INDEPENDENT AUDITORS' REPORT
TO THE MEMBERS OF MAHINDRA VEHICLE MANUFACTURERS LIMITED

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the standalone financial statements of **Mahindra Vehicle Manufacturers Limited** ("the Company"), which comprise the standalone balance sheet as at 31 March 2020, and the standalone statement of profit and loss (including other comprehensive income), standalone statement of changes in equity and standalone statement of cash flows for the year then ended, and notes to the standalone financial statements, including a summary of the significant accounting policies and other explanatory information in which are included the Returns for the year ended on that date audited by the branch auditors of the Company's branches at Michigan, USA and Virginia, USA.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2020, and loss and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Standalone Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Standalone financial statements.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Director's report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors' Responsibility for the Standalone Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the state of affairs, profit/loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, the Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the standalone financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Other Matter

We did not audit the financial information of two branches included in the standalone financial statements of the Company whose standalone financial information reflect total assets of Rs. 22,386 lakhs as at 31 March 2020 and the total revenue of Rs. 48,437 lakhs for the year ended on that date, as considered in the standalone financial statements. These branches have been audited by the branch auditors whose reports have been furnished to us, and our opinion in so far as it relates to the amounts and disclosures included in respect of branches, is based solely on the report of such branch auditors.

The financial information of the two branches as referred above have been prepared in accordance with accounting principles generally accepted in their country and which have been audited by other auditors under generally accepted auditing standards applicable in their country. The Company's Management has converted the financial information of these branches located outside India from accounting principles generally accepted in their country to accounting principles generally accepted in India. We have audited these conversion adjustments made by the Company's Management. Our opinion in so far as it relates to the balances and affairs of these branches located outside India is based on the reports of other auditors and the conversion adjustments prepared by the Management of the Company and audited by us.

Our opinion is not modified in respect of this matter

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. (A) As required by Section 143(3) of the Act, we report that:

    a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books and proper returns adequate for the purposes of our audit have been received from the branches not visited by us.

c) The reports on the accounts of the branch offices of the Company audited under Section 143(8) of the Act by branch auditors have been sent to us and have been properly dealt with by us in preparing this report.

d) The standalone balance sheet, the standalone statement of profit and loss (including other comprehensive income), the standalone statement of changes in equity and the standalone statement of cash flows dealt with by this Report are in agreement with the books of account and with the returns received from the branches not visited by us.

e) In our opinion, the aforesaid standalone financial statements comply with the Ind AS specified under section 133 of the Act.

f) On the basis of the written representations received from the directors as on 31 March 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2020 from being appointed as a director in terms of Section 164(2) of the Act.

g) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

(B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

i. The Company has disclosed the impact of pending litigations as at 31 March 2020 on its financial position in its standalone financial statements - Refer Note 45 to the standalone financial statements;

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

iii. There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the Company.

iv. The disclosures in the standalone financial statements regarding holdings as well as dealings in specified bank notes during the period from 8 November 2016 to 30 December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31 March 2020.

(C) With respect to the matter to be included in the Auditors' Report under section 197(16):

In our opinion and according to the information and explanations given to us, the remuneration paid by the company to its directors during the current year is in accordance with the provisions of Section 197 of the Act. The remuneration paid to any director is not in excess of the limit laid down under Section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

ANNEXURE A TO THE INDEPENDENT AUDITORS' REPORT ON STANDALONE FINANCIAL STATEMENT – 31ST MARCH, 2020

With reference to the Annexure referred to in paragraph 1 in Report on Other Legal and Regulatory Requirements of the Independent Auditors' Report to the members of the Company on the Standalone financial statements for the year ended 31 March 2020, we report that:

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) The Company has a program of physical verification of its fixed assets by which all its fixed assets are verified once in every three years, which, in our opinion, is reasonable having regard to the size of the Company and the nature of its fixed assets. Pursuant to the program, physical verification was conducted in the previous financial year. According to the information and explanation given to us, no material discrepancies were noticed on such verification.

(c) The title deeds of the immovable properties are held in the name of the Company.

(ii) The inventory, except goods in transit, has been physically verified by the management during the year as well as subsequent to year end in accordance with the programme of physical verification. The discrepancies noticed on verification between the physical stock and the book records were not material and have been properly dealt with in the books of account. In our opinion, the frequency of such verification is reasonable and adequate in relation to the size of the Company and the nature of its business. In respect of significant stocks lying with third parties at the year end, written confirmation from major parties have been obtained.

(iii) The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Act. Accordingly, paragraph 3 (iii) of the Order is not applicable to the Company.

(iv) In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Sections 185 and 186 of the Act, with respect to the loans given, investments made, guarantees and security given.

(v) The Company has not accepted any deposits from the public in terms of directives issued by the Reserve Bank of India and the provisions of Sections 73 to 76 of the Act and the rules made there under. Accordingly, paragraph 3(v) of the Order is not applicable to the Company.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules prescribed by the Central Government for the maintenance of cost records under section 148(1) of the Act, and are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. However, we have not made a detailed examination of the records with a view to determine whether they are accurate or complete.

(vii) (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted / accrued in the books of account in respect of undisputed statutory dues including Provident fund, Employee's State Insurance, Income Tax, Duty of Customs, Goods and Service Tax and any other statutory dues have generally been regularly deposited during the year by the Company with the appropriate authorities except amount in connection with certain employee related dues as more fully described in note 29 to the financial statements. As explained to us, the Company do not have dues on account of Sales Tax, Service Tax, Value Added Tax, Cess and Duty of Excise.

According to the information and explanations given to us, no undisputed amounts payable in respect of Provident fund, Employee's State Insurance, Income Tax, Sales Tax, Service Tax, Duty of Customs, Duty of Excise, Value Added Tax, Goods and Service Tax and any other statutory dues were in arrears as at 31 March 2020, for a period of more than six months from the date they became payable except amount in connection with certain employee related dues as more fully described in note 29 to the financial statements.

(b) According to the information and explanations given to us, there are no dues of Income Tax, Sales Tax, Service Tax, Duty of Customs, Duty of Excise, Goods and Service Tax and Value Added Tax which have not been deposited with the appropriate authorities by the Company on account of disputes other than those stated in Appendix 1 to this Report.

(viii) In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of dues to bank and debenture holders. The Company did not have any dues from financial institution or government during the year.

(ix) According to the information and explanations given to us, the Company has not raised money by way of initial public offer or further public offer (including debt instruments) and term loans during the year. Accordingly, paragraph 3(ix) of the Order is not applicable to the Company.

(x) According to the information and explanations given to us, no fraud by the Company or on the Company by its officers or employees has been noticed or reported during the year.

(xi) According to the information and explanation given to us, the managerial remuneration is paid or provided in accordance with the requisite approvals mandate by the provision of section 197 read with schedule V of the Act.

(xii) According to the information and explanations given to us, the Company is not a Nidhi Company as per the Act. Accordingly, the reporting under paragraph 3(xii) of the Order is not applicable.

(xiii) In our opinion and according to the information and explanation given to us, all transactions with related parties are in compliance with section 177 and 188 of the Act and the details, as required by the applicable accounting standard have been disclosed in the Standalone financial statements.

(xiv) According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or fully or partially convertible debentures during the year. Accordingly, the reporting under paragraph 3(xiv) of the Order is not applicable.

(xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with directors or persons connected with them during the year. Accordingly, the reporting under paragraph 3(xv) of the Order is not applicable.

(xvi) The Company is not required to register under section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the reporting under paragraph 3(xvi) of the Order is not applicable.

ANNEXURE B TO THE INDEPENDENT AUDITORS' REPORT ON THE STANDALONE FINANCIAL STATEMENTS OF MAHINDRA VEHICLE MANUFACTURERS LIMITED FOR THE YEAR ENDED 31ST MARCH, 2020.

Report on the internal financial controls with reference to the aforesaid Standalone financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

(Referred to in paragraph 'g' under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Opinion

We have audited the internal financial controls with reference to financial statements of Mahindra Vehicle Manufacturers Limited ("the Company") as of 31 March 2020 in conjunction with our audit of the Standalone financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2020, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Standalone financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES FORMING PART OF THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

1 Company Overview

Mahindra Vehicle manufacturers Limited is a Company incorporated and domiciled in India having its registered office in Mumbai (CIN : U34100MH2007PLC171151) . The Company is in the business of manufacture of passenger cars, medium and heavy commercial vehicles and construction equipments.

The immediate parent Company is Mahindra & Mahindra Limited, a company incorporated in India.These financial statements correspond to the stand alone financial statements of the Company.

The Company has elected not to prepare consolidated financial statements in accordance with Ind AS 110 and Companies (Accounts) Rules 2014, as amended. The parent Company is Mahindra & Mahindra Limited, a company incorporated in Mumbai, India which is the parent of the smallest and largest group to consolidate these financial statements. Copies of the annual report of the Mahindra & Mahindra Limited can be obtained from the Company Secretary, Mahindra & Mahindra Limited, Mahindra Towers, Dr. G. M. Bhosale Marg, Worli, Mumbai, 400 018, India. List of significant investments in subsidiaries, joint ventures and associates is provided in note no. 33

2 Significant Accounting Policies:

(A) Statement of Compliance:

These financial statements have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 (the 'Act') and other relevant provisions of the Act.

The financial statements are approved by the Board of Directors and authorised for issue on 21st May, 2020.

(B) Functional and presentation currency

The financial statements are presented in Indian Rupees (INR or 'Rs.') which is also the Company's functional currency. All values are rounded to the nearest lakhs, unless otherwise stated.

(C) Basis of preparation

These financial statements have been prepared on the historical cost basis, except for certain financial assets and liabilities which are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

(D) Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values. In determining the fair value of its financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each reporting date. The Chief Financial Officer and persons entrusted have overall responsibility for overseeing all significant fair value measurements, including Level 3 fair values and assessments that these valuations meet the requirements of Ind AS. The methods used to determine fair value include discounted cash flow analysis, available quoted market prices and dealer quotes. All methods of assessing fair value result in general approximation of value, and such value may never actually be realised.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1: Quoted prices (unadjusted) in active markets for identical assets and liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

(E) Use of estimations & judgements:

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimates are revised.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in:

Property, Plant and Equipment - Note 2 (F)

Obligations relating to employee defined benefits - Note 36

Impairment of Investment - The Company reviews its carrying value of Investments carried at Cost annually

Leases -

Ind AS 116 requires lessees to determine the lease term as the non cancellable period of a lease adjusted with any option to extend or terminate the lease, if the use of such option is reasonably certain. The Company makes an assessment on the expected lease term on a lease-by lease basis and there by assesses whether it is reasonably certain that any options to extend or terminate the contract will be exercised. In evaluating the lease term, the Company considers factors such as any significant leasehold improvements undertaken over the lease term, costs relating to the termination of the lease and the importance of the underlying asset to operations taking into account the location of the underlying asset and the availability of suitable alternatives. The lease term in future periods is reassessed to ensure that the lease term reflects the current economic circumstances. The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

(F) Property plant & equipment:

(a) Property plant & equipments are carried at cost of acquisition or construction less depreciation. Cost includes financing cost relating to borrowed funds attributable to the construction or acquisition of qualifying tangible assets upto the date the assets are ready for use. When an asset is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit (including capital profit) or loss, if any, is reflected in the Statement of Profit and Loss.

(b) Depreciation on assets is calculated on straight line method at the rates and in the manner prescribed in Schedule II to the Companies Act, 2013, except in respect of the following categories of assets, in whose case the life of the assets has been assessed based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc.:

(1) Certain items of plant and equipment - over their useful lives (2 years, 3 years, 5 years, 8 Years, 10 years, 20 years or 25 years as the case may be) as determined by the Company.

(2) Roads - over their useful life (15 years) as determined by the Company.

(3) Cars and Vehicles - over their useful life (5 years) as determined by the Company.

(G) Intangible Assets:

Intangible assets are initially recognised at cost.

Subsequent to initial recognition, intangible assets with indefinite useful lives are carried at cost less accumulated impairment, if any. Intangible assets with definite useful lives are amortised on a straight line basis so as to reflect the pattern in which the asset's economic benefits are consumed.

Intangible assets under development

The Company expenses cost incurred during research phase to profit or loss in the year in which they are incurred. Development phase expenses are initially recognised as intangible assets under development until the development phase is complete, upon which the amount is capitalised as intangible asset. The company has tested for impairment of intangible under development annually.

Other Intangible Assets

(a) License Fee:

The expenditure incurred is amortised over the estimated period of benefit, not exceeding five years commencing with the year of purchase of License.

(b) Technical Know-how fees:

The expenditure incurred on technical services and other project/

product related expenses are amortised over the estimated period of benefit, not exceeding five years.

(c) Software Expenditure:

The expenditure incurred is amortised over three financial years equally commencing from the year in which the expenditure is incurred.

(H) Investments in subsidiaries, associates and joint ventures:

The Company accounts for its investments in subsidiaries, associates and joint venture at cost.

(I) Financial Instruments:

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss (FVTPL)) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial Assets: All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification of Financial Assets:

On initial recognition, a financial assets is classified as - measured at:

- Amortised Cost; or
- Fair Value Through Other Comprehensive Income (FVTOCI)
- Fair Value Through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL.

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gains and loss on derecognition is recognised in profit or loss.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets at FVTPL are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Impairment of financial assets: The Company applies the expected credit loss model for recognising impairment loss on financial assets.

Derecognition of financial assets: The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the statement of profit and loss if such gain or loss would have otherwise been recognised in the statement of profit and loss on disposal of that financial asset.

Financial liabilities and equity instruments: Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments: An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company is recognised at the proceeds received, net of direct issue costs.

Financial Liabilities: All financial liabilities are measured at amortised cost using the effective interest method or at FVTPL.

Offsetting: Financial assets and liabilities are offset and the net amount is reported in the balance sheet where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the group or the counterparty.

(J) Inventories:

Inventories comprise all costs of purchase, conversion and other costs incurred in bringing the inventories to their present location and condition.

Raw materials and bought out components are valued at the lower of cost or net realisable value. Cost is determined on the basis of the weighted average method.

Finished goods produced, manufactured components and work-in-progress are carried at cost or net realisable value whichever is lower.

Stores, spares and tools other than obsolete and slow moving items are carried at cost. Obsolete and slow moving items are valued at cost or estimated net realisable value, whichever is lower.

(K) Foreign Exchange Transactions:

Transactions in foreign currencies are recorded at the exchange rates prevailing on the date of transaction. Monetary items are translated at the year-end rates. The exchange difference between the rate prevailing on the date of transaction and on the date of settlement as also on translation of monetary items at the end of the year is recognised as income or expense, as the case may be. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

(L) Revenue Recognition:

Ind AS 115 specifies a uniform, five-step model for revenue recognition, which is generally to be applied to all contracts with customers. Amounts disclosed as revenue net of customer returns, trade allowance, rebates, value added and other indirect taxes and amount collected on behalf of third parties.

Sale of Goods:

The Company recognizes revenue from sale of goods measured at the fair value of the consideration received or receivable, upon satisfaction of performance obligation which is at a point in time when control of the goods is transferred to the customer, generally on delivery of the goods. Depending on the terms of the contract, which differs from contract to contract, the goods are sold on a reasonable credit term. As per the terms of the contract, consideration that is variable, according to Ind AS 115, is estimated at contract inception and updated thereafter at each reporting date or until crystallisation of the amount.

Sale of Services:

Sale of services are recognised on satisfaction of performance obligation towards rendering of such services.

Interest Income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable and dividend income from investments in shares is recognised when the owner's right to receive the payment is established.

(M) Government Grants:

The Company, directly or indirectly through a consortium of Mahindra Group Companies, is entitled to various incentives from government authorities in respect of manufacturing unit located in developing region. The Company accounts for its entitlement as income on an accrual basis.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Company recognises as expenses the related costs for which the grants are intended to compensate.

(N) Employee Benefits:

Defined Contribution Plan/Defined Benefit Plan/Long term Compensated Absences:

Company's contributions paid/payable during the year to Provident fund, Superannuation Fund, ESIC and Labour Welfare Fund are recognised in the Statement of Profit and Loss as and when the employee renders service.

Company's liability towards gratuity, long term compensated absences are determined by independent actuaries, using the projected unit credit method. Past services are recognised on a straight line basis over the average period until the benefits become vested. Actuarial gains and losses of gratuity liability are recognised immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Obligation is measured at the present value of estimated future cash flows using a discounted rate that is determined by reference to the market yields at the Balance Sheet date on Government Bonds where the currency and terms of the Government Bonds are consistent with the currency and estimated terms of the defined benefit obligation.

(O) Borrowing Costs:

Borrowing costs directly attributable to the acquisition or construction of assets that necessarily take a substantial period of time to get ready for their intended use, are capitalised as part of the cost of such assets. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

(P) Taxes on Income:

Current tax is determined as the amount of tax payable in respect of taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961. Deferred tax is recognised, subject to consideration of prudence, on timing differences, being the difference between taxable income and accounting income that originate in one period and are capable of reversal in one or more subsequent periods. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences could be utilized.

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax against which the MAT paid will be adjusted.

(Q) Leases:

Transition:

Ministry of Corporate Affairs ("MCA") through Companies (Indian Accounting Standards) Amendment Rules, 2019 and Companies (Indian Accounting Standards) Second Amendment Rules, has notified Ind AS 116 Leases which replaces the existing lease standard, Ind AS 17 leases, and other interpretations. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. It introduces a single, on-balance sheet lease accounting model for lessees. The Company has adopted modified retrospective approach where lease liability measured at present value of remaining lease payment discounted at the incremental borrowing rate at the date of initial application and right to use asset is equal to lease liability adjusted by the amount of any prepaid or accrued lease payments. The Company has adopted Ind AS 116 with effect from initially applying this standard from 1 April 2019. Accordingly, the information presented for previous year ended 31 March 2019 has not been restated and continues to be reported under IAS 17.

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether:

- the contract involves the use of an identified asset – this may be specified explicitly or implicitly, and should be physically distinct or represent substantially all of the capacity of a physically distinct asset. If the lessor has a substantive substitution right, then the asset is not identified
- the Company has the right to obtain substantially all of the economic benefits from use of the asset throughout the period of use; and
- the Company as a lessee has the right to direct the use of the asset. The Company has this right when it has the decision-making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases where the decision about how and for what purpose the asset is used is predetermined, the Company has the right to direct the use of the asset if either:
- the Company as a lessee has the right to operate the asset; or
- the Company as a lessee designed the asset in a way that predetermines how and for what purpose it will be used.
- This policy is applied to contracts entered into, or modified, on or after 1 April, 2019.

The Company as lessee:

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use assets are subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at amortised cost at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using the incremental borrowing rate.

It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Short-term leases and leases of low-value assets:

The Company has elected not to recognise right-of-use assets and lease liabilities for short-term leases that have a lease term of 12 months or less and leases of low-value assets. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term

The Company as lessor:

When the Company acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease.

Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

When the Company is an intermediate lessor, it accounts for its interests in the head lease and the sublease separately. The sublease is classified as a finance or operating lease by reference to the right-of-use asset arising from the head lease.

The Company recognises lease payments received under operating leases as income on a straight- line basis over the lease term as part of 'other income'.

The Company as lessee :

Operating Leases :

For transition, the Company has elected not to apply the requirements of Ind AS 116 to leases which are expiring within 12 months from the date of transition by class of asset and leases for which the underlying asset is of low value on a lease-by-lease basis. The Company has also used the practical expedient provided by the standard when applying Ind AS 116 to leases previously classified as operating leases under Ind AS 17 and therefore, has not reassessed whether a contract, is or contains a lease, at the date of initial application, relied on its assessment of whether leases are onerous, applying Ind AS 37 immediately before the date of initial application as an alternative to performing an impairment review, excluded initial direct costs from measuring the right of use asset at the date of initial application and used hindsight when determining the lease term if the contract contains options to extend or terminate the lease. Single discount rate to a portfolio of leases with similar characteristics.

On application of Ind AS 116, the nature of expenses has changed from lease rent in previous periods to depreciation cost for the right-to-use asset, and finance cost for interest accrued on lease liability.

Finance Leases:

The Company has leases that were classified as finance leases applying Ind AS 17. For such leases, the carrying amount of the right-of-use asset and the lease liability at the date of initial application of Ind AS 116 is the carrying amount of the lease asset and lease liability on the transition date as measured applying Ind AS 17.

The Company as lessor:

The Company is not required to make any adjustments on transition to Ind AS 116 for leases in which it acts as a lessor, except for a sub-lease. The Company accounted for its leases in accordance with Ind AS 116 from the date of initial application. The Company does not have any significant impact on account of sub-lease on the application of this standard.

(R) Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When provision is measured using the cash flow estimated to settle the present obligation, its carrying amount is the present value of these cash flows (when the effect of the time value of money is material).

3 Recent accounting pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. As on this date, there is no standard which is issued but not yet effective that is expected to have a material impact on the financial statements of the Company.

NOTE 34 – FINANCIAL INSTRUMENTS

CAPITAL MANAGEMENT

The Company's capital management objective is to maximise shareholder value, safeguard business continuity and support the growth of the Company by maintaining sound and optimal capital structure through monitoring of financial ratios, such as debt-to-equity ratio on a monthly basis. There is no change in the overall capital risk management strategy of the Company compared to last year.

The Company monitors the total capital as comprising of debt and equity. Debt includes all short term and long term debts. Equity comprises of total shareholders' equity as reported in the financial statements.

The Company is not subject to externally enforced capital regulation.

Total Capital of the Company is as follows:

Rs. in Lakhs

Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

CREDIT RISK

(I) Credit risk management

Credit risk arises when a counterparty defaults on its contractual obligations to pay resulting in financial loss to the Company. Financial instruments that are subject to credit risk, principally consist of trade receivables, investment in mutual funds and fixed deposits etc.

None of the financial instruments of the Company result in material concentrations of credit risks except trade receivables which mainly consists of receivable from Holding Company. There were no indications as at 31st March 2020 and 31st March 2019, that defaults in payment obligations will occur.

As the trade receivables are mainly from its holding Company, the Company does not expect any credit loss.

LIQUIDITY RISK

(I) Liquidity risk management

The Company has established an appropriate liquidity risk management framework for the management of short-term, medium-term and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and borrowing facilities, by continuously monitoring forecast and actual cash flows.

(II) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay the liabilities. The table include both interest and principal cash flows.

Rs. in Lakhs

Particulars	**Less than 1 Year**	**1-3 Years**	**3 Years to 5 Years**	**5 years and above**
Non-derivative financial liabilities				
31st March, 2020				
Fixed interest rate instruments	**47,464**	**8,559**	**7,800**	**71,700**
Non-interest bearing	**112,716**	**16,445**	**–**	**–**
Total	**160,180**	**25,004**	**7,800**	**71,700**
31st March, 2019				
Fixed interest rate instruments	21,759	29,438	7,800	75,600
Non-interest bearing	198,007	14,256	–	–
Total	219,766	43,694	7,800	75,600

MARKET RISK:

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such as equity price risk and commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. Future specific market movements cannot be normally predicted with reasonable accuracy.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

Currency Risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's / Company's exposure to currency risk relates primarily to the Company's operating activities when transactions are denominated in a different currency from the Company's functional currency.

Details of foreign currency exposures that are not hedged by a derivative instrument or otherwise:

Particulars	Currency	Amount in foreign currency (in lakhs)		Equivalent amount (Rs. in lakhs)	
		31st March, 2020	31st March, 2019	**31st March, 2020**	31st March, 2019
Payables	USD	**8**	37	**573**	2,542
	KRW	**7,653**	114,707	**473**	6,980
	EURO	**10**	3	**847**	254
	GBP	*	*	*	*
	JPY	**2,865**	143	**1,995**	89
	CHF	*	*	*	*
Receivables	USD	**238**	179	**17,563**	12,260

* amount less than 50,000

Foreign Currency Sensitivity

The following table demonstrates the sensitivity to a reasonably possible change in exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives. The impact on the Company's pre-tax equity is due to changes in the fair value of forward exchange contracts designated as cash flow hedges. The Company's exposure to foreign currency changes for all other currencies is not material.

* amount less than Rs. 50,000

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not exposed to the risk of changes in market interest rates as the Company does not have any long-term debt obligations with floating interest rates.

Other price risk

The Company is not exposed to equity price risks arising from equity investments. Equity investments are held for strategic rather than trading purposes. The Company does not actively trade these investments.

NOTE 36 – EMPLOYEE BENEFITS

(A) Defined contribution plan

Amount recognised as an expense in the Statement of Profit and Loss is Rs. 1,084 Lakhs (31st March, 2019 - Rs.813 Lakhs)

(B) Defined benefit plan

The defined benefit plans comprise of Gratuity..

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting.

Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

Interest Risk:

A decrease in government bond yields will increase plan liabilities.

Longevity Risk:

The present value of defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.

Salary Risk:

The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

	6 Non-Current portion of the above	**(3,789)**	(2,536)

Rs. in Lakhs

(F)	Components of employer expenses recognised in the statement of profit and loss for the year ended	**For the year ended 31st March, 2020**	For the year ended 31st March, 2019
	1 Current Service cost	**349**	335
	2 Past Service cost	**–**	–
	3 Interest cost	**212**	193
	4 Total expense recognised in the Statement of Profit & Loss	**561**	528

Rs. in Lakhs

(G)	Components of employer expenses recognised in the statement of Comprehensive Income for the year ended	**For the year ended 31st March, 2020**	For the year ended 31st March, 2019
	1 Actuarial Losses/(Gains)		
	(i) arising from changes in demographic assumption	**(78)**	*
	(ii) arising from changes in financial assumption	**43**	36
	(iii) arising from changes in experience adjustment	**915**	(176)
	2 Components of defined benefit costs recognised in other Comprehensive Income	**880**	(140)

* amount less than Rs. 50,000

(H)	Principal Actuarial Assumptions:	**As at 31st March, 2020**	As at 31st March, 2019
	1 Discount Rate (%)	**6.80%**	7.80%
	2 Expected Return on plan assets (%)	**NA**	NA
	3 Salary Escalation (%)	**7%/9%**	8%/10%
	4 Withdrawal Rate (%) (Others)	**2%/10%**	2%/7%

a) The Discount rate is based on the prevailing market yields of Indian Government securities as at the Balance Sheet date for the estimated terms of the obligations.

b) Salary Escalation Rate : The estimates of future salary increases considered takes into account the inflation, seniority, promotion and other relevant factors.

Rs. in Lakhs

(I)	Experience Adjustments	**For the year ended on 31st March, 2020**	For the year ended on 31st March, 2019	For the year ended on 31st March, 2018	For the year ended on 31st March, 2017	For the year ended on 31st March, 2016
	1 Defined Benefit Obligation at the end of the year	**4,101**	2,771	2,514	2,293	1,931
	2 Plan Assets at the end of the year	**–**	–	–	–	–
	3 Surplus/(Deficit)	**(4,101)**	(2,771)	(2,514)	(2,293)	(1,931)
	4 Experience adjustments on plan liabilities (gains)/losses	**915**	(176)	(125)	(99)	(54)
	5 Experience adjustments on plan assets	**–**	–	–	–	–

Rs. in Lakhs

(J)	Sensitivity of the defined benefit obligation to changes:		Change in assumption	Impact on defined benefit obligation increase/(decrease) Increase in assumption	Decrease in assumption
	1 Discount Rate	**2020**	**1%**	**(517)**	**644**
		2019	1%	(325)	398
	2 Salary Escalation (%)	**2020**	**1%**	**587**	**(484)**
		2019	1%	350	(299)
	3 Withdrawal Rate (%) (Others)	**2020**	**1%**	**(31)**	**36**
		2019	1%	(32)	36

Note:

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous period.

(K) Maturity profile of defined benefit obligation:

Rs. in Lakhs

	2020	2019
Within 1 year	**312**	235
1 - 2 year	**208**	117
2 - 3 year	**226**	133
3 - 4 year	**277**	149
4 - 5 year	**282**	181
5 year & Above	**1,798**	1,386

(L) The weighted average duration of the defined benefit obligation as at 31st March, 2020 is 20.91 years (31st March, 2019 - 22.33 years)

NOTE 37 –

The net difference in foreign exchange loss debited to the Statement of Profit and Loss is Rs. 703 Lakhs (31st March, 2019 - Loss of Rs. 105 Lakhs)

NOTE 38 –

During the year ended 31st March 2019, the Company has received favorable order from Income Tax Appellant Tribunal ('ITAT') for the financial year 2010-11 and 2011-12 stating that incentive received under Industrial Promotion Scheme ('IPS') is capital receipt and the same is exempt from tax. The Company had considered IPS income as revenue receipt while calculating the provision for tax for the respective years in the books of account till 31st March 2015. On receipt of favorable order from ITAT, the Company had reversed net excess tax provision amounting to INR 23,032 lakhs after adjusting other tax impacts.

NOTE 39 –

Expenditure incurred on Corporate Social Responsibility (CSR) under Section 135 of the Companies Act, 2013 Rs. 1,276 lakhs (31st March 2019 : Rs. 1,059 lakhs).

NOTE 39 A –

The Company has elected to exercise the option with regards to the tax rate mentioned under section 115BAA of the Income-tax Act, 1961 as introduced by the Taxation Laws (Amendment) Ordinance, 2019. Accordingly, the Company has recognized Provision for Income Tax for the year ended 31 March 2020 and re-measured its Deferred Tax Liabilities basis the rate prescribed in the said section. The impact of this change amounting to Rs. 4,802 Lakhs has been recognized in the statement of Profit & Loss for the year ended 31 March 2020.

NOTE 39 B –

COVID-19, a new strain of Coronavirus, has spread globally, including India. The event significantly affects the economic activity worldwide. The impact of the COVID-19 on the Company's business will depend on future developments that cannot be reliably predicted, including actions to contain or treat the disease and mitigate its impact on the economy of the country, among others. The Company will closely monitor any material changes to future economic conditions due to this pandemic.

NOTE 39 C –

The Board of Directors of the Company at its meeting held on 29th May 2019, have approved the merger of the Company, with Mahindra & Mahindra Limited. The Appointed Date of the Scheme would be 1st April 2019 or such other date as may be approved. The Scheme of arrangement has been filed with the National Company Law Tribunal.

NOTE 40 – EXCEPTIONAL ITEM

(a) Exceptional items include Rs. 79,717 lakhs towards provision for impairment of investment in associate company measured as per the principles of Indian Accounting Standards.

(b) Exceptional items include Rs. 3,549 lakhs towards provision for impairment in relation to certain capital work-in-progress which is damaged in transit. The same is compensated with an insurance claim receivable of an equivalent amount, which also has been included under Exceptional items.

(c) Exceptional items in previous year include Rs. 703 lakhs represents profit on sale of certain long term investments.

NOTE 41 – LEASES

Reconciliation of operating lease commitments as at March 31, 2019 with the lease liabilities recognized in the Balance Sheet as at April 1, 2019:

Particulars	Rs. in Lakhs
Operating lease commitment at March 31, 2019	1,840
Discounted using the incremental borrowing rate at April 1, 2019	1,210
Recognition exemption for:	
Short term leases, Leases of low value assets and Extension and termination options reasonably certain to be exercised	192
Lease liabilities recognised at April 1, 2019	1,017
Impact of adoption of Ind AS 116 on retained earnings:	–
Reversal of deferred rent liability as at March 31, 2019	–
Less: Reclassification of operating lease under Ind AS 17 'Leases' to right-of-use assets	–
Impact on retained earnings as at April 1, 2019	–

Impact of adoption of Ind AS 116 on the statement of profit and loss	Rs. in Lakhs For the year ended on 31st March, 2020
Interest on lease liabilities	**47**
Amortization on right of use assets	**862**
Deferred tax (credit)	**(57)**
Impact on the statement of profit and loss for the period	**852**

The Company has sublet few of the leased premises. Lease rental income under such non-cancellable operating lease during the year ended March 31, 2020 amounted to Rs. 594 lakhs.

Particulars	As at 31st March, 2020
Receivable – Not later than one year	**166**
Receivable – Later than one year and not later than five years	–

NOTE 42 – EARNING PER SHARE

Particulars	For the year ended on 31st March, 2020	For the year ended on 31st March, 2019
Profit for the year for Basic and Diluted EPS (Rs. in Lakhs)	**(41,829)**	72,062
Weighted Average Number of Equity Shares for Basic EPS	**4,064,723,484**	4,064,646,772
Weighted Average Number of Equity Shares for Diluted EPS	**4,064,723,484**	4,064,646,772
Basic EPS (Face value of Rs.10 per share)	**(1.03)**	1.77
Diluted EPS (Face value of Rs.10 per share)	**(1.03)**	1.77

NOTE 44 – COMMITMENTS:

(a) Uncalled liability on equity shares partly paid Rs. 1,050 Lakhs (31st March, 2019 - Rs. 1,050 Lakhs)

(b) Company availed benefit under EPCG scheme worth Rs 2,562 lakhs during the financial year ended on 31st March 2020. The unfilled export obligation as at 31st March 2020 under the scheme is Rs. 15,372 lakhs. The company expects to fulfill the export obligation within prescribed time limit as it is obliged under the scheme.

(c) Estimated amount of contracts remaining to be executed on capital account for tangible assets and not provided for Rs. 80,681 Lakhs (31st March, 2019 - Rs. 98,876 Lakhs) and intangible assets Rs. Nil (2019 - Rs. Nil)

NOTE 45 – CONTINGENT LIABILITY:

(a) Claims against the Company not acknowledged as debts - Excise duty & MSEDCL related : Rs. 1,836 lakhs (2019 - Rs. 1,116 lakhs).

NOTE 46 – SEGMENT REPORTING:

An operating segment is a component of the Company that engages in business activities from which it may earn revenues and incur expenses including revenues and expenses that relate to transactions with any of the Company's other components and for which discrete financial information is available. All operating segments' operating results are reviewed regularly by the Senior Management to make decisions about resources to be allocated to the segments and assess their performance.

The principle business of the Company is manufacture of passenger cars, medium and heavy commercial vehicles and construction equipment. Senior management of the Company monitors the operating results of the Company's business as a single segment. Accordingly in context of Ind AS 108 "Operating Segments", the principle business of the Company constitutes a single reportable segment and the major revenue is generated from manufacture of passenger cars, medium and heavy commercial vehicles and construction equipment. As per Management's perspective, the risk and returns from its sales do not materially vary geographically. Accordingly there are no other business / geographical segments to be reported under Ind AS 108.

Revenue of the Company is mainly sale of products to its holding company.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF,
MAHINDRA HEAVY ENGINES LIMITED

Report on the Audit of the Standalone IND AS Financial Statements

Opinion

We have audited the standalone IND AS Financial Statements of Mahindra Heavy Engines Limited ("the Company"), which comprise the balance sheet as at 31st March, 2020, and the statement of Profit and Loss, (statement of changes in equity) and statement of cash flows for the year then ended, and notes to the IND AS Financial Statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone IND AS Financial Statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2020, and profit/ loss, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the IND AS Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the IND AS Financial Statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Our opinion on IND AS Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the IND AS Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the IND AS Financial Statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Standalone IND AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these standalone IND AS Financial Statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian accounting standards (IND As) specified under section 133 of the Act, read with rule 7 of companies (Accounts) rule, 2014. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the IND AS Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the IND AS Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the IND AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the IND AS Financial Statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these IND AS Financial Statements.

As part of an audit in accordance with Standard on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the IND AS Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the IND AS Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the IND AS Financial Statements, including the disclosures, and whether the IND AS Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure-B", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   (d) In our opinion, the aforesaid standalone IND AS Financial Statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

   (e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.

   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A".

   (g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended: In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

   (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

      i. The Company has disclosed the impact of pending litigations on its financial position in its IND AS Financial Statements – Refer Note 30 to the IND AS Financial Statements;

      ii. the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

      iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Mahindra Heavy Engines Limited ("the Company") as of 31stMarch, 2020 in conjunction with our audit of the IND AS Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing whether the risk of a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the IND AS Financial Statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of IND AS Financial Statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of IND AS Financial Statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the IND AS Financial Statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected, Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March 2020, based on "the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India".

ANNEXURE B TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

i. **In respect of its Fixed Assets:**

a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

b) The fixed assets are physically verified once in a three years by the Management in accordance with program of verification which, in our opinion, provides for physical verification of all the fixed assets at reasonable intervals. During the year, no physical verification was conducted by the management. According to the information and explanation given to us, no material discrepancies were noticed on such verification.

c) In respect of immovable properties of land that have been taken on lease (disclosed as Right of Use of Asset as Property, Plant and Equipment in the IND AS financial statements) and building constructed thereon (disclosed as Property, Plant and Equipment in the IND AS financial statements), according to the information and explanations given to us and on the basis of our examination of the records of the Company, the lease agreements of immovable properties are held in the name of the Company, where the Company is the lessee in the agreement.

ii. In our opinion and according to the information and explanations given to us, having regard to the nature of inventory, physical verification of materials, site visits by the Management and certification of extent of work completion by competent persons, are at reasonable intervals and no material discrepancies were noticed on physical verification.

iii. The Company has not granted any loans, secured or unsecured to companies or other parties covered under section 189 of the Companies Act, 2013 and hence reporting under clause (iii) of the CARO 2016 is not applicable.

iv. According to information and explanations provided to us, the Company has granted an unsecured loan of Rs. 40 crore to the Parent Company and provisions of Sections 186 of the Companies Act, 2013 are complied with. The Company has not granted any loans to directors and hence compliance of provisions of section 185 is not applicable.

v. According to the information and explanations given to us, the Company has not accepted any deposits during the year. There were no unclaimed deposits outstanding at any time during the year.

vi. The maintenance of cost records has been specified by the Central Government under section 148(1) of the Companies Act, 2013. We have broadly reviewed the cost records maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended prescribed by the Central Government under subsection (1) of Section 148 of the Companies Act, 2013, and are 'of the opinion that, prima facie, the prescribed cost records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

vii. According to the information and explanations given to us, in respect of statutory dues:

a. The Company has been generally regular in depositing undisputed statutory dues, including Provident Fund, Employees' State Insurance, Income-tax, Goods and Service Tax and other material statutory dues applicable to it to the appropriate authorities.

b. There were no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income-tax, Customs Duty, Cess, Goods and Service Tax and other material statutory dues in arrears as at 31stMarch 2020 for a period of more than six months from the date they became payable.

c. According to the information and explanations given to us and records of the Company examined by us, particulars of dues of Income Tax , and Excise Duty and cess, which have not been deposited on account of disputes are as under:

Name of Statute	Nature of Dues	Forum where dispute is pending	Period to which the Amount relates	Amount involved (Rs. in Lakhs)	Amount unpaid (Rs. In Lakhs)
Income Tax Act, 1961	Income tax (including interest)	Assessing Officer	Assessment Year 2010-11	11.14	11.14
Central Excise Act, 1944	Interest on Excise Duty	Commissioner of Customs and Central Excise (Appeals) – Pune	Assessment Year 2012-16	21.74	21.74

viii. Based on the records examined by us and according to the information and explanations given to us, the Company has not defaulted in repayment of dues to any financial institution or bank as at the Balance Sheet date. The Company has not taken any loans or borrowings from Government and has not issued any debentures.

ix. Based on the records examined by us and according to the information and explanations given to us, during the year, term loans were applied for the purpose for which the loans were obtained. According to the information and explanations given by the management, the Company has not raised any money way of initial public offer/further public offer.

x. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have not come across any instances of frauds by the Company or any material fraud on the Company by its officers or employees nor have any instances of material fraud been reported to us by the management during the year.

xi. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has paid/provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of section 197 read with Schedule V of the Act.

xii. In our opinion and according to the information and explanations given to us, the Company is not a 'Nidhi' Company, hence Clause (iii) (xii) of the Order is not applicable to the Company.

xiii. According to the information and explanation given to us and based on our examination of the records of the Company, transactions with related parties are in compliance with sections 177 and 188 of the Act where applicable and details of such transactions have been disclosed in the IND AS financial statements as required by the applicable accounting standards.

xiv. The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review. Accordingly, the Clause (iii) (xiv) of the Order is not applicable to the Company.

xv. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into non-cash transactions with directors or persons connected with him. Accordingly, Clause (iii) (xv) of the Order is not applicable.

xvi. The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act 1934.

Notes To The Financial Statements For The Year Ended March 31, 2020

Mahindra Heavy Engines Limited is subsidiary of Mahindra Vehicle Manufacturers Limited having Corporate Identity Number U35914MH2007PLC169753, having it's registered office at Mahindra Towers, Dr. G.M. Bhosale Marg, P.K. Kurne Road, Worli, Mumbai 400 018. The Company is in manufacturing and sales of Engines and other auto components for vehicles and Genset applications.

NOTE 1. - Significant Accounting Policies:

1.1 Statement of compliance:

The financial statements have been prepared in accordance with Ind AS as notified under the Companies (Indian Accounting Standards) Rules, 2015 read with Section 133 of the Companies Act, 2013 (the "Act").

1.2 Basis of preparation and presentation:

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

In addition, for the financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to fair value measurement in its entirety, which are described as follows:

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

1.3. Property, Plant & Equipment:

Property, Plant & Equipment are carried at cost less depreciation. Cost is the amount of cash or cash equivalents paid or the fair value of the other consideration given to acquire an asset at the time of its acquisition and financing cost relating to borrowed funds attributable to the construction or acquisition of qualifying tangible assets upto the date the assets are ready for use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in statement of profit or loss.

Depreciation is provided on straight-line basis for property, plant and equipment so as to expense the depreciable amount, i.e. the cost less estimated residual value, over its estimated useful lives. The estimated useful lives and residual values are reviewed annually and the effect of any changes in estimate is accounted for on a prospective basis.

The management's estimate of useful lives are in accordance with Schedule II to the Companies Act, 2013, other than the following asset classes, based on the Company's expected usage pattern supported by technical assessment:, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc. :

Plant and Machinery	2 years, 5 years, 7 years, 8 years and 10 years
Vehicles	5 years
Roads	15 years
Assets below Rs. 5,000/-	1 year

1.4. Intangible Assets

Intangible assets acquired separately:

Intangible assets are initially recognised at cost.

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Intangible assets under development

The Company expenses costs incurred during research phase to profit or loss in the year in which they are incurred. Eligible development phase expenses are initially recognised as intangible assets under development until the development phase is complete. Once the development phase is complete, the eligible development phase expenses are capitalised as intangible asset.

Technical Know-how fees:

The expenditure incurred on technical services and other project/product related expenses are amortised over the estimated period of benefit, not exceeding six years.

Software Expenditure:

The expenditure incurred is amortised over three financial years equally commencing from the year in which the expenditure is incurred.

Internally-generated intangible assets - Research and Development expenditure:

Expenditure on research activities are recognised as an expense in the period in which they are incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Product Development Expenditure:

The expenditure incurred on product development expenditure expenses are amortised over the estimated period of benefit, not exceeding five years.

Notes To The Financial Statements For The Year Ended March 31, 2020

Derecognition of intangible assets:

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

1.5. Impairment:

The carrying amounts of assets are reviewed at each balance sheet date to determine whether there is any indication of impairment based on internal/external factors. Impairment loss is provided to the extent the carrying amount of assets exceeds their recoverable amount. Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the cost of disposal.

1.6. Inventories:

Inventories are stated at the lower of cost and net realisable value after providing for obsolescence and other losses, where considered necessary. In determining the cost of purchased materials moving average method is used. Cost of manufactured finished goods and work-in-progress are valued on absorption costing basis and includes appropriate proportion of overheads and, where applicable, excise duty. Stores, spares and tools are carried at cost or estimated net realisable value, whichever is lower.

1.7. Cash and cash equivalents (for purposes of Cash Flow Statement):

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition).

1.8. Investments:

Investments, which are readily realisable and intended to be held for not more than one year from the date on which such investments are made are classified as current investments. All other investments are classified as non-current investments.

1.9. Financial Instruments:

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial Assets:

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Financial assets at Fair value through profit or loss are measured at fair value at the end of each reporting period, with any gains or losses arising on re measurement recognised in profit or loss, The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in 'Other income'.

Financial liabilities and equity instruments:

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

1.10. Revenue Recognition:

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for rebates and other similar allowances.

Ind AS 115- Revenue from Contracts with Customers

Company adopted IND AS 115 - Revenue from contracts with customers w.e.f. 1st April 2018. In view of that, Revenue is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration the Company expects to receive in exchange for those products or services. To recognize revenues, Company apply the following five step approach:

(1) identify the contract with a customer

(2) identify the performance obligations in the contract

(3) determine the transaction price

(4) allocate the transaction price to the performance obligations in the contract

(5) recognize revenues when a performance obligation is satisfied.

The Company applies judgement to determine whether each product or services promised to a customer are capable of being distinct, and are distinct in the context of the contract, if not, the promised product or services are combined and accounted as a single performance obligation. The Company allocates the arrangement consideration to separately identifiable performance obligation based on their selling price.

Interest income:

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding.

1.11. Goods and Services Tax :

GST duty payable on finished goods is accounted for upon transfer of goods to the customers.

1.12. Custom Duty:

Custom duty payable on imported goods is accounted for when the goods enter the Indian shores.

1.13. Government Grants and Other Incentives:

The Company, directly or indirectly through a consortium of Mahindra Group Companies, expects to be entitled to various incentives from government authorities in respect of manufacturing units located in developing regions. The company accounts for such entitlement on accrual basis.

Government grants related to acquisition of depreciable assets are recognised as deferred revenue in the financial statements and are transferred to statement of Profit and Loss on a systematic and rational basis over the useful lives of the related assets.

1.14. Export Benefits:

Export benefits under various schemes of Government of India are accounted on accrual basis except when there is an uncertainty in respect of the entitlement.

1.15. Foreign exchange transactions:

Transactions in foreign currencies (Other than company's functional currency) are recorded at the exchange rates prevailing on the date of transaction. Monetary items are translated at the year-end rates. The exchange difference between the rate prevailing on the date of transaction and on the date of settlement as also on translation of Monetary items at the end of the year, is recognised as income or expense, as the case may be .

Notes To The Financial Statements For The Year Ended March 31, 2020

1.16. Employee Benefits:

(i) Defined Contribution Plan

The Company's contributions paid/payable during the year to Provident Fund and Superannuation Fund are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made as and when services are rendered by the employees.

(ii) Defined Benefit Plan/Leave encashment:

The Company's liability towards gratuity and leave encashment is determined using the projected unit credit method which considers each period of service as giving rights to an additional unit of benefit entitlement and measure each unit separately to build up the final obligation. Past services are recognised on straight line basis over the average period until the benefits become vested. Actuarial gains and losses are recognised immediately in the Statement of other comprehensive income as income or expense. Obligation is measured at the present value of estimated future cash flow using discounted rate i.e. determined by reference to the market yield at the Balance Sheet date on Government Bonds where the currency and terms of the Government Bonds are consistent with the currency and estimated terms of the defined benefit obligation.

(iii) Other Benefits:

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service.

1.17. Borrowing Costs:

Borrowing costs that are attributable to the acquisition or construction of a qualifying asset are capitalised as part of such assets. A qualifying asset is one that necessarily takes a substantial period of time to get ready for its intended use or sale. All other borrowing costs are recognised as an expense in the period in which they are incurred.

1.18. Taxes on Income:

Current tax:

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the Financial statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax:

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Current and deferred tax for the year:

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

1.19. Warranty:

Provision for warranty represents present value of management's best estimate of the future outflow of economic benefits that will be required in respect of sale of certain products, the estimated cost of which is accrued at the time of sale. Management estimates the related provision for future warranty claims based on historical warranty claim information and is adjusted regularly to reflect new information.

1.20. Segment Reporting:

The Company's business activity falls within a primary business segment namely manufacturing of Engines and other auto components and there is no reportable geographical segment.

1.21. Provisions, Contingent Liabilities and Contingent Assets:

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that the company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Contingent liabilities are not recognised but are disclosed in the notes. Contingent assets are neither recognised nor disclosed in the financial statements.

1.22. Critical accounting judgements and key sources of estimation uncertainty :

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected.

Key source of estimation of uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of useful lives of property, plant and equipment, obligations relating to employee defined benefits etc. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known/materialise.

1.23. Ind AS 116 Leases :

Ind AS 116 is replaced the existing leases standard, Ind AS 17 Leases. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. It introduces a single, on balance sheet lessee accounting model for lessees. A lessee recognises right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. The standard also contains enhanced disclosure requirements for lessees.

Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17. The amendment is effective for annual periods beginning on or after 01st April 19.

 # Note:
In February 2019, Supreme Court of India in its judgement clarified the applicability of allowances that should be considered to measure obligations under Employees Provident Fund Act, 1952. The Company has been legally advised that there are interpretative challenges on the application of judgement retrospectively and as such does not consider there is any probable obligations for past periods. Accordingly, based on legal advice the Company has made a provision for provident fund contribution from the date of Supreme Court order.

