PPE is provided on straight-line basis in accordance with the useful lives specified in Schedule II to the Companies Act, 2013 on a pro-rata basis.

In accordance with Ind AS 116 - Leases, applicable effective from 1 April 2019, the Right-Of-Use assets (Freehold premises) are initially recognized at cost which comprises of initial amount of lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. These are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-Of-Use assets (Freehold premises) are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

The estimated useful lives used for computation of depreciation are as follows:

Buildings	60 years
Computers and Data processing units	3 to 6 years
Furniture and fixtures	10 years
Office equipments	5 years
Vehicles	8 years and 10 years
Vehicles under lease	8 years
Right-Of-Use assets (Leasehold premises)	2 to 10 years

Assets costing less than Rs.5000/- are fully depreciated in the period of purchase.

PPE is derecognized on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the net carrying amount of the asset) is recognized in other income/netted off from any loss on disposal in the Statement of profit and loss in the year the asset is derecognized.

2.8 Intangible assets:

Intangible assets are stated at cost less accumulated amortization and accumulated impairment loss, if any.

Intangible assets comprises of computer software which is amortized over the estimated useful life. The amortization period is lower of license period or 36 months which is based on management's estimates of useful life. Amortization is calculated using the straight line method to write down the cost of intangible assets over their estimated useful lives.

2.9 Investments in subsidiaries and associates:

Investments in subsidiaries and associate are measured at cost less accumulated impairment, if any.

2.10 Foreign exchange transactions and translations:

a) Initial recognition

Transactions in foreign currencies are recognized at the prevailing exchange rates between the reporting currency and a foreign currency on the transaction date.

b) Conversion

Transactions in foreign currencies are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in Statement of profit and loss.

Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the statement of profit and loss, within finance costs. All other foreign exchange gains and losses are presented in the Statement of profit and loss on a net basis.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. Thus, translation differences on non-monetary assets and liabilities such as equity instruments held at fair value through profit or loss are recognized in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equity investments classified as FVOCI are recognized in other comprehensive income.

Non-monetary items that are measured at historical cost in foreign currency are not retranslated at reporting date.

2.11 Financial instruments:

a) Recognition and initial measurement -

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at FVTPL) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognized immediately in Statement of profit and loss.

b) Classification and Subsequent measurement of financial assets

On initial recognition, a financial asset is classified as measured at

- Amortized cost;
- FVOCI - debt instruments;
- FVOCI - equity instruments;
- FVTPL

Amortized cost -

The Company's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios being the level at which they are managed. The financial asset is held with the objective to hold financial asset in order to collect contractual cash flows as per the contractual terms that give rise on specified dates to cash flows that are solely payment of principal and interest (SPPI) on the principal amount outstanding. Accordingly, the Company measures Bank balances, Loans, Trade receivables and other financial instruments at amortized cost.

FVOCI - debt instruments -

The Company measures its debt instruments at FVOCI when the instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets; and the contractual terms of the financial asset meet the SPPI test.

FVOCI - equity instruments -

The Company subsequently measures all equity investments at fair value through profit or loss, unless the Company's management has elected to classify irrevocably some of its equity instruments at FVOCI, when such instruments meet the definition of Equity under Ind AS 32 Financial Instruments and are not held for trading.

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortized cost or FVOCI are measured at FVTPL. This includes all derivative financial assets.

Subsequent measurement of financial assets

Financial assets at amortized cost are subsequently measured at amortized cost using effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in Statement of profit and loss. Any gain and loss on derecognition is recognized in Statement of profit and loss.

Debt investment at FVOCI are subsequently measured at fair value. Interest income under effective interest method, foreign exchange gains and losses and impairment are recognized in Statement of profit and loss. Other net gains and losses are recognized in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to Statement of profit and loss.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognized in other comprehensive income and accumulated in the reserves. The cumulative gain or loss is not reclassified to Statement of profit and loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for strategic purpose. Dividend income received on such equity investments are recognized in Statement of profit and loss.

Equity investments that are not designated as measured at FVOCI are designated as measured at FVTPL and subsequent changes in fair value are recognized in Statement of profit and loss.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in Statement of profit and loss.

c) Financial liabilities and equity instruments:

Classification as debt or equity -

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments -

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by Company are recognized at the proceeds received. Transaction costs of an equity transaction are recognized as a deduction from equity.

Financial liabilities -

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is a derivative or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in Statement of profit and loss. Any gain or loss on derecognition is also recognized in Statement of profit and loss.

d) Financial guarantee contracts:

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by a Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109 - Financial Instruments; and
- the amount initially recognized less, when appropriate, the cumulative amount of income recognized in accordance with the principles of Ind AS 115 - Revenue from Contracts with Customers.

e) Derecognition

Financial assets

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognized on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognized.

Financial liabilities

A financial liability is derecognized when the obligation in respect of the liability is discharged, cancelled or expires. The difference between the carrying value of the financial liability and the consideration paid is recognized in Statement of profit and loss.

f) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

g) Derivative financial instruments

The Company enters into derivative financial instruments, primarily foreign exchange forward contracts, currency swaps and interest rate swaps, to manage its borrowing exposure to foreign exchange and interest rate risks.

Derivatives embedded in non-derivative host contracts are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

Derivatives are initially recognized at fair value at the date the contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain/loss is recognized in Statement of profit and loss.

h) Impairment of financial instruments

Equity instruments are not subject to impairment under Ind AS 109.

The Company recognizes lifetime expected credit losses (ECL) when there has been a significant increase in credit risk since initial recognition and when the financial instrument is credit impaired. If the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12 month ECL. The assessment of whether lifetime ECL should be recognized is based on significant increases in the likelihood or risk of a default occurring since initial recognition. 12 month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

When determining whether credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, including on historical experience and forward-looking information. (refer note 50).

Management overlay is used to adjust the ECL allowance in circumstances where management judges that the existing inputs, assumptions and model techniques do not capture all the risk factors relevant to the Company's lending portfolios. Emerging local or global macroeconomic, micro economic or political events, and natural disasters that are not incorporated into the current parameters, risk ratings, or forward looking information are examples of such circumstances. The use of management overlay may impact the amount of ECL recognized.

The Company recognizes lifetime ECL for trade, lease and other receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate. Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument.

Loss allowances for financial assets measured at amortized cost are deducted from the gross carrying amount of the assets. For debt securities at FVOCI, the loss allowance is recognized in OCI and carrying amount of the financial asset is not reduced in the balance sheet.

i) Collateral repossessed -

Based on operational requirements, the Company's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category for capitalization at their fair market value.

In the normal course of business, the Company does not physically repossess assets/properties in its loan portfolio, but engages external agents to repossess and recover funds, generally by selling at auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the assets/properties under legal repossession processes are not separately recorded on the balance sheet.

j) Write offs -

The gross carrying amount of a financial asset is written off when there is no realistic prospect of further recovery. This is generally the case when the Company determines that the debtor/borrower does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write- off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made from written off assets are netted off against the amount of financial assets written off during the year under "Bad debts and write offs" forming part of "Impairment on financial instruments" in Statement of profit and loss.

2.12 Employee benefits:

a) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognized for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

b) Contribution to provident fund, ESIC and National Pension Scheme -

Company's contribution paid/payable during the year to provident fund, ESIC and National Pension Scheme is recognized in the Statement of profit and loss.

c) Gratuity -

The Company's liability towards gratuity scheme is determined by independent actuaries, using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. Past services are recognized at the earlier of the plan amendment/curtailment and recognition of related restructuring costs/termination benefits.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the Statement of profit and loss.

Remeasurement gains/losses -

Remeasurement of defined benefit plans, comprising of actuarial gains/losses, return on plan assets excluding interest income are recognized immediately in the balance sheet with corresponding debit or credit to Other Comprehensive Income (OCI). Remeasurements are not reclassified to Statement of profit and loss in the subsequent period.

Remeasurement gains or losses on long-term compensated absences that are classified as other long-term benefits are recognized in Statement of profit and loss.

d) Superannuation fund -

The Company makes contribution to the Superannuation scheme, a defined contribution scheme, administered by Life Insurance Corporation of India, which are charged to the Statement of profit and loss. The Company has no obligation to the scheme beyond its contributions.

e) Leave encashment/compensated absences/sick leave -

The Company provides for the encashment/availment of leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits for future encashment/availment. The liability is provided based on the number of days of unutilized leave at each balance sheet date on the basis of an independent actuarial valuation.

f) Employee stock options:

Equity-settled share-based payments to employees are recognized as an expense at the fair value of equity stock options at the grant date. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the graded vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity.

2.13 Finance costs:

Finance costs include interest expense computed by applying the effective interest rate on respective financial instruments measured at Amortized cost. Financial instruments include bank term loans, non-convertible debentures, fixed deposits mobilized, commercial papers, subordinated debts and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost. Finance costs are charged to the Statement of profit and loss.

Effective from 1 April 2019, on application of Ind AS 116 (Leases), interest expense on lease liabilities computed by applying the Company's weighted average incremental borrowing rate has been included under finance costs.

2.14 Taxation - Current and deferred tax:

Income tax expense comprises of current tax and deferred tax. It is recognized in Statement of profit and loss except to the extent that it relates to an item recognized directly in equity or in other comprehensive income.

a) Current tax:

Current tax comprises amount of tax payable in respect of the taxable income or loss for the year determined in accordance with Income Tax Act, 1961 and any adjustment to the tax payable or receivable in respect of previous years. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period. Significant judgments are involved in determining the provision for income taxes including judgment on whether tax positions are probable of being sustained in tax assessments. A tax assessment can involve complex issues, which can only be resolved over extended time periods.

b) Deferred tax:

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequence that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary difference could be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

2.15 Securities issue expenses:

Expenses incurred in connection with fresh issue of Share capital are adjusted against Securities premium reserve.

2.16 Impairment of assets other than financial assets:

The Company reviews the carrying amounts of its tangible (including assets given on operating lease) and intangible assets at the end of each reporting period, to determine whether there is any indication that those assets have impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Recoverable amount is determined for an individual asset, unless the asset does not generate cash flows that are largely independent of those from other assets or group of assets.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount such that the increased carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognized for the asset (or cash-generating unit) in prior years. The reversal of an impairment loss is recognized in Statement of profit and loss.

2.17 Provisions:

Provisions are recognized when there is a present obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

2.18 Leases:

The Company as a lessee -

As a lessee, the Company's lease asset class primarily consist of buildings or part thereof taken on lease for office premises and certain IT equipments used for operating activities. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The right-of-use assets are initially recognized at cost which comprises of initial amount of lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. These are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

The lease liability is initially measured at amortized cost at the present value of the future lease payments that are not paid at the commencement date, discounted using the Company's incremental average borrowing rate. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

ROU assets and Lease liabilities have been separately presented in the Balance Sheet and the principal portion of lease payments have been classified as financing cash flows.

Where the Company is the lessor -

At the inception of the lease, the Company classifies each of its leases as either a finance lease or an operating lease. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

The Company has given certain vehicles on lease where it has substantially retained the risks and rewards of ownership and hence these are classified as operating leases. These assets given on operating lease are included in PPE. Lease income is recognized in the Statement of profit and loss as per contractual rental unless another systematic basis is more representative of the time pattern in which the benefit derived from the leased asset is diminished. Costs including depreciation are recognized as an expense in the Statement of profit and loss. Initial direct costs are recognized immediately in Statement of profit and loss.

Transition to Ind AS 116

Ministry of Corporate Affairs ("MCA") through Companies (Indian Accounting Standards) Amendment Rules, 2019 and Companies (Indian Accounting Standards) Second Amendment Rules, has notified Ind AS 116, Leases, which replaces the existing lease standard, Ind AS 17 leases, and other interpretations. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. It introduces a single, on-balance sheet lease accounting model for lessees.

The Company has adopted Ind AS 116, Leases, effective 1 April 2019 using modified retrospective approach of transition without restating the figures for prior periods. Consequently, the Company recorded the lease liability at the present value of the lease payments discounted at the incremental borrowing rate and the right of use asset at its carrying amount as if the standard had been applied since the commencement date of the lease, but discounted at the Company's incremental borrowing rate at the date of initial application. Comparatives as at and for the year ended March 31,2019 have not been retrospectively adjusted and therefore will continue to be reported under the accounting policies included as part of our Annual Report for year ended March 31, 2019.

On application of Ind AS 116, financial information is presented in the following manner for the year ended 31 March 2020.

a) ROU assets and lease liabilities have been included within the line items "Property, plant and equipment" and "Other financial liabilities" respectively in the Balance sheet;

b) Interest expenses on the lease liability and depreciation charge for the right-to-use asset have been included within the line items "Finance costs" and "Depreciation, amortization and impairment" respectively in the statement of profit or loss;

c) Short-term lease payments and payments for leases of low-value assets, where exemption as permitted under this standard is availed, have been recognized as expense on a straight line basis over the lease term in the statement of profit or loss.

d) Cash payments for the principal of the lease liability have been presented within "financing activities" in the statement of cash flows;

Further, on application of Ind AS 116, the nature of expense in the Statement of profit or loss has changed from lease rent in previous periods to depreciation cost for the ROU asset and finance cost for interest on lease liability in the current financial year.

The effect of transition to Ind AS 116 and other disclosures are set out under note no. 41.

2.19 Cash and cash equivalents:

Cash and cash equivalents in the balance sheet comprise cash on hand, cheques and drafts on hand, balance with banks in current accounts and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of change in value.

2.20 Earnings Per Share:

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, sub-division of shares etc. that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders is divided by the weighted average number of equity shares outstanding during the period, considered for deriving basic earnings per share and weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

2.21 Standards issued but not yet effective:

Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards. There is no such notification which would have been applicable from 1 April, 2020.

Adjustment related to tax of prior years	**–**	274.39
Others	**402.55**	(458.04)
Reported income tax expense	**43,735.85**	82,537.84

The Taxation Laws (Amendment) Ordinance, 2019 contain substantial amendments in the Income Tax Act 1961 and the Finance (No.2) Act, 2019 which provides for an option to domestic companies to pay income tax at a concessional rate. The Company has elected to apply the concessional tax rate. Accordingly, the Company has recognized the provision for income tax and re-measured the net deferred tax assets at concessional rate for the year ended 31 March 2020. Further, the opening net deferred tax asset has been re-measured at lower rate with a one-time impact of Rs.10,399.45 lakhs recognized as transition adjustment in the Statement of profit and loss for the year ended 31 March 2020.

d) Terms/rights attached to equity shares:

The Company has only one class of equity shares having a par value of Rs. 2/- per share. Each holder of equity shares is entitled to one vote per share. The dividend proposed by the board of directors and approved by the shareholders in the annual general meeting is paid in Indian rupees. In the event of liquidation of the Company, the holders of equity shares will be entitled to receive remaining assets of the Company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

Other Equity

Description of the nature and purpose of Other Equity:

Statutory reserve

Statutory reserve represents reserve fund created pursuant to Section 45-IC of the RBI Act, 1934 through transfer of specified percentage of net profit every year before any dividend is declared. The reserve fund can be utilized only for limited purposes as specified by RBI from time to time and every such utilization shall be reported to the RBI within specified period of time from the date of such utilization.

Capital redemption reserve (CRR)

Capital redemption reserve represents reserve created pursuant to Section 55 (2) (c) of the Companies Act, 2013 by transfer of an amount equivalent to nominal value of the Preference shares redeemed. The CRR may be utilized by the Company, in paying up unissued shares of the Company to be issued to the members of the Company as fully paid bonus shares in accordance with the provisions of the Companies Act, 2013.

Securities premium reserve

Securities premium reserve is used to record the premium on issue of shares. The reserve can be utilized only for limited purposes such as issuance of bonus shares in accordance with the provisions of the Companies Act, 2013.

General reserve

General reserve is created through annual transfer of profits at a specified percentage in accordance with applicable regulations under the erstwhile Companies Act, 1956. The purpose of these transfers was to ensure that if a dividend distribution in a given year is more than 10% of the paid up capital of the Company for that year, then the total dividend distribution is less than the total distributable profits for that year. Consequent to introduction of the Companies Act, 2013, the requirement to mandatorily transfer specified percentage of net profits to General reserve has been withdrawn. However, the amount previously transferred to the General reserve can be utilized only in accordance with the specific requirements of the Companies Act, 2013.

Debenture Redemption Reserve (DRR)

Until issuance of notification dated 16 August 2019 by MCA through the Companies (Share capital and Debentures) Amendment Rules, 2019, the Companies Act, 2013 required companies that issue debentures to create a debenture redemption reserve from annual profits until such debentures are redeemed. The Company was required to transfer a specified percentage (as provided in the Companies Act, 2013) of the outstanding redeemable debentures to debenture redemption reserve. The amounts credited to the debenture redemption reserve may be utilized only to redeem debentures. On completion of redemption, the reserve may be transferred to Retained Earnings.

Pursuant to issuance of notification dated 16 August 2019 by MCA through the Companies (Share capital and Debentures) Amendment Rules, 2019, the DRR is no longer required for certain class of companies, including listed NBFCs registered with RBI under section 45-IA of the RBI Act, 1934, in the case of public issue of debentures and privately placed debentures. Accordingly, the Company has not created any amount of DRR for the current financial year and transferred the carrying amount of DRR created in the earlier years to Retained earnings as it is no longer required.

Employee stock options outstanding

The Employee Stock Options outstanding represents amount of reserve created by recognition of compensation cost at grant date fair value on stock options vested but not exercised by employees and unvested stock options in the Statement of profit and loss in respect of equity-settled share options granted to the eligible employees of the Company and its subsidiaries in pursuance of the Employee Stock Option Plan.

Retained earnings

Retained earnings or accumulated surplus represents total of all profits retained since Company's inception. Retained earnings are credited with current year profits, reduced by losses, if any, dividend payouts, transfers to General reserve or any such other appropriations to specific reserves.

Details of dividends proposed

Rs. in lakhs

	31 March 2020	31 March 2019
Face value per share (Rupees)	**2.00**	2.00

Total	**71,047.51**	66,677.73

The Company has adopted Ind AS 116, Leases, effective 1 April 2019 using modified retrospective approach of transition without restating the figures for prior periods. On application of Ind AS 116, the nature of expense has changed from lease rent in previous periods to depreciation cost for the ROU asset and finance cost for interest accrued on lease liability. Ind AS 116 also provides for certain options and exemptions to recognize short-term lease payments and payments for leases of low-value assets, which are not included in the measurement of the lease liability and ROU asset, as expense on a straight line basis over the lease term in the statement of profit or loss.

Accordingly, rent expenses for the year ended 31 March 2020 comprises of short-term lease payments and payments for leases of low-value assets recognized as per Ind AS 116, Leases.

35 Employee Stock Option Plan

The Company had allotted 48,45,025 Equity shares (face value of Rs.2/- each) under Employee Stock Option Scheme 2010 at par on 3 February 2011 to Mahindra and Mahindra Financial Services Limited Employees' Stock Option Trust set up by the Company. The Trust holds these shares for the benefit of the employees and issues them to the eligible employees as per the recommendation of the Compensation Committee. Upon exercise of stock options under the scheme by eligible employees, the Trust had issued 32,13,044 equity shares to employees up to 31 March 2020 (31 March 2019: 27,42,055 equity shares), of which 4,70,989 equity shares (31 March 2019: 3,99,748 equity shares) were issued during the current year.

a) The terms and conditions of the Employees stock option scheme 2010 are as under:

Particulars	Terms and conditions
Type of arrangement	Employees share based payment plan administered through ESOS Trust
Contractual life	3 years from the date of each vesting
Number of vested options exercisable	Minimum of 50 or number of options vested whichever is lower
Method of settlement	By issue of shares at exercise price
Vesting conditions	20% on expiry of 12 months from the date of grant
	20% on expiry of 24 months from the date of grant
	20% on expiry of 36 months from the date of grant
	20% on expiry of 48 months from the date of grant
	20% on expiry of 60 months from the date of grant

b) Options granted during the year:

During the year ended 31 March 2020, the Company has not granted any stock options (31 March 2019: 21,94.249) to the eligible employees under the Employees' Stock option scheme 2010. The details of stock options are as under:

	Year ended 31 March 2020	Year ended 31 March 2019
Particulars	**N/A**	Grant dated 24 October 2018
Exercise price (Rs.)	–	2.00
No. of years vesting	–	5
Fair value of option (Rs.)	–	355.34

The key assumptions used in black-scholes model for calculating fair value as on the date of grant are:

Variables#	**Year ended 31 March 2020**	Year ended 31 March 2019
	N/A	Grant dated 24 October 2018
1) Risk free interest rate	–	7.77%
2) Expected life	–	4.51 years
3) Expected volatility	–	37.61%
4) Dividend yield	–	1.07%
5) Price of the underlying share in the market at the time of option grant (Rs.)	–	374.35

the values mentioned against each of the variables are based on the weighted average percentage of vesting.

c) Summary of stock options

Particulars	**As at 31 March 2020**		As at 31 March 2019	
	No. of stock options	**Weighted average exercise price (Rs.)**	No. of stock options	Weighted average exercise price (Rs.)
Options outstanding at the beginning of the year	**28,66,916**	**2.00**	10,83,987	2.00
Options granted during the year	**–**	**2.00**	21,94,249	2.00
Options forfeited / lapsed during the year	**42,882**	**2.00**	9,684	2.00

Options exercised during the year	**470,989**	**2.00**	399,748	2.00
Options outstanding at the end of the year	**23,50,342**	**2.00**	28,66,916	2.00
Options vested but not exercised at the end of the year	**502,244**	**2.00**	176,151	2.00

d) Information in respect of options outstanding:

	As at 31 March 2020		As at 31 March 2019	
Exercise price	**No. of stock options**	**Weighted average remaining life**	No. of stock options	Weighted average remaining life
Rs. 2.00	**23,50,342**	**54 months**	28,66,916	62 months

e) Average Share price at recognised stock exchange on the date of exercise of the option are as under:

Year ended 31 March 2020		Year ended 31 March 2019	
Date of Exercise	**Average share price (Rs.)**	Date of Exercise	Weighted Average share price (Rs.)
27 April 2019 to 22 March 2020	**335.73**	27 April 2018 to 22 March 2019	441.05

f) Determination of expected volatility

The measure of volatility used in the Black-Scholes option pricing model is the annualized standard deviation of the continuously compounded rates of return on the stock over a period of time.

The determination of expected volatility is based on historical volatility of the stock over the most recent period that is generally commensurate with the expected life of the option being valued. The period considered for volatility is adequate to represent a consistent trend in the price movements and the movements due to abnormal events are evened out.

Accordingly, since each vest has been considered as a separate grant, the model considers the volatility for periods, corresponding to the expected lives of different vests, prior to the grant date. Volatility has been calculated based on the daily closing market price of the Company's stock price on NSE over these years. Similar approach was followed in determination of expected volatility based on historical volatility for all the grants under the scheme.

In respect of stock options granted under Employee Stock Option Scheme 2010, the accounting is done as per the requirements of Ind AS 102. Consequently, Rs.2,941.80 lakhs (31 March 2019: Rs.2,255.02 lakhs) has been included under 'Employee Benefits Expense' as 'Share-based payment to employees' based on respective grant date fair value, after adjusting for reversals on account of options forfeited. The amount includes cost reimbursements to the holding company of Rs.51.60 lakhs (31 March 2019: Rs. 27.40 lakhs) in respect of options granted to employees of the Company and excludes net recovery of Rs.56.96 lakhs (31 March 2019: Rs.100.36 lakhs) from its subsidiaries for options granted to their employees.

36 Employee benefits

General description of defined benefit plans

Gratuity

The Company provides for the gratuity, a defined benefit retirement plan covering qualifying employees. The plan provides for lump sum payments to employees upon death while in employment or on separation from employment after serving for the stipulated period mentioned under The Payment of Gratuity Act, 1972. The Company makes annual contribution to the Gratuity scheme administered by the Life Insurance Corporation of India through its Gratuity fund.

Post retirement medical

The Company provides for post retirement medical cover to select grade of employees to cover the retiring employee and their spouse upto a specified age through mediclaim policy on which the premiums are paid by the Company. The eligibility of the employee for the benefit as well as the amount of medical cover purchased is determined by the grade of the employee at the time of retirement

Through its defined benefit plans the company is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility -

The plan liabilities are calculated using a discount rate set with references to government bond yields; if plan assets underperform compared to this yield, this will create or increase a deficit. The defined benefit plans may hold equity type assets, which may carry volatility and associated risk.

Change in bond yields -

A decrease in government bond yields will increase plan liabilities, although this is expected to be partially offset by an increase in the value of the plan's investment in debt instruments.

Inflation risk -

The present value of some of the defined benefit plan obligations are calculated with reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability. The post retirement medical benefit obligation is sensitive to medical inflation and accordingly, an increase in medical inflation rate would increase the plan's liability

Life expectancy -

The present value of defined benefit plan obligation is calculated by reference to the best estimate of the mortality of plan participants, both during and after the employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Details of defined benefit plans as per actuarial valuation are as follows:

		Funded Plan Gratuity Year ended 31 March

	Rate of Salary increase (p.a.)	**7.00%**	7.00%
	In-service Mortality	**Indian Assured Lives Mortality (2012-14) Ultimate**	Indian Assured Lives Mortality (2006-08) Ultimate
II.	**Quantitative sensitivity analysis for impact of significant assumptions on defined benefit obligation are as follows:**		
	One percentage point increase in discount rate	**(896.43)**	(1,248.37)
	One percentage point decrease in discount rate	**1,064.31**	1,226.74
	One percentage point increase in Salary growth rate	**1,052.51**	1,222.10
	One percentage point decrease in Salary growth rate	**(903.42)**	(1,264.06)
III.	**Maturity profile of defined benefit obligation**		
	Within 1 year	**982.14**	1,067.10
	Between 1 and 5 years	**4,002.93**	4,050.08

The estimate of future salary increases, considered in actuarial valuation, considers inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The plan assets have been primarily invested in government securities and corporate bonds.

During the year ended 31 March 2020, there was a revision in salary structure by reduction of basic pay with corresponding increase in variable pay of employees in certain grades made effective during the last quarter which resulted in reduction in valuation of defined benefit obligation on account of gains recorded in past service cost amounting to Rs.1,091.19 lakhs and the same is netted against expenses recognized in Statement of Profit and Loss under the head Employee Benefits Expense.

Accordingly, the Company had recognized a net gain of Rs.66.42 lakhs for the year ended 31 March 2020 (as against expenses of Rs.889.60 lakhs for the year ended 31 March 2019) in the Statement of Profit and Loss under the head Employee Benefits Expense.

The Company's contribution to provident fund, superannuation fund and national pension scheme aggregating to Rs 6,806.72 lakhs (31 March 2019: Rs.4,186.75 lakhs) has been recognized in the Statement of profit and loss under the head Employee benefits expense.

37 Funds raised by issue of Rupee denominated USD settled, Secured Notes ("Masala Bonds")

During the quarter and year ended 31 March 2020, the Company had raised funds in the overseas market amounting to Rs. 35,000.00 lakhs (equivalent to USD 50 million) through issue of Rupee denominated USD settled, Secured Notes ("Masala Bonds") under External Commercial Borrowings (ECB) accessed through approval route requiring prior approval of RBI as per ECB Master directions. These are unlisted instruments, issued on 13 February 2020 for total duration of 4 years, carrying a fixed coupon rate of 7.40%, repayable at par on maturity on 13 February 2024.

The net proceeds from the issue of these Notes were applied for the purpose of on-lending, in accordance with the approvals granted by the RBI and the ECB Master Directions.

38 Funds raised by issue of debt instruments through public issue

During the year ended 31 March 2020, there was no capital raised by issue of debt instruments through public issue.

During the corresponding previous year ended 31 March 2019, the Company has raised an amount of Rs. 2,14,699.47 lakhs by way of Public Issuance of Secured Redeemable Non-Convertible Debentures (NCD's) and Unsecured Subordinated Redeemable Non-Convertible Debentures of the face value of Rs.1,000.00 each. The NCD's issued during the previous year were allotted on 18 January 2019 and these were listed on the BSE. The entire amount of proceeds from these issuances were used for the purposes as stated in its 'Placement Document' and there was no unutilized amount pertaining to these issuances. The issue expenses of Rs.2100.00 lakhs has been adjusted against underlying NCD liabilities for amortization at effective interest rate over the tenor of respective NCDs as per the accounting policy. The details are as follows.

Proceeds from issue of NCDs:

Rs. in lakhs

Sr. No.	Particulars	Year ended 31 March 2020	Year ended 31 March 2019
i)	Unsecured Subordinated Redeemable Non-Convertible Debentures (NCD's) of face value of Rs.1000/- each	–	33,687.23
ii)	Secured Redeemable Non-Convertible Debentures (NCD's) of face value of Rs.1000/- each	–	1,81,012.24
	Total	–	2,14,699.47
	Issue expenses [adjusted against underlying NCD liabilities for amortization at effective interest rate over the tenor of respective NCDs]	–	2,100.00

In terms of the requirements as per Section 71 (4) of the Companies Act, 2013 read with The Companies (Share capital and Debentures) Rules 2014, Rule no. 18 (7) and applicable SEBI Issue and Listing of Debt Securities Regulations, 2008, the Company has transferred Rs.14,667.61 lakhs to Debenture Redemption Reserve (DRR) on a prorata basis on total NCDs outstanding as at 31 March 2019, including the amount of fresh issuance during the year to create adequate DRR over the tenor of the debentures.

Pursuant to issuance of notification dated 16 August 2019 by MCA through the Companies (Share capital and Debentures) Amendment Rules, 2019, the DRR is no longer required for certain class of companies, including listed NBFCs registered with RBI under section 45-IA of the RBI Act, 1934, in the case of public issue of debentures and privately placed debentures. Accordingly, the Company has not created any amount of DRR for the current financial year and written-back an amount of Rs. 22,370.59 lakhs being the carrying amount of DRR created in the earlier years to Retained earnings as it is no longer required.

39 Transactions in the nature of change in ownership in other entities

i) Pursuant to the offer made by National Housing Bank (NHB), the Board of Directors of the Company, at its meeting held on 27 March 2019, had approved the acquisition of 1,18,91,511 equity shares of Rs.10/- each of Mahindra Rural Housing Finance Limited, a subsidiary of the Company, at a premium of Rs. 231.16, for cash, aggregating to Rs. 28,677.57 lakhs. During the year ended 31 March 2020, the Company had settled the entire amount of obligation as per the terms and conditions of the agreement.

ii) The Company, on 21 June 2019, along with Mahindra Asset Management Company Private Limited (MAMCPL) and Mahindra Trustee Company Private Limited (MTCPL), wholly-owned subsidiaries of the Company, had entered in to a share subscription agreement and shareholders' agreement to form a 51:49 Joint Venture with Manulife Asset Management (Singapore) Pte. Ltd. (Manulife). Pursuant to these agreements, Manulife was required to make an equity investment aggregating to US $ 35.00 million to acquire 49% of the share capital of MAMCPL & MTCPL.

The transaction was settled on 29 April 2020 in accordance with share subscription and shareholders' agreements to acquire a 49% stake in MIAMCPL and MTCPL by Manulife. The said agreements have also provided for sale of certain number of equity shares of MAMCPL by MMFSL at an agreed valuation within the overall stake divestment of 49% to Manulife. Accordingly, under the sale transaction, 1,47,00,000 equity shares of MAMCPL, equivalent to 7% of the fully paid up equity share capital of MAMCPL, for a consideration of Rs. 2080.10 lakhs (equivalent to USD 2.73 million), have been transferred in de materialized form to Manulife.

Consequent to the above, the share holding of the Company in MAMCPL and MTCPL has come down from 100% to 51% of the share capital respectively, and accordingly, MAMCPL and MTCPL will cease to be wholly-owned subsidiaries of the Company but, continue to remain the Company's subsidiaries w.e.f. 29 April 2020. In the Consolidated financial statements for the year ended 31 March 2020, MAMCPL and MTCPL have been treated as 100% subsidiaries of the Company.

iii) During the year ended 31 March 2020, the Company has entered in to a share subscription, share purchase and shareholders' agreement with Ideal Finance Limited ("Ideal Finance") and its existing Shareholders to form and operate a Joint Venture in the financial services sector in Sri Lanka. Pursuant to these agreements, the Company has agreed to subscribe / acquire up to 58.20% of the Equity share capital of Ideal Finance, in one or more branches over a specified period of time, for an amount not exceeding Sri Lankan Rupees (LKR) 200.30 crores (equivalent to around Rs.80.12 crores at foreign exchange rate of INR 1 to LKR 2.5). Upon acquisition of above stake, Ideal Finance will become a subsidiary of the Company. As part of this agreement, the Company has remitted an amount of Rs. 4,399.60 lakhs (equivalent to LKR 11,000.00 lakhs) to Ideal Finance towards acquisition of 38.20% of the Equity share capital under first and second branches as prescribed in these agreements.

iv) During the year ended 31 March 2020, the Company had incorporated a Wholly-owned subsidiary company, namely, Mahindra Finance CSR Foundation, under the provisions of section 8 of the Companies Act, 2013 for undertaking the CSR activities of the Company and its subsidiaries.

40 Capital management

The Reserve Bank of India vide its circular reference RBI/2019-20/170 DOR (NBFC).CC.PD.No.109/22.10.106/2019-20 dated 13 March 2020 outlines the regulatory guidance in relation to Ind AS financial statements from financial year 2019-20 onwards. This included guidance for computation of 'owned funds', 'net owned funds' and 'regulatory capital'. Accordingly, the 'regulatory capital' as of 31 March 2020 has been computed in accordance with these requirements read with the requirements of the Master Direction DNBR. PD. 008/03.10.119/2016-17 dated September 01, 2016 (as amended). The 'regulatory capital' as of 31 March 2019 as disclosed in the comparative period numbers below was computed based on the carrying values as reflected in the financial statements prepared in accordance with requirements of Ind AS.

'The Company's capital management strategy is to effectively determine, raise and deploy capital so as to create value for its shareholders. The same is done through a mix of either equity and/or convertible and/or combination of short term /long term debt as may be appropriate.

The company determines the amount of capital required on the basis of operations, capital expenditure and strategic investment plans. The capital structure is monitored on the basis of net debt to equity and maturity profile of overall debt portfolio.

The Company is subject to the capital adequacy requirements of the Reserve Bank of India (RBI). Under RBI's capital adequacy guidelines, the Company is required to maintain a capital adequacy ratio consisting of Tier I and Tier II Capital. The total of Tier II Capital at any point of time, shall not exceed 100 percent of Tier I Capital. The minimum capital ratio as prescribed by RBI guidelines and applicable to the Company, consisting of Tier I and Tier II capital, shall not be less than 15 percent of its aggregate risk weighted assets on-balance sheet and of risk adjusted value of off-balance sheet.

The Company has complied with all regulatory requirements related capital and capital adequacy ratios as prescribed by RBI.

Regulatory capital

Rs. in lakhs

	As at 31 March 2020	As at 31 March 2019
Tier - I capital	**9,62,879.47**	10,02,787.58
Tier - II capital	**2,64,543.44**	3,08,102.15
Total Capital	**12,27,422.91**	13,10,889.73
Aggregate of Risk Weighted Assets	**62,48,547.10**	64,64,867.86
Tier - I capital ratio	**15.4%**	15.5%
Total Capital ratio	**19.6%**	20.3%

"Tier I Capital" means owned fund as reduced by investment in shares of other non-banking financial companies and in shares, debentures, bonds, outstanding loans and advances including hire purchase and lease finance made to and deposits with subsidiaries and companies in the same group exceeding, in aggregate, ten per cent of the owned fund.

"owned fund" means paid up equity capital, preference shares which are compulsorily convertible into equity, free reserves, balance in share premium account and capital reserves representing surplus arising out of sale proceeds of asset, excluding reserves created by revaluation of asset, as reduced by accumulated loss balance, book value of intangible assets and deferred revenue expenditure, if any.

"Tier II capital" includes the following -

(a) preference shares other than those which are compulsorily convertible into equity;

(b) revaluation reserves at discounted rate of fifty five percent;

(c) General provisions (including that for Standard Assets) and loss reserves to the extent these are not attributable to actual diminution in value or identifiable potential loss in any specific asset and are available to meet unexpected losses, to the extent of one and one fourth percent of risk weighted assets

(d) hybrid debt capital instruments; and

(e) subordinated debt to the extent the aggregate does not exceed Tier I capital.

Aggregate Risk Weighted Assets -

Under RBI Guidelines, degrees of credit risk expressed as percentage weightages have been assigned to each of the on-balance sheet assets and off- balance sheet assets. Hence, the value of each of the on-balance sheet assets and off- balance sheet assets requires to be multiplied by the relevant risk weights to arrive at risk adjusted value of assets. The aggregate shall be taken into account for reckoning the minimum capital ratio.

41 Leases

I) In the cases where assets are taken on operating lease (as lessee) -

As a lessee, the Company's lease asset class primarily consist of buildings or part thereof taken on lease for office premises and certain IT equipments used for operating activities. The Company, previously classified these leases as operating leases under Ind AS 17 based on its assessment that the lessor effectively retained substantially all the risks and benefits incidental to ownership of the underlying asset and hence, the lease payments were recognized as an expense in the Statement of profit and loss.

The Company has adopted Ind AS 116, Leases, effective 1 April 2019 using modified retrospective approach of transition without restating the figures for prior periods. Consequently, the Company has recognized the lease liability at the present value of the future lease payments discounted at the incremental borrowing rate at the date of initial application and ROU asset is equal to lease liability adjusted by the amount of any prepaid or accrued lease payments in relation to leases which has been previously classified as operating leases under Ind AS 17 subject to certain practical expedients as allowed by the Standard.

The following is the summary of practical expedients elected on initial application of Ind AS 116.

a) Applied a single discount rate to a portfolio of leases with reasonably similar characteristics;

b) Availed the exemption not to recognize ROU assets and liabilities for leases of low value assets and leases with less than 12 months (short-term lease) of lease term on the date of initial application;

c) Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application;

d) Applied the practical expedient to grandfather the assessment of which transactions are leases. Accordingly, Ind AS 116 is applied only to contracts that were previously identified as leases under Ind AS 17.

e) Used hindsight to determine the lease term of contracts.

The lease liabilities were measured at the present value of the remaining lease payments, discounted using the Company's incremental borrowing rate as at 1 April 2019. The weighted average of Company's incremental borrowing rate applied to the lease liabilities on 1 April 2019 was 9.00%.

a) Transition date reconciliation as at 01 April 2019

	Rs. in lakhs
Operating lease commitments as per Ind AS 17 as at 31 March 2019	30,840.74
Present value of above lease commitment, using incremental borrowing rate as on 01 April 2019	20,680.84
Less:- Adjustments for recognizing exemption for short term leases	2,233.34
Lease liabilities recognized as at 1 April 2019	18,447.50

b) Maturity Analysis - Contractual Undiscounted Cash Flow as at 31 March 2020:

	Rs. in lakhs
Less than 1 year	5,463.47
1 - 3 years	8,254.41
3 - 5 years	**5,387.71**
More than 5 years	4,582.31
Total undiscounted lease liabilities as at 31 March 2020	23,687.90

c) Other disclosures:

On application of Ind AS 116, the nature of expense has changed from lease rent in previous periods to depreciation cost for the ROU asset and finance cost for interest accrued on lease liability. Ind AS 116 also provides for certain options and exemptions to recognize short-term lease payments and payments for leases of low-value assets which are not included in the measurement of the lease liability and ROU asset as expense on a straight line basis over the lease term in the statement of profit or loss. Following table summarizes other disclosures including the note references for the expense, asset and liability heads under which certain expenses, assets and liability items are grouped in the financial statements.

Rs. in lakhs

		Amount for the year ended / As at 31 March 2020
i)	Depreciation charge for Right-Of-Use assets for Leasehold premises (presented under note - 31 "Depreciation, amortization and impairment")	4,704.38
ii)	Interest expense on lease liabilities (presented under note - 28 "Finance costs")	1,463.00
iii)	Expense relating to short-term leases (included in Rent expenses under note 32 "Other expenses")	2,476.16
iv)	Expense relating to leases of low-value assets (included in Rent expenses under note 32 "Other expenses")	1,264.94
v)	Payments for principal portion of lease liability	3,812.25
vi)	Additions to right-of-use assets during the year	4,245.13
vii)	Carrying amount of right-of-use assets at the end of the reporting period by class of underlying asset -	
	- Property taken on lease for office premises (presented under note - 11 "Property, plant and equipments")	17,988.25
viii)	Lease liabilities (presented under note - 20 "Other financial liabilities")	18,880.38

II) In the cases where assets are given on operating lease (as lessor) -

Key terms of the lease are as below:

i) New vehicles to retail customers for a maximum period of 48 months with a minimum holding period of 24 months.

ii) Used and refurbished vehicles to travel operators / taxi aggregators with a initial agreement validity period of 36 months to 48 months and provision for extension for such period and on such terms and conditions as may be agreed by both the parties. The lease agreement also provides for minimum lock in period 6 months from the date of execution and cancellation with 3 months' notice from either parties. The consideration payable by the lessee is either minimum commitment charges or variable rental charges based on usage, make/model of the vehicle and certain other terms and conditions forming part of the lease agreement.

Rental income arising from these operating leases is accounted for on a straight-line basis over the lease terms and is included in rental income in the Statement of profit and loss. Costs, including depreciation, incurred in earning the lease income are recognized as an expense.

The Company is not required to make any adjustments on transition to Ind AS 116 for leases in which it acts as a lessor. The Company accounted for its leases in accordance with Ind AS 116 from the date of initial application. The Company does not have any sub-lease transactions.

Other details are as follows:

Rs. in lakhs

Particulars		**As at 31 March 2020**	As at 31 March 2019
i)	**New vehicles to retail customers on operating lease -**		
	Gross carrying amount	**4,925.95**	13.75
	Depreciation for the year	**396.21**	0.74
	Accumulated Depreciation	**427.88**	13.02
ii)	**Used and refurbished vehicles to travel operators / taxi aggregators -**		
	Gross carrying amount	**358.71**	63.40
	Depreciation for the year	**42.62**	0.30
	Accumulated Depreciation	**56.49**	63.10

The total future minimum lease rentals receivable for the non-cancellable lease period as at the Balance sheet date is as under:

Rs. in lakhs

Particulars		**As at 31 March 2020**	As at 31 March 2019
i)	**New vehicles to retail customers on operating lease -**		
	Not later than one year	**1,451.45**	357.77
	Later than one year but not later than five years	**3,578.70**	1,253.64
	Later than five years	**–**	–
		5,030.15	**1,611.41**
ii)	**Used and refurbished vehicles to travel operators / taxi aggregators -**		
	Not later than one year	**50.92**	**37.55**
	Later than one year but not later than five years	**33.71**	**29.07**
	Later than five years	**–**	–
		84.63	66.62

Since there is no contingent rent applicable in respect of these lease arrangements, the Company has not recognized any income as contingent income during the year.

42 Operating segments

There is no separate reportable segment as per Ind AS 108 on 'Operating Segments' in respect of the Company.

The Company operates in single segment only. There are no operations outside India and hence there is no external revenue or assets which require disclosure.

No revenue from transactions with a single external customer amounted to 10% or more of the Company's total revenue in year ended 31 March 2020 or 31 March 2019.

43 Frauds reported during the year

There were 101 cases (31 March 2019: 123 cases) of frauds amounting to Rs.285.03 lakhs (31 March 2019: Rs.768.18 lakhs) reported during the year. The Company has recovered an amount of Rs.70.62 lakhs (31 March 2019: Rs.76.20 lakhs) and has initiated appropriate legal actions against the individuals involved. The claims for the un-recovered losses have been lodged with the insurance companies on merit basis.

44 Contingent liabilities and commitments (to the extent not provided for)

Rs. in lakhs

		31 March 2020	31 March 2019
i)	**Contingent liabilities**		
	Claims against the Company not acknowledged as debts	**14,434.27**	22,174.97
	Guarantees	**1,11,742.35**	51,236.91
		1,26,176.62	**73,411.88**
ii)	**Commitments**		
	Estimated amount of contracts remaining to be executed on capital account and not provided for	**1,316.59**	**500.03**
	Other commitments (loan sanctioned but not disbursed)	**23,945.91**	**34,199.41**
		25,262.50	34,699.44
Total		**1,51,439.12**	1,08,111.32

The Company's pending litigations comprise of claims against the Company primarily by the customers and proceedings pending with Income Tax, sales tax / VAT and other authorities. The Company has reviewed all its pending litigations and proceedings and has adequately provided for where provisions are required and disclosed the contingent liabilities where applicable, in its financial statements. The amount of provisions / contingent liabilities is based on management's estimate, and no significant liability is expected to arise out of the same.

Clarification on applicability of allowances for provident fund contributions under Employees Provident Fund Act, 1952

In February 2019, the Supreme Court of India in its judgement clarified the applicability of allowances that should be considered to measure obligations under Employees Provident Fund Act, 1952. The Company has been legally advised that there are interpretative challenges on the application of judgement retrospectively and as such does not consider there is any probable obligations for past periods. Accordingly, based on legal advice, the Company has made a provision for provident fund contribution from the date of the Supreme Court order and continued to remit the contribution on same basis.

45 Transfer of financial assets

Transferred financial assets that are not de recognized in their entirety

The Company has transferred certain pools of fixed rate loan receivables backed by underlying assets in the form of tractors, vehicles, equipments etc. by entering in to securitization transactions with the Special Purpose Vehicle Trusts ("SPV Trust") sponsored by Commercial banks for consideration received in cash at the inception of the transaction.

The Company, being Originator of these loan receivables, also acts as Servicer with a responsibility of collection of receivables from its borrowers and depositing the same in Collection and Payout Account maintained by the SPV Trust for making scheduled payouts to the investors in Pass Though Certificates (PTCs) issued by the SPV Trust. These securitization transactions also requires the Company to provide for first loss credit enhancement in various forms, such as corporate guarantee, cash collateral, subscription to subordinated PTCs. as credit support in the event of shortfall in collections from underlying loan contracts. By virtue of existence of credit enhancement, the Company is exposed to credit risk, being the expected losses that will be incurred on the transferred loan receivables to the extent of the credit enhancement provided.

In view of the above, the Company has retained substantially all the risks and rewards of ownership of the financial asset and thereby does not meet the recognition criteria as set out in Ind AS 109. Consideration received in this transaction is presented as "Associated liability related to Securitization transactions" under Note no.17.

The following table provide a summary of financial assets that have been transferred in such a way that part or all of the transferred financial assets do not qualify for derecognition, together with the associated liabilities:

Rs. in lakhs

Particulars	31 March 2020	31 March 2019
Securitisations -		
Carrying amount of transferred assets measured at amortised cost	**8,85,523.52**	4,31,200.15
Carrying amount of associated liabilities	**8,88,170.82**	4,34,734.49
Fair value of transferred assets (A)	**8,76,973.52**	**3,62,188.41**
Fair value of associated liabilities (B)	**8,16,917.73**	**4,13,225.89**
Net position (A-B)	**60,055.79**	**(51,037.48)**

46 Corporate Social Responsibility (CSR)

During the year ended 31 March 2020, the Company has incurred an expenditure of Rs.2,533.54 lakhs (31 March 2019: Rs. 2,502.95 lakhs) towards CSR activities which includes contribution / donations made to the trusts which are engaged in activities prescribed under section 135 of the Companies Act, 2013 read with Schedule VII to the said Act and expense of Rs.246.08 lakhs (31 March 2019: Rs. 168.56 lakhs) towards the CSR activities undertaken by the Company.

Detail of amount spent towards CSR activities:

a) Gross amount required to be spent by the Company during the year is Rs. 2280.16 lakhs (31 March 2019: Rs. 2,681.34 lakhs).

b) Amount spent by the Company during the year:

Rs. in lakhs

Particulars		**For the year ended 31 March 2020**			For the year ended 31 March 2019		
		In cash	**Yet to be paid in cash**	**Total**	In cash	Yet to be paid in cash	Total
i)	Construction / acquisition of any asset	–	–	–	–	–	–
ii)	On purpose other than (i) above	**2,797.36**	–	**2,797.36**	2,687.30	–	2,687.30

The above expenditure includes Rs.17.74 lakhs (31 March 2019: Rs.15.79 lakhs) as salary cost in respect of certain employees who have been exclusively engaged in CSR administrative activities which qualifies as CSR expenditure under section 135 of the Companies Act, 2013.

47 During the year ended 31 March 2020, the Company had made a contribution of Rs.600.00 lakhs (31 March 2019: 240.00 lakhs) to New Democratic Electoral Trust, a Trust approved by the Central Board of Direct Taxes under Electoral Trust Scheme, 2013 to enable Electoral Trust to make contributions to political party/parties duly registered with the Election Commission, in such manner and at such times as it may decide from time to time. This contribution was as per the provisions of section 182 of the Companies Act, 2013.

48 The Company has a process whereby periodically all long term contracts (including derivative contracts) are assessed for material foreseeable losses. At the year end, the Company has reviewed and ensured that adequate provision as required under any law / accounting standards for material foreseeable losses on such long term contracts (including derivative contracts) has been made in the books of accounts.

49 Reconciliation of movement of liabilities to cash flows from financing activities

Year ended 31 March 2020

Rs. in lakhs

Particulars	31 March 2019	Cash flows (net)	Exchange difference	Amortization of loan origination costs	New leases (including transition to Ind AS 116)	31 March 2020
Debt securities	22,31,937.92	(4,56,151.40)	–	(1,298.79)	–	**17,74,487.73**

50 Financial Risk Management Framework

In the course of its business, the Company is exposed to certain financial risks namely credit risk, interest risk, currency risk & liquidity risk. The Company's primary focus is to achieve better predictability of financial markets and seek to minimize potential adverse effects on its financial performance.

The financial risks are managed in accordance with the Company's risk management policy which has been approved by its Board of Directors.

Board of Directors of the Company have established Asset and Liability Management Committee (ALCO), which is responsible for developing and monitoring risk management policies for its business. The Company's financial services businesses are exposed to high credit risk given the unbanked rural customer base and diminishing value of collateral. The credit risk is managed through credit norms established based on historical experience.

50.1 Market Risk

Market the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables such as interest rates, foreign exchange rates, etc. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while maximizing the return.

a) Pricing Risk

The Company's Investment in Mutual Funds is exposed to pricing risk. Other financial instruments held by the company does not possess any risk associated with trading. A 5 percent increase in Net Assets Value (NAV) would increase profit before tax by approximately Rs 16,206.00 lakhs (31st March 2019: Rs 3,177.00 lakhs). A similar percentage decrease would have resulted equivalent opposite impact.

b) Currency Risk

Currency Risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Foreign currency risk arise majorly on account of foreign currency borrowings. The Company's foreign currency exposures are managed in accordance with its Foreign Exchange Risk Management Policy which has been approved by its Board of Directors. Company manages its foreign currency risk by entering into forward contract and cross currency swaps.

The carrying amounts of the Company's foreign currency exposure at the end of the reporting period are as follows:

Rs. in lakhs

	US Dollar	Euro	Total
As at 31 March 2020			
Financial Assets	**–**	**–**	**–**
Financial Liabilities	**2,72,141.24**	**19,931.66**	**2,92,072.90**
As at 31 March 2019			
Financial Assets	–	–	–
Financial Liabilities	82,052.52	118,748.22	2,00,800.74

Foreign Currency Sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in exchange rates, with all other variables held constant.

Rs. in lakhs

	Currency	Change in rate	Effect on Profit Before Tax
Year ended 31 March 2020	**INR/EUR**	**(+/-) 1.00%**	**(+/-) 199.32**
	INR/USD	**(+/-) 1.00%**	**(+/-) 2,721.41**
Year ended 31 March 2019	INR/EUR	(+/-) 0.31%	(+/-) 371.85
	INR/USD	(+/-) 0.50%	(+/-) 407.98

c) Interest Rate Risk

The company uses a mix of cash and borrowings to manage the liquidity & fund requirements of its day-to-day operations. Further, certain interest bearing liabilities carry variable interest rates.

Interest Rate risk on variable rate borrowings is managed by way of interest rate swaps.

Interest Rate sensitivity

The sensitivity analyses below have been determined based on exposure to interest rate for both derivative and non-derivative instruments at the end of reporting period. For floating rate liabilities, analysis is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole year.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the company's profit before tax is affected through the impact on floating rate borrowings, as follows:

Rs. in lakhs

	Currency	Increase / decrease in basis points	Effect on profit before tax
Year ended 31 March 2020	**INR**	**270**	**42,114.28**
Year ended 31 March 2019	INR	150	19,232.85

d) Off-setting of balances

The table below summarizes the financial liabilities offsetted against financial assets and shown on a net basis in the balance sheet:

Financial assets subject to offsetting

Rs. in lakhs

	Offsetting recognised on the balance sheet		
Particulars	**Gross assets before offset**	**Finanical liabilities netted**	**Assets recognised in balance sheet**
Loan assets			
At 31 March' 2020	**65,09,154.82**	**9,802.78**	**64,99,352.04**
At 31 March' 2019	61,35,483.82	10,521.02	61,24,962.80

Financial liabilities subject to offsetting

Rs. in lakhs

	Offsetting recognised on the balance sheet		
Particulars	**Gross liabilities before offset**	**Finanical liabilities netted**	**Liabilities recognised in balance sheet**
Other financial liabilities			
At 31 March' 2020	2,41,198.81	9,802.78	2,31,396.03
At 31 March' 2019	2,03,183.97	10,521.02	1,92,662.95

50.2 Credit Risk Management

Credit risk is the risk that the Company will incur a loss because its customers fail to discharge their contractual obligations. The Company has a comprehensive framework for monitoring credit quality of its retail and other loans primarily based on Days past due monitoring at period end. Repayment by individual customers and portfolio is tracked regularly and required steps for recovery are taken through follow ups and legal recourse.

Credit Quality of Financial Loans and Investments

The following table sets out information about credit quality of loans and investments measured at amortized cost based on days past due information. The amount represents gross carrying amount.

Rs. in lakhs

Particulars	**31 March 2020**	31 March 2019
Gross carrying value of Retail loans		
Neither Past due nor impaired	**49,49,484.43**	45,73,022.06
Past Due but not impaired		
30 days past due	**3,29,835.14**	3,99,846.71
31-90 days past due	**6,16,208.94**	5,17,380.10
Impaired (more than 90 days)	**5,48,449.65**	3,83,898.47
Total Gross carrying value as at reporting date	**6,443,978.16**	5,874,147.34

Rs. in lakhs

Particulars	**31 March 2020**	31 March 2019
Gross carrying value of SME loans including Bills of exchange		
Neither Past due nor impaired	**1,62,662.60**	1,90,390.41
Past Due but not impaired		
30 days past due	**49,797.19**	38,294.97
31-90 days past due	**7,849.04**	3,247.19
Impaired (more than 90 days)	**19,298.01**	17,655.41
Total Gross carrying value as at reporting date	**2,39,606.84**	2,49,587.98

Rs. in lakhs

Particulars	**31 March 2020**	31 March 2019
Gross carrying value of Trade Advances		
Less than 60 days past due	**96,383.29**	178,777.59
61-90 days past due	**21,149.54**	3,134.21
Impaired (more than 90 days)	**6,402.06**	5,518.76
Total Gross carrying value as at reporting date	**123,934.89**	187,430.56

Rs. in lakhs

Particulars	**31 March 2020**	31 March 2019
Gross carrying value of Financial Investments measured at amortised cost		
Neither Past due nor impaired	**1,12,958.95**	1,20,477.05
Past Due but not impaired		
30 days past due	**–**	–
31-90 days past due	**–**	–
Impaired (more than 90 days)	**–**	–
Total Gross carrying value as at reporting date	**1,12,958.95**	1,20,477.05

The Company reviews the credit quality of its loans based on the ageing of the loan at the period end. Since the company is into retail lending business, there is no significant credit risk of any individual customer that may impact company adversely, and hence the Company has calculated its ECL allowances on a collective basis.

Inputs considered in the ECL model

In assessing the impairment of financial loans under Expected Credit Loss (ECL) Model, the assets have been segmented into three stages. The three stages reflect the general pattern of credit deterioration of a financial instrument. The differences in accounting between stages, relate to the recognition of expected credit losses and the measurement of interest income.

The Company categorizes loan assets into stages primarily based on the Months Past Due status.

Stage 1: 0-30 days past due

Stage 2: 31-90 days past due

Stage 3: More than 90 days past due

The company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for trade advances. The Company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the company.

(i) RBI COVID-19 Regulatory Package

In accordance with the Reserve Bank of India (RBI) notification no. RBI/2019-20/186 DOR.No.BP.BC.47/21.04.048/2019-20 dated 27th March, 2020 and RBI/2019-20/220 DOR.No.BP.BC.63/21.04.048/2020-21 dated April 17, 2020 relating to 'COVID-19 - Regulatory Package', the Company, as per its board approved policy and ICAI advisories, has granted moratorium upto three months on the payment of installments falling due between March 1, 2020 and May 31, 2020 to all eligible borrowers. And in respect of accounts overdue but standard (i.e, stage 1 and stage 2) at 29 February 2020 where moratorium benefit has been granted, for the purpose of staging of those accounts and for determination of impairment loss allowance as at 31 March 2020, the days past due status as on 29 February 2020 has been considered.

(ii) Impact of COVID-19

The impact of COVID-19 on the global economy and how governments, businesses and consumers respond is uncertain. This uncertainty is reflected in the Company's assessment of impairment loss allowance on its loans which are subject to a number of management judgements and estimates. In relation to COVID-19, judgements and assumptions include the extent and duration of the pandemic, the impacts of actions of governments and other authorities, and the responses of businesses and consumers in different industries, along with the associated impact on the global economy.

While the methodologies and assumptions applied in the impairment loss allowance calculations remained unchanged from those applied while preparing the financial results for the period ended March 2019, the Company has separately incorporated estimates, assumptions and judgements specific to the impact of the COVID-19 pandemic and the associated support packages in the measurement of impairment loss allowance and has recognized an overlay in the statement of profit and loss. The Company's impairment loss allowance estimates are inherently uncertain and, as a result, actual results may differ from these estimates.

(iii) Definition of default

The Company considers a financial asset to be in "default" and therefore Stage 3 (credit impaired) for ECL calculations when the borrower becomes 90 days past due on its contractual payments.

(iv) Exposure at default

"Exposure at Default" (EAD) represents the gross carrying amount of the assets subject to impairment calculation. Future Expected Cash flows (Principal and Interest) for future years has been used as exposure for Stage 2.

(v) Estimations and assumptions considered in the ECL model

The Company has made the following assumptions in the ECL Model:

a. "Loss given default" (LGD) is common for all three Stages and is based on loss in past portfolio. Actual cash flows on the past portfolio are discounted at portfolio EIR rate for arriving loss rate.

b. "Probability of Default" (PD) is applied on Stage 1 and Stage 2 on portfolio basis and for Stage 3 PD at 100%. This is calculated as an average of the last 60 months yearly movement of default rates and future adjustment for macro-economic factor.

(vi) Measurement of ECL

ECL is measured as follows:

- financial assets that are not credit impaired at the reporting date: for Stage 1, gross exposure is multiplied by PD and LGD percentage to arrive at the ECL. For Stage 2, future Expected Cash flows (Principal and Interest) for respective future years is multiplied by respective years Marginal PDs and LGD percentage and thus arrived ECL is then discounted with the respective loan EIR to calculate the present value of ECL. In addition, in case of Bills discounting and Channel finance, as the average lifetime is of 90 days, a time to maturity factor of 0.25 is used in the ECL computation.

- financial assets that are credit impaired at the reporting date: the difference between the gross exposure at reporting date and computed carrying amount considering EAD net of LGD and actual cash flows till reporting date;

- undrawn loan commitments: as the present value of the difference between the contractual cash flows that are due to the Company if the commitment is drawn down and the cash flows that the Company expects to receive.

(vii) Forward Looking Information

Historical PDs has been converted into forward looking PD which incorporates the forward looking economic outlook. Considering that major chunk of borrowers in the retail portfolio is from rural area, Agriculture (real change % p.a.) is used as a macroeconomic variable. Agriculture (real change % p.a.) stands for Percentage change in real agricultural value-added, including livestock, forestry and fishing, over previous year). In case of SME and Bills Discounting portfolio, Real GDP (% change pa) is used as the macroeconomic variable.

The macroeconomic variables considered by the Company are robust reflections of the state of economy which result into systematic risk for the respective portfolio segments.

Additionally, three different scenarios have been considered for ECL calculation. Along with the actual numbers (considered for Base case scenario), other scenarios take care of the worsening as well as improving forward looking economic outlook. As at 31 March 2020, the probability assigned to base case scenario assumptions have been updated to reflect the rapidly evolving situation with respect to Covid-19. This includes an assessment of the effectiveness of stimulus packages announced by government and regulatory measures imparted by RBI. These are considered in determining the length and severity of the forecast economic downturn. The Company's base case economic forecast scenarios reflects a deterioration in economic conditions in the first quarter with a gradual improvement thereafter. In addition to the base case forecast which reflects largely the negative economic consequences of COVID-19, greater weighting has been applied to the downside scenarios given the Company's assessment of downside risks.

(viii) Assessment of significant increase in credit risk

When determining whether the credit risk has increased significantly since initial recognition, the Company considers both quantitative and qualitative information and analysis based on the Company's historical experience, including forward-looking information. The Company considers reasonable and supportable information that is relevant and available without undue cost and effort. The Company's accounting policy is not to use the practical expedient that the financial assets with 'low' credit risk at the reporting date are deemed not to have had a significant increase in credit risk. As a result the Company monitors all financial assets and loan commitments that are subject to impairment for significant increase in credit risk.

Based on the assessment by the Company, the RBI moratorium relaxation offered to the customers recognizing the potential detrimental impact of COVID-19 has not been deemed to be automatically triggering significant increase in credit risk. The Company continues to recognize interest income during the moratorium period and in the absence of other credit risk indicators, the granting of a moratorium period does not result in accounts becoming past due and automatically triggering Stage 2 or Stage 3 classification criteria.

As a part of the qualitative assessment of whether a customer is in default, the Company also considers a variety of instances that may indicate unlikeliness to pay. In such instances, the Company treats the customer at default and therefore assesses such loans as Stage 3 for ECL calculations, following are such instances:

- A Stage 3 customer having other loans which are in Stage 1 or 2.
- Customers who have failed to pay their first EMI.
- Physical verification status of the repossessed asset related to the loan.
- Cases where Company suspects fraud and legal proceedings are initated.

(ix) Policy for write off of Loan Assets

The gross carrying amount of a financial asset is written off when there is no realistic prospect of further recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write- off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made from written off assets are netted off against the amount of financial assets written off during the year under "Bad debts and write offs" forming part of "Impairment on financial instruments" in Statement of profit and loss.

(x) Analysis of inputs to the ECL model with respect to macro economic variable

The below table shows the values of the forward looking macro economic variable used in each of the scenarios for the ECL calculations. For this purpose, the Company has used the data source of Economist Intelligence Unit. The upside and downside % change has been derived using historical standard deviation from the base scenario based on previous 8 years change in the variable.

ECL scenario for Macro Economic Variable	Year	Upside	Base	Downside
		%	%	%
Probability Assigned		0	70	30
Agriculture (% real change p.a)	**2020**	**5.7**	**3.5**	**1.3**
	2021	5.4	3.2	1.0
	2022	5.6	3.4	1.2
	2023	5.5	3.3	1.1
	2024	6.0	3.8	1.6
Real GDP (% change p.a)	**2020**	**7.7**	**6.7**	**5.7**
	2021	7.8	6.8	5.8
	2022	7.7	6.7	5.7
	2023	7.5	6.5	5.5
	2024	7.4	6.4	5.4

Impairment loss

The expected credit loss allowance provision for **Retail Loans** is determined as follows:

Rs. in lakhs

	Performing Loans - 12 month ECL	Underperforming loans - 'lifetime ECL not credit impaired'	Impaired loans - 'lifetime ECL credit impaired'	Total
Gross Balance as at 31 March 2020	**52,79,319.57**	**616,208.94**	**548,449.65**	**6,443,978.16**
Expected credit loss rate	**1.02%**	**11.75%**	**28.31%**	
Carrying amount as at 31 March 2020 (net of impairment provision)	**52,25,486.63**	**543,814.52**	**393,173.26**	**6,162,474.42**
Gross Balance as at 31 March 2019	49,72,868.77	5,17,380.10	3,83,898.47	5,874,147.34
Expected credit loss rate	1.03%	11.01%	16.81%	
Carrying amount as at 31 March 2019 (net of impairment provision)	49,21,882.98	4,60,420.12	3,19,347.75	5,701,650.84

The expected credit loss allowance provision for **SME Loans including Bills of exchange** is determined as follows:

Rs. in lakhs

	Performing Loans - 12 month ECL	Underperforming loans - 'lifetime ECL not credit impaired'	Impaired loans - 'lifetime ECL credit impaired'	Total
Gross Balance as at 31 March 2020	**2,12,459.79**	**7,849.04**	**19,298.01**	**2,39,606.84**
Expected credit loss rate	**0.23%**	**27.21%**	**82.00%**	
Carrying amount as at 31 March 2020 (net of impairment provision)	**2,11,968.51**	**5,713.58**	**3,474.14**	**2,21,156.24**
Gross Balance as at 31 March 2019	2,28,685.38	3,247.19	17,655.41	2,49,587.98
Expected credit loss rate	0.12%	2.61%	38.96%	
Carrying amount as at 31 March 2019 (net of impairment provision)	2,28,405.73	3,162.59	10,776.65	2,42,344.98

The expected credit loss allowance provision for **Trade Advances** is determined as follows:

Rs. in lakhs

	Less than 60 days past due	61-90 days past due	Credit impaired (more than 90 days)	Total
Gross Balance as at 31 March 2020	**96,383.28**	**21,149.54**	**6,402.06**	**1,23,934.89**
Expected credit loss rate	**0.40%**	**6.77%**	**100.00%**	
Carrying amount as at 31 March 2020 (net of impairment provision)	**95,997.75**	**19,718.61**	**–**	**1,15,716.36**
Gross Balance as at 31 March 2019	178,777.59	3,134.21	5,518.76	1,87,430.56
Expected credit loss rate	0.40%	7.33%	100.00%	
Carrying amount as at 31 March 2019 (net of impairment provision)	178,062.48	2,904.49	–	1,80,966.97

The expected credit loss allowance provision for **Financial Investments measured at amortised cost** is determined as follows:

Rs. in lakhs

	Performing Loans - 12 month ECL	Underperforming loans - 'lifetime ECL not credit impaired'	Impaired loans - 'lifetime ECL credit impaired'	Total
Gross Balance as at 31 March 2020	**1,12,958.95**	**–**	**–**	**1,12,958.95**
Expected credit loss rate	**0.12%**			
Carrying amount as at 31 March 2020 (net of impairment provision)	**1,12,822.76**			**1,12,822.76**
Gross Balance as at 31 March 2019	1,20,477.05	–	–	1,20,477.05
Expected credit loss rate	0.24%			
Carrying amount as at 31 March 2019 (net of impairment provision)	1,20,194.53	–	–	1,20,194.53

Level of Assessment - Aggregation Criteria

The company recognizes the expected credit losses (ECL) on a collective basis that takes into account comprehensive credit risk information.

Considering the economic and risk characteristics, pricing range, sector concentration (e.g. vehicle loans in unorganized sectors) the company calculates ECL on a collective basis for all stages - Stage 1, Stage 2 and Stage 3 assets.

An analysis of changes in the gross carrying amount and the corresponding ECLs in relation to Retail Loans is, as follows:

Gross exposure reconciliation

As at 31 March 2020 Rs. in lakhs

Particulars	Stage 1	Stage 2	Stage 3	Total
Gross carrying amount balance as at 1 April 2019	**49,72,868.77**	**5,17,380.10**	**3,83,898.47**	**58,74,147.34**
Changes due to loans recognized in the opening balance that have:				
- Transfers to Stage 1	**1,36,418.58**	**(1,12,758.71)**	**(23,659.87)**	**–**

The contractual amount outstanding on financial investments that has been written off by the Company during the year ended 31 March 2020 and that were still subject to enforcement activity was nil (31 March 2019: nil).

The decrease in ECL of the portfolio was on account of decrease in the size of the portfolio.

Significant changes in the gross carrying value that contributed to change in loss allowance

The company mostly provide loans to retail individual customers in Rural and Semi urban area which is of small ticket size. Change in any single customer repayment will not impact significantly to Company's provisioning. All customers are being monitored based on past due and corrective actions are taken accordingly to limit the Company's risk.

Concentration of Credit Risk

Company's loan portfolio is predominantly to finance retail automobile loans. The Company manages concentration of risk primarily by geographical region in India. The following tables show the geographical concentrations of trade advances and loans:

Rs. in lakhs

Particulars	**31 March 2020**	31 March 2019
Concentration by Geographical region in India:		
North	**19,85,141.76**	17,97,636.32
East	**17,35,414.17**	15,54,329.99
West	**17,48,629.89**	17,12,872.13
South	**13,38,434.07**	12,46,427.44
Total Carrying Value	**68,07,619.89**	**63,11,265.88**

Maximum Exposure to credit Risk

The maximum exposure to credit risk of loans and investment securities is their carrying amount. The maximum exposure is before considering both the effect of mitigation through collateral.

Narrative Description of Collateral

Collateral primarily include vehicles purchased by retail loan customers and machinery & property in case of SME customers. The financial investments are secured by way of a first ranking pari-passu and charge created by way of hypothecation on the receivables of the other company.

Quantitative Information of Collateral

The Company monitors its exposure to loan portfolio using the Loan To Value (LTV) ratio, which is calculated as the ratio of the gross amount of the loan to the value of the collateral. The value of the collateral for Retail loans is derived by writing down the asset cost at origination by 20% p.a on reducing balance basis. And the value of the collateral of Stage 3 Retail loans is based on the Indian Blue Book value for the particular asset. The value of collateral of SME loans is based on fair market value of the collaterals held.

Gross value of total secured loans to value of collateral:

Rs. in lakhs

Loan To Value	Gross Value of Secured Retail loans		Gross Value of Secured SME loans	
	31 March 2020	31 March 2019	**31 March 2020**	31 March 2019
Upto 50%	**5,77,139.99**	5,27,367.84	**72,323.47**	64,170.17
51 - 70%	**1,042,245.97**	10,13,327.24	**14,520.50**	13,990.99

Rs. in lakhs

31 March 2019	**Maximum exposure to Credit Risk**	**Vehicles**	**Plant and Machinery**	**Land and Building**	**Book Debts, Inventory and other Working Capital items**	**Surplus Collateral**	**Total Collateral**	**Net Exposure**	**Associated ECL**
Retail Loans	383,898.47	269,751.57	–	–	–	(33,156.49)	236,595.08	147,303.39	64,550.72
SME Loans	17,655.41	2,110.00	9,393.69	17,066.17	–	(17,643.57)	10,926.29	6,729.12	6,878.76

50.3 Disclosure as required under RBI notification no. RBI/2019-20/220 DOR.No.BP.BC.63/21.04.048/2019-20 dated 17 April 2020 on COVID-19 Regulatory Package - Asset Classification and Provisioning

Particulars		Rs. in lakhs Amount
i)	Respective amounts in SMA/overdue categories, where the moratorium/deferment was extended	7,62,429.12
ii)	Respective amount where asset classification benefits is extended	83,589.48
iii)	Provisions made during the Q4 - FY2020 #	–
	In respect of accounts in default but standard where moratorium upto 3 months is granted, and asset classification benefit is extended, the Company has made general provisions of not less than 5 per cent of the total outstanding of such accounts as applicable for the quarter ended 31 March 2020 within the overall provision requirement of 10% of the total outstanding to be spread equally over two quarters. Balance general provision of not less than 5% of the total outstanding of such accounts is to be made for the quarter ending 30 June 2020.	
iv)	Provisions adjusted during the respective accounting periods against slippages and the residual provisions	N/A

Since the effective impairment allowance rate (as per ECL model) applied on standard assets outstanding equivalent Stage-1 and Stage-2 assets under Ind AS financial statements is much higher than the prescribed general provision of 5% for the current quarter (out of 10% provision to be spread equally over two quarters), the Company has not made any additional provision under this head in Ind AS financial statements for the quarter and year ended 31 March 2020. However, the Company has made an additional general provision of Rs.4,169.62 lakhs at 5% of the total outstanding for the quarter and year ended 31 March 2020 as per IRAC norms and the same is included in relevant disclosures as applicable to the Company.

50.4 Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established Asset and Liability Management Committee (ALCO) for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

a) Maturity profile of non-derivative financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

There were no transfers between Level 1 and Level 2 during the year.

Valuation methodologies of financial instruments not measured at fair value

Below are the methodologies and assumptions used to determine fair values for the above financial instruments which are not recorded and measured at fair value in the company's financial statements. These fair values were calculated for disclosure purposes only.

Short-term financial assets and liabilities

For financial assets and financial liabilities that have a short-term maturity (less than twelve months), the carrying amounts, which are net of impairment, are a reasonable approximation of their fair value. Such instruments include: cash and balances, trade receivables, balances other than cash and cash equivalents, trade payables and investment & borrowings in commercial papers. Such amounts have been classified as Level 2 on the basis that no adjustments have been made to the balances in the balance sheet.

Loans and advances to customers

The fair values of loans and receivables are calculated using a portfolio-based approach, grouping loans as far as possible into homogenous groups based on similar characteristics. The fair value is then extrapolated to the portfolio using discounted cash flow models that incorporate interest rate estimates considering all significant characteristics of the loans. This fair value is then reduced by impairment allowance which is already calculated incorporating probability of defaults and loss given defaults to arrive at fair value net of risk.

Financial Investments

For Government Securities, the market value of the respective Government Stock as on date of reporting has been considered for fair value computations. And since market quotes are not available in the absence of any trades, the carrying amount of Secured redeemable non-convertible debentures is considered as the fair value.

Issued debt

The fair value of issued debt is estimated by a discounted cash flow model incorporating interest rate estimates from market-observable data such as secondary prices for its traded debt itself.

Deposits from public

The fair value of deposits received from public is estimated by discounting the future cash flows considering the interest rate applicable on the reporting date for that class of deposits segregated by their tenure and cumulative/ non-cumulative scheme.

Except for the above, carrying value of other financial assets/liabilities represent reasonable estimate of fair value.

51 Maturity analysis of assets and liabilities

The table below shows the maturity analysis of assets and liabilities according to when they are expected to be recovered or settled.

Exchange Traded Interest Rate (IR) Derivative

The Company has not entered into any exchange traded derivative.

b) Exchange Traded Interest Rate (IR) Derivatives

The Company is not carrying out any activity of providing Derivative cover to third parties.

c) Disclosures on Risk Exposure in Derivatives

Qualitative Disclosures –

i) The Company undertakes the derivatives transaction to prudently hedge the risk in context of a particular borrowing or to diversify sources of borrowing and to maintain fixed and floating borrowing mix. The Company does not indulge into any derivative trading transactions. The Company reviews, the proposed transaction and outline any considerations associated with the transaction, including identification of the benefits and potential risks (worst case scenarios); an independent analysis of potential savings from the proposed transaction. The Company evaluates all the risks inherent in the transaction viz., counter party risk, Market Risk, Operational Risk, basis risk etc.

ii) Credit risk is controlled by restricting the counterparties that the Company deals with, to those who either have banking relationship with the Company or are internationally renowned or can provide sufficient information. Market/Price risk arising from the fluctuations of interest rates and foreign exchange rates or from other factors shall be closely monitored and controlled. Normally transaction entered for hedging, will run till its life, irrespective of profit or loss. However in case of exceptions it has to be un-winded only with prior approval of M.D/CFO/Treasurer Liquidity risk is controlled by restricting counterparties to those who have adequate facility, sufficient information, and sizable trading capacity and capability to enter into transactions in any markets around the world.

iii) The respective functions of trading, confirmation and settlement should be performed by different personnel. The front office and back-office role is well defined and segregated. All the derivatives transactions is quarterly monitored and reviewed by CFO and Treasurer. All the derivative transactions have to be reported to the board of directors on every quarterly board meetings including their financial positions.

	Funding Concentration pertaining to insignificant instruments/products	48,966.42	0.78%
	Total borrowings under all instruments/products	**59,46,230.55**	**94.83%**

v) Stock Ratios

Sr. no.	Name of the instrument/product	Amount (Rs. in lakhs)	% of total public funds	% of total liabilities	% of total assets
a)	Commercial papers (CPs)	Nil	Nil	Nil	Nil
b)	Non-convertible debentures (NCDs) with original maturity of less than one year	Nil	Nil	Nil	Nil
c)	Other short-term liabilities	2,26,238.34	3.80%	3.61%	3.05%

vi) Institutional set-up for liquidity risk management

The ultimate responsibility for liquidity risk management rests with the Board of directors, which has established Asset and Liability Management Committee (ALCO) for the management of the Company's short, medium and long-term funding and liquidity management requirements. The ALCO meets regularly to review the liquidity position based on future cash flows. The Company manages liquidity risk by continuously monitoring forecast and actual cash flows and by matching the maturity profiles of financial assets and liabilities. The Company also maintains adequate liquid assets, banking facilities and reserve borrowing facilities to hedge against unexpected requirements.

In order to achieve above, the Company also has an Investment Policy to ensure that safety, liquidity and return on the surplus funds are given appropriate weightages and are placed in that order of priority. The Investment Committee frames the strategy, sets the operational parameters and framework within the limits as may be set by the Board for investment. The Committee approaches the Board for revising the limit as and when required. The policy is also reviewed periodically in the background of developments in the money markets and the Investment Committee depending on the external factors proactively to reduce the risk in the investments. A well-defined front and back office mechanism is in place to ensure a system of checks and balances.

Definition of terms as used in the table above:

a) *Significant counterparty:*

A "Significant counterparty" is defined as a single counterparty or group of connected or affiliated counterparties accounting in aggregate for more than 1% of the NBFC's total liabilities.

b) *Significant instrument/product:*

A "Significant instrument/product" is defined as a single instrument/product of group of similar instruments/products which in aggregate amount to more than 1% of the NBFC's total liabilities.

c) *Total liabilities:*

Total liabilities include all external liabilities (other than equity).

d) *Public funds:*

"Public funds" includes funds raised either directly or indirectly through public deposits, inter-corporate deposits, bank finance and all funds received from outside sources such as funds raised by issue of Commercial Papers, debentures etc. but excludes funds raised by issue of instruments compulsorily convertible into equity shares within a period not exceeding 5 years from the date of issue. It includes total borrowings outstanding under all types of instruments/products.

e) *Other short-term liabilities:*

All short-term borrowings other than CPs and NCDs with original maturity less than 12 months.

56 Disclosure as required under RBI notification no. RBI/2019-20/170 DOR (NBFC).CC.PD.No.109/22.10.106/2019-20 dated 13 March 2020 on Implementation of Indian Accounting Standards

i) A comparison between provisions required under extant prudential norms on Income Recognition, Asset Classification and Provisioning (IRACP) and impairment allowances made under Ind AS 109 for the year ended 31 March 2020

Rs. in lakhs

Asset Classification as per RBI Norms	Asset classification as per Ind AS 109	Gross Carrying Amount as per Ind AS	Loss Allowances (Provisions) as required under Ind AS 109	Net Carrying Amount	Provisions required as per IRACP norms	Difference between Ind AS 109 provisions and IRACP norms

Since the total impairment allowances under Ind AS 109 is higher than the total provisioning required under IRACP (including standard asset provisioning) as at 31 March 2020, no amount is required to be transferred to 'Impairment Reserve'. The gross carrying amount of asset as per Ind AS 109 and Loss allowances (Provisions) thereon includes interest accrual on net carrying value of stage - 3 assets as permitted under Ind AS 109. While, the provisions required as per IRACP norms does not include any such interest as interest accrual on NPAs is not permitted under IRACP norms.

The balance in the 'Impairment Reserve' (as and when created) shall not be reckoned for regulatory capital. Further, no withdrawals shall be permitted from this reserve without prior permission from the Department of Supervision, RBI.

ii) In terms of recommendations as per above referred notification, the Company has adopted the same definition of default for accounting purposes as guided by the definition used for regulatory purposes.

As at 31 March 2020, there are no loan accounts that are past due beyond 90 days but not treated as impaired, i.e. all 3+ ageing loan accounts have been classified as Stage-3 and no dispensation is considered in stage-3 classification.

iii) Policy for sales / transfers out of amortized cost business model portfolios

Sale/ transfer of portfolios out of amortized cost business model:

As a short-term financing arrangement, the Company has been transferring or selling certain pools of fixed rate loan receivables backed by underlying assets in the form of tractors, vehicles, equipments etc. by entering in to securitization transactions with the Special Purpose Vehicle Trusts ("SPV Trust") sponsored by Commercial banks for consideration received in cash at the inception of the transaction. As a part of annual budgetary planning and with the objective of better liquidity and risk management, the Company, at the beginning of the year, obtains approval of Asset Liability Committee and Risk Management Committee of the Board of Directors for undertaking securitization transactions of certain value of standard assets comprising the collateral based loan receivables at appropriate times during the year.

These transactions are carried out after complying with RBI guidelines on securitization of standard assets. The consideration received through such securitization transactions is utilized for funding regular vehicle loan disbursements to customers who service their loans through fixed installments over a specified period of loan tenor. Besides using securitization as alternate financing tool, it is also being used as a effective Balance sheet management through better liquidity and risk management by transfer of assets from risk averse to risk takers.

When the assets in the form of loan receivables are sold / transferred to an SPV/Bank through securitization transaction, then on a consolidated portfolio level, such sale/transfer does not change the Company's business objective of holding financial assets to collect contractual cash flows.

The Company remains exposed to credit risk, being the expected losses that will be incurred on the securitized loan portfolio to the extent of the credit enhancement provided. Any increase in losses as compared to the expected loss shall require the Company to present its credit enhancement / cash collateral to help compensate the investors. This is as per the requirement of the Reserve Bank of India. Thus, the Company as per Ind AS 109 has retained substantially all the risks and rewards of ownership of the financial asset.

The Company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset. Accordingly, the securitized financial assets are derecognized from the financial statements prepared as per IRACP norms.

If the Company enters into transactions whereby it transfers assets recognized on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognized.

Accordingly, these financial assets are not de-recognized by the Company from the financial statements prepared under Ind AS. Since the contractual terms of these financial assets give rise to cash flows, that are solely payments of principal and interest, on specified dates, these assets meet the SPPI criterion and are thus continued to be recognized in the books at amortized cost.

57 Events after the reporting date

During the year ended 31 March 2020, the Company along with Mahindra Asset Management Company Private Limited (MAMCPL) and Mahindra Trustee Company Private Limited (MTCPL), wholly-owned subsidiaries of the Company, had entered in to a share subscription agreement and shareholders' agreement to form a 51:49 Joint Venture with Manulife Asset Management (Singapore) Pte. Ltd. (Manulife). Pursuant to these agreements, Manulife was required to make an equity investment aggregating to US $ 35.00 million to acquire 49% of the share capital of MAMCPL & MTCPL.

The transaction was settled on 29 April 2020 in accordance with share subscription and shareholders' agreements to acquire a 49% stake in MIAMCPL and MTCPL by Manulife. The said agreements have also provided for sale of certain number of equity shares of MAMCPL by MMFSL at an agreed valuation within the overall stake divestment of 49% to Manulife. Accordingly, under the sale transaction, 1,47,00,000 equity shares of MAMCPL, equivalent to 7% of the fully paid up equity share capital of MAMCPL, for a consideration of Rs. 2080.10 lakhs (equivalent to USD 2.73 million), have been transferred in dematerialized form to Manulife. This sale transaction has been recorded in the books of accounts on 29 April 2020.

Consequent to the above, the shareholding of the Company in MAMCPL and MTCPL has come down from 100% to 51% of the share capital respectively, and accordingly, MAMCPL and MTCPL will cease to be wholly-owned subsidiaries of the Company but, continue to remain the Company's subsidiaries.

There have been no other events after the reporting date that require disclosure in these financial statements.

INDEPENDENT AUDITOR'S REPORT

To the Members of **Mahindra Insurance Brokers Limited**

Report on the Audit of the Ind AS Financial Statements

1. **Opinion**

We have audited the accompanying Ind AS financial statements of **Mahindra Insurance Brokers Limited** ("the Company"), which comprise the Balance Sheet as at March 31, 2020, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended and notes to the Ind AS financial statements including a summary of significant accounting policies and other explanatory information (hereinafter referred to as "Ind AS financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Companies Act, 2013 ("the Act) in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, its profit, total comprehensive income, changes in equity and its cash flows for the year ended on that date.

2. **Basis for Opinion**

We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on Ind AS financial statements.

3. **Information other than the Ind AS financial statements and Auditor's report thereon**

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Directors Report, Corporate Governance Report and Management Discussion and Analysis, but does not include the Ind AS financial statements and our auditor's report thereon. The Annual Report is expected to be made available to us after the date of our auditor's report.

Our opinion on the Ind AS financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

When we read the other information included in the above reports, if we conclude that there is material misstatement therein, we are required to communicate the matter to those charged with governance and determine the actions under the applicable laws and regulations.

4. **Management's Responsibility for the Ind AS Financial Statements**

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance, total comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Ind AS accounting standards specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015 as amended.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, the Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

5. **Auditor's Responsibilities for the Audit of the Ind AS Financial Statements**

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standards on auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.

As part of an audit in accordance with Standards on auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

i) Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

ii) Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

iii) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

iv) Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

v) Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

6. Emphasis of matter

We draw your attention to Note 33.4 to the Ind AS financial statement which explain the uncertainties and management's assessment of the financial impact due to the lockdown and other restrictions imposed by the Government and condition related to the COVID-19 pandemic situation, for which definitive assessment of the impact would highly depend upon circumstances as they evolve in the subsequent period.

Our opinion is not modified in respect of this matter.

7. Other Matters:

The figures of the Ind AS financial statements for the year ended and as at March 31, 2019 have been audited by another auditor who expressed an unmodified opinion on 18th April 2019.

8. Report on Other Legal and Regulatory Requirements

i) As required by the Companies (Auditor's report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable

ii) As required by section 143 (3) of the Act, based on our audit we report that:

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of Ind AS Financial Statements.

b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

c) The Balance Sheet, Statement of Profit and Loss including Other Comprehensive Income, the Statement of Cash Flow and the Statement of Changes in Equity dealt with by this Report are in agreement with the books of account.

d) In our opinion, the aforesaid Ind AS financial statements comply with the Ind AS specified under section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

e) On the basis of written representations received from the directors as on March 31, 2020, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2020, from being appointed as a director in terms of section 164 (2) of the Act.

f) With respect to the adequacy of the internal financial controls over financial reporting of the

Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B" to this report.

g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended, in our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

   i. The Company has disclosed the impact of pending litigations on the financial position in its Ind AS financial statements – Refer Note 32 to the Ind AS financial statements;

   ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses; and

   iii. There has been no delay in transferring the amount which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE A TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE IND AS FINANCIAL STATEMENTS OF MAHINDRA INSURANCE BROKERS LIMITED

Referred to in paragraph [8(i)] under Report on Other Legal and Regulatory Requirements of our report of even date

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) The fixed assets of the company have been physically verified by the Management, in the phased manner during the year. The company is in the process of reconciling the same with the fixed asset register. The discrepancies if any, arising out of reconciliation will be considered in the books of accounts in the period in which the reconciliation is complete.

(c) According to the information and explanations given to us and on the basis of our examination of the records of the company, there are no immovable properties held in the name of the Company. Accordingly, paragraph 3(i) (c) of the order is not applicable to the Company.

(ii) The company is in the business of providing insurance broking services and does not hold any inventory. Therefore, the provision of paragraph 3(ii) of the said order is not applicable to the Company.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Act. Accordingly, the provisions of paragraph 3(iii) (a) to (c) of the Order are not applicable to the Company and hence not commented upon.

(iv) The Company has not granted any loans or made any investment, or provided any guarantees or security to the parties covered under Section 185. In our opinion, and according to the information and explanations given to us, the company has complied with the provisions of Section 186 of the Companies Act, 2013 in respect of loans and investments made, and guarantees and security provided by it, as applicable.

(v) According to information and explanation given to us the Company has not accepted any deposits within the meaning of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, the provisions of clause 3(v) of the Order are not applicable.

(vi) According to information and explanations given to us by the Company it is not required to maintain cost records as prescribed by the Central Government under section 148 of the Companies Act, 2013. Thus the provisions on this Clause are not applicable to the Company.

(vii) According to the information and explanations given to us, in respect of statutory dues:

a) the Company is generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Employees' State Insurance, Income Tax, Sales Tax, Service Tax, Goods and Services Tax, Value Added Tax, Customs Duty, Excise Duty, Cess and other material statutory dues applicable to it with the appropriate authorities as per the available records as far as ascertained by us on our verification.

b) According to the information and explanations given to us, undisputed dues in respect of provident fund, income-tax, service tax, sales-tax, duty of customs, value added tax, cess and other material statutory dues which were outstanding, at the year end, for a period of more than six months from the date they became payable are as follows:

Name of the statue	Name of the States	Amount (Rs.)	Period to which amount relates	Due Date	Date of Payment
Profession Tax	Gujarat	51,925	F.Y. 2018-2019	various date	Not paid
		55,200	F.Y. 2019-2020		
	Kerala	16,122	F.Y. 2018-2019		Not paid
		46,869	F.Y. 2019-2020		
	Tamil Nadu	32,270	F.Y. 2018-2019		Paid on 6th May 2020
		51,994	F.Y. 2019-2020		
	Punjab	10,800	F.Y. 2018-2019		Paid on 5th May 2020

c) According to the records examined by us and as per the information and explanations given to us, there are no statutory dues outstanding as at March 31, 2020 which have not been deposited on account of disputes except for those stated below:

Name of the statue	Nature of the dues	Amount (Rs.)	Period to which amount relates	Forum where the dispute is pending
Tax Deducted at Source	Interest on TDS	16,50,770	F.Y. 2011-12 to F.Y. 2017-2018	Rectification filed with the AO

(viii) The Company has not taken any loans or borrowings from the financial institution, banks and government, and has not issued and debentures. Accordingly, paragraph 3(viii) of the Order is not applicable to the Company.

(ix) According to the information and explanations given by the management, the Company has not raised any money by way of initial public offer or further public offer (including debt instruments) or term loans and hence reporting under paragraph 3(ix) of the Order is not applicable to the Company.

(x) During the course of our examination of books of accounts and as far as records/details made available and verified by us and according to the information and explanations given to us, two instances of fraud by the employee of the Company (amounting to Rs. 0.64 lakhs which was recovered subsequently by the Company), was reported during the year pertaining to fake policy booking and collection of premium not deposited with the insurance company.

(xi) According to the information and explanations given to us, and based on our verification of records, the Company has paid/provided managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V of the Act.

(xii) In our opinion, the Company is not a Nidhi company. Therefore, the reporting under paragraph 3(xii) of the Order is not applicable to the Company.

(xiii) According to the information and explanations given by the management, transactions with the related parties are in compliance with section 177 and 188 of the Act where applicable and the details have been disclosed in the notes to the Ind AS financial statements, as required by the applicable accounting standards.

(xiv) During the year, the Company has not made any preferential allotment or private placement of shares or fully or partly paid convertible debentures and hence reporting under clause 3 (xiv) of the Order is not applicable to the Company.

(xv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into non-cash transactions with directors or person connected with them. Accordingly, provisions of clause 3 (xv) of the Order are not applicable to the Company.

(xvi) The Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly the provisions of clause 3(xvi) of the Order are not applicable to the Company.

ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE IND AS FINANCIAL STATEMENTS OF MAHINDRA INSURANCE BROKER LIMITED

Referred to in paragraph [8(ii)(f)] under Report on Other Legal and Regulatory Requirements of our report of even date

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

1. We have audited the internal financial controls over financial reporting of **Mahindra Insurance Broker Limited** ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

2. The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India" (ICAI). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

3. Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing as specified under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls and both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

   Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

   We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

4. A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

5. Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

6. In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 31ST MARCH, 2020.

A Company overview

Mahindra Insurance Brokers Limited is a Public Limited Company incorporated and domiciled in India. The Company's registered office is at Mahindra Towers, P. K. Kurne Chowk, Worli, Mumbai - 400 018. The Company is primarily involved in the business of rendering insurance broking services.

The immediate parent Company is Mahindra & Mahindra Financial Services Limited and ultimate parent Company is Mahindra & Mahindra Limited, a company incorporated in Mumbai, India.

B Basis of preparation

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

a. Statement of compliance and basis of preparation

These financial statements have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) notified under Section 133 of the Companies Act, 2013 (the 'Act') and other relevant provisions of the Act.

All the assets and liabilities have been classified as current and non-current as per the Company's normal operating cycle and other criteria set out in the schedule III of the Act. Based on nature of services and the time between the acquisition of the assets for processing and their realisation in cash and cash equivalents, the Company has ascertained its operating cycle as up to twelve months for the purpose of current/non-current classification of assets and liabiities.

The financial statements of the Company for the year ended March 31, 2020 were approved for issue by the Company's Board of Directors on May 08, 2020.

b. Functional and presentation currency

These financial statements are presented in Indian Rupees (INR) which is also the Company's functional currency. All amounts are rounded-off to the nearest lacs, unless otherwise indicated.

c. Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following items:

Items	Measurement basis
– Certain financial assets and liabilities which are generally derivative instruments	Fair value
– Liabilities for cash-settled share-based payment arrangements	Fair value
– Net defined benefit (asset)/liability	Fair value of plan assets less present value of defined benefit obligations

d. Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Company has established policies and procedures with respect to the measurement of fair values. The Chief Financial Officer and person entrusted has overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values, including assessments that these valuations meet the requirements of Ind AS. Significant valuation issues are reported to audit committee.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilties.
- Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: Inputs for the asset ot liability that are not based on observable market data (unobservable inputs).

e. Use of judgements and estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

Assumptions and estimation uncertainties

Following are areas that involved a higher degree of judgement or complexity in determining the carrying amount of some assets and liabilities. Detailed information about each of these estimates and judgements that have a significant risk of resulting in material adjustment in the year ending March 31, 2020 is included in relevant notes.

- Estimation of current tax expense and payable
- Estimated useful life of property, plant and equipments
- Estimated useful life of intangible assets
- Estimation of defined benefit obligation
- Impairment of trade receivables
- Impairment of financial assets
- Estimation of shared based payments

Estimates and judgements are continually evaluated. They are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

C Significant accounting policies

a. Property, plant and equipment :

Recognition and measurement

All the items classified under property plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated cost of dismantling and removing the items and restoring the site on which it is located.

When significant parts of an item of property, plant and equipment have different useful lives, they are depreciated for as separate items (major components) of property, plant and equipment.

Gains or losses on disposal of an item of property, plant and equipment are determined by comparing the proceeds from disposal with the carrying amount of property, plant and equipment, and are recognized net within statement of profit and loss.

Subsequent costs

The cost of replacing a part of an item of property, plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company, and its cost can be measured reliably. The carrying amount of the replaced part is derecognised.