Notes To The Financial Statements For The Year Ended March 31, 2020

*** Note:**

Represents cost reimbursed by the company towards ESOP's granted by the ultimate holding company, Mahindra & Mahindra Limited;

Certain employees of the Company are covered by Employee Stock Option Scheme (ESOP scheme) offered by Ultimate Holding Company, Mahindra & Mahindra Limited. Under the scheme, eligible employees are granted an option to purchase shares of Mahindra & Mahindra Limited, in accordance with the terms and conditions of the scheme.

The Company recognises this scheme as an equity settled share based payments arrangement in accordance with IND AS 102 - Share Based Payment. Options granted under Parent's ESOP scheme vests in

i) 5 equal instalments on the expiry of 12 Months, 24 Months, 36 Months, 48 Months and 60 Months from the date of grant.

OR

ii) 4 instalments bifurcated as 20% on the expiry of 18 months, 20% on the expiry of 30 months, 30% on the expiry of 42 months and 30% on the expiry of 54 months.

OR

iii) 3 instalments bifurcated as 33.33% on the expiry of 12 months, 33.33% on the expiry of 24 months and 33.34% on the expiry of 36 months.

The options may be exercised on any day over a period of 5 years from the date of vesting. Number of vested options exercisable is subject to a minimum of 50 or number of options vested whichever is lower.

Such ESOP expense in respect of employees of the Company is charged by the Ultimate Holding Company over the vesting period. The charge is based on fair value of options calculated using Black and Scholes Option Pricing Model. The fair value charge is recognized as share based payment expenses under Employee Benefit Expenses.

Note No. 26 - Financial Instruments

Capital management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern
- to provide an adequate return to shareholders by pricing products commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position.

The company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Impairment losses reversed/written back	**–**	–
Balance at end of the year	**–**	–

The Concentration of credit risk is limited due to the fact that the customer base comprises largely of Mahindra group entities.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following table details the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the table have been drawn up based on the non-discounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The table includes both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

Notes To The Financial Statements For The Year Ended March 31, 2020

Rs. In Lakhs

Particulars	Less than 1 year	1 year to 3 years	3 years to 5 years	5 years and above
Non-derivative financial liabilities				
As at March 31, 2020				
Non-interest bearing	**14,497.06**	–	–	–

Variable interest rate instruments	3,438.49	3,208.99	–	–
Fixed interest rate instruments	–	–	–	–
	4,592.91	3,208.99	–	–

(iii) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Rs. In Lakhs

Particulars	Less than 1 year	1 year to 3 years	3 years to 5 years	5 years and above
Non-derivative financial assets				
As at March 31, 2020				
Non-interest bearing	**14,300.54**	1,022.16	–	5.25
Variable interest rate instruments	–	–	–	–
Fixed interest rate instruments	**128.24**	**83.10**	**15.69**	–
Total	**14,428.78**	**1,105.26**	**15.69**	**5.25**
As at March 31, 2019				
Non-interest bearing	21,628.02	216.88	–	5.25
Variable interest rate instruments	2,213.51	–	–	–
Fixed interest rate instruments	138.87	75.62	16.18	–
	23,980.40	292.50	16.18	5.25

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

MARKET RISK

Currency Risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's exposure to currency risk relates primarily to the Company's operating activities when transactions are denominated in a different currency from the Company's functional currency.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

Rs. In Lakhs

Particulars	Currency	As at March 31, 2020	As at March 31, 2019
Trade Receivables	USD	**0.57**	2.84
	INR	**43.16**	196.76
Trade Payables	USD	**2.99**	0.94
	INR	**225.64**	64.88
	EUR	**0.45**	0.07
	INR	**37.41**	5.13
	JPY	**–**	93.30
	INR	**–**	58.26
	KRW	**299.12**	748.31
	INR	**18.49**	45.53

Of the above foreign currency exposures, the following exposures are not hedged by a derivative:

Rs. In Lakhs

Particulars	Currency	As at March 31, 2020	As at March 31, 2019
Trade Receivables	USD	**0.57**	2.84
	INR	**43.16**	196.76
Trade Payables	USD	**2.99**	0.94
	INR	**225.64**	64.88
	EUR	**0.45**	0.07
	INR	**37.41**	5.13
	JPY	**–**	93.30
	INR	**–**	58.26
	KRW	**299.12**	748.31
	INR	**18.49**	45.53

Foreign Currency Sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD, EUR, JPY and KWR exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives.

Rs. In Lakhs

Particulars	Currency	Change in rate	Effect on profit/(loss) before tax
As at March 31, 2020	**USD**	**10%**	**(18.25)**
		(10%)	**18.25**
	EUR	**10%**	**(3.74)**
		(10%)	**3.74**
	KWR	**10%**	**(1.85)**
		(10%)	**1.85**
	JPY	**10%**	**–**
		(10%)	**–**
As at March 31, 2019	USD	10%	13.19
		(10%)	(13.19)
	EUR	10%	(0.51)
		(10%)	0.51
	KRW	10%	(4.55)
		(10%)	4.55
	JPY	10%	(5.83)
		(10%)	5.83

Notes To The Financial Statements For The Year Ended March 31, 2020

In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year.

Interest rate risk

Interest rate sensitivity

The sensitivity analyses below have been determined based on exposure to interest rate for non-derivative instruments at the end of reporting period. For floating rate liabilities, analysis is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole year.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate loans and borrowings, as follows:

Rs. In Lakhs

Particulars	**Currency**	**Increase/ (decrease) in basis points**	**Effect on profit/(loss) before tax**
31-Mar-20	**INR**	**100**	**–**
	INR	**(100)**	**–**
31-Mar-19	INR	100	(56.71)
	INR	(100)	56.71

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment, showing a significantly higher volatility than in prior years.

Notes To The Financial Statements For The Year Ended March 31, 2020

Note No. 28 - Employee benefits

(a) Defined Contribution Plan

The Company makes Provident Fund and Superannuation Fund contributions to defined contribution plans for qualifying employees. Under the Schemes, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. Amount recognised as an expense in the Statement of Profit and Loss is Rs. 134.33 Lakhs. (Previous year Rs. 109.60 Lakhs).

(b) Defined Benefit Plans:

Gratuity

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. The Company makes annual contribution to the group gratuity scheme administered by the Life Insurance Corporation of India through its Gratuity Trust Fund.

Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

1) Liability Risks

a. Asset-Liability Mismatch Risk:

Risk which arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the company is successfully able to neutralize valuations wings caused by interest rate movements. Hence companies are encouraged to adopt asset-liability management.

b. Discount Rate Risk:

Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practise can have a significant impact on the defined benefit liabilities.

c. Future Salary Escalation and Inflation Risk:

Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected salary increases provided at management's discretion may lead to uncertainties in estimating this increasing risk.

2) Asset Risks

All plan assets are maintained in a trust fund managed by a public sector insurer viz; LIC of India.LIC has a sovereign guarantee and has been providing consistent and competitive returns over the years.

The company has opted for a traditional fund where in all assets are invested primarily in risk averse markets. The company has no control over the management of funds but this option provides a high level of safety for the total corpus. A single account is maintained for both the investment and claims settlement and hence 100% liquidity is ensured. Also interest rate and inflation risk are taken care of.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

Particulars	As per March 31, 2020	As per March 31, 2019
Discount rate	**6.85%**	7.80%
Expected rate of salary increase		
Officers	**9.00%**	10.00%

5. Contributions by employer (including benefit payments recoverable)	**–**	30.00
6. Benefit payments	**(6.61)**	(30.59)
7. Fair value of plan assets at the end of the year	**16.49**	21.72
IV. The Major categories of plan assets		
Fund managed by insurer	**100%**	100%
V. Actuarial assumptions		
1. Discount rate	**6.85%**	7.80%
2. Expected rate of return on plan assets	**7.80%**	7.80%
3. Attrition rate		
Officers	**11.00%**	17.00%
Associates	**0.00%**	0.00%
4. Medical premium inflation	**NA**	NA

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Rs. In Lakhs

Principal assumption	Year ended	Changes in assumption	Impact on defined benefit obligation: Increase in assumption	Impact on defined benefit obligation: Decrease in assumption
Discount rate	As at March 31, 2020	1%/-1%	(376.47)	476.87
	As at March 31, 2019	1%/-1%	(295.50)	361.02
Salary growth rate	As at March 31, 2020	1%/-1%	471.38	(380.03)
	As at March 31, 2019	1%/-1%	356.65	(298.49)
Withdrawal rate	As at March 31, 2020	1%/-1%	(417.81)	425.69
	As at March 31, 2019	1%/-1%	(319.02)	326.86

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

The Company expects to contribute Rs. 30 Lakhs to the gratuity trusts during the next financial year ending March 31, 2021.

Mortality : It is assumed that the active members of the scheme will experience in-service mortality in accordance with the Indian Assured Lives Mortality (2012-14) ultimate (IALM ult). A sample pick from this table is given below:

Age	Mortality rate
21	0.093%
22	0.094%
23	0.094%
24	0.093%
25	0.093%

Age of the members at the valuation date is taken as their nearest age at that date.

Maturity profile of defined benefit obligation:

Rs. In Lakhs

Particulars	As at March 31, 2020	As at March 31, 2019
Within 1 year	**27.24**	35.04
1 - 2 year	**30.68**	34.31
2 - 3 year	**35.19**	39.34
3 - 4 year	**39.65**	42.65
4 - 5 year	**44.74**	45.21
5 - 10 years	**287.00**	242.90

Plan Assets

The fair value of Company's pension plan asset as of March 31, 2020 is as follows:

Particulars	As at March 31, 2020	As at March 31, 2019
Asset category:		
Cash and cash equivalents	**0%**	0%
Debt instruments (quoted)	**0%**	0%

Equity instruments (quoted)	**0%**	0%
Deposits with Insurance companies	**100%**	100%
Total	**100%**	100%

Notes To The Financial Statements For The Year Ended March 31, 2020

VIII. Experience Adjustments :

Rs. In Lakhs

Particulars	Gratuity as at As at March 31, 2020	As at March 31, 2019	As at March 31, 2018	As at March 31, 2017	As at March 31, 2016
1. Defined Benefit Obligation	**421.77**	325.00	278.59	251.09	227.71
2. Fair value of plan assets	**16.49**	21.72	18.15	40.83	58.95
3. Surplus/(Deficit)	**(405.28)**	(303.28)	(260.44)	(210.26)	(168.76)
4. Experience adjustment on plan liabilities [(Gain)/Loss]	**74.18**	(12.26)	7.40	(22.61)	(73.47)
5. Experience adjustment on plan assets [Gain/(Loss)]	**0.06**	(1.99)	0.54	(0.51)	2.64

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation.

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

INDEPENDENT AUDITOR'S REPORT

To the Members of Mahindra Electric Mobility Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **Mahindra Electric Mobility Limited** ("the Company"), which comprise the balance sheet as at 31 March 2020, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2020, and loss and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Report of the Board of Directors, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors' Responsibility for the Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we

are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. (A) As required by Section 143(3) of the Act, we report that:
   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
   c) The balance sheet, the statement of profit and loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows dealt with by this Report are in agreement with the books of account.
   d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under section 133 of the Act.
   e) On the basis of the written representations received from the directors as on 31 March 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2020 from being appointed as a director in terms of Section 164(2) of the Act.
   f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

   (B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
   i. The Company has disclosed the impact of pending litigations as at 31 March 2020 on its financial position in its financial statements - Refer note 17 and 35 to the financial statements;
   ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
   iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
   iv. The disclosures in the financial statements regarding holdings as well as dealings in specified bank notes during the period from 8 November 2016 to 30 December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31 March 2020.

   (C) With respect to the matter to be included in the Auditors' Report under section 197(16):

In our opinion and according to the information and explanations given to us, the remuneration paid by the Company to its directors during the current year is in accordance with the provisions of Section 197 of the Act. The remuneration paid to any director is not in excess of the limit laid down under Section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

ANNEXURE - A TO THE INDEPENDENT AUDITORS' REPORT

With respect to the Annexure A referred to in paragraph 1 under Report on Other Legal and Regulatory Requirements of the Independent Auditors' Report to the members of the Company on the IND AS financial statements for the year ended 31 March 2020, we report that:

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) The Company has a regular programme of physical verification of its fixed assets by which all fixed assets are verified in a phased manner over a period of three years. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the programme, certain fixed assets were physically verified during the year. No material discrepancies were noticed on such verification.

(c) In our opinion and according to the information and explanations given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties included in property, plant and equipment are held in the name of the Company.

(ii) The inventory, except goods-in-transit, has been physically verified by the management during the year. In our opinion, the frequency of such verification is reasonable. The discrepancies noticed on verification between the physical stock and the book records were not material. For stocks lying with third parties at the year-end, written confirmation have been obtained by the management.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013 ('the Act'). Accordingly, the provisions of clause 3(iii)(a), (b) and (c) of the Order are not applicable to the Company.

(iv) According to the information and explanations given to us, there are no loans, investments, guarantees and security given in respect of which provisions of section 185 and 186 of the Act are applicable. Accordingly, the provisions of clause 3(iv) of the Order are not applicable to the Company.

(v) The Company has not accepted any deposits from the public. Accordingly, the provisions of clause 3(v) of the Order are not applicable to the Company.

(vi) The Central Government has not prescribed the maintenance of cost records under Section 148 of the Act for any of the products manufactured/services rendered by the Company.

(vii) (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted/accrued in the books of account in respect of undisputed statutory dues including provident fund, employees' state insurance, income-tax, duty of customs, goods and services tax, cess and any other material statutory dues have been generally regularly deposited during the year by the Company with the appropriate authorities.

According to the information and explanations given to us, no undisputed amounts payable in respect of provident fund, employee state insurance, income-tax, duty of customs, goods and services tax, cess and any other material statutory dues were in arrears, as at 31 March 2020, for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, there are no dues of income-tax or duty of customs or goods and services tax or service-tax or duty of excise which have not been deposited by the Company on account of disputes, except for the following:

Name of statue	Nature of dues	Amount (INR)	Period to which the amount relates	Forum where dispute is pending
Central Excise Act, 1944	Duty of Excise	5,142,000	AY 2009 -2011	High Court of Karnataka
Central Excise Act, 1944	Duty of Customs	9,600,000	AY 2016-2017	CESTAT
Finance Act, 1994	Service tax	6,896,608	AY 2006 - 2009	CESTAT*
Finance Act, 1994	Service tax	10,228,255	AY 2006 -2015	Additional Commissioner of Service tax*
Income tax Act, 1961	Income tax	110,000,000	AY 2012-2013	Income Tax Appellate Tribunal**

* The amounts mentioned constitute 70% of the amount of Service tax and 100% of interest and penalty thereon as demanded in the order, as the remaining 30% of the Service tax demanded has been paid under Sabka Vishwas (Legacy Dispute Resolution) Scheme, 2019, whereof the final discharge certificates are pending to be issued by the designated committee formed under the said scheme.

** Against the above, amount of INR 16,500,000 is paid under protest for Income Tax. Refer note 10 for details.

(viii) In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of loans or borrowings to banks and Government. The Company did not have dues to financial institutions and debenture holders during the year.

(ix) According to the information and explanations given to us and based on examination of the records of the Company, the term loans were applied for the purpose for which they were obtained. The Company has not raised any money by way of initial public offer or further public offer (including debt instruments) during the year.

(x) According to the information and explanations given to us, no material fraud on the Company by its officers and employees or fraud by the Company has been noticed or reported during the course of our audit.

(xi) According to the information and explanations given to us and based on examination of the records of the Company, the Company has paid/provided managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Act.

(xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi Company. Accordingly, clause 3(xii) of the Order is not applicable to the Company.

(xiii) According to the information and explanations given to us and based on our examination of the records of the Company, transactions with the related parties are in compliance with Sections 177 and 188 of the Act, where applicable, and details of such transactions have been disclosed in the financial statements as required by the applicable accounting standards.

(xiv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not made preferential allotment or private placement of shares or fully or partly convertible debentures during the year.

(xv) According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into any non-cash transactions with directors or persons connected with him. Accordingly, clause 3(xv) of the Order is not applicable to the Company.

(xvi) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act 1934. Accordingly, clause 3(xvi) of the Order is not applicable to the Company.

ANNEXURE B TO THE INDEPENDENT AUDITORS' REPORT ON THE FINANCIAL STATEMENTS OF MAHINDRA ELECTRIC MOBILITY LIMITED FOR THE YEAR ENDED 31 MARCH 2020.

Report on the internal financial controls with reference to the aforesaid financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

(Referred to in paragraph 2(A)(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Opinion

We have audited the internal financial controls with reference to financial statements of Mahindra Electric Mobility Limited ("the Company") as of 31 March 2020 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2020, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A Company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Nature and purpose of Reserves

(a) Securities Premium

Securities premium is used to record the premium on issue of shares. The reserve is utilised in accordance with the provisions of section 52 of the Companies Act, 2013.

(b) Share options outstanding Account

The share options outstanding account is used to recognise the grant date fair value of options during the vesting period issued under Mahindra Electric Mobility Limited ESOP Scheme ('MEML ESOP - 2017').

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

1. Reporting Entity

Mahindra Electric Mobility Limited ('the Company') is engaged in design and manufacture of electrically powered vehicles and design and development of related technology for end use vehicles. The marketing of the vehicles is done through a network of dealers in India and abroad.

The Company is an unlisted public limited company domiciled in India and is incorporated under the provisions of the Indian Companies Act. The registered office of the Company is located at Mahindra Tower, Dr. G.M. Bhosale Marg, P.K. Kurne Chowk, Worli, Mumbai – 400018, Maharashtra.

The Company's Holding Company is Mahindra Vehicle Manufacturers Limited ("the Holding Company) and the Ultimate Holding Company is Mahindra & Mahindra Limited ("the Ultimate Holding Company").

2.1. Statement of compliance

These IND AS financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) as per the Companies (Indian Accounting Standards) Rules, 2015 notified under Section 133 of Companies Act, 2013 ('the Act') and other relevant provisions of the Act.

In the Board of Directors meeting held on 06 May 2020, the Board has approved to issue these IND AS financial statements to shareholders of the Company.

2.2. Basis of preparation

a) Basis of measurement

The IND AS financial statements have been prepared on the historical cost convention and on an accrual basis except for the following items:

Items	Measurement basis
Certain financial assets	Fair value/Amortized cost
Liabilities for equity-settled share-based payments	Fair value
Net defined benefit liability	Present value of defined benefit obligations

b) Functional and presentation currency

These IND AS financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.

c) Going concern

The Company has been incurring losses and has accumulated losses of Rs. 79,518 lakhs as at 31 March 2020. Furthermore, the Company's current liabilities exceeded its current assets by Rs. 3,331 lakhs as at that date. The Company's plant and office were shut down on 24 March 2020 due to the outbreak COVID-19 Pandemic. However, owing to the continued support for the past several years from the Holding Company and based on future business plans, the Company is confident of funding its operating and capital expenditure and continue business operations in the foreseeable future. Hence, these IND AS financial statements have been prepared on a going concern basis. Also refer note 41.

d) Use of estimates and judgements

In preparing these IND AS financial statements, management has made judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised prospectively.

Information about assumptions, estimation uncertainties and judgements that have a significant risk of resulting in a material adjustment in the year ended 31 March 2020 are included in the following notes:

Particular	Assumptions, estimation uncertainties and judgements
Note 2.3 (c)	- Intangible assets: whether the Company recognises the expenditure incurred on technology development as an intangible asset or as an operating expense.
Note 2.3 (b) and (c)	- Useful life of Property, plant and equipment and intangible assets.
Note 2.3 (d)	- Impairment of financial assets and non-financial assets: key assumptions over expected credit losses associated with its assets carried at amortised cost. Assumption on discount rate.
Note 2.3 (d)	- Impairment of non-financial assets: key assumptions underlying recoverable value.
Note 2.3 (e)	- Measurement of transaction price for the contract and to ascribe the transaction price to each distinct performance obligation. Determining whether the performance obligation is satisfied at a point in time or over a period of time. Judgement to estimate the future cost-to-completion of the contracts which is used to determine the degree of completion of the performance obligation.
Note 2.3 (g)	- Measurement of defined benefit obligations: key actuarial assumptions.
Note 2.3 (h)	- Assessment of lease term and the applicable discount rate.
Note 2.3 (i)	- Recognition of deferred tax assets: availability of future taxable profit against which tax losses carried forward can be used.
Note 2.3 (k)	- recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources.

e) Measurement of fair values

A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities. The Company has an established control framework with respect to the measurement of fair values. Significant valuation issues, if any, are reported to the Company's Management.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

– Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

– Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

– Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in the following notes:

– Note 2.3 (g) - Share-based payment transactions

– Note 2.3 (p) - Financial instruments.

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

2.3 Significant accounting policies

a) Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in normal operating cycle;
- It is held primarily for the purpose of trading;
- It is due to be settled within twelve months after the reporting period; or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

The operating cycle is the time between the acquisition of assets for processing and their realisation in cash and cash equivalents. The Company has identified twelve months as its operating cycle.

b) Property, plant and equipment

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises purchase price, borrowing costs if capitalization criteria are met and directly attributable cost of bringing the asset to its working condition for the intended use. Any trade discounts and rebates are deducted in arriving at the purchase price.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately. This applies mainly to components for machinery. When significant parts of plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement, if the recognition criteria, are satisfied.

Subsequent expenditure related to an item of property, plant and equipment is added to its book value only if it increases the future benefits from its previously assessed standard of performance. All other expenses on existing property, plant and equipment, including day-to-day repair and maintenance expenditure and cost of replacing parts, are charged to the statement of profit and loss for the period during which such expenses are incurred.

Borrowing costs directly attributable to acquisition of property, plant and equipment which take substantial period of time to get ready for its intended use are also included to the extent these relate to the period till such assets are ready to be put to use.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date are classified as capital advances under other non-current assets. Costs of assets not ready for use at the balance sheet date are disclosed under capital work-in-progress.

An item of property, plant and equipment and any significant part initially recognized is de-recognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit or loss when the Property, plant and equipment is de-recognized.

Depreciation

Depreciation is calculated on a straight-line basis over the estimated range of useful lives of the assets as follows:

Class of assets	Management estimate of useful life in years	Useful life as per Schedule II
Factory Buildings	30	30
Plant & Machinery*	5 to 15	10 to 15
Tools & Fixtures*	8	NA
Office equipment*	3 to 5	5
Computer equipment	3 to 6	3 to 6
Furniture & Fixtures	10	10
Vehicles*	5	8
Batteries*	3 to 5	NA

Leasehold improvements are amortized over the lease term or useful lives of assets, whichever is lower.

* The Company, based on technical assessment made by technical expert and management estimate, depreciates certain items of plant and machinery, tools and fixtures, office equipment, vehicles and batteries over estimated useful lives which are different from the useful life prescribed in Schedule II to the Companies Act, 2013. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

c) Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost and carried at cost less any accumulated amortisation and accumulated impairment losses, if any.

Development expenditure on an individual project is recognised as an intangible asset when the Company can demonstrate:

- The technical feasibility of completing the intangible asset so that the asset will be available for use or sale;
- Its intention to complete and its ability and intention to use or sell the asset;
- How the asset will generate future economic benefits;
- The availability of resources to complete the asset; and
- The ability to measure reliably the expenditure during development.

During the period of development, the asset is tested for impairment annually.

Intangible assets are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

amortisation method for an intangible asset with a finite useful life are reviewed at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

The Management estimates the useful lives for its intangible assets as follows:

Class of assets	Useful life estimated (in years)
Product development	5
Computer software	4

Derecognition

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

d) Impairment

i. Impairment of financial assets

The Company recognises loss allowances for expected credit losses on financial assets measured at amortised cost.

At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit impaired. A financial asset is 'credit impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Loss allowances for trade receivables are always measured at an amount equal to lifetime expected credit losses. Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument.

In all cases, the maximum period considered when estimating expected credit losses is the maximum contractual period over which the Company is exposed to credit risk.

Measurement of expected credit losses

Expected credit losses are a probability weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the Company in accordance with the contract and the cash flows that the Company expects to receive).

Presentation of allowance for expected credit losses in the balance sheet

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write off.

ii. Impairment of non-financial assets

For impairment testing, assets that do not generate independent cash inflows are grouped together into cash-generating units (CGUs). Each CGU represents the smallest group of assets that generates cash inflows that are largely independent of the cash inflows of other assets or CGUs.

The recoverable amount of a CGU (or an individual asset) is the higher of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the CGU (or the asset).

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its estimated recoverable amount. Impairment losses are recognised in statement of profit and loss.

In respect of assets for which impairment loss has been recognised in prior periods, the Company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

e) Revenue recognition

The Company recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. A 5-step approach is used to recognise revenue as below:

Step 1: Identify the contract(s) with a customer

Step 2: Identify the performance obligation in the contract

Step 3: Determine the transaction price

Step 4: Allocate the transaction price to the performance obligations in the contract

Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

The Company exercises judgement in determining whether the performance obligation is satisfied at a point in time or over a period of time. The Company considers indicators such as how customer consumes benefits as services are rendered or who controls the asset as it is being created or existence of enforceable right to payment for performance to date and alternate use of such product or service, transfer of significant risks and rewards to the customer, acceptance of delivery by the customer, etc.

Sale of goods

Revenue from the sale of goods is recognised upon transfer of control of promised goods. Revenue from the sale of goods is measured at the fair value of the consideration received or receivable, net of returns and allowances, trade discounts and volume rebates. The Company provides normal warranty provisions for general repairs on all its products sold, in line with the industry practice. A liability is recognised at the time the product is sold.

Rendering of services

Arrangements with customers for development of technology and engineering services are on a fixed-price and fixed-time frame basis. Revenue from these contracts, where the performance obligations are satisfied over time and where there is no uncertainty as to measurement or collectability of consideration, is recognised as per the percentage-of-completion method. When there is uncertainty as to measurement or ultimate collectability, revenue recognition is postponed until such uncertainty is resolved. Costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity.

Maintenance revenue is recognized rateably over the term of the underlying maintenance arrangement.

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Revenue in excess of invoicing are classified as contract assets (referred as unbilled revenue) while invoicing in excess of revenues are classified as contract liabilities (referred as deferred revenues).

Deferred contract costs are incremental costs of obtaining a contract which are recognized as assets and amortized over the term of the contract.

Contract modifications are accounted for when additions, deletions or changes are approved either to the contract scope or contract price. The accounting for modifications of contracts involves whether the services added to an existing contract are distinct and whether the pricing is at the standalone selling price. Services added that are not distinct are accounted for on a cumulative catch up basis, while those that are distinct are accounted for prospectively, either as a separate contract, if the additional services are priced at the standalone selling price, or as a termination of the existing contract and creation of a new contract if not priced at the standalone selling price.

Interest income

For all debt instruments measured either at amortised cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortised cost of a financial liability.

When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument but does not consider the expected credit losses. Interest income is included in other income in the statement of profit and loss.

f) Foreign currency transactions

Transactions in foreign currency are translated to the functional currency at the exchange rates at the dates of the transaction or an average rate, if the average rate approximates the actual rate at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated to the functional currency using exchange rate prevalent at the each Balance Sheet date.

Non-monetary assets and liabilities that are measured at fair value in a foreign currency are translated in to the functional currency at the exchange rate when the fair value was determined. Non-monetary assets and liabilities that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction. Exchange differences are recognised in statement of profit and loss for the period in which the transaction is settled.

g) Employee benefits

Retirement benefit in the form of provident fund is a defined contribution scheme. The Company has no obligation, other than the contribution payable to the provident fund. The Company recognizes contribution payable to the provident fund scheme as an expense, when an employee renders the related service. If the contribution payable to the scheme for service received before the balance sheet date exceeds the contribution already paid, the deficit payable to the scheme is recognized as a liability. If the contribution already paid exceeds the contribution due for services received before the balance sheet date, then excess is recognized as an asset.

The Company operates a defined benefit gratuity plan which requires contributions to be made to a separately administered fund. The cost of providing benefits under the defined benefit plan is determined on the basis of on actuarial valuation at the year end, using the projected unit credit method.

Long-term compensated absences are provided for based on the actuarial valuation carried out at year-end using the projected unit credit method.

Gains and losses through re-measurements of the net defined benefit liability/ (asset) are recognized in other comprehensive income and are not reclassified to profit or loss in a subsequent period. Further, as required under Ind AS compliant Schedule III, the Company transfers those amounts recognised in other comprehensive income to retained earnings.

Share based payment transactions

The grant date fair value of equity settled share-based payment awards granted to employees is recognised as an employee benefit expense, with a corresponding increase in equity, over the period that the employees unconditionally become entitled to the awards. The amount recognised as expense is based on the estimate of the number of awards for which the related service are expected to be met, such that the amount ultimately recognised as an expense is based on the number of awards that do meet the related service conditions at the vesting date.

h) Leases

Effective 1 April 2019, the Company has applied Ind AS 116, which replaces the existing lease standard, Ind AS 17 Leases and other interpretations. The Company has applied Ind AS 116 using the modified retrospective approach and has accordingly not restated the comparative information. The Company at the inception of a contract, assesses whether a contract, is or contains a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Ind AS 116 introduces a single balance sheet lease accounting model for lessees. A lessee recognises a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. The Company has elected not to recognise right-of-use of assets and lease liabilities for short term leases that have a lease term of 12 months or less and leases of low value assets. The Company recognises the lease payments associated with these leases as an expense on a straight-line basis over the lease term. Lessor accounting remains similar to the accounting under the previous standard i.e. lessor continues to classify leases as finance or operating lease. This policy is applied to contracts entered into, or changed, on or after 1 April 2019. For contracts entered into before 1 April 2019, the determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement.

As a lessee

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct cost incurred and an estimate of cost to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life or the end of the lease term. The estimated useful life of the right-of-use assets are determined on the same basis as those of property, plant and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. The lease payments shall include fixed payments, variable lease payments, residual value guarantees, exercise price of a purchase option where

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

the Company is reasonably certain to exercise that option and payment of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease. Subsequent to initial measurement, the liability will be reduced for payments made and increased for interest. It is remeasured to reflect any reassessment or modification, or if there are changes in in-substance fixed payments. When the lease liability is remeasured, the corresponding adjustment is reflected in the right-of-use asset, or profit and loss if the right-of-use asset is already reduced to zero.

In the comparative period, leases of property, plant and equipment where the Company, as lessee, has substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Leases in which a significant portion of the risks and rewards of ownership are not transferred to the Company as lessee are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit or loss on a straight-line basis over the period of the lease unless the payments are structured to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases.

As a lessor

Lease income from operating leases, where the Company is a lessor, is recognised as income on a straight-line basis over the lease term.

i) Income taxes

Income tax comprises current and deferred tax. It is recognised in statement of profit and loss except to the extent that it relates to a business combination or to an item recognised directly in equity or in other comprehensive income.

i. Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. Minimum Alternative Tax ('MAT') under the provisions of the Income-tax Act, 1961 is recognised as current tax in the statement of profit and loss. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

ii. Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is also recognised in respect of carried forward tax losses and tax credits.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realised simultaneously.

j) Earnings/ (loss) per share

The basic earnings/(loss) per share ('EPS') is computed by dividing the net profit/(loss) after tax for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

The number of shares used in computing diluted earnings per share comprises the weighted average number of shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued on the conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the period unless issued at a later date. In computing dilutive earning per share, only potential equity shares that are dilutive i.e. which reduces earnings per share or increases loss per share are included.

k) Provision and contingent liabilities

General

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Warranty provision

Provisions for warranty-related costs are recognised when the product is sold or service provided to the customer.

Initial recognition is based on historical experience. The initial estimate of warranty-related costs is revised annually.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the IND AS financial statements.

l) Inventories

Inventories are valued at the lower of cost and net realisable value. Cost of inventories comprises purchase price, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. In determining the cost, weighted average cost is used. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs to sell. The comparison of cost and net realizable value is made on an item-by-item basis.

Inventories are stated net of write down or allowances on account of obsolescence, damage or slow moving items.

The method of determination of cost is as follows:

- Raw materials and components – on a weighted average basis
- Stores and spares – on a weighted average basis
- Work-in-progress – raw material costs and costs of conversion
- Finished goods – raw material costs and costs of conversion
- Goods in transit – at purchase cost

The provision for inventory obsolescence is assessed periodically and is provided as considered necessary.

m) Statement of cash flows

Cash flows are reported using the indirect method, whereby net profit/(loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

n) Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the related costs, for which it is intended to compensate, are expensed. When the grant relates to an asset, it is recognised as income in equal amounts over the expected useful life of the related asset.

o) Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value. For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

p) Financial instruments

i. Recognition and initial measurement

Trade receivables and debt securities issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument.

A financial asset or financial liability is initially measured at fair value plus, for an item not at fair value through profit and loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

ii. Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at either at amortised cost, FVTPL or fair value in other comprehensive income (FVOCI).

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI (designated as FVOCI – equity investment). This election is made on an investment by investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets: Business model assessment

The Company makes an assessment of the objective of the business model in which a financial asset is held at investment level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- the stated policies and objectives for each of such investments and the operation of those policies in practice;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets: Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- contingent events that would change the amount or timing of cash flows;
- terms that may adjust the contractual coupon rate, including variable interest rate features;
- prepayment and extension features; and
- terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

Financial assets: Subsequent measurement and gains and losses

Financial assets at FVTPL - These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in statement of profit and loss.

Financial assets at amortised cost - These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in statement of profit and loss. Any gain or loss on derecognition is recognised in statement of profit and loss.

Equity investments at FVOCI - These assets are subsequently measured at fair value. Dividends are recognised as income in statement of profit and loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to statement of profit and loss.

Financial liabilities: Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as FVTPL if it is classified as held for trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in statement of profit and loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in statement of profit and loss. Any gain or loss on derecognition is also recognised in statement of profit and loss.

iii. Derecognition

Financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in statement of profit and loss.

iv. Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

2.4 Recent Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2020.

b. Rights, preference and restrictions attached to:

Equity shares of Rs. 10 each

The Company has a single class of equity shares. Accordingly, all equity shares rank equally with regard to dividends and share in the Company's residual assets. The equity shares are entitled to receive dividend as declared from time to time. The voting rights of an equity shareholder on a poll (not on show of hands) are in proportion to its share of the paid-up equity capital of the Company. Voting rights cannot be exercised in respect of shares on which any call or other sums presently payable have not been paid.

On winding up of the Company, the holders of equity shares will be entitled to receive the residual assets of the Company, remaining after distribution of all preferential amounts in proportion to the number of equity shares held.

Share based payments

Terms attached to stock options granted to employees are described in Note 33 on 'Employee Share Based Payment Plan'.

29. Financial instruments

The carrying value and fair value of financial instruments by categories are as follows:

(Rs. in lakhs)

Particulars	Note	31 March 2020 Carrying Value	31 March 2019 Carrying Value
Financial Assets			
Measured at Amortised Cost			
Loans	8	**310**	289
Trade Receivables	12	**4,497**	2,056
Cash and Cash Equivalents	13	**62**	3
Total Financial Assets		**4,869**	2,348
Financial liabilities			
Measured at amortised cost			
Borrowings	16	**14,201**	2,446
Trade Payables	19	**6,307**	6,192
Other Financial Liabilities	20	**5,853**	3,447
Total Financial Liabilities		**26,361**	12,085

29.01 Fair value hierarchy

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2 – Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

There have been no transfers among Level 1, Level 2 and Level 3 during the year.

The Company has not separately disclosed the fair values for financial assets and liabilities because their carrying amounts are a reasonable approximation of the fair value.

29.02 Risk management framework

The Company's board of directors has overall responsibility for the establishment and oversight of the risk management framework. The Company's management oversees how management monitors compliance with the risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The management is

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

assisted in its oversight role by internal audit. Internal audit undertakes both regular and adhoc reviews of risk management controls and procedures, the results of which are reported to the Board.

29.03 Financial Risk Management Objective And Policies

The Company's principal financial liabilities comprise borrowings, trade payables and other liabilities. The main purpose of these financial liabilities is to finance the Company's operations. The Company's principal financial assets include loans, trade receivables and cash.

The Company is exposed to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk

The note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these financial statements.

29.04 Credit risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations resulting in a financial loss to the Company. Credit risk arises principally from the Company's trade receivables. Credit risk arises from cash held with banks and financial institutions as well as credit exposure to clients, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Company assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

The Company's trade and other receivables are actively monitored to review credit worthiness of the customers to whom credit terms are granted and also avoid significant concentrations of credit risks.

Given below is ageing of gross trade receivable spread by period of six months:

(Rs. in lakhs)

Particulars	31 March 2020	31 March 2019
Outstanding for more than 6 months	**290**	496
Others	**4,539**	1,850
Total:	**4,829**	2,346

The Company continuously monitors receivables from customers and other counterparties, identified either individually or by the Company, and incorporates this information into its credit risk controls.

The Company limits its exposure to credit risk by generally investing in liquid securities and only with counter-parties that have a good credit rating. The Company does not expect any losses from non-performance by these counter-parties, and does not have any significant concentration of exposures to specific industry section.

Credit risk on cash and cash equivalents is limited as the Company generally invests in deposits with banks and financial institutions with high credit ratings assigned by international and domestic credit rating agencies.

Information about major customers

Revenue from single external customer is approximately Rs. 11,116 lakhs (31 March 2019: Rs. 16,425 lakhs) representing 41% (31 March 2019: 66%) of Company's total revenue from operations for the year ended 31 March 2020. Receivables from single external customer is approximately Rs. 3,127 lakhs (31 March 2019: Rs. 1,337 lakhs) representing 70% (31 March 2019: 57%) of Company's total receivables (after allowance for external credit loss) as at 31 March 2020. Apart from the aforesaid single customer, the Company does not have a significant credit risk exposure to any other single counterparty.

29.05 Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The Company has an appropriate liquidity risk management framework for the management of short, medium and long term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate cash reserves, banking facilities and reserve borrowing facilities by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

Typically the Company ensures that it has sufficient cash on demand to meet expected operational expenses for a period of 60 days, including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted, such as natural disasters.

As of 31 March 2020, the Company has a working capital of Rs. 3,331 lakhs (Negative) (31 March 2019: Rs. 650 lakhs), including Book Overdraft of Rs. 32 lakhs (31 March 2019: Rs. Nil) and cash and cash equivalents of Rs. 62 lakhs (31 March 2019: Rs. 3 lakhs).

The table below provides details regarding the contractual maturities of significant financial liabilities as at 31 March 2020 and 31 March 2019.

(Rs. in lakhs)

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

29.06 Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. Market risk is attributable to all market risk sensitive financial instruments including foreign currency receivables and payables and long term debt. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

– **Currency risk**

Foreign Currency Exchange risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in Foreign Currency Exchange rates. The Company's exposure to currency risk relates primarily to the Company's operating activities including anticipated sales, purchases and borrowings where the transactions are denominated in a currency other than the Company's functional currency.

Unhedged Foreign Currency Exposure as on 31 March 2020

Particulars	Receivable		Payable	
	Foreign Currency	Local Currency (Rs. in Lakhs)	Foreign Currency	Local Currency (Rs. in Lakhs)

Total	**(178)**	**178**	(97)	97

– **Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is having non current borrowings in the form of Term Loan from bank. The Company is exposed to interest rate risk associated with its term loan due to floating rates of interest

29.07 Capital Management

The objective of Company's capital management is:

– to ensure the Company's ability to continue as a going concern.

– to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions, requirements of the financial covenants and the risk characteristics of the underlying assets. The Company monitors capital on the basis of the carrying amount of equity including share application, securities premium and profit and loss account as presented on the face of the statement of financial position and on the basis of net debt to equity and maturity profile of overall debt portfolio of the Company.

Net debt and Equity is given in the table below

(Rs. in lakhs)

Particulars	31 March 2020	31 March 2019
Total Shareholders' Equity as reported in Balance Sheet	**26,822**	28,042
Non current borrowings (including current maturities)	**10,876**	1,051
Current borrowings	**3,500**	1,570
Less: Cash and cash equivalents	**(62)**	(3)
Net Debt	**14,314**	2,618
Total Capital Employed	**41,136**	30,660

In order to achieve this overall objective, the Company's capital management, amongst other things, aims to ensure that it meets financial covenants attached to the interest-bearing loans and borrowings that define capital structure requirements. No change were made in the objectives, policies or processes for managing capital during the year ended 31 March 2020.

Basic and Diluted Earnings per Share of Rs.10 each	**(1.72)**	(1.82)

32. Employee benefits

(a) Defined contribution plan

The Company's contribution to Provident Fund aggregating to Rs. 394 lakhs (31 March 2019: Rs. 310 lakhs) has been recognised in the Statement of Profit and Loss under the head Employee Benefits Expense.

(b) Defined benefit plan:

Gratuity

The Company operates one defined benefit plan, viz., gratuity, for its employees. Under the gratuity plan, every employee who has completed at least five years of service gets gratuity on departure at 15 days of last drawn salary for each completed year of service. The scheme is funded with an insurance company in the form of qualifying insurance policy.

Through the defined benefit plan the Company is exposed to the following risks:

Asset volatility

The plan liabilities are calculated using a discount rate set with references to government bond yields; if plan assets under perform compared to the government bonds discount rate, this will create or increase a deficit. The defined benefit plan holds a significant proportion of equity type assets, which are expected to outperform government bonds in the long-term while providing volatility and risk in the short-term.

The Company has chosen a suitable plan with Insurance, which augurs well with the Company's long term strategy to manage the plan efficiently.

Changes in bond yields

A decrease in government bond yields will increase plan liabilities, although this is expected to be partially offset by an increase in the value of the plans' bond holdings.

Life expectancy

Increase in life expectancy will result in an increase in the plan's liabilities, as the inflationary increases result in higher sensitivity to changes in life expectancy.

Note: An entity shall disclose description of any plan amendments, curtailments and settlements.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

	Actuarial Assumptions	
Particulars	**31 March 2020**	31 March 2019
Discount rate(s)	6.78%	7.61%
Expected rate(s) of salary increase	8.00%	9.50%

IV. The Major categories of plan assets		
– Investment with insurer	**100%**	100%

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

The Company's policy is driven by considerations of maximizing returns. The asset allocation for plan assets is determined by the insurance company based on investment criteria prescribed by the local regulators. The Company evaluates the risks, transaction costs and liquidity for potential investments. To measure plan asset performance, the Company compares actual returns for each asset category with published benchmarks.

V. The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

(Rs. in lakhs)

Principal assumption	Year	Changes in assumption	Impact on defined benefit obligation: Increase in assumption	Impact on defined benefit obligation: Decrease in assumption
Discount rate	**2020**	**1.00%**	**(67)**	**78**
	2019	1.00%	(46)	52
Salary growth rate	**2020**	**1.00%**	**69**	**(64)**
	2019	1.00%	46	(43)

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The method and types of assumptions used in preparing the sensitivity analyses did not change compared to the previous period.

VI. Maturity profile of defined benefit obligation:

(Rs. in lakhs)

Particulars	31 March 2020	31 March 2019
Within 1 year	**50**	48
1 - 2 years	**39**	45
2 - 3 years	**35**	45
3 - 4 years	**54**	35
4 - 5 years	**29**	52
5 - 10 years	**157**	143
Above 10 years	**411**	265
Total	**775**	633

VII. Experience adjustments :

(Rs. in lakhs)

	Gratuity 31 March 2020	Gratuity 31 March 2019
1. Defined benefit obligation	**775**	633
2. Fair value of plan assets	**499**	444
3. Deficit	**(276)**	(189)
4. Experience adjustment on Plan Liabilities Loss	**2**	67
5. Experience adjustment on Plan Assets Gain/(Loss)	**24**	(4)

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation. The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The Company expect to contribute Rs. 146 lakhs to gratuity fund in the next financial year.

33. Employee share based payment plan

a) Description of share-based payment arrangements

The Company has the following share-based payment arrangement for employees:

Mahindra Electric Mobility Limited ESOP Scheme ('MEML ESOP - 2017')

The MEML ESOP - 2017 plan was approved by the Board of Directors pursuant to resolution passed at its meeting held on 02 November 2017 read with special resolution passed by the shareholders at the Extraordinary General Meeting held on 10 November 2017. The plan entitles the employees with a right but not an obligation to purchase or subscribe at a future date the shares underlying the option at a pre-determined price, subject to compliance with vesting conditions; all exercised options shall be settled by physical delivery of equity shares or as provided under the MEML ESOP - 2017 plan. As per the plan, holders of vested options are entitled to purchase one equity share of Rs.10 each for every option at an exercise price of Rs. 24.90 each or Rs. 25.17 each as per ESOP offer letter.

The Company has computed the fair value of the options for the purpose of accounting for the employee stock compensation expense over the vesting period of the options.

The terms and conditions related to the grant of the share options are as follows:

(No. of options)

Employees entitled	Vesting conditions	For the year ended 31 March 2020	For the year ended 31 March 2019
Specified employees	One to four years of service from grant date	**9,333,000**	9,168,000
Total share options		**9,333,000**	9,168,000

For continuing employees, the options which vest would have to be exercised within a period of 5 years from the respective dates of vesting of options. No portion of the options vested can be exercised after a period of 5 years from the date of each vesting.

The number and reconciliation of the share options under the share option plan are as follows:

Particulars	As at 31 March 2020	As at 31 March 2019
Outstanding at the beginning	**9,168,000**	8,041,107
Granted during the year	**1,417,940**	1,872,594
Forfeited and expired during the year	**(1,154,850)**	(745,701)
Settled during the year	**(98,090)**	–
Outstanding at the end	**9,333,000**	9,168,000
Exercisable at the end	**1,725,133**	–

c) The fair value per option is measured based on the Black-Scholes option pricing model, which is as below:

Measurement of fair value	Number of options	Range of fair value per option
From 1 April 2019 to 31 March 2020	9,333,000	Rs.10.40 - Rs.16.70
From 1 April 2018 to 31 March 2019	9,168,000	Rs.10.40 - Rs.16.70

The fair value per options mentioned above is calculated on the grant date using the Black-Scholes option pricing model with the following assumptions:

d) Assumptions

	For the year ended 31 March 2020	For the year ended 31 March 2019
Risk free interest rate	**6.0% - 7.99%**	6.6% - 7.99%
Dividend yield	–	–
Expected volatility	**42.3% - 53.1%**	42.3% - 53.1%
Expected life	**5 years**	5 years

e) During the year, the Company recorded a share based payment expense of Rs. 250 lakhs (31 March 2019 : Rs. 476 lakhs) in the Statement of Profit and Loss.

f) The weighted average contractual life of options granted is 7.5 years (31 March 2019: 7.5 years).

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

34. Segment reporting

The Company currently operates in a single reportable segment i.e., design and manufacture of electrically powered vehicles and designing and development of related technology for end use vehicles. Consequently, the requirement for a separate disclosure under Ind AS 108 - "Operating Segments" is not applicable.

35. Contingent Liabilities and Commitments

Contingent Liabilities

(Rs. in lakhs)

	Particulars	31 March 2020	31 March 2019
(a)	Central Excise/Service tax matters under dispute #	**304**	781
(b)	Bank Guarantees	**77**	137

(c) In February 2019, Hon'ble Supreme Court of India in its judgement clarified that certain special allowances should be considered to measure obligations under Employees Provident Fund Act, 1952. The Company had been legally advised that there are interpretative challenges on the application of judgement retrospectively and as such does not consider there is any probable obligations for past periods. Accordingly, based on legal advice the Company had made a provision for provident fund contribution from the date of Supreme Court order.

Commitments

(Rs. in lakhs)

	Particulars	31 March 2020	31 March 2019
(a)	Estimated amount of contracts remaining to be executed on capital account and not provided for	19,823	3,183
(b)	Commitment relating to short term leases (Refer Note 30)	–	–

The Company is contesting the demands and the management believes that its position will likely be upheld in the various appellate authorities/Courts and the ultimate outcome will not have a material adverse effect on the Company's financial position and results of its operations.

36. Unrecognised Deferred Tax Assets/(Liability) (Net)

(Rs. in lakhs)

Particulars	31 March 2020	31 March 2019
Deferred tax liability		
Property, Plant and Equipment	**1,856**	2,258
	1,856	2,258
Deferred Tax Assets

Note:

i) The remuneration to the KMP does not include the provisions made for gratuity and leave benefits, as they are determined on an actuarial basis for the Company as a whole.

ii) The remuneration to KMP includes short-term employee benefit of Rs. 81 lakhs and other long-term benefits of Rs.3 lakhs.

iii) Key managerial service cost charged on the Company by Mahindra & Mahindra Ltd is Rs. 167 lakhs (31 March 2019: Rs. 162 lakhs) (excluding tax).

Tems and conditions

All transactions with related parties are priced at arm's length basis and resulting outstanding balances are to be settled in cash within six months to one year of reporting date. None of the balances are secured.

NOTES TO THE IND AS FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

38. Research and Development Expenditure

(Rs. in lakhs)

Particulars	31 March 2020	31 March 2019
Debited to Statement of Profit or loss, including certain expenditure based on allocations made by the Company (excluding depreciation and amortization)	**674**	1,060
Development expenditure, computer software, patent and trademark expenditure	**9,675**	4,636
Capital expenditure/Non-recurring expenditure	**476**	4,222
Total	**10,825**	9,918
Break-up of Research and Development Expenditure		
Raw Material and Components	**508**	330
Salaries and Wages	**3,924**	2,465
Professional Charges	**5,234**	2,095
Rent	**112**	86
Travel expenses	**4**	6
Computer Software	**327**	310
Others	**240**	406
Capital expenditure	**476**	**4,222**
Total	**10,825**	9,918

39. Disclosures related to micro, small and medium enterprises

Total outstanding dues of micro, small and medium enterprises, which are outstanding for more than the stipulated period and other disclosures as per the Micro, Small and Medium Enterprises Development Act, 2006 (hereinafter referred to as "the MSMED Act") are given below:

(Rs. in lakhs)

		31 March 2020	31 March 2019
(a)	Dues remaining unpaid		
	– Principal	**164**	455
	– Interest on the above	**15**	8
(b)	Interest paid in terms of Section 16 of the MSMED Act along with the amount of payment made to the supplier beyond the appointed day during the year		
	– Principal paid beyond the appointed date	–	–
	– Interest paid in terms of Section 16 of the MSMED Act	–	–
(c)	Amount of interest due and payable for the period of delay on payments made beyond the appointed day during the year	–	–
(d)	Further interest due and payable even in the succeeding years, until such date when the interest due as above are actually paid to the small enterprises	**2**	2
(e)	Amount of interest accrued and remaining unpaid	**24**	9

40. Management's assessment on impairment of Property, plant and equipment and Intangible assets:

The Company tests whether Property, plant and equipment and Intangible assets have suffered any impairment on an annual basis as at 31 March every year. The recoverable amount of a cash generating unit ('CGU') is determined based on Value-In-Use calculations by forcasting the latest cash flows of next ten years and applying a growth rate beyond approved forecast period. The growth rates used in the value-In-use calculation reflect those inherent within the Company's budgets, which is primarily a function of the Company's cycle plan assumptions, past performance, and management expectations of future market developments through to 2030-31.The calculations use pre-tax cash flow projections based on financial budgets approved by the management. An average of the range of each assumption used is mentioned below.

Assumptions	31 March 2020	31 March 2019
Revenue growth for 10 years	**27%**	34%
Operating EBITDA to revenue % (Average)	**12%**	12%
Discount rate	**24%**	20%
Terminal growth rate	**5%**	5%

The above discount rate is based on the Weighted Average Cost of Capital (WACC) which represents the weighted average return attributable to all the assets of the CGU. These estimates are likely to differ from future actual results of the operations and cash flows. Based on the above assessment, there has been no impairment on these assets.

41. Impact of COVID-19

The COVID-19 pandemic is rapidly spreading throughout the world. The event significantly affects the economic activity worldwide and, as a result, could affect the operations and results of the Company. The impact of the COVID-19 pandemic may be different from that estimated as at the date of approval of these financial statements and the Company continues to closely monitor any material changes to future economic conditions.

The Company's plants and offices are under nationwide lockdown since 24 March 2020. The Company is monitoring the situation closely and will resume operations in a phased manner taking into account directives from the Government. Based on the ongoing discussions with vendors and service providers, the Management is confident of obtaining regular supply of raw materials and logistics services after restarting the plant.

Management has performed a comprehensive assessment of the implications of COVID-19 on the financial statements of the Company for the year ended 31 March 2020 including specifically on the going concern assumption, impairment testing for property, plant and equipment, estimate of expected credit losses and revenue recognized during the year, net realizable value of inventory, significant estimates (including the assumptions, data, method & disclosures), and have accordingly concluded that there are no adjustments required in these financial statements. Also refer note 2.2(c).

42. Long-term contracts

The Company does not have any long-term contracts including derivative contracts for which there are any material foreseeable losses.

INDEPENDENT AUDITOR'S REPORT

To the Members of
Mahindra Trucks and Buses Ltd

Report on the Ind AS Financial Statements

Opinion

1. We have audited the accompanying Ind AS financial statements of Mahindra Trucks and Buses Ltd Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2020, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement for the year then ended, and notes to the financial statements, and a summary of significant accounting policies and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements, give the information required by the Act, in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at March 31, 2020, and its profit and cash flows for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India ("the ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

4. The Company's Board of Directors is responsible for the other information. The other information obtained at the date of this auditor's report is included in the Director's report, but does not include the financial statements and our auditor's report thereon.

5. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

6. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated

7. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management for Ind AS Financial Statements

8. The Company's Board of Directors is responsible for the matters in section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act.

9. This responsibility also includes the maintenance of adequate accounting records in accordance with the provision of the Act for safeguarding of the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

10. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

11. Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

12. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

13. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

    a. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

b. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

c. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

d. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

e. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

14. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

15. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on other Legal and Regulatory Requirements

16. As required by the Companies (Auditor's Report) Order,2016, issued by the Central Government of India in term of sub-section (11) of section 143 of the Act (the "Order"), and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in the Annexure A, a statement on the matters specified in the paragraphs 3 and 4 of the Order, to the extent applicable.

17. As required by section 143(3) of the Act, we report that:

a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;

b) In our opinion proper books of account as required by law have been kept by the Company so far as appears from our examination of those books;

c) the Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account;

d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014

e) On the basis of written representations received from the directors as on March 31, 2020, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2020, from being appointed as a director in terms of Section 164(2) of the Act.

f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in Annexure B.

g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:
In our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

h) With respect to the other matters included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended) in our opinion and to the best of our information and according to the explanations given to us:

i. The Company does not have any pending litigations which would impact its financial position.

ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE AUDITOR'S REPORT

Referred to in paragraph 16 of our report of even date on the accounts of Members of Mahindra Trucks and Buses Limited for the year ended March 31, 2020

1) i) The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.

ii) According to the information and explanation given to us, the Company has phased programme for verification of its fixed assets over a period of three years, which in our opinion is reasonable having regard to the size of the Company and nature of assets. During the year, the Company did not verify the fixed assets.

iii) According to the information and explanation given to us, no immovable property is held by the Company in its own name.

2) Inventories were physically verified during the year by the management at reasonable intervals and no material discrepancies were noticed on physical verification. In our opinion, the frequency of verification is reasonable.

3) The Company has not granted any loans, secured or unsecured to companies, firms and other parties covered in the register maintained under section 189 of the Act. Accordingly, the provisions of clause (iii), (iii) (a), (iii) (b) and (iii) (c) of the Order are not applicable to the Company.

4) The Company has not granted any loans or made any investments, or provided any guarantees or security to the parties covered under Section 185 and 186 of the Act. Accordingly, the provisions of clause (iv) of the Order are not applicable to the Company.

5) The Company has not accepted any deposits from the public within the meaning of Sections 73, 74, 75 and 76 of the Act and the Rules framed there under to the extent notified. Therefore, the provisions of Clause 3(v) of the Order are not applicable to the Company.

6) To the best of our knowledge and as explained, the Central Government has not specified the maintenance of cost records under section 148(1) of the Companies Act, 2013, for the products/services of the Company. Hence, the provisions of clause 3(viii) are not applicable and commented upon.

7) i) According to the records of the Company and information and explanations given to us, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Employees' State Insurance Scheme, Income Tax, Sales Tax, Goods and Service Tax, Custom Duty and other statutory dues applicable to it with concerned authorities.

ii) According to the information and explanations given to us, there are no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income tax, Sales Tax, Goods and Service Tax, Customs Duty and other statutory dues applicable that were outstanding, at the year-end for a period of more than six months from the date they became payable.

iii) Particulars of dues of income tax as on 31 March 20 which have not been deposited on account of disputes as under

Name of the statute	Nature of dues	Amount (Rs. in lakhs)	Financial year to which is it pertains	Forum where the disputes is pending
Income Tax Act, 1961	Income tax including interest	146	2014-15	DCIT

8) The Company has not taken any loans or borrowings from financial institution, banks and government or has not issued any debentures. Hence reporting under clause (viii) of the order is not applicable to company.

9) In our opinion and according to the information and explanations given to us, during the year, no term loans were obtained by the Company. During the year, there were no moneys raised by way of initial public offer or further public offer and hence reporting under clause (ix) is not applicable.

10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have neither come across any instance of fraud by the Company or no material fraud on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of such case by the Management.

11) Based on the records examined by us and according to information and explanations given to us, the Company has paid/provided for managerial remuneration in accordance with the requisite approvals mandated by provisions of section 197 read with schedule V of the Act.

12) As the Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it, the provisions of Clause 3(xii) of the Order are not applicable to the Company

13) The Company has entered into transactions with related parties in compliance with the provisions of Sections 177 and 188 of the Act. The details of such related party transactions have been disclosed in the standalone Ind AS financial statements as required under Accounting Standard (AS) 18, Related Party Disclosures specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

14) The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review. Accordingly, the provisions of Clause (xiv) of the Order are not applicable to the Company.

15) The Company has not entered into any non-cash transactions with its directors or persons connected with him. Accordingly, the provisions of clause (xv) of the Order are not applicable to the Company.

16) The Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the provisions of clause (xvi) of the Order are not applicable to the Company.

Mumbai, April 30, 2020

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT OF EVEN DATE ON THE FINANCIAL STATEMENTS OF MAHINDRA TRUCKS AND BUSES LIMITED.

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Mahindra Trucks and Buses Limited ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("the ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness.

Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that

(1) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;

(2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and

(3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the ICAI.

NOTES TO THE STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

NOTE NO. 1. GENERAL INFORMATION

Mahindra Trucks and Buses Limited is in the business of trading in spare parts and accessories. It deals in parts required for the range of commercial vehicles manufactured and sold by its Holding Company, Mahindra & Mahindra Limited. The Company undertakes procurement, warehousing management, logistics and sale of spare parts and accessories. It has a network of dealers spread across India to ensure timely availability of spare parts to commercial vehicle customers.

The Company has elected not to prepare consolidated financial statements, as Mahindra & Mahindra Limited being the Holding Company prepares consolidated financial statements at Group Level. Copies of the annual report of the Mahindra & Mahindra Limited can be obtained from the Company Secretary, Mahindra & Mahindra Limited, Mahindra Towers, Dr. G. M. Bhosale Marg, Worli, Mumbai, 400 018, India.

NOTE NO. 2. SIGNIFICANT ACCOUNTING POLICIES

2.1 Statement of compliance:

The standalone financial statements have been prepared in accordance with Ind ASs notified under the Companies (Indian Accounting Standards) Rules, 2015. Upto the year ended March 31, 2017, the company has prepared its financial statements in accordance with the requirements of previous GAAP, which includes Standards notified under the Companies (Accounting Standards) Rules, 2006. This is the company's first Ind AS financial statements. The date of transition to Ind AS is April 1 2015. Refer point no.-2.13 for the details of first-time adoption exemptions availed by the Company.

2.2 Basis of preparation and presentation:

The standalone financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and / or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

1. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
2. Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
3. Level 3 inputs are unobservable inputs for the asset or liability

2.3 Revenue Recognition:

Revenue is recognised at the fair value of the consideration received or receivable. Sale are recognised, net of returns, trade discounts, VAT / Sales Tax on the transfer of risk and rewards of ownership of the products to the customers, which is generally on dispatch of goods.

Sale of goods

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

a) The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;

b) The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;

c) The amount of revenue can be measured reliably;

d) It is probable that the economic benefits associated with the transaction will flow to the company; and

e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

2.4 Leases:

The Company's significant leasing arrangements are in respect of operating lease for godowns. These leasing arrangements, which are non-cancellable, range between 2-3 years, and are usually renewable by mutual consent on agreed terms. The lease rentals payable are charged on a straight line basis over the lease term.

2.5 Foreign exchange transactions:

Transactions in foreign currencies (other than company's functional currency) are recorded at the exchange rates prevailing on the date of transaction. Monetary items are re-translated at the year-end rates. The exchange difference between the rate prevailing on the date of transaction and on the date of settlement as also on re-translation of Monetary items at the end of the year, is recognised as income or expense, as the case may be.

2.6 Employee Benefits:

2.6.1 Defined contribution plan

The Company's contributions paid/payable during the year to Provident Fund are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made as and when services are rendered by the employees.

2.6.2 Defined benefit plan / leave encashment

The Company's liability towards gratuity and leave encashment is determined using the projected unit credit method which considers each period of service as giving rights to an additional unit of benefit entitlement and measure each unit separately to build up the final obligation. Past services are recognised on straight line basis over the average period until the benefits become vested. Actuarial gains and losses are recognised immediately in the statement of other comprehensive income as income or expense. Obligation is measured at the present value of estimated future cash flow using discounted rate i.e. determined by reference to the market yield at the Balance Sheet date on Government Bonds where the currency and terms of the Government Bonds are consistent with the currency and estimated terms of the defined benefit obligation.

2.6.3 Other benefits

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees is recognised during the period when the employee renders the service.

2.7 Taxes on Income:

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act, 1961 and applicable tax laws. Deferred tax is recognised on temporary differences between the carrying amounts assets and liabilities in the standalone financial statements and the corresponding tax bases used in the computation of taxable profit. Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.8 Property Plant & Equipment:

Property Plant & Equipments are carried at cost less depreciation. Cost comprises the purchase price and other attributable costs.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Depreciation on assets is calculated on Straight Line Method at the rates and in the manner prescribed in Schedule II to the Companies Act, 2013, except in respect of the following categories of assets, in whose case the useful life of the assets has been assessed as under based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc. :

Vehicles	5 years

2.9 Impairment:

The carrying amounts of assets are reviewed at each balance sheet date if there is any indication of impairment based on internal / external factors. Impairment loss is provided to the extent the carrying amount of assets exceeds their recoverable amount. Recoverable amount is the higher of an asset's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the cost of disposal.

2.10 Inventories:

Inventories comprise all costs of purchase and other costs incurred in bringing the inventories to their present location and condition. Stock -in -trade are valued at lower of cost or net realisable value after provision for obsolescence and other losses, where considered necessary. Cost is determined on the basis of weighted average method. Excise duty is included in the value of inventory.

2.11 Product Warranty:

In respect of warranties given by the Company on sale of certain products, the estimated costs of these warranties are accrued at the time of sale on the basis of technical estimate. These estimates are established using historical information on the nature, frequency and average cost of warranty claims. The estimates for accounting of warranties are reviewed and revisions are made as required.

2.12 Financial Instruments:

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial Assets:

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Financial liabilities and equity instruments: Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Investments in equity instruments at FVTOCI

A financial asset is held for trading if:

1. It has been acquired principally for the purpose of selling it in the near term; or
2. on initial recognition it is part of a portfolio of identified financial instruments or a financial guarantee
3. it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee

The Company has equity investments in one entity which are not held for trading. The company has elected the FVTOCI irrevocable option for this investment (see note no 4). Fair value is determined in the manner described in note no 30. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit and loss on disposal of the investment.

Dividends on this investment in equity instruments is recognised in profit or loss when the company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably. Dividends recognised in profit or loss are included in the 'Other Income' line item.

2.13 Critical accounting judgements and key sources of estimation uncertainty:

The preparation of standalone financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these standalone financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected.

Key source of estimation of uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of useful lives of property, plant and equipment, obligations relating to employee defined benefits etc. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialise.

2.14 Cash and cash equivalents (for purposes of Cash Flow Statement):

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.15 Investments:

Investments, which are readily realisable and intended to be held for not more than one year from the date on which such investments are made are classified as current investments. All other investments are classified as non current investments.

2.16 Segment Reporting:

The Company has single reportable business segment namely Automotive vehicles-related spare parts. The Company has only one reportable geographical segment.

NOTE NO. 29. FINANCIAL INSTRUMENTS

Capital management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity less cash & cash equivalent as presented on the face of the statement of financial position.

The company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

CREDIT RISK

(i) Credit risk management

Credit risk arises when a counterparty defaults on its contractual obligations to pay resulting in financial loss to the Company. The Company has adopted a policy of only dealing with creditworthy counterparties, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company's exposure and credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the management as and when required. The Company does not have significant credit risk exposure to any single counterparty.

The loss allowance provision is determined as follows:

As at March 31, 2020 Rupees Lakhs

Particulars	Not due	Less than 6 months past due	More than 6 months past due	Total
Expected loss rate	**0%**	**0%**	**52%**	**3%**
Gross carrying amount	**1,965.02**	**1279.267**	**199.95**	**3,444.24**
Loss allowance provision	–	–	**104.81**	**104.81**

As at March 31, 2019 Rupees Lakhs

Particulars	Not due	Less than 6 months past due	More than 6 months past due	Total
Expected loss rate	0%	0%	35%	2%
Gross carrying amount	2,591.21	1300.834	239.04	4,131.08
Loss allowance provision	–	–	82.55	82.55

Reconciliation of loss allowance provision for Trade Receivables

Rupees Lakhs

Particulars	As at March 31, 2020	As at March 31, 2019
Balance as at beginning of the year	**82.55**	60.65
Impairment losses recognised in the year based on lifetime expected credit losses (Net of Recovery)	**22.26**	21.90
Balance at end of the year	**104.81**	82.55

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay.

Rupees Lakhs

Particulars	Less than 1 Year	1-3 Years	3 Years to 5 Years	5 years and above

Total	**5,002.49**	**41.21**	**181.16**	**5,110.31**

MARKET RISK

Currency Risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's exposure to currency risk relates primarily to the Company's operating activities when transactions are denominated in a different currency from the Company's functional currency.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

Particulars	Currency	As at March 31, 2020	As at March 31, 2019
Trade Receivables	USD	**30,964.42**	23,944.55
	INR (Rupees Lakhs)	**23.32**	16.56
Trade Payables	USD	**93,087.43**	546.38
	INR (Rupees Lakhs)	**70.15**	0.38

Of the above foreign currency exposures, the following exposures are not hedged by a derivative:

Particulars	Currency	As at March 31, 2020	As at March 31, 2019
Trade Receivables	USD	**30,964.42**	23,944.55
	INR (Rupees Lakhs)	**23.32**	16.56
Trade Payables	USD	**93,087.43**	546.38
	INR (Rupees Lakhs)	**70.15**	0.38

Foreign Currency Sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities. The Company's exposure to foreign currency changes for all other currencies is not material.

Rupees Lakhs

For the year ended	Currency	Change in rate	Effect on profit before tax	Effect on pre-tax equity
March 31, 2020	**USD**	**+10%**	**(4.68)**	**(4.68)**
	USD	**(10%)**	**4.68**	**4.68**
March 31, 2019	USD	+10%	1.62	1.62
	USD	(10%)	(1.62)	(1.62)

Notes:

1. The amount outstanding is unsecured and will be settled in cash. No guarantee has been given or received. No expense has been recognised in current or prior years for bad and doubtful debts in respect of the amounts owed by the related party.
2. Related party transactions for the period are at arm's length.

NOTE NO. 32. EMPLOYEE BENEFITS

(a) Defined Contribution Plan

The Company makes Provident Fund contributions to defined contribution plans for qualifying employees. Under the schemes, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The Company recognised Rs.5.34 Lakhs (2018: Rs. 6.34 Lakhs) for Provident Fund contributions in the Statement of Profit and Loss. The contributions payable to these plans by the Company are at rates specified in the rules of the schemes.

(b) Defined Benefit Plans:

Gratuity

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested, it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. The Company makes annual contribution to the group gratuity scheme administered by the Life Insurance Corporation of India through its Gratuity Trust Fund.

Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

1) Liability Risks

a. Asset-Liability Mismatch Risk

Risk which arises if there is a mismatch in the duration of the assets relative to the liabilities. By matching duration with the defined benefit liabilities, the company is successfully able to neutralize valuation wings caused by interest rate movements. Hence, companies are encouraged to adopt asset-liability management.

b. Discount Rate Risk

Variations in the discount rate used to compute the present value of the liabilities may seem small, but in practise can have a significant impact on the defined benefit liabilities.

c. Future Salary Escalation and Inflation Risk

Since price inflation and salary growth are linked economically, they are combined for disclosure purposes. Rising salaries will often result in higher future defined benefit payments resulting in a higher present value of liabilities especially unexpected salary increases provided at management's discretion may lead to uncertainties in estimating this increasing risk.

2) Asset Risks

All plan assets are maintained in a trust fund managed by a public sector insurer viz; LIC of India.LIC has a sovereign guarantee and has been providing consistent and competitive returns over the years.

The company has opted for a traditional fund wherein all assets are invested primarily in risk averse markets. The company has no control over the management of funds but this option provides a high level of safety for the total corpus. A single account is maintained for both the investment and claims settlement and hence 100% liquidity is ensured. Also, interest rate and inflation risk are taken care of.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

	Valuation as at March 31, 2020	Valuation as at March 31, 2019
Discount rate(s)	**6.80%**	7.50%
Expected rate(s) of salary increase	**9.00%**	10.00%

Defined benefit plans – as per actuarial valuation on March 31, 2020

Rupees Lakhs

1. Present value of defined benefit obligation at the beginning of the year	**17.75**	20.62
2. Add/(Less) on account of Scheme of Arrangement/Business Transfer	–	–
3. Expenses Recognised in Statement of Profit and Loss		
– Current Service Cost	**2.44**	3.31
– Past Service Cost	–	–
– Transfer In/(Out)		
– Interest Expense (Income)	**1.33**	1.63
4. Recognised in Other Comprehensive Income		
Remeasurement gains/(losses)	**(0.25)**	(7.81)
5. Benefit payments	–	–
6. Present value of defined benefit obligation at the end of the year	**21.27**	**17.75**
III. Change in fair value of assets during the year ended 31st March		
1. Fair value of plan assets at the beginning of the year	**18.28**	15.89
2. Add/(Less) on account of Scheme of Arrangement/Business Transfer		
3. Expenses Recognised in Statement of Profit and Loss		
– Expected return on plan assets	**1.37**	1.32
4. Recognised in Other Comprehensive Income		
Remeasurement gains/(losses)		
– Actual Return on plan assets in excess of the expected return	**0.06**	(0.51)
5. Contributions by employer (including benefit payments recoverable)	**0.11**	1.58
6. Benefit payments		–
7. Fair value of plan assets at the end of the year	**19.82**	**18.28**
IV. The Major categories of plan assets		
Fund managed by insurer	**100.00%**	100.00%
V. Actuarial assumptions		
1. Discount rate	**6.80%**	7.50%
2. Expected rate of return on plan assets	**7.50%**	7.90%
3. Attrition rate	**7.00%**	7.00%
4. Medical premium inflation	**NA**	NA

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Rupees Lakhs

		March 31, 2020		March 31, 2019	
		Impact on defined benefit obligation		Impact on defined benefit obligation	
Principal assumption	Changes in assumption	Increase in assumption	Decrease in assumption	Increase in assumption	Decrease in assumption
Discount rate	(1.00%)		**23.82**		19.95
	1.00%	**19.11**		15.90	
Salary growth rate	(1.00%)		**19.31**		16.07
	1.00%	**23.52**		19.69	
Withdrawal rate	(1.00%)		**19.32**		18.19
	1.00%	**23.20**		17.37	

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as and when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

The Company expects to contribute Rs. 5 Lacs to the gratuity trusts during the next financial year of 2019.

Mortality : It is assumed that the active members of the scheme will experience in-service mortality in accordance with the Indian Assured Lives Mortality (2006-08) ultimate (IALM ult). A sample pick from this table is given below:

Age	Mortality rate
21	0.000934
22	0.000937
23	0.000936
24	0.000933
25	0.000931

Age of the members at the valuation date is taken as their nearest age at that date.

Maturity profile of defined benefit obligation:

Particulars	March 31, 2020	March 31, 2019
Within 1 year	**1.25**	1.00
1 - 2 year	**1.41**	1.18
2 - 3 year	**1.64**	1.34
3 - 4 year	**1.87**	1.56
4 - 5 year	**2.06**	1.79
5 - 10 years	**17.80**	16.99

Plan Assets

The fair value of Company's pension plan asset as of March 31, 2019 is as follows:

Particulars	March 31, 2020	March 31, 2019
Asset category:		
Cash and cash equivalents	**0%**	0%
Debt instruments (quoted)	**0%**	0%
Debt instruments (unquoted)	**0%**	0%
Equity instruments (quoted)	**0%**	0%
Deposits with Insurance companies	**100%**	100%
Total	**100%**	100%

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation.

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

NOTE NO. 33. SEGMENT REPORTING

The Company has single reportable business segment namely Automotive vehicles-related spare parts. All other activities of the Company revolve around its main business. Hence there are no separate reportable primary segments. The Company deals into trading of Spare parts. The Company has only one reportable geographical segment.

Rupees Lakhs

Geographic information	For the year ended March 31, 2020	For the year ended March 31, 2019
Revenue from external customers		
India	**21,581.62**	18,434.36
Outside India	**495.55**	773.44
Total revenue per statement of profit or loss	**22,077.17**	19,207.80

All the non-current assets of the Company are located in India.

Revenue from major products and services

The following is an analysis of the company's revenue from its major products and services:

Rupees Lakhs

Particulars	For the year ended March 31, 2020	For the year ended March 31, 2019
Sale of spares	**22,077.17**	19,207.80
Total	**22,077.17**	19,207.80

Revenues from transactions with a single external customer does not amounts to 10% or more of a Company's revenues during the year.

Since there is single segment there is no difference in measurement of profit & loss and measurement of assets and liabilities.

NOTE NO. 43 - EMPLOYEE STOCK OPTION

Certain employees of the Company are covered by Employee Stock Option Scheme (ESOP scheme) offered by holding Company, Mahindra & Mahindra Limited. Under the scheme, eligible employees are granted an option to purchase shares of Mahindra & Mahindra Limited, in accordance with the terms and conditions of the scheme.

The Company recognises this scheme as an equity settled share based payments arrangement in accordance with IND AS 102 - Share Based Payment. Options granted under Parent's ESOP scheme vests in 4/5 instalments on expiry of 12 months, 24 months, 36 months, 48 months and 60 months from the date of grant. The options may be exercised subject to condition of minimum number of option vesting, on specified day over a period of 4/5 years from the date of vesting. Such ESOP expense in respect of employees of the Company is charged by the holding Company over the vesting period. The charge is based on fair value of options calculated using Black and Scholes Option Pricing Model. The fair value charge is recognised as share based payment expenses under Employee Benefit Expenses.

NOTE NO. 44. COVID-19 IMPACT ON FINANCIALS

The Company used certain significant accounting estimates which have been disclosed in the financial statements.

These includes valuation of inventory, fair valuation of financial and non-financial assets and liabilities, testing of impairment of assets, going concern assessment etc. requiring significant management judgement in estimating the same. Considering the continuing COVID-19 pandemic, the results in upcoming period may significantly vary and may affect the recoverability of assets and settlement of liabilities.

The Company, based on internal & external sources of information including market research, economic forecast and other information, has assessed that as a result of Covid-19 outbreak, there is no significant financial impact on the financial statements for the year ended March 31, 2020 as at the date of approval of these financial statements.

NOTE NO. 45. Merger of Mahindra Trucks and Buses Limited and Mahindra Automobile Distributor Private Limited into Mahindra Two Wheelers Limited

The Board of Directors of Mahindra Two Wheelers Limited (MTWL) at its Meeting held on 16th January, 2020, subject to requisite approvals/consents, approved the Scheme of Merger by Absorption of Mahindra Trucks and Buses Limited ("MTBL") and Mahindra Automobile Distributor Private Limited ("MADPL") with MTWL and their respective Shareholders ("Scheme") under the provisions of sections 230 to 232 of the Companies Act, 2013. The Appointed Date of the Scheme would be 1st April, 2019 and all the assets and liabilities and entire business of MTBL and MADPL in India or abroad would be vested in MTWL as a going concern. Upon the Scheme being effective and as consideration, MTWL will issue shares to the shareholders of MTBL and MADPL as per the swap ratio determined by the Independent Registered Valuer.

MTWL is in process of filing the Scheme with National Company Law Tribunal for approval.

NOTE NO. 46.

Previous year's figures have been regrouped / reclassified wherever necessary to correspond with the current year's classification / disclosure.

INDEPENDENT AUDITOR'S REPORT

To the Members of **MAHINDRA AUTOMOBILE DISTRIBUTOR PRIVATE LIMITED**

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the Ind AS financial statements of **Mahindra Automobile Distributor Private Limited** ("the Company"), which comprise the balance sheet as at 31st March 2020, and the statement of Profit and Loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the Ind AS financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and its profit, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The company's Board of Directors is responsible for the other information. The other information comprises the Board report.

Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these Ind AS financial statements.

As part of an audit in accordance with Standard on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that are sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has

adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2020 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure-B", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

   (e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.

   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A".

   (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

      i. The company does not have any pending litigations which will impact its financial positions.

      ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

      iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Mahindra Automobile Distributor Private Limited** ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing whether the risk of a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected, Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE B TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the financial statements of **Mahindra Automobile Distributor Private Limited** for the year ended March 31, 2020

Annexure to the Auditor's Report referred to in our report of even date:

1) i) The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.

ii) Fixed assets have been physically verified by the management during the year and no material discrepancies were noted on such verification.

iii) The title deeds of the freehold land are held in the name of the Company.

2) Physical verification of inventory has been conducted at reasonable intervals by the management and not material discrepancies were noticed.

3) The Company has not granted any loans, secured or unsecured to companies, firms and other parties covered in the register maintained under section 189 of the Act. Hence, the provisions of para 3(iii) of the Order are not applicable.

4) According to the information and explanations given to us, the Company has not given any guarantee for loans taken by others from Banks or Financial Institutions during the year.

5) In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits under the provisions of section 73 to 76 of the Act and the Rules framed thereunder.

6) We have been informed that the Central Government has not prescribed maintenance of Cost records under section 148(1) of the Act.

7) i) According to the records of the Company, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Income Tax, Service Tax, Value Added Tax, GST and other statutory dues applicable to it.

ii) There are no disputed dues outstanding as on March 31, 2020 on account of sales tax, customs duty, income tax, service tax, GST and cess.

8) The Company has not defaulted in repayment of loans or borrowing to a financial institution, bank or Government. The Company has not raised any money through debentures.

9) The Company has not raised money by way of initial public offer or further public offer (including debt instruments) and term loans were applied for the purpose for which those are raised.

10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing principles -in India, and according to the information and explanations given to us, we have neither come across any instance of fraud on or by the Company, noticed or reported during the year, nor have we been informed of such case by the management.

11) According to the information and explanations given to us, the Company has not paid any remuneration to managerial personnel as defined in the Act and accordingly the provisions of para 3(xi) of the Order are not applicable to the Company.

12) The Company, not being a Nidhi Company, the para 3(xii) of the Order is not applicable to the Company.

13) According to the information and explanations given to us, all transactions with related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 and the details of the same have been disclosed in the financial statements as required by the applicable accounting standards.

14) The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review. Hence, the provisions of para 3(xiv) of the Order are not applicable to the Company.

15) According to the information and explanations given to us, the Company has not entered into non-cash transactions with directors or persons connected with him. Hence, the provisions of para 3(xv) are not applicable to the Company.

16) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, the provisions of para 3(xvi) of the Order are not applicable to the Company.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

1. Nature of Operations

Mahindra Automobile Distributor Private Limited is in the business of trading in Spare Parts. It deals in spare parts required for four wheelers. The Company undertakes procurement, warehousing management, logistics and sale of imported and local spare parts. It has a network of dealers spread across India to ensure timely availability of spare parts to the customers. The Company also exports spare parts in small quantities. It mainly follows a cash & carry business model.

2. Significant Accounting Policies

2.1 Statement of compliance

The financial statements of the Company have been prepared in accordance with the Indian Accounting Standards (IndAS) notified under the companies (Indian Accounting standards) Rules, 2015, as amended by the Companies (Indian Accounting Standards) Rules, 2016.

The financial statements are presented in Indian Rupees (INR) which is also the Company's functional currency. All values are rounded to the nearest lakh.

2.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below.

2.2.(a) Scheme of Merger by Absorption:

Board of Directors of the Company at its Meeting held on 16th January, 2020, subject to requisite approvals/consents, approved the Scheme of Merger by Absorption of Mahindra Trucks and Buses Limited ("MTBL") and Mahindra Automobile Distributor Private Limited ("MADPL") into Mahindra Two Wheelers Limited ("MTWL") under the provisions of sections 230 to 232 of the Companies Act, 2013. The Appointed Date of the Scheme would be 1st April, 2019

All the assets and liabilities and entire business to absorbed as a going concern.

Upon the Scheme being effective and as consideration, MTWL will issue shares to the shareholders of MTBL and MADPL as per the swap ratio determined by the Independent Registered Valuer

Company has made the required filing with and seeking approval from National Company Law Tribunal, Mumbai Bench ("NCLT") for giving effect to the Scheme. Subject to pendency of the said approval, no adjustments have been made to the financial statements and have prepared on a going concern basis

2.3 Use of estimates

The preparation of financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

2.4 Revenue recognition

Sale of goods and services-

Sale of products and income from services rendered are recognised when the products are shipped or services rendered. Revenues are presented on gross amount and indirect taxes i.e. excise duty is shown under expenditure.

Dividend and interest income

Revenue also includes dividend on financial assets at FVTPL and is recognised immediately on receipt in case of mutual fund. Dividend in case of investment in equity shares are recognized when the right to receive the dividends is established.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.5 Employee benefits

For defined benefit retirement benefit plans, liability towards gratuity is determined using the projected unit credit method which considers each period of service as giving rights to an additional unit of benefit entitlement and measure each unit separately to build up the final obligation. Past services are recognized on straight line basis over the average period until the benefit becomes vested. Actuarial gains and losses are recognized immediately in the statement of profit and loss account as income or expenses. Obligation is measured at the present value of estimated future cash flow using discount rate i.e. determined by reference to market to yield at the balance sheet date on government bonds where the currency and terms of bonds are consistent with the currency and estimated terms of the defined benefit obligation.

Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

2.6 Taxation

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

2.7 Property, plant and equipment

All tangible fixed assets are carried at cost of acquisition less depreciation less accumulated impairment, if any.

When an asset is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit (including capital profit) or loss, if any, is reflected in the Statement of Profit and Loss.

Depreciation on assets is calculated on Straight Line Method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of the following categories of assets, in whose case the life of the assets has been assessed as under based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc.:

General plant and machinery Tool - 8 years

Vehicle – 5 years

2.8 Impairment of assets

At the end of each reporting period, the management reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the management estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.9 Inventories

Inventories comprise of all costs of purchase, conversion and other costs incurred in bringing the inventories to their present location and condition.

Finished goods produced and purchased for sale, manufactured components and work-in-progress are carried at cost or net realizable value, whichever is lower.

2.10 Provisions

Provisions are recognised when the entity has a present obligation (legal or constructive) as a result of a past event, it is probable that the entity will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the entity required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

2.11 Financial Instruments

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2.12 Financial Assets

Financial assets at fair value through other comprehensive income (FVTOCI)

On initial recognition, the Company has made an irrevocable election (on an instrument-by-instrument basis) to present the subsequent changes in fair value in other comprehensive income pertaining to investments in equity instruments. This election is made since the equity investment is not held for trading. These elected investments are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the 'Reserve for equity instruments through other comprehensive income'. The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments.

In March 2017, the Company has invested into equity shares of AK Surya Power Magic Private Limited designated as Fair value though Other Comprehensive Income (FVOCI). However, owing financial uncertainties and business-related issues taken place during the

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2020

period ended 31, December 2018, Company has decided to provide for a diminution against the value of investment along with the change in the classification of investments from FVOCI to FVTPL.

A financial asset is held for trading only if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.

Dividends on these investments in equity instruments are recognised in profit or loss when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably. Dividends recognised in profit or loss are included in the 'Other income' line item.

Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'Other income' line item

Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, trade receivables and other contractual rights to receive cash or other financial asset not designated as at FVTPL

Foreign exchange gains and losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period.

For foreign currency denominated financial assets measured at amortised cost and FVTPL, the exchange differences are recognised in profit or loss

2.13 Financial Liabilities

Financial liabilities at FVTPL

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'Other income' line item.

Financial liabilities subsequently measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

2.14 Derivative financial instruments

The Company enters into derivative financial instruments to manage its exposure to foreign exchange rate risks, including foreign exchange forward contracts.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately.

2.15 Segment Reporting

The Company's business activity falls within a single business segment viz. 'Automotive'. All other activities of the Company revolve around its main business. Hence there is no separate reportable primary segment.

2.16 Cash Flow statement

Cash flows are reported using the indirect method, as setout in Ind AS 7 whereby profit/(loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows are segregated on the basis of Operating, Investing & Financing activities of the company.

2.17 Earnings per share

Basic earnings per share is computed by dividing the profit/(loss) after tax (including the post-tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit/(loss) after tax (including the post-tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

3. Recent Accounting Pronouncements: Standards issued but not yet effective

In March 2019, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) Amendment Rules, 2019, notifying Ind AS 116, Leases and consequential amendments to various Ind AS standards. The amendments are effective from accounting periods beginning from April 1, 2019.

Ind AS 116 Leases

The Company is required to adopt Ind AS 116, Leases from April 1, 2019. Ind AS 116 introduces a single, on-balance sheet lease accounting model for lessees. A lessee recognizes a right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. There are recognition exemptions for short-term leases and leases of low-value items. Lessor accounting remains similar to the current standard – i.e. lessors continue to classify leases as finance or operating leases. It replaces existing leases guidance, Ind AS 17, Leases.

The Company has completed an initial assessment of the potential impact on its financial statements but has not yet completed its detailed assessment. The quantitative impact of adoption of Ind AS 116 on the financial statements in the period of initial application is not reasonably estimable as at present.

4. COVID 19 Impact:

The Company has accounted significant accounting estimates which have been disclosed in the financial statements.

These includes fair valuation of financial assets, testing of impairment of assets, going concern assessment etc. requiring significant management judgement in estimating the same. Considering the continuing COVID-19 pandemic, the results in upcoming period may significantly vary and may affect the recoverability of assets. However, this will depend upon future developments including actions taken to contain or treat the disease and to mitigate its impact on the economy.

The Company, based on internal & external sources of information, has assessed that as a result of Covid-19 outbreak, there is no significant financial impact on the financial statements for the year ended March 31, 2020 as at the date of approval of these financial statements.

Total Employee Benefit Expense	**39.04**	40.62

Certain employees of the Company are covered by Employee Stock Option Scheme (ESOP scheme) offered by Parent Company, Mahindra & Mahindra Limited.

Under the scheme, eligible employees are granted an option to purchase shares of Mahindra & Mahindra Limited, in accordance with the terms and conditions of the scheme.

The Company recognises this scheme as an equity settled share based payments arrangement in accordance with IND AS 102 - Share Based Payment. Options granted under Parent's ESOP scheme vests in 4/5 instalments on expiry of 12 months, 24 months, 36 months, 48 months and 60 months from the date of grant. The options may be exercised subject to condition of minimum number of option vesting, on specified day over a period of 4/5 years from the date of vesting. Such ESOP expense in respect of employees of the Company is charged by the Parent Company over the vesting period. The charge is based on fair value of options calculated using Black and Scholes Option Pricing Model. The fair value charge is recognised as share based payment expenses under Employee Benefit Expenses.

26.1 Defined Contribution Plan

The Company makes Provident Fund contributions to defined contribution plans for qualifying employees. Under the Scheme, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The Company recognised for Year ended 31 March, 2020 Rs. 1.36 Lakhs for Provident Fund contributions in the Statement of Profit and Loss. The contributions payable to this plan by the Company is at rates specified in the rules of the schemes.

26.2 Defined Benefit Plans:

The Company offers the following employee benefit schemes to its employees:

Gratuity:

The Company has a plan towards gratuity, a defined benefit retirement plan covering eligible employees at retirement or death while in employment or on termination of employment for an amount as per policy payable for each completed year of service. Vesting occurs upon completion of five years of service. The Company has only 2 employees on its payroll as of March 31, 2020, hence the company has made valuations at full value rather than obtaining actuarial valuation. Provision for gratuity is made on arithmetical basis of Rs. 6.63 Lakhs (March 2019, Rs. 6.01 Lakhs).

Note 34.2 Financial Risk Management Framework

The Company's activities expose it to avariety of financial risks: market risk, credit risk, liquidity risk. The Company's primary focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The primary market risk to the Company is foreign exchange risk. The Company uses derivative financial instruments to mitigate foreign exchange related risk exposures. The Company's exposure to credit risk is influenced mainly by the individual characteristic of each customer.

(i) CREDIT RISK

Credit Risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company.

The company's exposure to credit risk is limited to the carrying amount of financial assets recognised at the balance sheet date. The Company's exposures are continuously monitored.

In respect of trade and other receivables, the company is not exposed to any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are agencies with high credit-ratings assigned by international credit-rating agencies.

Trade Receivables

The Company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company. Forward-looking information (including macroeconomic information) has been incorporated into the determination of expected credit losses.

The loss allowance for trade receivables using expected credit losses for different ageing periods are as follows:

Particulars	**Less than 6 months past due**	**More than 6 months past due**	**Total**
As at 31 March 2020			
Gross carrying amount	**25.23**	**27.55**	**52.79**

Addition during the year	**11.19**
Additons/Reversal during the year	**–**
Balance at end of the year	**27.55**

(ii) MARKET RISK

Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company uses derivatives to manage market risks, including:

(i) Forward covers to hedge the import payments,

(ii) Fixed Deposits with Bank and

(iii) Mutual funds investment

There have been no significant changes to the Company's exposure to market risk or the methods in which they are managed or measured.

Currency Risk

The Company undertakes transactions denominated in foreign currencies. Consequently, exposures to exchange rate fluctuations arise. The Company's exposure to currency risk relates primarily to the Company's operating activities when transactions are denominated in a different currency from the Company's functional currency.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

Forward Exchange Contracts

It is the policy of the Company to enter into forward foreign exchange contracts to cover specific foreign currency remittances. Company has forex committee which decides on heging the foreign exposure from time to time.

The Company has not designated forward contracts under hedging relationships

(iii) LIQUIDITY RISK

(a) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities by continuously monitoring forecast and actual cash flows and by matching the maturity profiles of financial assets and liabilities.

(b) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay.

(c) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

INDEPENDENT AUDITOR'S REPORT

To the Members of **NBS International Limited**

Report on the Standalone Ind AS Financial Statements

Opinion

We have audited the accompanying standalone Ind AS financial statements of NBS International Limited ("the Company"), which comprise the balance sheet as at 31 March 2020, the statement of profit and loss, Statement of change in equity and statement of cash flow for the year then ended and notes to the financial statements, including summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone Ind AS financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2020, its loss, changes in equity and cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone Ind AS financial statements in accordance with the Standards on Auditing (SAs) specified under section 143 (10) of the Act. Our responsibilities under those Standards are further described in the 'Auditor's Responsibilities for the Audit of the Financial Statements' section of our Report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the Standalone Ind AS financial statements.

Emphasis of Matter

We draw attention to Note 32 of the Ind AS financial statements, which indicate that the Company has accumulated losses of Rs. 4019.98 lakhs and its net worth as at 31 March 2020 has been fully eroded. However, standalone Ind AS financial statement of the Company have been prepared on a going concern basis for the reason stated in said note.

Our opinion is not modified in respect of this matter.

Information Other than the Financial Statements and Auditor's report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the information included in the Board's Report, but does not include the Standalone Ind AS financial statements and our auditor's report thereon.

Our opinion on the Standalone Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Standalone Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information; we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management for the standalone Ind AS Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act, with respect to the preparation of these Standalone Ind AS financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Accounting Standards (Ind AS) specified under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Standalone Ind AS financial statement, that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Standalone Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting

a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the Annexure "A" a statement on the matters specified in paragraphs 3 and 4 of the Order.
2. As required by Section 143(3) of the Act, we report that:
    a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.
    b) In our opinion, proper books of account as required by law have been kept by the Company so far, it appears from our examination of those books.
    c) The balance sheet, the statement of profit and loss, the statement of change in equity and the cash flow statement dealt with by this Report are in agreement with the books of account.
    d) In our opinion, the aforesaid Standalone Ind AS financial statements comply with the Indian Accounting Standards prescribed under Section 133 of the Act, read with Rule (7) of Companies Accounts (Rules), 2014.
    e) The going concern matter describe under the Emphasis of matter paragraph above, in our opinion, may have an adverse effect on the functioning of the Company.
    f) On the basis of written representations received from the directors as on 31 March 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2020, from being appointed as a director in terms of Section 164(2) of the Act.
    g) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate report in "Annexure B".
    h) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of Section 197(16) of the Act, as amended, in our opinion and to the best of our information and according to the explanations given to us, the Company has not paid or provided remuneration to its directors during the year. Accordingly compliance with the provision of Section 197(16) read with schedule V of the Act is not required.
    i) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
        i. The Company has disclosed the impact of pending litigations on its financial position in its Ind AS financial statements - Refer Note 30 to the Ind AS Financial Statements.
        ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
        iii. There were no amounts required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE A TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1 under the heading "Report on Other Legal and Regulatory Requirements" of our report of even date on the standalone Ind AS financial statements of NBS International Limited for the year ended 31 March 2020)

1. (a) The Company has maintained proper records showing full particulars including quantitative details and situation of its Property, Plant and Equipment.

   (b) The Property, Plant and Equipment are physically verified by the management according to a programme of phased verification, which in our opinion as reasonable having regard to size of the Company and nature of its assets. Pursuant to the programme, a portion of Property, Plant and Equipment has been physical verified by the Management during the year and no material discrepancies had been noticed in respects of assets verified during the year.

   (c) According to information and explanations given to us, and on the basis of our examination of the records of the Company, the Company does not have any immovable properties. Accordingly, the provision of clause 3(i) (c) of the Order is not applicable to the Company.

2. According to information and explanations given to us, the inventory has been physically verified by the management at regular intervals during the year and no material discrepancies were noticed on such verification by the management.

3. According to information and explanations given to us, the Company has not granted any loan, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, the provisions of clause 3(iii) of the Order are not applicable to the Company.

4. According to information and explanations given to us, the Company has not granted any loans or made any investment or provided any guarantee or security covered under provisions of section 185 and 186 of the Act. Accordingly, the provisions of clause 3(iv) of the Order is not applicable to the Company.

5. In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits within the meaning of Sections 73 to 76 of the Act and the rules framed thereunder. Accordingly, the provision of clause 3(v) of the Order is not applicable to the Company.

6. According to the information and explanations given to us, the requirement for maintenance of cost records specified by the Central Government under Section 148(1) of the Act is not applicable to the Company during the year.

7. a) According to the information and the explanations given to us, the Company has been regular in depositing undisputed statutory dues including provident fund, employees' state insurance, income tax, goods and services tax, custom duty, cess and other applicable statutory dues with the appropriate authorities. No undisputed amounts payable in respect of aforesaid statutory dues were outstanding as on the last day of the financial year for a period of more than six months from the date they became payable.

   b) According to information and explanations given to us, and record of the Company examined by us, there were no dues on account of Income tax or sales tax service tax, goods and services tax, custom duty, excise duty, value added tax and cess which have not been deposited on account of any dispute except following:

Name of the Statue	Nature of dues	Amount* (Rs. in lakhs)	Period to which the amounts relates	Forum where dispute is pending
Income Tax Act, 1961	Income tax	93.43	AY 2012-2013	Appeal filed against order passed by DCIT

* net of amount paid under protest Rs. 50.00 lakhs

8. According to information and explanations given to us, the Company has not defaulted in repayment of dues to any financial institutions or bank as at the balance sheet date.

9. According to the information and explanations given to us, the Company has not raised moneys by way of public offer (including debt instruments) and term loan during the year and accordingly, para 3 (ix) of the order is not applicable to the Company.

10. Based upon the audit procedures performed for the purpose of reporting the true and fair view of the financial statements and according to the information and explanation given to us, we report that no material fraud by the Company or on the Company by its officers or employees has been noticed or reported during the year.

11. On the basis of examination of relevant records and according to the information and explanations given to us, the Company has not paid or provided any managerial remuneration. Accordingly, the provision of clause 3(xi) of the Order is not applicable to the Company.

12. The Company is not a Nidhi Company and hence reporting under clause 3(xii) of the Order is not applicable to the Company.

13. According to the information and explanations given to us, transactions with related parties are in compliance with Section 177 and 188 of the Act. The details of such related party transactions have been disclosed in the standalone Ind AS financial statements as required by the applicable accounting standards.

14. The Company has not made preferential allotment or private placement of shares or fully or partly convertible debentures during the year. Accordingly, the provision of clause 3(xiv) of the Order is not applicable to the Company.

15. According to the information and explanations given to us, the Company has not entered into any non-cash transactions with directors or persons connected with them during the year. Accordingly, the provisions of clause 3(xv) of the Order are not applicable to the Company.