Depreciation

Depreciation is calculated on cost of items of property, plant and equipment less their estimated residual values over their estimated useful lives as specified in the Schedule II of the Act or estimated

STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 31ST MARCH, 2020.

by the management using straight-line method and is generally recognised in the statement of profit and loss except:

i. Motor cars where useful life is estimated at 4 years as against 8 years per Schedule II since the employees to whom these cars have been allotted as part of their terms of employment are entitled to change their vehicles every four years, and

ii. Property Plant & Equipmnets having value individually less than INR 5000 where useful life is estimated at less than one year having regard to the nature of these assets and the difficulty in estimating the useful life.

Further, residual value for all assets is considered Nil having regard to the difficulty in reasonably estimating the same and, in the case of motor cars, having regard to terms of employment under which these are allotted to the employees.

The estimated useful lives of items of property, plant and equipment for the current and comparative periods are as follows:

Class of asset	**Year ended 31 March 2020**	Year ended 31 March 2019
Plant and equipment (including Computers)	**2-6 years**	2-6 years
Office equipments	**5 years**	5 years
Furniture and fixtures	**10 years**	10 years
Leasehold Premises	**Over the period of lease**	Over the period of lease
Vehicles	**4 years**	4 years

Depreciation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. The effect of change in estimate of useful life is accounted on prospective basis

b. Intangible Assets :

Intangible Assets are initially recognised at cost.

Amortisation

Subsequent to initial recognition, intangible assets with indefinite useful lives are carried at cost less accumalated amortisation and accumaltated impairement, if any. Amortisation of intangible assets with finite useful lives is calculated on cost of intangible assets less their estimated residual values over their estimated useful lives using straight-line method and is generally recognised in the statement of profit and loss.

The estimated useful lives for the current and comparative periods are as follows:

Class of asset	**Year ended 31 March 2020**	Year ended 31 March 2019
Computer software	**3 years**	3 years

Amortisation methods, useful lives and residual values are reviewed at each financial year-end and adjusted if appropriate. The effect of change in estimate of useful life is accounted on prospective basis.

Intangible assets under development

The Company capitalizes intangible asset under development in accordance with the accounting policy. Initial capitalization of costs is based on management's judgement that technological and economic feasibility is confirmed.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

c. Impairment of assets other than financial assets :

Impairment of tangible and intangible assets other than goodwill

The Company reviews the carrying amounts of its tangible and intangible assets at the end of each reporting period, to determine whether there is any indication that those assets have impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in statement of profit and loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in statement of profit and loss.

d. Foreign currency :

Transactions in foreign currencies are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at period end exchange rates are generally recognised in statement of profit and loss. They are deferred in equity if they relate to qualifying cash flow hedges.

Foreign exchange differences regarded as an adjustment to borrowing costs are presented in the statement of profit and loss, within finance costs. All other foreign exchange gains and losses are presented in the statement of profit and loss on a net basis within other gains/(losses).

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss.

e. Financial instruments:

Recognition and initial measurement

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 31ST MARCH, 2020.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in statement of profit and loss.

Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at

– Amortised cost;

– fair value through other comprehensive income (FVOCI) - debt investment;

– fair value through other comprehensive income (FVOCI) - equity investment;

– fair value through profit or loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

– the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and

– the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

– the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and

– the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in other comprehensive income (designated as FVOCI - equity investment). This election is made on investment-by-investment basis.

All financial asset not classified as measured at amortised cost or FVOCI as described above are measured at fair value through profit or loss (FVTPL). This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI or at FVTPL if doing so eliminates or significantly reduces accounting mismatch that would otherwise arise.

Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognised in statement of profit and loss and is included in the "Other income" line item.

Investments in equity instruments at FVTOCI

On initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments. This election is not permitted if the equity investment is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified in the statement of profit and loss on disposal of the investments.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.

Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Group irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading (see note above).

Debt instruments that do not meet the amortised cost criteria or FVTOCI criteria (see above) are measured at FVTPL. In addition, debt instruments that meet the amortised cost criteria or the FVTOCI criteria but are designated as at FVTPL are measured at FVTPL.

A financial asset that meets the amortised cost criteria or debt instruments that meet the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Group has not designated any debt instrument as at FVTPL

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'Other income' line item. Dividend on financial assets at FVTPL is recognised when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

Financial assets: Subsequent measurement and gains and losses

Financial assets at amortised cost are susequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain and loss derecognition is recognised in profit or loss.

Debt investment at FVOCI are susequently measured at fair value. Interest income under effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in OCI. On derecognition, gains and losses accumulated in OCI are reclssified to profit or loss.

Equity investment at FVOCI are are susequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to statement of profit and loss.

STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 31ST MARCH, 2020.

Financial assets at FVTPL are susequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in statement of profit and loss.

Financial liabilities and equity instruments:

Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by Company are recognised at the proceeds received. Transaction costs of an equity transaction are recognised as a deduction from equity.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. The dividends on mandatorily redeemable preference shares are recognised in profit or loss as interest expense. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Compound financial instruments

The component parts of compound instruments (convertible notes) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date. Interest related to the financial liability is recognised in profit or loss (unless it qualifies for inclusion in the cost of an asset).

Conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to [share premium/ other equity [describe]]. Where the conversion option remains unexercised at the maturity date of the convertible instrument, the balance recognised in equity will be transferred to [retained profits/ other equity [describe]]. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible notes using the effective interest method.

Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Write-off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write- off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

Impairment of financial instruments

The Company recognises a loss allowance for expected credit losses (ECL) on:

– Financial assets measured at amortised cost;

– Financial assets measured at FVOCI - debt investments;

The Company always recognises lifetime ECL for trade receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Company's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Company recognises lifetime ECL when there has been a significant increase in credit risk since initial recognition. If, on the other hand, the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12 month ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. 12 month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

When determining whether credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without

STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 31ST MARCH, 2020.

undue cost or effort. This includes both quantitative and qualitative information and analysis, including on historical experience and forward-looking information.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.For debt securities at FVOCI, the loss allowance is recognised in OCI and carrying amount of the financial asset is not reduced in the balance sheet.

f. Revenue Recognition :

Revenue is measured at the fair value of the consideration received or receivable. Amount disclosed as revenue are exclusive of GST and net of revenue on policy cancellations and endorsements.

Rendering of services

Brokerage Income, Handling Charges & Broker Retainer Fees is accounted for net of GST amount on rendition of services. Brokerage income is recognized on receiving details of the policy issued by the insurance company or receipt of brokerage whichever is earlier. The Company recognises revenue from rendering of consultancy services in proportion to the stage of completion of the transaction at the reporting date. The stage of completion is assessed based on surveys of work performed.

Dividend and interest income

Dividends are recognised in the statement of profit and loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company, and the amount of the dividend can be measured reliably.

Interest income is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

g. Employee benefits:

Superannuation Fund, ESIC and Labour Welfare Fund

The Company's contribution paid/payable during the year to Superannuation Fund, ESIC and Labour Welfare Fund are recognised in statement of profit and loss.

Provident Fund

Contributions to Provident Fund are charged to the statement of profit and loss as incurred. The Company is liable for the contribution and any shortfall in interest between the amount of interest realised by the investments and the interest payable to the members at the rate declared by the Government of India.

Gratuity

The liability or asset recognised in the balance sheet in respect of defined benefit pension and gratuity plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Defined contribution plans

Obligations for contributions to defined contribution plans are expensed as the related service is provided. Prepaid contributions are recognised as an asset to the extent that a cash refund or a reduction in future payments is available.

Compensated Absences

The Company has a policy on compensated absences which are both accumulating and non-accumulating in nature. The expected cost of accumulating compensated absences is determined by acturial valuation performed by an independent actuary at each balance sheet date using projected unit credit method on the additional amount expected to be paid or availed as a result of the unused entitllement that has accumulated at the balance sheet date. Expense on non accumulating compensated absences is recognised in the period in which the absences occur.

Cash settled share based payments

Cash Settled Share Based Payments, the fair value of the amount payable to employees is recognized as 'employee benefit expenses with corresponding increase in liabilities, over the period of non market vesting conditions getting fulfilled. The fair value of the option at the grant date is calculated by an independent valuer basis Black Scholes model. The Liability is remeasured at each reporting period up to, and including the settlement date, with changes in fair value recognized in employee benefit expenses.

h. Taxation:

Income tax expense comprises current tax and deferred tax. It is recognised in the statement of profit and loss except to the extent that it relates to a business combination or to an item recognised directly in equity or in other comprehensive income.

Current tax

Current tax comprises expected tax payable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts and it is entended to realise the asset and settle the liability on a net basis or simultaneously.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year

Current and deferred tax are recognised in the statement of profit and loss, except when they relate to items that are recognised

STATEMENT OF ACCOUNTING POLICIES FOR THE YEAR ENDED 31ST MARCH, 2020.

in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Minimum Alternate Tax (MAT)

Deferred tax assets include Minimum Alternative Tax (MAT) paid in accordance with the tax laws in India, which is likely to give future economic benefits in the form of availability of set off against future income tax liability. Accordingly, MAT is recognised as deferred tax asset in the balance sheet when the asset can be measured reliably, and it is probable that the future economic benefit associated with asset will be realised. Current and deferred tax expense is recognised in the Statement of Profit and Loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

i. Provisions, Contingent Liabilities and Contingent Assets :

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised as finance cost.

A present obligation that arises from past events, where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made, is disclosed as a contingent liability.Contingent liabilities are also disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company. Claims against the Company, where the possibility of any outflow of resources in settlement is remote, are not disclosed as contingent liabilities

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

j. Leasing :

The company has applied Ind AS 116 using the modified retrospective approach.

As a Lessee

The company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. The estimated useful lives of right-of-use assets are determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the company's estimate of the amount expected to be payable under a residual value guarantee, or if company changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The company presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'other financial liabilities' in the statement of financial position. (Refer Schedule nos. 14 and 21)

k. Segment Reporting

Operating Segments are reported consistently with the internal reporting provided to the Managing Director. The highest decision making executive is reposnsible for allocating resources to and assessing the performance of the operating segments. The highest decision making body is Managing Director.

l. Earnings per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, sub-division of shares etc. that have changed the number of equity shares outstanding, without corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average numbers of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

m. Coronavirus (COVID-19) pandemic impact

The ongoing COVID-19 pandemic has increased the estimation uncertainty in the preparation of these Financial Statements. The estimation uncertainty is associated with: - the extent and duration of the disruption to business arising from the actions by governments, businesses and consumers to contain the spread of the virus; - the extent and duration of the expected economic downturn (and forecasts for key economic factors including, agriculture, manufacturing, GDP and employment). This includes the disruption to suspended manufacturing operations, liquidity concerns, increasing unemployment, reductions in production because of decreased demand, and other restructuring activities; and - the effectiveness of government and Reserve Bank of India measures that have and will be put in place to support businesses and consumers through this disruption and economic downturn. The Company has developed various accounting estimates in these Financial Statements based on forecasts of economic conditions which reflect expectations and assumptions as at 31 March 2020 about future events that the management believe are reasonable in the circumstances. There is a considerable degree of judgement involved in preparing forecasts. The underlying assumptions are also subject to uncertainties which are often outside the control of the Company. Accordingly, actual economic conditions can be different from those forecasted and the effect of those differences may impact accounting estimates included in these financial statements. The significant accounting estimates impacted by these forecasts and associated uncertainties are predominantly related to expected business slowdown. The impact of the COVID-19 pandemic on these accounting estimates is mentioned relevantly in the respective disclosures to these Financial Statements.

Earnings per share - Basic	**51.76**	69.35

Diluted earnings per share

The diluted earnings per share has been computed by dividing the Net profit after tax available for Equity shareholders by the weighted average number of equity shares, after giving dilutive effect of the outstanding Warrants, Stock options and Convertible bonds for the respective periods, if any.

₹ in Lakhs

	For the year ended 31 March 2020	For the year ended 31 March 2019
Profit / (loss) for the year used in the calculation of basic earnings per share	**5,336.19**	7,149.39
Add: Adjustments, if any	**–**	–
Profit / (loss) for the year used in the calculation of diluted earnings per share	**5,336.19**	7,149.39
Profits used in the calculation of diluted earnings per share	**5,336.19**	7,149.39

The weighted average number of ordinary shares for the purpose of diluted earnings per share reconciles to the weighted average number of ordinary shares used in the calculation of basic earnings per share as follows:

	For the year ended 31 March 2020	For the year ended 31 March 2019
Weighted average number of equity shares used in the calculation of Basic EPS	**1,03,09,280**	1,03,09,280

Note No. 22 - Issue of Bonus Shares

During the year ended 31 March 2019, the bonus issue in the proporiton of 3:1 i. e. three bonus shares of Rs. 10 each for every one fully paid up equity share held had been approved by the shareholders of the company on July 18, 2018. For this purpose, July 18, 2018 was considered as the record date. Consequently on August 13, 2018, the company allotted 77,31,960 shares and Rs. 773.20 lakhs have been transferred from retained earnings to share capital in the year 2018-19.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Note No. 23 - Financial Instruments

Capital management

The company's capital management objectives are:

– to ensure the company's ability to continue as a going concern

– to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position. The Company is subject to minimum capital requirements as stipulated by the IRDAI (Insurance Brokers) Regulations, 2018.

The company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

CREDIT RISK

(i) Credit risk management

Credit risk arises when a counterparty defaults on its contractual obligations to pay resulting in financial loss to the Company.

Trade receivables consist of institutional customers, largely insurance companies. The Company deals only with those insurance companies who have obtained an acceptable level of credit rating. The Company does not have significant credit risk exposure to any single external counterparty. Out of total outstanding 22% of the debtors are pertaining to group companies.

The credit risk on liquid funds invested in Fixed Deposits with companies and Intercorporate Deposits is limited because the counterparties are group companies.

The Company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the expected loss provision for all trade receivables. The company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company and individual receivable specific provision where applicable. Forward-looking information (including macroeconomic information) has been incorporated into the determination of expected credit losses.

There is no change in estimation techniques or significant assumptions during the reporting period.

The loss allowance provision is determined as follows:

As at 31 March 2020

	Not due	**Less than 6 months past due**	**More than 6 months past due**	**Total**
Gross carrying amount		**5,482.16**	**388.82**	**5,870.98**
Loss allowance provision		**17.19**	**174.02**	**191.21**
		5,464.97	**214.80**	**5,679.77**

As at 31 March 2019

	Not due	Less than 6 months past due	More than 6 months past due	Total

Impairment losses recognised in the year based on 12 month expected credit losses		
– On receivables originated in the year		
Balance at end of the year	**191.21**	109.75

The loss allowance provision has changed during the period due to delays in recovery of brokerage on insurance contracts brokered.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Note No. 23 - Financial Instruments (Cont)

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

₹ in Lakhs

Particulars	Less than 1 Year	1-3 Years	3 Years to 5 Years	5 years and above

Total	**4,596.95**	**–**	**–**	**–**

(iii) Financing arrangements

The Company does not feel the need to have any borrowing facilities at this stage

(iv) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Fixed interest rate instruments	–	60.00	–	–
Total	**1,478.10**	**164.34**	**–**	**–**

MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company invests in fixed rate instruments taking into account the current liquidity requirements. All such transactions are carried out within the guidelines set by the Board of Directors.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

Currency Risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's / Company's exposure to currency risk relates primarily to the Company's operating activities in reinsurance broking when transactions are denominated in a different currency from the Company's functional currency.

The Company mitigates its foreign currency risk by entering into reinsurance contracts wherein the risk is to the account of the cedant insurers or the reinsurers.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

Particulars	Currency	31-Mar-20	31-Mar-19
Trade Receivables	USD	–	–
	EUR	–	–
	GBP	–	–
Trade Payables	USD	–	–
	EUR	–	–
	GBP	–	–

Foreign Currency Sensitivity

In management's opinion, any sensitivity analysis is not representative of the inherent foreign exchange risk because the exposure is to the account of the cedant insurer or reinsurer.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Company manages its interest rate risk by having a balanced portfolio of long-term as well as short-term fixed deposits with companies as well as intercorporate deposits.

Interest rate sensitivity

The sensitivity analyses below have been determined based on exposure to interest rate for non-derivative instruments at the end of reporting period.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans given and investments in fixed deposits effected. With all other variables held constant, the Company's profit before tax is affected through the impact on fixed rate investments and interest bearing loans as follows:

₹ in Lakhs

	Currency	Increase/ decrease in basis points	Effect on profit before tax
31-Mar-20	**INR**	**+50**	**190.00**
	INR	**-50**	**(190.00)**
31-Mar-19	INR	+50	159.38
	INR	-50	(159.38)

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment, showing a significantly higher volatility than in prior years.

Total	–	4,596.95	–	4,596.95

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Note No. 24 - Fair Value Measurement (Cont)

The fair values of the financial assets and financial liabilities included in the level 2 categories above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties. In the opinion of the management, the difference between the carrying value of the above stated financial assets and liabilities is not materially different from their fair value. Accordingly, the fair value and carrying amount are the same.

Note No. 25 - Employee benefits

(a) Defined Contribution Plan

The Company's contribution to Provident Fund and Superannuation Fund aggregating ₹ 426.93 lakhs (31 March 2019 : ₹ 333.42 lakhs) has been recognised in the Statement of Profit or Loss under the head Employee Benefits Expense.

(b) Defined Benefit Plans:

Gratuity

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. The Company makes annual contribution to the group gratuity scheme administered by the Life Insurance Corporation of India through its Gratuity Trust Fund.

Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility

The plan liabilities are calculated using a discount rate set with references to government bond yields; if plan assets under perform compared to the government bonds discount rate, this will create or increase a deficit. The defined benefit plans hold a significant proportion of equity type assets, which are expected to outperform government bonds in the long-term while providing volatility and risk in the short-term.

As the plans mature, the Company intends to reduce the level of investment risk by investing more in assets that better match the liabilities.

However, the Company believes that due to the long-term nature of the plan liabilities and the strength of the supporting group, a level of continuing equity type investments is an appropriate element of the Company's long term strategy to manage the plans efficiently.

Changes in bond yields

A decrease in government bond yields will increase plan liabilities, although this is expected to be partially offset by an increase in the value of the plans' bond holdings and interest rate hedging instruments.

Inflation risk

Some of the Company's pension obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect the plan against extreme inflation). The plans hold a significant proportion of assets in index linked gilts, together with other inflation hedging instruments and also assets which are more loosely correlated with inflation. However an increase in inflation will also increase the deficit to some degree.

Life expectancy

The majority of the plan's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan's liabilities. This is particularly significant in the Company's defined benefit plans, where inflationary increases result in higher sensitivity to changes in life expectancy.

Leave Encashment

The Company has a policy on compensated absences which are both accumulating and non-accumulating in nature. The expected cost of accumulating compensated absences is determined by acturial valuation performed by an independent actuary at each balance sheet date using projected unit credit method on the additional amount expected to be paid or availed as a result of the unused entitllement that has accumulated at the balance sheet date. Expense on non accumulating compensated absences is recognised in the period in which the absences occur.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

	Valuation as at		
	31-Mar-20	**31-Mar-19**	**31-Mar-18**
Discount rate(s)	**6.41%**	7.67%	7.46%
Expected rate(s) of salary increase	**7%**	7%	7%
Attrition Rate	**Attrition rate of 25% up to the age of 30, 12% up to age of 44 and 9% thereafter**	Attrition rate of 20% up to the age of 35, 9% up to age of 45 and 3% thereafter	Attrition rate of 23% up to the age of 35, 11% up to age of 45 and 10% thereafter

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Note No. 25 - Employee benefits (Cont)

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

₹ in Lakhs

Principal assumption		Changes in assumption	Impact on defined benefit obligation (Gratuity)	
			Increase in assumption	Decrease in assumption
Discount rate	**2020**	**1**	**(78.01)**	**84.71**
	2019	1	(106.50)	130.20
Salary growth rate	**2020**	**1**	**83.34**	**(78.28)**
	2019	1	129.84	(108.00)
Life expectancy	**2020**	**+/- 1 year**	**Negligible**	**Negligible**
	2019	+/- 1 year	Negligible	Negligible

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

₹ in Lakhs

Principal assumption		Changes in assumption	Impact on defined benefit obligation (Leave Encashment)	
			Increase in assumption	Decrease in assumption
Discount rate	**2020**	**1**	**(58.12)**	**66.42**
	2019	1	(141.00)	39.90
Salary growth rate	**2020**	**1**	**65.38**	**(58.33)**
	2019	1	39.56	(142.13)
Life expectancy	**2020**	**+/- 1 year**	**Negligible**	**Negligible**
	2019	+/- 1 year	Negligible	Negligible

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

The Company expects to contribute Rs. 100 lakhs to the gratuity trusts during the next financial year of 2020.

Maturity profile of defined benefit obligation:

₹ in Lakhs

Gratuity	2020	2019
Within 1 year	**192.10**	141.48
1 - 2 year	**193.14**	139.07
2 - 3 year	**240.17**	121.56
3 - 4 year	**260.79**	160.57
4 - 5 year	**286.71**	155.87

₹ in Lakhs

Leave Encashment	2020	2019
Within 1 year	**101.58**	97.77
1 - 2 year	**101.98**	88.97
2 - 3 year	**109.38**	82.92
3 - 4 year	**112.44**	88.29
4 - 5 year	**116.04**	79.02

The Company's policy is driven by considerations of maximizing returns while ensuring credit quality of the debt instruments. The asset allocation for plan assets is determined based on investment criteria prescribed under the Indian Income Tax Act, 1961, and is also subject to other exposure limitations. The Company evaluates the risks, transaction costs and liquidity for potential investments. To measure plan asset performance, the Company compares actual returns for each asset category with published benchmarks.

VIII. Experience Adjustments:	Year Ended 2020	2019	2018	2017	2016
	Gratuity				
1. Defined Benefit Obligation	**1,089.09**	715.12	563.39	292.76	190.82
2. Fair value of plan assets	**466.12**	392.35	343.42	296.21	198.07
3. Surplus/(Deficit)	**622.97**	322.77	219.97	(3.45)	(7.25)
4. Experience adjustment on plan liabilities [(Gain)/Loss]	**266.85**	36.38	178.81	51.64	(51.67)
5. Experience adjustment on plan assets [Gain/(Loss)]	**(30.09)**	(25.62)	(21.80)	(15.85)	2.85

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation.

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The current service cost and the net interest expense for the year are included in the employee benefits expense in profit or loss of the expense for the year.

Note No. 26 - Segment information

The Company has determined the operating segment based of structure of reports reviewed by the Strategic Management Council. For management purposes, the Company is organised into a single business unit and has only one reportable segment namely "Insurance Broking services". The geographical segment is based on the location of client, whether in India or outside India. The Strategic Management Council of the Company monitors the operating results of its business unit for the purpose of making decisions about resource allocation and performance assessment.

₹ in Lakhs

Geographic information	Year Ended 31 March 2020	Year Ended 31 March 2019
Revenue from external customers		
India	**30,482.75**	29,798.43
Outside India	**–**	–
Total revenue per statement of profit or loss	**30,482.75**	29,798.43

All Non-current operating assets comprising property, plant and equipment, investment properties and intangible assets, if any are located in India.

Revenue from major products and services

The following is an analysis of the Company's revenue from continuing operations from its major products and services:

₹ in Lakhs

	Year Ended 31 March 2020	Year Ended 31 March 2019
Insurance Broking and auxillary activities	**30,482.75**	29,798.43
Total	**30,482.75**	29,798.43

Revenues from transactions with a single external customer amounts to 10% or more of the entity's revenues.

Note No 28: Employees Share Based Payments (Employees Phantom Stock Option Plan 2019)

On January 18, 2019, Board of Directors approved the MIBL Employees Phantom Stock Option Plan 2019 (MIBL EPSOP 2019) for grant of stock options to the employees, within the meaning of the MIBL-EPSOP 2019 plan. The specific employees to whom the options would be granted and their eligibility criteria shall be determined by the Nomination and Remuneration Committee of the Board (Committee) from time to time on the basis of one or more factors including but not limited to longevity, total experience and role of the Employee. The options granted under EPSOP 2019 would vest after 1 (one) year but not later than the maximum vesting Period of 4 (four) years from the grant date of such options.

The Committee has prescribe the vesting schedule of the options granted under the plan, unless otherwise decided in exceptional cases like retirements:

Vesting Dates	**Vesting Percentage**
1st Anniversary from date of Grant	25% of Options granted
2nd Anniversary from date of Grant	25% of Options granted
3rd Anniversary from date of Grant	25% of Options granted
4th Anniversary from date of Grant	25% of Options granted

The Company will process vested options for settlement at each vesting date and determines appreciation in respect of all such Options with reference to Fair Market Value prevailing as on date of Vesting calculated as prescribed by MIBL EPSOP 2019. The Company recognises the fair value of the liability and expense for these plans over the vesting period based on the management's estimate of the vesting and forfeiture conditions.

Employees Phantom Stock Option Plan outstanding as at March 31, 2020

Grant date	Exercise Price	Total Options granted	Options vested and Exercisable	Options unvested	Options exercised	Options cancelled	Options outstanding
Grant I	10.00	3,02,326.00	73,965.00	2,28,361.00	73,965.00	9,646.00	2,18,715.00
Grant II	10.00	4,905.00	4,905.00	–	4,905.00	–	–
Grant III	10.00	9,070.00	–	9,070.00	–	–	9,070.00

Movement of Phantom stock options during the year

Total for all grants	**No. of Options**	**Range of exercise prices Rs.**	**Weighted average exercise price Rs.**	**Weighted average remaining contractual life (Years)**
Outstanding at the beginning of the year	3,05,381			NA
Granted during the year	9,070			2.00
Forfeited/ Lapsed during the year	7,796	10.00	10.00	NA
Exercised during the year	78,870			NA
Outstanding at the end of the year	2,27,785			2.00
Exercisable at the end of the year	0			NA

Significant assumptions used to estimate the fair value of options granted during the year.

Variables	
1. Risk Free Interest Rate	5.73
2. Expected Life	1.86
3. Expected Volatility	15.80
4. Dividend Yield	0.90
5. Price of the underlying share in market at the time of the option grant (Rs.)	2002

Total Expenses recognised for the year ended on 31st March 2020

The total expense recognised from share-based payment transactions for the year ended on 31 March 2020 is Rs. 2,797.99 lakhs (31 March 2019: Rs. 305.60 lakhs)

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Note No 28: Employees Share Based Payments (Employees Phantom Stock Option Plan 2019) (Cont)

Annex 2

Requirements under Companies Act, 2013

Summary of Status of EPSOPs Granted

The position of the existing schemes is summarized as under -

Sr. No.	Particulars	Employees Phantom Stock Option Plan 2019
I. Details of the EPSOPS		
1.	Date of Shareholder's Approval	18-Jan-19
2.	Total Number of Options approved	5,15,464
3.	Vesting Requirements	As per vesting schedule
4.	ExercisePrice or Pricing formula (Rs.)	₹ 10.00
5.	Maximum term of Options granted (years)	4 years
6.	Source of shares	
7.	Variation in terms of ESOP	N.A
II. Option Movement during the year		
1.	No. of Options Outstanding at the beginning of the year	305,381
2.	Options Granted during the year	9,070
3.	Options Forfeited	7,796
4.	Options Lapsed during the year	0
5.	Options Vested during the year	78,870
6.	Options Exercised during the year	78,870
7.	Total number of shares arising as a result of exercise of options	0
8.	Money realised by exercise of options (Rs.)	0
9.	Number of options Outstanding at the end of the year	227,785
10.	Number of Options exercisable at the end of the year	0

III. Weighted average exercise price of Options granted during the year whose

(a)	Exercise price equals market price	NA	
(b)	Exercise price is greater than market price	NA	
(c)	Exercise price is less than market price		10.00

Weighted average fair value of options granted during the year whose

(a)	Exercise price equals market price	NA	
(b)	Exercise price is greater than market price	NA	
(c)	Exercise price is less than market price		1,959.89

The weighted average market price of options exercised during the year

No Options Exercised during the year

IV. Employee-wise details of options granted during the financial year 2019-20 to:

(i) Senior managerial personnel :

Name	No. of options granted
	–
	–
	–

(ii) Employees who were granted, during the year, options amounting to 5% or more of the options granted during the year

Name	No. of options granted
SWATI KHADYE	2,653
GAYATRI PRABHU	2,651
KUNAL JHAVERI	1,823
DEBASHISH ROY	1,943

(iii) Identified employees who were granted option, during the year equal to or exceeding 1% of the issued capital (excluding outstanding warrants and conversions) of the company at the time of grant.

Name	No. of options granted
Not Applicable	NIL

V. Method and Assumptions used to estimate the fair value of options granted during the year:

The fair value has been calculated using the Black Scholes Option Pricing model

The Assumptions used in the model are as follows:

Date of grant	Particulars
1. Risk Free Interest Rate	5.73
2. Expected Life	1.86
3. Expected Volatility	15.80
4. Dividend Yield	0.90
5. Price of the underlying share in market at the time of the option grant (Rs.)	2,002.00

Assumptions:

Stock Price: Closing price on National Stock Exchange on the date of grant has been considered

Volatility: The historical volatility over the expected life has been considered to calculate the fair value.

Risk-free rate of return: The risk-free interest rate being considered for the calculation is the interest rate applicable for a maturity equal to the expected life of the options based on the zero-coupon yield curve for Government Securities.

Exercise Price: Exercise Price of each specific grant has been considered.

Time to Maturity: Time to Maturity/Expected Life of options is the period for which the Company expects the options to be live.

Expected divided yield: Expected dividend yield has been calculated as an average of dividend yields for five financial years preceding the date of the grant.

VI	Diluted Earnings Per Share pursuant to issue of shares on exercise of options calculated in accordance with Accounting Standard (AS) 20	Not Applicable

C. Reconciliation of revenue from contract with customer

₹ in Lakhs

Particulars	31-Mar-20	31-Mar-19
Revenue from contract with customer as per the contract price	**30,482.75**	29,798.43
Adjustments made to contract price on account of :-		
a) Discounts/Rebates/Incentives	–	–
b) Sales Returns/Reversals	–	–
c) Deferrment of revenue	–	–
d) Changes in estimates of variable consideration	–	–
e) Recognition of revenue from contract liability out of opening balance of contract liability	–	–
f) Any other adjustments	–	–
Revenue from contract with customer as per the statement of Profit and Loss	**30,482.75**	29,798.43

D. Revenue to be recognised for performance obligation(s) not satisfied or partially satisfied at the end of the current year in respect of contracts with customer that are in place (i.e. signed agreements/ Pos/Wos/SOWs, etc) at the end of reporting period.

The company has reviewed the contract with insurers and customers and indentified claims handling services as an area that is affected by the new accounting standard. The application of new standard results in the indentifiaction of separate performance obligation for handling claims on behalf of customers as part of insurance brokerage customary business practice. The new standard requires the deferral of revenue recognition untill the performance obligation is satisifed. Based on the results of the review, the company does not expect a material imapct on the statement of profit and loss.

E. Break-up of Provision for Expected Credit Losses recognised in P&L

33.4 Note on COVID 19

The impact of the COVID-19 pandemic on the Indian economy and the Company remains uncertain. The severity of its impact will depend on its spread and duration, customer responses and the response of governments and regulators like the Insurance Regulatory and Development Authority of India. There has been a modest stress on the business portfolio of the Company as at the year end majorly due to the nationwide lockdown announced by the government. The Company anticipates that the lockdown shall continue to be in force for a substantive period in quarter 1 of next financial year also. Owing to the uncertainty surrounding the same, the stress on the business portfolio can be continued in quarter 1 of the next financial year as well. Temporary decline in business volumes can be anticipated but as the situation recovers and there are relaxations in the lockdowns in the quarters to come, the business volumes are expected to gradually return to normal.

Any changes made to ECL to estimate the overall impact of Covid-2019 will be subject to very high levels of uncertainty as so little reasonable and supportable forward-looking information is currently available on which to base those changes. Any changes to the ECL model at this stage, hence, could lead to the risk of the Company recognizing inappropriate levels of ECL. Hence there are no material changes in the policies and behavioral lifetime estimates in the ECL Model for the year ended March 31, 2020.

Note No. 34 - Previous year figures

- Previous year figures have been regrouped /reclassified wherever found necessary.

The financial statements of Mahindra Insurance Brokers Limited were approved by the Board of Directors and authorised for issue on May 08, 2020.

INDEPENDENT AUDITORS' REPORT

To the Members of **Mahindra Rural Housing Finance Limited**

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Mahindra Rural Housing Finance Limited ("the Company"), which comprise the balance sheet as at 31 March 2020, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements give the information required by the Companies Act, 2013 (the "Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2020, and profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Standalone Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Financial Statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter

As described in Note 45(ii)(a) to the financial statements, in respect of accounts overdue but standard as on 29 February 2020 where moratorium benefit has been granted, the staging of those accounts as on 31 March 2020 is based on the days past due status as on 29 February 2020 in accordance with the Reserve Bank of India COVID-19 Regulatory Package. Further, as described in Note 45(ii)(b) to the financial statements, the extent to which the COVID-19 pandemic will impact the Company's financial performance is dependent on future developments, which are highly uncertain. Our opinion is not modified in respect of the above matters.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the Financial Statements of the current year. These matters were addressed in the context of our audit of the Financial Statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Description of Key Audit Matter

Impairment Loss Allowance

Refer note 2.5(ii) and 45(ii) to the Financial Statements

The key audit matter	How the matter was addressed in our audit
The Company has recognized impairment loss allowance of Rs. 57,760.77 lakhs as at 31 March 2020 and has recognized an expense for Rs. 21,168.11 lakhs in its statement of profit and loss. The determination of impairment loss allowance is inherently judgmental and relies on managements' best estimate due to the following: • Increased level of data inputs for capturing the historical data to calculate the Probability of Default ('PDs') and Loss Given Default ('LGD') and the completeness and accuracy of that data. • Use of management overlays for considering the probability weighted scenarios, the forward looking macro-economic factors, economic environment and the timing of cash flows. • Criteria selected to identify significant increase in credit risk, particularly in respect of moratorium benefit given to eligible borrowers, as per the Company's board approved policy, read with the RBI COVID-19 regulatory package.	We performed the following key audit procedures: • Performed process walkthroughs to identify the key systems, applications and controls used in the impairment allowance processes. • Assessed the design and implementation of controls in respect of the Company's impairment allowance process such as the timely recognition of impairment loss, the completeness and accuracy of reports used in the impairment allowance process and management review processes over the calculation of impairment allowance and the related disclosures on credit risk management. • Obtained understanding of management's revised processes, systems and controls implemented in relation to impairment allowance process, particularly in view of staging freeze as on 29 February 2020 as per board approved policy read with RBI COVID-19 regulatory package.

The key audit matter	How the matter was addressed in our audit
• In relation to COVID-19 pandemic, judgements and assumptions include the extent and duration of the pandemic, the impacts of actions of governments and other authorities, and the responses of businesses and consumers in different industries, along with the associated impact on the global economy. The underlying forecasts and assumptions used in the estimates of impairment loss allowance are subject to uncertainties which are often outside the control of the Company. The extent to which the COVID-19 pandemic will impact the Company's current estimate of impairment loss allowances is dependent on future developments, which are highly uncertain at this point. Given the size of loan portfolio relative to the balance sheet and the impact of impairment allowance on the financial statements, we have considered this as a key audit matter. The financial statements of the Company have been prepared on a going concern basis. Management's assessment of going concern is based on its evaluation of relevant conditions and events that may raise substantial doubt about the Company's ability to continue as a going concern. The following considerations are covered by management: • Current financial condition, including liquidity sources; • Fixed obligations due or anticipated within one year; • Consideration of various risks viz., liquidity risk, credit risk, market risk and operational risk; • Impact of COVID-19 and related uncertainties on the Company's performance. Significant management judgement is involved in assessing the ability of the Company to meet its financial obligations and manage its liquidity position as part of management's assessment of the going concern assumption used in the preparation of the financial statements. As such, we determined this to be a key audit matter.	• Tested the relevant general IT and applications controls over key systems used in the impairment allowance processes. • Evaluated whether the methodology applied by the Company is compliant with the requirements of the relevant accounting standards and confirmed that the calculations are performed in accordance with the approved methodology, including checking mathematical accuracy of the workings. • Tested the periods considered for capturing underlying data as base to PD and LGD calculations are in line with Company's recent experience of past observed periods. • Tested the accuracy of the key inputs used in the calculation and independently evaluated the reasonableness of the assumptions made. • Challenged completeness and validity of management overlays, particularly in response to COVID-19 with assistance of our financial risk modelling experts by critically evaluating the risks that have been addressed by management through overlays and also considering whether there are other risks not captured which require additional overlays. We also tested management's workings supporting the overlay quantum. • Assessed whether the disclosures on key judgements, assumptions and quantitative data with respect to impairment loss allowance in the financial statements are appropriate and sufficient. We performed the following key audit procedures: • Evaluated management's assessment of the Company's ability to continue as a going concern by performing an analysis of cash flow forecasts for a period of one year and assessed the reasonableness of assumptions used in developing these forecasts. • Performed stress tests on key assumptions used, including cash inflows expected in the next 12 months, given the moratorium benefit offered to its customers and the uncertainty over the impact of COVID-19 pandemic. • Read the minutes of meetings of the Asset Liability Committee and minutes of the meetings of the Board of Directors for identifying any areas of impact on the asset-liability position. • Reviewed the asset-liability position as at 31 March 2020 prepared by the Company. • Evaluated management's plans for raising additional funding and verified the sanction letters for unused lines of credit. • Enquired whether there were any communications from lenders impacting the unused committed lines of credit. • Assessed the adequacy of the disclosures in the notes to the financial statements.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Financial Statements that give a true and fair view of the state of affairs, profit and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Financial Statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls with reference to Financial Statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Financial Statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

(A) As required by Section 143(3) of the Act, we report that:

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books;

c) The balance sheet, the statement of profit and loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows dealt with by this Report are in agreement with the books of account;

d) In our opinion, the aforesaid Financial Statements comply with the Ind AS specified under section 133 of the Act;

e) On the basis of the written representations received from the directors as on 31 March 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2020 from being appointed as a director in terms of Section 164(2) of the Act.

f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

(B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations as at 31 March 2020 on its financial position in its Financial Statements - Refer Note 37 to the Financial Statements;

ii. The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts. The Company has not entered into derivative contracts during the year - Refer Note 39 to the Financial Statements;

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

(C) With respect to the matter to be included in the Auditors' Report under section 197(16):

In our opinion and according to the information and explanations given to us, the remuneration paid by the Company to its directors during the current year is in accordance with the provisions of Section 197 of the Act. The remuneration paid to any director is not in excess of the limit laid down under Section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

Annexure A to the Independent Auditor's Report - 31 March 2020

The Annexure referred to in Independent Auditor's Report to the members of the Company on the financial statements for the year ended 31 March 2020, we report that:

i. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) The fixed assets are physically verified by the management according to a programme of phased verification, which in our opinion is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the programme, the fixed assets have been physically verified by management during the year and no material discrepancies were noticed on such verification.

(c) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties are held in the name of the Company.

ii. The Company is in the business of providing Housing Finance Services and consequently, does not hold any inventory. Accordingly, paragraph 3(ii) of the Order is not applicable to the Company.

iii. According to the information and explanations given to us and based on the audit procedures conducted by us, the Company has not granted any loans, secured or unsecured to companies, firms, limited liability partnerships or other parties covered in the register maintained under section 189 of the Act. Accordingly, paragraph 3(iii) of the Order is not applicable to the Company.

iv. In our opinion and according to the information and explanations given to us, there are no loans, investments, guarantees and securities granted in respect of which provisions of section 185 and 186 of the Companies act, 2013 are applicable. Accordingly, paragraph 3(iv) of the Order is not applicable to the Company.

v. According to the information and explanations given to us and based on the examination of records, the Company has not accepted any deposits from the public within the meaning of sections 73, 74, 75 and 76 of the Act and Rules framed thereunder to the extent notified. Accordingly, paragraph 3(v) of the Order is not applicable to the Company.

vi. According to the information and explanations given to us, the Central Government has not prescribed the maintenance of cost records under section 148(1) of the Act, for any activities conducted/ services rendered by the Company. Accordingly, paragraph 3(vi) of the Order is not applicable to the Company.

vii. (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted / accrued in the books of account in respect of undisputed statutory dues including provident fund, employees' state insurance, income-tax, goods and service tax, cess and other material statutory dues have generally been regularly deposited during the year by the Company with the appropriate authorities. As explained to us, the Company does not have any dues on account of sales tax, duty of customs, duty of excise, value added tax and service tax. According to the information and explanations given to us and on the basis of our examination of the records of the Company, no undisputed amounts payable in respect of provident fund, employees' state insurance, income-tax, goods and service tax, cess and other material statutory dues were in arrears as at 31 March 2020 for a period of more than six months from the date they become payable.

(b) According to the information and explanations given to us and on the basis of our examination of the records of the Company, the following dues have not been deposited by the Company on account of any disputes.

Name of the statute	Nature of dues	Amount (Rs. in lakhs)	Period to which the amount relates	Forum where dispute is pending
Income Tax Act, 1961	Income Tax	37.76	2011-12	Commissioner of Income Tax (Appeals)
Income Tax Act, 1961	Income Tax	7.62	2012-13	Commissioner of Income Tax (Appeals)
Income Tax Act, 1961	Income Tax	22.55	2013-14	Commissioner of Income Tax (Appeals)
Income Tax Act, 1961	Income Tax	332.95	2016-17	Commissioner of Income Tax (Appeals)

viii. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not defaulted in the repayment of outstanding dues to financial institution, bank, or debenture holder during the year. The Company did not have any borrowings from the government during the year.

ix. According to the information and explanations given to us and based on our examination of the records, the

Company has utilised the money raised by way of issue of non-convertible debentures and the terms loans during the year for the purpose for which they were raised. During the year, the Company has not raised moneys by way of initial public offer or further public offer.

x. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, except for 271 cases aggregating Rs. 191.18 lakhs, largely pertaining to misappropriation of cash, we have neither come across any instance of fraud by the Company or any material instance of fraud on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of such case by management.

xi. According to the information and explanations give to us and based on our examination of the records of the Company, the Company has paid/provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Act.

xii. In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company. Accordingly, paragraph 3(xii) of the Order is not applicable to the Company.

xiii. According to the information and explanations given to us and on the basis of our examination of the records of the Company, transactions with the related parties are in compliance with section 177 and 188 of the Act where applicable and the details of such transactions have been disclosed in the financial statements, as required by the applicable accounting standards.

xiv. According to the information and explanations given to us and based on our examination of the records, the Company has not made preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review and accordingly, paragraph 3(xiv) of the Order is not applicable to the Company.

xv. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3(xv) of the Order is not applicable to the Company.

xvi. According to the information and explanations given to us and based on our examination of the records of the Company, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi) of the Order is not applicable to the Company.

Annexure B to the Independent Auditors' report on the financial statements of Mahindra Rural Housing Finance Limited for the year ended 31 March 2020

Report on the internal financial controls with reference to the aforesaid financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

Referred to in paragraph A(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date

Opinion

We have audited the internal financial controls with reference to financial statements of Mahindra Rural Housing Finance Limited ("the Company") as of 31 March 2020 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2020, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to the Financial Statements for the year ended 31 March 2020

1 COMPANY INFORMATION

Mahindra Rural Housing Finance Limited ('the Company'), incorporated in India is a Housing Finance Company ('HFC') engaged in providing housing finance through its pan India branch network. In exercise of the powers conferred on the National Housing Bank vide Section 29A of The National Housing Bank Act, 1987, the Company has been granted Certificate of Registration dated 13 August 2007 to commence the business of a housing finance institution without accepting public deposits. The Company is a subsidiary of Mahindra & Mahindra Financial Services Limited. Mahindra & Mahindra Limited is the ultimate holding company.

The Company's registered office is at Mahindra Towers, 4th Floor, Dr. G. M. Bhosale Marg, Worli, Mumbai 400018, India.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1 Statement of compliance and basis for preparation and presentation of financial statements

These standalone or separate financial statements of the Company have been prepared in accordance with the Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules 2015 as amended and notified under section 133 of the Companies Act, 2013 ("the Act") and in conformity with the accounting principals generally accepted in India and other relevant provisions of the Act. Any application guidance/ clarifications/ directions issued by Reserve Bank of India (RBI), National Housing Bank (NHB) or other regulators are implemented as and when they are issued/ applicable.

These separate financial statements were approved by the Company's Board of Directors and authorised for issue on 08 May 2020.

2.2 Functional and presentation currency

These financial statements are presented in Indian Rupees ('INR' or 'Rs.') which is also the Company's functional currency. All amounts are rounded-off to the nearest lakhs, unless otherwise indicated.

2.3 Basis of measurement

The financial statements have been prepared on the historical cost basis except for certain financial instruments which are measured at fair value.

2.4 Measurement of fair values

A number of Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.The Company has established policies and procedures with respect to the measurement of fair values. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs for the asset ot liability that are not based on observable market data (unobservable inputs).

2.5 Use of estimates and judgements

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income, expenses and the disclosures of contingent assets and liabilities. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Company based its assumptions and estimates on parameters available when the financial statements were issued. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

Following are the areas that involve a higher degree of estimate and judgement or complexity in determining the carrying amount of some assets and liabilities.

(i) Effective Interest Rate (EIR) Method

The Company recognizes interest income / expense using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loans given / taken. This estimation, by nature, requires an element of judgement regarding the expected behaviour and life-cycle of the instruments, as well as expected changes to other fee income/expense that are integral parts of the instrument.

(ii) Impairment of Financial Assets

The measurement of impairment losses on loan assets and commitments, requires judgement, in estimating the amount and timing of future cash flows and recoverability of collateral values while determining the impairment losses and assessing a significant increase in credit risk.

The Company's Expected Credit Loss (ECL) calculation is the output of a complex model with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL model that are considered accounting judgements and estimates include:

- The Company's criteria for assessing if there has been a significant increase in credit risk
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL model, including the various formulas and the choice of inputs
- Selection of forward-looking macroeconomic scenarios and their probability weights, to derive the economic inputs into the ECL model
- Management overlay used in circumstances where management judges that the existing inputs, assumptions and model techniques do not capture all the risk factors relevant to the Company's lending portfolios.

It has been the Company's policy to regularly review its model in the context of actual loss experience and adjust when necessary (refer note 45)

(iii) Provisions and other contingent liabilities:

The reliable measure of the estimates and judgemets pertaining to litigations and the regulatory proceedings in the ordinary course of the Company's business are disclosed as contingent liabilities.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

(iv) Provision for income tax and deferred tax assets:

The Company uses estimates and judgements based on the relevant rulings in the areas of allocation of revenue, costs, allowances and disallowances which is exercised while determining the provision for income tax, including the amount expected to be paid / recovered for uncertain tax positions. A deferred tax asset is recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilised. Accordingly, the Company exercises its judgement to reassess the carrying amount of deferred tax assets at the end of each reporting period.

(v) Defined Benefit Plans:

The cost of the defined benefit gratuity plan and the present value of the gratuity obligation are determined using actuarial valuations. An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

(vi) Coronavirus (COVID-19) pandemic impact

The ongoing COVID-19 pandemic has increased the estimation uncertainty in the preparation of these Financial Statements.

Notes to the Financial Statements for the year ended 31 March 2020

The estimation uncertainty is associated with:

- the extent and duration of the disruption to business arising from the actions by governments, businesses and consumers to contain the spread of the virus;
- the extent and duration of the expected economic downturn (and forecasts for key economic factors including, agriculture, GDP and employment). This includes the disruption to deteriorating credit, liquidity concerns, increasing unemployment, reductions in production because of decreased demand, and other restructuring activities; and
- the effectiveness of government and Reserve Bank of India measures that have and will be put in place to support businesses and consumers through this disruption and economic downturn.