16. The Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the provision of clause 3(xvi) of the Order is not applicable to the Company.

ANNEXURE 'B' TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2(g) under the heading 'Report on Other Legal and Regulatory Requirements' of our report of even date on the Standalone Ind AS financial statements of NBS International Limited for the year ended 31 March 2020)

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of NBS International Limited ("the Company") as of 31 March 2020 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ("ICAI"). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by ICAI. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company;(2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31 March 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by Institute of Chartered Accountants of India.

Notes to the financial statements for the year ended 31 March 2020

1. **Nature of Operations:**

   NBS International Limited, a wholly owned subsidiary of Mahindra & Mahindra Limited engaged in the business of sales & servicing of motor vehicles..

2. **Significant Accounting Policies:**

   a) **Statement of compliance**

   The financial statements of the Company have been prepared in accordance with the Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended and notified under section 133 of the Companies Act,2013 (the Act) and other relevant provisions of the Act.

   The financial statements are presented in Indian Rupees (INR) which is also the Company's functional currency. All values are rounded to the nearest lakhs.

   b) **Basis of preparation and presentation**

   The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

   Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

   In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

   (i) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

   (ii) Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

   (iii) Level 3 inputs are unobservable inputs for the asset or liability

   c) **Use of estimates and judgements**

   The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented.

   Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

   In the process of applying the Company's accounting policies, management has made the following Judgements, estimates and assumptions which have significant effect on the amounts recognised in the financial statements:

   Provision for doubtful advances and trade receivables:

   The company is not significantly exposed and the amount involved is not material therefore Company does not calculate any credit loss for trade receivables and advances to parties as required under IND AS 109 'Financial Instrument'. However, the company provides for doubtful advances and trade receivables based on its judgement about recoverability of amount.

   Deferred tax assets

   Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Deferred tax assets in respect of carry forward of unused tax losses or unused tax credit have been recognised to the extent of available taxable temporary differences.

   - **Fair value measurement of financial instruments**

     When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using appropriate valuation techniques. The inputs for these valuations are taken from observable sources where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of various inputs including liquidity risk, credit risk, volatility etc. Changes in assumptions/judgements about these factors could affect the reported fair value of financial instruments.

   d) **Change in accounting policies and disclosures**

   i) **New and amended standards and interpretations:**

   On April 1, 2019, the Company adopted Ind AS 116, Leases. Accordingly, the policy for Leases as presented in the Company's Annual Report is amended as under:

   Ind AS 116 – Leases

   The Company evaluates each contract or arrangement, whether it qualifies as lease as defined under Ind AS 116.

   The Company as a lessee

   The Company assesses, whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract involves–

   (a) the use of an identified asset,

   (b) the right to obtain substantially all the economic benefits from use of the identified asset,

   (c) the right to direct the use of the identified asset.

   The Company at the inception of the lease contract recognizes a Right-of-Use (RoU) asset at cost and corresponding lease liability, except for leases with term of less than twelve months (short term) and low-value assets.

   The cost of the right-of-use assets comprises the amount of the initial measurement of the lease liability, any lease payments made at or before the inception date of the lease plus any initial direct costs, less any lease incentives received. Subsequently, the right-of-use assets are measured at cost less any accumulated depreciation and accumulated impairment losses, if any. The right-of-use assets are depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use assets.

   For lease liabilities at inception, the Company measures the lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted using the interest rate implicit in the lease, if that rate is readily determined, if that rate is not readily determined, the lease payments are discounted using the incremental borrowing rate.

   The Company recognizes the amount of the re-measurement of lease liability as an adjustment to the right-of-use assets. Where the carrying amount of the right-of-use assets is reduced to zero and there is a further reduction in the measurement of the lease liability, the Company recognizes any remaining amount of the re-measurement in consolidated statement of income. For short-term and low value leases, the Company recognizes the lease payments as an operating expense on a straight-line basis over the lease term.

   Lease payments have been classified as cash used in financing activities.

The Company as a lessor

Leases for which the Company is a lessor is classified as a finance or operating lease. Contracts in which all the risks and rewards of the lease are substantially transferred to the lessee are classified as a finance lease. All other leases are classified as operating leases.

Leases, for which the Company is an intermediate lessor, it accounts for the head-lease and sub-lease as two separate contracts. The sub-lease is classified as a finance lease or an operating lease by reference to the RoU asset arising from the head-lease.

New Accounting standards, amendments and interpretations adopted by the Company effective from April 1, 2019:

Ind AS 116 - Leases

On April 1, 2019, the Company has adopted Ind AS 116, Leases, applied to all lease contracts outstanding as at April 1, 2019 using modified retrospective method by recognizing a right-of-use asset equal to the amount of the lease liability. Under that method, comparative periods are not restated. The Company has made use of the following practical expedient available on transition to Ind AS 16,

(i) not to reassess whether a contract is or contains a lease, accordingly the definition of lease in accordance with Ind AS 17 will continue to be applied to those leases entered or modified before April 1, 2019.

(ii) The Company has applied a single discount rate to a portfolio of leases of similar assets in similar economic environment, consequently, the Company has recorded the lease liability at the present value of remaining lease payments, discounted using the incremental borrowing rate at the date of initial application and the right to use asset at its carrying amount as if the standard had been applied since the commencement date of the lease but discounted using the incremental borrowing rate at the date of initial application.

(iii) Excluded the initial direct costs from measurement of the RoU asset.

(iv) Not to recognize RoU assets and lease liabilities for leases with less than twelve months of lease term and low-value assets on the date of initial application.

Refer note No. 31 for the effect of adopting Ind AS 116 as at 1 April 2019.

Ind AS 12 'Income Taxes'

The Ministry of Corporate Affairs has notified limited amendments to Ind AS 12 'Income Taxes'. The amendments require an entity to recognise the income tax consequences of dividends as defined in Ind AS 109 when it recognises a liability to pay a dividend. The income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity shall recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events. The adoption of amendment to Ind AS 12 did not have any material impact on financial statements of the Company.

Appendix C to Ind AS 12, Uncertainty over Income Tax Treatments:

On March 30, 2019, Ministry of Corporate Affairs ("MCA") has notified the Companies (Indian Accounting Standards) Amendment Rules, 2019 containing Appendix C to Ind AS 12, Uncertainty over Income Tax Treatments which clarifies the application and measurement requirements in Ind AS 12 when there is uncertainty over income tax treatments. The current and deferred tax asset or liability shall be recognized and measured by applying the requirements in Ind AS 12 based on the taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates determined by applying this appendix. The adoption of amendment to Ind AS 12 did not have any material impact on financial statements of the Company.

Amendment to Ind AS 19 'Employee Benefits':

On March 30, 2019, the Ministry of Corporate Affairs has notified limited amendments to Ind AS 19 'Employee Benefits' in connection with accounting for plan amendments, curtailments and settlements. The amendments require an entity to use updated assumptions to determine current service cost and net interest for the remainder of the period after a plan amendment, curtailment or settlement and to recognise in profit or loss as part of past service cost, or a gain or loss on settlement, any reduction in a surplus, even if that surplus was not previously recognised because of the impact of the asset ceiling. The adoption of amendment to Ind AS 19 did not have any material impact on financial statements of the Company.

e) <u>New accounting standards not yet adopted</u>

Certain new standards, amendments to standards and interpretations are not yet effective for annual periods beginning after April 1, 2019. These amendments are effective for annual reporting periods beginning on or after April 1, 2020, with early application permitted. The adoption of this amendment is not expected to have any impact on the financial statements of the Company.

f) **<u>Revenue from contract with customer</u>**

The Company derives revenues primarily from sale and servicing of motor vehicles.

Ind AS 115 "Revenue from Contracts with Customers" provides a control-based revenue recognition model and provides a five step application approach to be followed for revenue recognition.

- Identify the contract(s) with a customer;
- Identify the performance obligations;
- Determine the transaction price;
- Allocate the transaction price to the performance obligations;
- Recognise revenue when or as an entity satisfies performance obligation.

Revenue from contract with customer is recognised when control of the goods or services are transferred to the customer at an amount that reflect the consideration to which the Company expects to be entitled in exchange of the goods and services. Revenue excludes amount collected on behalf of the third parties. Revenue is net of discounts, duties and sales tax/GST.

The Company applied Ind AS 115 "Revenue from Contracts with Customers" effective 1 April 2018. The adoption of Ind AS 115 did not have any material impact on the revenue recognition by the Company compared to previous year.

(i) <u>Sales of goods:</u>

Sale of spares parts and accessories of vehicles (including customized) is recognised when the title is accepted by the customer.

(ii) <u>Service Income:</u>

Service income is recognized as per the terms of the contract when the related services are rendered.

(iii) <u>Interest income:</u>

Interest income is recognized on time proportion basis.

(iv) <u>Other Income:</u>

Income from financing vehicles, Insurance Income and other service income are accounted on accrual basis.

g) <u>Inventories</u>

Inventories comprise of all costs of purchase, conversion and other costs incurred in bringing the inventories to their present location and condition. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale. Spare parts & accessories are valued at moving average rate.

h) Property, Plant & equipment

Property, Plant & equipment assets are carried at cost of acquisition less depreciation less accumulated impairment, if any.

Cost of intangible assets are being amortised over a period of five years on time proportion basis.

Leasehold Improvements are amortized over the period of lease or estimated period of useful life of such improvement, whichever is lower.

Depreciation is provided on straight-line basis for property, plant and equipment so as to expense the depreciable amount, i.e. the cost less estimated residual value, over its estimated useful life.

When an asset is scrapped or otherwise disposed off the cost and relevant depreciation are removed from the books of accounts and resultant profit or loss, if any, is reflected in statement of profit and loss.

Assets costing less than or equal to Rs. 5,000 are depreciated fully in the year of purchase.

The management's estimate of useful lives are in accordance with Schedule II of the Companies Act,2013,other than the following asset classes, based on the Company's expected usage pattern supported by technical assessment:

Asset Class		Useful lives
(i)	Certain items of plant and Machinery	1 - 15 years
(ii)	Office equipment	1 - 5 years
(iii)	Vehicles	5 years

i) Retirement and Other Employee Benefits

For defined benefit retirement benefit plans, liability towards gratuity is determined using the projected unit credit method which considers each period of service as giving rights to an additional unit of benefit entitlement and measure each unit separately to build up the final obligation. Past services are recognized on straight line basis over the average period until the benefit becomes vested. Actuarial gains and losses are recognized immediately in the statement of profit and loss account as income or expenses. Obligation is measured at the present value of estimated future cash flow using discount rate i.e. determined by reference to market to yield at the balance sheet date on government bonds where the currency and terms of bonds are consistent with the currency and estimated terms of the defined benefit obligation.

Defined benefit costs are categorised as follows:

(i) service cost (including current service cost, past service cost, as well as gains qand losses on curtailments and settlements):

(ii) net interest expense or income; and

(iii) remeasurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

j) Taxation

(i) Current Tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

(ii) Deferred Tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

k) Impairment of assets

At the end of each reporting period, the management reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the management estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

l) Provisions and Contingencies

A provision is recognized when an enterprise has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which a reliable estimate can be made. Provisions are not discounted to their present values and are determined based on management estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current management estimates.

Contingent liabilities are disclosed in respect of possible obligations that have arisen from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of future events not wholly within the control of the Company.

When there is an obligation in respect of which the likelihood of outflow of resources is remote, no provision or disclosure is made.

m) Financial Instruments

i) Financial assets

Initial recognition and measurement

All financial assets are recognised initially at fair value (purchase value plus transaction costs that are attributable to the acquisition of the financial asset). Purchases or sales of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognised on the trade date, i.e., the date that the Company commits to purchase or sell the asset.

Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in four categories:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVTOCI)
- Debt instruments, derivatives and equity instruments at fair value through profit or loss (FVTPL)
- Equity instruments measured at fair value through other comprehensive income FVTOCI

Debt instruments at amortised cost

A 'debt instrument' is measured at the amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, financial assets are subsequently measured at amortised cost using the EIR method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in finance income in the Statement of Profit or Loss. The losses arising from impairment are recognised in the Statement of Profit or Loss.

Debt instrument at FVTPL

FVTPL is a residual category for debt instruments. Any debt instrument, which does not meet the criteria for categorization as at amortized cost or as FVTOCI, is classified as at FVTPL.

Debt instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit and loss.

Equity investments

All equity investments in scope of Ind-AS 109 are measured at fair value. Equity instruments which are held for trading are classified as at FVTPL. For all other equity instruments, the Company decides to classify the same either as at FVTOCI or FVTPL. The Company makes such election on an instrument-by-instrument basis. The classification is made on initial recognition and is irrevocable.

If the Company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognized in the other comprehensive income (OCI). There is no recycling of the amounts from OCI to P&L, even on sale of investment. However, the Company may transfer the cumulative gain or loss within equity.

Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the statement of profit & loss.

Derecognition

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expires or it transfers the financial asset and substantially all the risks and rewards of ownership of the asset.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Company could be required to repay.

Impairment of financial assets

The Company assesses at each reporting date whether there is any objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated.

ii) Non-derivative financial liabilities

Financial liabilities are classified as either "financial liabilities at fair value through profit or loss" or "other financial Liabilities".

(a) Financial liabilities are classified as "financial liabilities at fair value through profit or loss" if they are held for trading or if they are designated as financial liabilities at fair value through profit or loss. These are measured initially at fair value with subsequent changes recognized in profit or loss. Fair value is determined as per IND AS 113 'fair value measurement'.

(b) Other financial liabilities, including loans and borrowing, are initially measured at fair value, net of directly attributable transaction costs. Subsequent to initial recognition, these are measured at amortized cost using the EIR method.

Derecognition of financial liabilities:

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

a) Cash-Flow Statement

Cash flows are reported using the indirect method, as set out in Ind AS 7 whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows are segregated on the basis of Operating, Investing & Financing activities of the company.

b) Earnings per share

Basic earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the profit / (loss) after tax (including the post tax effect of extraordinary items, if any) as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares.

c) Segment

Segment information is prepared in conformity with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole. The Company's business activity primarily falls within a single business segment, i.e. Automative as primarily segment. There is no geographical segment, thus there are no additional disclosures to be provided under Ind AS 108 - "Operating Segments". There have been no other reportable segments identified by chief operating decision makers.

*** Rights, preferences and restrictions attached to equity shares**

The Company has only one class of equity shares having par value of Rs. 10 per share. Each holder of equity share is entitled to one vote per share. The company declares and pays dividend in Indian Rupees. The dividend proposed by Board of Directors is subject to approval of the shareholders in the ensuing annual general meeting. Further, the Board of Directors may also announce an interim dividend which would need to be confirmed by the shareholders at the forthcoming Annual General Meeting. In the event of liquidation, the shareholders are eligible to receive the remaining assets of the Company after distribution of all preferential amounts, in proportion to their shareholdings.

Contribution to Gratuity expense	12.56	12.75
Staff welfare expenses	61.27	75.28
Total Employee Benefit Expense	1,443.74	1,267.76

(a) Defined Contribution Plan

The Company's contribution to Provident Fund aggregating Rs. 86.88 lakhs (2019 : Rs. 71.73 lakhs) has been recognised in the Statement of Profit or Loss under the head Employee Benefits Expense.

(b) Defined Benefit Plans:

Gratuity

The Company operates a defined benefit final salary gratuity plan which is open to new entrants. The gratuity benefits payable to the employees are based on the employee's service and last drawn salary at the time of leaving. The employees do not contribute towards this plan and the full cost of providing these benefits are met by the Company. There are no minimum funding requirements for a gratuity plan in India. The Company has chosen not to fund the gratuity liabilities of the plan but instead carry a provision based on actuarial valuation in its books of accounts. The only regulatory framework which applies to such plans is if the company is covered by the Payment of Gratuity Act, 1972 then the Company is bound to pay the statutory minimum gratuity as prescribed under this Act. There are no minimum funding requirements for a gratuity plan in India. The Company has chosen not to fund the gratuity liabilities of the plan but instead carry a provision based on actuarial valuation in its books of accounts. The only regulatory framework which applies to such plans is if the company is covered by the Payment of Gratuity Act, 1972 then the Company is bound to pay the statutory minimum gratuity as prescribed under this Act. The plan is of a final salary defined benefit in nature which is sponsored by the Company and hence it underwrites all the risks pertaining to the plan. In particular, there is a risk for the Company that any adverse salary growth or demographic experience can result in an increase in cost of providing these benefits to employees in future. Since the benefits are lump sum in nature the plan is not subject to any longevity risks.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

(Currency: Indian Rupees in Lakhs)

	Valuation as at 31 March 2020	Valuation as at 31 March 2019
Discount rate(s)	5.15%	6.65%
Expected rates(s) of Salary increase	8% until year 1 inclusive, then 5%	8% until year 2 inclusive, then 5%

Defined benefit plans – as per actuarial valuation on 31 March, 2020

Weighted average number of equity shares used in the calculation of Diluted EPS	**24,550,484**	24,550,484

Note No. 26 - Financial Instruments

Capital management

The company's capital management objectives are:

– to ensure the company's ability to continue as a going concern

– to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity and borrowings as presented on the face of the statement of financial position.

The company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

	31-Mar-20	31-Mar-19
Equity	**(1,564.93)**	(757.18)
Borrowings	**2,210.70**	2,381.61
	645.77	1,624.43

Note:

The entity bases above capital management disclosures on the information provided internally to key management personnel.

Financial Risk Management

Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

CREDIT RISK

* The company's exposure to credit risk is limited to the carrying amount of financial assets recognised at the balance sheet date.

* The company continuously monitors defaults of customers and the other counterparties, identified either individually or by company and incorporates this information into its credit risk controls.

* The company's management considers that all the financial assets are not impaired for each of the reporting date under review, are of good credit quality, including those that are past due.

* In respect of trade and other receivables, the company is not exposed to any significant credit risk exposure to any single counterparty or any group of counterparties having similar characteristics. Concentration of credit risk to any counterparty did not exceed 10% of gross monetary assets at any time during the year.

* The Company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company and individual receivable specific provision where applicable. Forward-looking information (including macroeconomic information) has been incorporated into the determinationof expected credit losses. Due to immateriality company has decided not to provide for any credit losses.

MARKET RISK

Market risk is the risk that changes in market prices – such as interest rates will affect the entity's income . The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. There has been no significant changes to the entity's exposure to market risk or the methods in which they are managed or measured.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

(Currency: Indian Rupees in Lakhs)

Particulars	Less than 1 Year INR	1-3 Years INR	3 Years to 5 Years INR	5 years and above INR
Non-derivative financial liabilities				
31-Mar-20				
Non-interest bearing	1,391.54	-	-	-
Fixed interest rate instruments	–	–	–	–
Variable interest rate instruments	2,210.70	–	–	–
Financial guarantee contracts		–	–	–
Total	**3,602.24**	–	–	–
31-Mar-19				
Non-interest bearing	2,968.69	–	–	–
Fixed interest rate instruments	–	–	–	–
Variable interest rate instruments	2,381.61	–	–	–
Total	**5,350.30**	–	–	–

(iii) Financing arrangements

The Company had access to following undrawn borrowing facilities at the end of the reporting period:

(Currency: Indian Rupees in Lakhs)

Particulars	**31-Mar-20** INR	31-Mar-19 INR
Unsecured Bank Overdraft facility		
– Expiring within one year	**789.30**	618.39
– Expiring beyond one year	**–**	–
	789.30	618.39

(iv) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

(Currency: Indian Rupees in Lakhs)

Particulars	Less than 1 Year INR	1-3 Years INR	3 Years to 5 Years INR	5 years and above INR
Non-derivative financial assets				
31-Mar-20				
Non-interest bearing	644.36	–	–	–
Total	**644.36**	–	–	–
31-Mar-19				
Non-interest bearing	658.44	–	–	–
Total	**658.44**	–	–	–

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates relates primarily to the Company's long-term debt obligations with floating interest rates.

Interest rate sensitivity

The sensitivity analyses below have been determined based on exposure to interest rate for both derivative and non-derivative instruments at the end of reporting period. For floating rate liabilities, analysis is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole year.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected, after the impact of hedge accounting. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

	Increase/ decrease in basis points	**Effect on profit / (loss) for the year**
31-Mar-20	+100	(20.15)
	-100	20.15
31-Mar-19	+100	(9.54)
	-100	9.54

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment, showing a significantly higher volatility than in prior years.

Note No. 27 - Fair Value Measurement

Financial assets and financial liabilities not measured at fair value i.e measured using amortized cost

(Currency: Indian Rupees in Lakhs)

Particulars	**As at 31 March 2020 Carrying amount**	**Fair value**	As at 31 March 2019 Carrying amount	Fair value

Note No. 31- Leases

Disclosures pursuant to Ind AS 116 "Leases"

1.1 Change in Accounting Policy

Except as specified below, the company has consistently applied the accounting policies to all periods presented in this financial statement. The Company has adopted Ind AS 116 on "leases" with effect from April 1, 2019 by applying it to all contracts of leases existing on April 1, 2019 except for (i) leases relating to low-value assets and (ii) short-term leases (12 months or less) by using modified retrospective approach and accordingly, comparative information for the year ended March 31, 2019 has not been restated. As a result, the company has changed its accounting policy for lease contracts as detailed below:

a) The Company has recognised and measured the Right-of-Use (ROU) asset and the lease liability over the remaining lease period and payments discounted using the incremental borrowing rate as at the date of initial application. This has resulted in recognising ROU asset of Rs.514.72 Lacs and a corresponding lease liability of Rs.393.79 Lacs as at April 1, 2019 and Rs. 120.93 during the subsequent period. In the results for the current period, the nature of expenses in respect of operating leases has changed from lease rent in previous periods to depreciation for the ROU asset and finance costs for interest accrued on lease liability.

b) Company has elected the modified retrospective method for first-time application of Ind AS 116, which involves recognizing a right-of-use asset equal to the amount of the lease liability, under which the effect of initial application on retained earnings at 1st April, 2019 is not material/NIL.

Particulars	Amount
Lease commitments as at 31 March 2019	–
Add/(less): contracts reassessed as lease contracts	–
Add/(less): adjustments on account of extension/termination	–
Lease liabilities as on 1 April 2019	514.72
Current lease liability	283.98
Non current lease liabilities	230.74

The impact of change in accounting policy on account on adoption of Ind AS 116 is as follows:

Particulars	Amount
Decrease in Property Plant and equipment by	–
Increase in lease liability by	514.72

Particulars	Amount
Increase in rights of use by	514.72
Increase/(Decrease) in Deferred tax assets by	2.49
Increase/(Decrease) in finance cost by	27.72
Increase/(Decrease) in depreciation by	265.83

1.2 As a Lessee

Most of the leases contracted by Company relate to industrial Leasehold lands, Corporate and office premises, godowns and item of equipment, as the lessee.

Disclosure Requirement as per Para 53 of the Ind AS -116 : Leases

(A) Additions to right of use assets:

Property, plant and equipment comprises owned and leased assets that do not meet the definition of investment property.

	(Currency: Indian Rupees in Lakhs)				
Particulars	**Leasehold Land**	**Premises**	**Godowns**	**Corporate Office**	**Equipments**
Interest expense on lease liabilities	–	27.72	–	–	–
Variable lease payments not included in the measurement of lease liabilities	–	–	–	–	–
Income from sub-leasing right-of-use assets	–	–	–	–	–
Expenses relating to short-term leases*	–	–	–	–	–
Expenses relating to leases of low-value assets, excluding short-term leases of low value assets*	–	169.00	20.52	–	18.48
Gains or losses arising from sale and leaseback transactions;	–	–	–	–	–

*Excluding the expense relating to leases with a lease term of one month or less.

(D) Amounts recognised in the statement of cash flows :

(Currency: Indian Rupees in Lakhs)

Particulars	Amount
Total cash outflow for leases	283.98

Due to the first-time application of Ind AS 116 effective April 1, 2019, Company used the modified retrospective approach for transition and the historical information has not been restated.

(E) Maturity analysis of lease liabilities :

(Currency: Indian Rupees in Lakhs)

Maturity analysis – contractual undiscounted cash flows	Amount As on 31st March, 2020
Less than one year	109.82
One to five years	137.87
More than five years	64.12
Total undiscounted lease liabilities at 31 March 2020	311.80
Lease liabilities included in the statement of financial position at 31 March 2020	258.46
Current	123.29
Non-Current	135.17

(excluding the property not considered under IND AS 116)

(G) Additional Disclosure :

(1) Initial direct costs have been excluded from the initial measurement of the right-of-use asset.

(2) There was no material change in right-of-use assets between April 1, 2019 and March 31, 2020.

(3) The lease agreements are for a period of one to four years for Leasehold lands, premises, godown and equipments, and for Corporate office. The Company has the option to continue the lease of premises, godown, equipments and corporate office with the condition of increase in rent and for a further period of three to five years.

Note No. 32- Going concern

The Company has been incurring losses and has accumulated losses of Rs. 4019.98 Lakhs as at 31 March 2020 and its net worth has been fully eroded. However, based on future business plans, the management is confident of funding its operating and capital expenditure and continue business operations in the foreseeable future. Accordingly,the financial statements have been prepared on a going concern basis.

Note No. 33- Impact of Covid 19

The operations of the company have been impacted due to the national lockdown imposed by the Government/Authorities in wake of Covid-19 pandemic. The company expects resumption of economic activity in a phased manner and a gradual return to normalcy over the next few months.

The company has evaluated the impact of the Covid-19 related situation and the following observations are in that context.

The Company is engaged in the business of sales and servicing of motor vehicles. The showrooms and workshops have been temporarily closed which has impacted the revenue from operations till the reopening of the business. The company does not foresee any continued adverse impact in the medium to long term to its business operations.

The Company, based on internal & external sources of information, has assessed that as a result of Covid-19 outbreak, there is no significant financial impact on the financial statements for the year ended March 31, 2020 as at the date of approval of these financial statements.

Note No. 34- Others

Previous year figures has been regrouped/reclassified wherever necessary.

INDEPENDENT AUDITOR'S REPORT

To the members of Mahindra Automotive Australia Pty Ltd

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Mahindra Automotive Australia Pty Ltd (the Company), which comprises the statement of financial position as at 31 March 2020, the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the financial report, including a summary of significant accounting policies, and the directors' declaration.

In our opinion the accompanying financial report of Mahindra Automotive Australia Pty Ltd, is in accordance with the *Corporations Act 2001*, including:

(i) Giving a true and fair view of the Company's financial position as at 31 March 2020 and of its financial performance for the year ended on that date; and

(ii) Complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report. We are independent of the Company in accordance with the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of matter - Subsequent event

We draw attention to Note 18 of the financial report, which describes the non-adjusting subsequent event on the impact of the COVID-19 outbreak on the Company. Our opinion is not modified with respect to this matter.

Other information

The directors are responsible for the other information. The other information obtained at the date of this auditor's report is information included in the Directors' report, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the Financial Report

The directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website (http://www.auasb.gov.au/Home.aspx) at:

http://www.auasb.gov.au/auditors_responsibilities/ar4.pdf

This description forms part of our auditor's report.

BDO Audit Pty Ltd

Randall Bryson

Director

Brisbane, 13th day of May 2020

DIRECTORS' DECLARATION FOR THE YEAR ENDED 31 MARCH 2020

In accordance with a resolution of the directors of Mahindra Automotive Australia Pty Ltd, the directors of the company declare that:

1 The financial statements and accompanying notes are in accordance with the *Corporations Act 2001* and:

   (a) comply with Australian Accounting Standards – Reduced Disclosure Requirements; and

   (b) give a true and fair view of the entity's financial position as at 31 March 2020 and of its performance for the year ended on that date.

2 In the directors' opinion, there are reasonable grounds to believe that Mahindra Automotive Australia Pty Ltd will be able to pay its debts as and when they become due and payable.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated. The financial statements are for Mahindra Automotive Australia Pty Ltd (referred hereafter as the 'Entity' or 'Company').

Basis of preparation

The financial statements are general purpose financial statements that have been prepared in accordance with Australian Accounting Standards - Reduced Disclosure Requirements of the Australian Accounting Standards Board (AASB) and the Corporations Act 2001. The company is a for profit entity for financial reporting purposes under Australian Accounting Standards.

Australian Accounting Standards set out accounting policies that the AASB has concluded would result in financial statements containing relevant and reliable information about transactions, events and conditions. Material accounting policies adopted in the preparation of the financial statements are presented below and have been consistently applied unless stated otherwise.

The financial statements, except for the cash flow information, have been prepared on an accruals basis and are based on historical costs, modified, where applicable, by the measurement at fair value of selected non-current assets, financial assets and financial liabilities. The amounts presented in the financial statements have been rounded to the nearest dollar.

Accounting Policies

(a) Income Tax

The income tax expense (income) for the year comprises current income tax expense (income) and deferred tax expense (income).

Current income tax expense charged to profit or loss is the tax payable on taxable income for the current period. Current tax liabilities (assets) are measured at the amounts expected to be paid to (recovered from) the relevant taxation authority using tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred income tax expense reflects movements in deferred tax asset and deferred tax liability balances during the year as well as unused tax losses.

Current and deferred income tax expense (income) is charged or credited outside profit or loss when the tax relates to items that are recognised outside profit or loss or arising from a business combination.

Except for business combinations, no deferred income tax is recognised from the initial recognition of an asset or liability where there is no effect on accounting or taxable profit or loss.

Deferred tax assets and liabilities are calculated at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled and their measurement also reflects the manner in which management expects to recover or settle the carrying amount of the related asset or liability. With respect to non-depreciable items of property, plant and equipment measured at fair value and items of investment property measured at fair value, the related deferred tax liability or deferred tax asset is measured on the basis that the carrying amount of the asset will be recovered entirely through sale. When an investment property that is depreciable is held by the entity in a business model whose objective is to consume substantially all of the economic benefits embodied in the property through use over time (rather than through sale), the related deferred tax liability or deferred tax asset is measured on the basis that the carrying amount of such property will be recovered entirely through use.

Deferred tax assets relating to temporary differences and unused tax losses are recognised only to the extent that it is probable that future taxable profit will be available against which the benefits of the deferred tax asset can be utilised.

Where temporary differences exist in relation to investments in subsidiaries, branches, associates, and joint ventures, deferred tax assets and liabilities are not recognised where the timing of the reversal of the temporary difference can be controlled and it is not probable that the reversal will occur in the foreseeable future.

Current tax assets and liabilities are offset where a legally enforceable right of set-off exists and it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur. Deferred tax assets and liabilities are offset where: (i) a legally enforceable right of set-off exists; and (ii) the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities, where it is intended that net settlement or simultaneous realisation and settlement of the respective asset and liability will occur in future periods in which significant amounts of deferred tax assets or liabilities are expected to be recovered or settled.

(b) Inventory

Inventory has been valued as follows:

Finished goods are valued at the lower of cost and net realisable value.

Raw materials are valued at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(c) Property, Plant and Equipment

Each class of property, plant and equipment is carried at cost or fair value as indicated less, where applicable, any accumulated depreciation and impairment losses.

Plant and Equipment

Plant and equipment are measured on the cost basis and are therefore carried at cost less accumulated depreciation and any accumulated impairment losses. In the event the carrying amount of plant and equipment is greater than its estimated recoverable amount, the carrying amount is written down immediately to its estimated recoverable amount and impairment losses recognised either in profit or loss or as a revaluation decrease if the impairment losses relate to a revalued asset. A formal assessment of recoverable amount is made when impairment indicators are present (refer to Note 1(g) for details of impairment).

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance are recognised as expenses in profit or loss in the financial period in which they are incurred.

Depreciation

The depreciable amount of all fixed assets including capitalised lease assets is depreciated on a diminishing value basis over the asset's useful life to the entity commencing from the time the asset is held ready for use. Leasehold improvements are depreciated over the shorter of either the unexpired period of the lease or the estimated useful lives of the improvements.

The depreciation rates used for each class of depreciable assets are:

Plant and equipment	10% – 20%	(DV)
Furniture and fixtures	10% – 20%	(DV)
Motor vehicles	20% – 30%	(DV)
Computer equipment	20% – 40%	(DV)

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with the carrying amount. These gains or losses are recognised in profit or loss when the item is derecognised. When revalued assets are sold, amounts included in the revaluation surplus relating to that asset are transferred to retained earnings.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

(d) Leases

The Company has changed its accounting policy for leases. The impact of the change is described in Note 1 (p).

Until 31 March 2019, leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

From 1 April 2019, leases are recognised as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Company.

Assets and liabilities arising from a lease are initially measured on a present value basis.

Lease Liabilities

Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date;
- amounts expected to be payable by the Company under residual value guarantees;
- the exercise price of a purchase option if the Company is reasonably certain to exercise that option; and
- payments of penalties for terminating the lease, if the lease term reflects the Company exercising that option.

Lease payments to be made under reasonably certain extension options are also included in the measurement of the liability. The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be readily determined, which is generally the case for leases that relate to building premises, the entity's incremental borrowing rate is used, being the rate that the individual lessee would have to pay to borrow the funds necessary to obtain an asset of similar value to the right-of-use asset in a similar economic environment with similar terms, security and conditions.

To determine the incremental borrowing rate, the Company uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received, making adjustments specific to the lease (e.g. term, country, currency and security).

The Company is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Lease payments are allocated between principal and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use Assets

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Company is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Extension Options

Extension options are included in a number of building premises leases across the dealership. These are used to maximise operational flexibility in terms of managing the assets used in the Company's operations. The extension and termination options held are exercisable only by the Company and not by the respective lessor.

When exercising lease extensions of building premises, the Company considers the following factors:

- any termination and make-good penalties;
- value of leasehold improvements;
- cost of disruption to the business to relocate, and
- availability and cost other suitable properties.

Extension options are only included in the lease term if the lease is reasonably certain to be extended.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Company becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.

(e) Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities on the statement of financial position.

(f) Financial liabilities

Financial liabilities are initially recognised at fair value net of transaction costs incurred. Financial liabilities are subsequently measured at amortised cost. Any difference between the process (net of transaction costs) and the redemption amount is recognised in profit or loss over the period of financial liabilities using the effective interest rate method.

Financial liabilities are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the balance date.

(g) Impairment of Non-current assets

Assets that have an indefinite useful life, including Goodwill is tested annually for impairment.

At each reporting date, the Company reviews the carrying amount of all other non-financial assets to determine whether there is any indication of impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates independent cash inflows (known as cash-generating units or CGUs). Goodwill arising from a business combination is allocated to CGUs that are expected to benefit from the synergies of the transaction.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised in profit or loss if the carrying amount of an asset or CGU exceeds its recoverable amount.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

(h) Foreign Currency Transactions and Balances

Functional and presentation currency

The functional currency of the entity is measured using the currency of the primary economic environment in which that entity operates. The financial statements are presented in Australian dollars which is the entity's functional and presentation currency.

Transactions and balances

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the year-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Exchange differences arising on the translation of monetary items are recognised in profit or loss, except where deferred in equity as a qualifying cash flow or net investment hedge.

Exchange differences arising on the translation of non-monetary items are recognised directly in other comprehensive income to the extent that the underlying gain or loss is directly recognised in other comprehensive income, otherwise the exchange difference is recognised in profit or loss.

Exchange differences arising on translation of foreign operations are transferred directly to the entities foreign currency translation reserve in the statement of financial position via other comprehensive income. The cumulative amount of these differences is reclassified into profit or loss in the period in which the operation is disposed of.

(i) Employee Benefits

Short-term employee benefit obligations

Provision is made for the entities obligation for short-term employee benefits. Short-term employee benefits are benefits (other than termination benefits) that are expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service, including wages and salaries. Short-term employee benefits are measured at the (undiscounted) amounts expected to be paid when the obligation is settled.

The entity's obligations for short-term employee benefits such as wages and salaries are recognised as part of current trade and other payables in the statement of financial position.

Other long-term employee benefit obligations

Provision is made for employees' long service leave and annual leave entitlements not expected to be settled wholly within 12 months after the end of the annual reporting period in which the employees render the related service.

The entities obligations for long-term employee benefits are presented as non-current provisions in its statement of financial position, except where the entity does not have an unconditional right to defer settlement for at least 12 months after the end of the reporting period, in which case the obligations are presented as current provisions.

(j) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate taking into account the risks and uncertainties surrounding the obligation.

(k) Revenue and Other Income

Sales of goods revenue

Revenue from the sale of goods is recognised when the performance obligation has been satisfied and control is transferred to the customer. The performance obligation is considered to be satisfied at a point in time and control is transferred when the goods are invoiced and physically dispatched or collected.

Interest revenue

Interest revenue is recognised on a time proportional basis, taking into account the effective interest rates applicable to the financial assets.

Property, plant and equipment sales revenue

Income from the sale of property, plant and equipment is recognised when the performance obligation is satisfied, at the transfer of ownership.

Other revenue is recognised in accordance with AASB 15, when performance obligation is satisfied and control is transferred.

All revenue is stated net of the amount of goods and services tax.

(l) Trade and other receivables

Trade receivables are recognised initially at the transaction price, less the expected lifetime credit losses to be recognised from initial recognition of the receivables.

The Group applies the simplified approach permitted by AASB 9, which requires expected lifetime credit losses to be recognised from initial recognition of the receivables. The expected credit losses on these financial assets are estimated using a provision matrix based on the Company historical credit loss experience, as well as the credit losses that are expected in the foreseeable future.

(m) Trade and other payables

These amounts represent liabilities for goods and services provided to the Company prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition.

(n) Goods and Services Tax (GST)

Revenues, expenses and assets are recognised net of the amount of GST, except where the amount of GST incurred is not recoverable from the Australian Taxation Office (ATO).

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the ATO is included with other receivables or payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities, which are recoverable from or payable to the ATO, are presented as operating cash flows included in receipts from customers or payments to suppliers.

(o) Comparative figures

When required by Accounting Standards, comparative figures have been adjusted to conform to changes in presentation for the current financial year.

(p) New or Revised Standards and Interpretations that are first effective in the current reporting period

A number of new or amended standards became applicable for the current reporting period and the Company had to change its accounting policies as a result of adopting the following standard:

- AASB 16 Leases
- Interpretation 23 Uncertainty over Income Tax Treatment

The impact of the adoption of these standards and the new accounting policies are disclosed below. The other standards did not have any impact on the Group's accounting policies and did not require retrospective adjustments.

AASB 16 Leases

This standard and its consequential amendments were applied from 1 April 2019, replacing the accounting requirements applicable to leases in

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

AASB 117 Leases and related interpretations. AASB 16 introduces a single lessee accounting model that eliminates the requirement for leases to be classified as operating or finance leases.

This means that for most leases, a right-of-use asset and a lease liability will be recognised, with the right-of-use asset being depreciated and the lease liability being unwound in principal and interest components over the life of the lease.

The Company transitioned to AASB 16 using the modified retrospective approach, where the right-of-use asset is recognised at the date of initial application at an amount equal to the lease liability adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the Balance Sheet immediately before the date of initial application, using the entity's incremental borrowing rate at the date of initial application. Comparative figures are not restated.

For leases previously classified as finance leases, the Company recognised the carrying amount of the right-of-use asset and the lease liability at the date of initial application. The measurement principles of AASB 16 are only applied after that date. There was no re-measurement adjustments for these leases immediately after the date of initial application.

Initial measurement of lease liabilities:

Operating lease commitments disclosed as at 31 March 2019	$1,854,785
Discounted using the entity's incremental borrowing rate	$1,704,735
Less: short term leases not recognised as a liability	–
Add: finance lease liabilities recognised as at 31 March 2019	–
Lease liability recognised as at 1 April 2019	**$1,704,735**

Initial measurement of right-of-use assets:

The associated right-of-use assets for property leases were measured at the amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the balance sheet as at 1 April 2019.

Adjustments recognised in the balance sheet on 1 April 2019:

Right-of-use assets increased by	$1,704,735
Lease liabilities increased by	$1,704,735

There was no impact on retained earnings upon adoption of AASB 16.

In applying AASB 16 for the first time, the group has used the following practical expedients permitted by the standard:

- The use of a single discount rate to a portfolio of leases with reasonably similar characteristics;
- The use of hindsight in determining the lease term where the contract contains options to extend of terminate the lease;
- The accounting for operating leases with a remaining lease term of less than 12 months as at 1 April 2019 as short-term leases; and
- The exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application.

Interpretation 23 Uncertainty over Income Tax Treatment

The Interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of AASB 112 Income Taxes. It does not apply to taxes or levies outside the scope of AASB 112, nor does it specially include requirements relating to interest and penalties associated with uncertain tax treatments. The Interpretation specifically addresses the following:

- Whether an entity considers uncertain tax treatments separately;
- The assumptions an entity makes about the examination of tax treatments by taxation authorities;
- How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates;
- How an entity considers changes in facts and circumstances.

Upon adoption of the Interpretation, the Company considered whether it has any uncertain tax positions and concludes that it is probable that its tax treatments will be accepted by the appropriate tax authorities. The Interpretation did not have an impact on the financial statements of the Company.

There are no other standards that are not yet effective and that would be expected to have a material impact on the entity in the current or future reporting periods and on foreseeable future transactions.

(q) Going Concern

The financial report has been prepared on a going concern basis. This acknowledges the parent company will continue to provide support by extending working capital for a period of at least 12 months from the date of signing this financial report.

(r) Critical Accounting Estimates and Judgements

The management evaluate estimates and judgements incorporated into the financial statements based on historical knowledge and best available current information. Estimates assume a reasonable expectation of future events and are based on current trends and economic data, obtained both externally and within the Company.

Allowances for expected credit losses

The allowance for expected credit losses assessment requires a degree of estimation and judgement. It is based on the lifetime expected credit loss, grouped based on days overdue, and makes assumptions to allocate an overall expected credit loss rate for each group. These assumptions include recent sales experience and historical collection rates.

Carrying Amount of Inventories

In determining the amount of write-downs of inventories, management has made judgements based on the expected net realisable value. This requires certain judgements and assumptions to be made, including but not limited to historical loss experience, inventory aging and current knowledge of the goods.

Income Tax

The Company is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognises liabilities for anticipated tax audit issues based on the Group's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

Impairment

The Company assesses impairment at the end of each reporting period by evaluating the conditions and events specific to the Company that may be indicative of impairment triggers. Recoverable amounts of relevant assets are reassessed using value-in-use calculations which incorporate various key assumptions.

No impairment to be recognised at reporting date.

Employee benefits

For the purpose of measurement, AASB 119: Employee Benefits defines obligations for short-term employee benefits as obligations expected to be settled wholly before 12 months after the end of the annual reporting period in which the employees render the related service. As the Group expects that most employees will not use all of their annual leave entitlements in the same year in which they are earned or during the following 12-month period, obligations for annual leave entitlements are classified under AASB 119 as other long-term employee benefits.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Lease term

The Company included the renewal period as part of the lease term for leases of building premises, plant and equipment with shorter non-cancellable periods (i.e., three to five years per option).

Incremental borrowing rate

Where the interest rate implicit in a lease cannot be readily determined, an incremental borrowing rate (IBR) is estimated to discount future lease payments to measure the present value of the lease liability at the lease commencement date. Such a rate is based on what the Group estimates it would have to pay a third party to borrow the funds necessary to obtain an asset of a similar value to the right-of-use asset, with similar terms, security and economic environment.

The Company estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as credit rating).

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

11. LEASES

The Company leases various building premises. Rental contracts are typically made for fixed periods of 1 to 5 years but may have extension options. Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor.

In the previous year, the Group only recognised lease assets and lease liabilities in relation to leases that were classified as 'finance leases' under AASB 117 Leases. The assets were presented in the liabilities as part of the Group's borrowings. For adjustments recognised on adoption of AASB 16 on 1 April 2019, refer to Note 1 (p).

16. RELATED PARTY TRANSACTIONS

The group's main related parties are as follows:

i) Entities exercising control over the company

The ultimate parent entity is Mahindra & Mahindra Limited, a publically listed company based in Mumbai, India.

ii) Key management personnel

Any person(s) having authority and responsibility for planning, directing and controlling the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity, is considered key management personnel.

Information of remuneration of directors and key management personnel is disclosed in Note 5.

iii) Transactions with Related Parties

Transactions with related parties are on normal commercial terms and conditions no more favourable than available to other parties unless otherwise stated.

The following transactions occurred with related parties

Purchase and sale of goods and services

Mahindra & Mahindra Limited and its subsidiaries

Mahindra Automotive Australia Pty Ltd made total purchases of inventory from Mahindra & Mahindra Limited and its subsidiaries during the year of $6,167,657 (2019: $7,488,632). Sales made by the Company to Mahindra & Mahindra Limited and its subsidiaries during the year of $107,640.

The Hayden Way (Aust) Pty Limited

On 7 October 2017, Mahindra Automotive Australia Pty Ltd entered into a sponsorship and promotion agreement with The Hayden Way (Aust) Pty Limited (a company associated with M Hayden). The total licence and services fees paid to The Hayden Way (Aust) Pty Limited were $19,172 (2019: $67,250).

Trade and other payables

Mahindra and Mahindra Limited and its subsidiaries have provided inventory to Mahindra Automotive Australia Pty Ltd under vendor finance arrangements. The outstanding amount at year-end was $5,437,805 (2019: $6,085,781). These amounts are interest free, unsecured and at call.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

Trade and other receivables

Receivables to Company from Mahindra & Mahindra Limited and its subsidiaries at year-end was $263,879 (2019: Nil). These amounts are interest free, unsecured and at call.

17. NOTES TO STATEMENTS OF CASH FLOWS

(i) For the purposes of the Statements of Cash Flows, cash includes cash on hand and in banks and investments in money market instruments, net of outstanding bank overdrafts. Cash at the end of the year as shown in the statement of cash flows is reconciled to the related items in the balance sheet as follows:

	2020 $	2019 $
Cash	**766,118**	221,856
Overdraft	**–**	–
	766,118	221,856

Movement in GST clearing	**(24,640)**	(24,922)
Movement in provisions	**(113,338)**	(9,190)
Net cash inflow from operating activities	**824,953**	(2,199,346)

18. EVENTS AFTER THE REPORTING PERIOD

Subsequent to the end of the financial year, Australia has been impacted by the worldwide COVID-19 pandemic. The World Health Organisation (WHO) announced a global health emergency on 31 January 2020 and it was subsequently classified as a pandemic on 11 March 2020.

The Commonwealth and State Governments have implemented a range of measures to help control the spread of the Virus. Management and Governance teams are reviewing operations and strategies and assessing the impact on the financial position and cash flows. Although the Company is unable to determine the full impact of COVID-19 at this time, it has reviewed its operations and based on this analysis, the group is confident it can continue to operate as a going concern and can meet its debts as and when they fall due.

INDEPENDENT AUDITORS' REPORT

Based on a report originally issued in Korean

To the Shareholders and Board of Directors of Ssangyong Motor Company

Opinion

We have audited the accompanying separate financial statements of Ssangyong Motor Company ("the Company"), which comprise the separate statements of financial position as of December 31, 2019 and 2018, the separate statements of comprehensive loss, changes in equity and cash flows for the years then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying separate financial statements present fairly, in all material respects, the separate financial position of the Company as of December 31, 2019 and 2018, and its separate financial performance and its separate cash flows for the years then ended in accordance with Korean International Financial Reporting Standards ("K-IFRS").

We also have audited, in accordance with Korean Standards on Auditing (KSAs), the Company's Internal Control over Financial Reporting ("ICFR") as of December 31, 2019 based on the criteria established in Conceptual Framework for Designing and Operating Internal Control over Financial Reporting issued by the Operating Committee of Internal Control over Financial Reporting in the Republic of Korea, and our report dated March 16, 2020, expressed "an unmodified opinion on the effectiveness of the company's internal control over financial reporting".

Basis for Opinion

We conducted our audits in accordance with KSAs. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Separate Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the separate financial statements in Republic of Korea, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty on the ability to continue as a going concern

The accompanying separate financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in note 35 to the separate financial statements, the Company has incurred a net loss of ₩ 341,052 million during the year ended December 31, 2019 and, as of that date, the Company's current liabilities exceeded its current assets by ₩ 476,896 million. As stated in Note 35, these events or conditions, along with other matters as set forth in Note 35, indicate that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our opinion is not affected by this uncertainty.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the separate financial statements as of and for the year ended December 31, 2019. These matters were addressed in the context of our audit of the separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We concluded that below matters are key audit matters which to be communicated in that report in addition to above matter, material uncertainty on the ability continue as a going concern.

Revenue recognition

As described in note 3.(3), the Company generates revenue by selling finished vehicles and then selling parts and providing maintenance activities. For sales of finished vehicles and sales of parts, revenue is recognized when control is transferred to the customer. Revenue from maintenance activities is recognized at the time when rendering maintenance service to customers is completed to the customer.

We identified revenue recognition as a key audit matter, because there is a significant inherent risk that sales may be recognized before the revenue recognition conditions are met and that there is a risk that the revenue is overstated due to external pressure on financial performance as the revenue is one of the key performance indicators for the Company's executive directors.

The primary procedures we performed to address the key audit matter included:

- We evaluated the design and operation of the Company's internal accounting control system related to recognition of revenue.
- We selected sales transactions recorded immediately before and after end of the reporting date and vouched to the supporting documents to assess whether revenue is recognized in an appropriate accounting period.
- We assessed whether the attribution of the sales period is appropriate through document inspection of the samples extracted from the sales cancellation and return details after the reporting period.

Impairment of tangible and intangible assets

As described in note 3.(12), the Company reviews for indication of asset impairment at the end of reporting date, and estimates the recoverable amount of the asset to determine the amount of the impairment loss if there is any indication of asset impairment. When the recoverable amount of an individual asset cannot be estimated, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Impairment indicator existed as the PBR, stock price divided by net asset value per share, is less than 1 and the Company has incurred continuous operating losses. Considering the significant degree of the judgment in estimating the value in use of the Company used in the impairment testing for tangible and intangible assets which requires significant auditor attention, we identified the impairment of tangible and intangible assets as a key audit matter.

The primary procedures we performed to address the key audit matter included:

- We evaluated the design and operation of the Company's internal accounting control system related to impairment of tangible and intangible assets.
- We evaluated the qualifications of external experts used by the management of the company.
- We assessed whether the input data for estimation of the projected future cash flows have been appropriately approved and compared the key financial information used in the discounted cash flow projections with the approved financial information.
- We used internal valuation specialist to review the reasonableness of key assumptions applied to discounted cash flows projections, such as expected sales and discount rates, and to check the adequacy of the evaluation methods and evaluation models applied by the Company in the impairment assessment.

Other Matter

The procedures and practices utilized in the Republic of Korea to audit such separate financial statements may differ from those generally accepted and applied in other countries.

The accompanying separate financial statements as of and for the years ended December 31, 2019 and 2018 have been translated into Indian rupees solely for the convenience of the reader. We have audited the translation and, in our opinion, the separate financial statements expressed in Korean won have been translated into rupees on the basis set forth in note 2.(1) to the separate financial statements.

Responsibilities of Management and Those Charged with Governance for the Separate Financial Statements

Management is responsible for the preparation and fair presentation of the separate financial statements in accordance with K-IFRS, and for such internal control as management determines is necessary to enable the preparation of separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the separate financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with KSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these separate financial statements.

As part of an audit in accordance with KSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Evaluate the appropriateness of accounting policies used in the preparation of the separate financial statements and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the separate financial statements, including the disclosures, and whether the separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the separate financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditors' report is Jong-Sang Lee.

Notice to Readers

This report is effective as of March 16, 2020, the audits report date. Certain subsequent events or circumstances, which may occur between the audits report date and the time of reading this report, could have a material impact on the separate financial statements and notes thereto. Accordingly, the readers of the audit report should understand that the above audit report has not been updated to reflect the impact of such subsequent events or circumstances, if any.

NOTES TO THE SEPARATE FINANCIAL STATEMENTS FOR THE YEARS ENDED DECEMBER 31, 2019 AND 2018

1. General Description of the Company

(1) Organization and description of business of the Company

Ssangyong Motor Company (the "Company") was incorporated on December 6, 1962, in the Republic of Korea and listed its stocks on the Korea Stock Exchange in May 1975. The Company is headquartered in Dongsak-ro, Pyeongtaek, and its factories are located in Pyeongtaek, Gyeonggi-do, and Changwon, Gyeongsangnam-do, Republic of Korea to manufacture, sell and fix multiple types of vehicle, heavy machinery and those parts.

(2) Major shareholders

As of December 31, 2019, the Company's shareholders are as follows:

Name of shareholder	Number of shares	Percentage of ownership
Mahindra & Mahindra Ltd.	111,855,108	74.65%
Others	37,984,894	25.35%
	149,840,002	100.00%

2. Basis of Preparation and Accounting Policies

(1) Basis of translating separate financial statements

The separate financial statements are expressed in Korean won and have been translated into Indian rupees at the rate of INR 0.061615 to ₩ 1 on December 31, 2019, solely for the convenience of the reader. These translations should not be construed as a representation that any or all of the amounts shown could be converted into Indian rupees at this or any other rate.

(2) Statement of compliance

The Company has prepared its separate financial statements in accordance with the K-IFRS. The Company's financial statements are separate financial statements prepared in accordance with the requirements of K-IFRS No. 1027, Separate Financial Statements, in which a parent, or an investor with joint control of, or significant influence over, an investee, accounts for the investments on the basis of the direct equity interest rather than on the basis of the underlying results and net assets of the investees.

The separate financial statements have been prepared on the historical cost basis, except as described below. Historical cost is generally based on the fair value of the consideration given.

1. Derivatives measured at fair value
2. FVTPL measured at fair value
3. Defined benefit liabilities that present value of defined benefit obligation deducted by plan assets

The separate financial statements as of and for the year ended December 31, 2019, to be submitted at the ordinary shareholders' meeting on March 24, 2020, were authorized for issuance at the board of directors' meeting on February 6, 2020.

The Company has initially applied K-IFRS 1116 'Lease' for preparation of the separate financial statements as of and for the ended December 31, 2019. The significant changes in accounting policies are described in note 2.(4).

(3) Use of estimates and judgments

The preparation of the separate financial statements in conformity with K-IFRS requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

The Company makes estimates and assumptions concerning the future. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The significant estimates and assumptions and those which have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities after the end of the reporting period are addressed below.

- Property, plant and equipment and Intangible assets: Assumptions for estimating recoverable amount for impairment test
- Provision for warranty for sale: Assumptions of expected expenditures based on warranty periods.
- Employee benefits: Actuarial assumptions.
- Trade and other receivables: Estimation of the possibility of impairment of receivables.
- Inventories: Estimation of the possibility of losses of inventories.
- Going concern assumption: Judgment on whether there is any significant uncertainty of going concern assumption.

(4) Changes in accounting policies

New standard, interpretations, and changes in accounting policies resulting from the adoption of them are as follows. The changes in accounting policies described below is reflected in the annual financial statements for the year ended December 31, 2019.

The Company has initially adopted K-IFRS No.1116 Leases from January 1, 2019. On transition to K-IFRS No. 1116, the company elected to apply the practical expedient to grandfather the assessment of which transaction are leases. A number of other new standards are also effective from January 1, 2019 but they do not have a material effect on the Company's financial statements.

K-IFRS No.1116 introduced a single, on-balance sheet accounting model for lessees. As a result, the Company, as a lessee, has recognized right-of-use assets representing its rights to use the underlying assets and lease liabilities representing its obligation to make lease payments. Lessor accounting remains similar to previous accounting policies.

The comparative information presented for 2018 has not been restated. It is presented, as previously reported, under K-IFRS No.1017 and related interpretations. The details of the changes in accounting policies are disclosed below.

1) Definition of a lease

Previously, the Company determined at contract inception whether an arrangement was or contained a lease under K-IFRS No. 2104 Determining Whether an Arrangement contains a Lease. The Company now assesses whether a contract is or contains a lease based on the new definition of a lease. Under K-IFRS No.1116, a contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration.

On transition to K-IFRS No.1116, the Company elected to apply the practical expedient to grandfather the assessment of which transactions are leases. It applied K-IFRS No.1116 only to contracts that were previously identified as leases. Contracts that were not identified as leases under K-IFRS No.1017 and K-IFRS No.2104 were not reassessed for whether there is a lease under K-IFRS No. 1116. Therefore, the definition of a lease under K-IFRS No.1116 has been applied only to contracts entered into or changed on or after January 1, 2019.

At inception or on reassessment of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease and non-lease component on the basis of their relative stand-alone prices. However, for leases of land and buildings in which it is a lessee, the Company has elected not to separate non-lease components and will account for the lease and non-lease components as a single lease component.

2) As a lessee

As a lessee, the Company previously classified leases as operating or finance leases based on its assessment of whether the lease transferred substantially all of the risks and rewards of ownership of the underlying asset to the company. Under K-IFRS No.1116, the Company recognizes right-of-use assets and lease liabilities for most leases – i.e. these leases are on-balance sheet.

However, the Company has elected not to recognize right-of-use assets and lease liabilities for some leases of low-value assets. The

Company recognizes the lease payments associated with these leases as an expense on a straight-line basis over the lease term.

The carrying amounts of right-of-use assets are as below.

(In millions of won)		Property, plant and equipment			
		Land and Buildings	Vehicles	Equipment	Total
Balance at January 1, 2019	₩	2,112	5,177	–	7,289
Balance at December 31, 2019		919	3,576	1,356	5,851

(In millions of rupee)		Property, plant and equipment			
		Land and Buildings	Vehicles	Equipment	Total
Balance at January 1, 2019	Rs	130	319	–	449
Balance at December 31, 2019		57	220	84	361

The Company presents right-of-use assets and lease liabilities separately in the separate statement of financial position.

1. Significant accounting policies

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, and subsequently at cost less any accumulated depreciation and impairment losses, and adjusted for certain remeasurements of the lease liability. The Company measures right-of-use asset's useful lives based on the lease period and, recognizes amortisation costs using a straight-line method based on that useful lives.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the company's incremental borrowing rate as the discount rate.

The lease liability is subsequently increased by the interest cost on the lease liability and decreased by lease payment made. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, a change in the estimate of the amount expected to be payable under a residual value guarantee, or as appropriate, changes in the assessment of whether a purchase or extension option is reasonably certain to be exercised or a termination option is reasonably certain not to be exercised.

The Company has applied judgement to determine the lease term for some lease contracts in which it is a lessee that include extension options. The assessment of whether the Company is reasonably certain to exercise such options impacts the lease term, which significantly affects the amount of lease liabilities and right-of-use assets recognized.

2. Transition

Previously, the Company classified property leases as operating leases under K-IFRS No.1017. These include Land and Buildings, Vehicles. The leases typically run for lease period according to lease contract. Some leases include termination option or an option to renew the lease for an additional period after the end of the non-cancellable period. Lease, which does not have a significant probability of exercising the option even if the option is included in the contract, did not take into account the lease term for the termination option.

At transition, for leases classified as operating leases under K-IFRS No.1017, lease liabilities were measured at the present value of the remaining lease payments, discounted at the Company's incremental borrowing rate and the interest rate implicit in the lease as at January 1, 2019. Right-of-use assets are measured at an amount equal to the lease liability, adjusted by the amount of any prepaid or accrued lease payments. The Company applied this approach to all other leases.

The Company used the following practical expedients when applying K-IFRS No.1116 to leases previously classified as operating leases under K-IFRS No.1017.

- Applied the exemption not to recognize right-of-use assets and liabilities for leases with less than 12 months of lease term.
- Applied the exemption not to recognize right-of-use assets and liabilities for leases of low value assets.
- Excluded initial direct costs from measuring the right-of-use asset at the date of initial application.
- Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

3) As a lessor

The Company leases out some of right-of-use assets. The accounting policies applicable to the Company as a lessor are not different from those under K-IFRS No.1017. However, when the Company is an intermediate lessor the sub-leases are classified with reference to the right-of-use asset arising from the head lease, not with reference to the underlying asset. The Company is not required to make any adjustments on transition to K-IFRS No.1116 for leases in which it acts as a lessor.

The Company sub-leases some of Land and Buildings. On transition to K-IFRS No.1116, the right-of-use assets recognized from the head leases are presented in finance leases, and the sub-lease contracts are classified as finance leases under K-IFRS No.1116.

4) Impacts on financial statements

1. Impacts on transition

On transition to K-IFRS No.1116, the impact on the separate statement of financial position is as follows.

(In millions of won and in thousands of rupee)		Korean won		Indian rupee
		January 1, 2019		January 1, 2019
Right-of-use assets	₩	**7,289**	Rs.	**449**
Sub-lease receivables		**6,006**		**370**
Lease liability		**13,295**		**819**

When measuring lease liabilities for leases that were classified as operating leases, the Company discounted lease payments using its incremental borrowing rate and the interest rate implicit in the lease at January 1, 2019. The weighted-average rate of incremental borrowing applied is 3.93%, and the weighted-average rate of the interest rate implicit in the lease applied is 10.36%.

(In millions of won and in thousands of rupee)		Korean won		Indian rupee
		January 1, 2019		January 1, 2019
Operating lease commitment at December 31, 2018 as disclosed in the Company's separate financial statements	₩	**6,690**	Rs.	**412**
Discounted using the incremental borrowing rate and the interest rate implicit in the leases at January 1, 2019		**12,465**		**768**
– Recognition exemption for leases of low-value assets		**(1,858)**		**(114)**
– Recognition exemption for leases with less than 12 months of lease term at transition		**(264)**		**(16)**
– Adjustment extension options reasonably certain to be exercised		**2,952**		**181**
Lease liabilities recognized at January 1, 2019		**13,295**		**819**

2. Impacts for the period

As a result of initially applying K-IFRS No.1116, in relation to the leases that were previously classified as operating leases, the Company recognized ₩ 5,851 million (Rs 361 million) of right-of-use assets and ₩ 5,954 million (Rs 367 million) of lease liabilities and respectively ₩ 4,038 million (Rs 249 million) of sub-lease receivables and sub-lease liabilities as of December 31, 2019.

Also in relation to those leases under K-IFRS No.1116, the Company has recognized depreciation and interest costs, instead of operating lease expense. During the year ended December 31, 2019, the Company recognized ₩ 3,345 million (Rs 206 million) of depreciation costs, ₩ 485 million (Rs 30 million) of interest costs and ₩ 197 million (Rs 12 million) of interest income from these leases.

3. Significant Accounting Policies

(1) New standards and interpretations not yet adopted

A number of new standards are effective for annual periods beginning after 1 January 2019 and earlier application is permitted. The followings are newly required standards and amendments that the Company decided not to early adopt in preparation of the financial statements.

The following amendment standards and interpretation are not expected to have a significant impact on the company's separate financial statements.

- Amendments to References to Conceptual Framework in IFRS Standards.
- K-IFRS No. 1001("Presentation of financial statement") and 1008("Accounting Policies, Changes in Accounting Estimates and Errors"): 'Definition of Material'
- K-IFRS No. 1103 'Business Combinations'
- K-IFRS No. 1117 'Insurance Contracts'

(2) Accounting for investments in subsidiaries and joint ventures

The Company in accordance with the K-IFRS No. 1110 'Consolidated financial statements' is a parent company and it has subsidiaries, Ssangyong Motor (Shanghai) Co., Ltd., Ssangyong European Parts Center B.V. and Ssangyong Australia Pty Ltd., and has a joint venture with SY auto capital Co., Ltd. When the Company prepares separate financial statements, the investments in subsidiaries and a joint venture are accounted for at cost basis by the direct investment proportion. Also, the Company recognizes a dividend from a subsidiary in profit or loss in the separate financial statements when its right to receive the dividend is established.

(3) Revenue recognition

K-IFRS No.1115 establishes a comprehensive framework for determining whether, how much and when revenue is recognized. It replaces existing revenue recognition guidance, including K-IFRS No.1018 Revenue, K-IFRS No.1011 Construction Contracts, K-IFRS No. 2113 Customer Loyalty Programs, K-IFRS No. 2115 Agreements for the Construction of Real Estate and K-IFRS No.2118 Transfers of assets from customers.

The Company have identified distinct performance obligations for our products and merchandise contract with our customers, such as (1) sales of vehicles and merchandise, (2) transportation of vehicles, and (3) warranties. The revenue from the sale of goods under the contract is recognized when the goods are transferred to the customer and the performance obligation is transferred. In addition, The Company identified performance obligations for transportation and guarantee and deferred recognition of revenue over the time or period of performance.

Our sales contract with customers has the option of customers purchasing additional warranties. Also, depending on the sales policy, customers may be offered service warranty beyond the assurance warranty when selling a vehicle. When a customer purchases a warranty or provides a service warranty to a customer under a sales policy, sales recognition related to the performance obligations is deferred to the time the performance obligation is fulfilled and is not recognized in provision of warranties.

Transaction price of a service warranty to a customer under a sales policy is allocated by relative individual sales price that is estimated by "expected cost plus a margin approach". The consideration paid to customers defined in K-IFRS 1115 are recognized by deducting from related sales.

(4) Foreign currencies

The individual financial statements of each entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the separate financial statements, the results and financial position of each entity are expressed in Korean won, which is the functional currency of the entity and the presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

(5) Non-derivative financial assets

1) Recognition and initial measurement

Trade receivables and debt securities are recognized for the first time at the time of issue. Other financial instruments and financial liabilities are recognized only when the Company becomes a party to the financial instrument.

Except for trade receivables that do not include significant financial assets, are measured at fair value at the time of initial recognition and except for, financial assets at fair value through profit or loss or financial liabilities s at fair value through profit or loss, transaction costs directly related to the acquisition of the financial asset or the issuance of the financial liability are added to or subtracted from the fair value. Trade receivables that do not include significant financial elements are initially measured at transaction prices.

2) Classification and subsequent measurements

At initial recognition, financial assets are amortized cost, other comprehensive income - fair value debt instruments, other comprehensive income - fair value equity instruments or profit or loss - classified as measured at fair value.

Financial assets are not reclassified after initial recognition, unless the entity modifies the financial asset management model, in which case all of the financial assets impacted are reclassified on the first day of the first reporting period after the change in the business model.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect contractual cash flows.
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

An assessment of whether contractual cash flows consist solely of principal and interest

The principal is defined as the fair value at the initial recognition of the financial asset. Interest consists of consideration for the time value of money, consideration for credit risk associated with the principal balance in a particular time period, as well as consideration for basic loan risk and costs (e.g., liquidity risk and operating costs) as well as profit.

When evaluating whether the contractual cash flows consist solely of payments for principal and interest, we take into account the terms and conditions of the applicable product. If a financial asset includes a contractual term that changes the timing or amount of a contractual cash flow, then the contractual terms must determine whether the contractual cash flows that may occur over the life of the financial instrument consist solely of principal payments.

When evaluating this, we consider the following:

- Conditional conditions that change the amount or timing of cash flow
- Provision to adjust contractual nominal interest rate, including variable interest rate characteristics
- Moderate repayment characteristics and maturity extension characteristics
- The terms of the contract that limit our claims for cash flows arising from a particular asset (e.g. non-property features)

A prepayment feature is consistent with solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual par amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

Subsequent measurement and profit and loss

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.
Financial assets at amortized cost	These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.

3) Elimination

In the event that the contractual rights to cash flows of financial assets have ceased, the Company transfers the contractual rights to receive the cash flows of the financial assets and substantially transfers the risks and rewards of ownership of the transferred financial assets. Or if the Company does not control or control the financial assets without retaining or transferring substantially all the risks and rewards of ownership.

If the Company transacts a recognized asset in its statement of financial position but holds most of the risks and rewards of ownership of the transferred asset, the transferred asset is not removed.

4) Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when the Company currently has a legally enforceable right to set off the recognized amounts and there is the intention to settle on a net basis or to realize the asset and settle the liability simultaneously.

(6) Impairment of financial assets

1) Financial instruments and contract assets

The Company recognize a loss reserve for expected credit losses on the following assets:

- Financial assets measured at amortized cost
- Debt instruments measured at fair value- Other comprehensive income
- Contractual assets as defined in K-IFRS No. 1115

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured as 12-month ECLs:

- Debt securities that are determined to have low credit risk at the reporting date; and
- Other debt securities and bank balances for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

The Company has elected to measure loss allowances for trade receivables and contract assets at an amount equal to lifetime ECLs.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

The Company considers a financial asset to be in default when:

- The borrower is unlikely to pay its credit obligations to the company in full, without recourse by the Company to actions such as realizing security (if any is held)

Total expected credit losses are the expected credit losses due to any default event that may occur during the expected life of the instrument. The expected 12-month credit loss is the total expected period that represents the expected credit loss due to a default event of a financial instrument that can occur within 12 months after the end of the reporting period (or a shorter period if the expected life of the instrument is less than 12 months) Part of credit loss.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

2) Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

3) Credit-impaired financial assets

At each reporting date, the Company assesses whether financial assets carried at amortized cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

The evidence that the credit of a financial asset is impaired includes the following observable information.

- Significant financial difficulty of the debtor
- A breach of contract such as a default or being more than 90 days past due
- The restructuring of a loan or advance by the company on terms that the company would not consider otherwise
- It is probable that the debtor will enter bankruptcy or other financial reorganization, or
- The disappearance of an active market for a security because of financial difficulties

4) Presentation of allowance for credit loss on statement of financial position

The allowance for losses on financial assets at amortized cost is deducted from the carrying amount of the asset. For debt instruments measured at FVOCI, changes in credit risk are included in profit or loss and changes in non-credit risk are recognized in other comprehensive income.

5) Write-Off

If there is no reasonable expectation of recovery of all or part of the contractual cash flows of a financial asset, the asset is removed. For individual customers, the Company assesses the timing and amount of each individual by assessing whether there is a reasonable expectation of recovery for the enterprise customer, based on historical experience with the recovery of similar assets. The Company has no expectation that the proceeds will be recovered significantly. However, deferred financial assets can be subject to collection activities in accordance with the collection procedure of the amount due.

(7) Financial liabilities and Paid-in capital

1) Paid-in capital

Common stock is classified as equity. Incremental costs directly related to capital transactions are deducted from equity as a net amount reflecting the tax effect.

Repurchase of the Company's own equity instruments is recognized and deducted directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

2) Financial liabilities

The Company classifies financial liabilities as financial liabilities at fair value through profit or loss and other financial liabilities in accordance with the definition of the substance of contractual contracts and financial liabilities and recognizes them in the statement of financial position when becoming a party to the contract.

1) Financial liabilities at fair value through profit or loss

Financial liabilities are classified as held for trading if they are classified as held for trading, are derivatives, or are initially recognized at fair value through profit or loss. Financial liabilities at fair value through profit or loss are measured at fair value after initial recognition and changes in fair value are recognized in profit or loss. Transaction costs incurred in connection with the initial recognition are recognized in profit or loss as incurred.

2) Other financial liabilities

Non-derivative financial liabilities that are not classified as financial liabilities at fair value through profit or loss are classified as other financial liabilities. Other financial liabilities are measured initially at fair value, net of transaction costs directly attributable to the issue. Subsequently, other financial liabilities are measured at amortized cost using the effective interest method. Interest expense is recognized using the effective interest method.

3) Elimination of financial liabilities

Company only eliminates financial liabilities when the contractual obligation of the financial liability is fulfilled, cancelled or expired. The Company recognizes new financial liabilities as fair value based on new contracts and removes existing liabilities when the contractual terms of the financial liabilities change and the cash flows change substantially. When a financial liability is derecognized, the difference between the carrying amount and the consideration paid (including any transferred non-cash assets or liabilities assumed) is recognized in profit or loss.

(8) Derivative financial instruments

The Company enters into derivative financial instruments to manage its exposure to foreign exchange rate risk by foreign exchange forward contracts.

Derivatives are initially recognized at fair value at the date the derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately, unless the derivative is designated and effective as a hedging instrument; in which case the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

At inception of designated hedging relationships, the company documents the risk management objective and strategy for undertaking the hedge. The company also documents the economic relationship between the hedged item and the hedging instrument, including whether the changes in cash flows of the hedged item and hedging instrument are expected to offset each other.

Cash Flow hedges

When a derivative is designated as a cash flow hedging instrument, the effective portion of change in the fair value of the derivative is recognized in OCI and accumulated in the hedging reserve. The effective portion of changes in the fair value of the derivative that is recognized in OCI is limited to the cumulative change in fair value of the hedged item, determined on a present value basis, from inception of the hedge. Any ineffective portion of changes in the fair value of the derivative is recognized immediately in profit or loss.

The company designates only the change in fair value of the spot element of forward exchange contracts as the hedging instrument in cash flow relationships. The change in fair value of the forward element of forward exchange contracts (forward points) is separately accounted for as a cost of hedging and recognized in a cost of hedging reserve within equity.

(9) Inventories

Inventories are stated at the lower of cost or net realizable value. Cost of inventories, except for those in transit, are measured under the weighted-average method and consists of the purchase price, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realizable value represents the estimated selling price for inventories, less all estimated costs of completion and costs necessary to make the sale.

When inventories are sold, the carrying amount of those inventories is recognized as an expense (cost of sales) in the period in which the related revenue is recognized. The amount of any write-down of inventories to net realizable value and all losses of inventories is recognized as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realizable value, is recognized as a reduction in the amount of inventories recognized as an expense in the period in which the reversal occurs.

(10) Property, plant and equipment

Property, plant and equipment are stated at cost, less subsequent accumulated depreciation and accumulated impairment losses. The cost of an item of property, plant and equipment is directly attributable to their purchase or construction, which includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. It also includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are recognized in the carrying amount of an asset or as a separate asset if it is probable that future economic benefits associated with the assets will flow into the Company and the cost of an asset can be measured reliably. Routine maintenance and repairs are expensed as incurred.

The Company does not depreciate land. Depreciation expense is computed using the straight-line method based on the estimated useful lives of the assets as follows:

	Useful lives (Years)
Buildings	24–50
Structures	13–30
Machinery and equipment	10
Vehicles	6–10
Others	6–10

If each part of an item of property, plant and equipment has a cost that is significant in relation to the total cost of the item, it is depreciated separately.

The Company reviews the depreciation method, the estimated useful lives and residual values of property, plant and equipment at the end of each annual reporting period. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on de-recognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognized.

(11) Intangible assets

1) Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost, less accumulated amortization and accumulated impairment losses. Amortization is recognized on a straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost, less accumulated impairment losses.

2) Internally generated intangible assets - research and development expenditure

Expenditure on research activities is recognized as an expense in the period in which it is incurred.

Expenditure arising from development (or from the development phase of an internal project) is recognized as an intangible asset if, and only if, the development project is designed to produce new or substantially improved products, and the Company can demonstrate the technical and economic feasibility and measure reliably the resources attributable to the intangible asset during its development.

The amount initially recognized for internally generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria. Where no internally generated intangible asset can be recognized, development expenditure is recognized in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally generated intangible assets are reported at cost, less accumulated amortization and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

The useful life of amortization related to intangible assets is as follows.

	Useful lives (Years)
Development cost	5
Patents	5~10
Software	3
Other intangible assets	Indefinite

3) Derecognition of intangible assets

An intangible asset is derecognized on disposal or when no future economic benefits are expected from its use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognized in profit or loss when the asset is derecognized.

(12) Impairment of Non-financial assets

The carrying amounts of the Company's non-financial assets other than assets arising from biological assets, investment property, contract assets, employee benefits, inventories and deferred tax assets are reviewed at the end of the reporting period to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Intangible assets that have indefinite useful lives irrespective of whether there is any indication of impairment, Good will and intangible assets not yet available are tested for impairment annually by comparing their recoverable amount to their carrying amount.

The Company estimates the recoverable amount of an individual asset, if it is impossible to measure the individual recoverable amount of an asset, then the Company estimates the recoverable amount of cash-generating unit ("CGU"). A CGU is the smallest identifiable group of assets that generates cash inflows that are largely independent of the cash inflows from other assets or groups of assets. The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell.

The value in use is estimated by applying a pre-tax discount rate that reflect current market assessments of the time value of money and the risks specific to the asset or CGU for which estimated future cash flows have not been adjusted, to the estimated future cash flows expected to be generated by the asset or CGU.

An impairment loss is recognized in profit or loss if the carrying amount of an asset or a CGU exceeds its recoverable amount.

(13) Retirement benefit costs and termination benefits

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the separate statement of financial position with a charge or credit recognized in other comprehensive income in the period in which they occur. Remeasurement recognized in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognized in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are composed of service cost (including current service cost and past service cost, as well as gains and losses on curtailments and settlements), net interest expense (income) and remeasurement.

The Company presents the service cost and net interest expense (income) components in profit or loss and the remeasurement component in other comprehensive income. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognized in the separate statement of financial position represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of the termination benefit or when the entity recognizes any related restructuring costs.

Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan. When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting depends on whether the contributions are linked to service, as follows:

If the contributions are not linked to services (e.g., contributions are required to reduce a deficit arising from losses on plan assets or from actuarial losses), they are reflected in the remeasurement of the net defined benefit liability (asset).

If contributions are linked to services, they reduce service costs. For the amount of contribution that is dependent on the number of years of service, the entity reduces service cost by attributing the contributions to periods of service using the attribution method required by K-IFRS No. 1019 paragraph 70 for the gross benefits. For the amount of contribution that is independent of the number of years of service, the entity reduces service cost in the period in which the related service is rendered.

(14) Provisions

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, if it is probable that the Company will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material). The discount rate used is a pretax rate that reflects current market assessments of the time value of money and the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage is recognized in profit or loss as borrowing cost.

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

At the end of each reporting period, the remaining provision balance is reviewed and assessed to determine if the current best estimate is being recognized. If the existence of an obligation to transfer economic benefit is no longer probable, the related provision is reversed during the period.

(15) Lease

The Company has initially adopted K-IFRS No.1116 Leases from January 1, 2019. The significant changes in accounting policies are described in note 2.(4).

The Company applied the following accounting policies in relation to leases before 1 January 2019. Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

1) a lessor

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Company's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Company's net investment outstanding in respect of the leases.

Rental income from operating leases is recognized on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized on a straight-line basis over the lease term.

2) a lessee

Assets held under finance leases are initially recognized as assets of the Company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the separate statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policy on borrowing costs (see Note 3. (16)). Contingent rentals are recognized as expenses in the periods in which they are incurred.

Operating lease payments are recognized as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising from operating leases are recognized as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognized as a liability. The aggregate benefit of incentives is recognized as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

(16) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings, pending their expenditure on qualifying assets, is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

(17) Government grants

Government grants are not recognized until there is reasonable assurance that the Company will comply with the conditions attached to them and that the grants will be received.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

Government grants related to assets are presented in the separate statement of financial position by deducting the grant from the carrying amount of the asset. The related grant is recognized in profit or loss over the life of a depreciable asset as a reduced depreciation expense.

Government grants related to income are recognized in profit or loss on a systematic basis over the periods in which the Company recognizes as expenses the related costs for which the grants are intended to compensate. Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Company with no future related costs are recognized in profit or loss in the period in which they become receivable.

(18) Finance income and expenses

Finance income comprises interest income on funds invested. Interest income is recognized as it accrues in profit or loss, using the effective interest method.

Finance expenses comprise interest expenses on borrowings. Interest expense is recognized as it accrues in profit or loss, using the effective interest method.

(19) Earnings per share

The Company presents basic and diluted earnings per share(EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholdings of the Company by the weighted average number of ordinary shares outstanding during the period, adjusted for own shares held. The Company has no dilutive potential shares, therefore diluted earnings(loss) per share is equal to the basic earnings(loss) per share.

(20) Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

1) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the separate statement of comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2) **Deferred tax**

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences.

Deferred tax assets are generally recognized for all deductible temporary differences to the extent it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent it is probable that there will be sufficient taxable profits against which the benefits of the temporary differences can be utilized and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset if, and only if, the Company has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities that intend either to settle current tax liabilities and assets on a net basis or to realize the assets and settle the liabilities simultaneously in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

3) **Current and deferred taxes for the year**

Current and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case the current and deferred taxes are also recognized in other comprehensive income or directly in equity, respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

(21) Fair value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these separate financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of K-IFRS No. 1102 Share-based payment; leasing transactions that are within the scope of K-IFRS No. 1116 Leases; and measurements that have some similarities to fair value, but are not fair value, such as net realizable value in K-IFRS No. 1002 Inventories or value in use in K-IFRS No. 1036 Impairment of Assets.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

a. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

b. Level 2 inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

c. Level 3 inputs are unobservable inputs for the asset or liability.

(22) Segment information

Segment information is presented in the same format as the reporting material presented to the Company's management. The Company's management is liable for the assessment of the resources to be allocated to the business segments and the performance results of the business segments.

(23) Accounting Treatment related to the Emission Rights Cap and Trade Scheme

The Company classifies the emission rights as intangible assets. Emission right allowances the government allocated free of charge are measured at ₩ 0, and emission right allowances purchased are measured at cost that the Company paid to purchase the allowances. If emission rights that the government allocated free of charge are sufficient to settle the emission rights allowances allotted for vintage year, the emissions liabilities are measured at ₩ 0. However, for the emission liabilities that exceed the allowances allocated free of charge, the shortfall is measured at best estimate at the end of the reporting period.

4. Cash and Cash Equivalents

Cash and cash equivalents include cash on hand and in banks and highly liquid short-term financial instruments that may be easily converted into cash and whose risk of value fluctuation is not material.

5. Restricted Financial Instruments

Restricted financial Instruments as of December 31, 2019 and 2018 are as follows:

(In thousands of won and in thousands of rupee)

			Korean won			Indian rupee		
	Financial institution		**2019**	2018		**2019**	2018	**Description**
Cash and cash equivalents	Shinhan Bank and others	₩	**187,494**	1,086,949	Rs	**11,552**	66,972	Government grants
	Woori Bank		**752,317**	750,379		**46,354**	46,235	Unconfirmed reorganization debt pledged as collateral
Non-current financial instruments	Shinhan Bank and others		**4,000**	4,000		**246**	246	Bank account deposit
		₩	**943,811**	1,841,328	Rs	**58,152**	113,453	

6. Non-current Financial Assets

Non-current financial assets as of December 31, 2019 and 2018 are as follows:

(In thousands of won)

	2019					2018
	Ownership (%)		Acquisition cost	Net asset value	Book value	Book value
Korea Business Finance Loan(*)	**1.72**	₩	**500,000**	**722,313**	**500,000**	500,000
Korea Management Consultants Association(*)	**1.50**		**60,000**	**854,342**	**60,000**	60,000
		₩	**560,000**	**1,576,655**	**560,000**	560,000

(In thousands of rupee)

	2019					2018
	Ownership (%)		Acquisition cost	Net asset value	Book value	Book value
Korea Business Finance Loan(*)	**1.72**	Rs	**30,807**	**44,505**	**30,807**	30,807
Korea Management Consultants Association(*)	**1.50**		**3,697**	**52,640**	**3,697**	3,697
		Rs	**34,504**	**97,145**	**34,504**	34,504

(*) Investments in equity instruments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured are measured at acquisition cost.

7. Trade and Other Receivables

(1) Details of trade and other receivables as of December 31, 2019 and 2018 are as follows:

(In thousands of won)

	2019		2018	
	Current	Non-current	Current	Non-current
Trade receivables	₩ **159,356,266**	**100,000**	179,134,041	1,332,414

Reversal of allowance for bad debts		**(55)**	**(25,000)**	(149)	(928)
Removal		**–**	**(30)**	–	–
Ending balance	Rs	**20,506**	**276,481**	7,659	269,212

8. Inventories

Details of inventories as of December 31, 2019 and 2018 are as follows:

(In thousands of won and in thousands of rupee)

		Korean won			Indian rupee	
		2019	2018		**2019**	2018
Merchandises	₩	**37,958,354**	39,892,986	Rs	**2,338,804**	2,458,006
Finished goods		**73,488,372**	76,588,557		**4,527,986**	4,719,004
Work-in-process		**22,869,812**	27,069,755		**1,409,123**	1,667,903
Raw materials		**34,184,282**	31,654,571		**2,106,265**	1,950,396
Sub-materials		**375,663**	413,615		**23,146**	25,485
Supplies		**3,270,070**	3,611,193		**201,486**	222,504
Goods in transit		**32,477,788**	37,725,938		**2,001,119**	2,324,484
	₩	**204,624,341**	216,956,615	Rs	**12,607,929**	13,367,782

The Company has measured inventories at the lower of cost or net realizable value. The loss on valuation of inventories amounted to ₩ 9,469,719 thousand (Rs 583,477 thousand) and ₩ 7,981,632 thousand (Rs 491,788 thousand) for the years ended December 31, 2019 and 2018 is included in cost of sales.

9. Investments in Subsidiaries and a Joint venture

Details of investment in subsidiaries and a joint venture as of December 31, 2019 and 2018 are as follows:

(In thousands of won)

						2019		2018
	Company	**Location**	**Ownership**	**Closing month**		**Acquisition cost**	**Book value**	Book value
Subsidiaries	Ssangyong Motor (Shanghai) Co., Ltd.	China	100%	December	₩	**5,338,097**	**297,411**	297,410
	Ssangyong European Parts Center B.V.	Netherlands	100%	December		**835,695**	**–**	–
	Ssangyong Australia Pty Ltd.(*1)	Australia	100%	December		**4,067,594**	**–**	2,950,833
						10,241,386	**297,411**	3,248,243
Joint venture	SY Auto Capital Co., Ltd.(*2)	Korea	51%	December		**10,200,000**	**10,200,000**	10,200,000
					₩	**20,441,386**	**10,497,411**	13,448,243

(*1) The company made additional investments of ₩ 1,116,761 thousand during the year. Impairment loss on investments in subsidiaries of ₩ 4,067,594 thousand was recognized for the year ended December 31, 2019.

(*2) SY Auto Capital Co., Ltd. were established under joint venture agreement as a joint venture since the Company has rights only to the net assets, and their legal structures of arrangements are separated.

(In thousands of rupee)

						2019		2018
	Company	**Location**	**Ownership**	**Closing month**		**Acquisition cost**	**Book value**	Book value

(*1) Cash Generating Unit consists of only a single cash-generating unit. As the present value (value in use) of future cash flows expected from the use and disposal of property, plant and equipment is less than the book value at the end of this year, the book value was adjusted to recoverable value and the difference was recognized as a loss on property, plant and equipment (non-operating expenses). The discount rate used in calculating value in use is 8.6% and 1% growth rate has been applied since 2024.

(*2) Capitalized borrowing costs in respect of construction in progress is ₩ 765,291 thousand (2018: ₩ 1,073,366 thousand) and ₩ 1,510,906 thousand (2018: ₩ 519,000 thousand) was transferred from inventory to vehicles during the year ended December 31, 2019. The government grant amounting to ₩ 197,692 thousand (2018: ₩ 2,012,470 thousand) was used for asset acquisition was included in others during the year ended December 31,2019.

(*1) Cash Generating Unit consists of only a single cash-generating unit. As the present value (value in use) of future cash flows expected from the use and disposal of Intangible Assets is less than the book value at the end of this year, the book value was adjusted to recoverable value and the difference was recognized as a loss on Intangible Assets (non-operating expenses). The discount rate used in calculating value in use is 8.6% and 1% growth rate has been applied since 2024.

(*2) Capitalized borrowing costs in respect of other intangible assets is ₩ 2,701,444 thousand and ₩ 2,650,741 thousand for the years ended December 31, 2019 and 2018, respectively.

(In thousands of rupee)

		2018		
Details		PV of defined benefit obligation	Plan assets	Total
Beginning balance	Rs	17,600,823	(67,466)	17,533,357
Current service cost		2,237,908	–	2,237,908
Interest expense (income)		547,902	(2,097)	545,805
Sub-total		20,386,633	(69,563)	20,317,070
Re-measurement factors:				
Re-measurements of plan assets		–	1,270	1,270
Loss (gain) from experience adjustments		77,206	–	77,206
Loss (gain) from changes in financial assumptions		1,146,567	–	1,146,567
Loss (gain) from changes in demographic assumptions		9,753	–	9,753
Sub-total		1,233,526	1,270	1,234,796
Benefit paid by plan		(5,837)	5,837	–
Benefit paid directly		(1,269,350)	–	(1,269,350)
Ending balance	Rs	20,344,972	(62,456)	20,282,516

(3) The components of plan assets as of December 31, 2019 and 2018 are as follows:

(In thousands of won and in thousands of rupee)

		Korean won			Indian rupee	
		2019	2018		**2019**	2018
Insurance contracts	₩	**954,268**	1,013,651	Rs.	**58,797**	62,456

(4) Actuarial assumptions used related to plans as of December 31, 2019 and 2018 are as follows:

	2019	2018
Discount rate (%)	**2.30**	2.63
Rate of future salary growth (%)	**3.96**	3.95

The discount rate is the market yield at the end of the reporting year on high quality corporate bonds (AA+) that have maturity which approximates the terms of the Company's obligations and that are denominated in the same currency in which the benefits are expected to be paid. The discount rate for the calculation of the present value of defined benefit obligations is also used as expected return on plan assets.

Weighted average duration of defined benefit obligation as of December 31, 2019 and 2018 are 11.1 years and 11.6 years, respectively.

(5) The sensitivity of the defined benefit obligations to key assumptions as of December 31, 2019 is as follows:

(In thousands of won and in thousands of rupee)

		Korean won			Indian rupee	
		1% increase	1% decrease		**1% increase**	1% decrease
Discount rate	₩	**(34,976,590)**	40,541,126	Rs	**(2,155,083)**	2,497,941
Future salary growth	₩	**38,098,453**	(33,573,782)	Rs	**2,347,436**	(2,068,649)

Sensitivity analysis does not take into account the variance of all expected cash flows, but it provides an approximation of the sensitivity to the assumptions used.

19. Commitments and Contingencies

Details of commitments and contingencies as of December 31, 2019 are as follows:

(1) The Company carries product liability insurance for all products that it sells.

(2) As of December 31, 2019, the Company has agreements with Korea Development Bank and others for various borrowings, trading finance and others with limit of W 423,250 million (Rs 26,079 million) and USD 245 million.

(3) As of December 31, 2019, the Company has been provided with guarantees amounting to USD 896,649 by Standard Chartered Bank Korea Limited in connection with refunds for advance received and performing transactions.

(4) As of December 31, 2019, 5 claims as a plaintiff were filled with the claim amount of W 5,480 million (Rs 338 million) and 12 claims as a defendant were filled with the claims of W 2,185 million (Rs 135 million). The provision amounting to W 7,486 million (Rs 461 million) is recognized as other payable for the foregoing lawsuits and claims, since the amounts for potential loss can be estimated and management expect that it is probable that the Company will be required to incur an outflow.

20. Capital Stock

The Company's capital stock as of December 31, 2019 and 2018 are as follows:

(In thousands of won and in thousands of rupee, except for par value and share information)

		Korean won			Indian rupee	
		2019	2018		**2019**	2018
Number of shares authorized	₩	**3,000,000,000**	3,000,000,000	Rs	**3,000,000,000**	3,000,000,000

	₩	**3,901,460,463**	3,767,827,080	Rs	**240,388,487**	232,154,666

Total expenses are equal to the sum of cost of sales and selling, general and administrative expenses.

26. Derivatives

The Company enters into derivative financial instruments to manage its exposure to foreign exchange rate risk by foreign exchange forward contracts.

Derivatives are initially recognized at fair value at the date the derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately, unless the derivative is designated and effective as a hedging instrument; in which case the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

27. Selling, General and Administrative Expenses

(1) Details of selling expenses for the years ended December 31, 2019 and 2018 are as follows:

(In thousands of won and in thousands of rupee)

34. Financial Instruments

(1) Capital risk management

The Company manages capital risk in order to maximize shareholders' profit by maintaining sound or optimal capital structure through monitoring of financial ratios, such as debt-to-equity ratio on a monthly basis and implements capital structure improvement plan when necessary.

The Company uses debt ratio as a capital management index and calculates the ratio as total liabilities divided by total equity on financial statements. The Company is not subject to externally enforced capital regulation.

Debt-to-equity ratio as of December 31, 2019 and 2018 are as follows:

(In thousands of won and in thousands of rupee)

	Korean won				Indian rupee			
		2019		2018		**2019**		2018

	Rs 58,225,931	Rs –	Rs 58,225,931	Rs 58,225,931

(3) Financial risk management

The Company is exposed to credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring and responds to each risk factors.

Financial assets that are subject to the financial risk management consist of cash and cash equivalents, non-current financial assets, trade receivables, other receivables and others; financial liabilities subject to the financial risk management consist of trade payables, other payables, borrowings, and others.

1) Market risk

a. Foreign exchange risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company assesses, manages and reports, on a regular basis, the foreign exchange risk for its receivables and payables denominated in foreign currency.

The table below shows the sensitivity for each foreign currency when exchange rates change 10%. Sensitivity analysis only includes foreign currency monetary items that are not paid, and it adjusts the translation assuming exchange rate changes 10% as of December 31, 2019.

(In thousands of won and in thousands of rupee)

	Korean won		**Indian rupee**	
Currency	10% increase	10% decrease	10% increase	10% decrease
USD	₩ 1,890,903	₩ (1,890,903)	Rs. 116,508	Rs. (116,508)
EUR	366,758	(366,758)	22,598	(22,598)
JPY	(8,624,010)	8,624,010	(531,368)	531,368
Others	3,441,399	(3,441,399)	212,042	(212,042)
	₩ (2,924,950)	₩ 2,924,950	Rs. (180,220)	Rs. 180,220

b. Interest rate risk

Sensitivity analysis was conducted assuming floating rate debt current balance is the same during the whole reporting year. When reporting interest rate risk to management internally, 0.5% variation is used, representing management's assessment about reasonably possible fluctuations of interest rates.

If other variables are constant and the interest rate is lower or higher by 0.5% than the current rate, the Company's current income will decrease or increase in W 806,455 thousand (Rs 49,690 thousand) for the year ended December 31, 2019, due to floating rate debt's interest rate risk.

2) Credit risk

Credit risk arises from transactions in the ordinary course of business and investment activities and when a customer or a transacting party fails to perform obligations defined by respective contract terms. In order to manage the aforementioned credit risk, the Company regularly assesses credit ratings of its customers and transacting parties based on their financial status and past experiences, and establishes credit limit for each customer or transacting party.

If a credit risk occurs with respect to a dealership sale, which is a major type of the Company's sales, the respective dealership bears all of the risk; the Company manages credit risk on product sales using two management index, agreed liability rate and agreed excess rate, and when the management index exceeds the agreed rate, it imposes a release restriction on the respective dealership and transfers a credit risk arising from product sales. The Company's trade receivables are usually collected within 30 days but some of the notes receivable are collected within 75 days.

The Company estimates allowances for doubtful accounts (default, liquidation, bankruptcy, court receivership, workout, disappearance, full-scale capital erosion, etc.) through individual analysis for the receivables that are over more than 90 days.

Maximum exposure in respect of credit risk as of December 31, 2019 and 2018 are as follows:

(In thousands of won and in thousands of rupee)

	Korean won		**Indian rupee**	
	2019	2018	**2019**	2018
Trade and other receivables	₩ **212,482,093**	₩ 228,980,147	Rs. **13,092,084**	Rs. 14,108,612

3) Liquidity risk

The Company has managed liquidity risk to maintain adequate level of liquidity by periodic projecting cash outflow. To manage the risks, the Company has entered into a factoring agreement with capital financial institutions.

The contractual maturities of financial liabilities as of December 31, 2019 and 2018 are as follows:

(*) Including expected interest expenses.

(4) Fair value of financial instruments

1) The Company's management deems that the differences between carrying value and fair value of financial assets and financial liabilities recognized as amortized cost on financial statements is not significant.

2) Valuation methods and assumptions applied in fair value measurement

The fair values of financial instruments (i.e., government bonds and unsecured corporate bonds) traded on active markets are determined with reference to quoted market prices. The Company uses the closing price as the quoted market price for its financial assets.

The fair values of derivatives where no active market exists or where quoted prices are not otherwise available are determined by using valuation techniques. Non-option derivatives are evaluated by discounted cash flow method using the yield curve available. Options are evaluated by option-pricing models. Foreign exchange forward contracts are determined using the yield curve derived from market interest rates with the same maturity of forward contracts. To measure interest rate swaps, the cash flows are estimated by the yield curve derived from market interest rate and discounted to calculate the present value of swaps.

3) The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, classified as Level 1, 2 or 3, based on the degree to which the fair value is observable.

Level 1 quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or in indirectly (i.e. derived from prices)

Level 3 input for the asset or liability that are not based on observable market data (unobservable inputs)

Fair values of financial instruments by hierarchy level as of December 31, 2018 are as follows:

(In thousands of won)

		Level 1	**Level 2**	**Level 3**	**Fair value**
As of December 31, 2018	₩				
Derivatives assets		**–**	**891,319**	**–**	**891,319**

(In thousands of rupee)

		Level 1	**Level 2**	**Level 3**	**Fair value**
As of December 31, 2018	Rs				
Derivatives assets		**–**	**54,919**	**–**	**54,919**

4) As input factors used in measuring market value of foreign exchange forward are from observable exchange forward rate, the Company classified the fair value of foreign exchange forward as level 2.

35. Going concern assumption

The Company's financial statements are prepared on the assumption that it will continue as going concern, and therefore our assets and liabilities are accounted for on the assumption that they can be recovered or repaid at their carrying amount through the normal course of business activities. However, due to deteriorating financial structure, the Company has incurred operating losses of W 275,199 million (Rs 16,956 million) and net losses of W 341,052 million (Rs 21,014 million) as of the end of the reporting period. In addition, the company's current liabilities exceed its current assets by W 476,896 million (Rs 29,384 million) as of the end of the reporting period.