The Company has developed various accounting estimates in these Financial Statements based on forecasts of economic conditions which reflect expectations and assumptions as at 31 March 2020 about future events that management believe are reasonable in the circumstances. There is a considerable degree of judgement involved in preparing forecasts. The underlying assumptions are also subject to uncertainties which are often outside the control of the Company. Accordingly, actual economic conditions can be different from those forecasted and the effect of those differences may impact accounting estimates included in these financial statements.

The significant accounting estimates impacted by these forecasts and associated uncertainties are predominantly related to expected credit losses. The impact of the COVID-19 pandemic on these accounting estimates is mentioned relevantly in the respective disclosures to these Financial Statements. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions (refer note 45).

(vii) Going Concern

COVID 19 has an adverse impact on the functioning of the financial sector companies, notwithstanding this the financial statements of the Company are prepared on a going concern basis.

Management is of the view that it is considered appropriate to prepare these financial statements on a going concern basis as the Company expects to generate sufficient cash flows from operating activities and unused lines of credit to meet its obligations in the foreseeable future (refer note 44 and note 45 (iii)).

2.6 Revenue recognition:

a) Recognition of interest income

Effective Interest Rate (EIR) method

Interest income is recognised in the statement of profit and loss using the effective interest method for all financial instruments measured at amortised cost. The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument.

The calculation of the effective interest rate includes transaction costs and fees that are an integral part of the contract. Transaction costs include incremental costs that are directly attributable to the acquisition of financial asset.

If expectations regarding the cash flows on the financial asset are revised for reasons other than credit risk, the adjustment is recorded as a positive or negative adjustment to the carrying amount of the asset in the balance sheet with an increase or reduction in interest income. The adjustment is subsequently amortised through interest income in the statement of profit and loss.

Interest income

The Company calculates interest income by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets.

When a financial asset becomes credit-impaired, the Company calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets cures and is no longer credit-impaired, the Company reverts to calculating interest income on a gross basis.

Additional interest income is recognised when it becomes measurable and when it is not unreasonable to expect its ultimate collection.

b) Fee and commission income

Fee based income are recognised when they become measurable and when it is probable to expect their ultimate collection.

c) Dividend and interest income on investments

Dividends are recognised in the statement of profit and loss only when the right to receive payment is established, it is probable that the economic benefits associated with the dividend will flow to the Company and the amount of the dividend can be measured reliably.

Interest income from investment is recognised when it is certain that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principle outstanding and at the effective interest rate applicable.

2.7 Property, Plant and Equipments (PPE)

PPE are stated at cost of acquisition (including incidental expenses), less accumulated depreciation and accumulated impairment loss, if any.

Assets held for sale or disposals are stated at the lower of their net book value and net realisable value.

Advances paid towards the acquisition of PPE outstanding at each balance sheet date are disclosed separately under Other non-financial assets. Capital work in progress comprises the cost of Property, Plant and Equipment that are not ready for its intended use at the reporting date.

Depreciation on PPE is provided on straight-line basis in accordance with the useful lives specified in Schedule II to the Companies Act, 2013 on a pro-rata basis. The estimated useful life for the assets are stated as below:

In accordance with Ind AS 116 - Leases, applicable effective from 01 April 2019, the Right-Of-Use assets (Freehold premises) are initially recognized at cost which comprises of initial amount of lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. These are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-Of-Use assets (Freehold premises) are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

Assets	Useful life
Buildings	- 60 years
Computers	- 3 years
Furniture and fixtures	- 10 years
Vehicles	- 8 years
Office equipments	- 5 years
Right-Of-Use assets (Leasehold premises)	- 2 to 10 years

For following assets the useful life is taken as estimated by the management based on the actual usage pattern of the assets:

- Assets costing less than Rs.5000/- are fully depreciated in the period of purchase.
- Vehicles used by employees are depreciated over the period of 48 months considering this period as the useful life of the vehicle for the Company, as against the useful life of 8 years as mentioned in Schedule II.

Property plant and equipment is derecognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on derecognition of the asset (caculated as the difference between the net disposal proceeds and the net carrying amount of the asset) is recognised in other income / netted off from any loss on disposal in the statement of profit and loss in the year the asset is derecognised.

2.8 Intangible assets:

Intangible assets are stated at cost less accumulated amortization and accumulated impairment loss, if any.

Intangible assets comprises of computer software which is amortized over the estimated useful life. The maximum period for such amortization is taken as 36 months based on management's estimates of useful life. Amortisation is calcualted using the Straight line method to write down the cost of intangible assets over their estimated useful lives.

Notes to the Financial Statements for the year ended 31 March 2020

2.9 Cash and cash equivalent:

Cash comprises of cash on hand and demand deposits with bank. The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

2.10 Financial instruments:

Recognition and initial measurement

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at Fair Value Through Profit and Loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at FVTPL are recognised immediately in the statement of profit and loss.

Classification and subsequent measurement

- ***Financial assets***

  On initial recognition, a financial asset is classified as measured at

  - *Amortised cost;*
  - *Fair Value Through Other Comprehensinve Income (FVTOCI) - debt instruments;*
  - *Fair Value Through Other Comprehensinve Income (FVTOCI) - equity instruments;*
  - *Fair Value Through Profit and Loss (FVTPL)*

The Company's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios being the level at which they are managed. The financial asset is held with the objective to hold financial asset in order to collect contractual cash flows as per the contractual terms that give rise on specified dates to cash flows that are solely payment of principal and interest (SPPI) on the principal amount outstanding. Accordingly, the Company measures bank balances and loans at amortised cost.

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL.

Subsequent measurement and gains and losses:

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income and impairment are recognised in Statement of profit and loss. Any gain and loss on derecognition is recognised in Statement of profit and loss.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in Statement of profit and loss.

Financial liabilities and equity instruments:

Classification as debt or equity -

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments -

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received. Transaction costs of an equity transaction are recognised as a deduction from equity.

Financial liabilities -

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is a derivative or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in Statement of profit and loss. Any gain or loss on derecognition is also recognised in the statement of profit and loss.

Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. The difference between the carrying value of the financial liability and the consideration paid is recognised in the statement of profit and loss.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Impairment of financial instruments

Equity instruments are not subject to impairment under Ind AS 109.

Financial assets carried at amortised cost:

The Company recognises lifetime expected credit loss (ECL) when there has been a significant increase in credit risk since initial recognition and when the financial assets carried at amortised cost is credit impaired. If the credit risk on the financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12 month ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition. 12 month ECL represents the portion of lifetime ECL that is expected to result from default events on a financial instrument that are possible within 12 months after the reporting date.

When determining whether credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on historical experience and forward-looking information.

Management overlay is used to adjust the ECL allowance in circumstances where management judges that the existing inputs, assumptions and model techniques do not capture all the risk factors relevant to the Company's lending portfolios. Emerging local or global macro economic, micro economic or political events, and natural disasters that are not incorporated in to the current parameters, risk ratings, or forward looking information are examples of such circumstances. The use of management overlay may impact the amount of ECL recognised.

The expected credit losses on these financial assets are estimated using a historical credit loss experience, adjusted for factors that are specific to the general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate. Lifetime ECL represents the expected credit losses that will result from all possible default events over the expected life of a financial instrument. It has been the Company's policy to regularly review its model in the context of actual loss experience and provide for additional impairment allowance due to management overlay when necessary (refer note 45)

Notes to the Financial Statements for the year ended 31 March 2020

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made from written off assets are netted off against the amount of financial assets written off during the year under "bad debts/loss on termination" forming part of "impairment on financial instruments" in statement of profit and loss.

2.11 Employee benefits:

a) Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

b) Contribution to provident fund, ESIC and National Pension Scheme

Company's contribution paid/payable during the year to provident fund, employees state insurance corporation (ESIC) and National Pension Scheme is recognised in the Statement of profit and loss.

c) Gratuity

The Company's liability towards gratuity scheme is determined by actuaries, using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. Past services are recognised at the earlier of the plan amendment / curtailment and recognition of related restructuring costs/termination benefits.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains/losses

Remeasurement of defined benefit plans, comprising of acturial gains / losses, return on plan assets excluding interest income are recognised immediately in the balance sheet with corresponding debit or credit to Other Comprehensive Income (OCI). Remeasurements are not reclassified to the statement of profit and loss in the subsequent period.

Remeasurement gains or losses on long-term compensated absences that are classified as other long-term benefits are recognised in the statement of profit and loss.

d) Superannuation fund

The Company makes contribution to the Superannuation scheme, a defined contribution plan, administered by Life Insurance Corporation of India, which are charged to the statement of profit and loss. The Company has no obligation to the scheme beyond its contributions.

e) Leave encashment / compensated absences / sick leave

The Company provides for the encashment / availment of leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits for future encashment / availment. The liability is provided based on the number of days of unutilized leave at each balance sheet date on the basis of an independent actuarial valuation.

f) Employee stock options:

Equity-settled share-based payments to employees are recognised as an expense at the fair value of stock options at the grant date. The fair value determined at the grant date of the Equity-settled share-based payments is expensed on a stright-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity.

2.12 Finance costs:

Finance costs include interest expense computed by applying the effective interest rate on respective financial instruments measured at amortised cost, i.e., bank term loans, non-convertible debentures, inter corporate deposits, commercial papers and subordinated debts, to the extent they are regarded as an adjustment to the interest cost. Finance costs are charged to the Statement of profit and loss.

Effective from 01 April 2019, on application of Ind AS 116 (Leases), interest expense on lease liabilities computed by applying the Company's weighted average incremental borrowing rate has been included under finance costs.

2.13 Taxation - Current and deferred tax:

Income tax expense comprises of current tax and deferred tax. Current and deferred tax are recognised in the statement of profit and loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Significant judgments are involved in determining the provision for income taxes including judgment on whether tax positions are probable of being sustained in tax assessments. A tax assessment can involve complex issues, which can only be resolved over extended time periods.

a) Current tax:

Current tax comprises amount of tax payable in respect of the taxable income or loss for the year determined in accordance with Income Tax Act, 1961 and any adjustment to the tax payable or receivable in respect of previous years. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

b) Deferred tax:

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequence that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary difference could be utilized. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

2.14 Securities issue expenses:

Expenses incurred in connection with the fresh issue of Share capital are adjusted against Securities premium reserve.

2.15 Impairment of non financial assets:

The Company reviews the carrying amounts of its tangible and other intangible assets at the end of each reporting period, to determine whether there is any indication that those assets have impaired. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Recoverable amount is determined for an individual asset, unless the asset does not generate cash flows that are largely independent of those from other assets or group of assets.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

Notes to the Financial Statements for the year ended 31 March 2020

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the assets is considered impaired, and is written down to its recoverable amount.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount such that the increased carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been recognised for the asset (or cash-generating unit) in prior years. The reversal of an impairment loss is recognised in the statement of profit and loss.

2.16 Provisions:

Provisions are recognised when there is a present obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

2.17 Leases:

The Company as a lessee -

As a lessee, the Company's lease asset class primarily consist of buildings or part thereof taken on lease for office premises and certain IT equipments used for operating activities. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements includes the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certaint hat they will be exercised.

The right-of-use assets are initially recognized at cost which comprises of initial amount of lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. These are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

The lease liability is initially measured at amortized cost at the present value of the future lease payments that are not paid at the commencement date, discounted using the Company's incremental average borrowing rate. Lease liabilities are remeasured with a corresponding adjustment to the related right of use asset if the Company changes its assessment if whether it will exercise an extension or a termination option.

ROU assets and Lease liabilities have been separately presented in the Balance Sheet and principal portion of lease payments have been classified as financing cash flows.

Transition to Ind AS 116

Ministry of Corporate Affairs ("MCA") through Companies (Indian Accounting Standards) Amendment Rules, 2019 and Companies (Indian Accounting Standards) Second Amendment Rules, has notified Ind AS 116, Leases, which replaces the existing lease standard, Ind AS 17 leases, and other interpretations. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. It introduces a single, on-balance sheet lease accounting model for lessees.

The Company has adopted Ind AS 116, Leases, effective 01 April 2019 using modified retrospective approach of transition without restating the figures for prior periods. Consequently, the Company recorded the lease liability at the present value of the lease payments discounted at the incremental borrowing rate and the right of use asset at its carrying amount as if the standard had been applied since the commencement date of the lease, but discounted at the Company's incremental borrowing rate at the date of initial application. Comparatives as at and for the year ended 31 March 2019 have not been retrospectively adjusted and therefore will continue to be reported under the accounting policies included as part of our Annual Report for year ended 31 March 2019.

On application of Ind AS 116, financial information is presented in the following manner for the year ended 31 March 2020.

a) ROU assets and lease liabilities have been included within the line items "Property, plant and equipment" and "Other financial liabilities" respectively in the Balance sheet;

b) Interest expenses on the lease liability and depreciation charge for the right-to-use asset have been included within the line items "Finance costs" and "Depreciation, amortization and impairment" respectively in the statement of profit or loss;

c) Short-term lease payments and payments for leases of low-value assets, where exemption as permitted under this standard is availed, have been recognized as expense on a straight line basis over the lease term in the statement of profit or loss.

d) Cash payments for the principal of the lease liability have been presented within "financing activities" in the statement of cash flows;

Further, on application of Ind AS 116, the nature of expense in the Statement of profit or loss has changed from lease rent in previous periods to depreciation cost for the ROU asset and finance cost for interest on lease liability in the current financial year.

The effect of transition to Ind AS 116 and other disclosures are set out under note no. 35.

2.18 Earnings Per Share:

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, sub-division of shares etc. that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders is divided by the weighted average number of equity shares outstanding during the period, considered for deriving basic earnings per share and weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

2.19 Standards issued but not yet effective:

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from 01 April 2020.

Notes to the Financial Statements for the year ended 31 March 2020

d) Terms / rights attached to equity shares:

The Company has only one class of equity shares having a par value of Rs. 10/- per share. Each holder of equity shares is entitled to one vote per share. The dividend proposed by the board of directors and approved by the shareholders in the annual general meeting is paid in Indian rupees. In the event of liquidation of the Company, the holders of equity shares will be entitled to receive remaining assets of the Company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

19 Other Equity

Description of the nature and purpose of Other Equity:

Statutory reserve

As per section 45 IC of the Reserve Bank of India Act, 1934, the Company is required to transfer a specified percentage of its net profits every year to a reserve fund before any dividend is declared. The Company transfers an amount to this reserve fund at year end. The Company does not anticipate any withdrawal from this reserve fund in the foreseeable future.

Securities premium

Securities premium is used to record the premium on issue of shares. The reserve can be utilised only for limited purposes such as issuance of bonus shares in accordance with the provisions of the Companies Act, 2013.

General reserve

General reserve is created through annual transfer of profits at a specified percentage in accordance with applicable regulations under the erstwhile Companies Act, 1956. The purpose of these transfers was to ensure that if a dividend distribution in a given year is more than 10% of the paid up capital of the Company for that year, then the total dividend distribution is less than the total distributable profits for that year. Consequent to introduction of the Companies Act, 2013, the requirement to mandatorily transfer specified percentage of net profits to General reserve has been withdrawn. However, the amount previously transferred to the General reserve can be utilised only in accordance with the specific requirements of the Companies Act, 2013.

Employee stock options outstanding

The Employee Stock Options outstanding represents reserve in respect of equity-settled share options granted to the eligible employees in pursuance of the Employee Stock Option Plan.

Retained earnings

Retained earnings or accumulated surplus represents total of all profits retained since Company's inception. Retained earnings are credited with current year profits, reduced by losses, if any, dividend payouts, transfers to General reserve or any such other appropriations to specific reserves.

Details of dividends proposed

32 Employee Stock Option Scheme:

The Company has used fair value method to account for the compensation cost of stock options. Fair value of options is based on the valuation of the independent valuer using the Black -Scholes model.

Description of ESOP Scheme:

Particulars	ESOP
Vesting requirements	Stock Options due for vesting on each vesting date shall vest on the basis of time i.e. mere continuance of employment as on relevant date of vesting.
Vesting Conditions	25% on expiry of 12 months from the date of grant
	25% on expiry of 24 months from the date of grant
	25% on expiry of 36 months from the date of grant
	25% on expiry of 48 months from the date of grant
Method of Settlement	Equity settled

(Rs. in Lakhs)

Notes to the Financial Statements for the year ended 31 March 2020

The Fair value of options, based on the valuation of the independent valuer as on the date of grant are:

	31 March 2020			31 March 2019		
Vesting Date	**No of years vesting**	**Fair Value (Rs.) per share**	**Exercise Price (Rs.)**	No of years vesting	Fair Value (Rs.) per share	Exercise Price (Rs.)
Grant Dated 16 January 2018	**4 Years**	**212.46**	**10.00**	–	–	–

The Key assumptions used in Black-Scholes model for calculating fair value as on the date of grant are:

Variables#	**31 March 2020**	31 March 2019
1) Risk free interest rate	**3.97%**	–
2) Expected life	**4 Years**	–
3) Expected volatility	**38.80%**	–
4) Price of the underlying share at the time of option grant (Rs.)	**221.00**	–

the value mentioned against each of the variables are based on the weighted average percentage of vesting.

33 Employee Benefits

General description of defined benefit plans :

Gratuity

The Company provides for gratuity, a defined benefit retirement plan covering qualifying employees. The plan provides for lump sum payments to employees upon death while in employment or on separation from employment after serving for the stipulated period mentioned under The Payment of Gratuity Act, 1972. The Company makes annual contribution to the gratuity scheme adminstered by the Life Insurance Corporation of India through its gratuity fund.

Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

Investment risk

The present value of the defined benefit plan liability is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

Interest risk

A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.

Longevity risk

The present value of defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

(Rs. in Lakhs)

(Rs. in Lakhs)

Notes to the Financial Statements for the year ended 31 March 2020

Quantitative sensitivity analysis for impact of significant assumptions on defined benefit obligation are as below:

Assumptions	31 March 2020	31 March 2019
One percentage point increase in discount rate	**(20.57)**	(105.24)
One percentage point decrease in discount rate	**24.11**	133.60
One percentage point increase in salary growth rate	**23.82**	135.98
One percentage point decrease in salary growth rate	**(20.71)**	(108.52)

Maturity profile of defined benefit obligation

	31 March 2020	31 March 2019
Within 1 year	**797.52**	542.10
Between 1 and 5 years	**5,737.70**	3,915.23

The estimate of future salary increases, considered in actuarial valuation, considers inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Company's contribution to provident fund and superannuation fund aggregating Rs.1,664.89 lakhs (31 March 2019 : Rs.709.69 lakhs) has been recognised in the statement of profit and loss under the head employee benefits expenses.

34 Operating segments

There is no separate reportable segment as per Ind AS 108 on "Operating Segments" in respect of the Company.

There are no operations outside India and hence there is no external revenue or assets which require disclosure.

No revenue from transactions with a single external customer or counterparty amounted to 10% or more of the Company's total revenue in the year ended 31 March 2020 or 31 March 2019.

35 Leases

In the cases where assets are taken on operating lease (as lessee) -

As a lessee, the Company's lease asset class primarily consist of buildings or part thereof taken on lease for office premises and certain IT equipments used for operating activities. The Company, previously classified these leases as operating leases under Ins AS 17 based on its assessment that the lessor effectively retained substantially all the risks and benefits incidental to ownership of the underlying asset and hence, the lease payments were recognized as an expense in the Statement of profit and loss.

The Company has adopted Ind AS 116, Leases, effective 01 April 2019 using modified retrospective approach of transition without restating the figures for prior periods. Consequently, the Company has recognized the lease liability at the present value of the future lease payments discounted at the incremental borrowing rate at the date of initial application and ROU asset is equal to lease liability adjusted by the amount of any prepaid or accrued lease payments in relation to leases which has been previously classified as operating leases under Ind AS 17 subject to certain practical expedients as allowed by the Standard.

The following is the summary of practical expedients elected on initial application of Ind AS 116.

i) Applied a single discount rate to a portfolio of leases with reasonably similar characteristics.

ii) Availed the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term on the date of initial application.

iii) Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application.

iv) Applied the practical expedient to grandfather the assessment of which transactions are leases. Accordingly, Ind AS 116 is applied only to contracts that were previously identified as leases under Ind AS 17.

v) Used hindsight to determine the lease term of contracts.

The lease liabilities were measured at the present value of the remaining lease payments, discounted using the Company's incremental borrowing rate as at 01 April 2019, The weighted average of Company's incremental borrowing rate applied to the lease liabilities on 01 April 2019 was 9.75%

a) Transition date reconcilation as at 01 April 2019 :	31 March 2020	31 March 2019
Operating lease commitments as per Ind AS 17 as at 31 March 2019	**4,810.26**	–
Present value of above lease commitment, using incremental borrowing rate as on 01 April 2019	**3,510.72**	–
Less:- Adjustments for recognising exemption for short term leases	**–**	
Lease liabilities recognised as at 01 April 2019	**3,510.72**	–

b) Maturity analysis – contractual undiscounted cash flows	31 March 2020	31 March 2019
Less than 1 year	**786.19**	–
1-3 years	**1,474.63**	–
3-5 years	**1,202.39**	–
More than 5 years	**927.46**	–
Total undiscounted lease liabilities	**4,390.67**	**–**

c) Other disclosures:

On application of Ind AS 116, the nature of expense has changed from lease rent in previous periods to depreciation cost for the ROU asset and finance cost for interest accrued on lease liability. Ind AS 116 also provides for certain options and exemptions to recognise short-term lease payments and payments for leases of low-value assets which are not included in the measurement of the lease liability and ROU asset as expense on a straight line basis over the lease term in the statement of profit or loss. Following table summarizes other disclosures including the note references for the expense, asset and liability heads under which certain expenses, assets and liability items are grouped in the financial statements.

	Particulars	31 March 2020	31 March 2019
i)	Depreciation charge for Right-Of-Use assets for Leasehold premises (presented under note - 29 "Depreciation, amortization and impairment")	**660.64**	–
ii)	Interest expense on lease liabilities (presented under note - 25 "Finance costs")	**320.37**	–
iii)	Expense relating to short-term leases	**–**	–
iv)	Expense relating to leases of low-value assets (included under note 30 "Other expenses")	**108.74**	–
v)	Payments for lease liability	**768.20**	–
vi)	Additions to right-of-use assets during the year	**288.14**	–
vii)	Carrying amount of right-of-use assets at the end of the reporting period by class of underlying asset -		
	– Property taken on lease for office premises (presented under note - 08 "Property, plant and equipments")	**3,138.22**	–
viii)	Lease liabilities (presented under note - 15 "Other financial liabilities")	**3,351.03**	–

(Rs. in Lakhs)

Notes to the Financial Statements for the year ended 31 March 2020

36 Frauds reported during the period

There were 279 cases (31 March 2019: 125 cases) of frauds amounting to Rs. 239.84 Lakhs (31 March 2019: Rs. 111.98 Lakhs) reported during the year. The Company has recovered an amount of Rs. 106.96 Lakhs (31 March 2019: Rs.36.53 Lakhs) and wherever required has initiated appropriate legal actions against the individuals involved. The claims for the un-recovered losses are lodged with the insurance companies on merit basis.

37 Contingent liabilities and commitments (to the extent not provided for)

	31 March 2020	31 March 2019
i) Claims against the Company not acknowledged as debt		
Legal suits filed by customers	**170.58**	104.25
Income Tax	**69.95**	60.98
ii) Commitments		
Estimated amount of contracts remaining to be executed on capital account and not provided for	**108.78**	115.55
Other commitments:		
Amount on account of loan sanctioned but not disbursed	**41,981.03**	63,529.76
Total	**42,330.34**	63,810.54

The Company's pending litigations comprise of claims against the Company primarily by the customers and proceedings pending with Income Tax authorities. The Company has reviewed all its pending litigations and proceedings and has adequately provided for where provisions are required and disclosed the contingent liabilities where applicable, in its financial statements. The amount of provisions / contingent liabilities is based on management's estimate, and no significant liability is expected to arise out of the same.

In February 2019, Supreme Court of India in its judgement opined on the applicability of allowances that should be considered to measure obligations under Employees Provident Fund Act, 1952. The Company has been legally advised that there are interpretative challenges on the application of judgement retrospectively and therefore has currently not considered any probable obligations for past periods. Accordingly, the Company has made a provision for provident fund contribution from the date of the Supreme Court order.

38 Corporate Social Responsibility (CSR)

During the year, the Company has incurred an expenditure of Rs. 611.32 Lakhs (31 March 2019 : Rs. 413.91 Lakhs) towards CSR activities which includes contribution / donations made to the trusts which are engaged in activities prescribed under section 135 of the Companies Act, 2013 read with Schedule VII to the said Act and expense of Rs. 21.81 Lakhs (31 March 2019: Rs. 9.70 Lakhs) towards the CSR activities undertaken by the Company.

Detail of amount spent towards CSR activities :

a) Gross amount required to be spent by the Company during the year is Rs. 611.25 lakhs (31 March 2019: Rs. 413.77 lakhs).

b) Amount spent by the Company during the period:

	For the year ended 31 March 2020			For the year ended 31 March 2019		
Particulars	**In cash**	**Yet to be paid in cash**	**Total**	In cash	Yet to be paid in cash	Total
i) Construction/acquisition of any asset	**–**	**–**	**–**	–	–	–
ii) On purpose other than (i) above	**611.32**	**–**	**611.32**	413.91	–	413.91

39 The Company has a process whereby periodically all long term contracts (including derivative contracts) are assessed for material foreseeable losses. At the period end, the Company has reviewed and ensured that adequate provision as required under any law / accounting standards for material foreseeable losses on such long term contracts has been made in the books of accounts. The Company has not entered into derivative contracts during the year.

40 Capital Management and Financial Instruments

Capital management

The Company's capital management strategy is to effectively determine, raise and deploy capital so as to create value for its shareholders. The same is done through a mix of either equity and/or preference and/or convertible and/or combination of short term /long term debt as may be appropriate.

The Company determines the amount of capital required on the basis of its operations, capital expenditure and strategic investment plans.

The Company is subject to the capital adequacy requirements of the National Housing Bank (NHB). Regulatory capital consists of Tier I capital, which comprises of share capital, share premium and retained earnings including current year profit less deferred tax assets and intangible assets. The other component of regulatory capital is Tier II capital instruments, which include qualified subordinated debt. Further, capital adequacy requirement of NHB is based on the Accounting Standards specified under section 133 of the Act, read with rule 7 of the Companies (Accounts) Rules 2014 (as amended), prudential norms for income recognition, assets classification and provisioning for non-performing assets as well as contingency provision for standard assets as prescribed by The National Housing Bank (NHB) for HFCs and the guidelines issued by Securities and Exchange Board of India (SEBI) to the extent applicable.

Under NHB's capital adequacy guidelines, the Company is required to maintain a minimum capital adequacy ratio of 12% consisting of Tier I and Tier II Capital. The total of Tier II Capital at any point of time shall not exceed 100 percent of Tier I Capital. The Company follows accounting policies as prescribed under National Housing Bank Directions to manage capital under NHB regulations.

Company has complied with all regulatory requirements related to regulatory capital and capital adequacy ratios as prescribed by NHB, as set out below:

	31 March 2020	31 March 2019
Tier I capital	**105,519.56**	101,361.47
Tier II capital	**44,110.22**	33,460.23
Total capital	**149,629.78**	134,821.70
Risk weighted assets	**347,640.16**	342,706.90
Tier I capital ratio	**30.35%**	29.58%
Tier II capital ratio	**12.69%**	9.76%
Total capital ratio	**43.04%**	39.34%

Loan commitments	38,117.86	25,411.90	63,529.76

45 Financial Risk Management Framework

In the course of its business, the Company is exposed to certain financial risks namely credit risk, interest risk, currency risk & liquidity risk.The Company's primary focus is to achieve better predictability of financial markets and seek to minimize potential adverse effects on its financial performance.

The financial risks are managed in accordance with the Company's risk management policy which has been approved by its Board of Directors.

Board of Directors of the Company have established Asset and Liability Management Committee (ALCO), which is responsible for developing and monitoring risk management policies for its business. The Company's financial services businesses are exposed to high credit risk given the unbanked rural customer base. The credit risk is managed through credit norms established based on historical experience.

i) Market Risk

The risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

a) Currency Risk

Company does not have significant foreign currency exposure. As a result, the Company is not exposed to currency risk.

b) Interest Rate Risk

The Company uses a mix of cash and borrowings to manage the liquidity & fund requirements of its day-to-day operations. Further, certain interest bearing liabilities carry variable interest rates.

Interest Rate sensitivity

The sensitivity analyses below have been determined based on exposure to financial instruments at the end of the reporting year. For floating rate liabilities, analysis is prepared assuming the amount of liability outstanding at the end of the reporting year was outstanding for the whole year.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

	Currency	Increase/ decrease in basis points	Effect on profit before tax	Effect on pre-tax equity
Year ended 31 March 2020	**INR**	**100**	**1,258.64**	**–**
Year ended 31 March 2019	INR	100	1,310.34	–

Offsetting of balances: The Company has not offset financial assets and financial liabilities.

ii) Credit Risk Management

Credit risk is the risk that the Company will incur a loss because its customers fail to discharge their contractual obligations. The Company has a comprehensive framework for monitoring credit quality of its loans primarily based on days past due monitoring as at a period end. Repayment by individual customers and portfolio is tracked regularly and required steps for recovery are taken through follow ups and legal recourse.

(Rs. in Lakhs)

Notes to the Financial Statements for the year ended 31 March 2020

Credit quality of financial assets

The following table sets out information about credit quality of loan assets measured at amortised cost based on months past due information. The amount represents gross carrying amount.

Particulars	31 March 2020	31 March 2019
Gross carrying value of loan assets		
Neither Past due nor impaired	**497,117.82**	456,340.86
30 days past due	**54,767.22**	83,187.48
31 - 90 days past due	**164,783.15**	160,582.65
Impaired (more than 90 days past due)	**127,721.16**	104,763.77
Total Gross carrying value as at reporting date	**844,389.35**	804,874.76

Since the company is into retail home loan lending business, there is no significant credit risk of any individual customer that may impact company adversely, and hence, the Company has calculated its ECL allowances on a collective basis.

Inputs considered in the ECL model

In assessing the impairment of loan assets under Expected Credit Loss (ECL) Model, the assets have been segmented into three stages. The three stages reflect the general pattern of credit deterioration of a financial instrument. The differences in accounting between stages, relate to the recognition of expected credit losses and the measurement of interest income.

The Company categorises loan assets into stages primarily based on the Days Past Due status.

Stage 1 : 0-30 days past due

Stage 2 : 31-90 days past due

Stage 3 : More than 90 days past due

(a) RBI COVID-19 Regulatory Package

In accordance with the Reserve Bank of India (RBI) notification no. RBI/2019-20/186 DOR.No.BP.BC.47/21.04.048/2019-20 dated 27th March, 2020 and RBI/2019-20/220 DOR.No.BP.BC.63/21.04.048/2020-21 dated 17 April 2020 relating to 'COVID-19 - Regulatory Package', the Company, as per its board approved policy and ICAI advisories, has granted moratorium upto three months on the payment of installments falling due between 01 March 2020 and 31 May 2020 to all eligible borrowers. And in respect of accounts overdue but standard (i.e, stage 1 and stage 2) at 29 February 2020 where moratorium benefit has been granted, for the purpose of staging of those accounts and for determination of impairement loss allowance as at 31 March 2020, the days past due status as on 29 February 2020 has been considered.

(b) Impact of COVID-19

The impact of COVID-19 on the global economy and how governments, businesses and consumers respond is uncertain. This uncertainty is reflected in the Company's assessment of impairment loss allowance on its loans which are subject to a number of management judgements and estimates. In relation to COVID-19, judgements and assumptions include the extent and duration of the pandemic, the impacts of actions of governments and other authorities, and the responses of businesses and consumers in different industries, along with the associated impact on the global economy.

While the methodologies and assumptions applied in the impairment loss allowance calculations remained unchanged from those applied while preparing the financial results for the period ended March 2019, the Company has separately incorporated estimates, assumptions and judgements specific to the impact of the COVID-19 pandemic and the associated support packages in the measurement of impairment loss allowance and has included management overlay amounting to Rs. 15,451.93 lakhs in the total impairment provision recognised in the statement of profit and loss. The Company's impairment loss allowance estimates are inherently uncertain and, as a result, actual results may differ from these estimates.

(c) Definition of default

The Company considers a financial asset to be in "default" and therefore Stage 3 (credit impaired) for ECL calculations when the borrower becomes 90 days past due on its contractual payments.

(d) Exposure at default

"Exposure at Default" (EAD) represents the gross carrying amount of the assets subject to impairment calculation. Future expected cash flows (principal and interest) for respective future years has been used as exposure for Stage 1 and Stage 2. This exposure is then multiplied by respective years Marginal Probability of Default (PD) and Loss Given Default (LGD) percentage to arrive at the expected credit losses. These expected credit losses are then discounted with the appropriate EIR to calculate the present value of these expected credit losses.

(e) Estimations and assumptions considered in the ECL model

The Company has made the following assumptions in the ECL Model:

a. "Loss given default" (LGD) is common for all three Stages and is based on loss in past portfolio. Actual cashflows on the past portfolio are discounted at portfolio EIR rate for arriving at the loss rate.

b. "Probability of Default" (PD) is applied on Stage 1 and Stage 2 on portfolio basis and for Stage 3 PD at 100%. This is calculated as an average of the last 60 months yearly movement of default rates and further adjusted for macro economic factors.

(f) Measurement of ECL

ECL is measured as follows:

- financial assets that are not credit impaired at the reporting date: as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive);
- financial assets that are credit impaired at the reporting date: as the difference between the gross carrying amount and the present value of estimated future cash flows;
- undrawn loan committments: as the present value of the difference between the contractual cash flows that are due to the Company if the committment is drawn down and the cash flows that the Company expects to receive.

(g) Forward Looking Information

Historical PDs have been converted into forward looking PD which incorporates the forward looking economic outlook.

The macroeconomic variables considered by the Company are robust reflections of the state of economy which result into systematic risk for the respective portfolio segments.

Additionally, three different scenarios (base case, best case and worst case) have been considered for ECL calculation. Along with the actual numbers considered as base case, other scenarios take care of the worsening as well as improvements in the forward looking economic outlook. As at 31 March 2020, the probability assigned to base case scenario assumptions have been updated to reflect the rapidly evolving situation with respect to COVID-19. This includes an assessment of the effectiveness of stimulus packages announced by government and regulatory measures imparted by RBI. These are considered in determining the length and severity of the forecasted economic downturn. The Company's base case economic forecast scenarios reflects a deterioration in economic conditions in the first quarter with a gradual improvement thereafter. In addition to the base case forecast which reflects largely the negative economic consequences of COVID-19, greater weightage has been applied to the downside scenarios given the Company's assessment of downside risks.

(h) Assessment of significant increase in credit risk

When determining whether the credit risk has increased significantly since initial recognition, the Company considers both quantitative and qualitative information and analysis based on the Company's historical experience, including forward-looking information. The Company considers reasonable and supportable information that is relevant and available without undue cost and effort. The Company's accounting policy is not to use the practical expedient

(Rs. in Lakhs)

Notes to the Financial Statements for the year ended 31 March 2020

that the financial assets with 'low' credit risk at the reporting date are deemed not to have had a significant increase in credit risk. As a result, the Company monitors all financial assets and loan commitments that are subject to impairment for significant increase in credit risk.

Based on the assessment by the Company, the RBI moratorium relaxation offered to the customers recognising the potential detrimental impact of COVID-19 has not been deemed to be automatically triggering significant increase in credit risk. The Company continues to recognize interest income during the moratorium period and in the absence of other credit risk indicators, the granting of a moratorium period does not result in accounts becoming past due and automatically triggering Stage 2 or Stage 3 classification criteria.

As a part of the qualitative assessment of whether a customer is in default, the Company also considers a variety of instances that may indicate unlikeliness to pay. In such instances, the Company treats the customer at default and therefore, assesses such loans as Stage 3 for ECL calculations, following are such instances:

– A Stage 3 customer having other loans which are in Stage 1 or 2.

– Cases where Company suspects fraud and legal proceedings are initated.

(i) ***Policy for write off of Loan Assets***

The gross carrying amount of a financial asset is written off to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the customer does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the loan outstanding dues. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made from written off assets are netted off against the amount of financial assets written off during the year under "bad debts/loss on termination" forming part of "impairment on financial instruments" in statement of profit and loss.

(j) ***Analysis of inputs to the ECL model with respect to macro economic variable***

The below table shows the values of the forward looking macro economic variable used in each of the scenarios for the ECL calculations. For this purpose, the Company has used the data source of Economist Intelligence Unit.The upside and downside % change has been derived using historical standard deviation from the base scenario based on previous 8 years change in the variable.

Macro Economic Variable	ECL Scenario	Probability Assigned	2020	2021	2022	2023	2024	2025	2026	Subsequent Years
			%	%	%	%	%	%	%	%
Agriculture (% real change p.a)										
	Best Case	10%	5.7	5.4	5.6	5.5	6.0	5.3	6.2	6.4
	Base Case	65%	3.5	3.2	3.4	3.3	3.8	3.1	4.0	4.3
	Worst Case	25%	1.3	1.0	1.2	1.1	1.6	0.9	1.8	2.1

Impairment loss

The expected credit loss allowance provision for loans is determined as follows:

	Performing Loans - 12 month ECL	Underperforming loans - lifetime ECL not credit impaired	Impaired loans -lifetime ECL credit impaired	Total
Gross Balance as at 31 March 2020	**551,885.04**	**164,783.15**	**127,721.16**	**844,389.35**
Expected credit loss rate	**1.04%**	**6.19%**	**32.45%**	
Carrying amount as at 31 March 2020 (net of impairment provision)	**546,159.15**	**154,578.84**	**86,270.01**	**787,008.00**
Gross Balance as at 31 March 2019	539,528.34	160,582.65	104,763.77	804,874.76
Expected credit loss rate	0.93%	6.68%	19.32%	
Carrying amount as at 31 March 2019 (net of impairment provision)	534,536.73	149,860.84	84,527.33	768,924.90

Level of Assessment - Aggregation Criteria

The Company recognises the expected credit losses (ECL) on a collective basis that takes into account comprehensive credit risk information.

Considering the economic and risk characterstics, pricing range, sector concentration, the Company calculates ECL on a collective basis for all stages - Stage 1, Stage 2 and Stage 3 assets.

An analysis of changes in the gross carrying amount and the corresponding ECLs in relation to loans is, as follows :

Gross exposure reconciliation - Loans

Particulars	**Stage 1**	**Stage 2**	**Stage 3**	**Total**
Gross carrying amount balance as at 1 April 2018	396,317.92	148,862.22	86,036.74	631,216.88
– Transfers to Stage 1	34,825.74	(29,849.86)	(4,975.88)	–
– Transfers to Stage 2	(54,642.54)	57,066.55	(2,424.01)	–

ECL allowance balance as at 31 March 2020	**355.88**	**23.35**	**0.19**	**379.42**

The increase in ECL of the portfolio was driven by an increase in the size of the portfolio, movements between stages as a result of increases in credit risk and due to deterioration in economic conditions.

Significant changes in the gross carrying value that contributed to change in loss allowance

The Company provides loans to retail individual customers in rural and semi urban areas which are of small ticket size. Change in any single customer repayment will not impact significantly to Company's provisioning. All customers are being monitored based on past due and corrective actions are taken accordingly to limit the Company's risk.

(Rs. in Lakhs)

Notes to the Financial Statements for the year ended 31 March 2020

Concentration of Credit Risk

Company's loan portfolio is predominantly to finance retail home loans. The Company manages concentration of risk primarily by geographical region in India. The following tables show the geographical concentrations of loans:

Particulars	As at 31 March 2020	As at 31 March 2019
Concentration by Geographical region in India:		
North	**19,964.24**	14,996.06
East	**8,331.85**	6,958.53
West	**488,724.26**	510,836.54
South	**327,369.00**	272,083.63
Total Carrying Value	**844,389.35**	804,874.76

Maximum Exposure to credit Risk

The maximum exposure to credit risk of loans is their carrying amount. The maximum exposure is before considering the effect of mitigation through collateral.

Collaterals

Narrative Description of Collateral

Collateral primarily include land and constructed/purchased house property by retail loan customers. Company generally does not obtain additional collateral during the term of the loan.

The below tables provide an analysis of the fair values of collateral held for Credit impaired assets:

31 March 2020	Maximum exposure to Credit Risk	Land and Building	Surplus Collateral	Total Collateral	Net Exposure	Associated ECL
Loans:						
a) Loans against assets	**127,709.15**	**351,686.04**	**(226,513.05)**	**125,172.99**	**2,536.16**	**41,439.14**
b) Others	**12.01**	**–**	**–**	**–**	**12.01**	**12.01**
Total	**127,721.16**	**351,686.04**	**(226,513.05)**	**125,172.99**	**2,548.17**	**41,451.15**

31 March 2019	Maximum exposure to Credit Risk	Land and Building	Surplus Collateral	Total Collateral	Net Exposure	Associated ECL
Loans:						
a) Loans against assets	104,749.71	198,088.82	(95,234.47)	102,854.35	1,895.36	20,235.22
b) Others	14.06	–	–	–	14.06	1.22
Total	104,763.77	198,088.82	(95,234.47)	102,854.35	1,909.42	20,236.44

The Company has provided for additional impairment for the shortfall in collateral value on its credit impaired assets.

Collaterals Repossessed

Company did not obtain non financial assets during the year by taking possession of collateral it held as security.

Quantitative Information of Collateral - Credit Impaired assets

The Company holds residential properties as collateral for the housing loans it grants to its customers. The Company monitors its exposure to retail lending using the Loan To Value (LTV) ratio, which is calculated as the ratio of the gross amount of the loan - or the amount committed for loan committments - to the value of the collateral. The value of the collateral for residential housing loans is typically based on the collateral value at origination.

(Gross value of total loans to value of collateral)

(Rs. in Lakhs)

Notes to the Financial Statements for the year ended 31 March 2020

Disclosure as required under RBI notification no. RBI/2019-20/220 DOR. No.BP.BC.63/21.04.048/2019-20 dated 17 April 2020 on COVID-19 Regulatory Package - Asset Classification and Provisioning.

		31 March 2020
i)	Respective amounts in SMA/overdue categories, where the moratorium/deferment was extended	233,128.35
ii)	Respective amount where asset classification benefits is extended	18,381.36
iii)	Provisions made during the Q4 - FY2020#	–
	In respect of accounts in default but standard where moratorium upto 3 months is granted, and asset classification benefit is extended, the Company has made general provisions of not less than 5 per cent of the total outstanding of such accounts as applicable for the quarter ended 31 March 2020 within the overall provision requirement of 10% of the total outstanding to be spread equally over two quarters. Balance general provision of not less than 5% of the total outstanding of such accounts is to be made for the quarter ending 30 June 2020.	–
iv)	Provisions adjusted during the respective accounting periods against slippages and the residual provisions	N/A

\# Since the effective impairment allowance rate (as per ECL model) applied on standard assets outstanding equivalent Stage-1 and Stage-2 assets under Ind AS financial statements is much higher than the prescribed general provision of 5% for the current quarter (out of 10% provision to be spread equally over two quarters), the Company has not made any additional provision under this head in Ind AS financial statements for the quarter and year ended 31 March 2020. However, the Company has made an additional general provision of Rs. 932.21 lakhs at 5% of the total outstanding for the quarter and year ended 31 March 2020 as per IRAC norms and the same is included in relevant disclsoures as applicable to the Company.

iii) Liquidity Risk Management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established Asset and Liability Management Committee (ALCO) for the management of the Company's short, medium and long term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. The Company also has Inter corporate deposits line available from holding company & fellow subsidiary companies within its group to meet any short term fund requirements.

Maturity profile of non-derivative financial liabilities

The following table details the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company may be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is calculated considering interest rate prevailing as at respective year end date.

Notes to the Financial Statements for the year ended 31 March 2020

iv) Measurement of Fair Value

Valuation technique for Fair value measurement

Fair value of loans & borrowings are calculated using a portfolio based approach, grouping them as far as possible into homogenous groups based on similar characteristics (such as tenor & rates of interest). Using the Discounted cash flow approach, the values are then calculated for the portfolio considering all significant characteristics of the loans and borrowings.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

1.6.5 The Company has not given any unsecured advances against collateral of rights, licenses, authorisations, etc. and accordingly no disclosure is made pursuant to the provisions of point no. 3.7.5, Annexure 4 of NHB Notification No. NHB.HFC.CG-DIR.1/MD&CEO/2016 dated February 9th, 2017.

1.7 Miscellaneous

1.7.1 The Company has not obtained registration from any Financial sector regulator other than National Housing Bank.

1.7.2 No Penalty has been imposed on the Company by National Housing Bank.

1.7.3 Related Party Policy :

All Contracts / arrangements/transactions entered into by the Company during the current year with related parties were in the ordinary course of business and on an arm's length basis.

Pursuant to section 134(3)(h) read with Rule 8(2) of the Companies (Accounts) Rules, 2014, there are no transactions to be reported under Section 188(1) of the Companies Act, 2013. Accordingly, the disclosure of related party transactions as required under Section 134(3)(h) of the Companies Act, 2013 in Form AOC 2 is not applicable.

The policy on related party transactions is approved by the audit committee and the board of directors of the Company.

1.7.4 Rating assigned by Credit Rating Agencies and migration of rating during the year.

During the year under consideration, India Ratings & Research Private Limited has reaffirmed the rating to the Company's bank facilities, non-convertible debentures and subordinated debt as 'IND AA+/stable' outlook and 'IND A1+' rating to the commercial paper issued by the Company.

CARE Ratings Limited (Formerly known as 'Credit Analysis & Research Limited') has reaffirmed the rating to the Company's non-convertible debentures and subordinated debt as 'CARE AA+/stable' outlook.

CRISIL Limited has reaffirmed 'CRISIL AA+/Stable' outlook to the Company's non-convertible debentures and subordinated debt and 'CRISIL A1+' rating to the Company's commercial paper.

1.7.5 Remuneration of Independent Directors

(Rs. in Lakhs)

INDEPENDENT AUDITOR'S REPORT

To the Members of
Mahindra Asset Management Company Private Limited

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the Ind AS financial statements of **Mahindra Asset Management Company Private Limited** ("the Company"), which comprise the balance sheet as at 31st March 2020, and the statement of Profit and Loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the Ind AS financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and loss, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The company's Board of Directors is responsible for the other information. The other information comprises the Board report.

Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.

As part of an audit in accordance with Standard on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure-B", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
   (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
   (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
   (e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.
   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A".
   (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
      i. The Company does not have any pending litigations;
      ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;
      iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Mahindra Asset Management Company Private Limited** ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing whether the risk of a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE B TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the financial statements of **Mahindra Asset Management Company Private Limited** for the year ended March 31, 2020

Annexure to the Auditor's Report referred to in our report of even date:

I. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant & Equipment.

(b) These fixed assets were physically verified by the Management during the year at reasonable intervals and discrepancies noticed during the verification were not material and have been properly dealt with in the books of accounts.

(c) The Company has no immovable properties and hence Clause 3(i)(c) is not applicable to the Company

II. Clause 3(ii) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

III. No parties are covered in the register maintained under section 189 of Companies Act, 2013 by the Company. Therefore, clauses 3(iii) (a), (b) & (c) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

IV. In our opinion and according to the information and explanations given to us the provisions of section 186 of the Companies Act, 2013 have been complied with.