In circumstances where material uncertainty on the ability to continue as a going concern, which is the basis for preparation of the financial statements. As a result, the Company has commenced a capital reorganization plan. As the stabilization of operating income will depend on the success of this plan, a significant uncertainty exists.

As it will be difficult for the Company to continue as a going concern if the Company fails to achieve its plan, the carrying amount of the Company's assets and liabilities may not be recoverable in the ordinary course of business. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Independent Auditors' Report on Internal Control over Financial Reporting ("ICFR")

Based on a report originally issued in Korean

To the Shareholders and Board of Directors of

Ssangyong Motor Company

Opinion on Internal Accounting Control System

We have audited Ssangyong Motor Company's ("the Company") internal control over financial reporting ("ICFR") as of December 31, 2019 based on the criteria established in the Conceptual Framework for Designing and Operating ICFR ("ICFR Design and Operation Framework") issued by the Operating Committee of Internal Control over Financial Reporting in the Republic of Korea (the "ICFR Committee").

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on ICFR Design and Operation Framework.

We also have audited, in accordance with Korean Standards on Auditing (KSAs), the separate financial statements of the Company, which comprise the separate statement of financial position as of December 31, 2019, the separate statements of comprehensive income, changes in equity and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information, and our report dated March 16, 2020 expressed "an unmodified opinion on those separate financial statements".

Basis for Opinion

We conducted our audit in accordance with KSAs. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Internal Control over Financial Reporting section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the internal control over financial reporting in Republic of Korea, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Internal Control over Financial Reporting

The Company's management is responsible for designing, operating and maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Report on the Assessment of the internal Control over Financial Reporting.

Those charged with governance are responsible for overseeing the Company's internal control over financial reporting.

Auditors' Responsibilities for the Audit of the Internal Control over Financial Reporting

Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We conducted our audit in accordance with KSAs. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with Korean International Financial Reporting Standards ("K-IFRS"). A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with K-IFRS, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

The engagement partner on the audit resulting in this independent auditors' report is Jong Sang Lee.

Seoul, Korea
March 16, 2020

This report is effective as of March 16, 2020, the audit report date. Certain subsequent events or circumstances, which may occur between the audit report date and the time of reading this report, could have a material impact on the internal control over financial reporting. Accordingly, the readers of the audit report should understand that the above audit report has not been updated to reflect the impact of such subsequent events or circumstances, if any.

AUDITOR'S REPORT

Ssangyong Motor (Shanghai) Co., Ltd.:

I. Audit Opinion

We have audited the accompanying financial statements of Ssangyong Motor (Shanghai) Co., Ltd. Company Limited (hereinafter referred to as "Ssangyong Company"), including the balance sheet on December 31, 2019, and the income statement, cash flow statement, the statement of changes in owners' equity and notes to financial statements for the year 2019.

In our opinion, the financial statements give a true and fair view of the financial position of the Ssangyong Company as of 31 December 2019 and of its financial performance and its cash flows for the year then ended in accordance with the Accounting Standards for Chinese Enterprises and the Accounting Regulation for Chinese Enterprises.

II. Basis of Issuing Audit Opinions

We conducted our audit in accordance with the Chinese Standards on Auditing for Certified Public Accountants (CPA). The "CPA's Responsibilities for the Audit of Financial Statements" part of the Audit Report further elaborates on our responsibilities under these standards. According to China Code of Professional Ethics for Certified Public Accountants, we are independent of Ssangyong Company and have performed our other responsibilities in respect of professional ethics. We believe the audit evidence we have obtained is sufficient and appropriate to provide the basis for our audit opinion.

III. Major Uncertainties Related to Continuous Operation

The key audit matters are matters that we consider to be the most important matters for the current audit of financial statements based on our professional judgment. These maters should be handled on the basis that we audit the financial statements and form our audit opinions. We will not express separate opinion on these matters. We confirm the following matters as the key audit matters that need to be communicated in the audit report.

1. Revenue recognition

1) Matter description

Ssangyong Company has operating income of 2,515,650.36 yuan, which is an important item of the its income statement. Therefore, we determine the authenticity and cut-off of main operating income as a key audit matter.

2) Audit procedures

The main audit procedures we implemented with regard to the authenticity and completeness of the main operating income include: ①Getting to know and testing the design and implementation of the Ssangyong Company's internal control system and financial accounting system for sales and fee collection; ② distinguishing the types of product sales, carrying out analytical review procedures taking into account the business segment information, industrial development situation and the actual situation of Ssangyong Company, and determining the reasonableness of sales revenue and changes in gross profit; ③Conducting details test, randomly checking the inventory records, receipt sheets confirmed by clients and other external evidencing documents, checking the fee collection records, seeking external confirmations for period-end accounts receivable, and auditing the authenticity of sales revenue; ④Randomly checking the big-amount incomes generated at the period start and end, and doing sales revenue cut-off test etc.

IV. Other Information

The management of the Ssangyong Company shall be responsible for other information. Other information includes the information covered in the annual report, but does not include the financial statements and our audit report.

Our audit opinion on the financial statements does not cover the other information and we do not express any form of authentication conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and to consider whether the other information is materially inconsistent with the financial statements or the information we obtained during the audit or if there is any major misstatement. We shall report truthfully if we determine that there is a material misstatement in the other information based on what we have done. We have nothing to report in this respect.

V. The Management's and the Governing Body's Responsibility for the Financial Statements

The management of the Ssangyong Company Limited (hereinafter referred to as "the management") is responsible for the preparation and fair presentation of these financial statements in accordance with the Accounting Standards for Business Enterprises, and be responsible for designing, implementing and maintaining necessary internal controls so that the financial statements are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management is responsible for assessing the Ssangyong Company's ability to continue as a going concern, disclosing matters related to continuous operation (if applicable), and applying the going-concern assumptions, unless the management plans to liquidate the Ssangyong Company, discontinue the operation or has no other feasible choices.

The governing body is responsible for overseeing the Ssangyong Company's financial reporting process.

VI. CPA's Responsibilities for the Audit of Financial Statements

Our goal is to obtain reasonable assurance as to whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report containing audit opinions. Reasonable assurance is a high level of assurance, but there is no guarantee that an audit performed in accordance with the auditing standards will always find out a material misstatement that exists. Misstatements can be caused by fraud or error. A misstatement is generally considered to be material if it is reasonably expected that the misstatement, alone or together with other misstatements, may affect the financial decisions made by users of the financial statements based on the financial statements.

In performing the audit in accordance with the auditing standards, we applied our professional judgment and kept our professional doubt. At the same time, we also did the following:

1. Identify and assess the risks of material misstatement in financial statements due to fraud or error, design and implement audit procedures to deal with these risks and obtain sufficient and appropriate audit evidence as the basis for expressing audit opinions. As a fraud may involve collusion, forgery, willful omission, misrepresentation or override of internal control, so the risk of not discovering a material misstatement due to fraud is higher than the risk of failing to detect a material misstatement resulting from an error.

2. Understand the internal control related to audit in order to design appropriate audit procedures, but not for the purpose of expressing an opinion on the effectiveness of internal control.

3. Appraise the appropriateness of the accounting policies selected by the management and the reasonableness of accounting estimates and related disclosures made by the management.

4. Draw conclusions for the management's use of the going-concern assumptions and at the same time, conclude based on the audit evidence obtained whether there is any material uncertainty about the matters or circumstances that may cast significant doubts on the Ssangyong Company's ability to continue as a going concern. If we conclude that there is a significant uncertainty, the auditing standards require us to draw the attention of users of the statements to the relevant disclosures in the financial statements in the audit report. If the disclosures are not sufficient, we shall issue a non-unqualified opinion. Our conclusion is based on the information available up to the date of the audit report. However, future events or circumstances may result in the Ssangyong Company's inability to continue as a going concern.

5. Evaluate the overall presentation, structure and content (including disclosures) of the financial statements and evaluate whether the financial statements fairly reflect the related transactions and matters.

6. Obtain adequate and appropriate audit evidence on the financial information of entities or business activities of the Ssangyong Company, so to express an audit opinion on the financial statements. We are responsible for directing, supervising and implementing the Group's audit and shall assume full responsibility for the audit opinions.

We communicated with the governing body on issues such as the scope of the audit, audit schedule and major audit findings, including the attention-worthy shortcomings of internal control that we identified in the audit.

We also provided statements to the governing body regarding the ethical requirements relating to independence that we have complied with and discussed with it relationships and other matters that may reasonably be regarded as affecting our independence, as well as related precautionary measures (where applicable).

From the matters communicated with the governing body, we determined which matters are most important to the audit of the current financial statements and made them the key audit matters. We will describe these matters in the audit report unless laws and regulations prohibit the public disclosure of these matters or, in rare circumstances, if it is reasonably foreseen that the negative consequences of communicating a certain matter in the audit report outweigh the public benefits created, then we will determine that the matter shall not be communicated in the audit report.

NOTES TO FINANCIAL STATEMENTS FOR 2019

I. Company Profile

Ssangyong Motor (Shanghai) Co., Ltd. ("Company") was funded and incorporated by Ssangyong Motor Company on December 2, 2003. The Company has obtained business license with registered number 913100007569738651 from Shanghai Administration for Industry and Commerce. The company registered in China (Shanghai) free trade area, 500 grams of ice road, room 1209, the Company has a registered capital of RMB30,000,000.00 and a paid-in capital of RMB30,000,000.00, and its legal representative is BYUNG TAE YEA.

In September 22, 2014 set up a Ssangyong Motor (Shanghai) Co., Ltd. Beijing branch, has been awarded by the Beijing Municipal Administration of industry and commerce registration number for the business license 911101053180612179.Company registered in Beijing City, Chaoyang District, 1701, 7th floor, section A, no. 203, zone 2, lizezhongyuan, wangjing,.

Operation scope of the Company: import and exclusive distribution (excluding retail) of SSANG YONG automobiles with authorization of Ssangyong Motor Company; wholesale, commission agent (excluding auction), import/export of auto parts, chemicals (excluding dangerous goods, specialty chemicals, and precursor chemicals), and metallic tools, for autos, textiles, and lubricants used for autos, as well as related marketing, technical support, training services, and supporting services; enterprise management consulting, economic information consulting, international trade within the Free Trade Zone, re-export trade, agent for trade between enterprises within the Free Trade Zone as well as trade within the Free Trade Zone, merchandized simple processing within the Free Trade Zone; and being agent for trade with non-Free-Trade-Zone-enterprises via domestic enterprises with import/export qualifications (not involving state-trading-goods; if involving any goods which require quota or license, application should be submitted as specified by competent regulations.) (If involving any goods which require administrative license, operate with relevant licenses).

II. Circumstances not Meeting the Prerequisites of Accounting

The Company has no circumstances that do not meet the prerequisites of accounting.

III. Main Accounting Policies and Accounting Estimates

1. Accounting standards and accounting system

The Company adopts the Accounting Standards for Business Enterprises.

2. Fiscal year

The fiscal year of Company runs from January 1 to December 31 of each calendar year.

3. Bookkeeping currency

The Company's functional currency is Renminbi (RMB). All amounts disclosed in Proforma Indian Rupees are Renminbi converted against a currency rate of Rupees(INR) 10.21=RMB 1.00.

4. Accounting basis and pricing principles

The Company takes the accrual basis as the bookkeeping basis, adopts the debit-credit bookkeeping method and takes the actual cost as the pricing principle.

5. Foreign currency businessaccounting and translation method

Financial operations involving foreign currencies in the fiscal year shall be translated to RMB at the central parity of the exchange rate prevailing in the foreign exchange market at the beginning of the month in which such transaction occurs. At the end of the month, the balance in the foreign currency account is adjusted to the bookkeeping currency based on the central parity of the exchange rate prevailing in the foreign exchange market at the end of the month. The difference between the reconciled bookkeeping currency balance and the original account balance is included in the financial cost - foreign exchange gains and losses or exchange gains and losses during the preparatory period.

6. Determination standards of cash equivalents

(1) Cash is the company's cash on hand and deposits that can be used for payment at any time, including cash, bank deposits and other monetary funds that can be used for payment at any time.

(2) Cash equivalents are short-term (usually due within three months from the date of purchase) and highly liquid investments held by the Company that are easily convertible into known amounts of cash and which are subject to a small risk of changes in value.

7. Accounts receivable and prepayments

Accounts receivable and prepayments refer to the creditor's rights occurred by small enterprises in their daily production and operation activities. The actual amount of accounts receivable and prepayments shall be recorded.

Where accounts receivable and prepayments of the Company meet any of the following conditions, the uncollectible accounts receivable and prepayments after deducting the recoverable amount shall be recognized as bad debt losses:

(I) The debtor declares bankruptcy, shutdown, dissolution or is revoked according to law, or its business license is legally cancelled or revoked and its liquidation property is insufficient to repay the debts.

(II) The debtor dies, or is declared missing or dead according to law and its property or estate is insufficient to repay the debts.

(III) The debt is overdue for 3 years or longer and there's exact evidence showing that the debtor is insolvent.

(IV) It is impossible to demand payment of the debt after a debt reorganization agreement is reached with the debtor or after the court approves the bankruptcy restructuring plan.

(V) The debt is unrecoverable because of natural disasters, wars and other force majeure.

(VI) Other conditions as prescribed by the finance and tax administrative department of the State Council.

8. Inventory accounting method

The Company's inventories include: goods in process etc.

The perpetual inventory system is adopted for stocktaking.

Pricing method for inventory acquisition and issue: raw materials and fuels purchased shall be measured at the actual cost. The cost of obtaining inventory through further processing includes direct material and direct labor cost, and manufacturing costs that are allocated according to a certain method.

The Company uses the individual valuation method to determine the actual cost of inventories issued.

For non-replaceable inventories, inventories purchased or manufactured for specific projects and services provided, their costs are determined by the specific identification method.

Revolving materials will be accounted by the one-off write-off method and will be included into production cost or current profit and loss at the time of requisition and use; revolving materials of high value can also be accounted by the amortization method. The cost of leased or lent revolving materials needs not be carried over, but shall be recorded for future reference.

In case of damage to inventories, the disposal income, the recoverable liability compensation and insurance indemnity, net of costs and related taxes and fees, shall be included in the proceeds from disposal of assets.

9. Fixed assets pricing and depreciation method

(1) Standards for the recognition of fixed assets

Fixed assets of the Company refer to housings, buildings, machines, machinery, transportation vehicles and other equipment, appliances and tools related to operation and production which have a useful life of more than one year. Goods not included as major production and operation equipment but with a unit value of more than 2,000 yuan and an useful life of more than 2 years, shall also be regarded as fixed assets.

(2) Fixed assets pricing and depreciation method

Fixed assets of the Company are priced at the actual cost at which they are acquired and are depreciated using the straight-line method.

Depreciation life and yearly depreciation rate are respectively determined by categories of fixed assets, estimated economic useful life and estimated net residual value rate as follows:

Category of fixed assets	Estimated net residual value rate (%)	Estimated useful life (years)	yearly depreciation rate (%)
Office equipment	10.00	5	18.00
Transportation equipment	10.00	5	18.00

Reconstruction expenditures for fixed assets are included in the cost of fixed assets. However, the reconstruction expenditures for fixed assets that have been fully depreciated and are rented through operating lease shall be included in long-term deferred expenses.

At the disposal of fixed assets, the disposal proceeds net of the book value, related taxes and fees and clean-up costs shall be included in asset disposal income.

10. Revenue recognition principle

Revenue from sales of goods will be recognized when the significant risks and rewards of ownership of the goods have been transferred to the buyer, when the Company no longer has the right of continuous management and actual control of the goods, the economic benefits related to the transaction are likely to flow into the enterprise, and the revenue and costs related to the sale of goods can be reliably measured.

When the labor service provided by the Company is started and completed in the same fiscal year, the business income will be recognized when the labor service has been provided, the price has been received or the evidence proving the receipt of price has been obtained. When the labor service starts and completes in different fiscal years, the business income will be recognized by the percentage of completion method when the total income of labor contracts and the degree of completion of labor services can be reliably determined, when the transaction-related money can flow in, and the costs already incurred and the cost to be incurred for the completion of labor services can be reliably measured.

The interest income and royalty income obtained by the Company from transferring the right to use assets shall be recognized when the economic benefits related to the transaction can flow into the enterprise and the amount of income can be reliably measured.

11. Lease accounting method

The Company divides leases into financial lease and operating lease.

In the case of a finance lease, the Company (the lessee) will on the lease commencement date, take the lower of the original carrying amount of the leased asset on the lease commencement date and the present value of the minimum lease payment as the entry value of the leased asset, take the minimum lease payment as the entry value of long-term payables and record the difference between the two as the unrecognized financing costs.

In the case of operating leases, rentals for operating leases are recognized as an expense on a straight-line basis over each period of the lease term. Any other methods that are more reasonable may be adopted.

12. Accounting method of income tax

Income tax of the Company is accounted by the taxes payable method and will be levied according to the taxable income and the applicable tax rate.

13. Government subsidies

For purpose of the Company, government subsidies refer to governments' assistance by transferring resources to the Company so that the Company shall in turn conduct its business activities under certain conditions in the past or in the future.

Government subsidies are recognized when all of the following conditions are met:

(1) The company meets the additional conditions for government subsidies;

(2) The company can receive subsidies.

14. Profit distribution method

The Company's net profit realized in the current period is distributed in the following order:

Make up the annual losses of previous years;

Withdrawal of statutory surplus reserve;

Withdrawal of discretionary surplus reserve;

Profit payable to shareholders.

IV. Taxes

Tax type	Tax rate	Description
VAT	6.00%	VAT payable
Urban maintenance and construction tax	1.00%	Turnover tax payable
Educational surcharges	3.00%	Turnover tax payable
Watercourse management fee	1.00%	Turnover tax payable

To the General Meeting of Ssangyong European Parts Center B.V.

REPORT ON THE FINANCIAL STATEMENTS 2019 INCLUDED IN THE ANNUAL ACCOUNTS

Our opinion

We have audited the financial statements 2019 of Ssangyong European Parts Center B.V., based in Breda, The Netherlands.

In our opinion the financial statements included in these annual accounts give a true and fair view of the financial position of Ssangyong European Parts Center B.V. as at 31 December 2019, and of its result for 2019 in accordance with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

1. The balance sheet as at 31 December 2019.
2. The income statement for 2019.
3. The cash flow statement for 2019.
4. The notes to the financial statements comprising a summary of the accounting policies and other explanatory information.

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the "Our responsibilities for the audit of the financial statements" section of our report.

We are independent of Ssangyong European Parts Center B.V. in accordance with the Wet toezicht accountantsorganisaties (Wta, Audit firms supervision act), the Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in The Netherlands. Furthermore we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of the impact of the coronavirus

The coronavirus also impacts Ssangyong European Parts Center B.V. Management disclosed the current impact and her plans to deal with these events or circumstances under chapter 8 'Events after the balance sheet date' on page herein of the financial statements. Management indicates that it is currently not possible for them to properly estimate the impact of the Coronavirus on the financial performance and health of Ssangyong European Parts Center B.V. Our opinion is not modified in respect of this matter.

REPORT ON THE OTHER INFORMATION INCLUDED IN THE ANNUAL ACCOUNTS

In addition to the financial statements and our auditor's report, the annual accounts contain other information that consists of:

- The directors' report
- Other information as required by Part 9 of Book 2 of the Dutch Civil Code

Based on the following procedures performed, we conclude that the other information:

- Is consistent with the financial statements and does not contain material misstatements.
- Contains the information as required by Part 9 of Book 2 of the Dutch Civil Code.

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements.

By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of the procedures performed is substantially less than the scope of those performed in our audit of the financial statements.

Management is responsible for the preparation of other information, including the directors' report in accordance with Part 9 of Book 2 of the Dutch Civil Code, and the other information as required by Part 9 of Book 2 of the Dutch Civil Code.

DESCRIPTION OF RESPONSIBILITIES FOR THE FINANCIAL STATEMENTS

Responsibilities of management for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Part 9 of Book 2 of the Dutch Civil Code. Furthermore, management is responsible for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

As part of the preparation of the financial statements, management is responsible for assessing the company's ability to continue as a going concern. Based on the financial reporting framework mentioned, management should prepare the financial statements using the going concern basis of accounting unless management either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

Management should disclose events and circumstances that may cast significant doubt on the company's ability to continue as a going concern in the financial statements.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit assignment in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not have detected all material errors and fraud during our audit.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgment and have maintained professional skepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. Our audit included e.g.:

- Identifying and assessing the risks of material misstatement of the financial statements, whether due to fraud or error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Concluding on the appropriateness of management's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluating the overall presentation, structure and content of the financial statements, including the disclosures.
- Evaluating whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identified during our audit.

Eindhoven, 25 March 2020

Deloitte Accountants B.V.

NOTES TO THE FINANCIAL STATEMENTS

1 General information

1.1 *The Company*

Ssangyong European Parts Center B.V., with registration number 20128617 in The Netherlands Chamber of Commerce Commercial Register, located at IABC 5253-5254, 4814 RD, Breda ("the Company", hereinafter) is a limited liability company, having its official seat in Breda.

The Company was incorporated as a 100% subsidiary of Ssangyong Motor Company, 455-12 Dongsak-ro, Pyungtaek-si, Gyeonggi-do in Korea ("SYMC", hereinafter) with its principal capital of Euro 700,000 on 12 December 2006. Since early 2011, the majority of the shares of SYMC has been acquired by Mahindra & Mahindra Ltd. in India. Accordingly, the financial information of the Company has been included in the consolidated financial information of SYMC and Mahindra & Mahindra Ltd., the ultimate parent company.

SYMC is an automotive manufacturing company in Korea with its products of SUVs (sports utility vehicles) and a large-sized sedan, one of its main export markets has been Western-Europe since 2002.

1.2 *Activities*

As of 31 December 2019, the Company is distributing the spare parts to 27 distributors through its outsourced warehouse facilities in Breda. The Company's activity is to provide logistics and administrative support services including reinvoicing activities to SYMC for its distribution of spare parts to the distributors in Europe, who have an exclusive distributorship of SYMC's products respectively by country. Accordingly, all spare parts handled by the Company come from SYMC.

The Company's services are performed in accordance with the service agreement between SYMC and the Company, which in effect as of 1 January 2016. Based on the agreement, SYMC compensates the Company for its local operational cost, including a profit mark-up using a certain fixed rate based on the Company's sales to distributors, which is known as the Return On Sales Method.

The remuneration in the above is acknowledged to be an arms' length remuneration for the Company's services to SYMC, through the Advance Pricing Agreement settled into by the Company and the Dutch tax authorities, on 28 April 2016 with a validity retroactive 1 January 2016.

1.3 *Use of estimates*

The financial statements require management to make estimates and assumptions that affect the reported amount of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial report, and the reported amounts of revenues and expenses during the reporting period. Estimates include those required in the valuation of inventories and accounting of provisions. Of particular importance are the estimates involved for the valuation of the inventory in relation to the provision. On the basis of the expected turnover rate and taking into account the individual assessment of inventories the provision is measured. The assumptions used as the basis for the estimates are based on the current level of management's knowledge of the future developments and plans.

1.4 *Support parent company*

In view of the negative equity and negative working capital balances the continuation of the Company's operation might be dependent on the financial support of the parent company. In connection with this Ssangyong Motor Company, parent of Ssangyong European Parts Center B.V., has confirmed that it will provide the necessary financial support to Ssangyong European Parts Center B.V. to enable it to operate as a going concern and to meet its financial obligations for the approximate 12 months period after the date of these financial statements and confirmed that it has the financial resources to fulfil that commitment.

2 Accounting policies for the balance sheet

2.1 *General information*

The financial statements are prepared according to the stipulations in chapter 9 Book 2 of The Netherlands Civil Code.

Valuation of assets and liabilities and determination of the result takes place under the historical cost convention. Unless presented otherwise at the relevant principle for the specific balance sheet item, assets and liabilities are valued according to the cost model.

Income and expenses are accounted for on accrual basis. Profit is only included when realized on the balance sheet date. Losses originating before the end of the financial year are taken into account if they have become known before preparation of the financial statements.

The financial information is denominated in Euros.

2.2 *Related party transactions*

In the ordinary course of business the Company purchases approximately 99% of its products from affiliated parties. The Company is furthermore financed by an intercompany payable, reference is made to note 5.7.

2.3 *Prior-year comparison*

The accounting policies have been consistently applied to all the years presented, if not specifically stated otherwise.

2.4 *Foreign currencies*

Receivables, liabilities and obligations denominated in foreign currencies are translated against the exchange rates prevailing at balance sheet date. Transactions in foreign currencies during the financial year are recognised in the financial statements against the exchange rates prevailing at transaction date. The exchange differences resulting from the translation as of balance sheet date, are recorded in income statement.

Transactions, receivables and debts

Foreign currency transactions in the reporting period are translated into the functional currency using the exchange rates prevailing at the dates of the transactions.

Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the rate of exchange prevailing at the balance sheet date. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates are recognised in the income statement.

Translation differences on non-monetary assets held at cost are recognised using the exchange rates prevailing at the dates of the transactions.

2.5 *Financial instruments*

Financial instruments be both primary financial instruments, such as receivables and payables, and financial derivatives. The notes to the specific items of the balance sheet disclose the fair value of the related instrument if this deviates from the carrying amount. If the financial instrument is not recorded in the balance sheet the information on the fair value is disclosed in the notes to the "Contingent rights and obligations." For the principles of primary financial instruments, in case applicable, reference is made to the treatment per balance sheet item.

2.6 *Intangible fixed assets*

Intangible fixed assets are presented at cost less accumulated amortisation. Amortisation is charged as a fixed percentage of cost, as specified in more detail in the notes to the balance sheet. The useful life and the amortisation method are reassessed at the end of each financial year.

2.7 *Tangible fixed assets*

Property, plant and equipment are stated at cost less accumulated depreciation and impairment and are depreciated over their estimated useful lives on a straight line basis. Ordinary maintenance and repairs are expensed as incurred.

Property, plant and equipment are depreciated over their estimated useful lives as from the inception of their use. Future depreciation and amortisation is adjusted if there is a change in estimated useful life.

2.8 *Impairment of assets*

On balance sheet date, the company tests whether there are any indications of an asset, which could be subject to impairment. If there are such indications, the company estimates the recoverable amount of the asset conceded. If this is not possible, the recoverable amount of the cash-generating unit to which the asset belongs, is identified. An asset is subject to impairment if its book value exceeds its recoverable value; the recoverable value is the higher of the value in use and the fair value less costs to sell.

Impairment is recognized as an expense in the profit and loss account immediately, unless the asset is carried at the revalued amount; in that case, the impairment is treated as a revaluation decrease.

2.9 *Inventories*

Inventories are stated at the lower of acquisition price and net realisable value. Direct cost of freight are included in the acquisition price. The valuation is based on weighted average prices. Net realisable value is based on the estimated selling price in the ordinary course of business, less applicable variable selling expenses. A provision is made for obsolete inventories by individual assessment of inventories, where considered necessary.

2.10 *Receivables*

Upon initial recognition the receivables are included at fair value and then valued at amortised cost. The fair value and amortized cost equal the face value. Any provision for doubtful accounts deemed necessary is deducted. These provisions are determined by individual assessment of the receivables.

2.11 *Cash and cash equivalents*

Cash and cash equivalents include cash in hand, bank balances and deposits held at call with maturities of less than 12 months. Cash and cash equivalents are stated at face value.

2.12 *Provisions*

Provisions are recognised for legally enforceable or constructive obligations existing at the balance sheet date, the settlement of which is probable to require an outflow of resources whose extent can be reliably estimated. Provisions are measured on the basis of the best estimate of the amounts required to settle the obligations at the balance sheet date. Unless indicated otherwise, provisions are stated at the present value of the expenditure expected to be required to settle the obligations.

2.13 *Short term Liabilities*

Upon intial recognition, liabilities recorded are stated at fair value and then valued at amortized costs.

3 Accounting policies for the income statement

3.1 *Net turnover*

Net turnover represents amounts invoiced for goods and services supplied during the financial year reported on, net of discounts and value added taxes.

Revenues ensuing from the sale of goods are accounted for when all major entitlements to economic benefits as well as all major risks have transferred to the buyer. The cost price of these goods is allocated to the same period.

3.2 *Cost of sales*

Cost of sales represents the direct and indirect expenses attributable to net turnover.

3.3 *Selling, General and Administrative expenses*

Selling, General and Administrative expenses are recognised at the historical cost convention that are not directly attributable to the cost of the goods sold, and are allocated to the reporting year to which they are related. Selling expenses are related to various communication activities for the Company's logistics and administrative support services. General and Administrative expenses include the employee benefits, depreciations, outsourcing cost and other general cost.

Salaries, wages and social security contributions are taken to the income statement based on the terms of employment, where they are due to employees.

Employee benefits:

The pension plans are financed through contributions to pension providers such as insurance companies. The pension obligations are valued according to the 'valuation to pension fund approach'. This approach accounts for the contribution payable to the pension provider as an expense in the profit and loss account.

Based on the administration agreement it is assessed whether and, if so, which obligations exist in addition to the payment of the annual contribution due to the pension provider as at balance sheet date. These additional obligations, including any obligations from recovery plans of the pension provider, lead to expenses for the company and are included in a provision on the balance sheet.

A pension receivable is included in the balance sheet when the company has the right of disposal over the pension receivable and it is probable that the future economic benefits which the pension receivable holds will accrue to the Company and the pension receivable can be reliably established. As at year-end 2019 (and 2018) no pension receivables and no obligations existed for the company in addition to the payment of the annual contribution due to the pension provider.

The pension rights of each employee are based upon the employee's average salary during employment. The maximum salary for base pension in 2019 amounts to Euro 107,593 and in 2018 Euro 105,075, in 2019 the franchise amounts to Euro 14,770 and in 2018 Euro 14,297. Pension for employees with a salary above the maximum salary for base pension is covered by the so called excedent pension scheme without a maximum.

3.4 *Finance income and costs*

Interest paid and received

Interest paid and received is recognised on a time-weighted basis, taking account of the effective interest rate of the assets and liabilities concerned. When recognising interest paid, allowance is made for transaction costs on loans received.

3.5 *Income tax expense*

Income tax is calculated on the result before tax in the income statement, taking into account any losses carried forward from previous financial years where not included in deferred income tax assets and tax exempt items, and plus non deductible expenses. Account is also taken of changes in deferred income tax assets and liabilities owing to changes in the applicable tax rates.

3.6 *Principles for preparation of the cash flow statement*

The cash flow statement is prepared according to the indirect method.

The funds in the cash flow statement consist of cash and cash equivalents. Cash equivalents can be considered as highly liquid investments.

Cash flows in foreign currencies are translated at an estimated average rate. Exchange rate differences concerning finances are shown separately in the cash flow statement.

Corporate income taxes, issuance of share capital, interest received and dividends received are presented under the cash flow from operating activities. Interest paid and dividends paid are presented under the cash flow from financing activities.

Transactions that do not result in exchange of cash and cash equivalents, such as financial lease, are not presented in the cash flow statement. The payment of lease terms on account of the financial lease contract is considered as an expenditure of financing activities as far as it concerns redemptions and as an expenditure of operational activities as far as it concerns interest.

4 Risk management

4.1 *Currency risk*

The Company is mainly active in the European Union and all receivables and payables are denominated in Euro. Accordingly, the currency risk is not hedged.

4.2 *Interest rate risk*

The Company is exposed to interest rate risk mainly on the interest-bearing cash at bank. The company is exposed to the consequences of variable interest rates on cash at bank. The company has not entered into any derivative contracts to hedge the interest risk on assets or liabilities.

4.3 *Liquidity risk and cash flow risk*

The Company periodically prepares liquidity budgets. Liquidity risks are controlled through interim monitoring and possible adjustments.

4.4 *Credit risk*

The Company mitigates the credit risk through credit limits for each financial institution and debtors by exclusively engaging financial institutions and debtors with a high creditworthiness. No significant concentrations of credit risk existed as at balance sheet date.

5 Notes to the balance sheet

5.1 *Intangible fixed assets*

	ERP System	Total
	Euro	Euro
At 1 January 2019		
Cost	96,109	96,109
Accumulated depreciation	(96,109)	(96,109)
Carrying amount	0	0
Movements		
Investments	0	0
Depreciation	0	0
Carrying amount	0	0
At 31 December 2019		
Cost	96,109	96,109
Accumulated depreciation	(96,109)	(96,109)
Carrying amount	0	0
Depreciation rate	33%	33%

The Company has been developing its own ERP system.

5.2 *Tangible fixed assets*

Movements in property, plant and equipment can be broken down as follows:

	Office equipment	Total
	Euro	Euro
At 1 January 2019		
Cost	75,775	75,775
Accumulated depreciation	(70,125)	(70,125)
Carrying amount	5,650	5,650
Movements		
Investments	8,212	8,212
Depreciation	(3,195)	(3,195)
Carrying amount	5,017	5,017
At 31 December 2019		
Cost	83,987	83,987
Accumulated depreciation	(73,320)	(73,320)
Carrying amount	10,667	10,667
Depreciation rate	20%	20%

5.3 *Inventories*

	31-12-2019	31-12-2018
	Euro	Euro
Goods for resale	8,966,060	8,085,472
Less: provision	(1,990,009)	(1,785,781)
	6,976,051	6,299,691

In the Goods for resale an amount of Euro 875,424 (2018: Euro 1,424,224) is included related to Goods in transit. There has been no significant scrapping of inventories in 2019 and 2018; the impact to the Profit & Loss amounted to around Euro 0 in 2019 and around Euro 87 in 2018. In relation to the Company's outsourcing contract described all inventories above are provided as collateral for the outsourced parties.

5.4 *Receivables*

	31-12-2019	31-12-2018
	Euro	Euro
Trade receivables	799,514	852,679
Other receivables, including prepayments	110,231	114,319
	909,745	966,998

Receivables in the above fall due in less than one year and the fair value of the receivables approximates the book value.

Other receivables

	31-12-2019	31-12-2018
	Euro	Euro
V.A.T.	74,757	63,848
Prepayments	33,368	48,355
Corporation income tax to receive	0	0
Others	2,106	2,116
	110,231	114,319

5.5 *Cash and cash equivalents*

All cash and cash equivalents are available on demand.

5.6 *Shareholder's equity*

	Issued share capital	Retained earnings (accumulated deficit)	Result for the year	Total
	Euro	**Euro**	**Euro**	**Euro**
At 1 January 2018	700,000	(3,476,122)	113,699	(2,662,423)
Changes				
Profit(loss) appropriation	0	113,699	(113,699)	0
Profit(loss) for the year	0	0	120,927	120,927
At 31 December 2018	700,000	(3,362,423)	120,927	(2,541,496)
Changes				
Profit(loss) appropriation	0	120,927	(120,927)	0
Profit(loss) for the year	0	0	125,524	125,524
At 31 December 2019	700,000	(3,241,496)	125,524	(2,415,972)

The authorised share capital of Ssangyong European Parts Center B.V. amounts to Euro 3,500 thousand, divided by 35 thousand ordinary shares of Euro 100 each. Out of the authorised shares, 7 thousand ordinary shares, equivalent of Euro 700 thousand, have been issued and paid-in.

5.7 *Current liabilities*

	31-12-2019	31-12-2018
	Euro	Euro
Payable to SYMC, the parent company	**10,801,155**	10,515,937
Accounts payable	**251,409**	205,334
Corporation income tax to pay	**5,156**	1,333
Wage tax to pay	**55,441**	30,491
Other debts, accruals and deferred income	**88,960**	54,601
	11,202,121	10,807,696

Payable to the parent company consists of trade payable for goods purchased and no interest is charged.

5.8 *Remuneration of directors*

In 2019 an amount of approximately Euro 265 thousand and for 2018: Euro 260 thousand for the remuneration of directors of the legal entity was charged to the company.

5.9 *Commitments*

On 11 November 2011, the Company settled with Pantos Logistics Benelux B.V. into a 5 year service agreement including the work-scope of warehousing and warehousing management system only and which has been renewed on 25 October 2016 for another 5 years with reduced fixed- but increased variable rates.

In accordance with the new service agreement, the total fee committed by the Company amounts to
Euro 3,108 thousand as of 31 December 2019 of which:
Euro 1,540 thousand is due within 1 year,
Euro 1,568 thousand is due within 2 to 5 years

With respect to the outsourcing fee, the fees are recognized on an accrual basis as General and Administrative expenses in the income statement.

The fees for 2019 and 2018 amounted to Euro 1,562 thousand and Euro 1,370 thousand respectively.

Total commitments in connection with operational lease- and other contractual agreements amounts to approximately Euro 144 thousand of which:
Euro 91 thousand is due within 1 year,
Euro 53 thousand is due within 2 to 5 years

6 Notes to the Income statement

6.1 *Revenue*

	2019	2018
	Euro	Euro
The Netherlands	**245,064**	186,195
European Union countries	**13,094,861**	12,767,022
Non European Union countries	**1,819,250**	1,863,084
Total parts sales	**15,159,175**	14,816,301

6.2 *Employee benefits*

	2019	2018
	Euro	Euro
Salaries and wages	**564,025**	491,252
Social security contributions	**72,036**	70,027
Other personnel expenses	**108,693**	110,675
	744,754	671,954

The above employee benefits expense is included in General and Administrative expenses.

Included in the social security charges for 2019 is an amount of Euro 18,123 and for 2018: Euro 18,358 with respect to pension costs.

6.3 *Financial income and expenses*

	2019	2018
	Euro	Euro
Interest and similar income	**(164)**	0
Bank cost and similar expense (incl. bank charges)	**(11,071)**	(10,745)
	(11,235)	(10,745)

6.4 *Income taxes*

The effective tax rate of 19.3% does not significantly differ from the nominal tax rate in The Netherlands.

6.5 *Average number of employees*

During the year 2019, the average number of employees, based on full time equivalents, was around 7 (2018: 7) all employed in the logistic services. There was no employee outside The Netherlands in 2019 and 2018, respectively.

6.6 *Other Operational Expenses*

Fees Audit Firm

	2019	2018
	Euro	Euro
Audit of the financial statements	**38,063**	38,131
Tax advisory services	**2,250**	2,250
Other non-audit services	**0**	0
	40,313	40,381

The above mentioned audit fees concern the fees of the auditor, Deloitte Accountants B.V., and are based on the costs of the complete examination of the annual accounts of the related financial years. The tax advisory services concern the fees of Deloitte Tax Advisors in relation to the preparation and filing of the corporate income tax return and relevant country by country reports of the related financial years.

7 Appropriation of result

7.1 *Appropriation of the result for the financial year 2018*

The annual report 2018 is determined in the General Meeting. The General Meeting, held on 03 June 2019, has determined the appropriation of the result in accordance with the proposal being made to that end.

7.2 *Proposed appropriation of the result for the financial year 2019*

The statutory directors propose that the result for the financial year 2019 amounting to Euro 125,524 should be transferred to reserves without payment of dividend.

The financial statements do not yet reflect this proposal.

8 Events after the balance sheet date

As per 29 February 2020 one of our managing directors left SYMC. Currently no formal successor is appointed.

Impact of COVID-19 Virus

As stated in the directors report the world has changed significantly after the balance sheet date of 31 December 2019 as a result of the COVID-19 Virus. The Corona or COVID-19 virus situation has and will create more difficulties in daily business. Some or more countries are in lock down or have closed borders although transportation of goods is still possible.

Although no single company or government has the answer or solution to the current situation or what may be the result if all companies and people should work together as much as possible.

The management is recognizing the following new risks to the company's business:

- More people attracting the virus globally resulting in reduced or no orders/ transportation
- Further restrictions to people movement and border closures globally resulting in reduced or no orders/transportation
- Cash flow risk due to a possible reduced number of orders and/or possibly distributors/dealers inability to fulfill payment obligations due to problems they are/will be facing
- Employees at SYMC or the third party logistics provider falling ill possibly causing warehouse operations to slow down or stop resulting in a shortage in spare parts availability/ sale ability
- Illness of SEPC's own personnel resulting in less administrative support of the spare parts business or even payments delays

The Dutch Government has announced that they will support businesses with several measures including:

- the possibility to guarantee loans for business,
- take over up to 90% of the wages costs if turnover has fallen/will fall > 20% since March 1, 2020
- postponement of having to pay taxes

These countermeasures will be available for 3 months and might be extended for 6 months.

Although these programs will help companies in the Netherlands the company is also planning to or has been implementing the following risks mitigation measures on its own and in cooperation with SYMC:

- If needed SEPC will apply for the support measurements offered by the Netherlands Government
- SEPC will ensure it has the funds readily available to meet its obligations as far and as long as possible by implementing a safety buffer amount in the bank and if needed obtain a loan from SYMC and/or bank(s) with or without the Netherlands Government guarantee
- If needed SEPC will request the Government for a postponement in paying wage taxes
- If needed SEPC will request the third party logistics provider to secure a postponement in the warehouse rent payments as hinted to building owners in general by the government
- SEPC will closely monitor the availability of spare parts inbound wise as well as outbound wise and will adjust its purchasing volumes accordingly and SYMC will do the same and spread the sourcing if possible in order to ensure the continuation of parts supply
- To prevent a shortage of staff if some or more employees fall ill cross training has taken place so employees can take over daily tasks from each other
- If authorized persons fall ill and/or are not able to authorize payments etc. the treasury department in SYMC can instruct the bank to make the payments
- All SEPC personnel now have the tools and capability to work- and access all necessary systems from home or any other secure place if needed

With the financial support of the parent company and mitigating measures to support us we have good faith that this current situation will not threaten our existence in the end and we will overcome this difficult situation.

Signing of the financial statements

Breda, 25 March 2020

Statutory director,

S.T. Yang

Ssangyong European Parts Center B.V.

IABC 5253-5254

4814RD, Breda

OTHER INFORMATION

Independent Auditor's Report

Reference is made to the auditor's report as included hereinafter.

Statutory rules concerning appropriation of result

According to Article 15, paragraph 2 of the Company's Articles of Association the profits, if any, are at the disposal of the General Meeting. The Company may distribute profits only if and to the extent that its shareholders equity is greater than the sum of the paid and called up part of the issued capital and the reserves which must be maintained by virtue of the law.

INDEPENDENT AUDITOR'S REPORT

(English Translation of a Report Originally Issued in Korean)

To the Shareholders and Board of Directors of
SY Auto Capital Co., Ltd.

Opinion

We have audited the accompanying financial statements of SY Auto Capital Co., Ltd. (the Company), which comprise the statements of financial position as at December 31, 2019 and 2018, and the statements of comprehensive income, statements of changes in equity and statements of cash flows for the years then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of SY Auto Capital Co., Ltd. as at December 31, 2019 and 2018, and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards as adopted by the Republic of Korea (Korean IFRS).

Basis for Opinion

We conducted our audits in accordance with Korean Standards on Auditing. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the ethical requirements of the Republic of Korea that are relevant to our audit of the financial statements and we have fulfilled our other ethical responsibilities in accordance with the ethical requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Other Matters

The accompanying financial statements as at and for the years ended December 31, 2019 and 2018, have been translated into Indian rupee on the basis set forth in Note 2.3 to the financial statements solely for the convenience of the reader.

Auditing standards and their application in practice vary among countries. The procedures and practices used in the Republic of Korea to audit such financial statements may differ from those generally accepted and applied in other countries.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with Korean IFRS, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Korean Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with Korean Standards on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Seoul, Korea
February 28, 2020

This report is effective as of February 28, 2020, the audit report date. Certain subsequent events or circumstances, which may occur between the audit report date and the time of reading this report, could have a material impact on the accompanying financial statements and notes thereto. Accordingly, the readers of the audit report should understand that there is a possibility that the above audit report may have to be revised to reflect the impact of such subsequent events or circumstances, if any.

1. The Company

SY Auto Capital Co., Ltd. (the "Company") was established in October 28, 2015, and was registered with the Financial Services Commission under the Specialized Credit Financial Business Act on December 8, 2015. The Company engages in facility leasing and installment financing business. As at December 31, 2019, the Company's share capital amounts to ₩20,000 million. The main office is located in 455-12 Dongsak-ro, Pyeongtaek-si, Gyeonggi-do, Korea.

The Company's shareholders and their respective percentage of ownership as at December 31, 2019, are as follows.

	Number of shares owned	Percentage of ownership (%)
Ssangyong Motor Co., Ltd.	2,040,000	51.00
KB Capital Co., Ltd.	1,960,000	49.00
	4,000,000	100.00

2. Significant Accounting Policies

The significant accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

2.1 Basis of Preparation

The Company maintains its accounting records in Korean won and prepares statutory financial statements in the Korean language ("Hangeul") in accordance with International Financial Reporting Standards as adopted by the Republic of Korea ("Korean IFRS"). The accompanying financial statements have been condensed, restructured and translated into English from the Korean language financial statements.

Certain information attached to the Korean language financial statements, but not required for a fair presentation of the Company's financial position, financial performance or cash flows, is not presented in the accompanying financial statements.

The financial statements of the Company have been prepared in accordance with Korean IFRS. These are the standards, subsequent amendments and related interpretations issued by the International Accounting Standards Board ("IASB") that have been adopted by the Republic of Korea.

The financial statements have been prepared on a historical cost basis, except for the following:

– Certain financial assets and liabilities (including derivative instruments), certain classes of property and equipment and investment property – measured at fair value
– assets held for sale – measured at fair value less costs to sell, and
– defined benefit pension plans – plan assets measured at fair value.

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise judgment in applying the Company's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 3.

2.2 Changes in Accounting Policies and Disclosure

2.2.1 New and amended standards adopted by the Company

The Company has applied the following standards and amendments for the first time for their annual reporting period commencing January 1, 2019.

(a) *Enactment of Korean IFRS 1116 Leases*

Under the new standard, with implementation of a single lease model, lessee is required to recognize assets and liabilities for all lease which lease term is over 12 months and underlying assets are not low value assets. A lessee is required to recognize a right-of-use asset and a lease liability representing its obligation to make lease payments.

With implementation of Korean IFRS 1116 Lease, the Company has changed accounting policy. The Company has adopted Korean IFRS 1116 retrospectively, as permitted under the specific transitional provisions in the standard, and recognized the cumulative impact of initially applying the standard as at January 1, 2019, the date of initial application. The Company has not restated comparatives for the 2018 reporting period. The impact of the adoption of the leasing standard and the new accounting policies are disclosed in Note 25.

(b) *Amendment to Korean IFRS 1109 Financial Instruments – Prepayment Features with Negative Compensation*

The narrow-scope amendments made to Korean IFRS 1109 Financial Instruments enable entities to measure certain prepayable financial assets with negative compensation at amortized cost. When a modification of a financial liability measured at amortized cost that does not result in the derecognition, a modification gain or loss shall be recognized in profit or loss. The amendment does not have a significant impact on the financial statements.

(c) *Amendments to Korean IFRS 1019 Employee Benefits – Amendment, Curtailment or Settlement of the Plan*

The amendments require that an entity shall calculate current service cost and net interest for the remainder of the reporting period after a plan amendment, curtailment or settlement based on updated actuarial assumptions from the date of the change. The amendments also require that a reduction in a surplus must be recognized in profit or loss even if that surplus was not previously recognized because of the impact of the asset ceiling. The amendment does not have a significant impact on the financial statements.

(d) *Amendments to Korean IFRS 1028 Investments in Associates and Joint Ventures – Long-term Interests in Associates and Joint Ventures*

The amendments clarify that an entity shall apply Korean IFRS 1109 to financial instruments in an associate or joint venture to which the equity method is not applied. The amendments also clarify that Korean IFRS 1109 requirements are applied to long-term interests that form part of the entity's net investment in an associate or joint venture before applying the impairment requirements of Korean IFRS 1028. The amendment does not have a significant impact on the financial statements.

(e) *Enactment to Interpretation of Korean IFRS 2123 Uncertainty over Income Tax Treatments*

The Interpretation explains how to recognize and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment, and includes guidance on how to determine whether each uncertain tax treatment is considered separately or together. It also presents examples of circumstances where a judgement or estimate is required to be reassessed. The enactment does not have a significant impact on the financial statements.

(f) *Annual Improvements to Korean IFRS 2015 – 2017 Cycle:*

– Amendments to Korean IFRS 1103 *Business Combination*

The amendments clarify that when a party to a joint arrangement obtains control of a business that is a joint operation, and had rights to the assets and obligations for the liabilities relating to that joint operation immediately before the acquisition date, the transaction is a business combination achieved in stages. In such cases, the acquirer shall remeasure its entire previously held interest in the joint operation. The amendment does not have a significant impact on the financial statements.

– Amendments to Korean IFRS 1111 *Joint Agreements*

The amendments clarify that when a party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business. In such cases, previously held interests in the joint operation are not remeasured. The amendment does not have a significant impact on the financial statements.

– Amendments to Paragraph 57A of Korean IFRS 1012 *Income Tax*

The amendment is applied to all the income tax consequences of dividends and requires an entity to recognize the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events. The amendment does not have a significant impact on the financial statements.

– Korean IFRS 1023 *Borrowing Costs*

The amendments clarify that if a specific borrowing remains outstanding after the related qualifying asset is ready for its intended use (or sale), it becomes part of general borrowings. The amendment does not have a significant impact on the financial statements.

2.2.2 New standards and interpretations not yet adopted by the Company

The following new accounting standards and interpretations have been published that are not mandatory for December 31, 2019 reporting periods and have not been early adopted by the Company.

(a) Amendments to Korean IFRS 1001 Presentation of Financial Statements and Korean IFRS 1008 *Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Material*

The amendments clarify the explanation of the definition of material and amended Korean IFRS 1001 and Korean IFRS 1008 in accordance with the clarified definitions. Materiality is assessed by reference to omission or misstatement of material information as well as effects of immaterial information, and to the nature of the users when determining the information to be disclosed by the Company. These amendments should be applied for annual periods beginning on or after January 1, 2020, and earlier application of permitted. The Company does not expect that these amendments have a significant impact on the financial statements.

(b) Amendments to Korean IFRS 1103 *Business Combination – Definition of a Business*

To consider the integration of the required activities and assets as a business, the amended definition of a business requires an acquisition to include an input and a substantive process that together significantly contribute to the ability to create outputs and excludes economic benefits from the lower costs. An entity can apply a concentration test, an optional test, where substantially all of the fair value of gross assets acquired is concentrated in a single asset or a Company of similar assets, the assets acquired would not represent a business. These amendments should be applied for annual periods beginning on or after January 1, 2020, and earlier application of permitted. The Company does not expect that these amendments have a significant impact on the financial statements.

(c) Agenda Decision of the IFRS Interpretations Committee

On December 16, 2019, the IFRS Interpretations Committee (IFRIC) concluded that the enforceable period of a lease under IFRS 16, “Leases”, reflects broader economics, not just legal rights and termination cash payments. The Company is assessing the impact that the change in accounting policy of enforceable period will have on the Company’s financial statements, and the Company will apply the impact in the financial statements once the assessment is completed.

2.3 Foreign Currency Translation

(a) Functional and Presentation Currency

Items included in the financial statements of the Company are measured using the currency of the primary economic environment in which it operates (“the functional currency”). The financial statements are presented in Korean won, which is the Company’s functional and presentation currency.

The Company operates primarily in Korea and its official accounting records are maintained in Korean won. The Indian rupee amounts are provided herein as supplementary information solely for the convenience of the reader. Korean won amounts are expressed in Indian rupee at the rate of ₩ 16.23 to Indian ₹1.00, at December 31, 2019. Such convenience translation into Indian rupee should not be construed as representations that the Korean won amounts have been, could have been, or could in the future be, converted at this or any other rate of exchange.

(b) Transactions and Balances

Foreign currency transactions are translated into the functional currency using the exchange rates at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at year end exchange rates are generally recognized in profit or loss. They are deferred in other comprehensive income if they relate to qualifying cash flow hedges and qualifying effective portion of net investment hedges, or are attributable to monetary part of the net investment in a foreign operation.

Foreign exchange gains and losses that relate to borrowings are presented in the statement of profit or loss, within finance costs. All other foreign exchange gains and losses are presented in the statement of profit or loss within ‘non-operating income or expenses’.

Non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined. Translation differences on assets and liabilities carried at fair value are reported as part of the fair value gain or loss. For example, translation differences on non-monetary assets and liabilities such as equities held at fair value through profit or loss are recognized in profit or loss as part of the fair value gain or loss and translation differences on non-monetary assets such as equities held at fair value through other comprehensive income are recognized in other comprehensive income.

2.4 Financial Assets

(a) Classification

The Company classifies its financial assets in the following measurement categories:

- those to be measured at fair value through profit or loss
- those to be measured at fair value through other comprehensive income, and
- those to be measured at amortized cost.

The classification depends on the Company's business model for managing the financial assets and the contractual terms of the cash flows.

For financial assets measured at fair value, gains and losses will either be recorded in profit or loss or other comprehensive income. For investments in debt instruments, this will depend on the business model in which the investment is held. The Company reclassifies debt investments when, and only when its business model for managing those assets changes.

For investments in equity instruments that are not held for trading, this will depend on whether the Company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

(b) Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at fair value through profit or loss are expensed in profit or loss.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

A. Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. The Company classifies its debt instruments into one of the following three measurement categories:

- Amortized cost: Assets that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortized cost. A gain or loss on a debt investment that is subsequently measured at amortized cost and is not part of a hedging relationship is recognized in profit or loss when the asset is derecognized or impaired. Interest income from these financial assets is included in 'interest income' using the effective interest rate method.
- Fair value through other comprehensive income: Assets that are held for collection of contractual cash flows and for selling the financial assets, where the assets' cash flows represent solely payments of principal and interest, are measured at fair value through other comprehensive income. Movements in the carrying amount are taken through other comprehensive income, except for the recognition of impairment loss (reversal of impairment loss), interest income and foreign exchange gains and losses which are recognized in profit or loss. When the financial asset is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss. Interest income from these financial assets is included in 'interest income' using the effective interest rate method. Foreign exchange gains and losses are presented in 'non-operating income or expenses' and impairment losses are presented in 'non-operating expenses'.
- Fair value through profit or loss: Assets that do not meet the criteria for amortized cost or fair value through other comprehensive income are measured at fair value through profit or loss. A gain or loss on a debt investment that is subsequently measured at fair value through profit or loss and is not part of a hedging relationship is recognized in profit or loss and presented net in the statement of profit or loss within 'gain (loss) on disposal of loans or gain (loss) on valuation of loans' in the year in which it arises.

B. Equity instruments

The Company subsequently measures all equity investments at fair value. Where the Company's management has elected to present fair value gains and losses on equity investments, which held for long-term investment or strategic purpose, in other comprehensive income, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividend income from such investments continue to be recognized in profit or loss as 'dividend income' when the right to receive payments is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognized in 'gain (loss) on valuation of loans' in the statement of profit or loss as applicable. Impairment loss (reversal of impairment loss) on equity investments measured at fair value through other comprehensive income are not reported separately from other changes in fair value.

(c) Impairment

The Company assesses on a forward looking basis the expected credit losses associated with its debt instruments carried at amortized cost and fair value through other comprehensive income. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

(d) Recognition and Derecognition

Regular way purchases and sales of financial assets are recognized or derecognized on trade-date, the date on which the Company commits to purchase or sell the asset. Financial assets are derecognized when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership.

If a transfer does not result in derecognition because the Company has retained substantially all the risks and rewards of ownership of the transferred asset, the Company continues to recognize the transferred asset in its entirety and recognizes a financial liability for the consideration received.

(e) Offsetting of financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position where there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the assets and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

2.5. Property and Equipment

Property and equipment are stated at historical cost less accumulated depreciation and accumulated impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation of all property and equipment is calculated using the straight-line method to allocate their cost or revalued amounts, net of their residual values, over their estimated useful lives as follows:

	Estimated useful lives
Leasehold improvement	5 years
Equipment	5 years

The assets' depreciation method, residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

2.6 Intangible Assets

Intangible assets are initially recognized at its historical cost, and carried at cost less accumulated amortization and accumulated impairment losses.

Membership rights that have an indefinite useful life are not subject to amortization because there is no foreseeable limit to the period over which the assets are expected to be utilized. The Company amortizes intangible assets with a limited useful life using the straight-line method over the following estimated useful lives:

	Estimated useful lives
Software	5 years

2.7 Impairment of Non-financial Assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs of disposal and value in use. Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of each reporting period.

2.8 Financial Liabilities

(a) Classification and measurement

The Company's financial liabilities at fair value through profit or loss are financial instruments held for trading. A financial liabilities is held for trading if it is incurred principally for the purpose of repurchasing in near term. A derivative that is not a designated as hedging instruments and an embedded derivative that is separated are also classified as held for trading.

The Company classifies non-derivative financial liabilities, except for financial liabilities at fair value through profit or loss, financial guarantee contracts and financial liabilities that arise when a transfer of financial assets does not qualify for derecognition, as financial liabilities carried at amortized cost and presented as 'other financial liabilities' in the statement of financial position.

(b) Derecognition

Financial liabilities are removed from the statement of financial position when the obligation specified in the contract is discharged, cancelled or expired or when the terms of an existing financial liability is substantially modified. The difference between the carrying amount of a financial liability extinguished or transferred to another party and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

2.9 Provisions

Provisions for restoration, and legal claims are recognized when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources will be required to settle the obligation and the amount can be reliably estimated. Provisions are measured at present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period, and the increase in the provision due to the passage of time is recognized as interest expense.

2.10 Current and Deferred Tax

The tax expense for the period consists of current and deferred tax. Current and deferred tax is recognized in profit or loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity. In this case, the tax is also recognized in other comprehensive income or directly in equity, respectively.

The current income tax expense is measured at the amount expected to be paid to the taxation authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. The Company recognizes current income tax on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting profit nor taxable profit or loss.

Deferred tax assets are recognized only if it is probable that future taxable amounts will be available to utilize those temporary differences and losses.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority. Current tax assets and tax liabilities are offset when the Company has a legally enforceable right to offset and intends either to settle on a net basis, or to realize the assets and settle the liability simultaneously.

2.11 Employee Benefits

The Company operates defined benefit pension plans.

A defined benefit plan is a pension plan that is not a defined contribution plan. Generally, post-employment benefits are payable after the completion of employment, and the benefit amount depended on the employee's age, periods of service or salary levels. The liability recognized in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms approximating to the terms of the related obligation. Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognized in the period in which they occur, directly in other comprehensive income.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognized immediately in profit or loss as past service costs.

2.12 Revenue Recognition

(a) Interest income and expenses

Interest income and expenses are recognized using the effective interest method. Effective interest method is a method of calculating the amortized cost of a financial asset (or group of financial assets) and of allocating the interest income over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash receipts or payments through the expected life of the financial instrument or, where appreciate, a shorter period, to the net carrying amount of the financial instrument. When calculating the effective interest rate, the Company estimates cash flows considering all contractual terms of the financial instrument but does not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate, transaction costs, and all other premiums or discounts. In those rare cases when it is not possible to estimate reliably the cash flows or the expected life of a financial instrument (or group of financial instruments), the Company uses the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Interest on impaired financial assets (or group of financial assets) is recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

(b) Commission income

Financial service fees are recognized in accordance with the accounting standard of the financial instrument related to the fees earned, as followings.

– Fees that are an integral part of the effective interest of a financial instrument

Those fees are generally treated as adjustments of effective interest rate. Such commissions may include compensation for activities such as evaluating the borrower's financial condition, evaluating and recording guarantees, collateral and other security arrangements, negotiating the terms of the instrument, preparing and processing documents and closing the transaction. However, fees relating to the creation or acquisition of a financial instrument at fair value through profit or loss are recognized as revenue immediately.

– Fees earned as services are provided

Those fees are recognized as revenue as the services are provided.

(c) Dividend income

Dividend income is recognized when the right to receive payment is established. Dividend income is recognized in statement of comprehensive income as a part of operating income.

2.13 Leases

As explained in Note 2.2 above, the Company has changed its accounting policy for leases. The impact of the new accounting policies is disclosed in Note 25.

Leases in which a significant portion of the risks and rewards of ownership were not transferred to the Company as lessee were classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

The Company leases various offices, vehicles and equipment. Lease contracts are typically made for fixed periods of 2 to 4 years, but may have extension options as described in (b) below.

Contracts may contain both lease and non-lease components. The Company applies the practical expedient which has elected not to separate lease and non-lease components and instead accounts for these as a single lease component.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants, but leased assets may not be used as security for borrowing purposes.

Until the 2018 financial year, leases of property and equipment were classified as either finance or operating leases. Payments made under operating leases (net of any incentives received from the lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

From January 1, 2019, leases are recognized as a right-of-use asset and a corresponding liability at the date at which the leased asset is available for use by the Company.

The Company determines the lease term as the non-cancellable period of a lease, together with both (a) periods covered by an option to extend the lease if the lessee is reasonably certain to exercise that option; and (b) periods covered by an option to terminate the lease if the lessee is reasonably certain not to exercise that option. When the lessee and the lessor each has the right to terminate the lease without permission from the other party, the Company should consider a termination penalty in determining the period for which the contract is enforceable.

Assets and liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- Fixed payments (including in-substance fixed payments), less any lease incentives receivable
- Variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date
- Amounts expected to be payable by the Company (the lessee) under residual value guarantees
- The exercise price of a purchase option if the Company (the lessee) is reasonably certain to exercise that option, and
- Payments of penalties for terminating the lease, if the lease term reflects the Company (the lessee) exercising that option

Lease liability measurement also includes payments to be made in option periods if the lessee is reasonably certain to exercise an option to extend the lease.

The lease payments are discounted using the interest rate implicit in the lease. If that rate cannot be determined, the lessee's incremental borrowing rate is used, being the rate that the lessee would have to pay to borrow the funds necessary to obtain an asset of similar value in a similar economic environment with similar terms and conditions.

To determine the incremental borrowing rate, the Company:

- where possible, uses recent third-party financing received by the individual lessee as a starting point, adjusted to reflect changes in financing conditions since third party financing was received

The Company is exposed to potential future increases in variable lease payments based on an index or rate, which are not included in the lease liability until they take effect. When adjustments to lease payments based on an index or rate take effect, the lease liability is reassessed and adjusted against the right-of-use asset.

Each lease payment is allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability
- any lease payments made at or before the commencement date less any lease incentives received
- any initial direct costs, and
- restoration costs

The right-of-use asset is depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis. If the Company is reasonably certain to exercise a purchase option, the right-of-use asset is depreciated over the underlying asset's useful life.

Payments associated with short-term leases of vehicles and leases of low-value assets are recognized on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less. Low-value assets comprise IT-equipment and small items of office furniture.

(a) Variable lease payments

The Company does not have lease contracts linked to the index such as sales as at December 31, 2018 and 2019.

(b) Extension and termination options

Extension and termination options are included in offices and vehicles leases across the Company. These terms are used to maximize operational flexibility in terms of managing contracts. The majority of extension and termination options held are exercisable only by the Company and not by the respective lessor.

(c) Residual value guarantees

The Company does not have lease contract that provides residual value guarantees as at December 31, 2019.

2.14 Approval of Issuance of the Financial Statements

The financial statements 2019 were approved for issue by the Board of Directors on February 5, 2020 and are subject to change with the approval of shareholders at their Annual General Meeting.

3. Critical Accounting Estimates and Assumptions

The preparation of financial statements requires the Company to make estimates and assumptions concerning the future. Management also needs to exercise judgement in applying the Company's accounting policies. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. As the resulting accounting estimates will, by definition, seldom equal the related actual results, it can contain a significant risk of causing a material adjustment.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below. Additional information of significant judgement and assumptions of certain items are included in relevant notes.

(a) Income taxes

The Company recorded, based on its best estimate, current taxes and deferred taxes that the Company will be liable in the future. However, the final tax outcome in the future maybe different from the amounts that were initially recorded. Such differences will impact the current and deferred income tax assets and liabilities in the period in which actual tax return made (Note 17).

(b) Fair value of financial instruments

In principles, fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Company uses its judgment to select a variety of methods and make assumptions that are mainly based on market conditions existing at the end of each reporting period (Note 5).

(c) Impairment of financial assets

The provisions for impairment for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation based on the Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period (Note 4.1).

(d) Net defined benefit liability

The present value of net defined benefit liability depends on a number of factors that are determined on an actuarial basis using a number of assumptions including the discount rate (Note 16).

(e) Lease

In determining the lease term, management considers all facts and circumstances that create an economic incentive to exercise an extension option, or not exercise a termination option. Extension options (or periods after termination options) are only included in the lease term if the lease is reasonably certain to be extended (or not terminated).

For leases of offices and vehicles, the following factors are normally the most relevant:

- If there are significant penalties to terminate (or not extend), the Company is typically reasonably certain to extend (or not terminate).
- If any leasehold improvements are expected to have a significant remaining value, the Company is typically reasonably certain to extend (or not terminate).
- Otherwise, the Company considers other factors including historical lease durations and the costs and business disruption required to replace the leased asset.

Most extension options in offices and vehicles leases have not been included in the lease liability, because the Company could replace the assets without significant cost or business disruption.

The lease term is reassessed if an option is actually exercised (or not exercised) or the Company becomes obliged to exercise (or not exercise) it. The assessment of reasonable certainty is only revised if a significant event or a significant change in circumstances occurs, which affects this assessment, and that is within the control of the lessee.

During the current financial year, there was no financial effect of revising lease terms to reflect the effect of exercising extension and termination options.

4. Financial Risk Management

4.1 Credit Risk

Credit risk refers the loss of the Company due to credit deterioration of contractual counterparties. The purpose of the credit risk management is to maintain the source of the credit risk and to optimize the return rate of the credit risk.

(a) Credit risk management

To measure the risk of credit risk, the Company considers the possibility of a breach of liability by the customer or contract obligations, the obligations of the trading partners, the bankruptcy rate of the trade partner and the insolvency rate.

(b) Management of credit line

The Company's management activities of credit limits include managing shared borrowers, total exposure, portfolio management calculating appropriate credit line.

(c) Maximum exposure to credit risk

The maximum amount of credit risk of financial assets shows the worst situation before considering the collateral or other credit enhancement.

The maximum amount of credit risk of a financial guarantee is the maximum amount to be paid by the claimant's claim. The maximum value of the credit risk without consideration of the collateral excluding equity securities as at December 31, 2019 and 2018, are as follows:

	2019			**2019**		
	Loans at amortized cost	**Financial assets at Fair value through Profit or loss**	**Other financial assets**	Loans at amortized cost	Financial assets at Fair value through Profit or loss	Other financial assets
	(in thousands of Korean won)			**(In thousands of Indian rupee)**		
Carrying amount before provisions for impairment	**50,016,000**	**32,801,344**	**483,109**	**3,081,701**	**2,021,032**	**29,766**

Properties	**29,831**	**8,641**	**1,432,071**	**1,440,712**

4.2. Market Risk

Market risk is the risk of possible losses which arise from changes in market factors such as interest rates, stock prices, and foreign exchange rates. Market risk is contingent upon changing interest rates and exchange rates for unsettled financial instruments, and all contracts are subject to varying levels of volatility, depending on credit spread, foreign exchange rate and interest rates.

(a) Market risk management

Market risk management refers to the process of determining risks by identifying risk factors, assessing the size of the risk and feasibility, and avoiding risk.

(b) Exposure to market risk

(i) Interest rate risk

Interest rate risk is the risk of fluctuation in fair value or future cash flow due to volatility in market interest rates. The contents of financial assets and liabilities exposed to interest rate risk as at December 31, 2019 and 2018, are as follows:

2019	**Within 3 months**	**4-6 Months**	**7-9 Months**	**10-12 Months**	**1-5 Years**	**Over 5 years**	**Total**

(c) Sensitivity analysis

(i) Interest rate risk

The Company manages interest rate risk of all financial assets and liabilities excluding those are managed for price fluctuation risk. The effect of 100bp shift of interest rate with all other variables held constant for the year ended December 31, 2019 and 2018, are as follows:

	2019			
	100bp increase		**100bp decrease**	
	(In thousands of Korean won)	***(In thousands of Indian rupee) (unaudited)***	***(In thousands of Korean won)***	***(In thousands of Indian rupee) (unaudited)***
Interest income	**40,756**	**2,511**	**(40,756)**	**(2,511)**
Interest expense	**64,000**	**3,943**	**(64,000)**	**(3,943)**

	2018			
	100bp increase		100bp decrease	
	(In thousands of Korean won)	*(In thousands of Indian rupee) (unaudited)*	*(In thousands of Korean won)*	*(In thousands of Indian rupee) (unaudited)*
Interest income	20,321	1,252	(20,321)	(1,252)
Interest expense	70,000	4,313	(70,000)	(4,313)

(ii) Stock price risk

There is no financial asset exposed to stock price risk at the end of the reporting period.

(iii) Foreign exchange rate risk

There is no financial asset exposed to foreign exchange rate risk at the end of the reporting period.

4.3. Liquidity Risk

Liquidity risk is defined as non-payment of financial liabilities at maturity.

(a) Liquidity Risk Management

Liquidity risk management is an effort to avoid loss caused by lack of funds using effective management of liquidity, resulting in insufficient liquidity due to asset, liabilities mismatch, or unexpected outflow of funds. All assets and liabilities in the statement of financial position and off-balance items are subject to liquidity risk management.

The Company manages liquidity risks by grouping assets and liabilities into account units according to the characteristics of each account, and by checking the gap rate and gap ratios by various time intervals (e.g., depending on the duration of the contract), and keeping the gap ratios within the preset ratios.

(b) Cash flow of non-derivative financial instruments

The following table details the contractual maturity of the Company's non-derivative financial liabilities. The maturity analysis is based on the earliest maturity date that is payable on the basis of non-derivative cash flows including principal and interest.

Financial liabilities are classified based on the maturities. If there is no maturity or maturity allocation is needed, the Company allocates the financial liability's maturity based on the nature of products.

Financial guarantee contracts and loan commitment are included under the 'within 3 month' category as payments can be required upon request.

4.4. Capital Risk

The objective of the Company's capital management is to maintain a sound capital structure. The Company uses the capital adequacy ratio under the Regulation of Supervision of Specialized Credit Financial Business as a capital management indicator. This ratio is calculated dividing adjusted total assets by adjusted equity.

Adjusted capital adequacy ratio of the Company as at December 31, 2019 and 2018, are as follows:

	2019	
	(In thousands of Korean won)	***(In thousands of Indian rupee) (unaudited)***
Adjusted total asset (A)	**83,257,850**	**5,129,874**
Adjusted equity capital (B)	**36,123,581**	**2,225,729**
Adjusted capital adequacy ratio (B/A)[1]	**43.39%**	**43.39%**

	2018	
	(In thousands of Korean won)	*(In thousands of Indian rupee) (unaudited)*
Adjusted total asset (A)	86,643,992	5,338,508
Adjusted equity capital (B)	30,732,289	1,893,548
Adjusted capital adequacy ratio (B/A)[1]	35.47%	35.47%

1 The adjusted capital adequacy ratio is calculated in accordance with the Detailed rules on Supervision of Specialized Credit Financial Business.

5. Financial Instruments by Category

5.1. Fair Value by Type of Financial Instruments

Carrying amount and fair values of each type of financial instrument as at December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)	**2019**		2018	
	Carrying amount	**Fair value**	Carrying amount	Fair value

5.2 Fair Value Hierarchy

Items that are measured at fair value are categorized by the fair value hierarchy levels, and the defined levels are as follows:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities that an entity can access at the measurement date (Level 1).
- All inputs other than quoted prices included in level 1 that are observable (either directly that is, prices, or indirectly that is, derived from prices) for the asset or liability (Level 2).
- Unobservable inputs for the asset or liability (Level 3).

Fair value hierarchy classifications of the financial instruments that are measured at fair value are as follows:

(in thousands of Korean won)	**2019**			
	Level 1	**Level 2**	**Level 3**	**Total**
Recurring fair value measurements				
Financial assets at fair value through profit or loss	**–**	**–**	32,801,344	32,801,344

(In thousands of Indian rupee)	**2019 (unaudited)**			
	Level 1	**Level 2**	**Level 3**	**Total**
Recurring fair value measurements				
Financial assets at fair value through profit or loss	**–**	**–**	2,021,032	2,021,032

(in thousands of Korean won)	2018			
	Level 1	Level 2	Level 3	Total
Recurring fair value measurements				
Financial assets at fair value through profit or loss	**–**	**–**	33,988,279	33,988,279

(In thousands of Indian rupee)	2018 (unaudited)			
	Level 1	Level 2	Level 3	Total
Recurring fair value measurements				
Financial assets at fair value through profit or loss	**–**	**–**	2,094,164	2,094,164

5.3 Transfers between Fair Value Hierarchy Levels of Recurring Fair Value Measurements

The Company's policy is to recognize transfers between levels of the fair value at the end of the reporting period.

Details of transfers between levels of each fair value hierarchy of financial instruments are as follows:

(a) Details of transfers between level 1 and level 2 of recurring fair value measurements

There were no transfers between levels 1 and 2 for recurring fair value measurements during the year ended December 31, 2019.

(b) Changes in level 3 for recurring fair value measurements

Changes in level 3 for recurring fair value measurements of financial assets for the years ended December 31, 2019 and 2018, are as follows:

	2019	
	Financial assets at fair value through profit or loss	
	(In thousands of Korean won)	***(In thousands of Indian rupee) (unaudited)***
Beginning balance	**33,988,279**	**2,094,164**
Total profit loss	**15,516,664**	**956,048**
Amount recognized in profit or loss	**15,516,664**	**956,048**
Amount recognized in other comprehensive income	**–**	**–**
Executed	**1,390,219,428**	**85,657,389**
Sales	**1,406,923,027**	**86,686,570**
Transfer into level 3	**–**	**–**
Transfer out of level 3	**–**	**–**
Ending balance	**32,801,344**	**2,021,032**

	2018	
	Financial assets at fair value through profit or loss	
	(In thousands of Korean won)	*(In thousands of Indian rupee) (unaudited)*
Beginning balance[1]	27,961,543	1,722,831
Total profit loss	9,814,787	604,731
Amount recognized in profit or loss	9,814,787	604,731
Amount recognized in other comprehensive income	–	–
Executed	886,641,895	54,629,815
Sales	890,429,947	54,863,213
Transfer into level 3	–	–
Transfer out of level 3	–	–
Ending balance	33,988,279	2,094,164

1 It has been prepared in accordance with Korean IFRS 1109.

In relation to changes in Level 3 of the fair value, the amount recognized in profit or loss for the period, and gain or loss on assets and liabilities held at the end of the reporting period in the statement of comprehensive income for the years ended December 31, 2019 and 2018, are as follows:

	2019		**2018**	
(In thousands of Korean won)	**Gain in disposal of loans**	**Gain on valuation of loans**	**Gain in disposal of loans**	**Gain on valuation of loans**
Amount recognized in profit or loss in total profit or loss	15,134,105	382,559	9,476,968	337,819
Amount recognized in profit or loss in relation to financial assets held at the end of the reporting period	–	382,559	–	337,819

	2019		**2018**	
(in thousands of Indian rupee) *(unaudited)*	**Gain in disposal of loans**	**Gain on valuation of loans**	**Gain in disposal of loans**	**Gain on valuation of loans**
Amount recognized in profit or loss in total profit or loss	932,477	23,571	583,917	20,814
Amount recognized in profit or loss in relation to financial assets held at the end of the reporting period	–	23,571	–	20,814

5.4 Valuation Techniques and the Inputs

The Company uses following valuation techniques and inputs used in the recurring and non-recurring fair value measurements categorized within Level 2 and Level 3 of the fair value hierarchy.

			2019		
(In thousands of Korean won)	**Fair value**	**Level**	**Valuation techniques**	**Inputs**	**Range of inputs (weighted average)**
Financial instruments at fair value through profit or loss					
Loans	32,801,344	3	Present value method	Credit risk adjusted discount rate	3.51% ~ 6.58% (3.63%)

			2019 (unaudited)		
(In thousands of Indian rupee)	**Fair value**	**Level**	**Valuation techniques**	**Inputs**	**Range of inputs (weighted average)**
Financial instruments at fair value through profit or loss					
Loans	2,021,032	3	Present value method	Credit risk adjusted discount rate	3.51% ~ 6.58% (3.63%)

			2018		
(In thousands of Korean won)	Fair value	Level	Valuation techniques	Inputs	Range of inputs (weighted average)
Financial instruments at fair value through profit or loss					
Loans	33,988,279	3	Present value method	Credit risk adjusted discount rate	4.05% ~ 7.19% (4.15%)

			2018 (unaudited)		
(In thousands of Indian rupee)	Fair value	Level	Valuation techniques	Inputs	Range of inputs (weighted average)
Financial instruments at fair value through profit or loss					
Loans	2,094,164	3	Present value method	Credit risk adjusted discount rate	4.05% ~ 7.19% (4.15%)

5.5 Valuation Processes for Fair Value Measurements Categorized as Level 3

The Company's finance department operates a separate team that performs the fair value measurements required for financial reporting purposes, including level 3 fair values. This team reports directly to the chief financial officer (CFO) and the audit committee (AC). Discussions of valuation process and result are held between the CFO, AC and the valuation team at quarterly basis, in line with the Company's quarterly reporting periods.

5.6 Sensitivity Analysis for Recurring Fair Value Measurements Categorized as Level 3

Sensitivity analysis of financial instruments is performed to measure favorable and unfavorable changes in the fair value of financial instruments which are affected by the unobservable parameters, using a statistical technique. When the fair value is affected by more than two input parameters, the most favorable or most unfavorable amounts are presented. Loans are categorized within Level 3 and are subject to sensitivity analysis, and changes in their fair value are recognized as profit or loss.

The results of the sensitivity analysis for the effect on profit or loss from changes in inputs for each financial instrument, which is categorized within Level 3 and subject to sensitivity analysis, are as follows:

	2019		2018	
(In thousands of Korean won)	***100bp increase***	***100bp decrease***	*100bp increase*	*100bp decrease*
Financial assets				
Financial assets at fair value through profit or loss	**823,771**	**(796,290)**	865,465	(834,553)

	2019		2018	
(in thousands of Indian rupee) (unaudited)	***100bp increase***	***100bp decrease***	*100bp increase*	*100bp decrease*
Financial assets				
Financial assets at fair value through profit or loss	**50,756**	**(49,063)**	53,325	(51,420)

5.7 Gains and Losses on Valuation at the Transaction Date

In the case that the Company measured the fair value of derivative financial instruments with unobservable inputs, the Company recognized the fair value of the instrument at the transaction price if the fair value at initial measurement is different from the transaction price. The difference between the fair value at initial measurement and the transaction price is deferred and amortized using a straight-line method until the maturity of the instrument. However, in the case where inputs of the valuation techniques become observable in markets, the remaining deferred difference is immediately recognized as gain or loss.

The Company has no derivative financial instruments as at December 31, 2019. Therefore, there are no deferred difference or changes related to derivative financial instruments.

6. Financial Instruments by Category

The carrying amounts of each financial asset by category as at December 31, 2019 and 2018, are as follows:

(in thousands of Korean won)	**2019**	2018
Cash and due from financial institutions	**4,075,644**	2,032,075
Financial assets at amortized costs	**49,327,129**	51,181,588
Financial assets at fair value through profit or loss	**32,801,344**	33,988,279
Other financial assets	**466,016**	392,267
	86,670,133	87,594,209

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Cash and due from financial institutions	251,118	125,205
Financial assets at amortized costs	3,039,256	3,153,517
Financial assets at fair value through profit or loss	2,021,032	2,094,164
Other financial assets	28,713	24,169
	5,340,119	5,397,055

The carrying amounts of each financial liabilities by category as at December 31, 2019 and 2018, are as follows:

(in thousands of Korean won)	**2019**	2018
Borrowings	**47,900,000**	53,300,000
Other financial liabilities	**1,903,593**	3,426,392
	49,803,593	56,726,392

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Borrowings	**2,951,325**	3,284,042
Other financial liabilities	**117,289**	211,115
	3,068,613	3,495,157

Net gains (losses) of categories of financial instruments for the years ended December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)	**2019**	2018
Cash and due from financial institutions	**35,408**	54,910
Loans	**2,363,100**	2,288,854
Other receivables	**12,505**	12,505
	2,411,013	2,356,269
Interest expense		
Borrowings	**1,374,145**	1,298,471
Gain on disposal		
Financial assets at fair value through profit or loss	**15,134,105**	9,476,968
Gain in valuation		
Financial assets at fair value through profit or loss	**382,559**	337,819
	16,553,532	10,872,585

(In thousands of Indian rupee) (unaudited)	**2019**	2018
Cash and due from financial institutions	**2,182**	3,383
Loans	**145,601**	141,026
Other receivables	**770**	770
	148,553	145,180
Interest expense		
Borrowings	**84,667**	80,004
Gain on disposal		
Financial assets at fair value through profit or loss	**932,477**	583,917
Gain in valuation		
Financial assets at fair value through profit or loss	**23,571**	20,814
	1,019,934	669,907

7. Cash and Due from Financial Institutions

Details of cash and due from financial institutions as at December 31, 2019 and 2018, are as follows.

(in thousands of Korean won)	**2019**	2018
Cash and cash equivalents	**4,075,644**	2,032,075

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Cash and cash equivalents	251,118	125,205

8. Financial Assets at Amortized Costs

Details of the loans at amortized costs as at December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)		**2019**			
		Principal	**Provisions for impairment**	**Deferred loan origination fees (costs)**	**Total**
Financial assets at amortized costs	Loans	**9,760,000**	**(167,287)**	**123,384**	**9,716,097**

16. Net defined Benefit Liabilities

The details of the net defined benefit liabilities as at December 31, 2019 and 2018, are as follows:

(in thousands of Korean won)	**2019**	2018
Present value of defined Benefit obligations	**1,420,612**	894,750
The fair value of plan assets	**(1,286,999)**	(573,334)
Net defined benefit liabilities	**133,613**	321,416

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Present value of defined Benefit obligations	**87,530**	55,129
The fair value of plan assets	**(79,298)**	(35,326)
Net defined benefit liabilities	**8,232**	19,804

Changes in defined benefit liabilities for the years ended December 31, 2019 and 2018, are as follows:

(in thousands of Korean won)	**2019**	2018
Beginning balance	**894,750**	510,486
Current service cost	**343,221**	279,470
Interest expense	**19,358**	12,673
Benefits paid	**(50,009)**	(96,855)
Actuarial gains and losses:	**213,292**	188,976
Demographic assumptions	**108,079**	–
Financial assumptions	**71,798**	108,081
Experience adjustments	**33,415**	80,895
Ending balance	**1,420,612**	894,750

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Beginning balance	**55,129**	31,423
Current service cost	**21,147**	17,219
Interest expense	**1,193**	781
Benefits paid	**(3,081)**	(5,968)
Actuarial gains and losses:	**13,142**	11,644
Demographic assumptions	**6,659**	–
Financial assumptions	**4,424**	6,659
Experience adjustments	**2,059**	4,984
Ending balance	**87,530**	55,129

Details of fair values of plan assets as at December 31, 2019 and 2018, are as follows:

(in thousands of Korean won)	**2019**	2018
Beginning balance	**573,334**	411,000
Interest income	**12,094**	10,026
Remeasurements		
Loss on plan assets (excluding amounts included in interest income)	**(2,339)**	(4,106)
Contribution	**756,000**	255,000
Management fee	**(2,355)**	(1,731)
Payments	**(49,735)**	(96,855)
Ending balance	**1,286,999**	573,334

(In thousands of Indian rupee) (unaudited)	**2019**	2018
Beginning balance	**35,326**	25,323
Interest income	**745**	618
Remeasurements		
Loss on plan assets (excluding amounts included in interest income)	**(144)**	(253)
Contribution	**46,580**	15,712
Management fee	**(145)**	(107)
Payments	**(3,064)**	(5,968)
Ending balance	**79,298**	35,326

The significant actuarial assumptions as at December 31, 2019 and 2018, are as follows:

(in percentage)	**2019**	2018
Discount rate	**2.00%**	2.27%
Future salary increase rate	**5.00%**	5.00%

The sensitivity analysis of the defined benefit liabilities due to changes in the principal assumptions as at December 31, 2019, is as follows:

	Effects on Defined Benefit Obligation		
(In thousands of Korean won)	**Changes**	**Increase**	**Decrease**
Discount rate	**1.00%**	**(146,449)**	**176,338**
Future salary increase rate	**1.00%**	**169,363**	**(144,136)**

	Effects on Defined Benefit Obligation		
(in thousands of Indian rupee) (unaudited)	**Changes**	**Increase**	**Decrease**
Discount rate	**1.00%**	**(9,023)**	**10,865**
Future salary increase rate	**1.00%**	**10,435**	**(8,881)**

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated. The sensitivity of the defined benefit obligation to significant actuarial assumptions is calculated using the projected unit credit method which is used to calculate the defined benefit obligation

Expected maturity analysis of undiscounted retirement benefit payment as at December 31, 2019, is as follows:

(In thousands of Korean won)	**Less than 1 year**	**Between 1 and 2 years**	**Between 2 and 5 years**	**More than 5 years**	**Total**
Pension benefits	**67,548**	**99,892**	**281,441**	**1,362,148**	**1,811,029**

(In thousands of Indian rupee) (unaudited)	**Less than 1 year**	**Between 1 and 2 years**	**Between 2 and 5 years**	**More than 5 years**	**Total**
Pension benefits	**4,162**	**6,155**	**17,341**	**83,928**	**111,585**

The weighted average duration of the defined benefit obligations is 11.7 years.

17. Income Tax Expense

Income tax expense for the years ended December 31, 2019 and 2018, are as follows:

(in thousands of Korean won)	**2019**	2018
Current tax expense	**1,559,594**	770,642
Changes in deferred income tax Assets (liabilities)[1]	**(17,159)**	101,020
Income tax expense reflected Directly to equity	**47,439**	42,478
Income tax expense	**1,589,874**	914,140

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Current tax expense	**96,093**	47,483
Changes in deferred income tax Assets (liabilities)[1]	**(1,057)**	6,224
Income tax expense reflected Directly to equity	**2,923**	2,617
Income tax expense	**97,959**	56,324

1 Changes in deferred income tax assets (liabilities).

(in thousands of Korean won)	**2019**	2018
Net deferred tax asset at the beginning of the year	**133,334**	32,314
Net deferred tax asset at the end of the year	**116,175**	133,334
Changes in deferred income tax Assets(liabilities)	**(17,159)**	101,020

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Net deferred tax asset at the beginning of the year	**8,215**	1,991
Net deferred tax asset at the end of the year	**7,158**	8,215
Changes in deferred income tax Assets(liabilities)	**(1,057)**	6,224

The relationship between income tax expenses and net profit before income tax for the years ended December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)	**2019**	2018
Profit before income tax	**6,821,642**	3,642,692
Income tax at the applicable tax rate[1]	**1,478,761**	779,392
Adjustments:		
Non-deductible expense	**111,342**	134,267
Others	**(229)**	481
Income tax expenses	**1,589,874**	914,140

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Profit before income tax	**420,311**	224,442
Income tax at the applicable tax rate[1]	**91,113**	48,022
Adjustments:		
Non-deductible expense	**6,860**	8,273
Others	**(14)**	30
Income tax expenses	**97,959**	56,324

1 The tax rate applied by the Company to calculate income tax during the current period is 22% (2018: 22%).

Changes in temporary differences and deferred tax assets (liabilities) for the years ended December 31, 2019 and 2018, are as follows:

	2019				
	Cumulative temporary difference			**Deferred income tax**	
(In thousands of Korean won)	**Beginning balance**	**Increase / decrease**	**Ending balance**	**Beginning balance**	**Ending balance**

(In thousands of Indian rupee) (unaudited)	**2019**	2018
Deferred tax assets		
Deferred tax assets to be utilized no more than 12 months	10,898	9,979
Deferred tax assets to be utilized more than 12 months	24,361	12,761
	35,258	22,740
Deferred tax liabilities		
Deferred tax liabilities to be settled no more than 12 months	(5,186)	(4,579)
Deferred tax liabilities to be settled more than 12 months	(22,914)	(9,945)
	(28,100)	(14,524)
Net deferred tax assets	7,158	8,215

Realization of the future tax benefits related to the deferred tax assets is dependent on many factors, including the Company's ability to generate taxable profit within the period during which the temporary differences reverse, the outlook of the economic environment and the overall future industry outlook.

Management periodically considers these factors in reaching its conclusion and recognized the deferred tax asset since all the future tax benefits are determined to be realizable as at December 31, 2019.

18. Equity

Share capital as at December 31, 2019 and 2018, are as follows:

(In Korean won)	**2019**	2018
Par value per share	5,000	5,000
Number of shares issued	4,000,000	4,000,000
Share capital	20,000,000,000	20,000,000,000

(in Indian rupee) (unaudited)	**2019**	2018
Par value per share	308	308
Number of shares issued	4,000,000	4,000,000
Share capital	1,232,285,890	1,232,285,890

Details of accumulated other comprehensive income as at December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)	**2019**	2018
Remeasurement of net defined benefit plan	**(345,847)**	(177,655)

(in thousands of Indian rupee) (unaudited)	**2019**	2018
Remeasurement of net defined benefit plan	**(21,309)**	(10,946)

Details of retained earnings as at December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)	**2019**	2018
Retained earnings before appropriation	**14,728,125**	**9,499,272**
Regulatory reserve for credit losses	**800,837**	**814,245**
Reserve for indemnification and performance obligation	**1,000,000**	**1,000,000**
	16,528,962	**11,313,517**

(In thousands of Indian rupee) (unaudited)	**2019**	2018
Retained earnings before appropriation	**907,463**	**585,291**
Regulatory reserve for credit losses	**49,343**	**50,169**
Reserve for indemnification and performance obligation	**61,614**	**61,614**
	1,018,420	**697,074**

The details of the regulatory reserve for credit losses as at December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)	**2019**	2018
Beginning balance	**800,837**	**814,245**
Effect of accounting changes[1]	**–**	**(308,162)**
Amount estimated to be appropriated	**(22,236)**	**294,754**
Ending balance	**778,601**	**800,837**

(In thousands of Indian rupee) (unaudited)	**2019**	2018
Beginning balance	**49,343**	**50,169**
Effect of accounting changes[1]	**–**	**(18,987)**
Amount estimated to be appropriated	**(1,370)**	**18,161**
Ending balance	**47,973**	**49,343**

1 Represents the increase in provisions for impairment reflected in the beginning balance of retained earnings in accordance with the changes in accounting policy (Korean IFRS 1109).

Adjusted profit after provision of regulatory reserve for credit losses for the years ended December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)	**2019**	2018
Profit for the period	**5,231,768**	**2,728,552**
Estimated provision for regulatory reserve	**22,236**	**(294,754)**
Adjusted profit for the period after the provision[1]	**5,254,004**	**2,433,798**

(In thousands of Indian rupee) (unaudited)	**2019**	2018
Profit for the period	**322,352**	**168,118**
Estimated provision for regulatory reserve	**1,370**	**(18,161)**
Adjusted profit for the period after the provision[1]	**323,722**	**149,957**

1 Adjusted profits after provision of regulatory reserve for credit loss are not in accordance with Korean IFRS and calculated on the assumption that regulatory reserve for credit loss before income tax is adjusted to the net income.

The appropriation of retained earnings for the years ended December 31, 2019 and 2018, are as follows:

(In thousands of Korean won)	**2019**		2018	
	(Expected appropriation date: March 20, 2020)		(Appropriation date: March 27, 2019)	
Retained earnings before appropriation		**14,728,125**		9,499,272
Unappropriated retained earnings carried forward from prior period	**9,512,680**		6,986,546	
Effect of accounting changes	**(16,323)**		(215,826)	
Profit for the period	**5,231,768**		2,728,552	
Appropriation		**22,236**		13,408
Reserve for loss from compensation of damage	**22,236**		13,408	
Unappropriated retained earnings to be carried forward to subsequent period		**14,750,361**		9,512,680

(In thousands of Indian rupee)	**2019 (unaudited)**		2018 (unaudited)	
	(Expected appropriation date: March 20, 2020)		(Appropriation date: March 27, 2019)

Loans for working capital	NH Bank	2,000,000	1,500,000

(in thousands of Indian rupee) (unaudited)	Financial institution	Limit of loan commitment	Loan executions
Loans for working capital	KB Capital Co., Ltd.	2,464,572	2,464,572
Loans for working capital	Kookmin Bank	616,143	117,067
Loans for working capital	Korea Development Bank	431,300	–
Loans for working capital	NH Bank	123,229	92,421

As at December 31, 2019, the Company is provided with payment guarantees amounting to ₩ 101(₹ 6) million in relation to deposits for collection of loan receivables from Seoul Guarantee Insurance Company.

At December 31, 2019, the Company provides loan agreements in relation with factoring loans and the unused limit commitment amount to ₩ 2,000,000(₹123,229) thousand.

25. Changes in Accounting Policies

The Company has adopted Korean IFRS 1116, retrospectively, from January 1, 2019, but has not restated comparatives for the 2018 reporting period, as permitted under the specific transitional provisions in the standard. The reclassifications and the adjustments arising from the new leasing rules are, therefore, recognized in the statement of financial position on January 1, 2019. Details of adjustments recognized on adoption of Korean IFRS 1116 Lease are as follows:

On adoption of Korean IFRS 1116, the Company recognized lease liabilities in relation to leases which had previously been classified as 'operating leases' under the principles of Korean IFRS 1017. These liabilities were measured at the present value of the remaining lease payments, discounted using the lessee's incremental borrowing rate as at January 1, 2019. The lessee's weighted average incremental borrowing rate applied to the lease liabilities on January 1, 2019 was 3.57%.

(a) Practical expedients applied

In applying Korean IFRS 1116 for the first time, the Company has used the following practical expedients permitted by the standard:

- the use of a single discount rate to a portfolio of leases with reasonably similar characteristics
- reliance on previous assessments on whether leases are onerous – there were no onerous contracts as at January 1, 2019
- the accounting for operating leases with a remaining lease term of less than 12 months as at January 1, 2019, as short-term leases
- the exclusion of initial direct costs for the measurement of the right-of-use asset at the date of initial application, and
- the use of hindsight in determining the lease term where the contract contains options to extend or terminate the lease

The Company has also elected not to reassess whether a contract is, or contains a lease at the date of initial application. Instead, for contracts entered into before the transition date, the Company relied on its assessment made applying Korean IFRS 1017 and Interpretation 2104 Determining whether an Arrangement contains a Lease.

(b) Measurement of lease liabilities

(in thousands of Korean won)	Amount
Operating lease commitments disclosed as at December 31, 2018	593,479
Discounted using the lessee's incremental borrowing rate of at the date of initial application	573,312
Less: short-term leases recognized as an expense by straight-line method	(23,109)
Less: low-value leases recognized as an expense by straight-line method	(16,409)
Lease liability recognized as at January 1, 2019	533,794

(in thousands of Indian rupee) (unaudited)	Amount
Operating lease commitments disclosed as at December 31, 2018	36,567
Discounted using the lessee's incremental borrowing rate of at the date of initial application	35,324
Less: short-term leases recognized as an expense by straight-line method	(1,424)
Less: low-value leases recognized as an expense by straight-line method	(1,011)
Lease liability recognized as at January 1, 2019	32,889

(c) Measurement of right-of-use assets

The right-of-use assets were measured on a retrospective basis as if the new rules had always been applied. There were no onerous lease contracts that would have required an adjustment to the right-of-use assets at the date of initial application.

(d) Adjustments recognized in the statement of financial position as at January 1, 2019

The change in accounting policy affected the following items in the statement of financial position on January 1, 2019:

- property and equipment: increase by ₩ 542,481(₹ 33,425) thousand
- lease liabilities: increase by ₩ 533,794(₹ 32,889) thousand

The net impact on retained earnings on January 1, 2019, was a decrease of ₩ 16,323(₹ 1,006) thousand.

(e) Lessor accounting

The Company did not need to make any adjustments to the accounting for assets held as lessor as a result of the adoption of Korean IFRS 1116.

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF SSANGYONG AUSTRALIA PTY LTD

Report on the audit of the financial report

Opinion

We have audited the financial report of SsangYong Australia Pty Ltd (the Company), which comprises the statement of financial position as at 31 December 2019, the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, and the Directors' declaration.

In our opinion, the accompanying financial report of the Company is in accordance with the *Corporations Act 2001*, including:

a giving a true and fair view of the Company's financial position as at 31 December 2019 and of its performance for the year ended on that date; and

b complying with Australian Accounting Standards – Reduced Disclosure Requirements and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Report* section of our report. We are independent of the Company in accordance with the Corporations Act 2001 and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 Code of *Ethics for Professional Accountants* (the Code) that are relevant to our audit of the financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the financial report and auditor's report thereon

The Directors are responsible for the other information. The other information comprises the information included in the Company's annual report for the year ended 31 December 2019, but does not include the financial report and our auditor's report thereon.

Our opinion on the financial report does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors' for the financial report

The Directors of the Company are responsible for the preparation of the financial report that gives a true and fair view in accordance with Australian Accounting Standards – Reduced Disclosure Requirements and the *Corporations Act 2001*. The Directors' responsibility also includes such internal control as the Directors determine is necessary to enable the preparation of the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

In preparing the financial report, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website at: http://www.auasb.gov.au/auditors_responsibilities/ar4.pdf. This description forms part of our auditor's report.