V. In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits from the public. Consequently, no order has been passed by the Company Law Board or National Company Law Commission or Reserve Bank of India or any court or any other tribunal on the Company. The clause 3(v), therefore is not applicable to the Company.

VI. On facts, clause 3(vi) relating to maintenance of cost records is not applicable to the Company.

VII. (a) According to the records of the Company and information and explanations given to us, the Company is generally regular in depositing with the appropriate authorities undisputed statutory dues including Provident Fund, Employees' State Insurance, Income Tax, Goods and Service Tax, Customs Duty, value added tax, and other statutory dues applicable to it with the concerned authorities.

(b) According to the information and explanations given to us, there are no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income tax, Sales Tax, Wealth Tax, Excise Duty, Service Tax, Goods and Service Tax, Customs Duty and Value Added Tax that were outstanding, at the year-end for a period of more than six months from the date they became payable.

(c) According to the information and explanations given to us and records of the Company examined by us, there are no dues of income-tax, sales tax, service tax, excise duty, customs duty and value added tax and cess which have not been deposited on account of any dispute.

VIII. On the basis of examination of relevant records and according to the information and explanations given to us, the Company has not borrowed any money from financial institutions, Government or bank or debenture holders as at the Balance Sheet date.

IX. On the basis of examination of relevant records and according to the information and explanations given to us, the Company has not raised moneys by way of initial public offer or further public offer (including debt instruments) and term loans.

X. On the basis of our examination of the relevant records of the Company, carried out in accordance with generally accepted auditing practices and according to the information and explanations given to us, no fraud by the Company or any fraud on the Company by its officers or employees has been noticed or reported during the year.

XI. The Company has paid/ provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Act.

XII. The Company is not a 'Nidhi Company', therefore, clause 3(xii) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

XIII. On the basis of examination of relevant records and according to the information and explanations given to us, all transactions with the related parties are in compliance with sections 177 and 188 of Companies Act, 2013 where applicable. The Company has disclosed the details of transactions with related parties in the Financial Statements as required by the applicable accounting standards.

XIV. The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under audit; therefore, clause 3(xiv) of the Companies (Auditor's Report) Order, 2020 is not applicable to the company.

XV. On the basis of examination of relevant records and according to the information and explanations given to us, in our opinion, the Company has not entered into any non-cash transactions with directors or persons connected with them.

XVI. On the basis of examination of relevant records and according to the information and explanations given to us, in our opinion, the Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

1. CORPORATE INFORMATION

Mahindra Asset Management Company Private Limited ('the Company'), was incorporated under the Companies Act, 1956 on June 20, 2013. As on March 31, 2020, the company is a subsidiary of Mahindra & Mahindra Financial Services Ltd. The Company has a license from the Securities & Exchange Board of India to provide investment management services to the schemes of Mahindra Mutual Fund. SEBI granted the certificate of registration to Mahindra Mutual Fund on February 4, 2016. The Company earns fees from investment management activities provided to the schemes of Mahindra Mutual Fund. As on March 31, 2020, the Company was managing thirteen schemes of Mahindra Mutual Fund.

As on March 31, 2020, the Company's immediate parent company is Mahindra & Mahindra Financial Services Limited and its ultimate parent company is Mahindra & Mahindra Limited.

Change in shareholding of the Company

As on March 31, 2020, the Company was a subsidiary of Mahindra and Mahindra Financial Services Ltd ('MMFSL'). The Company has issued 21,00,00,000 (Twenty-one crore) shares to MMFSL and its nominees. On June 21, 2019, MMFSL and the Company entered into a Share Subscription Agreement ('SSA') with Manulife Investment Management Singapore Pte Ltd ('Manulife Singapore'). As per the SSA and subsequent amendments thereto, Manulife Singapore will hold 49% stake in the Company after the completion of all the formalities required in the Agreement including the receipt of regulatory approvals. Subsequent to the signing of the Agreement, the Company has received the required approvals from the Competition Commission of India as well as the Securities and Exchange Board of India. In an Extraordinary General Meeting held on April 15, 2020, the shareholders of the Company approved an offer of 17,29,41,180 (Seventeen crore twenty-nine lakh forty-one thousand one hundred and eighty) equity shares. MMFSL also proposed to sell 1,47,00,000 (One crore forty-seven lakh) number of shares of the Company to Manulife Singapore. These transactions were completed on April 29, 2020 and accordingly MMFSL now holds 51% of the equity of the Company and Manulife Singapore holds 49% of the equity of the Company. The Company received an amount of Rs. 243.66 crores at Rs. 14.09 per equity share.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1. Statement of compliance and basis for preparation and presentation of financial statements

These standalone or separate financial statements of the Company have been prepared in accordance with the Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules 2015 as amended and notified under Section 133 of the Companies Act, 2013 ("the Act") and other relevant provisions of the Act.

The Company's financial statements upto and for the year ended March 31, 2018 were prepared in accordance with the Generally Accepted Accounting Principles in India (IGAAP) under the historical cost convention as a going concern and on an accrual basis, unless otherwise stated, and in accordance with the provisions of the Act, the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules 2014 (as amended), all these were collectively named as "Previous GAAP" (IGAAP).

These are the Company's second standalone or separate financial statements prepared in accordance with Indian Accounting Standards (Ind AS).

2.2. Functional and presentation currency

These financial statements are presented in Indian Rupees ('INR' or 'Rs.') which is also the Company's functional currency.

2.3. Basis of measurement

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values.

2.4. Measurement of fair values

A number of Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has established policies and procedures with respect to the measurement of fair values.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2.5. Use of estimates and judgments

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

Following are areas that involved a higher degree of estimate and judgement or complexity in determining the carrying amount of some assets and liabilities:

Fair value of financial assets, liabilities and investments

The Company measures certain financial assets and liabilities on fair value basis at each balance sheet date or at the time they are assessed for impairment. Fair value measurement that are based on significant unobservable inputs (Level 3) require management's best estimate about future developments.

Defined benefit obligations

Measurement of defined benefit obligations and the actuarial assumptions around it are estimated on a reasonable basis. Estimates and judgements are continuously evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

2.6. Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable.

Fees from management of mutual fund schemes

Fees from management of mutual fund schemes are recognised on an accrual basis at specific rates, applied on the average daily net assets of the schemes of Mahindra Mutual Fund in accordance with the Investment Management Agreement between the Company and the Trustees of Mahindra Mutual Fund and SEBI (Mutual Fund) Regulations, 1996 as amended from time to time.

Other Income

The gains / losses on sale of investments are recognised in the Statement of Profit and Loss on the trade day and it is determined on FIFO ('first in first out') method. Till March 31, 2019, the company used to account for gains / losses on sale of investments as per weighted average cost method but from 1st April, 2019 onwards, the company has shifted to FIFO method. The above change in method of deriving gains or losses on sale of investments has a negligible impact on the overall results of the company.

Recognition of Dividend Income

Dividend from investments are recognised in the Statement of Profit and Loss when the right to receive payment is established.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

Recognition of Interest Income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding.

2.7. Property, Plant and Equipment ('PPE')

PPE are stated at cost of acquisition (including incidental expenses), less accumulated depreciation and accumulated impairment loss, if any.

Advances paid towards the acquisition of PPE outstanding at each balance sheet date are disclosed separately under other non-financial assets. Capital work in progress comprises the cost of PPE that are not ready for its intended use at the reporting date.

Depreciation on PPE is provided on straight-line basis in accordance with the useful lives specified in Schedule II to the Companies Act, 2013 on a pro-rata basis except for following assets in respect of which useful life is taken as estimated by the management based on the actual usage pattern of the assets.

- Motor vehicles where useful life is assumed at four years as against eight years as per Schedule II since the employees to whom these vehicles have been allotted, in accordance with the terms of their employment, are entitled to change their vehicles every four years, and
- Fixed assets individually having a value less than Rs 5,000 are fully depreciated in the year of purchase.

Further, residual value for all assets is considered as zero due to the difficulty in estimating the same and in the case of motor cars, having regard to terms of employment under which these are allotted to the employees.

Accordingly, useful life of assets is estimated as follows:

Employee vehicles	– 4 years
Computer	– 3 years
Furniture	– 10 years
Office Equipment	– 5 years

Assets costing less than Rs 5,000 < 1 year

PPE is de-recognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the net carrying amount of the asset) is recognised in other income / netted off from any loss on disposal in the Statement of Profit and Loss in the year the asset is de-recognised.

2.8. Intangible assets

Intangible assets are stated at cost less accumulated amortisation and impairment loss, if any. Intangible assets comprise of computer software which is amortised over the estimated useful life. The maximum period for such amortisation is taken as 36 months based on management's estimates of useful life. Amortisation is calculated using the Straight line method to write down the cost of intangible assets over their estimated useful lives.

2.9. Foreign exchange transactions and translations

Initial recognition

Transactions in foreign currencies are recognised at the prevailing exchange rates between the reporting currency and the foreign currency on the transaction date.

Conversion

Transactions in foreign currencies are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in the Statement of Profit and Loss. Foreign currency monetary assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined.

2.10. Financial instruments

Recognition and initial measurement

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the Statement of Profit and Loss.

Classification and subsequent measurement Financial assets

On initial recognition, a financial asset is classified as - measured at:

— Amortised cost; or

— Fair Value through Other Comprehensive Income (FVTOCI) - debt investment; or

— Fair Value through Other Comprehensive Income (FVTOCI) - equity investment; or

— Fair Value through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as amortised cost or FVTOCI are measured at FVTPL.

The financial assets held with the objective to collect contractual cash flows as per the contractual terms that give rise on specified dates to cash flows that are solely payment of interest on the principal amount outstanding are measured at amortised cost on the reporting date. Accordingly, the Company measures investment in Non-Convertible debentures at amortised cost. Interest income and impairment if any, is recognised in the Statement of Profit and Loss.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVTOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserves. The cumulative gain or loss is not reclassified to the Statement of Profit and Loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for medium or long- term strategic purpose. Upon the application of Ind AS 109, the Company has chosen to designate these investments as FVTOCI as the Company believes that this provides a more meaningful presentation of medium or long-term strategic investments, than reflecting changes in fair value immediately in the Statement of Profit and Loss. Dividend income, if any, received on such equity investments are recognised in the Statement of Profit and Loss.

Equity investments that are not designated to be measured at FVTOCI are designated to be measured as FVTPL. Subsequent changes in fair value are recognised in the Statement of Profit and Loss.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received. Transaction costs of an equity transaction are recognised as a deduction from equity.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held-for-trading or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost. Interest expense are recognised in the Statement of Profit and Loss. Any gain or loss on derecognition is also recognised in the Statement of Profit and Loss.

De-recognition of financial assets

The Company de-recognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all of the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for the amount it may have to pay.

If the Company enters into transactions whereby it transfers assets recognised on its Balance Sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not de-recognised and the proceeds received are recognised as a collateralised borrowing.

De-recognition of financial liabilities

A financial liability is de-recognised when the obligation under the liability is discharged, cancelled or expires. The difference between the carrying value of the original financial liability and the consideration paid is recognised in the Statement of Profit and Loss.

Impairment of financial assets

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. For debt securities at FVTOCI, the loss allowance is recognised in OCI and is not reduced from the carrying amount of the financial asset in the balance sheet.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in the Statement of Profit and Loss.

Impairment of non-financial assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount, which is the higher of the value in use or fair value less cost to sell, of the asset or cash-generating unit, as the case may be, is estimated and impairment loss (if any) is recognised and the carrying amount is reduced to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

When an impairment loss subsequently reverses, the carrying amount of the asset or a cash-generating unit is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) earlier. The reversal of an impairment loss is recognised in Statement of Profit and Loss.

2.11. Employee Benefits

Short-term employee benefits

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Contribution paid / payable during the year to Superannuation Fund, ESIC and Labour Welfare Fund are recognised in the Statement of Profit and Loss.

Contribution to provident fund

Company's contribution paid/payable during the year to provident fund is recognised in the Statement of Profit and Loss.

Gratuity

The Company's liability towards gratuity scheme is determined by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the Statement of Profit and Loss.

Remeasurement gains/losses

Remeasurement of defined benefit plans, comprising of actuarial gains or losses, return on plan assets excluding interest income are recognised immediately in the Balance Sheet with corresponding debit or credit to other comprehensive income. Re-measurements are not reclassified to the Statement of Profit and Loss in subsequent period.

Remeasurement gains or losses on long term compensated absences that are classified as other long term benefits are recognised in the Statement of Profit and Loss.

Superannuation fund

The Company makes contribution to the Superannuation scheme, a defined contribution scheme, administered by Life Insurance Corporation of India, which are charged to the Statement of Profit and Loss. The Company has no obligation under this scheme beyond its contribution.

Leave encashment/compensated absences/sick leave

The Company provides for the encashment/availment of leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits for future encashment/ availment. The liability is provided based on the number of days of unutilized leave at each balance sheet date on the basis of an independent actuarial valuation using projected unit credit method.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

Employee Share based payments

Cash-settled share-based payments to employees are measured at the fair value of the equity instruments at each reporting date. Any change in fair value is recognized for the vested period in the Statement of Profit and Loss for the period.

2.12. Scheme related expenses

Expenses of schemes of Mahindra Mutual Fund in excess of the limits in accordance with the SEBI (Mutual Fund) Regulations, 1996 are borne by the Company and are recognised in the Statement of Profit and Loss. Further, as per SEBI circular dated October 22, 2018, all scheme related expenses subsequent to that date are to be borne by the mutual fund schemes. As a result, the investment management fees subsequent to this date are received net of all scheme expenses. Prior to this date, the Company was bearing all the scheme related expenses and to that extent was in receipt of higher investment management fees from the schemes of Mahindra Mutual Fund. Hence, the investment management fees and the scheme related expenses for this year are not comparable with that of last year.

New Fund Offer ('NFO') expenses

Expenses pertaining to NFO are charged to the Statement of Profit and Loss in the year in which these expenses are incurred which is in compliance with SEBI (Mutual Fund) Regulations 1996.

2.13. Finance Costs

Finance costs include interest expense accrued on a time basis, by reference to the principal outstanding. Effective from 1 April 2019, on application of Ind AS 116 (Leases), interest expense on lease liabilities computed by applying the Company's weighted average incremental borrowing rate has been included under finance costs.

Income taxes

Current tax

Current tax is determined as the amount of tax payable in respect of taxable income for the year. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods is accounted for using the tax rates and tax laws enacted or substantively enacted as on the balance sheet date. Deferred tax assets arising on account of unabsorbed depreciation or carry forward of tax losses are recognised only to the extent that there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realised.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year

Current and deferred tax are recognised in the Statement of Profit and Loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.14. Securities issue expenses

Expenses incurred in connection with fresh issue of Share capital are accounted for as a deduction from other equity as per the provisions of Ind AS 32 – Financial Instruments Presentation.

2.15. Provisions

Provisions are recognised when there is a present obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

2.16. Leasing

Where the Company is the lessee

As a lessee, the Company's lease asset class primarily consist of buildings or part thereof taken on lease for office premises and certain IT equipments used for operating activities. The Company assesses whether a contract contains a lease, at inception of a contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (i) the contract involves the use of an identified asset (ii) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (iii) the Company has the right to direct the use of the asset.

At the date of commencement of the lease, the Company recognizes a right-of-use asset ("ROU") and a corresponding lease liability for all lease arrangements in which it is a lessee, except for leases with a term of twelve months or less (short-term leases) and low value leases. For these short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the term of the lease.

Certain lease arrangements include the options to extend or terminate the lease before the end of the lease term. ROU assets and lease liabilities includes these options when it is reasonably certain that they will be exercised.

The right-of-use assets are initially recognized at cost which comprises of initial amount of lease liability adjusted for any lease payments made at or prior to the commencement date of the lease plus any initial direct costs less any lease incentives. These are subsequently measured at cost less accumulated depreciation and impairment losses, if any. Right-of-use assets are depreciated from the commencement date on a straight-line basis over the shorter of the lease term and useful life of the underlying asset.

The Company has adopted Ind AS 116 dealing with leases from April 1, 2019. Ind AS 116 introduces a single, on-balance sheet lease accounting model for lessees. The Company recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments.

Transition to Ind AS 116

Ministry of Corporate Affairs ("MCA") through Companies (Indian Accounting Standards) Amendment Rules, 2019 and Companies (Indian Accounting Standards) Second Amendment Rules, has notified Ind AS 116, Leases, which replaces the existing lease standard, Ind AS 17 leases, and other interpretations. Ind AS 116

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. It introduces a single, on-balance sheet lease accounting model for lessees.

The Company has adopted Ind AS 116, Leases, effective 1 April 2019 using modified retrospective approach of transition without restating the figures for prior periods. Consequently, the Company recorded the lease liability at the present value of the lease payments discounted at the incremental borrowing rate and the right of use asset at its carrying amount as if the standard had been applied since the commencement date of the lease, but discounted at the Company's incremental borrowing rate at the date of initial application. Comparatives as at and for the year ended March 31,2019 have not been retrospectively adjusted and therefore will continue to be reported under the accounting policies included as part of our Annual Report for year ended March 31, 2019.

On application of Ind AS 116, financial information is presented in the following manner for the year ended 31 March 2020.

a) ROU assets and lease liabilities have been included within the line items "Property, plant and equipment" and "Other financial liabilities" respectively in the Balance sheet;

b) Interest expenses on the lease liability and depreciation charge for the right-to-use asset have been included within the line items "Finance costs" and "Depreciation, amortization and impairment" respectively in the statement of profit and loss;

c) Short-term lease payments and payments for leases of low-value assets, where exemption as permitted under this standard is availed, have been recognized as expense on a straight line basis over the lease term in the statement of profit and loss.

d) Cash payments for the principal of the lease liability have been presented within "financing activities" in the statement of cash flows;

Further, on application of Ind AS 116, the nature of expense in the Statement of profit or loss has changed from lease rent in previous periods to depreciation cost for the ROU asset and finance cost for interest on lease liability in the current financial year.

The effect of transition to Ind AS 116 and other disclosures are set out under note no.31.

2.17. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit/loss for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, sub-division of shares, etc that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders is divided by the weighted average number of equity shares outstanding during the period, considered for deriving basic earnings per share and weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

16. Other Equity

Rs in lakhs

Particulars	As at 31 March 2020	As at 31 March 2019
Opening Balance	**(10,257.64)**	(6,272.36)
Add: Profit/(Loss) for the year	**(3,789.82)**	(3,948.75)
Add: Other Comprehensive Income for the year	**(17.57)**	(4.03)
Less: Share issue expenses for the year	**(132.69)**	(32.50)
Total	**(14,197.72)**	(10,257.64)

17. Fees and commission income

Rs in lakhs

Particulars	For the year ended 31 March 2020	For the year ended 31 March 2019
Fees earned from management of mutual fund schemes	**1,265.02**	2,306.75
Total	**1,265.02**	2,306.75

The SEBI Mutual Fund Regulations, 1996 allow an Asset Management Company to charge expenses, including investment management fees, upto 2.5 percent of net assets of equity schemes and 0.25% lower expenses to other schemes. The Company used to charge investment management fees to the schemes of Mahindra Mutual Fund in accordance with these Regulations. Marketing and distribution expenses as well as other operational expenses were borne by the Company. On October 22, 2018, SEBI issued circular number SEBI/HO/IMD/DF2/CIR/P/2018/137 stating that all scheme related expenses including commission paid to distributors shall be paid from the schemes only and not from the books of the Asset Management Company. Accordingly, after October 22, 2018, scheme related expenses, including commission to distributors, are paid from the books of the schemes. This has resulted in reduction in the investment management fees earned by the Company from the schemes and also a reduction in the scheme related expenses incurred by the Company which are now borne by the schemes since October 22, 2018. To this extent, the fees income of this year is not comparable with the previous year since the Company used to charge higher investment management fees to the schemes and bear scheme related expenses till October 21, 2018.

18. Other income

30. Disclosure on Employee Share-based Compensation Scheme (Cash-settled phantom share based payments)

The Company has a Long Term Incentive Compensation Scheme (LTIC) for eligible employees. The same was announced in FY 2018-19. The LTIC payment calculation is based on a framework of phantom shares. The cash-settled share-based amount is measured at the fair value of the liability as per the requirements of Ind AS 102 Share-based payments. Until the liability is settled, the the Company shall remeasure the fair value of the liability at the end of each reporting period and at the date of settlement, with any changes in fair value recognised in the Statement of profit and loss for the period. Accordingly, a charge to Statement of Profit and loss for the year ended March 31, 2020 is Rs. 77.55 lakhs.

Rs in lakhs

Particulars	**For the year ended 31 March 2020**	For the year ended 31 March 2019
Less than one year	**176.12**	–
One to five years	**420.11**	–
More than five years	**97.78**	–
Balance at the end	**694.01**	–

The effect of adoption of Ind AS 116 Leases has resulted in an additional debit of Rs 33.69 lakhs in the Statement of profit and loss for the year ended 31 March 2020.

32. Security deposits measured at amortised cost

The Company's rent/lease agreements for the rented/ leased office premises are cancellable with a notice period of 2-3 months. All the agreements are considered to be short term in nature. Accordingly, the Company has not applied the provisions of Ind AS 109 - Financial Instruments for taking the effect of fair valuation of security deposits in the financial statements and the deposits are stated at cost.

33. Contribution to provident fund

As regards the computation of the amount of Provident Fund to be contributed by the Employee as well as the Company, in March 2019, the Supreme Court had held that all allowances that are paid to employees, except those which relate to productivity or performance, should be included for computing the salary and allowances on which the contribution to provident fund needs to be computed. For Financial Year 2019-20, the Company has contributed Provident Fund amounts in accordance with the Supreme Court judgement and accounted for the same in the Financial Statements for Financial Year 2019-20.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

34. Note on Covid-19 impact

From December 2019, COVID-19, has spread globally, including India. This event has significantly affected economic activity globally and in India and as a result, could impact the operations and financial results of the Company. The Company has performed an initial assessment of the likely impact this would have on the operations of the Company and its financial performance in the coming year.

For Financial Year 2019-20 financial reporting, the Company has used the principles of prudence in applying judgments, estimates and assumptions in estimating the remaining useful life of the tangible and intangible assets, fair valuation of financial assets and liabilities etc. The Company has considered internal and external information upto the date of approval of these financial statements including credit reports and economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets. The impact of the global health pandemic may be different from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions.

The Company is in the business of providing asset management services to the schemes of Mahindra Mutual Fund and earns fees for providing these services. Due to Covid-19, equity markets across the world have shown negative returns since mid-March 2020. Though, markets have shown a positive return in April 2020, the uncertainty related to revival of economic activity is likely to impact investment returns and hence affect inflows into financial instruments. The Company has recently received an equity infusion which will address liquidity concerns. The Company does not expect any major impact on its operations and expects to offer its services over a long period of time.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF MAHINDRA TRUSTEE COMPANY PRIVATE LIMITED

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the Ind AS financial statements of **Mahindra Trustee Company Private Limited** ("the Company"), which comprise the balance sheet as at 31st March 2020, and the statement of Profit and Loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the Ind AS financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and loss, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The company's Board of Directors is responsible for the other information. The other information comprises the Board report.

Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.

As part of an audit in accordance with Standard on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure-B", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

   (e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.

   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A".

   (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

   i. The Company does not have any pending litigations;

   ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

   iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Mahindra Trustee Company Private Limited** ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing whether the risk of a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE "B" TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the financial statements of **Mahindra Trustee Company Private Limited** for the year ended March 31, 2020

<u>Annexure to the Auditor's Report referred to in our report of even date:</u>

I. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant & Equipment.

(b) These fixed assets were physically verified by the Management during the year at reasonable intervals and discrepancies noticed during the verification were not material and have been properly dealt with in the books of accounts.

(c) The Company has no immovable properties and hence Clause 3(i)(c) is not applicable to the Company

II. On facts, Clause 3(ii) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

III. No parties are covered in the register maintained under section 189 of Companies Act, 2013 by the Company. Therefore, clauses 3(iii) (a), (b) & (c) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

IV. In our opinion and according to the information and explanations given to us the provisions of section 186 of the Companies Act, 2013 have been complied with. During the year, the Company has not provided loan to any of its directors, therefore, provisions of section 185 were not applicable during the year.

V. In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits from the public. Consequently, no order has been passed by the Company Law Board or National Company Law Commission or Reserve Bank of India or any court or any other tribunal on the Company. The clause 3(v), therefore is not applicable to the Company.

VI. On facts, clause 3(vi) relating to maintenance of cost records is not applicable to the Company.

VII. (a) According to the records of the Company and information and explanations given to us, the Company is generally regular in depositing with the appropriate authorities undisputed statutory dues including Provident Fund, Employees' State Insurance, Income Tax, Goods and Service Tax, and other statutory dues applicable to it with the concerned authorities.

(b) According to the information and explanations given to us, there are no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income tax, Goods and Service Tax, and other statutory dues that were outstanding, at the year - end for a period of more than six months from the date they became payable.

(c) According to the information and explanations given to us and records of the Company examined by us, there are no dues of income-tax, sales tax, service tax, excise duty, customs duty and value added tax and cess which have not been deposited on account of any dispute.

VIII. On the basis of examination of relevant records and according to the information and explanations given to us, the Company has not borrowed any money from financial institutions, Government or bank or debenture holders as at the Balance Sheet date.

IX. On the basis of examination of relevant records and according to the information and explanations given to us, the Company has not raised moneys by way of initial public offer or further public offer (including debt instruments) and term loans.

X. On the basis of our examination of the relevant records of the Company, carried out in accordance with generally accepted auditing practices and according to the information and explanations given to us, no fraud by the Company or any fraud on the Company by its officers or employees has been noticed or reported during the year.

XI. The Company has paid/ provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Act.

XII. The Company is not a 'Nidhi Company', therefore, clause 3(xii) of the Companies (Auditor's Report) Order, 2020 is not applicable to the Company.

XIII. On the basis of examination of relevant records and according to the information and explanations given to us, all transactions with the related parties are in compliance with sections 177 and 188 of Companies Act, 2013 where applicable. The Company has disclosed the details of transactions with related parties in the Financial Statements as required by the applicable accounting standards.

XIV. The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under audit; therefore, clause 3(xiv) of the Companies (Auditor's Report) Order, 2020 is not applicable to the company.

XV. On the basis of examination of relevant records and according to the information and explanations given to us, in our opinion, the Company has not entered into any non-cash transactions with directors or persons connected with them.

XVI. On the basis of examination of relevant records and according to the information and explanations given to us, in our opinion, the Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.

Notes to the Financial Statements for the year ended March 31, 2020

NOTE NO. 1. CORPORATE INFORMATION

Mahindra Trustee Company Private Limited ('the Company'), was incorporated under the Companies Act, 1956 on July 10, 2013. As on March 31, 2020, the company is a subsidiary of Mahindra & Mahindra Financial Services Ltd.('MMFSL'). The Company is incorporated to function as a Trustee to Mahindra Mutual Fund. The Company has entered into Investment Management Agreement with Mahindra Asset Management Company Private Limited ('Investment Manager') for managing the schemes of Mahindra Mutual Fund. The immediate parent company is Mahindra & Mahindra Financial Services Limited and its ultimate parent company is Mahindra & Mahindra Limited.

Change in shareholding of the Company

On June 21, 2019, MMFSL and the Company entered into a Share Subscription Agreement ('SSA') with Manulife Investment Management Singapore Pte Ltd ('Manulife Singapore'). As per the SSA and subsequent amendments thereto, Manulife Singapore will hold 49% stake in the Company after the completion of all the formalities required in the Agreement including the receipt of regulatory approvals. Subsequent to the signing of the Agreement, the Company has received the required approvals from the Competition Commission of India as well as the Securities and Exchange Board of India. In an Extraordinary General Meeting held on April 15, 2020, the shareholders of the Company approved an offer of 4,80,400 equity shares to Manulife Singapore. The allotment of these equity shares to Manulife Singapore was completed on April 29, 2020 and accordingly MMFSL now holds 51% of the equity of the Company and Manulife Singapore holds 49% of the equity of the Company. The Company received an amount of Rs 75.75 lakhs at Rs 15.77 per equity share as consideration for the issue of shares.

NOTE NO. 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

2.1. Statement of compliance and basis for preparation and presentation of financial statements

These standalone or separate financial statements of the Company have been prepared in accordance with the Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules 2015 as amended and notified under Section 133 of the Companies Act, 2013 ("the Act") and other relevant provisions of the Act.

The Company's financial statements upto and for the year ended March 31, 2018 were prepared in accordance with the Generally Accepted Accounting Principles in India (IGAAP) under the historical cost convention as a going concern and on an accrual basis, unless otherwise stated, and in accordance with the provisions of the Act, the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules 2014 (as amended), all these were collectively named as "Previous GAAP" (IGAAP).

These are the Company's second standalone or separate financial statements prepared in accordance with Indian Accounting Standards (Ind AS).

2.2. Functional and presentation currency

These financial statements are presented in Indian Rupees ('INR' or 'Rs.') which is also the Company's functional currency.

2.3. Basis of measurement

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values.

2.4. Measurement of fair values

A number of Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has established policies and procedures with respect to the measurement of fair values.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2.5. Use of estimates and judgments

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to estimates are recognised prospectively.

Following are areas that involved a higher degree of estimate and judgement or complexity in determining the carrying amount of some assets and liabilities:

Fair value of financial assets, liabilities and investments

The Company measures certain financial assets and liabilities on fair value basis at each balance sheet date or at the time they are assessed for impairment. Fair value measurement that are based on significant unobservable inputs (Level 3) require management's best estimate about future developments.

2.6. Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable.

Revenue from Operations:

Trusteeship Fees (net of tax)

Trusteeship Fees are recognised as revenue when the trusteeship services are performed for the schemes of Mahindra Mutual Fund.

Other Income

The gains / losses on sale of investments are recognised in the Statement of Profit and Loss on the trade day and it is determined on FIFO ('first in first out') method. Till March 31, 2019, the company used to account for gains / losses on sale of investments as per weighted average cost method but from 1st April, 2019 onwards, the company has shifted to FIFO method. The above change in method of deriving gains or losses on sale of investments has a negligible impact on the overall results of the company.

Recognition of Dividend Income

Dividend from investments are recognised in the Statement of Profit and Loss when the right to receive payment is established.

Recognition of Interest Income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding.

2.7. Property, plant and equipment ('PPE')

PPE are stated at cost of acquisition (including incidental expenses), less accumulated depreciation and accumulated impairment loss, if any.

Advances paid towards the acquisition of PPE outstanding at each balance sheet date are disclosed separately under Long term loans and advances. Capital work in progress comprises the cost of Property, Plant and Equipments that are not ready for its intended use at the reporting date.

Notes to the Financial Statements for the year ended March 31, 2020

Depreciation on PPE is provided on straight-line basis in accordance with the useful lives specified in Schedule II to the Companies Act, 2013 on a pro-rata basis except for following assets in respect of which useful life is taken as estimated by the management based on the actual usage pattern of the assets:

Fixed assets having value individually less than Rs 5,000 are fully depreciated in the period of purchase. Further, residual value for all assets is considered as zero due to the difficulty in estimating the same. Accordingly, useful life of assets is estimated as follows:

Computer	– 3 years
Furniture	– 10 years
Office Equipment	– 5 years
Assets costing less than Rs 5,000	< 1 year

PPE is de-recognised on disposal or when no future economic benefits are expected from its use. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the net carrying amount of the asset) is recognised in other income / netted off from any loss on disposal in the Statement of Profit and Loss in the year the asset is de-recognised.

2.8. Intangible assets

Intangible assets are stated at cost less accumulated amortisation and impairment loss, if any. Intangible assets comprise of computer software which is amortised over the estimated useful life. The maximum period for such amortisation is taken as 36 months based on management's estimates of useful life. Amortisation is calculated using the Straight line method to write down the cost of intangible assets over their estimated useful lives.

2.9. Foreign exchange transactions and translations

Initial recognition

Transactions in foreign currencies are recognised at the prevailing exchange rates between the reporting currency and the foreign currency on the transaction date.

Conversion

Transactions in foreign currencies are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognised in the Statement of Profit and Loss. Foreign currency monetary assets and liabilities at the year-end are translated at the year-end exchange rates and the resultant exchange differences are recognised in the Statement of Profit and Loss.

Non-monetary items, which are measured in terms of historical cost denominated in a foreign currency, are reported using the exchange rate at the date of the transaction. Non-monetary items, which are measured at fair value or other similar valuation denominated in a foreign currency, are translated using the exchange rate at the date when such value was determined.

2.10. Financial instruments

Recognition and initial measurement

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the Statement of Profit and Loss.

Classification and subsequent measurement Financial assets

On initial recognition, a financial asset is classified as - measured at:

- Amortised cost; or
- Fair Value through Other Comprehensive Income (FVTOCI) - debt investment; or
- Fair Value through Other Comprehensive Income (FVTOCI) - equity investment; or
- Fair Value through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL.

The financial assets held with the objective to collect contractual cash flows as per the contractual terms that give rise on specified dates to cash flows that are solely payment of interest on the principal amount outstanding are measured at amortised cost on the reporting date. Interest income and impairment, if any, are recognised in the Statement of Profit and Loss.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVTOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserves. The cumulative gain or loss is not reclassified to the Statement of Profit and Loss on disposal of the investments.

These investments in equity are not held for trading. Instead, they are held for medium or long- term strategic purpose. Upon the application of Ind AS 109, the Company has chosen to designate these investments as FVTOCI as the Company believes that this provides a more meaningful presentation for medium or long-term strategic investments, than reflecting changes in fair value immediately in the Statement of Profit and Loss. Dividend income, if any, received on such equity investments are recognised in the Statement of Profit and Loss.

Equity investments that are not designated to be measured at FVTOCI are designated to be measured at FVTPL. Subsequent changes in fair value are recognised in the Statement of Profit and Loss.

Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received. Transaction costs of an equity transaction are recognised as a deduction from equity.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held-for-trading or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost. Interest expense are recognised in the Statement of Profit and Loss. Any gain or loss on derecognition is also recognised in the Statement of Profit and Loss.

De-recognition of financial assets

The Company de-recognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers

Notes to the Financial Statements for the year ended March 31, 2020

nor retains substantially all of the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for the amount it may have to pay.

If the Company enters into transactions whereby it transfers assets recognised on its Balance Sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not de-recognised and the proceeds received are recognised as a collateralised borrowing.

De-recognition of financial liabilities

A financial liability is de-recognised when the obligation under the liability is discharged, cancelled or expires. The difference between the carrying value of the original financial liability and the consideration paid is recognised in the Statement of Profit and Loss.

Impairment of financial assets

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. For debt securities at FVTOCI, the loss allowance is recognised in OCI and is not reduced from the carrying amount of the financial asset in the balance sheet.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in the Statement of Profit and Loss.

Impairment of non financial assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount, which is the higher of the value in use or fair value less cost to sell, of the asset or cash-generating unit, as the case may be, is estimated and impairment loss (if any) is recognised and the carrying amount is reduced to its recoverable amount.

In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

When an impairment loss subsequently reverses, the carrying amount of the asset or a cash-generating unit is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) earlier. The reversal of an impairment loss is recognised in Statement of Profit and Loss.

2.11. Income taxes

Current tax

Current tax is determined as the amount of tax payable in respect of taxable income for the year. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods is accounted for using the tax rates and tax laws enacted or substantively enacted as on the balance sheet date. Deferred tax assets arising on account of unabsorbed depreciation or carry forward of tax losses are recognised only to the extent that there is virtual certainty supported by convincing evidence that sufficient future taxable income will be available against which such deferred tax assets can be realised.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year

Current and deferred tax are recognised in the Statement of Profit and Loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.12. Securities issue expenses

Expenses incurred in connection with fresh issue of Share capital are accounted for as a deduction from other equity as per the provisions of Ind AS 32 – Financial Instruments Presentation.

2.13. Provisions

Provisions are recognised when there is a present obligation as a result of a past event, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

When there is a possible obligation or a present obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

2.14. Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the period. Earnings considered in ascertaining the Company's earnings per share is the net profit/ loss for the period after deducting preference dividends and any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, sub-division of shares, etc that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders is divided by the weighted average number of equity shares outstanding during the period, considered for deriving basic earnings per share and weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares.

NOTE NO. 20. COVID-19 IMPACT

From December 2019, COVID-19, has spread globally, including India. This event has significantly affected economic activity globally and in India and as a result, could impact the operations and financial results of the Company. The Company has performed an initial assessment of the likely impact this would have on the operations of the Company and its financial performance in the coming year.

For Financial Year 2019-20 financial reporting, the Company has used the principles of prudence in applying judgments, estimates and assumptions in estimating the remaining useful life of the intangible assets, fair valuation of financial assets and liabilities etc. The Company has considered internal and external information upto the date of approval of these financial statements including credit reports and economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets. The impact of the global health pandemic may be different from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions.

The Company is in the business of providing trustee services to the schemes of Mahindra Mutual Fund and earns fees for providing these services. Due to Covid-19, equity markets across the world have shown negative returns since mid-March 2020. Though, markets have shown a positive return in April 2020, the uncertainty related to revival of economic activity is likely to impact investment returns and hence affect inflows into financial instruments. The Company has recently received an equity infusion which will address liquidity concerns. The Company does not expect any major impact on its operations and expects to offer its services over a long period of time.

INDEPENDENT AUDITOR'S REPORT
To The Members of Mahindra Lifespace Developers Limited

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of Mahindra Lifespace Developers Limited ("the Company"), which comprise the Balance Sheet as at 31st March 2020, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2020, and its loss, total comprehensive loss, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Emphasis of Matter

We draw attention to Note 39 of the standalone financial statements, which describes that the potential impact of COVID-19 pandemic on the financial statements of the Company are dependent on future developments, which remain uncertain.

Our opinion is not modified in respect of this matter.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report.

Sr. No.	Key Audit Matter	Auditor's Response
1	**Revenue Recognition of Construction Contracts**	**Principal audit procedures**

	The application of the accounting standard involves certain key judgements relating to identification of distinct performance obligations, determination of transaction price of the identified performance obligations, the appropriateness of the basis used to measure revenue recognised at a point in time.
	
	Refer Notes 2.4.1 and 23 to the Standalone Financial Statements
		Our audit approach consisted testing of the design and operating effectiveness of the internal controls and substantive testing as follows:
		• Evaluated the design of the internal controls relating to the measurement of revenue recognition at a point in time.
		• Selected a sample of continuing and new contracts, and tested the operating effectiveness of the internal control, relating to identification of the distinct performance obligations and determination of transaction price.
		• Selected a sample of continuing and new contracts and performed the following procedures:
		  • Read, analysed and identified the distinct performance obligations in these contracts.
		  • Compared these performance obligations with that identified and recorded by the Company.
		  • Verified the progress towards satisfaction of performance obligations used to compute recorded revenue with contractual obligations, necessary approvals pertaining to the completion of the project, third-party certifications and the collectability of an amount of consideration.
		  • Performed project wise analytical procedures for reasonableness of revenues.

Sr. No.	Key Audit Matter	Auditor's Response
2	**Carrying values of Inventories (Construction work in Progress and Stock in Trade)**	**Principal audit procedures**
	There is a risk that the valuation of inventory may be misstated as it involves the determination of net realizable value (NRV) and estimated total construction cost of completion of each of the projects which is an area of judgement. Refer Notes 2.17 and 11 to the Standalone Financial Statements	We assessed the Company's process for the valuation of inventories. Our audit approach consisted testing of the design and operating effectiveness of the internal controls and substantive testing as follows: • Evaluated the design of the internal controls relating to the valuation of inventories. • Tested the operating effectiveness of controls for the review of estimates involved for the expected cost of completion of projects including construction cost incurred, construction budgets and net realizable value. We carried out a combination of procedures involving enquiry and observation, and inspection of evidence in respect of operation of these controls. Additionally we carried out site visits for a number of projects in the year. Selected a sample of project specific inventories and performed the procedures around: • Construction costs incurred for the project specific inventories by tracing to the supporting documents, estimated total construction cost to be incurred for completing the construction of the project and corroborated the same with the reports from external supervising engineers, where applicable. Obtained the company's assessment of NRV for the project specific inventories. • Observed the detailed project reviews to support the estimates and challenged the judgements underlying those reviews with senior operational and financial management. We focused on the significant judgements adopted by the Company, we critically assessed the forecast costs to complete. • The expected net amounts to be realized from the sale of inventories in the ordinary course of business by critically evaluating the estimates used by the Company for NRV of such inventory.
3	**Recoverability of Company's investment in a Joint Venture Company:**	**Principal audit procedures**
	The Company annually carries out an impairment assessment of investments in Joint Venture companies to determine whether the investments are impaired in respect of the Company's investments in its joint venture companies. There is a risk that the company's investment in a joint venture entity is not recoverable and should be impaired. The impairment of Company's investment in unquoted equity instruments of a joint venture company is considered to be a risk area due to the size of the balances as well as the inherent uncertainty involved in forecasting and discounting future cash flows, which are the basis of the assessment of recoverability of the investment, this is one of the key judgement areas for our audit. Refer Notes 2.20.4 and 8 to the Standalone Financial Statements	We assessed the Company's process with regard to testing the investments for impairment. Our audit approach consisted testing of the design and operating effectiveness of the internal controls and substantive testing as follows: • Evaluated the design of the internal controls relating to testing the investments for impairment. • Tested the operating effectiveness of controls for the review of assumptions and estimates used in evaluation of inputs for the purpose of fair valuation. We carried out a combination of procedures involving enquiry and observation, and inspection of evidence in respect of operation of these controls. We performed the following procedures: • Understood the methodology applied by the Company in performing its impairment test for the investment at cost. • Compared the Company's assumption with comparable benchmarks in relation to key inputs such as long-term growth rates and discount rate.

Sr. No.	Key Audit Matter	Auditor's Response
3	**Recoverability of Company's investment in a Joint Venture Company:**	**Principal audit procedures**
		• Challenged the assumptions used by the Company in the calculation of the discount rate, including comparisons with external data sources and by involving internal valuation specialist to assist us in evaluating the valuation methodology used by the Company, as well as the discount rate assumption applied data sources. • Assessed the appropriateness of the forecast cash flows within the budgeted period based on the understanding of the business and sector experience. • Performed sensitivity analysis, including a reasonably possible reduction in assumed growth rates and margins to identify areas on which to focus our procedures

Information Other than the Financial Statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Board's report, Management Discussion and Analysis Report, Corporate Governance Report and Business Responsibility Report, but does not include the standalone financial statements and our auditor's report thereon.
- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit we report that:

   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books and the reports.

   c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Cash Flows and Statement of Changes in Equity dealt with by this Report are in agreement with the relevant books of account.

   d) In our opinion, the aforesaid standalone financial statements comply with the Ind AS specified under Section 133 of the Act.

   e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164(2) of the Act.

   f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.

   g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended, in our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

   h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

      i. The Company has disclosed the impact of pending litigations on its financial position in its standalone financial statements.

      ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

      iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

2. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Mahindra Lifespace Developers Limited ("the Company") as of March 31, 2020 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the criteria for internal financial control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2 under 'Report on Other Legal and Regulatory Requirements' section of our report to the members of Mahindra Lifespace Developers Limited of even date)

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets (Property, Plant and Equipment).

(b) The fixed assets (Property, Plant and Equipment) were physically verified during the year by the Management in accordance with a regular programme of verification which, in our opinion, provides for physical verification of all the fixed assets (Property, Plant and Equipment) at reasonable intervals. According to the information and explanation given to us, no material discrepancies were noticed on such verification.

(c) With respect to immovable properties of acquired land and buildings, according to the information and explanations given to us and the records examined by us and based on the examination of the court orders approving schemes of arrangements provided to us, we report that, the title deeds of such immovable properties are held in the name of the Company as at the balance sheet date. According to the information and explanation given to us, the Company does not have any other land or building other than administrative block and project facilities, temporarily constructed at the project sites and capitalised as Building.

(ii) In our opinion and according to the information and explanations given to us, having regard to the nature of inventory, the physical verification by way of verification of title deeds, site visits by the Management and certification of extent of work completion by competent persons, are at reasonable intervals and no material discrepancies were noticed on physical verification.

(iii) According to the information and explanations given to us, the Company has granted unsecured loans to companies covered in the register maintained under section 189 of the Companies Act, 2013, in respect of which:

(a) The terms and conditions of the grant of such loans are, in our opinion, prima facie, not prejudicial to the Company's interest.

(b) The schedule of repayment of principal and payment of interest has been stipulated and repayments or receipts of principal amounts and interest have been regular as per stipulations.

(c) There is no overdue amount remaining outstanding as at the year-end.

(iv) In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Section 185 and 186 of the Companies Act, 2013 in respect of grant of loans, making investments and providing guarantees and securities, as applicable.

(v) According to the information and explanations given to us, the Company has not accepted any deposits during the year and the provisions of sections 73 to 76 of the Act are not applicable and hence reporting under clause 3 (v) of the Order is also not applicable.

(vi) The maintenance of cost records has been specified by the Central Government under section 148(1) of the Companies Act, 2013. We have broadly reviewed the cost records maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended prescribed by the Central Government under sub-section (1) of Section 148 of the Companies Act, 2013, and are of the opinion that, prima facie, the prescribed cost records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

(vii) According to the information and explanations given to us, in respect of statutory dues:

(a) The Company has generally been regular in depositing undisputed statutory dues, including Provident Fund, Income-tax, Goods and Service Tax, Sales Tax, Service Tax, Customs Duty, Value Added Tax, cess and other material statutory dues applicable to it to the appropriate authorities. The provisions of Employees' State Insurance and Excise Duty are not applicable to the operations of the Company.

(b) There were no undisputed amounts payable in respect of Provident Fund, Income-tax, Goods and Service Tax, Sales Tax, Service Tax, Customs Duty, Value Added Tax, cess and other material statutory dues in arrears as at 31st March, 2020 for a period of more than six months from the date they became payable.

(c) There are no dues of Income-tax, Sales Tax, Service Tax, Customs Duty, Excise Duty and Value Added Tax which have not been deposited as on 31st March, 2020 on account of disputes except as given below:

Name of Statute	Nature of Dues	Forum where Dispute is Pending	Period to which the Amount Relates	Amount (₹ in lakh)
Income Tax Act, 1961	Income Tax	Income Tax Appellate Tribunal	AY 2006-2007	240.23
		Commissioner of Income tax (Appeals)	AY 2007-2008	453.63
			AY 2011-2012	10.55
Finance Act, 1994	Service Tax	Appellate Authority- up to Commissioners/ Revisional authorities level	FY 2005 to 2010*	71.72
			FY 2010	339.72
			FY 2009 to 2014	67.70
			FY 2014 to 2016	41.54
Sales Tax and Value Added Tax Laws	Sales Tax and VAT	Appellate Authority- up to Commissioners/ Revisional authorities level	FY 2007 to 2010	2.89
			FY 2016 to 2017	51.08
		High Court	FY 2006 to 2010	276.59

* net of ₹ 5.82 lakhs paid under protest

(viii) In our opinion and according to the information and explanations given to us, the Company has not defaulted in the repayment of loans or borrowings to banks. The Company has not taken any loans or borrowings from debenture holders, financial institutions and government.

(ix) In our opinion and according to the information and explanations given to us, the Company has not raised any money by way of initial public offer/ further public offer (including debt instruments). The money raised by way of the term loans have been applied by the Company during the year for the purposes for which they were raised.

(x) To the best of our knowledge and according to the information and explanations given to us, no fraud by the Company and no material fraud on the Company by its officers or employees has been noticed or reported during the year.

(xi) In our opinion and according to the information and explanations given to us, the Company has paid / provided managerial remuneration in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V to the Companies Act, 2013.

(xii) The Company is not a Nidhi Company and hence reporting under clause (xii) of the CARO 2016 Order is not applicable.

(xiii) In our opinion and according to the information and explanations given to us, the Company is in compliance with Section 177 and 188 of the Companies Act, 2013, where applicable, for all transactions with the related parties and the details of related party transactions have been disclosed in the Standalone Ind AS financial statements etc. as required by the applicable accounting standards.

(xiv) During the year the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures and hence reporting under clause (xiv) of CARO 2016 is not applicable to the Company.

(xv) In our opinion and according to the information and explanations given to us, during the year the Company has not entered into any non-cash transactions with its directors or directors of its holding, subsidiary or persons connected with them and hence provisions of section 192 of the Companies Act, 2013 are not applicable.

(xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.

Sangeeta Prasad Managing Director & CEO - DIN: 02791944

Notes to the Standalone Financial Statements as at and for the year ended 31st March, 2020

1. General Information

Mahindra Lifespace Developers Limited ('the Company') is a limited company incorporated in India. The equity shares of the Company are listed on the Bombay Stock Exchange (BSE) and National Stock Exchange (NSE). Its parent and ultimate holding company is Mahindra & Mahindra Limited.

The addresses of its registered office and principal place of business are disclosed in the introduction to the annual report. The Company along with its subsidiary companies is engaged in the development of residential projects and large formats developments such as integrated cities and industrial clusters.

2. Significant Accounting Policies

2.1 Statement of compliance and basis of preparation and presentation

The Standalone Financial Statements of the Company have been prepared in accordance with the Indian Accounting Standards ('Ind AS') as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under section 133 of the Companies Act, 2013 (the 'Act') and other relevant provision of the act. The aforesaid financial statements have been approved by the Company's Board of Directors and authorised for issue in the meeting held on 14th May, 2020.

Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

2.2 Basis of measurement

These financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

2.3 Measurement of Fair Values

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these standalone financial statements is determined on such basis, except for share-based payment transactions that are within the scope of Ind AS 102 – Share based Payments and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 - Inventories or value in use in Ind AS 36 – Impairment of Assets.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 : Quoted prices (unadjusted) in active markets for identical assets or liabilities that the Company can access at the measurement date;
- Level 2 : Inputs other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 : Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2.4 Revenue from Contracts with Customers

2.4.1 Revenue from Projects

i. The Company develops and sells residential and commercial properties. Revenue from contracts is recognised when control over the property has been transferred to the customer. An enforceable right to payment does not arise until the development of the property is completed. Therefore, revenue is recognised at a point in time i.e. Completed contract method of accounting as per IND AS 115 when (a) the seller has transferred to the buyer all significant risks and rewards of ownership and the seller retains no effective control of the real estate to a degree usually associated with ownership, (b) The seller has effectively handed over possession of the real estate unit to the buyer forming part of the transaction; (c) No significant uncertainty exists regarding the amount of consideration that will be derived from real estate sales; and (d) It is not unreasonable to expect ultimate collection of revenue from buyers. The revenue is measured at the transaction price agreed under the contract.

ii. The Company invoices the customers for construction contracts based on achieving performance-related milestones.

iii. For certain contracts involving the sale of property under development, the Company offers deferred payment schemes to its customers. The Company adjusts the transaction price for the effects of the significant financing component.

iv. Costs to obtain contracts ("Contract costs") relate to fees paid for obtaining property sales contracts. Such costs are recognised as assets when incurred and amortised upon recognition of revenue from the related property sale contract.

v. Contract assets is the Company's right to consideration in exchange for goods or services that the Company has transferred to a customer when that right is conditioned on something other than the passage of time.

2.4.2 Revenue from Sale of land and other rights

Revenue from Sale of land and other rights is generally a single performance obligation and the Company has determined that this is satisfied at the point in time when control transfers as per the terms of the contract entered into with the buyers, which generally are with the firmity of the sale contracts / agreements.

2.4.3 Revenue from Project Management fees and Rental Income

Revenue from Project Management Fees and Rental Income are recognized on accrual basis as per the terms and conditions of relevant agreements.

2.4.4 Dividend and interest income

Dividend income from investment in mutual funds is recognised when the unit holder's right to receive payment has been established.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.5 Current versus non-current classification

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

Based on the nature of activity carried out by the company and the period between the procurement and realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 5 years for the purpose of Current – Non Current classification of assets & liabilities.

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

An asset is treated as current when it is:

— Expected to be realised or intended to be sold or consumed in normal operating cycle

— Held primarily for the purpose of trading

— Expected to be realised within twelve months after the reporting period, or

— Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

— It is expected to be settled in normal operating cycle

— It is held primarily for the purpose of trading

— It is due to be settled within twelve months after the reporting period, or

— There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Borrowings are classified as current if they are due to be settled within 12 months after the reporting period.

2.6 Leasing

With effect from 01st April 2019, the Company has applied Ind AS 116 using the modified prospective approach and therefore the comparative information has not been restated and continues to be reported under Ind AS 17. The impact of change in accounting policies is disclosed in Note no 33.

2.6.1 The Company as a Lessor

Leases for which the Company is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Rental income from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as expense on a straight-line basis over the lease term. The respective leased assets are included in the balance sheet based on their nature. The Company did not need to make any adjustments to the accounting for assets held as a lessor as a result of adopting the new leasing standard.

2.6.2 The Company as a Lessee

The Company recognises right-of-use asset representing its right to use the underlying asset for the lease term and a corresponding lease liability at the lease commencement date i.e. the date at which the leased asset is available for use by the Company. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of use assets are determined on the same basis as those of property, plant and equipment. Right-of-use assets are tested for impairment whenever there is any indication that their carrying amounts may not be recoverable. Impairment loss, if any, is recognised in the statement of profit and loss.

The Company measures the lease liability at the present value of the lease payments that are not paid at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate. For leases with reasonably similar characteristics, the Company, on a lease by lease basis, may adopt either the incremental borrowing rate specific to the lease or the incremental borrowing rate for the portfolio as a whole. The lease payments shall include fixed payments, variable lease payments, residual value guarantees, exercise price of a purchase option where the Company is reasonably certain to exercise that option and payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments. The company recognises the amount of the re-measurement of lease liability due to modification as an adjustment to the right-of-use asset and statement of profit and loss depending upon the nature of modification. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognises any remaining amount of the re-measurement in statement of profit and loss.

The Company has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

2.7 Foreign exchange transactions and translation

Transactions in foreign currencies i.e. other than the Company's functional currency are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise.

2.8 Employee Benefits

2.8.1 Defined contribution plans

The Company's contribution paid/payable during the year to Superannuation Fund and Provident fund is recognised in profit or loss.

2.8.2 Defined benefit plan

The liability or assets recognised in the Balance Sheet in respect of defined benefit gratuity plan is the present value of the defined benefit obligation at the end of the reporting period less the fair value of the plan assets. The defined benefit obligation is calculated by actuaries using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows with reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation.

The net interest cost is calculated applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in the employee benefit expenses in the Statement of Profit and Loss.

2.8.3 Remeasurement gains/losses

Remeasurement of defined benefit plans, comprising of actuarial gains or losses, return on plan assets excluding interest income are recognised immediately in balance sheet with corresponding debit or credit to other comprehensive income. They are included in Retained Earnings in the Statement of Changes in Equity and in the Balance Sheet. Remeasurements are not reclassified to profit or loss in subsequent period.

Remeasurement gains or losses on long term compensated absences that are classified as other long term benefits are recognised in profit or loss.

2.8.4 Short-term and other long-term employee benefits:

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under:

(a) in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and

(b) in case of non-accumulating compensated absences, when the absences occur.

Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related service are recognised as a liability at the present value of expected future payments to be made in respect of services provided by employees up the end of the reporting period using the projected unit credit method. The benefits are discounted using the market yields at the end of the reporting period that have terms approximating to the terms of the related obligation. Remeasurements as a result of experience adjustments and changes in actuarial assumptions are recognised in Statement of Profit and Loss.

2.8.5 Employee Stock Option Scheme

Equity-settled share-based payments to employees are measured at the fair value of the equity instruments at the grant date. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity.

At the end of each reporting period the Company revises its estimate of the No. of equity instruments expected to vest. The impact of revision of the original estimate, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate with the corresponding adjustments to the equity settled.

2.9 Cash and Cash Equivalents

Cash and cash equivalent in the Balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to insignificant risk of changes in value.

2.10 Earnings per share

The Company reports basic and diluted earnings per share in accordance with Ind AS - 33 on 'Earnings per Share'. Basic earnings per share is computed by dividing the net profit or loss for the year by the weighted average number of Equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit or loss for the year by the weighted average number of equity shares outstanding during the year as adjusted for the effects of all diluted potential equity shares except where the results are anti- dilutive.

2.11 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2.12 Income Taxes

Income Tax expense represents the sum of tax currently payable and deferred tax

2.12.1 Current tax

Current tax is determined as the amount of tax payable in respect of taxable income for the year. The Company's current tax is calculated using tax rate that has been enacted or substantially enacted by the end of the reporting period.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the

Company will pay normal income tax. Accordingly, MAT is recognized as an asset in the Balance Sheet when it is probable that future economic benefit associated with it will flow to the Company.

2.12.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.12.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.13 Property, plant and equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Furniture & Fixtures and Office equipment's are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Depreciation on tangible fixed assets has been provided on pro-rata basis, on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except for certain assets as indicated below:

Lease hold improvements are amortised over the period of lease/ estimated period of lease.

Vehicles used by employees are depreciated over the period of 48 months considering this period as the useful life of the vehicle for the Company.

Sales office and the sample flat/ show unit cost at site is amortised over 5 years or the duration of the project (as estimated by management) whichever is lower.

Fixed Assets held for disposal are valued at estimated net realizable value.

2.14 Intangible Assets

2.14.1 Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

2.14.2 Derecognition of Intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset are recognised in profit or loss when the asset is derecognised.

2.14.3 Useful lives of Intangible assets

Estimated useful lives of the intangible assets are as follows:

Computer Software	5 years

2.15 Investment Property

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured in accordance with Ind AS 16's requirements for cost model.

Investment property includes freehold/leasehold land and building. Depreciation on investment property has been provided on pro-rata basis, on the straight-line method as per the useful life of such property. Buildings are depreciated over the period of 60 years considering this period as the useful life for the Company.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognised.

2.16 Impairment of tangible and intangible asset other than Goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount, which is the higher of the value in use or fair value less cost to sell, of the asset or cash generating unit, as the case may be, is estimated and the impairment loss (if any) is recognised and the carrying amount is reduced to its recoverable amount. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.17 Inventories

Inventories are stated at lower of cost and net realisable value. The cost of construction material is determined on the basis of weighted average method. Construction Work-in-Progress includes cost of land, premium for development rights, construction costs and allocated interest & manpower costs and expenses incidental to the projects undertaken by the Company.

2.18 Dividend Distribution

Dividends paid (including income tax thereon) is recognized in the period in which the interim dividends are approved by the Board of Directors, or in respect of the final dividend when approved by shareholders.

2.19 Provisions and contingent liabilities

2.19.1 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions and contingent liabilities are reviewed at each Balance Sheet date.

2.19.2 Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

2.19.3 Contingent liabilities

Contingent liability is disclosed in case of:

a) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and

b) a present obligation arising from past events, when no reliable estimate is possible.

2.20 Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2.20.1 Classification and subsequent measurement

2.20.1.1 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognised financial assets are subsequently measured at either amortised cost or fair value depending on their respective classification.

On initial recognition, a financial asset is classified as - measured at:

— Amortised cost; or

— Fair Value through Other Comprehensive Income (FVTOCI) - debt investment; or

— Fair Value through Other Comprehensive Income (FVTOCI) - equity investment; or

— Fair Value Through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL.

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain and loss on derecognition is recognised in profit or loss.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Debt investment at FVTOCI are subsequently measured at fair value. Interest income under effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in Other Comprehensive Income (OCI). On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVTOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserves. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for medium or long term strategic purpose.

Equity investments that are not designated as measured at FVTOCI are designated as measured at FVTPL and subsequent changes in fair value are recognised in profit or loss.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

2.20.1.2 Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company is recognised at the proceeds received, net of directly attributable transaction costs.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is a derivative (that does not meet hedge accounting requirements) or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

2.20.2 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

2.20.3 Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

2.20.4 Impairment of financial assets

The Company applies the expected credit loss (ECL) model for recognising impairment loss on financial assets. With respect to trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets. For debt securities at FVTOCI, the loss allowance is recognised in OCI and is not reduced from the carrying amount of the financial asset in the balance sheet.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write- off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

2.20.5 Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and/or payable is recognised in profit or loss.

3. Use of estimates and judgements

In the application of the Company's accounting policies, which are described in note 2, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

In the process of applying the Company's accounting policies, management has made the following judgements based on estimates and assumptions, which have the significant effect on the amounts recognised in the financial statements:

A. Useful lives of property, plant and equipment, Investment Property and Intangible Asset

The Company reviews the useful life of property, plant and equipment, Investment Property and Intangible Asset at the end of each reporting period. This re-assessment may result in change in depreciation expense in future periods.

B. Fair value measurements and valuation processes

Some of the Company's assets and liabilities are measured at fair value for financial reporting purposes. In estimating the fair value of an asset or a liability, the Company uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Company engages third party valuers, where required, to perform the valuation. Information about the valuation techniques and inputs used in determining the fair value of various assets, liabilities and share based payments are disclosed in the notes to the financial statements.

C. Actuarial Valuation

The determination of Company's liability towards defined benefit obligation to employees is made through independent actuarial valuation including determination of amounts to be recognised in the Statement of Profit and Loss and in other comprehensive income. Such valuation depends upon assumptions determined after taking into account inflation, seniority, promotion and other relevant factors such as supply and demand factors in the employment market. Information about such valuation is provided in notes to the financial statements.

D. Taxes

Deferred tax assets are recognised for temporary differences to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

E. Determination of the timing of revenue recognition on the sale of completed and under development property

The Company has evaluated and generally concluded that the recognition of revenue over the period of time criteria are not met owing to non-enforceable right to payment for performance completed to date and, therefore, recognises revenue at a point in time. The Company has further evaluated and concluded that based on the analysis of the rights and obligations under the terms of the contracts relating to the sale of property, the revenue is to be recognised at a point in time when control transfers which coincides with receipt of Occupation Certificate.

F. Determination of performance obligations

With respect to the sale of property, the Company has evaluated and concluded that the goods and services transferred in each contract constitute a single performance obligation. In particular, the promised goods and services in contracts for the sale of property is to undertake development of property and obtaining the Occupation Certificate. Generally, the Company is responsible for all these goods and services and the overall management of the project. Although these goods and services are capable of being distinct, the Company accounts for them as a single performance obligation because they are not distinct in the context of the contract.

G. Impairment of investments

The Company assesses impairment of investments in subsidiaries, associates and joint ventures which are recorded at cost. At the time when there are any indications that such investments have suffered a loss, if any, is recognised in the statement of Profit and Loss. The recoverable amount requires estimates of operating margin, discount rate, future growth rate, terminal values, etc. based on management's best estimate.

H. Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. The Company revises the lease term if there is a change in the non-cancellable period of a lease.

The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

Notes:

a. During the year ended 31st March, 2020, the Company has opted to convert its investment in 3,20,17,000 Series B Optionally Convertible Debentures (OCD's) in Mahindra Homes Private Limited and has received 64,034 fully paid-up Series C Equity Shares (non-voting rights) of the face value of ₹ 10 each.

b. Mahindra Homes Private Limited (MHPL), a Joint Venture of the Company, is executing residential projects at NCR and Bengaluru. The residential project in NCR is a Joint Development with the land owner. The project saw a successful launch in 2015 in a buoyant market. The market has thereafter seen muted demand and declining prices. During the year ended 31st March, 2020, the company also saw significant cancellations of earlier bookings. The Company has evaluated the carrying value of its investment and on the basis of estimated Net Present Value of forecasted cash flows provided for an aggregate impairment loss of ₹ 23,731.31 lakh. This has been done as a matter of prudence in an uncertain market environment.

c. During the year ended 31st March, 2020, the Company has assessed its investment in subsidiaries and have considered provision of ₹ 230.77 lakhs (31st March 2019: ₹ NIL) in Industrial Township (Maharashtra) Limited, and reversal of provision of ₹ 1,800.00 lakhs (31st March 2019: ₹ NIL) for investment in Mahindra Infrastructure Developers Limited considering the performance of these Companies and their future projections, which have been included in note no. 28 - Other Expenses and note no.24 - Other Income of the statement of Profit & Loss respectively.

Total	**4,113.49**	**8,908.49**	3,347.49	11,303.85

\# Other Advances mainly includes Advance to Employees and Project Advances given to vendors.

Advance given to employees as per the Company's policy are not considered for the purposes of disclosure under section 186(4) of the Companies Act, 2013.

* The Company had entered into an agreement to acquire a parcel of land near Thane, Maharashtra, at a consideration of ₹ 2,000.00 lakhs. While full consideration was paid, the land was not conveyed pending completion of certain formalities. The Company has incurred additonal cost of ₹ 1,530.54 lakhs towards liasoning and other related costs upto 31st March 2020, ₹ 879.00 lakhs upto 31st March 2019 which has been included in inventories as construction work in progress in note no. 10. Tahsildar (Thane) has issued an order against the registered owner alleging non-adherence of certain conditions pertaining to Bombay Tenancy and Agricultural Lands Act, 1948 and changed the land records to reflect Government of Maharashtra as the holder of the land. The Company has been legally advised that the said order and the demand thereunder is grossly erroneous and not tenable. Accordingly, the Company has filed an appeal before Sub-Divisional Officer Thane (SDO). SDO after hearing and completing the process has issued an order dated 07th February, 2019 and set aside the order passed by Tahsildar (Thane) and has also directed Tahsildar (Thane) to delete the name of Government of Maharashtra from the land records of the aforesaid land.

11 - Inventories (at lower of cost and net realisable value)

(₹ in lakh)

Particulars		As at 31st March, 2020	As at 31st March, 2019
(a)	Raw materials	**2,006.57**	2,449.90
(b)	Construction Work-in-progress*	**80,457.45**	83,501.02
(c)	Stock in Trade	**8,786.71**	13,827.59
Total		**91,250.73**	99,778.51

* Construction Work-in-Progress represents materials at site and construction cost incurred for the projects.

Notes:

1. Based on projections and estimates by the Company of the expected revenues and costs to completion, provision for losses to completion and/ or write off of costs carried to inventory are made on projects where the expected revenues are lower than the estimated costs to completion. In the opinion of the management, the net realisable value of the construction work in progress will not be lower than the costs so included therein. The amount of inventories recognised as an expense of ₹ 35,064.64 lakhs (31st March, 2019: ₹ 33,283.67 lakhs) include 31st March, 2020: ₹ NIL (31st March, 2019: ₹ 5.34 lakhs) in respect of write down of inventory to net realisable value.
2. The Company has availed cash credit facilities and short term loans, which are secured by hypothecation of inventories.
3. The Company had purchased land parcel at Alibaug and two GAT Numbers (1755 and 1756) out of this land parcel have been attached by Income Tax department by serving order of attachment dated 31st July 2017 on one of the erstwhile land owners in lieu of recovery proceedings of tax dues of ₹ 5,988.00 lakhs payable towards Income Tax department. The Company had lodged objections to the attachment of these two GAT Numbers with Income Tax Department.

During the year ended 31st March, 2020, based on the Order Giving Effect received from the Income Tax Department, the income tax liability has been reduced to ₹ 24.12 lakhs and the wealth tax liability has been reduced to ₹6.06 lakhs.

12 - Trade receivables

Share Application money pending allotment	**0.12**	0.18
	144,492.51	169,996.34

Description of the nature and purpose of Other Equity:

General Reserve: The general reserve is used from time to time to transfer profits from retained earnings for appropriation purposes. There is no policy of regular transfer. Items included under General Reserve shall not be reclassified back into the Profit and Loss.

Securities Premium: The Securities Premium is created on issue of shares at a premium.

Share Options Outstanding Account: The Share Options Outstanding Account represents reserve in respect of equity settled share options granted to the Company's employees in pursuance of the Employee Stock Option Plan.

Retained Earnings: This reserve represents cumulative profits of the Company and effects of remeasurement of defined benefit obligations. This reserve can be utilised in accordance with the provisions of Companies Act, 2013.

Capital Redemption Reserve: The Capital Redemption Reserve was created against redemption of Preference Shares.

Share Application Money Pending allotment- This represents share application money received from the eligible employees upon exercise of employee stock option. The same will be transferred to equity share capital account after the allotment of shares to the applicants. The share application money pending allotment of ₹ 0.18 lakhs pertaining to previous year has been transferred to equity share capital during the year upon allotment of shares.

(a) Revenue from Contracts with Customers		
(i) Revenue from Projects ...	**42,103.00**	44,289.86
(ii) Project Management Fees ...	**733.98**	2,876.26
(b) Income from Operation of Commercial Complexes ...	**1,151.49**	1,437.09
Total ...	**43,988.47**	48,603.21

Notes:

(1) Contract Balances

(a) Amounts received before the related performance obligation is satisfied are included in the balance sheet (Contract liability) as "Advances received from Customers" in note no. 22- Other Current Liabilities. Amounts billed for development milestone achieved but not yet paid by the customer are included in the balance sheet under trade receivables in note no. 12.

(b) During the year, the Company recognised Revenue of ₹ 24,830.49 lakhs (April 1, 2019: ₹ 14,925.36 lakhs) from opening contract liability (after Ind AS 115 adoption) of ₹ 36,784.55 lakhs (April 1, 2019 : ₹ 32,095.47 lakhs).

(c) There were no significant changes in the composition of the contract liabilities and Trade receivable during the reporting period other than on account of periodic invoicing and revenue recognition.

(d) Amounts previously recorded as contract liabilities increased due to further milestone based invoices raised during the year and decreased due to revenue recognised during the year on completion of the construction.

(e) Amounts previously recorded as Trade receivables increased due to further milestone based invoices raised during the year and decreased due to collections during the year.

(f) There are no contract assets outstanding at the end of the year.

(g) The aggregate amount of the transaction price allocated to the performance obligations that are completely or partially unsatisfied as March 31, 2020, is ₹ 57,082.93 lakhs (March 31, 2019 : ₹ 78,615.64 lakhs). Out of this, the Company expects, based on current projections, to recognize revenue of around 35% within the next one year and the remaining thereafter. This includes contracts that can be terminated for convenience with a penalty as per the agreement since, based on current assessment, the occurrence of the same is expected to be remote.

(2) Reconciliation of revenue recognised with the contracted price is as follows:

(₹ in lakh)

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
Contracted price ...	**42,103.00**	44,289.86
Adjustments on account of cash discounts or early payment rebates, etc...	–	–
Revenue recognised as per Statement of Profit & Loss ...	**42,103.00**	44,289.86

(3) Contract costs

(₹ in lakh)

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
Contract costs included in Prepaid expenses in Note no. 10- Other Assets	**1,079.80**	117.78

(a) The Company incurs commissions that are incremental costs of obtaining a contract with a customer. Previously, all such costs were expensed as and when incurred. Under Ind AS 115, the Company recognises the incremental costs of obtaining a contract as assets under Prepaid Expenses under note no. 10 - Other Assets and amortises it upon completion of the related property sale contract.

(b) For the year ended 31 March 2020 amortisation amounting to ₹ 563.27 lakhs (31 March 2019: ₹ 375.97 lakhs) was recognised as Brokerage cost in note no. 25 - Cost of Sales. There were no impairment loss in relation to the costs capitalised.

24 - Other Income

Payments to Auditors

(₹ in lakh)

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
(i) To Statutory auditors		
For Audit	**47.50**	43.25
For Other Services	**39.75**	15.34
Reimbursement of Expenses	**1.39**	1.16
(ii) To Cost auditors for cost audit	**1.58**	1.84
Total	**90.22**	61.59

29 - Tax (Credit)/Expense

(₹ in lakh)

(a) Tax (Credit)/Expense recognised in profit or loss

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
Current Tax:		
In respect of current year	**–**	–
Deferred Tax:		
In respect of current year origination and reversal of temporary differences	**(382.44)**	2,598.67
Total	**(382.44)**	2,598.67

(b) Tax (Credit)/Expense recognised in Other Comprehensive income

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
Deferred tax related to items recognised in other comprehensive income during the year:		
Remeasurements of the defined benefit plans	**(28.77)**	41.37
Total	**(28.77)**	41.37

(c) Reconciliation of estimated income tax expense at tax rate to income tax expense reported in Profit or Loss is as follows:

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
(Loss)/Profit before tax	**22,982.95**	8,458.12
Income tax expense calculated at 25.17% (2019: 34.608%)	**(5,784.81)**	2,955.61
Effect of income that is exempt from taxation	**(776.49)**	(778.99)
Effect of expenses that is non deductible in determining taxable profit	**5,783.31**	207.33
Effect of tax incentives and concessions (research and development and other allowances)	**–**	(61.15)
Deduction under Chapter VI A	**–**	(24.20)
Changes in recognised deductible temporary differences	**395.55**	300.07
Income tax expense recognised In profit or loss	**(382.44)**	2,598.69

30 - Earnings per Share

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
	₹	₹
Basic Earnings per share	**(44.01)**	11.41
Diluted earnings per share	**(43.90)**	11.39

Basic earnings per share

The earnings and weighted average number of ordinary shares used in the calculation of basic earnings per share are as follows:

(₹ in lakh)

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
(Loss)/Profit for the year	**(22,600.51)**	5,859.45
Weighted average number of equity shares	**51,356,467**	51,339,730

Diluted earnings per share

The diluted earnings per share has been computed by dividing the net (Loss)/ Profit after tax available for equity shareholders by the weighted average number of equity shares, after giving dilutive effect of the outstanding stock options for the respective periods.

(₹ in lakh)

Particulars	For the year ended 31st March, 2020	For the year ended 31st March, 2019
(Loss)/Profit for the year used in the calculation of diluted earnings per share	**(22,600.51)**	5,859.45

The weighted average number of ordinary shares for the purpose of diluted earnings per share reconciles to the weighted average number of ordinary shares used in the calculation of basic earnings per share as follows:

	For the year ended 31st March, 2020	For the year ended 31st March, 2019
Weighted average number of equity shares used in the calculation of Basic EPS	**51,356,467**	51,339,730
Add: Options outstanding under Employee Stock Option Plan	**119,605**	89,828
Weighted average number of equity shares used in the calculation of Diluted EPS	**51,476,072**	51,429,558

31 - Financial Instruments

Capital management

The Company's capital management objectives are:

- safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders
- maintain an optimal capital structure to reduce the cost of capital

The Management of the Company monitors the capital structure using debt equity ratio which is determined as the proportion of total debt to total equity.

Particulars	As at 31st March, 2020 (₹ in lakh)	As at 31st March, 2019 (₹ in lakh)
Debt	**12,431.10**	11,954.49

Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factor.

CREDIT RISK

(i) Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. Credit risk arises from trade receivables, cash and cash equivalents & other financial assets.

Trade Receivables:

The Company's trade receivables include receivables on sale of residential flats and rent receivable. As per the Company's flat handover policy, a flat is handed over to a customer only upon payment of entire amount of consideration. The rent receivables are secured by security deposits obtained under the lease agreement. Thus, the Company is not exposed to any credit risk on receivables from sale of residential flats and rent receivables.

Cash and Cash Equivalents & Other Financial Assets

For banks and financial institutions, only high rated banks/institutions are accepted. The Company holds cash and cash equivalents with bank and financial institution counterparties, which are having highest safety ratings based on ratings published by various credit rating agencies. The Company considers that its cash and cash equivalents have low credit risk based on external credit ratings of the counterparties.

For Other Financial Assets, the Company assesses and manages credit risk based on reasonable and supportive forward looking information. Other Financial Assets are considered to be low credit risk exposure assets.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-term, medium-term and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such as equity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. All such transactions are carried out within the guidelines set by the Board of Directors.

Currency Risk

Foreign currency risk is the risk that the fair value or the future cash flows of an exposure will fluctuate because of changes in the foreign exchange rate. The Company undertakes transactions denominated in foreign currencies only for the purchases of the components which are required to carry out the construction activities. The Company manages its foreign currency risk by forward contracts that are expected to occur within a maximum 12 month from the entering of a contract.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates. The Company manages its interest rate risk by having a balanced portfolio of fixed and floating rate loans and borrowings.

Interest rate sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

Increase / decrease in basis points	Currency	As at March 31, 2020 Effect on loss before tax (₹ In Lakhs)	As at March 31, 2019 Effect on profit before tax (₹ In Lakhs)
+100	₹	**(118.92)**	(119.54)
-100	₹	**118.92**	119.54

32 - Fair Value Measurement

Fair Valuation Techiques and Inputs used - Recurring Items

(₹ in lakh)

Financial assets measured at Fair value	Fair value as at 31st March, 2020	Fair value as at 31st March, 2019	Fair value hierarchy	Valuation Technique(s)	Applicable for Level 2 and Level 3 hierarchy Key input(s)
Financial assets					
Investments					
1) Investment in Preference Shares - unquoted	**1,271.85**	757.05	Level 3	Income Approach - Discounted Cash Flow / Comparable Companies Method / Multiple Approach and Price of Recent Transaction	For Discounted Cash Flow - Companies Financial projections. These include forecasts of balance sheet, statement of profit and loss along with underlying assumptions. For Comparable Companies Method-In this approach the fair value is derived based on revenue multiple of comparable companies. For Market Multiple Appraoch - this approach the fair value is derived based on market multiples like PE multiple, Enterprise value (EV) multiple, Revenue multiple etc.
2) Investment in Equity Shares - unquoted	**15.08**	16.57	Level 3	Comparable Companies Method/ Market Multiple Approach and Price of Recent Transaction	For Comparable Companies Method - In this approach the fair value is derived based on revenue multiple of comparable companies. For Market Multiple Appraoch - this approach the fair value is derived based on market multiples like PE multiple, Enterprise value (EV) multiple, Revenue multiple etc.
3) Investment in Optionally Convertible Debentures	**13,157.71**	41,928.53	Level 3	Income Approach - Discounted Cash Flow	For Discounted Cash Flow - Companies Financial projections. These include forecasts of balance sheet, statement of profit and loss along with underlying assumptions.

Closing balance of fair value	757.05	16.57	41,928.53	42,702.15

33 - Changes in Accounting Policies

A Transition to Ind AS 116

Ministry of corporate Affairs has notified Ind AS 116 “” Leases”” which is effective from 01st April, 2019. Pursuant to this, the company has applied this standard to all lease contracts existing on 01st April, 2019 using the retrospective approach with the cumulative effect at the date of initial application. On that date, the Company recognised a lease liability measured at the present value of the remaining lease payments using the lessee’s incremental borrowing rate as at 01st April, 2019 and corresponding Right of Use (ROU) asset measured at an amount equivalent to lease liability. Therefore, there is no effect of adopting Ind AS 116 on retained earnings as at 01st April, 2019, with no restatement of comparative information. The new accounting policy is disclosed in note no. 2.6.Thus, on transition, the adoption of the new standard resulted in recognition of ‘Right of Use’ asset and a lease liability of ₹ of ₹ 973.12 lakhs.

In view of this, the operating lease rent which was hitherto accounted under ‘Other expenses’ in previous years has now been accounted as depreciation and finance costs. Accordingly the Loss for the year ended 31st March, 2020 is higher by ₹ 25.01 lakhs (net). To this extent, the performance of the current year is not comparable with previous year’s financial staements. The financial statements of year ended 31st March, 2020 results in an increase of ₹ 458.58 lakhs in depreciation for the right of use assets and increase of ₹ 58.43 lakhs in finance costs on lease liability and decrease in operating lease rent cost of ₹ 492.00 lakhs.

The Statement of Assets and Liabilities for year ended 31st March, 2020 results in an increase of ₹ 515.55 Lakhs, and ₹539.55 Lakhs in Right of use assets and Lease Liabilities respectively.

B Transition date reconciliation required by para C12(b) of Ind AS 116

Particulars	For the year ended 31st March, 2020
Operating lease commitments disclosure as per Ind AS 17 as of March 31, 2019	**165.20**
Weighted average incremental borrowing rate	**8.20%**
A. Present value as on April 1, 2019 using incremental borrowing rate	**155.68**
B. Extension options reasonably certain to be exercised	**817.44**
Total lease liabilities on transition date (April 1, 2019) (A + B)	**973.12**

C As lessee

The Company has entered into operating lease arrangements for Worli and Andheri Office. The lease is non-cancellable for a period of 1 - 2 years and may be renewed based on mutual agreement between the parties. The leases have varying terms, escatation clauses and renewal rights. From 1 April 2019, the Company has recogninsed right of use assets for these leases, except for short term leases.

Undiscounted Cash Flow of Lease liabilities	For the year ended 31st March, 2020
Less than one year	**497.47**
One to Three years	**65.90**
Three to five years	**–**
More than five years	**–**
Total undiscounted lease liabilities at Balance sheet date	**563.37**

Future minimum lease commitments of non cancellable lease	For the year ended 31st March, 2019
not later than one year	102.87
later than one year and not later than five years	62.33
later than five years	–
Total future minimum lease commitments of non cancellable lease	165.20

Cash outflow for leases for the year ended March 31, 2020 is ₹ 492 lakhs.

Expense of ₹ 81.32 lacs relating to leases of low-value assets for the year ended March 31, 2020 is inlcuded in “Rent, Rates & Taxes” of Note 28 “Other Expenses”.

34 - Segment information

The reportable segments of the Company are ‘Projects, Project Management and Development’ and ‘Operating of Commercial Complexes’.

The segments are largely organised and managed separately according to the organisation structure that is designed based on the nature of business. Operating segments are reported in a manner consistent with the internal reporting provided to the Managing Director regarded as the Chief Operating Decision Maker (“CODM”).

Description of each of the reportable segments for all periods presented, is as under:

i) Projects, Project Management & Development: This Segment of the business includes income from sale of residential units across projects, project management and development in India.

ii) Operating of Commercial Complexes: This Segment of the business includes rental income from commercial properties at New Delhi.

The CODM evaluates the Company's performance and allocates resources based on an analysis of various performance indicators by operating segments. The CODM reviews revenue and gross profit as the performance indicator for all of the operating segments. The measurement of each segment's revenues, expenses and assets is consistent with the accounting policies that are used in preparation of the financial statements. Segment profit represents the profit before interest and tax.

Information regarding the Company's reportable segments is presented below:

Revenue from type of products and services

The operating segments are primarily based on nature of products and services and hence the Revenue from external customers of each segment is representative of revenue based on products and services.

Geographical Information

The Company operates in one reportable geographical segment i.e. "Within India". Hence, no separate geographical segment wise disclosure is applicable as per the requirements of Ind AS 108 Operating Segments.

Information about major customers

During the year ended 31st March, 2020 and 2019 respectively, revenues from transactions with a single external customer did not amount to 10 percent or more of the Company's revenues from external customers.

Segment revenue reported above represents revenue generated from external customers. There were no inter-segment sales in the current year as well as previous year.

35 - Employee benefits

(a) Defined Contribution Plan

The Company's contribution to Provident Fund and Superannuation Fund aggregating ₹ 330.06 lakhs (31st March, 2019 : ₹ 316.41 lakhs) has been recognised in the Statement of Profit or Loss under the head Employee Benefits Expense.

(b) Defined Benefit Plans:

Gratuity

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. The Company makes annual contribution to the group gratuity scheme administered by the Life Insurance Corporation of India through its Gratuity Trust Fund.

Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

Investment risk

The present value of the defined benefit plan liability (denominated in Indian Rupee) is calculated using a discount rate which is determined by reference to market yields at the end of the reporting period on government bonds.

Interest risk

A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.

Longevity risk

The present value of defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

	As at	
	31-Mar-20	31-Mar-19
Discount rate(s)	**5.68%**	6.94%
Expected rate(s) of salary increase	**5.00%**	12.00%
Attrition Rate	**0 to 42: 16%**	0 to 5: 5% 5 to 42: 22%
Mortality	**IALM (2006-08) ULT.**	IALM (2006-08) ULT.

Defined benefit plans – as per actuarial valuation on 31st March, 2020

(₹ in lakh)

Particulars	Funded Plan Gratuity **For the year ended 31st March, 2020**	For the year ended 31st March, 2019
Amounts recognised in comprehensive income in respect of these defined benefit plans are as follows:		
Service Cost		
Current Service Cost	**115.48**	71.64
Past service cost and (gains)/losses from settlements	**–**	–
Net interest expense	**7.78**	10.38
Components of defined benefit costs recognised in profit or loss	**123.26**	82.02

(₹ in lakh)

Particulars	Funded Plan Gratuity **For the year ended 31st March, 2020**	For the year ended 31st March, 2019
Remeasurement on the net defined benefit liability		
Return on plan assets (excluding amount included in net interest expense)	**(0.28)**	15.95
Actuarial (gains)/loss arising from demographic assumptions	**(29.76)**	(7.15)
Actuarial (gains)/loss arising from changes in financial assumptions	**(80.94)**	87.59
Actuarial (gains)/loss arising from experience adjustments	**(3.32)**	21.98
Components of defined benefit costs recognised in other comprehensive income	**(114.30)**	118.37
Total	**8.96**	200.39
I. Net Asset/(Liability) recognised in the Balance Sheet as at 31st March, 2020		
1. Present value of defined benefit obligation as at 31st March, 2020	**331.97**	458.59
2. Fair value of plan assets as at 31st March, 2020	**264.69**	246.45
3. Surplus/(Deficit)	**(67.28)**	(212.14)
4. Current portion of the above	**–**	–
5. Non current portion of the above	**(67.28)**	(212.14)
II. Movements in the present value of the defined benefit obligation are as follows.		
1. Present value of defined benefit obligation at the beginning of the year ...	**458.58**	361.01
2. Less: Transfer out liability for employees transferred to group companies Transfer...	**(84.48)**	–
3. Expenses Recognised in Profit and Loss Account		
- Current Service Cost	**115.47**	71.64
- Past Service Cost	**–**	–
- Interest Cost	**25.73**	26.79
4. Recognised in Other Comprehensive Income		
Remeasurement gains / (losses)		
- Actuarial Gain (Loss) arising from:		
i. Demographic Assumptions	**(29.76)**	(7.15)
ii. Financial Assumptions	**(80.94)**	87.59
iii. Experience Adjustments	**(3.32)**	21.98
5. Benefit payments	**(69.31)**	(103.28)
6. Present value of defined benefit obligation at the end of the year	**331.97**	458.58
III. Movements in the fair value of plan assets are as follows.		
1. Fair value of plan assets at the beginning of the year	**246.45**	182.61
2. Interest Income - Actual Return on Plan Assets	**18.24**	13.95

(₹ in lakh)

Particulars	Funded Plan Gratuity For the year ended 31st March, 2020	For the year ended 31st March, 2019
3. Contributions by employer (including benefit payments recoverable)	**–**	49.89
4. Fair value of plan assets at the end of the year	**264.69**	246.45
IV. The fair value of the plan assets at the end of the reporting period for each category, are as follows:		
- Issuer Managed funds (Non quoted value)	**264.69**	246.45

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

(₹ in lakh)

Principal assumption		Changes in assumption (%)	Impact on defined benefit obligation: Increase in assumption	Decrease in assumption
Discount rate.....	**2020**	**1.00%**	**316.56**	**348.94**
	2019	1.00%	438.64	480.44
Salary growth rate	**2020**	**1.00%**	**345.77**	**318.86**
	2019	1.00%	474.42	443.50

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous year.

The Company expects to contribute ₹ 61.01 lakhs (31st March, 2019 ₹ 91.04 Lakhs) to the gratuity trusts during the next financial year.

Maturity profile of defined benefit obligation:

	31st March, 2020	31st March, 2019
Within 1 year	**61.01**	91.04
1 - 2 year	**40.99**	56.11
2 - 3 year	**38.46**	56.65
3 - 4 year	**41.91**	56.21
4 - 5 year	**36.00**	55.72
5 - 10 years...	**137.64**	208.39

Major Category of plan assets for Gratuity Fund is as follows:

	31st March, 2020	31st March, 2019
Asset category:		
Deposits with Insurance companies......	**100%**	100%
	100%	100%

The weighted average age considered for defined benefit obligation as at 31st March 2020 is 36.24 years (31st March, 2019: 35.93 years).

39 - Impact of COVID-19 (Global Pandemic)

The Company is actively monitoring the impact of the global health pandemic on its financial condition, liquidity, operations, suppliers, industry, and workforce. The Company has used the principles of prudence in applying judgments, estimates and assumptions based on the current estimates. In assessing the recoverability of assets such as inventories, financial assets and other assets, based on current indicators of future economic conditions, the Company expects to recover the carrying amounts of its assets. The extent to which COVID-19 impacts the operations will depend on future developments which remain uncertain.

40 - 'Disclosure as per Regulation 34(3) read with Para A of Schedule V of the SEBI (Listing Obligations and Disclosures Requirements) Regulation, 2015 and section 186(4) of Companies Act, 2013

Loans and advances in the nature of loans given to subsidiaries, joint ventures, firms / companies in which directors are interested:

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF MAHINDRA INFRASTRUCTURE DEVELOPERS LIMITED

Report on the audit of the financial statements

Opinion

We have audited the accompanying financial statements of **M/s. Mahindra Infrastructure Developers Limited** ("the Company"), which comprise the Balance sheet as at March 31, 2020 and the Statement of Profit and Loss and statement of cash flows for the year then ended, the Statement of Changes in Equity for the year then ended and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ('Act') in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020 and its Profit and cash flows for the year ended on that date.

Basis for opinion

We conducted our audit in accordance with the standards on auditing (SAs) specified under Section 143 (10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the code of ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Reporting of key audit matters as per SA 701, Key Audit Matters are not applicable to the Company as it is an unlisted company.

Information other than the financial statements and auditors' report thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the financial statements

The Company's Board of Directors are responsible for the matters stated in section 134 (5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position and financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards. From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure A", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   (c) The Balance Sheet, the Statement of Profit and Loss and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   (d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

   (e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164(2) of the Act.

   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in "Annexure B". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.

   (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

      i. The Company does not have any pending litigations which would impact its financial statements;

      ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

      iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE “A” TO THE INDEPENDENT AUDITORS’ REPORT

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor’s Report) Order, 2016 (“the Order”) issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act (the “Order”), and on the basis of such checks of the books and records of the Company, we give in the Annexure a statement on the matters specified in paragraphs 3 and 4 of the Order.

   Referred to in paragraph 1 under the heading ‘Report on Other Legal & Regulatory Requirement’ of our report of even date to the financial statements of the Company for the year ended March 31, 2020:

i. In respect of its fixed assets:

As per information provided by the Company to us, it does not have any fixed asset as on 31st March, 2020. Accordingly, paragraph 3 (i) of the Order is not applicable to the Company.

ii. In respect of its inventories:

The Company does not have inventory. Accordingly, clause 3(ii) of the Order is not applicable.

iii. In respect of Loans and Advances:

According the information and explanations given to us, the Company has granted unsecured loans to bodies corporate, covered in the register maintained under section 189 of the Companies Act, 2013, in respect of which :

(a) The terms and conditions of the grant of such loans are, in our opinion, prima facie, not prejudicial to the Company’s interest.

(b) The schedule of repayment of principal and payment of interest has been stipulated and repayments or receipts of principal amounts and interest have been regular as per stipulations

(c) There is no overdue amount remaining outstanding as at the year-end

iv. According the information and explanations given to us, the Company has not given any loans, made, any investment nor issued any guarantees and securities. Hence the provisions of section 185 and 186 of the Companies Act, 2013 are not applicable.

v. The company has not accepted any deposits covered under section 73 to 76 or any other relevant provisions of the Companies Act, 2013.

vi. The maintenance of cost records as specified under subsection (1) of the section 148 of the Act are not applicable to the Company and hence relevant provisions of the Order is not applicable.

vii. Statutory Dues:

a) According to the information and explanations given to us and the records of the company examined by us, in our opinion, the company is regular in depositing the undisputed statutory dues including Income tax, service tax, sales tax, goods and service tax and other material statutory dues as applicable with the appropriate authorities.

b) According to the records of the company and the information and explanations given to us, there are no dues of Income tax, service tax, goods and service tax, Duty of customs, duty of excise, value added tax which have not been deposited on 31st March, 2020 on account of any dispute.

viii. According to the records of the company and the information and explanations given by the Company, the Company does not have any loans or borrowing from financial institution, bank, Government or dues to debenture holders and hence relevant provisions of the Order is not applicable.

ix. The company has not raised any money by public issues during the year and in our opinion, and according to the information and explanations given to us, on an overall basis, the Company does not have term loans and hence relevant provisions of the Order is not applicable.

x. In our opinion and according to the information and explanations given to us, any fraud by the company or any fraud on the Company by its officers or employees has not been noticed or reported during the year.

xi. The Managerial remuneration has not been paid or provided in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Companies Act. Accordingly, paragraph 3 (xi) of the Order is not applicable to the Company.

xii. The Company is not a Nidhi Company and so relevant clause is not applicable.

xiii. All transactions with the related parties are in companies with Sections 177 and 188 of Companies Act, 2013 where applicable and the details have been disclosed in the Ind AS Financials statements.

xiv. The company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year which is covered under Section 42 of the Companies Act, 2013 during the year.

xv. The company has not entered into any non-cash transactions with directors or persons connected with him.

xvi. The company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF MAHINDRA INFRASTRUCTURE DEVELOPERS LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Mahindra Infrastructure Developers Limited** ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and

(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

1. Corporate information

Mahindra Infrastructure Developers Limited ("the Company") is a public company incorporated in India on 10th May, 2001 under the provisions of erstwhile Companies Act, 1956. The registered office of the Company is located at 5th Floor, Mahindra Towers, Dr. G. M. Bhosale Marg, P. K. Kurne Chowk, Worli, Mumbai – 400 018.

The Company is in the business of development of infrastructure projects and infrastructure related services.

The Company is subsidiary of Mahindra Lifespace Developers Limited, Mumbai, a company incorporated in India. The ultimate parent company is Mahindra & Mahindra Limited.

2. Significant Accounting Policies

2.1 Statement of compliance and Basis of preparation and presentation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended by the Companies (Indian Accounting Standards) Rules, 2016.

All assets and liabilities are classified as current if it is expected to realise or settle within 12 months after the Balance Sheet date.

The financial statements are presented in Indian Rupees (Rs.) which is also the Company's functional currency.

The financial statements were approved by the Board of Directors and authorised for issue on 24th April, 2020.

2.2 Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any. Cost includes financing cost relating to borrowed funds attributable to the construction or acquisition of qualifying tangible assets upto the date the assets are ready for use. The estimated useful lives, residual values, are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

When an asset is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit or loss, if any, is reflected in the statement of profit and loss.

Depreciation on assets (other than impaired assets) is calculated on straight line method at the rate of 11.31% p.a. which is based on useful life of about 9 years determined on the basis of technical evaluation by the Management of the Company and is different from the useful life of 15 years indicated in part C of schedule II to the Companies Act, 2013.

2.3 Impairment of assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the statement profit and loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the statement profit and loss.

2.4 Inventories

Inventories are stated at the lower of cost and net realisable value, whichever is lower. Cost is arrived at on first-in-first-out basis and includes overheads on absorption basis, where appropriate.

Financial assets and Liabilities

2.5 Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the Statement of profit or loss.

2.6 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

2.6.1 Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets. With respect to trade receivables, the Company measures the loss allowances at an amount equal to lifetime expected credit losses.

2.6.2 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

statement of profit and loss if such gain or loss would have otherwise been recognised in the statement of profit and loss on disposal of that financial asset.

2.7 Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.7.1 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in the statement of profit and loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

2.7.1.1 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at Fair value through profit and loss.

2.7.1.2 Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between the lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the statement of profit and loss.

2.8 Revenue recognition

Revenue on account of sale of services is recognised under the completed service contract method to the extent it is probable that the economic benefit will flow to the Company and the revenue can be reliably measured.

Sales are recognised, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers.

Dividend income is recognised in the statement of profit and loss when the right to receive payment is established.

Interest Income is accounted for on time proportion basis.

2.9 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.9.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.9.2 Deferred tax

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences could be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.9.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.9.4 Minimum Alternate Tax (MAT):

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax against which the MAT paid will be adjusted.

2.10 Cash and cash equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.11 Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/(loss) for the year is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

3. Use of estimates and judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses, etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

Notes:

1. During the year, there were no amounts required to be written off or written back in respect of debts due from or to related parties.
2. Related parties have been identified by the Management.

Note No. 21 As the Company can continue its current operations with its own cash resources for a period of atleast one year, the accounts of the Company for the period ended 31 March, 2020 have been prepared on the basis of going concern.

Note No. 22 - Financial Instruments

[I] Capital management

The Company's capital management objectives is to ensure the Company's ability to continue as a going concern

The capital structure of the Company consists of equity.

The Company does not have any borrowings.

The Company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

[II] Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

A) CREDIT RISK

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primary trade receivables) and from its financing activities, including deposits with banks and other financial instruments.

(i) Trade receivables

Outstanding customer receivables are regularly monitored.

An impairment analysis is performed at each reporting date and the Company measures the loss allowances at an amount equal to lifetime expected credit lossess. The Company does not hold collateral as security.

(ii) Financial instruments and cash deposits:

Credit risk from balances with banks is managed by the Company in accordance with the Company's policy. Investments of surplus funds are made only with bank.

B) LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS

MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

There has been no significant changes to the Company's exposure to market risk or the methods in which they are managed or measured.

(i) Currency Risk

The Company undertakes transactions denominated only in Indian Rupees and hence, there is no risk of foreign exchnage fluctuations.

(ii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not have significant exposure to the risk of changes in market interest rates.

(iii) Other price risk

The Company does not have significant other price risk.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF
MAHINDRA WORLD CITY (MAHARASHTRA) LIMITED

Report on the Ind AS Financial Statements

Opinion

1. We have audited the accompanying Ind AS financial statements of Mahindra World City (Maharashtra) Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2020, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement for the year then ended, and notes to the financial statements, and a summary of significant accounting policies and other explanatory information.
2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements, give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at March 31, 2020, and its loss and cash flows for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

4. The company's Board of Directors is responsible for the other information. The other information comprises the Board report. Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management for Ind AS Financial Statements

5. The Company's Board of Directors is responsible for the matters in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act.
6. This responsibility also includes the maintenance of adequate accounting records in accordance with the provision of the Act for safeguarding of the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.
7. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.
8. Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

9. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
10. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:
    a. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis

for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

b. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

c. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

d. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

e. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

11. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

12. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on other Legal and Regulatory Requirements

13. As required by the Companies (Auditor's Report) Order,2016, issued by the Central Government of India in term of sub-section (11) of section 143 of the Act (the "Order"), and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in the Annexure A, a statement on the matters specified in the paragraphs 3 and 4 of the Order, to the extent applicable.

14. As required by section 143(3) of the Act, we report that:

a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

b) In our opinion proper books of account as required by law have been kept by the Company so far as appears from our examination of those books;

c) the Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account;

d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014

e) On the basis of written representations received from the directors as on March 31, 2020, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2020, from being appointed as a director in terms of Section 164(2) of the Act.

f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in Annexure B.

g) In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid any remuneration to its directors.

h) With respect to the other matters included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended) in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigations which would impact its financial position.

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the accounts of Members of Mahindra World City (Maharashtra) Limited for the year ended March 31, 2020

1) The Company did not have any fixed assets during the year. Hence the provisions of the para 3(i) of the Order are not applicable.

2) The Company does not have inventory as on March 31, 2020. Hence the provisions of para 3(ii) of the Order are not applicable.

3) The Company has not granted any loans, secured or unsecured to companies, firms and other parties covered in the register maintained under section 189 of the Act. Hence, the provisions of para 3(iii) of the Order are not applicable.

4) According to the information and explanations given to us, the Company has not given any guarantee for loans taken by others from Banks or Financial Institutions during the year.

5) In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits under the provisions of section 73 to 76 of the Act and the Rules framed thereunder.

6) We have been informed that the Central Government has not prescribed maintenance of Cost records under section 148(1) of the Act.

7) i) According to the records of the Company, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Income Tax, Service Tax, Value Added Tax, GST and other statutory dues applicable to it.

   ii) There are no disputed dues outstanding as on March 31, 2020 on account of sales tax, customs duty, income tax, service tax, GST and cess.

8) The Company has not defaulted in repayment of loans or borrowing to a financial institution, bank or Government. The Company has not raised any money through debentures.

9) The Company has not raised money by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purpose for which those are raised.

10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing principles in India, and according to the information and explanations given to us, we have neither come across any instance of fraud on or by the Company, noticed or reported during the year, nor have we been informed of such case by the management.

11) According to the information and explanations given to us, the Company has not paid any remuneration to managerial personnel as defined in the Act and accordingly the provisions of para 3(xi) of the Order are not applicable to the Company.

12) The Company, not being a Nidhi Company, the para 3(xii) of the Order is not applicable to the Company.

13) According to the information and explanations given to us, all transactions with related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 and the details of the same have been disclosed in the financial statements as required by the applicable accounting standards.

14) The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review. Hence, the provisions of para 3(xiv) of the Order are not applicable to the Company.

15) According to the information and explanations given to us, the Company has not entered into non-cash transactions with directors or persons connected with him. Hence, the provisions of para 3(xv) are not applicable to the Company.

16) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, the provisions of para 3(xvi) of the Order are not applicable to the Company.

ANNEXURE “B” TO THE INDEPENDENT AUDITOR’S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF MAHINDRA WORLD CITY (MAHARASHTRA) LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of Mahindra World City (Maharashtra) Limited (“the Company”) as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management’s Responsibility for Internal Financial Controls

The Company’s management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors’ Responsibility

Our responsibility is to express an opinion on the Company’s internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor’s judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company’s internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company’s internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal financial control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and

(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

1. Corporate information

Mahindra World City (Maharashtra) Limited ("the Company") is a public company incorporated in 2005 under the provisions of erstwhile Companies Act, 1956. The registered office of the Company is located at 5th Floor, Mahindra Towers, Dr. G. M. Bhosale Marg, P. K. Kurne Chowk, Worli, Mumbai – 400 018.

The Company is in the business of development of Multi product SEZ in Maharashtra as a joint venture with Maharashtra Industrial Development Corporation (MIDC).

The Company is subsidiary of Mahindra Lifespace Developers Limited, Mumbai, a company incorporated in India. The ultimate parent company is Mahindra & Mahindra Limited.

2. Significant Accounting Policies

2.1 Statement of compliance and Basis of preparation and presentation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended by the Companies (Indian Accounting Standards) Rules, 2016.

All assets and liabilities are classified as current if it is expected to realise or settle within 12 months after the Balance Sheet date.

The financial statements are presented in Indian Rupees (Rs.) which is also the Company's functional currency.

The financial statements were approved by the Board of Directors and authorised for issue on 20th April, 2020.

2.2 Property, plant and equipment

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any. Cost includes financing cost relating to borrowed funds attributable to the construction or acquisition of qualifying tangible assets upto the date the assets are ready for use. The estimated useful lives, residual values, are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

When an asset is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit or loss, if any, is reflected in the statement of profit and loss.

Financial assets and Liabilities

2.3 Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the Statement of profit or loss.

2.4 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

2.4.1 Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets. With respect to trade receivables, the Company measures the loss allowances at an amount equal to lifetime expected credit losses.

2.4.2 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the statement of profit and loss if such gain or loss would have otherwise been recognised in the statement of profit and loss on disposal of that financial asset.

2.5 Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.5.1 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in the statement of profit and loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

2.5.1.1 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at Fair value through profit and loss.

2.5.1.2 Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between the lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the statement of profit and loss.

2.6 Revenue recognition

Revenue on account of sale of services is recognised under the completed service contract method to the extent it is probable that the economic benefit will flow to the Company and the revenue can be reliably measured.

Sales are recognised, net of returns and trade discounts, on transfer of significant risks and rewards of ownership to the buyer, which generally coincides with the delivery of goods to customers.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

Dividend income is recognised in the statement of profit and loss when the right to receive payment is established.

Interest Income is accounted for on time proportion basis.

2.7 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.7.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.7.2 Deferred tax

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences could be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.7.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.7.4 Minimum Alternate Tax (MAT):

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax against which the MAT paid will be adjusted.

2.10 Cash and cash equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.11 Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/ (loss) for the year is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2a. Use of estimates and judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses, etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

3. Use of estimates and judgments

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses, etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

Note No. 189 The accounts of the Company for the year ended 31st March, 2020 have been prepared on the basis of going concern.

Note No. 19 - Financial Instruments

Capital management

The Company's capital management objectives are:

– safeguard its ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders

– maintain an optimal capital structure to reduce the cost of capital

The Management of the Company monitors the capital structure using debt ratio which is determined as the proportion of total debt to total equity.

Debt ratios are as follows:	**As at 31st March, 2020**	As at 31st March, 2019
Debt (A)	**148,760,295**	138,604,000
Equity (B)	**(90,088,592)**	(77,214,920)
Debt Ratio (A/B)	**(1.65)**	(1.80)

[II] Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

A) CREDIT RISK

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is not exposed to credit risk .

B) LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay.

Particulars	**Less than 1 Year**	**1-3 Years**	**3 Years to 5 Years**
Non-derivative financial liabilities			
31-Mar-20			
Long Term Borrowing			
Long Term Borrowing - Principal	**-**	**-**	**148,760,295**
Non-derivative financial liabilities			
31-Mar-19			
Long Term Borrowing			
Long Term Borrowing - Principal	-	-	139,104,000

C) MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

There has been no significant changes to the Company's exposure to market risk or the methods in which they are managed or measured.

(i) Currency Risk

The Company undertakes transactions denominated only in Indian Rupees and hence, there is no risk of foreign exchnage fluctuations.

(ii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not have exposure to the risk of changes in market interest rates.

(iii) Other price risk

The Company does not have other price risk.

Note No. 20 - Fair Value Measurement

Fair Valuation Techniques and Inputs used

This section explains the judgment and estimates made in determining the fair value of the financial instruments that are (a) recognised and measured

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

at fair value and (b) measured at amortised cost and for which fair value are disclosed in financials statements. To provide an indication about the reliability of the inputs used in determining the fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standards.

Fair value of financial assets and financial liabilities that are not measured at fair value

	31-Mar-20		31-Mar-19	
Particulars	**Carrying amount**	**Fair value**	Carrying amount	Fair value
Financial assets				
Financial assets carried at Amortised Cost				
– cash & cash equivalents	**196,092**	–	381,915	–
	196,092	–	465,153	–
Financial liabilities				
Financial liabilities held at amortised cost				
– loans from other entities	**148,760,295**		139,104,000	
– other financial liabilities	**41,709,564**	–	44,761,119	–
Total	**190,469,859**	–	178,144,632	–

(Amount in ₹)

Financial assets/ financial liabilities	**Fair value hierarchy as at 31st March, 2020**

INDEPENDENT AUDITOR'S REPORT

To the Members of
Mahindra Integrated Township Limited

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the accompanying Ind AS financial statements of **Mahindra Integrated Township Limited** ("the Company"), which comprise the Balance Sheet as at 31st March, 2020, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, and notes to the financial statements including a summary of the significant accounting policies and other explanatory information (herein after referred to as "the Ind AS financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2020, the loss and total comprehensive loss, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

Information other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the other information. The other information at the date of this Auditor's Report comprises the information included in the Director's Report, but does not include the Ind AS financial statements and our auditor's report thereon.

Our opinion on the Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing specified under Section 143 (10) of the Act will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Materiality is the magnitude of misstatements in the Ind AS financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("CARO 2016" / "Order") issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act, on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, based on our audit we report that:

    (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

    (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

    (c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive income, Statement of Changes in Equity, and the Statement of Cash Flows dealt with by this Report are in agreement with the books of account.

    (d) In our opinion, the aforesaid Ind AS financial statements comply with the Ind AS specified under Section 133 of the Act.

    (e) On the basis of the written representations received from the Directors as on 31st March, 2020 taken on record by the Board of Directors, none of the Directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.

    (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.

    (g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of Rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to the best of our information and according to the explanations given to us:

        i. The Company does not have any pending litigations which would impact its financial position.

        ii. The Company did not have any long-term contracts which has any material foreseeable losses. The Company did not have any derivative contracts.

        iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE “A” TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 (“the Act”)

We have audited the internal financial controls over financial reporting of **Mahindra Integrated Township Limited** (“the Company”) as of 31st March, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls over Financial Reporting

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company’s policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the “Guidance Note”) issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2020, based on the criteria for internal financial control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

i. In respect of its fixed assets (Property, Plant and Equipment (PPE)):

   a) The Company has maintained proper records showing full particulars, including quantitative details and situation of PPE.

   b) Most of the PPE were physically verified during the year by the Management in accordance with a regular program of verification which, in our opinion, provides for physical verification of all PPE at reasonable intervals. According to the information and explanations given to us, no material discrepancies were noticed on such verification.

   c) The Company does not have any immovable properties of freehold or leasehold land and building and hence reporting under clause (i)(c) of CARO 2016 is not applicable.

ii. In our opinion and according to the information and explanations given to us, having regard to the nature of inventory, the physical verification by way of verification of title deeds, , site visits by the Management and certification of extent of work completion by competent persons, are done at reasonable intervals and no material discrepancies were noticed on physical verification. In case of inventory of construction materials lying with vendors at sites, certificates confirming the inventory have been received of the stock held at balance sheet date.

iii. The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of Act and hence reporting under clause (iii) of CARO 2016 is not applicable.

iv. In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Sections 185 and 186 of the Companies Act, 2013 in respect of grant of loans, making investments and providing guarantees and securities, as applicable.

v. According to the information and explanations given to us, the Company has not accepted any deposits during the year. There were no unclaimed deposits outstanding at any time during the year.

vi. The maintenance of cost records has been specified by the Central Government under Section 148(1) of the Act. We have broadly reviewed the cost records maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended, prescribed by the Central Government under subsection (1) of Section 148 of the Act and are of the opinion that, prima facie, the prescribed cost records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

vii. According to the information and explanations given to us, in respect of statutory dues:

   a) The Company has generally been regular in depositing undisputed statutory dues including Provident Fund, Income Tax, Goods and Services Tax ("GST") and other material statutory dues applicable to it with the appropriate authorities.

   b) There were no undisputed amounts payable in respect of Provident Fund Income Tax, GST and other material statutory dues in arrears as at 31st March, 2020 for a period of more than six months from the date they became payable.

   c) There are no dues of Income Tax and GST as on 31st March, 2020 on account of disputes.

viii. In our opinion and according to the information and explanations given to us, the Company has not defaulted in the repayment of loans or borrowings to banks and debenture holders. The Company has not taken any loans or borrowings from financial institutions and government.

ix. In our opinion and according to the information and explanations given to us, the Company has not raised any moneys by way of initial public offer or further public offer (including debt instruments) The money raised by way of term loans have been applied by the Company during the year for the purposes for which they were raised other than temporary deployment pending application.

x. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have neither come across any instance of fraud by the Company or on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of such cases by the Management.

xi. In our opinion and according to the information and explanation given to us, the Company has not paid / provided any managerial remuneration and accordingly reporting under clause (xi) of CARO 2016 is not applicable.

xii. The Company is not a Nidhi Company and hence reporting under clause (xii) of CARO 2016 is not applicable.

xiii. In our opinion and according to the information and explanations given to us the Company is in compliance with Sections 177 and 188 of the Act, where applicable, for all transactions with the related parties and the details of related party transactions have been disclosed in the Ind AS financial Statements as required by the applicable accounting standards.

xiv. During the year the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures and hence reporting under clause (xiv) of CARO 2016 is not applicable to the Company.

xv. In our opinion and according to the information and explanations given to us, during the year the Company has not entered into any non-cash transactions with its directors or directors of its holding company or persons connected with them and hence provisions of Section 192 of the Act are not applicable.

xvi. The Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934.

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

1. General Information

Mahindra Integrated Township Limited ("the Company") was incorporated on June 26, 1996.

The Company is a Co-developer, approved under Special Economic Zone Act, 2005, engaged in development of township including residential infrastructure in Mahindra World City SEZ and giving it on perpetual lease. The address of its registered office and principal place of business is Administrative Block, Central Avenue, Mahindra World City, Chengalpet, Kancheepuram – 603 002.

The level of activity carried out by the Company depends on the number of projects handled and accordingly the revenue from operations may not be comparable on a year-to-year basis.

2. Significant Accounting Policies

2.1 Statement of compliance

The financial statements of the Company have been prepared in accordance with the Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 ("the Act") and other relevant provision of the Act.

The aforesaid financial statements have been approved by the Company's Board of Directors and authorised for issue in their meeting held on 15th April, 2020.

2.2 Basis of measurement

2.2.1 Basis of preparation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

2.2.2 Exemption from preparation of consolidated financial statements

The Company has investments in a subsidiary. The Holding company, Mahindra Lifespaces Developers Limited, having its registered office at 5th floor, Mahindra Towers, Worli, Mumbai 400 018 are presenting the consolidated financial statements. The Company has therefore availed the exemption under paragraph 4(a) of Ind AS 110 and have satisfied the conditions for exemption from preparing consolidated financial statements as per Companies (Accounts) Amendments Rules, 2016 and thereby does not present consolidated financial statements.

Consequently, the accounting policies mentioned herein relate to the standalone financial statements of the Company.

2.2.3 Measurement of Fair Values

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis as applicable.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2.3 Revenue from Contracts and Customers

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

2.3.1 Revenue from Projects

The Company develops and sells residential and commercial properties. Revenue from contracts is recognised when control over the property has been transferred to the customer. An enforceable right to payment does not arise until the development of the property is completed. Therefore, revenue is recognised at a point in time when the legal title has passed to the customer and the development of the property is completed. The revenue is measured at the transaction price agreed under the contract.

The Company invoices the customers for construction contracts based on achieving a series of performance-related milestones.

For certain contracts involving the sale of property under development, the Company offers deferred payment schemes to its customers. The Company adjusts the transaction price for the effects of the significant financing component.

2.3.2 Revenue from sale of Land

Revenue from Sale of land is generally a single performance obligation and the Company has determined that this is satisfied at the point in time when control transfers as per the terms of the contract entered into with the buyers, which generally are with the firmity of the sale contracts / agreements. The determination of transfer of control did not change upon the adoption of Ind AS 115

2.3.3 Revenue from Project Management Fees

Project Management Fees receivable on fixed period contracts is accounted over the tenure of the contract/ agreement. Where the fee is linked to the input costs, revenue is recognised as a proportion of the work completed based on progress claims submitted. Where the management fee is linked to the revenue generation from the project, revenue is recognised on the percentage of completion basis.

2.3.4 Contract Costs

Costs to obtain contracts ("Contract costs") relate to fees paid for obtaining property sales contracts. Such costs are recognised as assets when incurred and amortised upon recognition of revenue from the related property sale contract.

2.3.5 Significant accounting judgements, estimates and assumptions

2.3.5.1 Determining the timing of revenue recognition on the sale of completed and under development property

The Company has evaluated and concluded that based on a careful analysis of the rights and obligations under the terms of the contracts relating to the sale of property, the revenue is to be recognised at a point in time when control transfers which coincides with receipt of Occupation Certificate. The Company has concluded that the over-time criteria are not met owing to non-enforceable right to payment for performance completed to date and, therefore, recognises revenue at a point in time.

2.3.5.2 Determination of performance obligations

With respect to the sale of property, the Company has concluded that the goods and services transferred in each contract constitute a single performance obligation. In particular, the promised goods and services in contracts for the sale of property is to undertake development of property and obtaining the Occupation Certificate. Generally, the

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

Company is responsible for all these goods and services and the overall management of the project. Although these goods and services are capable of being distinct, the Company accounts for them as a single performance obligation because they are not distinct in the context of the contract.

2.3.6 Dividend and interest income

Dividend income from investments in subsidiary company / mutual funds is recognised when the unit holder's right to receive payment has been established.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.4 Current versus non-current classification

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

Based on the nature of activity carried out by the company and the period between the procurement and realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 5 years for the purpose of Current – Non-Current classification of assets & liabilities.

The Company presents assets and liabilities in the balance sheet based on current / non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Borrowings are classified as current if they are due to be settled within 12 months after the reporting period.

2.5 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Rental expense from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue.

2.6 Foreign currencies

Transactions in foreign currencies i.e. other than the Company's functional currency are recognised at the rates of exchange prevailing at the date of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings; and
- exchange differences on transactions entered into in order to hedge certain foreign currency risks

2.7 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2.8 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.8.1 Current tax

Current tax is determined as the amount of tax payable in respect of taxable income for the year. The Company's current tax is calculated using tax rate that has been enacted or substantively enacted by the end of the reporting period.

2.8.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

2.8.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.9 Property, plant and equipment (PPE)

PPE are stated in the balance sheet at cost less accumulated depreciation.

Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy.

An item of PPE is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss. PPE held for disposal are valued at estimated net realizable value.

Depreciation on PPE has been provided on pro-rata basis, on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013.

Lease hold improvements are amortised over the period of lease/ estimated period of lease.

2.10 Impairment of PPE

At the end of each reporting period, the Company reviews the carrying amounts of its PPE to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.11 Inventories

Inventories are stated at lower of cost and net realisable value. The cost of construction material is determined on the basis of weighted average method. Construction Work-in-Progress includes cost of land, premium for development rights, construction costs and allocated interest and manpower costs and expenses incidental to the projects undertaken by the Company.

2.12 Cash and cash equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.13 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) because of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, considering the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date.

Contingent liabilities

Contingent liability is disclosed in case of:

a) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and

b) a present obligation arising from past events, when no reliable estimate is possible.

Contingent assets

Contingent assets are disclosed where an inflow of economic benefits is probable.

2.14 Employee Benefits

Employee benefits include provident fund, gratuity fund, compensated absences, long service awards and post-employment medical benefits.

The Company's contribution to provident fund are considered as defined contribution plans and are charged as an expense as they fall due based on the amount of contribution required to be made and when services are rendered by the employees.

Long term Compensated Absences & Gratuity

Company's liability towards long term compensated absences are determined by independent actuaries, using the projected unit credit method.

Company's liability towards gratuity are determined by independent actuaries, using the projected unit credit method. Past services are recognised at the earlier of the plan amendment/curtailment and the recognition of related restructuring costs/termination benefits.

The obligation on long term compensated absences and defined benefit plans are measured at the present value of estimated future cash flows using a discount rate that is determined by reference to the market yields at the balance sheet date on government bonds where the currency and terms of the government bonds are consistent with the currency and estimated terms of the obligation.

Remeasurement gains/losses

Remeasurement of defined benefit plans, comprising of actuarial gains or losses, return on plan assets excluding interest income are recognised immediately in balance sheet with corresponding debit or credit to other comprehensive income. Remeasurements are not reclassified to profit or loss in subsequent period. Remeasurement gains or losses on long term compensated absences that are classified as other long-term benefits are recognised in profit or loss.

2.15 Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

2.15.1 Classification and subsequent measurement

2.15.1.1 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognised financial assets are subsequently measured at either amortised cost or fair value depending on their respective classification.

On initial recognition, a financial asset is classified as - measured at:

- Amortised cost; or
- Fair Value through Other Comprehensive Income (FVTOCI) - debt investment; or
- Fair Value through Other Comprehensive Income (FVTOCI) - equity investment; or
- Fair Value Through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL.

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain and loss on derecognition is recognised in profit or loss.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Debt investment at FVTOCI are subsequently measured at fair value. Interest income under effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in Other Comprehensive Income (OCI). On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVTOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserves. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for medium or long term strategic purpose.

Equity investments that are not designated as measured at FVTOCI are designated as measured at FVTPL and subsequent changes in fair value are recognised in profit or loss.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

2.15.1.2 Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company is recognised at the proceeds received, net of directly attributable transaction costs.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is a derivative (that does not meet hedge accounting requirements) or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

2.15.2 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

2.16 Earnings per Share

Basic / Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post-tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year.

2.17 Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in Note 1, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

Judgements

In the process of applying the Company's accounting policies, management has made the following judgements based on estimates and assumptions, which have the significant effect on the amounts recognised in the financial statements.

Determination of the timing of revenue recognition on the sale of completed and under development property

The Company has evaluated and generally concluded that the recognition of revenue over the period of time criteria are not met owing to non-enforceable right to payment for performance completed to date and, therefore, recognises revenue at a point in time. The Company has further evaluated and concluded that based on the analysis of the rights and obligations under the terms of the contracts relating to the sale of property, the revenue is to be recognised at a point in time when control transfers which coincides with receipt of Occupation Certificate.

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Lakh unless otherwise stated

Taxes

Deferred tax assets are recognised for temporary differences to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Actuarial Valuation

The determination of Company's liability towards defined benefit obligation to employees is made through independent actuarial valuation including determination of amounts to be recognised in the Statement of Profit and Loss and in other comprehensive income. Such valuation depends upon assumptions determined after considering inflation, seniority, promotion and other relevant factors such as supply and demand factors in the employment market. Information about such valuation is provided in notes to the financial statements.

Particulars	As at 31st March, 2020	As at 31st March, 2019
Construction Materials	**575.97**	165.42
Construction Work-in-progress*	**10,687.29**	8,477.80
Finished goods	–	39.71
Total Inventories (at lower of cost and net realisable value)..	**11,263.26**	8,682.93

*Construction Work-in-Progress represents materials at site and unbilled costs on the projects. Based on projections and estimates by the Company of the expected revenues and costs to completion, provision for losses to completion and/ or write off of costs carried to inventory are made on projects where the expected revenues are lower than the estimated costs to completion. In the opinion of the management, the net realisable value of the construction work in progress will not be lower than the costs so included therein.

Construction Materials primarily comprises of Steel, Cement, Chrome plated & Sanitary Fixtures and UPVC windows which are used for construction activities.

The cost of inventories recognised as an expense during the year in respect of continuing operations was Rs.39.72 lakhs (31st March, 2019: 358.58 lakhs).

The Company has availed cash credit facilities, Term Loan and borrowed through Non-Convertible Debentures, which are secured by hypothecation of inventories.

Based on detailed assessment and evaluation of impact of the COVID-19 epidemic, the management concluded that realiseable value of these inventories will not be lower than the carrying value .

Note No. 9 - Trade Receivables

* **Terms/ rights attached to equity shares:** The Company has one class of equity shares having a par value of Rs.10 per share. Each shareholder is eligible for one vote per share. Dividends are paid in Indian Rupees. The dividends proposed by the Board of Directors are subject to the approval of the shareholders at the Annual General Meeting. Repayment of capital will be in proportion to the number of equity shares held.

In the Board meeting held on 23rd January, 2020, the Board of Directors of the Company had approved the proposal for buy-back of 435,000 Equity Shares at Rs 28.60 per equity share aggregating to Rs 124.41, in accordance with Article 79 of the Articles of Association of the Company, and subject to such other approvals, permissions and sanctions of Registrar of Companies, Chennai and / or other authorities, institutions or bodies, as may be necessary. The buy back was completed on 26th March, 2020 after obtaining all approvals and the necessary forms were filed with the Statutory authorities. Post buyback, the paid up capital of the Company reduced from Rs. 5,043.50 lakhs to Rs. 5,000.00 lakhs. Consequent to the buy back and as required by Section 69 of Companies Act, 2013, an amount of Rs. 43.50 lakhs was transferred to Capital Redemption Reserve Account (Refer Note 12a). The buyback was made out of reserves of the Company.

Balance at 1st April, 2018	44.16
Adjustment as per IND AS 115	(2.23)
Additional provisions recognised	1.91
Amounts used during the year	(12.91)
Balance at 31st March, 2019	**30.93**
Balance at 1st April, 2019	30.93
Additional provisions recognised	0.31
Amounts used during the year	(2.60)
Balance at 31st March, 2020	**28.64**

Defect Liability Provision:

Provision for defect liability represents present value of management's best estimate of the future outflow of economic resources that will be required in respect of residential units given under perpetual lease, the estimated cost of which is accrued during the period of construction, upon lease of units and recognition of related revenue. Management estimates the related provision for future defect liability claims based on historical cost of rectifications and is adjusted regularly to reflect new information. The residential units are generally covered under a defect liability period limited to 5 year from the date of handover of residential units. It is expected that most of these costs will be incurred within two years after the reporting date.

Note No. 28 - Financial Instruments

Capital management

The Company manages capital risk in order to maximize shareholders' profit by maintaining sound/optimal capital structure through monitoring of financial ratios, such as debt-to-equity ratio and net borrowings-to-equity ratio on a monthly basis and implements capital structure improvement plan when necessary. There is no change in the overall capital risk management strategy of the Company compared to last year.

The Company uses debt ratio as a capital management index and calculates the ratio as total debt divided by total equity. Total liabilities and total equity are based on the amounts stated in the financial statements.

The Company is not subject to externally enforced regulation.

Debt-to-equity ratio as of 31st March, 2020 and 31st March, 2019 is as follows:

	31st March, 2020	31st March, 2019
Debt (A)	**9,381.60**	7,457.30
Equity (B)	**6,806.73**	7,907.01
Debt Equity Ratio (A/B)	**1.38**	0.94

Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

CREDIT RISK

(i) Credit risk management:

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. Credit risk arises from trade receivables, cash and cash equivalents, mutual Funds & other financial assets.

(ii) Trade Receivables:

The Company's trade receivables include receivables on lease of residential flats and rent maintenance receivable. As per the Company's flat handover policy, a flat is handed over to a customer only upon payment of entire amount of consideration. The rent maintenance receivables are secured by security deposits obtained under the lease agreement. Thus, the Company is not exposed to any credit risk on receivables from sale of residential flats and rent receivables. However owing to COVID-19 pandemic outbreak the Company expects considerable slow down in collections of existing receivables and delay in billing further milestones owing to lockdown.

(iii) Cash and Cash Equivalents & Other Financial Assets

For banks and financial institutions, only high rated banks/institutions are accepted. The Company holds cash and cash equivalents with bank and financial institution counterparties, which are having highest safety ratings based on ratings published by various credit rating agencies. The Company considers that its cash and cash equivalents have low credit risk based on external credit ratings of the counterparties.

For other financial assets, the Company assesses and manages credit risk based on reasonable and supportive forward looking information. The Company does not have significant credit risk exposure for these items.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

Particulars	Less than 1 Year	1-3 Years	3 Years to 5 Years	5 years and above

The amounts included above for financial guarantee contracts are the maximum amounts the Company could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Lakh unless otherwise stated

the guarantee. Based on expectations at the end of the reporting period, the Company considers that it is more likely than not that such an amount will not be payable under the arrangement.

(iii) Financing arrangements

The Company had access to following undrawn borrowing facilities at the end of the reporting period:

Particulars	31st March, 2020	31st March, 2019
Secured Bank Overdraft facility		
- Expiring within one year	**1,812.61**	39.29
Secured Bank Guarantee Limit (sub limit of CC Credit facility)		
- Expiring within one year	**100.00**	100.00
Secured Letter of Credit (sub limit of CC Credit facility)		
- Expiring within one year	**100.00**	100.00

(iv) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Particulars	Less than 1 Year	1-3 Years	3 Years to 5 Years	5 years and above
Non-derivative financial assets				
31st March, 2020				
Non-interest bearing				
Non Current Investment	–	–	–	**6,629.48**
Trade Receivable	**827.76**	–	–	–
Cash and Cash equivalents	**148.22**	–	–	–
Bank balances other than above	**366.00**	–	–	–
Other Non Current Financial Assets	–	–	–	**0.75**
Other Current Financial Assets	**17.72**	–	–	–
Total	**1,359.70**	–	–	**6,630.23**
31st March, 2019				
Non-interest bearing				
Non Current Investment	–	–	–	6,629.48
Trade Receivable	323.74	–	–	–
Cash and Cash equivalents	43.37	–	–	–
Bank balances other than above	421.80	–	–	–
Other Non Current Financial Assets	–	–	–	0.75
Other Current Financial Assets	7.73	–	–	–
Total	796.64	–	–	6,630.23

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such as equity price risk and commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company uses derivatives to manage market risks. Derivatives are only used for economic hedging purposes and not as speculative investments. All such transactions are carried out within the guidelines set by the Board of Directors and Risk Management Committee.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

Currency Risk

The Company undertakes transactions denominated only in India Rupees and hence there is no risk of foreign exchange fluctuations.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates.

The Company manages its interest rate risk by having a balanced portfolio of fixed and variable rate loans and borrowings. The Company's policy is to keep atleast 60% of its borrowings at fixed rates of interest. At 31 March 2020, 100% of the Company's borrowings are at a fixed rate of interest (31 March 2019: 100%).

Interest rate sensitivity

The sensitivity analysis below has been determined based on exposure to interest rate for both derivative and non-derivative instruments at the end of reporting period. For floating rate liabilities, analysis is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole year.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Company's (loss)/profit before tax is affected through the impact on floating rate borrowings, as follows:

	Currency	Increase/ decrease in basis points	Effect on (loss)/profit before tax
31st March, 2020	**INR**	**+100**	**(24.87)**
	INR	**-100**	**24.87**

	INR	-100	24.61

29 - Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in note 2, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Lakh unless otherwise stated

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

COVID -19 Impact assessment :The management assessed the Company's future projections in light of the developments due to COVID 19 situation worldwide and has reassessed the impact that it may cause on the Company's financial and operational performance .The Company may experience delays in getting new prospects and signing of lease deeds, and consequent impact on the inflow of receivables, during the lock down period. The construction and development activities are temporarily suspended owing to lock down and the tenure of lock down is not yet certain as on date of approval of these financail statements. This will delay the milestone billings and the overall handover timelines to customers for projects under development. Statutory authorities have considered relexation norms for handover deadlines and the Company At this moment expects no outflow on account delayed payment compensation . The management expects the Company to resume normalcy within a period of 3 to 4 months post lockdown with some impact on overall milestone billings, collections and registrations through the financial year. The Company has credit and term loan facilities available to meet the project costs and pay off the vendors and bankers in the immediate 12 months from the date of approval of these financial statements. The Company expects no additional inflow of capital towards currently planned development. Based on the above assessment, the management is of the view that company will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance.

– Current maturities of long term debt	–	2,499.25	–	2,499.25
– Trade and other payables	–	1,879.63	–	1,879.63
Total	–	9,336.93	–	9,336.93

For recurring and non-recurring fair value measurements, if the highest and best use of a nonfinancial asset differs from its current use, an entity shall disclose that fact and why the non-financial asset is being used in a manner that differs from its highest and best use.

The fair values of the financial assets and financial liabilities included in the level 2 and level 3 categories above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

Note No. 32- INDAS 115 Disclosures

1 **Contract Balances**

Amounts received before the related performance obligation is satisified are included in the balance sheet (Contract liability) as "Advances received from Customers". Amounts billed for development milestone achieved but not yet paid by the customer are included in the balance sheet under trade receivables.

During the year, the Company recognised Revenue of Rs. 58.92 Lakhs (FY 18-19 Rs. 626.41 lakhs) from opening contract liability (after Ind AS 115 adoption) of Rs. 733.94 Lakhs (FY 18-19 Rs. 683.33 lakhs).

There were no significant changes in the composition of the contract liabilities and Trade receivable during the reporting period other than on account of periodic invoicing and revenue recognition.

Amounts previously recorded as contract liabilities increase due to further milestone based invoices raised during the year and decrease due to revenue recognised during the year on completion of the construction.

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Lakh unless otherwise stated

Amounts previously recorded as Trade receivables increase due to further milestone based invoices raised during the year and decrease due to colelctions during the year.

There are no contract assets outstanding at the end of the year.

The aggregate value of performance obligations that are completely or partially unsatisfied as at 31st March, 2020, is Rs. 3,256.44 Lakhs (FY 18-19 Rs. 733.94 lakhs). Out of this, the Company expects to recognize revenue of 100% within the next two year and the remaining thereafter. This includes contracts that can be terminated for convenience with a penalty as per the agreement since, based on current assessment, the occurrence of the same is expected to be remote.

2 Reconciliation of revenue recognized with the contracted price is as follows:

Rs. Lakhs

	Year ended 31st March, 2020	Year ended 31st March, 2019
Contracted price	**58.92**	**629.42**
Adjustments on account of cash discounts or early payment rebates, etc.	–	–
Revenue recognised as per Statement of Profit & Loss	**58.92**	**629.42**

3 Contract costs

Rs. Lakhs

	As at 31st March, 2020	As at 31st March, 2019
Costs to obtain contracts	**26.82**	**13.18**

For the year ended 31st March 2020, amortisation amounting to Rs. 0.56 lakhs (Rs. 4.16 lakhs) was recognised as part of other expenses in the statement of profit or loss. There was no impairment loss in relation to the costs capitalised.

(Also refer note 2.3.2)

Note No. 33 - Employee Benefits

a) Defined Contribution plans

The Company makes Provident fund contribution to defined contribution plans for the employees. Under the scheme, the company is required to contribute a specified percentage of the payroll cost to the fund the benefits. The Company recognized Rs. 15.91 Lakhs (PY Rs. Nil) for Provident fund & Other funds contributions in the statement of profit and Loss. The contributions payable to these plans by the company are at rates specified in the rules of the scheme.

b) Defined Benefit Plans

The Company's obligation towards gratuity is defined benefit plan. The gratuity expense is included under 'Employee Benefit Expenses' in Note 22 Employee benefits expense. The details of actuarial valuation are given below:

Gratuity:

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

Interest risk

A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.

Longevity risk

The present value of defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary risk

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

	Rs. Lakhs Gratuity (Unfunded) 2019–20
a. Net Liabilities recognized in the balance sheet	
Present Value of Defined Benefit Obligation	**53.34**
Fair Value of Plan assets	–
Liabilities recognised in the balance sheet	**53.34**
b. Expense recognized in the Statement of Profit and Loss	
Past service cost	–
Current Service cost	**5.68**
Interest cost	**2.39**
Expected return on plan assets	–
Actuarial (gains) / Losses	**10.23**
Total expenses	**18.30**
c. Change in present value of Defined Benefit obligation	
Present Value of the obligation at the beginning of the year	–
Past service cost	–
Current Service cost	**5.68**
Interest Cost	**2.39**
Actuarial (Gains) /Losses	**10.23**
Benefits Paid	–
Present value of the obligation as at the end of the year	**18.30**
d. Principal actuarial assumptions	
Discount Rate	**6.50%**
Expected rate of Salary increase	**10.00%**
Attrition Rate	**10.00%**
Mortality	**LIC (2006–08) Ultimate mortality tables**

e. Estimates of future salary increases considered in actuarial valuation take account of inflation, seniority, promotions, increments and other relevant factors such as supply and demand in the employment market.

	For the year ended 31st March, 2020
Actuarial assumptions for long-term compensated absences	
Discount rate	**6.50%**
Salary escalation	**10.00%**
Attrition	**10.00%**

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Lakh unless otherwise stated

The discount rate is based on the prevailing market yields of Government of India securities as at the balance sheet date for the estimated term of the obligations.

The estimate of future salary increases considered, takes into account the inflation, seniority, promotion, increments and other relevant factors.

The Sensitivity of defined benefit obligation to changes in the weighted principle assumptions is

Name of the Subsidiary	Year	Change in Assumption	Impact on defined benefit obligation — Increase in assumption	Impact on defined benefit obligation — Decrease in assumption
Discount Rate	2020	0.50%	50.99	55.88
	2019	0.50%	–	–
Salary Growth Rate	2020	0.50%	55.53	51.12
	2019	0.50%	–	–

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

Maturity profile of defined benefit obligation:

	As at 31st March, 2020
Year 1	**3.99**
Year 2	**4.05**
Year 3	**4.13**
Year 4	**4.24**
Year 5	**4.21**
Next 5 Years	**21.54**

Note No. 34 - Leases

Ministry of corporate Affairs has notified Ind AS 116 “Leases” which is effective from 01st April, 2019. Pursuant to this, the company has applied this standard to all lease contracts existing on 01st April, 2019 using the retrospective approach with the cumulative effect at the date of initial application. The adoption of the Standard did not have any material impact to the financial results of the Company. Therefore, there is no effect of adopting Ind AS 116 on retained earnings as at 01st April, 2019. Thus, on transition, the adoption of the new standard resulted in recognition of ‘Right of Use’ asset and lease liability is NIL.

The Company has not applied the requirement of IND AS 116 to short-term leases of all assets that have a lease term of 12 months or less. Amount recognised in Statement of Profit and Loss Account is Rs 4.73 lakhs

Note No. 35 - Additional Information to the Financial Statements

i) Disclosures required under Section 22 of the Micro, Small and Medium Enterprises Development Act, 2006

Dues to Micro and Small Enterprises have been determined to the extent such parties have been identified on the basis of information collected by the Management. This has been relied upon by the auditors. There are no overdue amounts payable to Micro, Small and Medium Enterprises, as defined in the Micro, Small and Medium Enterprises Development Act, 2006, as at the reporting date or anytime during the year and hence no interest has been paid or payable accordingly no additional disclosures have been made.

Sl No	Particulars	31st March, 2020	31st March, 2019
1	Dues remaining unpaid		
	Principal	**–**	**55.06**
	Interest	**–**	–
2	Interest paid in terms of Section 16 of the MSMED Act along with the amount of payment made to the supplier beyond the appointed day during the year		
	Principal paid beyond the appointed date	**–**	–
	Interest paid in terms of Section 16 of the MSMED Act	**–**	–
3	Amount of interest due and payable for the period of delay on payments made beyond the appointed day during the year	**–**	–
4	Further interest due and payable even in the succeeding years, until such date when the interest due as above are actually paid to the small enterprises	**–**	–
5	Amount of interest accrued and remaining unpaid	**–**	–

Note No. 36 - Other Notes

i. The Company did not have any pending litigation which would impact its financial position;

ii. The Company did not have any material foreseeable losses on long term contracts; the company has not entered into any derivative contracts;

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

Note No. 37 - Approval of Financial Statements

The aforesaid financial statements have been approved by Company's board of directors and the authorised for issue in the meeting held on 19th April, 2019.

Note No 38 - Event after the reporting period

No material events have occurred after the Balance Sheet date and upto the approval of the financial statements.

Note No 39 - Previous year figures

The figures for previous year have been regrouped/reclassified wherever necessary to conform to current year’s grouping/classification.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF KNOWLEDGE TOWNSHIP LIMITED

Report on the Ind AS Financial Statements

Opinion

We have audited the accompanying Ind AS financial statements of Knowledge Township Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2020, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement for the year then ended, and notes to the financial statements, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements, give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at March 31, 2020, and its loss and cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The company's Board of Directors is responsible for the other information. The other information comprises the Board report. Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management for Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act.

This responsibility also includes the maintenance of adequate accounting records in accordance with the provision of the Act for safeguarding of the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

a. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

b. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

c. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

d. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

e. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order,2016, issued by the Central Government of India in term of sub-section (11) of section 143 of the Act (the "Order"), and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in the Annexure A, a statement on the matters specified in the paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by section 143(3) of the Act, we report that:
   a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
   b) In our opinion proper books of account as required by law have been kept by the Company so far as appears from our examination of those books;
   c) the Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account;
   d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014
   e) On the basis of written representations received from the directors as on March 31, 2020, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2020, from being appointed as a director in terms of Section 164(2) of the Act.
   f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in Annexure B.
   g) In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid any remuneration to its directors.
   h) With respect to the other matters included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended) in our opinion and to the best of our information and according to the explanations given to us:
      i. The Company does not have any pending litigations which would impact its financial position.
      ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
      iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the accounts of Members of Knowledge Township Limited for the year ended March 31, 2020

1) The Company does not have fixed assets. Hence, para 3(i) of the Order is not applicable to the Company.

2) Company's inventory comprises of Construction work in progress and no material discrepancies were noticed in the same.

3) The Company has not granted any loans, secured or unsecured to companies, firms and other parties covered in the register maintained under section 189 of the Act. Hence, the provisions of para 3(iii) of the Order are not applicable.

4) According to the information and explanations given to us, the Company has not given any guarantee for loans taken by others from Banks or Financial Institutions during the year.

5) In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits under the provisions of section 73 to 76 of the Act and the Rules framed thereunder.

6) We have been informed that the Central Government has not prescribed maintenance of Cost records under section 148(1) of the Act.

7) i) According to the records of the Company, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Income Tax, Service Tax, Value Added Tax, GST and other statutory dues applicable to it.

   ii) There are no disputed dues outstanding as on March 31, 2020 on account of sales tax, customs duty, income tax, service tax, GST and cess.

8) The Company has not obtained loans or borrowing from a financial institution, bank or Government. The Company has not raised any money through debentures during the year.

9) The Company has not raised money by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purpose for which those are raised.

10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing principles in India, and according to the information and explanations given to us, we have neither come across any instance of fraud on or by the Company, noticed or reported during the year, nor have we been informed of such case by the management.

11) According to the information and explanations given to us, the Company has not paid any remuneration to managerial personnel as defined in the Act and accordingly the provisions of para 3(xi) of the Order are not applicable to the Company.

12) The Company, not being a Nidhi Company, the para 3(xii) of the Order is not applicable to the Company.

13) According to the information and explanations given to us, all transactions with related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 and the details of the same have been disclosed in the financial statements as required by the applicable accounting standards.

14) The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review. Hence, the provisions of para 3(xiv) of the Order are not applicable to the Company.

15) According to the information and explanations given to us, the Company has not entered into non-cash transactions with directors or persons connected with him. Hence, the provisions of para 3(xv) are not applicable to the Company.

16) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, the provisions of para 3(xvi) of the Order are not applicable to the Company.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF Knowledge Township Limited

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Knowledge Township Limited ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and

(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31,2020. based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

1. General Information

The company was incorporated on August 16, 2007 and is engaged in the business of development of Knowledge City in Pune, Maharashtra. Its parent and ultimate holding company is Mahindra Lifespace Developers Ltd.

The addresses of its registered office and principal place of business are disclosed in the introduction to the annual report.

2. Significant Accounting Policies

2.1 Statement of compliance

The financial statements have been prepared in accordance with Ind-AS notified under the Companies (Indian Accounting Standards) Rules, 2015.

2.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Companyconsiders the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in thesefinancial statements is determined on such a basis, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

2.3 Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell.

2.4 Revenue recognition

2.4.1 Revenue from Projects

The Company develops and sells residential and commercial properties. Revenue from contracts is recognised when control over the property has been transferred to the customer. An enforceable right to payment does not arise until the development of the property is completed. Therefore, revenue is recognised at a point in time when the legal title has passed to the customer and the development of the property is completed. The revenue is measured at the transaction price agreed under the contract.

The Company invoices the customers for construction contracts based on achieving a series of performance-related milestones.

For certain contracts involving the sale of property under development, the Company offers deferred payment schemes to its customers. The Company adjusts the transaction price for the effects of the significant financing component.

2.4.2 Revenue from Sale of land and other rights

Revenue from Sale of land and other rights is generally a single performance obligation and the Company has determined that this is satisfied at the point in time when control transfers as per the terms of the contract entered into with the buyers, which generally are with the firmity of the sale contracts / agreements. The determination of transfer of control did not change upon the adoption of Ind AS 115.

2.4.3 Contract Costs

- Costs to obtain contracts (“Contract costs”) relate to fees paid for obtaining property sales contracts. Such costs are recognised as assets when incurred and amortised upon recognition of revenue from the related property sale contract.

2.4.4 Dividend and interest income

Dividend income from investment in mutual funds is recognised when the unit holder’s right to receive payment has been established (provided that it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset’s net carrying amount on initial recognition.

2.5 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2.6 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.6.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from ‘profit before tax’ as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company’s current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.6.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.6.3 *Current and deferred tax for the year*

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.7 *Property, plant and equipment*

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

Properties during construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

2.8 *Impairment of tangible and intangible assets other than goodwill*

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.9 *Inventories*

Inventories are stated at the lower of cost and net realisable value. The cost of construction material is determined on the basis of weighted average method. Construction Work-in-Progress includes cost of land, premium for development rights, construction costs and allocated interest & manpower costs and expenses incidental to the projects undertaken by the Company.

2.10 *Provisions*

Provisions are recognised when the Company has a present obligation (legal or constructive) because of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, considering the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

2.11 *Employee benefits provisions*

Employee benefits provisions are measured and classified into long term and short-term provisions based on Actuarial valuation as per IND AS-19 as on Balance sheet date.

2.12 *Financial Instruments*

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair valuethrough profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate,on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fairvalue through profit or loss are recognised immediately in profit or loss.

2.13 *Financial assets*

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

2.13.1 Classification of financial assets

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Interest income is recognised in profit or loss for FVTOCI debt instruments. For the purposes of recognising foreign exchange gains and losses, FVTOCI debt instruments are treated as financial assets measured at amortised cost. Thus, the exchange differences on the amortised cost are recognised in profit or loss and other changes in the fair value of FVTOCI financial assets are recognised in other comprehensive income and accumulated under the heading of 'Reserve for debt instruments through other comprehensive income'. When the investment is disposed of, the cumulative gain or loss previously accumulated in this reserve is reclassified to profit or loss.

All other financial assets are subsequently measured at fair value.

2.13.2 Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognised in profit or loss and is included in the "Other income" line item.

2.13.3 Investments in equity instruments at FVTOCI

On initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments. This election is not permitted if the equity investment is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.

2.13.4 Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Debt instruments that do not meet the amortised cost criteria or FVTOCI criteria (see above) are measured at FVTPL. In addition, debt instruments that meet the amortised cost criteria or the FVTOCI criteria but are designated as at FVTPL are measured at FVTPL.

A financial asset that meets the amortised cost criteria or debt instruments that meet the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'Other income' line item. Dividend on financial assets at FVTPL is recognised when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

2.13.5 Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. 12-month expected credit losses are portion of the life-time expected credit losses and represent the lifetime cash shortfalls that will result if default occurs within the 12 months after the reporting date and thus, are not cash shortfalls that are predicted over the next 12 months.

If the Company measured loss allowance for a financial instrument at lifetime expected credit loss model in the previous period, but determines at the end of a reporting period that the credit risk has not increased significantly since initial recognition due to improvement in credit quality as compared

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

to the previous period, the Company again measures the loss allowance based on 12-month expected credit losses.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

The impairment requirements for the recognition and measurement of a loss allowance are equally applied to debt instruments at FVTOCI except that the loss allowance is recognised in other comprehensive income and is not reduced from the carrying amount in the balance sheet.

2.13.6 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Companyneither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If theCompany retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g. when the Company retains an option to repurchase part of a transferred asset), the Company allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

2.13.7 Foreign exchange gains and losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period.

- For foreign currency denominated financial assets measured at amortised cost and FVTPL, the exchange differences are recognised in profit or loss except for those which are designated as hedging instruments in a hedging relationship.
- Changes in the carrying amount of investments in equity instruments at FVTOCI relating to changes in foreign currency rates are recognised in other comprehensive income.
- For the purposes of recognising foreign exchange gains and losses, FVTOCI debt instruments are treated as financial assets measured at amortised cost. Thus, the exchange differences on the amortised cost are recognised in profit or loss and other changes in the fair value of FVTOCI financial assets are recognised in other comprehensive income.

2.14 Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.14.1 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

2.14.2 Compound financial instruments

The component parts of compound financial instruments (convertible notes) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recognised as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound financial instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to other component of equity. When the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained earnings. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible notes using the effective interest method.

2.14.2.1 *Financial liabilities*

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, financial guarantee contracts issued by the Company, and commitments issued by the Company to provide a loan at below-market interest rate are measured in accordance with the specific accounting policies set out below.

2.14.2.2 *Financial liabilities at FVTPL*

Financial liabilities are classified as at FVTPL when the financial liability is either contingent consideration recognised by the Company as an acquirer in a business combination to which Ind AS 103 applies or is held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been incurred principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading or contingent consideration recognised by the Company as an acquirer in a business combination to which Ind AS 103 applies, may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise;
- the financial liability forms part of a Company of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Company's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and Ind AS 109 permits the entire combined contract to be designated as at FVTPL in accordance with Ind AS 109.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'Other income' line item.

However, for non-held-for-trading financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognised in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, in which case these effects of changes in credit risk are recognised in profit or loss. The remaining amount of change in the fair value of liability is always recognised in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognised in other comprehensive income are reflected immediately in retained earnings and are not subsequently reclassified to profit or loss.

Gains or losses on financial guarantee contracts and loan commitments issued by the Company that are designated by the Company as at fair value through profit or loss are recognised in profit or loss.

2.14.2.3 *Financial Liabilities subsequently measured at amortised cost*

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

2.14.2.4 *Financial guarantee contracts*

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by the Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 18.

2.14.2.5 *Commitments to provide a loan at a below-market interest rate*

Commitments to provide a loan at a below-market interest rate are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 18.

2.14.2.6 *Foreign exchange gains and losses*

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in 'Other income'.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

2.14.2.7 *Derecognition of financial liabilities*

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

3. Significant accounting judgements, estimates and assumptions

3.1 Determining the timing of revenue recognition on the sale of completed and under development property

The Company has generally evaluated and concluded that based on a careful analysis of the rights and obligations under the terms of the contracts relating to the sale of property, the revenue is to be recognised at a point in time when control transfers which coincides with receipt of Occupation Certificate. The Company has generally concluded that the overtime criteria are not met owing to non-enforceable right to payment for performance completed to date and, therefore, recognises revenue at a point in time.

3.2 Determination of performance obligations

With respect to the sale of property, the Company has concluded that the goods and services transferred in each contract constitute a single performance obligation. In particular, the promised goods and services in contracts for the sale of property is to undertake development of property and obtaining the Occupation Certificate. Generally, the Company is responsible for all these goods and services and the overall management of the project. Although these goods and services are capable of being distinct, the Company accounts for them as a single performance obligation because they are not distinct in the context of the contract.

Note No. 20 - Financial Instruments

Capital management

The company's capital management objectives are:

- To ensure the company's ability to continue as a going concern
- To provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position.

The company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Debt-to-equity ratio as of 31 March 2020 and 31 March 2019 is as follows:

(₹ in Lakhs)

	31-Mar-20	31-Mar-19
Debt (A)	**3,480.00**	3,408.00
Equity (B)	**2,363.54**	2,367.25

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF
MAHINDRA RESIDENTIAL DEVELOPERS LIMITED

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the accompanying Ind AS financial statements of **Mahindra Residential Developers Limited** ("the Company"), which comprise the Balance Sheet as at 31st March, 2020, and the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date, and notes to the financial statements including a summary of the significant accounting policies and other explanatory information (herein after referred to as "the Ind AS financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2020, the profit and total comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the Ind AS financial statements in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Ind AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("ICAI") together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Ind AS financial statements.

Information other than the Financial Statements and Auditor's Report thereon

The Company's Board of Directors is responsible for the other information. The other information at the date of this Auditor's Report comprises the information included in the Director's Report, but does not include the Ind AS financial statements and our auditor's report thereon.

Our opinion on the Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing specified under Section 143 (10) of the Act will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Ind AS financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("CARO 2016" / "Order") issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act, on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
   (c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive income, Statement of Changes in Equity, and the Statement of Cash Flows dealt with by this Report are in agreement with the books of account.
   (d) In our opinion, the aforesaid Ind AS financial statements comply with the Ind AS specified under Section 133 of the Act.
   (e) On the basis of the written representations received from the Directors as on 31st March, 2020 taken on record by the Board of Directors, none of the Directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.
   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.
   (g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of Rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended), in our opinion and to

the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations on its financial position in its Ind AS financial statements. (Refer Notes 25 to the Ind AS financial statements).

ii. The Company did not have any long-term contracts which has any material foreseeable losses. The Company did not have any derivative contracts.

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Mahindra Residential Developers Limited** ("the Company") as of 31st March, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls over Financial Reporting

The Board of Directors of the Company is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk of a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected, Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2020, based on the criteria for internal financial control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

i. In respect of its fixed assets (Property, Plant and Equipment (PPE)):

   a) The Company has maintained proper records showing full particulars, including quantitative details and situation of PPE.

   b) The PPE were physically verified during the year by the Management and according to the information and explanations given to us, no material discrepancies were noticed on such verification.

   c) The Company does not have any immovable properties of freehold or leasehold land and building and hence reporting under clause (i)(c) of the CARO 2016 is not applicable.

ii. In our opinion and according to the information and explanations given to us, having regard to the nature of inventory, the physical verification by way of verification of title deeds, site visits by the Management and certification of extent of work completion by competent persons, are done at reasonable intervals and no material discrepancies were noticed on physical verification.

iii. According to the information and explanations given to us, the Company had granted unsecured loans to companies covered in the Register maintained under Section 189 of the Companies Act, 2013, in respect of which:

   a) The terms and conditions of the grant of such loans were, in our opinion, prima facie, not prejudicial to the Company's interest.

   b) The schedule of repayment of principal and payment of interest were stipulated and repayments or receipts of principal amounts and interest were regular as per stipulations.

   c) There is no overdue amount remaining outstanding as at the year-end.

iv. In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Sections 185 and 186 of the Companies Act, 2013 in respect of grant of loans, making investments and providing guarantees and securities, as applicable.

v. According to the information and explanations given to us, the Company has not accepted any deposits during the year. There were no unclaimed deposits outstanding at any time during the year.

vi. The maintenance of cost records has been specified by the Central Government under Section 148(1) of the Act. We have broadly reviewed the cost records maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended, prescribed by the Central Government under subsection (1) of Section 148 of the Act, and are of the opinion that, prima facie, the prescribed cost records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

vii. According to the records of the Company and information and explanations given to us, in respect of statutory dues:

   a) The Company is generally regular in depositing with the appropriate authorities undisputed statutory dues including Income Tax, Goods and Services Tax ('GST') and other statutory dues applicable to it with the concerned authorities.

   b) According to the information and explanations given to us, there were no undisputed amounts payable in respect of Income Tax, GST and other material statutory dues in arrears as at 31st March, 2020 for a period of more than six months from the date they became payable.

   c) The details of dues of Income Tax which has not been deposited as on 31st March, 2020 on account of disputes are given below:

Name of the Statue	Nature of dues	Forum where dispute is pending	Period to which Amount relates	Amount unpaid (Rs. In lakhs)
Income Tax Act 1961	Income Tax	Income Tax Appellate Tribunal	AY 2014 -15	365.75

viii. In our opinion and according to the information and explanations given to us, the Company has not taken any loans or borrowings from banks, financial institutions and government or has issued any debentures and hence the reporting under clause (viii) of CARO 2016 is not applicable.

ix. In our opinion and according to the information and explanations given to us, the Company has not raised any moneys by way of initial public offer or further public offer (including debt instruments) or term loans and hence reporting under clause (ix) of CARO 2016 is not applicable.

x. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have neither come across any instance of fraud by the Company or on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of such cases by the Management.

xi. Based upon the audit procedures performed and the information and explanations given by the management, the Company has not paid/ provided managerial remuneration covered under the provisions of Section 197 read with Schedule V to the Act and accordingly reporting under clause (xi) of CARO 2016 is not applicable.

xii. The Company is not a Nidhi Company and hence reporting under clause (xii) of CARO 2016 is not applicable.

xiii. In our opinion and according to the information and explanations given to us the Company is in compliance with Sections 177 and 188 of the Act, where applicable, for all transactions with the related parties and the details of related party transactions have been disclosed in the Ind AS financial Statements as required by the applicable accounting standards.

xiv. During the year the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures and hence reporting under clause (xiv) of CARO 2016 is not applicable to the Company.

xv. In our opinion and according to the information and explanations given to us, during the year the Company has not entered into any non-cash transactions with its directors or directors of its holding company or persons connected with them and hence provisions of Section 192 of the Act are not applicable.

xvi. The Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934.

STATEMENT OF CASH FLOWS FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Rupees Lakhs unless otherwise stated

Particulars	**Year ended 31st March, 2020**	Year ended 31st March, 2019
Cash flows from operating activities		
Profit before tax for the year	**841.83**	530.92
Adjustments for:		
Finance costs recognised in profit and loss	**35.45**	48.40
Interest Income	**(259.01)**	(41.22)
Depreciation and amortisation of non-current assets	**1.44**	–
Movements in working capital:		
Decrease in trade and other receivables	**240.73**	123.40
Decrease in amounts due from customers under construction contracts	**–**	663.99
Decrease in inventories	**4,052.33**	1,316.43
Decrease in other assets	**142.92**	479.56
Decrease in other Financial Assets	**0.07**	–
Decrease in trade and other payables	**(490.16)**	(575.29)
Decrease in other liabilities	**(64.29)**	(358.30)
Decrease in deferred revenue	**(1,189.56)**	(774.77)
(Increase)/Decrease in provisions	**34.46**	(11.20)
Cash generated from operations	**3,346.21**	1,401.92
Income taxes paid (Net)	**(290.78)**	(104.44)
Net cash generated from operating activities	**3,055.43**	1,297.48
Cash flows from investing activities		
Capital Expenditure	**–**	(11.53)
Interest received	**193.35**	34.56
Bank balances not considered as Cash and Cash Equivalents	**33.58**	743.25
Inter-corporate deposits given to related parties	**(5,495.00)**	(200.00)
Inter-corporate deposits repaid by related parties	**900.00**	200.00
Net cash (used in)/generated from investing activities	**(4,368.07)**	766.28
Cash flows from financing activities		
Dividend paid (including Dividend Distribution Tax)	**(189.27)**	(699.22)
Interest paid	**(35.45)**	(48.40)
Net cash used in financing activities	**(224.72)**	(747.62)
Net (decrease)/increase in cash and cash equivalents	**(1,537.36)**	1,316.14
Cash and cash equivalents at the beginning of the year	**1,652.60**	336.46
Cash and cash equivalents at the end of the year (Refer Note no 9)	**115.24**	1,652.60

The above Cash Flow Statement has been prepared under the "indirect method" as set out in 'Indian Accounting Standard (Ind AS) 7 - Statement of Cash Flows'.

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

1. General Information

Mahindra Residential Developers Limited ("the Company") was incorporated on 1st February, 2008.

The Company is a Co-developer, approved under Special Economic Zone Act, 2005, engaged in development of township including residential infrastructure in Mahindra World City SEZ and giving it on perpetual lease. The address of its registered office and principal place of business is Administrative Block, Central Avenue, Mahindra World City, Chengalpet, Kancheepuram – 603 002.

The level of activity carried out by the Company depends on the number of projects handled and accordingly the revenue from operations may not be comparable on a year-to-year basis.

2. Significant Accounting Policies

2.1 Statement of compliance

The financial statements of the Company have been prepared in accordance with the Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under section 133 of the Companies Act, 2013 (the Act) and other relevant provision of the Companies Act, 2013 ("the Act").

The aforesaid financial statements have been approved by the Company's Board of Directors and authorised for issue in the meeting held on April 21, 2020.

2.2 Basis of measurement

2.2.1 Basis of preparation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

2.2.2 Measurement of Fair Values

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis as applicable.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

2.3 Revenue from Contracts and Customers

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

2.3.1 Revenue from Projects

The Company develops and sells residential and commercial properties. Revenue from contracts is recognised when control over the property has been transferred to the customer. An enforceable right to payment does not arise until the development of the property is completed. Therefore, revenue is recognised at a point in time when the legal title has passed to the customer and the development of the property is completed. The revenue is measured at the transaction price agreed under the contract.

The Company invoices the customers for construction contracts based on achieving a series of performance-related milestones.

For certain contracts involving the sale of property under development, the Company offers deferred payment schemes to its customers. The Company adjusts the transaction price for the effects of the significant financing component.

2.3.2 Contract Costs

Costs to obtain contracts ("Contract costs") relate to fees paid for obtaining property sales contracts. Such costs are recognised as assets when incurred and amortised upon recognition of revenue from the related property sale contract.

2.3.3 Significant accounting judgements, estimates and assumptions

2.3.3.1 Determining the timing of revenue recognition on the sale of completed and under development property

The Company has generally evaluated and concluded that based on a careful analysis of the rights and obligations under the terms of the contracts relating to the sale of property, the revenue is to be recognised at a point in time when control transfers which coincides with receipt of Occupation Certificate. The Company has generally concluded that the over time criteria are not met owing to non-enforceable right to payment for performance completed to date and, therefore, recognises revenue at a point in time.

2.3.3.2 Determination of performance obligations

With respect to the sale of property, the Company has concluded that the goods and services transferred in each contract constitute a single performance obligation. In particular, the promised goods and services in contracts for the sale of property is to undertake development of property and obtaining the Occupation Certificate. Generally, the Company is responsible for all these goods and services and the overall management of the project. Although these goods and services are capable of being distinct, the Company accounts for them as a single performance obligation because they are not distinct in the context of the contract.

2.3.4 Dividend and interest income

Dividend income from investment in mutual funds is recognised when the unit holder's right to receive payment has been established.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.4 Current versus non-current classification

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

Based on the nature of activity carried out by the company and the period between the procurement and realisation in cash and cash equivalents, the Company has ascertained its operating cycle as 5 years for the purpose of Current – Non Current classification of assets & liabilities.

The Company presents assets and liabilities in the balance sheet based on current / non-current classification.

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

Borrowings are classified as current if they are due to be settled within 12 months after the reporting period.

2.5 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Rental expense from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue.

2.6 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2.7 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.7.1 Current tax

Current tax is determined as the amount of tax payable in respect of taxable income for the year. The Company's current tax is calculated using tax rate that has been enacted or substantively enacted by the end of the reporting period.

2.7.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.7.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.8 Property, plant and equipment (PPE)

PPE are stated in the balance sheet at cost less accumulated depreciation.

Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy.

An item of PPE is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss. PPE held for disposal are valued at estimated net realizable value.

Depreciation on PPE has been provided on pro-rata basis, on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013.

Lease hold improvements are amortised over the period of lease/ estimated period of lease.

2.9 Impairment of PPE

At the end of each reporting period, the Company reviews the carrying amounts of its PPE to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.10 Inventories

Inventories are stated at lower of cost and net realisable value. The cost of construction material is determined on the basis of weighted average method. Construction Work-in-Progress includes cost of land, premium for development rights, construction costs and allocated interest and manpower costs and expenses incidental to the projects undertaken by the Company.

2.11 Cash and cash equivalents

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid

NOTES TO FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.12 Cash flow statement

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.13 Foreign currencies

Transactions in foreign currencies i.e. other than the Company's functional currency are recognised at the rates of exchange prevailing at the date of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings; and
- exchange differences on transactions entered into in order to hedge certain foreign currency risks

2.14 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) because of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions, contingent liabilities and contingent assets are reviewed at each Balance Sheet date.

2.15 Contingent liabilities

Contingent liability is disclosed in case of:

a) a present obligation arising from past events, when it is not probable that an outflow of resources will be required to settle the obligation; and

b) a present obligation arising from past events, when no reliable estimate is possible.

Contingent assets

Contingent assets are disclosed where an inflow of economic benefits is probable.

2.16 Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2.16.1 Classification and subsequent measurement

2.16.1.1 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognised financial assets are subsequently measured at either amortised cost or fair value depending on their respective classification.

On initial recognition, a financial asset is classified as - measured at:

- Amortised cost; or
- Fair Value through Other Comprehensive Income (FVTOCI) - debt investment; or
- Fair Value through Other Comprehensive Income (FVTOCI) - equity investment; or
- Fair Value Through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL.

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain and loss on derecognition is recognised in profit or loss.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Debt investment at FVTOCI are subsequently measured at fair value. Interest income under effective interest method, foreign exchange gains and losses and impairment are recognised in profit or loss. Other net gains and losses are recognised in Other Comprehensive Income (OCI). On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVTOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserves. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for medium or long term strategic purpose.

Equity investments that are not designated as measured at FVTOCI are designated as measured at FVTPL and subsequent changes in fair value are recognised in profit or loss.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

NOTES TO THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Lakhs unless otherwise stated

2.16.1.2 Financial liabilities and equity instruments

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of the Company after deducting all of its liabilities. Equity instruments issued by the Company is recognised at the proceeds received, net of directly attributable transaction costs.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is a derivative (that does not meet hedge accounting requirements) or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

2.16.2 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

2.17 Earnings per Share

Basic/Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post-tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year.

2.18 Goods and Services tax input credit:

Goods and Services tax input credit is accounted for in the books in the period in which the underlying service received is accounted and when there is reasonable certainty in availing / utilising the credits.

2.19 Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in Note 1, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

Judgements

In the process of applying the Company's accounting policies, management has made the following judgements based on estimates and assumptions, which have the significant effect on the amounts recognised in the financial statements.

Taxes

Deferred tax assets are recognised for temporary differences to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits together with future tax planning strategies.

Note No. 3 - Property Plant and Equipment

Particulars	**As at 31st March, 2020**	As at 31st March, 2019
(a) Construction Materials	**250.32**	300.46
(b) Construction Work-in-Progress	**2,316.63**	2,761.05
(c) Finished Goods	**1,628.53**	5,186.30
Total Inventories (at lower of cost and net realisable value)	**4,195.48**	8,247.81

* Construction Work-in-Progress represents materials at site and unbilled costs on the projects. Based on projections and estimates by the Company of the expected revenues and costs to completion, provision for losses to completion and/ or write off of costs carried to inventory are made on projects where the expected revenues are lower than the estimated costs to completion. In the opinion of the management, the net realisable value of the construction work in progress will not be lower than the costs so included therein.

Construction materials primarily comprises of include Steel, Cement, Chrome Plated & Sanitary Fixtures and UPVC windows.

The cost of inventories recognised as an expense during the year in respect of continuing operations was Rs. 3,945.79 lakhs (31st March, 2019: 2,438.99 lakhs).

The Company has availed cash credit facilities which are secured by hypothecation of inventories.

Based on detailed assessment and evaluation of impact of the COVID-19 epidemic, the management concluded that realiseable value of these inventories will not be lower than the carrying value.

Defect Liability Provision:

Provision for defect liability represents present value of management's best estimate of the future outflow of economic resources that will be required in respect of residential units given under perpetual lease, the estimated cost of which is accrued during the period of construction. Management estimates the related provision for future defect liability claims based on historical cost of rectifications and is adjusted regularly to reflect new information. The residential units are generally covered under a the defect liability period limited to 5 year from the date of handover of residential units. It is expected that most of these costs will be incurred within two years from the reporting date.

Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

NOTES TO THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Lakhs unless otherwise stated

CREDIT RISK

(i) Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. Credit risk arises from trade receivables, cash and cash equivalents, mutual Funds & other financial assets.

(ii) Trade Receivables:

The Company's trade receivables include receivables on lease of residential flats and rent maintenance receivable. As per the Company's flat handover policy, a flat is handed over to a customer only upon payment of entire amount of consideration. The rent maintenance receivables are secured by security deposits obtained under the lease agreement. Thus, the Company is not exposed to any credit risk on receivables from sale of residential flats and rent receivables. However owing to COVID-19 pandemic outbreak the Company expects considerable slow down in collections of existing receivables and delay in billing further milestones owing to lockdown.

(iii) Cash and Cash Equivalents & Other Financial Assets

For banks and financial institutions, only high rated banks/institutions are accepted. The Company holds cash and cash equivalents with bank and financial institution counterparties, which are having highest safety ratings based on ratings published by various credit rating agencies. The Company considers that its cash and cash equivalents have low credit risk based on external credit ratings of the counterparties.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-term, medium-term and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

Particulars	Less than 1 Year	1-3 Years	3 Years to 5 Years	5 years and above
Non-derivative financial liabilities				
31-Mar-2020				
Non Interest Bearing				
Trade Payable	**984.87**	–	–	–
Deposits from Customers	**81.98**	–	–	–
Total	**1,066.85**	–	–	–
31-Mar-2019				
Non Interest Bearing				
Trade Payable	**1,475.03**	–	–	–
Deposits from Customers	**111.02**	–	–	–
Total	**1,586.05**	–	–	–

The amounts included above for financial guarantee contracts are the maximum amounts the Company could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee. Based on expectations at the end of the reporting period, the Company considers that it is more likely than not that such an amount will not be payable under the arrangement.

(iii) Financing arrangements

The Company had access to following undrawn borrowing facilities at the end of the reporting period:

Particulars	31st March, 2020	31st March, 2019
Secured Bank Cash Credit facility		
– Expiring within one year	**1,000.00**	1,000.00
Secured Bank Guarantee Limit (sub limit of CC Credit facility)		
– Expiring within one year	**500.00**	500.00
Secured Letter of Credit (sub limit of CC Credit facility)		
– Expiring within one year	**500.00**	500.00

(iv) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Non-interest bearing				
Trade Receivables	968.22	–	–	–
Security Deposits	3.57	–	23.34	–
Interest receivables........	6.66	–	–	–
Cash and Cash Equivalents	1,652.60	–	–	–
Bank Balances other than above....................	132.54			
Fixed interest rate instruments ..	–	–	–	–
Loans to Related Parties	–	–	–	–
Total	2,763.59	–	23.34	–

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such as equity price risk and commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company uses derivatives to manage market risks. Derivatives are only used for economic hedging purposes and not as speculative investments. All such transactions are carried out within the guidelines set by the Board of Directors and Risk Management Committee.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

Currency Risk

The Company undertakes transactions denominated only in India Rupees and hence there is no risk of foreign exchange fluctuations.

Note No. 27 - Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in note 2, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

COVID -19 Impact assessment:

The management assessed the Company's future projections in light of the developments due to COVID 19 situation worldwide and has reassessed the impact that it may cause on the Company's financial and operational performance. The Company may experience delays in getting new prospects and signing of lease deeds, and consequent impact on the inflow of receivables, during the lock down period. The construction and development activities are temporarily suspended owing to lock down and the tenure of lock down is not yet certain as on date of approval of these financail statements. This will delay the milestone billings and the overall handover timelines to customers for projects under development. Statutory authorities have considered relexation norms for handover deadlines and the Company at this moment expects no outflow on account delayed payment compensation. The management expects the Company to resume normalcy within a period of 3 to 4 months post lockdown with some impact on overall milestone billings, collections and registrations through the financial year. The Company has credit and term loan facilities available to meet the project costs and pay off the vendors and bankers in the immediate 12 months from the date of approval of these financial statements. The Company expects no additional inflow of capital towards currently planned development. Based on the above assessment, the management is of the view that company will be able to continue as a going concern while maximising the return to stakeholders through the optimisation of the debt and equity balance.

Note No. 28 - Related Party Transactions

a) Names of related parties and nature of relationship where control exists:

Ultimate Parent Company Mahindra & Mahindra Limited (M & M)

Parent of the Holding Company Mahindra Lifespace Developers Limited (MLDL)

– trade and other payables	–	1,475.03	–	1,475.03
Total	–	1,586.05	–	1,586.05

For recurring and non-recurring fair value measurements, if the highest and best use of a nonfinancial asset differs from its current use, an entity shall disclose that fact and why the non-financial asset is being used in a manner that differs from its highest and best use.

The fair values of the financial assets and financial liabilities included in the level 2 and level 3 categories above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

Note No. 30 - INDAS 115 Disclosures

1) Contract Balances

Amounts received before the related performance obligation is satisified are included in the balance sheet (Contract liability) as "Advances received from Customers". Amounts billed for development milestone achieved but not yet paid by the customer are included in the balance sheet under trade receivables.

During the year, the Company recognised Revenue of Rs. 1,836.78 Lakhs (FY 18-19 Rs. 1,748.37 lakhs) from opening contract liability (after Ind AS 115 adoption) of Rs. 2,255.51 Lakhs (FY 18-19 Rs. 2,870.26 lakhs.)

There were no significant changes in the composition of the contract liabilities and Trade receivable during the reporting period other than on account of periodic invoicing and revenue recognition.

Amounts previously recorded as contract liabilities increase due to further milestone based invoices raised during the year and decrease due to revenue recognised during the year on completion of the construction.

Amounts previously recorded as Trade receivables increase due to further milestone based invoices raised during the year and decrease due to collections during the year.

There are no contract assets outstanding at the end of the year.

The aggregate value of performance obligations that are completely or partially unsatisfied as at 31st March, 2020, is Rs. 1,065.95 Lakhs (FY 18-19 Rs. 2,255.51 lakhs). Out of this, the Company expects to recognize revenue within the next one year. This includes contracts that can be terminated for convenience with a penalty as per the agreement since, based on current assessment, the occurrence of the same is expected to be remote.

2) Reconciliation of revenue recognized with the contracted price is as follows:

Rs. Lakhs

	Year ended 31st March, 2020	**Year ended 31st March, 2019**
Contracted price	**5,385.01**	3,742.70
Adjustments on account of cash discounts or early payment rebates, etc.	**36.36**	71.41
Revenue recognised as per Statement of Profit & Loss	**5,348.64**	3,671.29

3) Contract costs

Rs. Lakhs

	As at 31st March, 2020	**As at 31st March, 2019**
Costs to obtain contracts	**2.89**	44.90

For the year ended 31st March 2020, amortisation amounting to Rs. 42.23 Lakhs (FY 18-19 Rs. 36.19 lakhs) was recognised as part of other expenses in the statement of profit or loss. There was no impairment loss in relation to the costs capitalised.

(Also refer note 2.3.2)

NOTES TO THE FINANCIAL STATEMENTS AS AT AND FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Lakhs unless otherwise stated

Note No. 31 - Additional Information to the Financial Statements

i) Disclosures required under Section 22 of the Micro, Small and Medium Enterprises Development Act, 2006

Dues to Micro and Small Enterprises have been determined to the extent such parties have been identified on the basis of information collected by the Management. This has been relied upon by the auditors.

There are no overdue amounts payable to Micro, Small and Medium Enterprises, as defined in the Micro, Small and Medium Enterprises Development Act, 2006, as at the reporting date or anytime during the year and hence no interest has been paid or payable accordingly no additional disclosures have been made.

Sl No	Particulars	31st March, 2020	31st March, 2019
1	Dues remaining unpaid		
	Principal	**100.87**	80.78

	Interest paid in terms of Section 16 of the MSMED Act	–	–
3	Amount of interest due and payable for the period of delay on payments made beyond the appointed day during the year	–	–
4	Further interest due and payable even in the succeeding years, until such date when the interest due as above are actually paid to the small enterprises	–	–
5	Amount of interest accrued and remaining unpaid	1.31	–

Note No. 32 - Leases

Ministry of corporate Affairs has notified Ind AS 116 “Leases” which is effective from 01st April, 2019. Pursuant to this, the company has applied this standard to all lease contracts existing on 01st April, 2019 using the retrospective approach with the cumulative effect at the date of initial application. The adoption of the Standard did not have any material impact to the financial results of the Company. Therefore, there is no effect of adopting Ind AS 116 on retained earnings as at 01st April, 2019. Thus, on transition, the adoption of the new standard resulted in recognition of ‘Right of Use’ asset and lease liability is NIL.

Note No. 33 - Other Notes

i. The Company has disclosed the impact of pending litigations on its financial position. (Refer Note 25 to the Ind AS financial statements);

ii. The Company did not have any material foreseeable losses on long term contracts; the Company has not entered into any derivative contracts.

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

Note No. 34 - Event after the reporting period

No material events have occurred after the Balance Sheet date and upto the approval of the financial statements.

Note No. 35 - Previous year figures

The figures for previous year have been regrouped/reclassified wherever found necessary to conform to current year’s grouping/classification.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF INDUSTRIAL TOWNSHIP (MAHARASHTRA) LIMITED

Report on the Ind AS Financial Statements

Opinion

1. We have audited the accompanying Ind AS financial statements of Industrial Township (Maharashtra) Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2020, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement for the year then ended, and notes to the financial statements, and a summary of significant accounting policies and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements, give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at March 31, 2020, and its loss and cash flows for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

4. The company's Board of Directors is responsible for the other information. The other information comprises the Board report. Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management for Ind AS Financial Statements

5. The Company's Board of Directors is responsible for the matters in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act.

6. This responsibility also includes the maintenance of adequate accounting records in accordance with the provision of the Act for safeguarding of the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

7. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

8. Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

9. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

10. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

    a. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

    b. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

    c. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

    d. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

e. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

11. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

12. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on other Legal and Regulatory Requirements

13. As required by the Companies (Auditor's Report) Order,2016, issued by the Central Government of India in term of sub-section (11) of section 143 of the Act (the "Order"), and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in the Annexure A, a statement on the matters specified in the paragraphs 3 and 4 of the Order, to the extent applicable.

14. As required by section 143(3) of the Act, we report that:

    a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

    b) In our opinion proper books of account as required by law have been kept by the Company so far as appears from our examination of those books;

    c) the Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account;

    d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014

    e) On the basis of written representations received from the directors as on March 31, 2020, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2020, from being appointed as a director in terms of Section 164(2) of the Act.

    f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in Annexure B.

    g) In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid any remuneration to its directors.

    h) With respect to the other matters included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended) in our opinion and to the best of our information and according to the explanations given to us:

        i. The Company does not have any pending litigations which would impact its financial position.

        ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

        iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the accounts of Members of Industrial Township (Maharashtra) Limited for the year ended March 31, 2020

1) The Company did not have any fixed assets during the year. Hence the provisions of the para 3(i) of the Order are not applicable.
2) Company's inventory comprises of Construction work in progress and no material discrepancies were noticed in the same.
3) The Company has not granted any loans, secured or unsecured to companies, firms and other parties covered in the register maintained under section 189 of the Act. Hence, the provisions of para 3(iii) of the Order are not applicable.
4) According to the information and explanations given to us, the Company has not given any guarantee for loans taken by others from Banks or Financial Institutions during the year.
5) In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits under the provisions of section 73 to 76 of the Act and the Rules framed thereunder.
6) We have been informed that the Central Government has not prescribed maintenance of Cost records under section 148(1) of the Act.
7) i) According to the records of the Company, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Income Tax, Service Tax, Value Added Tax, GST and other statutory dues applicable to it.

   ii) There are no disputed dues outstanding as on March 31, 2020 on account of sales tax, customs duty, income tax, service tax, GST and cess.
8) The Company has not obtained loans or borrowing from a financial institution, bank or Government. The Company has not raised any money through debentures.
9) The Company has not raised money by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purpose for which those are raised.
10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing principles in India, and according to the information and explanations given to us, we have neither come across any instance of fraud on or by the Company, noticed or reported during the year, nor have we been informed of such case by the management.
11) According to the information and explanations given to us, the Company has not paid any remuneration to managerial personnel as defined in the Act and accordingly the provisions of para 3(xi) of the Order are not applicable to the Company.
12) The Company, not being a Nidhi Company, the para 3(xii) of the Order is not applicable to the Company.
13) According to the information and explanations given to us, all transactions with related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 and the details of the same have been disclosed in the financial statements as required by the applicable accounting standards.
14) The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review. Hence, the provisions of para 3(xiv) of the Order are not applicable to the Company.
15) According to the information and explanations given to us, the Company has not entered into non-cash transactions with directors or persons connected with him. Hence, the provisions of para 3(xv) are not applicable to the Company.
16) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, the provisions of para 3(xvi) of the Order are not applicable to the Company.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF INDUSTRIAL TOWNSHIP (MAHARASHTRA) LIMITED

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Industrial Township (Maharashtra) Limited ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

(1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and

(3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

1. General Information

The company was incorporated on July 02, 2008 and is engaged in the business of development of Industrial Township, Maharashtra. Its parent and holding company is Mahindra Lifespace Developers Ltd.

The addresses of its registered office and principal place of business are disclosed in the introduction to the annual report.

2. Significant Accounting Policies

2.1 Statement of compliance

The financial statements have been prepared in accordance with Ind-AS notified under the Companies (Indian Accounting Standards) Rules, 2015.

2.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company considers the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

2.3 Non-current assets held for sale

Non-current assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Non-current assets classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell.

2.4 Revenue recognition

2.4.1 Revenue from Projects

The Company develops and sells residential and commercial properties. Revenue from contracts is recognised when control over the property has been transferred to the customer. An enforceable right to payment does not arise until the development of the property is completed. Therefore, revenue is recognised at a point in time when the legal title has passed to the customer and the development of the property is completed. The revenue is measured at the transaction price agreed under the contract.

The Company invoices the customers for construction contracts based on achieving a series of performance-related milestones.

For certain contracts involving the sale of property under development, the Company offers deferred payment schemes to its customers. The Company adjusts the transaction price for the effects of the significant financing component.

2.4.2 Revenue from Sale of land and other rights

Revenue from Sale of land and other rights is generally a single performance obligation and the Company has determined that this is satisfied at the point in time when control transfers as per the terms of the contract entered into with the buyers, which generally are with the firmity of the sale contracts / agreements. The determination of transfer of control did not change upon the adoption of Ind AS 115.

2.4.3 Contract Costs

- Costs to obtain contracts ("Contract costs") relate to fees paid for obtaining property sales contracts. Such costs are recognised as assets when incurred and amortised upon recognition of revenue from the related property sale contract.

2.4.4 Dividend and interest income

Dividend income from investment in mutual funds is recognised when the unit holder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.5 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2.6 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.6.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.6.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.6.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.7 Property, plant and equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

Properties during construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

2.8 Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.9 Inventories

Inventories are stated at the lower of cost and net realisable value. The cost of construction material is determined on the basis of weighted average method. Construction Work-in-Progress includes cost of land, premium for development rights, construction costs and allocated interest & manpower costs and expenses incidental to the projects undertaken by the Company.

2.10 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) because of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, considering the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

2.11 Employee benefits provisions

Employee benefits provisions are measured and classified into long term and short-term provisions based on Actuarial valuation as per IND AS-19 as on Balance sheet date.

2.12 Financial Instruments

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate,on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2.13 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

2.13.1 Classification of financial assets

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Interest income is recognised in profit or loss for FVTOCI debt instruments. For the purposes of recognising foreign exchange gains and losses, FVTOCI debt instruments are treated as financial assets measured at amortised cost. Thus, the exchange differences on the amortised cost are recognised in profit or loss and other changes in the fair value of FVTOCI financial assets are recognised in other comprehensive income and accumulated under the heading of 'Reserve for debt instruments through other comprehensive income'. When the investment is disposed of, the cumulative gain or loss previously accumulated in this reserve is reclassified to profit or loss.

All other financial assets are subsequently measured at fair value.

2.13.2 Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognised in profit or loss and is included in the "Other income" line item.

2.13.3 Investments in equity instruments at FVTOCI

On initial recognition, the Company can make an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments. This election is not permitted if the equity investment is held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments.

A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.

2.13.4 Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Debt instruments that do not meet the amortised cost criteria or FVTOCI criteria (see above) are measured at FVTPL. In addition, debt instruments that meet the amortised cost criteria or the FVTOCI criteria but are designated as at FVTPL are measured at FVTPL.

A financial asset that meets the amortised cost criteria or debt instruments that meet the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on re-measurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'Other income' line item. Dividend on financial assets at FVTPL is recognised when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

2.13.5 Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. 12-month expected credit losses are portion of the life-time expected credit losses and represent the lifetime cash shortfalls that will result if default occurs within the 12 months after the reporting date and thus, are not cash shortfalls that are predicted over the next 12 months.

If the Company measured loss allowance for a financial instrument at lifetime expected credit loss model in the previous period, but determines at the end of a reporting period that the credit risk has not increased significantly since initial recognition due to improvement in credit quality as compared to the previous period, the Company again measures the loss allowance based on 12-month expected credit losses.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

The impairment requirements for the recognition and measurement of a loss allowance are equally applied to debt instruments at FVTOCI except that the loss allowance is recognised in other comprehensive income and is not reduced from the carrying amount in the balance sheet.

2.13.6 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g. when the Company retains an option to repurchase part of a transferred asset), the Company allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

2.13.7 Foreign exchange gains and losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period.

- For foreign currency denominated financial assets measured at amortised cost and FVTPL, the exchange differences are recognised in profit or loss except for those which are designated as hedging instruments in a hedging relationship.
- Changes in the carrying amount of investments in equity instruments at FVTOCI relating to changes in foreign currency rates are recognised in other comprehensive income.
- For the purposes of recognising foreign exchange gains and losses, FVTOCI debt instruments are treated as financial assets measured at amortised cost. Thus, the exchange differences on the amortised cost are recognised in profit or loss and other changes in the fair value of FVTOCI financial assets are recognised in other comprehensive income.

2.14 Financial liabilities and equity instruments

Classification as debt or equity

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.14.1 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

2.14.2 Compound financial instruments

The component parts of compound financial instruments (convertible notes) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. A conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recognised as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound financial instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to other component of equity. When the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to retained earnings. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible notes using the effective interest method.

2.14.2.1 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, financial guarantee contracts issued by the Company, and commitments issued by the Company to provide a loan at below-market interest rate are measured in accordance with the specific accounting policies set out below.

2.14.2.2 Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is either contingent consideration recognised by the Company as an acquirer in a business combination to which Ind AS 103 applies or is held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been incurred principally for the purpose of repurchasing it in the near term; or

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading or contingent consideration recognised by the Company as an acquirer in a business combination to which Ind AS 103 applies, may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise;
- the financial liability forms part of a Company of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Company's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and Ind AS 109 permits the entire combined contract to be designated as at FVTPL in accordance with Ind AS 109.

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on re-measurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'Other income' line item.

However, for non-held-for-trading financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognised in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, in which case these effects of changes in credit risk are recognised in profit or loss. The remaining amount of change in the fair value of liability is always recognised in profit or loss. Changes in fair value attributable to a financial liability's credit risk that are recognised in other comprehensive income are reflected immediately in retained earnings and are not subsequently reclassified to profit or loss.

Gains or losses on financial guarantee contracts and loan commitments issued by the Company that are designated by the Company as at fair value through profit or loss are recognised in profit or loss.

2.14.2.3 Financial Liabilities subsequently measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

2.14.2.4 Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by the Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 18.

2.14.2.5 Commitments to provide a loan at a below-market interest rate

Commitments to provide a loan at a below-market interest rate are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of loss allowance determined in accordance with impairment requirements of Ind AS 109; and
- the amount initially recognised less, when appropriate, the cumulative amount of income recognised in accordance with the principles of Ind AS 18.

2.14.2.6 Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in 'Other income'.

The fair value of financial liabilities denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. For financial liabilities that are measured as at FVTPL, the foreign exchange component forms part of the fair value gains or losses and is recognised in profit or loss.

2.14.2.7 Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

3. Significant accounting judgements, estimates and assumptions

3.1 Determining the timing of revenue recognition on the sale of completed and under development property

The Company has generally evaluated and concluded that based on a careful analysis of the rights and obligations under the terms of the contracts relating to the sale of property, the revenue is to be recognised at a point in time when control transfers which coincides with receipt of Occupation Certificate. The Company has generally concluded that the overtime criteria are not met owing to non-enforceable right to payment for performance completed to date and, therefore, recognises revenue at a point in time.

3.2 Determination of performance obligations

With respect to the sale of property, the Company has concluded that the goods and services transferred in each contract constitute a single performance obligation. In particular, the promised goods and services in contracts for the sale of property is to undertake development of property and obtaining the Occupation Certificate. Generally, the Company is responsible for all these goods and services and the overall management of the project. Although these goods and services are capable of being distinct, the Company accounts for them as a single performance obligation because they are not distinct in the context of the contract.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF
ANTHURIUM DEVELOPERS LIMITED

Report on the Ind AS Financial Statements

Opinion

1. We have audited the accompanying Ind AS financial statements of Anthurium Developers Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2020, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement for the year then ended, and notes to the financial statements, and a summary of significant accounting policies and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements, give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at March 31, 2020, and its profit and cash flows for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

4. The company's Board of Directors is responsible for the other information. The other information comprises the Board report. Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management for Ind AS Financial Statements

5. The Company's Board of Directors is responsible for the matters in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act.

6. This responsibility also includes the maintenance of adequate accounting records in accordance with the provision of the Act for safeguarding of the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

7. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

8. Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

9. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

10. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

    a. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

b. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

c. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

d. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

e. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

11. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

12. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on other Legal and Regulatory Requirements

13. As required by the Companies (Auditor's Report) Order,2016, issued by the Central Government of India in term of sub-section (11) of section 143 of the Act (the "Order"), and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in the Annexure A, a statement on the matters specified in the paragraphs 3 and 4 of the Order, to the extent applicable.

14. As required by section 143(3) of the Act, we report that:

a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

b) In our opinion proper books of account as required by law have been kept by the Company so far as appears from our examination of those books;

c) the Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account;

d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014

e) On the basis of written representations received from the directors as on March 31, 2020, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2020, from being appointed as a director in terms of Section 164(2) of the Act.

f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in Annexure B.

g) In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid any remuneration to its directors.

h) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:

In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid remuneration to directors in accordance with the provisions of section 197 of the Act.

i) With respect to the other matters included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended) in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigations which would impact its financial position.

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

Mumbai, April 20, 2020

ANNEXURE "A" TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the accounts of Members of Anthurium Developers Limited for the year ended March 31, 2020

1) The Company did not have any fixed assets during the year. Hence the provisions of the para 3(i) of the Order are not applicable.

2) The Company does not have inventory as on March 31, 2020. Hence the provisions of para 3(ii) of the Order are not applicable.

3) The Company has not granted any loans, secured or unsecured to companies, firms and other parties covered in the register maintained under section 189 of the Act. Hence, the provisions of para 3(iii) of the Order are not applicable.

4) According to the information and explanations given to us, the Company has not given any guarantee for loans taken by others from Banks or Financial Institutions during the year.

5) In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits under the provisions of section 73 to 76 of the Act and the Rules framed thereunder.

6) We have been informed that the Central Government has not prescribed maintenance of Cost records under section 148(1) of the Act.

7) i) According to the records of the Company, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Income Tax, Service Tax, Value Added Tax, GST and other statutory dues applicable to it.

   ii) There are no disputed dues outstanding as on March 31, 2020 on account of sales tax, customs duty, income tax, service tax, GST and cess.

8) The Company has not obtained loans or borrowing from a financial institution, bank or Government. The Company has not raised any money through debentures.

9) The Company has not raised money by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purpose for which those are raised.

10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing principles in India, and according to the information and explanations given to us, we have neither come across any instance of fraud on or by the Company, noticed or reported during the year, nor have we been informed of such case by the management.

11) According to the information and explanations given to us, the Company has not paid any remuneration to managerial personnel as defined in the Act and accordingly the provisions of para 3(xi) of the Order are not applicable to the Company.

12) The Company, not being a Nidhi Company, the para 3(xii) of the Order is not applicable to the Company.

13) According to the information and explanations given to us, all transactions with related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 and the details of the same have been disclosed in the financial statements as required by the applicable accounting standards.

14) The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review. Hence, the provisions of para 3(xiv) of the Order are not applicable to the Company.

15) According to the information and explanations given to us, the Company has not entered into non-cash transactions with directors or persons connected with him. Hence, the provisions of para 3(xv) are not applicable to the Company.

16) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, the provisions of para 3(xvi) of the Order are not applicable to the Company.