The above statement of cash flows should be read in conjunction with the accompanying notes

NOTES TO THE FINANCIAL STATEMENTS 31 DECEMBER 2019

Note 1. General information

SsangYong Australia Pty Ltd is a company limited by shares.

The principal activities of the Company consist of distribution of SsangYong vehicles and vehicle related parts.

The financial statements of the Company are prepared for the year from 01 January 2019 to 31 December 2019.

The financial statements were authorised for issue, in accordance with a resolution of directors, on 17 February 2020.

Note 2. Significant accounting policies

The principal accounting policies adopted in the preparation of the financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

New or amended Accounting Standards and Interpretations adopted

The company has adopted all of the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board ('AASB') that are mandatory for the current reporting period.

Any new or amended Accounting Standards or Interpretations that are not yet mandatory have not been early adopted.

The adoption of these Accounting Standards and Interpretations did not have any significant impact on the financial performance or position of the company.

The following Accounting Standards and Interpretations are most relevant to the company:

AASB 16 Leases

The company has adopted AASB 16 from 1 January 2019. The standard replaces AASB 117 'Leases' and for lessees eliminates the classifications of operating leases and finance leases. Except for short-term leases and leases of low-value assets, right-of-use assets and corresponding lease liabilities are recognised in the statement of financial position. Straight-line operating lease expense recognition is replaced with a depreciation charge for the right-of-use assets (included in operating costs) and an interest expense on the recognised lease liabilities (included in finance costs). In the earlier periods of the lease, the expenses associated with the lease under AASB 16 will be higher when compared to lease expenses under AASB 117. However, EBITDA (Earnings Before Interest, Tax, Depreciation and Amortisation) results improve as the operating expense is now replaced by interest expense and depreciation in profit or loss. For classification within the statement of cash flows, the interest portion is disclosed in operating activities and the principal portion of the lease payments are separately disclosed in financing activities. For lessor accounting, the standard does not substantially change how a lessor accounts for leases.

The company has decided to apply a modified retrospective approach, and as a result, prior periods have not been adjusted for the changes associated with the application of the new standard. Instead of performing an impairment review on the right-of-use assets at the date of initial application, the company has relied on its historic assessment as to whether leases were onerous immediately before the date of initial application of AASB 16.

Basis of preparation

These general purpose financial statements have been prepared in accordance with Australian Accounting Standards - Reduced Disclosure Requirements and Interpretations issued by the Australian Accounting Standards Board ('AASB') and the Corporations Act 2001, as appropriate for for-profit oriented entities.

Historical cost convention

The financial statements have been prepared under the historical cost convention.

Critical accounting estimates

The preparation of the financial statements requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the company's accounting policies. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in note 3.

Going concern basis

The financial statements are prepared under a going concern basis notwithstanding the significant losses that have been generated via the ongoing support from the Parent Entity in the form of longer credit terms and financial support through capital infusion. Refer to note 21 for an outline of related party transactions.

Foreign currency translation

The financial statements are presented in Australian dollars, which is the functional and presentation currency for SsangYong Australia Pty Ltd.

Foreign currency transactions are translated into Australian dollars using approximate exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at financial year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss.

Revenue recognition

The company recognises revenue as follows:

Revenue from contracts with customers

Revenue is recognised at an amount that reflects the consideration to which the company is expected to be entitled in exchange for transferring goods or services to a customer. For each contract with a customer, the company: identifies the contract with a customer; identifies the performance obligations in the contract; determines the transaction price which takes into account estimates of variable consideration and the time value of money; allocates the transaction price to the separate performance obligations on the basis of the relative stand-alone selling price of each distinct good or service to be delivered; and recognises revenue when or as each performance obligation is satisfied in a manner that depicts the transfer to the customer of the goods or services promised.

Variable consideration within the transaction price, if any, reflects concessions provided to the customer such as discounts, rebates and refunds, any potential bonuses receivable from the customer and any other contingent events. Such estimates are determined using either the 'expected value' or 'most likely amount' method. The measurement of variable consideration is subject to a constraining principle whereby revenue will only be recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised will not occur. The measurement constraint continues until the uncertainty associated with the variable consideration is subsequently resolved. Amounts received that are subject to the constraining principle are recognised as a refund liability.

Sale of vehicles

Revenue from the sale of vehicles is recognised when the Company transfers control of the assets to the customers. Control and title are transferred when the goods are invoiced and paid.

All vehicles sold comes with a 5-year standard warranty and an extended 2-years' warranty. Estimated revenue arising from the provision of 2-year extended warranty is deferred and recognised at the time the extended warranty expires.

Sale of parts

Revenue from the sale of parts is recognised at the point of sale, when the customer has taken delivery of the goods.

Other revenue

Other revenue is recognised when it is received or when the right to receive payment is established.

Income tax

Deferred tax assets and liabilities are recognised for temporary differences at the tax rates expected to be applied when the assets are recovered or liabilities are settled, based on those tax rates that are enacted or substantively enacted, except for:

- When the deferred income tax asset or liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and that, at the time of the transaction, affects neither the accounting nor taxable profits; or
- When the taxable temporary difference is associated with interests in subsidiaries, associates or joint ventures, and the timing of the reversal can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

Deferred tax assets are recognised for deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

The carrying amount of recognised and unrecognised deferred tax assets are reviewed at each reporting date. Deferred tax assets recognised are reduced to the extent that it is no longer probable that future taxable profits will be available

NOTES TO THE FINANCIAL STATEMENTS 31 DECEMBER 2019

for the carrying amount to be recovered. Previously unrecognised deferred tax assets are recognised to the extent that it is probable that there are future taxable profits available to recover the asset.

Deferred tax assets and liabilities are offset only where there is a legally enforceable right to offset current tax assets against current tax liabilities and deferred tax assets against deferred tax liabilities; and they relate to the same taxable authority on either the same taxable entity or different taxable entities which intend to settle simultaneously.

Current and non-current classification

Assets and liabilities are presented in the statement of financial position based on current and non-current classification.

An asset is classified as current when: it is either expected to be realised or intended to be sold or consumed in the company's normal operating cycle; it is held primarily for the purpose of trading; it is expected to be realised within 12 months after the reporting period; or the asset is cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.

A liability is classified as current when: it is either expected to be settled in the company's normal operating cycle; it is held primarily for the purpose of trading; it is due to be settled within 12 months after the reporting period; or there is no unconditional right to defer the settlement of the liability for at least 12 months after the reporting period. All other liabilities are classified as non-current.

Deferred tax assets and liabilities are always classified as non-current.

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, deposits held at call with financial institutions, other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Trade and other receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any allowance for expected credit losses. Trade receivables are generally due for settlement within 1-30 days after invoice date.

Collectability of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectable are written off by reducing the carrying amount directly. A provision for impairment of trade receivables is raised when there is objective evidence that the company will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 90 days) are considered indicators that the trade receivable may be impaired. The amount of the impairment allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial.

Other receivables are recognised at amortised cost, less any allowance for expected credit losses.

Inventories

Stock on hand is stated at the lower of cost and net realisable value. Cost comprises of purchase and delivery costs, net of rebates and discounts received or receivable.

Stock in transit is stated at the lower of cost and net realisable value. Cost comprises of purchase and delivery costs, net of rebates and discounts received or receivable.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

Property, plant and equipment

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation

The depreciable amount of all plant and equipment are depreciated over their useful lives to the company commencing from the time the assets are held ready for use.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of property, plant and equipment (excluding land) over their expected useful lives as follows:

Motor Vehicles	8 years (12.5 %)
Computer Equipment	2 years (50%)
Other Plant and equipment	3 - 10 years (10 - 33.3%)

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

Leasehold improvements are depreciated over the unexpired period of the lease or the estimated useful life of the assets, whichever is shorter.

An item of property, plant and equipment is derecognised upon disposal or when there is no future economic benefit to the company. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss. Revaluation surplus reserve, if any, relating to the item disposed of is transferred directly to retained profits.

Right-of-use assets

A right-of-use asset is recognised at the commencement date of a lease. The right-of-use asset is measured at cost, which comprises the initial amount of the lease liability, adjusted for, as applicable, any lease payments made at or before the commencement date net of any lease incentives received, any initial direct costs incurred, and, except where included in the cost of inventories, an estimate of costs expected to be incurred for dismantling and removing the underlying asset, and restoring the site or asset.

Right-of-use assets are depreciated on a straight-line basis over the unexpired period of the lease or the estimated useful life of the asset, whichever is the shorter. Where the company expects to obtain ownership of the leased asset at the end of the lease term, the depreciation is over its estimated useful life. Right-of use assets are subject to impairment or adjusted for any remeasurement of lease liabilities.

The company has elected not to recognise a right-of-use asset and corresponding lease liability for short-term leases with terms of 12 months or less and leases of low-value assets. Lease payments on these assets are expensed to profit or loss as incurred.

Trade and other payables

These amounts represent liabilities for goods and services provided to the company prior to the end of the financial year and which are unpaid. Due to their short-term nature they are measured at amortised cost and are not discounted. The amounts are unsecured and are usually paid within 30 days after end of month of recognition.

Provisions

Provisions are recognised when the company has a present (legal or constructive) obligation as a result of a past event, it is probable the company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, taking into account the risks and uncertainties surrounding the obligation. If the time value of money is material, provisions are discounted using a current pre-tax rate specific to the liability. The increase in the provision resulting from the passage of time is recognised as a finance cost.

Employee benefits

Short-term employee benefits

Liabilities for wages and salaries, including non-monetary benefits, annual leave and long service leave expected to be settled wholly within 12 months of the reporting date are measured at the amounts expected to be paid when the liabilities are settled.

Other long-term employee benefits

The liability for annual leave and long service leave not expected to be settled within 12 months of the reporting date are measured at the present value of expected future payments to be made in respect of services provided by employees up to the reporting date using the projected unit credit method. Consideration is given to expected future wage and salary levels, experience of employee departures and periods of service. Expected future payments are discounted using market yields at the reporting date on high quality corporate bonds with terms to maturity and currency that match, as closely as possible, the estimated future cash outflows.

NOTES TO THE FINANCIAL STATEMENTS 31 DECEMBER 2019

Fair value measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Issued capital

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

Goods and Services Tax ('GST') and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the tax authority. In this case it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

Note 3. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities (refer to the respective notes) within the next financial year are discussed below.

Revenue from contracts with customers involving sale of goods

When recognising revenue in relation to the sale of goods to customers, the key performance obligation of the company is considered to be the point of delivery of the goods to the customer, as this is deemed to be the time that the customer obtains control of the promised goods and therefore the benefits of unimpeded access.

Determination of variable consideration

Judgement is exercised in estimating variable consideration which is determined having regard to past experience with respect to the goods returned to the company where the customer maintains a right of return pursuant to the customer contract or where goods or services have a variable component. Revenue will only be recognised to the extent that it is highly probable that a significant reversal in the amount of cumulative revenue recognised under the contract will not occur when the uncertainty associated with the variable consideration is subsequently resolved.

Provision for impairment of inventories

The provision for impairment of inventories assessment requires a degree of estimation and judgement. The level of the provision is assessed by taking into account the recent sales experience, the ageing of inventories and other factors that affect inventory obsolescence.

Income tax

The company is subject to income taxes in the jurisdictions in which it operates. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The company recognises liabilities for anticipated tax audit issues based on the company's current understanding of the tax law. Where the final tax outcome of these matters is different from the carrying amounts, such differences will impact the current and deferred tax provisions in the period in which such determination is made.

Warranty provision

In determining the level of provision required for warranties the company has made judgements in respect of the expected performance of the products, the number of customers who will actually claim under the warranty and how often, and the costs of fulfilling the conditions of the warranty. The provision is based on estimates made from historical warranty data associated with similar products and services.

Note 4. Revenue

Movements in each class of provision during the current financial year, other than employee benefits, are set out below:

	Roadside Assist	Other
2019	$	$
Carrying amount at the start of the year	76,125	–
Additional provisions recognised	586,950	88,531
Amounts used	(21,208)	–
Carrying amount at the end of the year	641,867	88,531

Note 18. Issued capital

	2019 Shares	2018 Shares	2019 $	2018 $
2019				
Ordinary shares - fully paid	5,000,000	3,625,000	5,000,000	3,625,000

NOTES TO THE FINANCIAL STATEMENTS 31 DECEMBER 2019

Ordinary shares

Ordinary shares entitle the holder to participate in dividends and the proceeds on the winding up of the company in proportion to the number of and amounts paid on the shares held. The fully paid ordinary shares have no par value and the company does not have a limited amount of authorised capital.

On a show of hands every member present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

In July 2019, the directors approved the issue of 1,375,000 ordinary shares at an exercise price of $1 per share (2018: 3,625,000). These shares were issued to SsangYong Motor Company as part the capital infusion from the parent.

Note 19. Accumulated losses

	2019 $	2018 $
Accumulated losses at the beginning of the financial year	(3,025,615)	–
Loss after income tax expense for the year	(6,378,225)	(3,025,615)
Accumulated losses at the end of the financial year	(9,403,840)	(3,025,615)

Note 20. Key management personnel disclosures

Compensation

The aggregate compensation made to directors and other members of key management personnel of the company is set out below:

	2019 $	2018 $
Aggregate compensation	403,292	228,649

Note 21. Related party transactions

Key management personnel

Disclosures relating to key management personnel are set out in note 20.

Transactions with related parties

The following transactions occurred with related parties:

	2019 $	2018 $
Purchase of goods from controlling entity		
Purchase of vehicles and parts	45,252,889	12,211,956
Other transactions:		
Reimbursement of wages paid by parent on behalf of the company	–	45,409

Receivable from and payable to related parties

The following balances are outstanding at the reporting date in relation to transactions with related parties:

	2019 $	2018 $
Current payables:		
Trade payables to controlling entity	31,189,691	12,211,956

The controlling entity, SsangYong Motor Company, have provided a letter of support to the company confirming that amounts payable will not be called upon at least until the end of 18 months after the date of signing the financial report.

Terms and conditions

All transactions were made on normal commercial terms and conditions and at market rates.

Note 22. Events after the reporting period

No matter or circumstance has arisen since 31 December 2019 that has significantly affected, or may significantly affect the company's operations, the results of those operations, or the company's state of affairs in future financial years.

In the directors' opinion:

- the attached financial statements and notes comply with the Corporations Act 2001, the Australian Accounting Standards - Reduced Disclosure Requirements, the Corporations Regulations 2001 and other mandatory professional reporting requirements;
- the attached financial statements and notes give a true and fair view of the company's financial position as at 31 December 2019 and of its performance for the financial year ended on that date; and
- there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of directors made pursuant to section 295(5)(a) of the Corporations Act 2001.

On behalf of the directors

Myong Soo Kang

Director

THE INDEPENDENT AUDITORS' REPORT ON THE FINANCIAL STATEMENTS AT 31 MARCH 2020

To the Shareholder of the MAHINDRA Europe S.r.l.

Report on the financial information prepared for consolidation purposes

Opinion

We carried out the audit of the financial statements of MAHINDRA Europe S.r.l. (the Company), consisting of the balance sheet as of March 31, 2020, the income statement, the cash flow statement for the year ended on that date and the explanatory notes.

In our opinion, the Financial Statements, closed on March 31, 2020, provide a true and correct representation of the Company's balance sheet and financial position, of the economic result and of the cash flows for the year ended on that date in compliance with the rules Italian regulations governing the drafting criteria.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (ISA Italia). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the financial information section of our report. We are independent from the Company in accordance with the rules and principles relating to ethics and independence applicable in the Italian law to the audit of the balance.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibility of management and Statutory audit for the financial information

The Entity's Board of Directors is responsible for the preparation of the financial statements which provide a true and correct representation in accordance with the Italian rules governing the criteria of drafting and, within the terms established by law, for that part of the internal control which they consider necessary to allow the preparation of a financial statement that does not contain significant errors due to fraud or unintended behavior or events.

The Board of Directors is responsible for evaluating the Company's ability to continue to operate as a functioning entity and, in preparing the financial statements, for the appropriateness of the use of the going concern assumption, as well as for adequate information on the matter. The Board of Directors use the assumption of business continuity in preparing the financial statements unless they have assessed that the conditions exist for the liquidation of the Company or for the interruption of the business or have no realistic alternatives to these choices.

The board of statutory auditors is responsible for supervising, within the terms established by law, the process of preparing the Company's financial reporting.

Auditors' Responsibility for the financial information

Our objectives are to obtain reasonable assurance about whether the financial information as whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International standard (ISA Italia) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial information.

As part of an audit in accordance with the International standards (ISA Italia), we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial information, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances;
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management;
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Entity's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial information or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Entity to cease to continue as a going concern;
- Evaluate the overall presentation, structure and content of the financial information, including the disclosures, and whether the financial information represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

Judgment - art. 14, paragraph 2, letter e), of Legislative Decree 39/2010

The Board of Directors of MAHINDRA Europe S.r.l. are responsible for preparing the management report of MAHINDRA Europe S.r.l. as of March 31, 2020, including its consistency with the related financial statements and its compliance with the law.

We have carried out the procedures indicated in the revision principle (SA Italia) n ° 720B in order to express a judgment on the consistency of the management report with the financial statements of MAHINDRA Europe S.r.l. as of March 31, 2020 and its compliance with the law, as well as to issue one statement on any significant errors.

In our opinion, the management report is consistent with the financial statements of MAHINDRA Europe S.r.l. as of March 31, 2020 and is prepared in accordance with the law.

With reference to the declaration referred to in article 14, paragraph 2, letter e), of Legislative Decree 39/2010, issued on the basis of the knowledge and understanding of the company and its context acquired during the auditing activity, we have nothing to report.

"EURO amounts are translated for convenience into Indian Rupees at the exchange rate of Rs 83.13 = Euro 1 which is the average of the telegraphic transfer buying and selling rates quoted by the Mumbai Branch of State Bank of India on 31st March 2020".

A lakh is a unit in the Indian numering system equal to one hundred thousand (100.000).

This Financial Statement is in agreement with results of accountant records.

For The Board of Directors:

Pravin Shah

Chairman

Mumbai, 11th May 2020

Notes to the financial statements at 31/03/2020

Indian Rupees at the exchange rate of INR 83.13 = Eur 1
A lakh is a unit in the Indian numeric system equivalent to one hundred thousand (100.000).

Introduction

Dear Quotaholder,

The financial statements for the fiscal year ended 31/03/2020 show a loss of INR/ Lakhs (35.77) Eur (43.031), after amortizations amounting to INR/Lakhs 138.23 Eur 166.286.

Area of Business

Your company carries out its activities in the sector of the distribution of motor vehicles and spare parts, as official importer of Mahindra vehicles on the European markets like Italy, Spain, Slovakia, Hungary & other Eastern Europe countries.

Major events occurred during the company's fiscal year

The Company obtained from the Ministry of Transport the necessary approval extensions with the corresponding exemptions for its whole range of vehicles, in line with the applicable legal requirements.

The company launched the new models KUV100 Nxt and XUV500, in November 2019, the Goa Pik up plus in September 2019 and supported a huge marketing investment with relevant effect on the operating result.

The Company requested and obtained the renewal of the credit lines with Intesa Sanpaolo and Bank of America Merrill Lynch. They are used to finance vehicles and spare parts import, as well as short term financial needs.

Such credit lines are regulated by standard market conditions and grant the Company appropriate financial means to manage its activities.

The Company renewed the agreement with Fiditalia to offer its customers retail financing options to support vehicle sales.

During March 2020, the company temporarily closed its commercial activity in order to comply with the decrees issued by the Italian Government on the health emergency COVID-19.

Layout criteria

The criteria adopted for the preparation of the financial statements at 31/03/2020 take into account the changes introduced into domestic legislation by legislative decree 139/2015, transposing EU Directive 2013/34. Legislative decree 139/2015 amended the domestic accounting principles issued by the Italian Accounting Body (*Organismo Italiano di Contabilità* – OIC).

It was not feasible to calculate the cumulative past effects of the change in accounting principle and the determination of the past effects was too burdensome and therefore the new accounting principle OIC 15 and OIC 19 was not applied.

The financial statements have been drawn up in accordance with arts. 2423 of the Italian Civil Code, as appears from these Notes, which have been prepared pursuant to art. 2427 of the Italian Civil Code and are an integral part of the financial statements within the meaning and for the purposes of art. 2423.

Financial statement figures are expressed in whole Eur and INR/Lakhs by rounding off the relevant amounts to the nearest whole number. Any rounding-off differences were recorded under the item "INR/Lakhs Rounding-off reserve" included among the Shareholders' equity. Pursuant to article 2423(6) of the civil code, the notes were drawn up in thousands of Eur and INR/Lakhs/(in whole Eur and INR/Lakhs).

The balance sheet and P&L account items contained in these notes are set out in the order adopted in the respective section of the financial statements.

Valuation criteria

(article 2427(1)(1) of the Civil Code, OIC 12)

Financial statements items have been measured on a prudential, accruals and going-concern basis.

The prudential basis of accounting has resulted in the valuation of the single components of each asset or liability to avoid offsets between losses that should have been reported and profits that should not have been recognised as they have not been realised.

Under the accruals basis of accounting, the effect of transactions and other events has been reflected on the accounts and attributed to the fiscal year to which the transactions and events refer, and not to that in which the relevant changes to cash in hand and at bank (collections and payments) have taken place.

Pursuant to the principle of materiality, the recording, valuation, presentation and reporting obligations have not been complied with where conformance there to would have been immaterial for the purposes of a true and fair view of the position. The criteria identified for the purposes of the implementation of the principle of materiality had be not applied because there were no cases.

The consistent application of accounting principles ensures the comparability of the company's financial statements drawn up in different fiscal years.

Financial statement items have been recorded and presented having regard to the substance of the underlying transaction or contract.

Exceptions

(article 2423 (5) of the Civil Code)

No exceptional cases have occurred which have made it necessary to adopt the derogations pursuant to article 2423(5) of the civil code.

Fixed assets

Intangible assets

These have been recorded at their historical purchase cost net of the relevant yearly amortisation charged to the individual items.

The costs relating to industrial patent rights and intellectual property rights, licenses, concessions and trademarks whose effects regard several different years are depreciated over a period of 5 business years, while the costs for the approval of vehicles are amortized over a period of 3 business years.

Software licenses were recorded in the assets and are amortized over a period of 2 business years.

Improvements to third party assets are amortized with rates depending upon the duration of the contract.

In the event that, regardless of the depreciation booked, a permanent loss of value occurs, the asset is written down accordingly. If in the following years the reasons for the write-down cease to exist, the original value, adjusted by depreciation, is restored.

Tangible assets

These have been recorded at their purchase cost and are adjusted by the relevant accumulated depreciation.

The book value includes any ancillary costs and the costs incurred for the use of the asset, less any trade discounts and any significant cash discounts.

The depreciation charged to profit and loss account has been calculated on the basis of the remaining useful life of the assets, taking into account their use, destination and economic-technical life, which we believe are well reflected by the following rates, unchanged compared to the previous fiscal year and halved in the year in which the asset has entered operation:

PLANTS AND MACHINERY

- Specific plants 15%
- Generic plants 10%
- Alarm systems 30%
- Telephone systems 20%

INDUSTRIAL AND COMMERCIAL EQUIPMENT

- Miscellaneous equipment 15%
- Presses 15%

OTHER GOODS

- Electronic machines 20%
- Motor vehicles 20%
- Office furniture and machinery 12%
- Cars 25%
- Fixed equipment 10%

In the event that, regardless of the depreciation booked, a permanent loss of value occurs, the fixed assets are written down accordingly. If in the following years the reasons for the write-down cease to exist, the original value, adjusted by depreciation, is restored.

Finance lease transactions

Finance lease transactions are shown in the financial statements using the net asset method, by charging the lease payments to the profit and loss account on an accruals basis. The additional information required by the law on the representation of finance lease agreements under the financial method is contained in a specific section of the notes.

Accounts receivable

The amortised cost method was not applied since its effects are immaterial for the purpose of giving a true and fair view. Therefore, accounts receivable have been recorded at their presumed realisable value, without prejudice for the possibility to apply time discounting. The adjustment of the nominal value of receivables to the assumed realizable value is obtained through a reserve for bad debts, taking into consideration the general and industrial economic conditions and country risk.

Accounts receivable recorded in the financial statements before the fiscal year starting 1 January 2016 have been recorded at their presumed realisable value since, as provided by accounting principle OIC 15, it was decided not to apply the amortised cost method and time discounting.

The nominal value of the accounts receivable was adjusted to the presumed realisable value by a bad debt reserve, having regard also to any indicators of permanent impairment.

Accounts receivable originally due within one year and subsequently transformed into long-term receivables were recorded in the balance sheet among financial assets.

Accounts receivable are written off when the contractual rights to receive the relevant cash flows have been extinguished or when the risks in connection with the payment of the receivables have been transferred.

Accounts payable

The amortised cost method was not applied since its effects are immaterial for the purpose of giving a true and fair view. Therefore, accounts payable have been recorded at their nominal value, without prejudice for the possibility to apply time discounting.

Accounts payable recorded in the financial statements before the fiscal year starting 1 January 2016 have been recorded at their nominal value since, as provided by accounting principle OIC 19, it was decided not to apply the amortised cost method and time discounting.

Accrued income/liabilities – pre payments / deferred income

These have been determined on an accruals basis.
With regard to accrued income / liabilities and prepayments/deferred income of a duration exceeding one year, we checked the conditions for their original entry and adopted any necessary changes.

Inventory

Raw materials, auxiliary materials and finished products have been recorded at the lower of purchase or manufacturing cost and realisable value as inferred from market trend, applying the weighted average cost method for spare parts and the specific cost method for vehicles.

Production cost includes the direct and indirect costs incurred during production, which are necessary for stocks to be in the current place and conditions.

On 31/03/2020 the company has not goods-in-process and work-in-progress goods.

The value thus obtained is then adjusted by the “provision for stock obsolescence” in order to take into account those goods which are expected to be realised at a value lower than cost.

Any stocks which were written down but in respect of which in subsequent years the reasons for the write-down to their realisation value ceased to exist, were restored to their original value.

Securities

The company does not hold any securities.

Shareholdings

The company does not hold any shareholdings in subsidiary and affiliated.

The shareholdings included among current assets, which do not represent a long-term investment, have been valued at the lower of purchase cost and realisable value as inferred from market trend.

Treasury shares

The company does not hold any treasury shares.

Derivative financial instruments

The company does not hold any derivative financial instruments.

Provisions for contingent liabilities and charges

These provisions are set aside for the coverage of losses or liabilities that are certain or likely to arise, but whose amount or date of occurrence could not be determined at the year-end.

The provisions have been measured on a prudential and accruals basis and no generic funds without economic justification were created.

Any potential liabilities were carried to the financial statements and recorded in the relevant provisions as they were considered likely to arise and their amount could be reasonably estimated.

Provision for employees’ leaving indemnity

This consists of the amounts actually accrued in favour of the employees pursuant to the law and the current collective bargaining agreements, taking into account any elements of remuneration paid on a continuous basis.

The provision includes the total payments accrued for employees at the year-end net of any advances paid, and assuming termination of their employment relationship at such date.

The provision does not include any amounts accrued starting from 1 January 2007 that have been paid into complementary pension schemes pursuant to legislative decree no. 252 dated 5 December 2005 (or transferred to the special-purpose fund managed by the Italian social security authority - INPS).

Income taxes

The provision for taxes has been set aside on an accruals basis and includes the following:

- accruals in respect of the taxes paid or to be paid for the year, determined at the current rates and in accordance with the rules in force;
- the amount of deferred tax assets or liabilities in respect of temporary differences which arose or were written off in the year;
- any adjustments to the balance of deferred taxes to account for changes in the tax rates occurred/for the introduction of the new tax during the year.

Deferred IRES assets and liabilities are calculated on the temporary differences between the assets and liabilities determined in accordance with civil code principles and the corresponding tax values, solely with regard to the company.

Current IRAP and any deferred IRAP assets and liabilities are determined solely with regard to the company.

Recognition of income

Proceeds from sales are recognised at the time of the transfer of ownership which usually coincides with the delivery or forwarding of the goods;

Financial income and income from the provision of services is recognised on an accruals basis.

Revenue and proceeds, costs and charges related to transactions in foreign currency are determined at the exchange rate in force at the date when the relevant transaction takes place.

Only the accrued portion of the income and costs related to buy/sell-back transactions, including the difference between the spot price and the forward price, is recognised.

Adjustment criteria

The company not applied the adjustment criteria.

Criteria for the translation of accounts in foreign currency

Accounts payable and receivable denominated in foreign currency and recorded at the exchange rates in force on the date of the transaction, are retranslated at the exchange rates ruling at the year-end as determined by Bank of Italy.

In particular, assets and liabilities which constitute assets and liabilities in foreign currency are recorded at the spot exchange rate ruling at the year-end and the relevant exchange gains and losses have been taken to the Profit and Loss Account under item 17bis “Exchange gains and losses”.

Any net gain deriving from the adjustment of the items in foreign currency to the year-end exchange rates is included in the result for the year and, at the time of the financial statements approval and appropriation of the operating result to the legal reserve, the part which is not offset against the loss for the year, if any, is apportioned to a reserve which is not distributable until the gain is realised.

Non-current assets and liabilities in foreign currency are recorded at the exchange rate ruling at the time of purchase.

No significant effects of the changes to the exchange rates occurred between the year-end and the financial statements preparation date. (article 2427(1)(6-bis) of the Civil Code).

Commitments, guarantees and potential liabilities

Commitments, which are not recorded in the balance sheet, consist of obligations assumed by the company vis-à-vis third parties and arising from legal arrangements with mandatory effects but not yet implemented by either party. Commitments include both commitments in respect of which both the relevant execution and amount is known (for instance, on buy/sell-back transactions) and commitments which are definitely going to be executed but whose amount is unknown (for example, agreement with a price adjustment clause). The amount of the commitments is their nominal value as inferred from the relevant documentation.

The company didn't provide guarantees include personal guarantees and collaterals.

C) Current assets

I. Inventory

EUR

Balance at 31/03/2020	Balance at 31/03/2019	Difference
11.997.644	4.552.665	7.444.979

INR

Balance at 31/03/2020	Balance at 31/03/2019	Difference
9,973.64	3,784.63	6,189.01

Accounting policies have been applied consistently with the prior year as explained in the introduction to these notes.

The adopted assessment does not significantly differ from the one using the current cost approach.

The value of inventories is composed of:

EUR

Description	**Amount at 31/03/2020**	**N. vehicles**
Vehicles in stock	**9.994.954**	1372
Vehicles km 0	**96.585**	7
Vehicles in transit	**0**	0
Spare parts and accessories	**1.640.948**	N/A
Equipment and advertising	**265.174**	N/A
Total	**11.997.644**	

INR

Description	**Amount at 31/03/2020**	**N. vehicles**
Vehicles in stock	**8,308.81**	1372
Vehicles km 0	**80.29**	7
Vehicles in transit	**–**	0
Spare parts and accessories	**1,364.10**	N/A
Equipment and advertising	**220.44**	N/A
Total	**9,973.64**	

The increase in vehicles in stock is due to the supply of the KUV100 model, while vehicles at Km. 0 are related to the XUV5oo W10 model.

The item vehicles in stock refers to cars in storage at the Ariccia headquarters, at the depository company located in Spain and at the depository company located in Livorno.

There are no commitments contractually undertaken for works and services still to be performed at year end

The Company has not used its stock obsolescence provision, which was amounting to INR/Lakhs 0 at 31/03/2020.

Any contractual undertakings in respect of works and services to be carried out at the year-end.

Total	5,532.72	1,351.15	6,883.87	6,642.72	36.94	–

The company took advantage of the possibility not to follow the amortised cost method and not to time discount accounts receivable.

Therefore, accounts receivable have been recognised at their presumed realisable value.

The item “Credits towards the Controlling company” includes the credit for repairs and services rendered on behalf or to the benefit of the parent company, as well as the costs for advertising campaigns.

The item “Other accounts receivable” at 31/03/2020, for an amount of INR/Lakhs 43.57 Eur 52,409 consists of the following :

Description	EUR Amount
Receivables from insurance for TFR	44.440
Receivables from insurance companies	846
Receivables from INAIL	6.997
Receivables from others	125
Total	52.409

Description	INR Amount
Receivables from insurance for TFR	36.94
Receivables from insurance companies	0.70
Receivables from INAIL	5.82
Receivables from employees	0.10
OTHERS	43.57

The deferred tax assets of INR/Lakhs 204.20 Eur 245.644 are in connection with tax loss carryovers in an amount of INR/Lakhs 850.85 Eur 1.023.517. For a description of the reasons which make it possible to recognise the potential tax benefit in connection with the losses, please refer to the relevant paragraph of these notes.

Break-down of the accounts receivable by geographical area

The following table shows a break-down of the accounts receivable at 31/03/2020 by geographical area (article 2427(1)(6) of the Civil Code):

EUR

Accounts receivable by geographical area	From customers	From controlling companies	From undertakings under control by the controlling companies	From controlling companies	Advances on tax payments

B) Provision for contingent liabilities and charges
(article 2427(1)(4) of the Civil Code)

EUR

Balance at 31/03/2020	Balance at 31/03/2019	Difference
27.863	27.863	

INR

Balance at 31/03/2020	Balance at 31/03/2019	Difference
23.16	23.16	0

EUR

	Provision for pension and similar benefits	Provision for taxes, including deferred taxes	Derivative financial instruments	Other provisions companies	Total
Value at the beginning of the year				27.863	27.863
Changes in the year:					
Increases as a result of changes in the fair value					
Decreases as a result of changes in the fair value					
Total changes					
Value at the end of the year				27.863	27.863

INR

	Provision for pension and similar benefits	Provision for taxes, including deferred taxes	Derivative financial instruments	Other provisions companies	Total
Value at the beginning of the year				23.16	23.16
Changes in the year:					
Increases as a result of changes in the fair value					
Decreases as a result of changes in the fair value					
Total changes					
Value at the end of the year				23.16	23.16

The increases are in connection with the accrual for the year, while decreases consist of amounts used in the year.

The item "Other provisions" at 31/03/2020, of INR/Lakhs 23.16 Eur 27,863 is composed as follows: (article 2427(1)(7) of the civil code).

EUR

Description	**As at 31/03/2020**
Fund for guarantees	**27.863**
Fund for tax assessment	**0**
	27.863

INR

Description	**As at 31/03/2020**
Fund for guarantees	**23.16**
Fund for tax assessment	**0**
	23.16

The accrual to these provisions was justified by the fact that (i) the other provisions were made to the Warranty fund, because it has been considered not adequate to cover contract discrepancies between what has been acknowledged by the Company and what has been received by the Parent company.

During the year, the value of the provision for warranty not changed and is deemed to be enough.

C) Indemnity for Employees leaving the Company
(article 2427(1)(4) of the Civil Code)

EUR

Balance at 31/03/2020	Balance at 31/03/2019	Difference
155.870	145.430	10.440

INR

Balance at 31/03/2020	Balance at 31/03/2019	Difference
129.57	120.90	8.68

The difference can be described as follows.

EUR

	Indemnity for Employees leaving company
Value at the beginning of the year	**145.450**
Changes in the year:	**–**
Increases as a result of changes in the fair value	**10.440**
Total changes	**10.440**
Value at the end of the year	**155.870**

INR

	Indemnity for Employees leaving company
Value at the beginning of the year	**120.90**
Changes in the year:	**8.68**
Increases as a result of changes in the fair value	**–**
Total changes	**8.68**
Value at the end of the year	**129.57**

The provision consists of the amounts payable at 31/03/2020 to the employees on the company's payroll at that date, net of any advances paid.

This consists of the amounts actually accrued in favour of the employees pursuant to the law and the current collective bargaining agreements, taking into account any elements of remuneration paid on a continuous basis.

The provision includes the total amounts accrued at 31 December 2006 for employees at the year-end, net of any advances paid, and assuming termination of their employment relationship at such date.

The provision does not include any amounts accrued starting from 1 January 2007 that have been paid into complementary pension schemes pursuant to legislative decree no. 252 dated 5 December 2005 (or transferred to the special-purpose fund managed by the Italian social security authority - INPS).

In the year after 31/03/2020 employees are not expected to receive a estimated employees' leaving indemnity as a result of incentivised dismissals and corporate reorganisation plans.

D) Accounts payable
(article 2427(1)(4) of the Civil Code)

EUR

Balance at 31/03/2020	Balance at 31/03/2019	Difference
19.940.282	10.712.662	9.227.620

INR

Balance at 31/03/2020	Balance at 31/03/2019	Difference
16,576.36	8,905.44	7,670.92

The balance can be broken down by due date as follows (article 2427(1)(6) of the Civil Code):

EUR

	Value at the beginning of the year	**Changes in the year**	**Value at the end of the year**	**Falling due within one year**	**Falling due after more than one year**	**Due after more than five years**
Accounts payable to banks	3.444.320	547.324	3.991.644	3.991.644		
Accounts payable to suppliers	1.998.772	207.043	2.205.815	2.205.815		
Accounts payable to controlling companies	4.900.618	8.548.203	13.448.821	13.448.821		
Taxes payable	94.776	(79.537)	15.239	15.239

Other accounts payable	219.650	9.816	229.466	229.466		
Total	**10.712.662**	**9.227.620**	**19.940.282**	**19.940.282**		

INR

	Value at the beginning of the year	**Changes in the year**	**Value at the end of the year**	**Falling due within one year**	**Falling due after more than one year**	**Due after more than five years**
Accounts payable to banks	2,863.26	454.99	3,318.25	3,318.25		
Accounts payable to suppliers	1,661.58	172.11	1,833.69	1,833.69		
Accounts payable to controlling companies	4,073.88	7,106.12	11,180.00	11,180.00		
Taxes payable	78.79	(66.12)	12.67	12.67		
Accounts payable to social security institutions	45.33	(4.35)	40.98	40.98		
Other accounts payable	182.60	8.16	190.76	190.76		
Total	**8,905.44**	**7,670.92**	**16,576.36**	**16,576.36**		

The balance of the accounts payable to banks at 31/03/2020, in an amount of INR/Lakhs 3,318.25

Eur 3.991.644 including bank loans, corresponds to the full payable including principal amount, interest and ancillary charges which have come to maturity and can be collected.

The item "Advances" includes any advances from customers on goods and services not yet supplied or rendered; this item includes advance payments, as earnest money or otherwise, received in connection with the sale of tangible, intangible and financial fixed assets.

Accounts payable from suppliers are recognised at their nominal value of net of trade discounts; cash discounts are recorded upon payment. The nominal value of these payables has been adjusted in case of returns or allowances (invoice adjustments) by the corresponding amount agreed with the other party.

The company took advantage of the possibility not to follow the amortised cost method and/or not to time discount accounts payable since 2016.

The company adopted the following accounting policies: no time discounting of accounts payable due within one year; no time discounting of accounts payable if the effective interest rate does not significantly differ from market rate; no adoption of the amortised cost method for accounts payable due within one year, no adoption of the amortised cost method if transaction costs, commission fees and any other difference between initial value and value on expiry are of negligible amount.

With regard to the accounts payable to controlled companies and undertakings under control by the controlling companies, we note that they refer to vehicles' and spare parts' supplies under normal market conditions.

The item "Tax liabilities" only includes the actual taxes payable, while any likely tax liabilities or tax liabilities whose amount or date of occurrence is doubtful or deferred tax liabilities, are recorded in item B.2 of the liabilities section of the balance sheet (Provision for taxes).

The accounts payable falling due within one year not include accounts payable backed by covenants.

No significant changes occurred in the amount of Tax liabilities.

In the tax payables item are registered IRAP tax debt €3.441 INR/Lakhs 2.86 net of advances paid during the year for €16.921 INR/Lakhs 14.07

Breakdown of the accounts payable by geographical area

Costs of raw materials, subsidiary materials, consumables and goods and costs of services

They are closely related to the information provided in the Directors' report and to point A (Revenue) of the Profit and loss account.

Personnel costs

This item includes all employee costs, including bonuses, promotions, cost-of-living increases, untaken holidays and the provisions made pursuant to the law and the national collective bargaining agreements.

Depreciation of tangible assets

Depreciation has been calculated on the basis of the useful life of the assets and their contribution to the production process.

Other write-downs of fixed assets

The item is not reflected in the present financial statements.

Write-downs of accounts receivable included among current assets and of liquid assets

The item is not reflected in the present financial statements.

Accruals to provisions for contingent liabilities and charges

The item is not reflected in the present financial statements.

Other accruals

The item is not reflected in the present financial statements.

Miscellaneous running costs

They refer to taxes other than income tax, subscriptions and other charges.

The company has not entered expenses for exceptional amount or incidence.

Pursuant to article 2427(1)(14) of the civil code, we set out below the required information on deferred tax assets and liabilities:

Deferred tax assets and liabilities

Deferred tax assets have been recorded since in the years in which the underlying deductible temporary differences are going to be reversed there is reasonable certainty that taxable income not lower than the amount of the differences to be reversed is going to be realized.

The main temporary differences that have given rise to deferred tax assets and liabilities and their effects are shown in the following table.

Pre-paid taxes were not recognized for provisions for warranties, due to the elimination of the temporary reabsorbable differences in subsequent years.

Deferred tax assets in an amount of INR/Lakhs 26.13 Eur 31.433 in connection with tax losses for the year or loss carryovers of prior years have been recorded since the conditions required by the accounting principles for the recognition of the future benefit were met, with particular regard to the reasonable certainty that in future the company will generate sufficient taxable income to offset the losses.

On the basis of the information available also taking into account the contents of the budget for the next financial year being approved, the directors consider the assumption of going concern to be appropriate.

Employee information

(article 2427(1)(15) of the Civil Code)

Compared to the previous year the personnel broken down by category has changed as shown below:

Staff	31/03/2020	31/03/2019	Change
Executives	**1**	1	0
Middle Manager	**2**	2	0
Employees	**8**	8	0
Labourers	**4**	4	0
Others	**1**	–	1
	16	**15**	**1**

The national collective bargaining agreement for companies in the commercial sector applies.

The increase is due to the acquisition of an administrative employee with a supply contract in March 2020.

Industrial relations are good and there are no litigations with employees still working or dismissed.

Information concerning the Auditor's fees

(article 2427(1)(16-bis) of the civil code)

As required by law, we set out below the amount of fees charged for services rendered by the audit company firm and by entities that are members of its network:

	EUR
Description	Fee
Audit of annual accounts	10.111
Total fees due to the auditor or audit company	10.111

	INR
Description	Fee
Audit of annual accounts	8.41
Total fees due to the auditor or audit company	8.41

The members of the Board of Directors renounced the remuneration due for the position held in the Mahindra group companies.

Information on significant events which occurred after the end of the financial year

Among the events that occurred after the end of the financial year, it is necessary to point out that the entire national, European and now global territory is suffering a major health and economic crisis due to the pandemic of the so-called Coronavirus.

Substantial information on what has now been identified as the SARS-CoV-2 virus emerged in early 2020.

The coronavirus pandemic (Covid-19) continues to spread worldwide at the time of publication of the financial statements for the year ended 31/03/2020.

However, starting from the second half of April 2020 the numbers of the pandemic are decreasing, and on 4 May the so-called Phase 2, which provides for the reopening of almost all industrial and many commercial activities, including those in the automotive sector, officially started in Italy.

This pandemic is unprecedented and represents a significant challenge for the global economy and has therefore created significant uncertainty about the future global economic outlook; it will certainly have a negative impact on the numbers in our first quarter of 2020, but the final impact on the year-end result cannot be forecast at the moment.

As of the date of this report, the Company has adopted measures to ensure the safety of its employees in compliance with local regulations and the implementation of smart-working where possible. The Company has also adopted measures to ensure that employees are as productive as possible while fulfilling their duties to customers and other business partners, despite the fact that the Company has made use of the Wage Subsidy Fund for the months of April and May 2020.

In March 2020, the Italian Government ordered the closure of non-core commercial activities, which included the marketing of vehicles. The company closed its commercial activities following the closure of its commercial network on 16 March 2020.

This resulted in the non-delivery of approximately 90 vehicles and spare parts with the consequent loss of income on these financial statements of approximately Euro 900,000, an increase in assets by approximately Euro 600,000 and a loss of cash flow amounting to approximately Euro 1,000,000.

In light of the information provided in these notes and in the Directors' Report, the Board of Directors believes that the events relating to Covid-19 will not affect the Company's ability to continue as a going concern over the next 12 months.

Information on the company which prepares the consolidated financial statements for the larger/smaller set of companies which the company is a member of in a capacity as controlled undertaking

As required by law, we set out below the information pursuant to article 2427(1)(22-quinquies and sexies) of the civil code.

To the extraordinary reserve		
To dividends		

Final considerations

These financial statements, composed of the balance sheet, profit and loss account and notes, are a true and fair view of the company's state of affairs and economic result for the year and are in accordance with the underlying accounting records.

We invite the QuotaHolder to approve the financial statements in their current form and all the single items, to forward the loss of the financial year as on 31/03/2020, for Eur (43.031), INR/Lakhs (35.77) to the next year.

The Chairman of the Board of Directors
Pravin Kumar Shah

INDEPENDENT AUDITORS' REPORT

Report on the Financial Statements to the shareholder of Mahindra and Mahindra South Africa Proprietary Limited

Opinion

We have audited the annual financial statements of Mahindra and Mahindra South Africa Proprietary Limited (the company) set out on pages herein, which comprise the statement of financial position as at 31 March 2020, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the annual financial statements, comprising a summary of significant accounting policies and other explanatory information.

In our opinion, the annual financial statements present fairly, in all material respects, the financial position of Mahindra and Mahindra South Africa Proprietary Limited as at 31 March 2020, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the financial statements section of our report. We are independent of the company in accordance with the sections 290 and 291 of the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (Revised January 2018), parts 1 and 3 of the Independent Regulatory Board for Auditors' Code of Professional Conduct for Registered Auditors (Revised November 2018) (together the IRBA Codes) and other independence requirements applicable to performing audits of financial statements in South Africa. We have fulfilled our other ethical responsibilities, as applicable, in accordance with the IRBA Codes and in accordance with other ethical requirements applicable to performing audits in South Africa. The IRBA Codes are consistent with the corresponding sections of the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants and the International Ethics Standards Board for Accountants' International Code of Ethics for Professional Accountants (including International Independence Standards) respectively. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

The directors are responsible for the other information. The other information comprises the information included in the document titled "Mahindra and Mahindra South Africa Proprietary Limited annual financial statements for the year ended 31 March 2020", which includes the Directors' Report as required by the Companies Act of South Africa. The other information does not include the annual financial statements and our auditor's report thereon.

Our opinion on the annual financial statements does not cover the other information and we do not express an audit opinion or any form of assurance conclusion thereon.

In connection with our audit of the annual financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the Annual Financial Statements

The directors are responsible for the preparation and fair presentation of the annual financial statements in accordance with International Financial Reporting Standards and the requirements of the Companies Act of South Africa, and for such internal control as the directors determine is necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the Annual Financial Statements

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual financial statements.

As part of an audit in accordance with International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the annual financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the annual financial information of the entity or business activities to express an opinion on the annual financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Total cash at end of the year	11	**22,599,446**	(120,671,440)

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

ACCOUNTING POLICIES

1. Significant accounting policies

The principal accounting policies applied in the preparation of these annual financial statements are set out below.

1.1 Basis of preparation

The annual financial statements have been prepared on the going concern basis in accordance with, and in compliance with, International Financial Reporting Standards ("IFRS") and International Financial Reporting Interpretations Committee ("IFRIC") interpretations issued and effective at the time of preparing these annual financial statements and the Companies Act of South Africa, as amended.

These annual financial statements comply with the requirements of the SAICA Financial Reporting Guides as issued by the Accounting Practices Committee and the Financial Reporting Pronouncements as issued by the Financial Reporting Standards Council.

The annual financial statements have been prepared on the historic cost convention, unless otherwise stated in the accounting policies which follow and incorporate the principal accounting policies set out below. They are presented in South African Rands, which is the company's functional currency.

These accounting policies are consistent with the previous period, except for the changes set out in note 2.

1.2 Significant judgements and sources of estimation uncertainty

The preparation of annual financial statements in conformity with IFRS requires management, from time to time, to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. These estimates and associated assumptions are based on experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected.

Critical judgements in applying accounting policies

The critical judgements made by management in applying accounting policies, apart from those involving estimations, that have the most significant effect on the amounts recognised in the financial statements, are outlined as follows:

Lease classification

The company is party to leasing arrangements, both as a lessee and as a lessor. The treatment of leasing transactions in the annual financial statements is mainly determined by whether the lease is considered to be an operating lease or a finance lease. In making this assessment, management considers the substance of the lease, as well as the legal form, and makes a judgement about whether substantially all of the risks and rewards of ownership are transferred.

Key sources of estimation uncertainty

Contract liabilities

The fair value of contract liabilities from service plans is management's best estimate of the company's future income and cost based on the estimated service cost that would occur for the selected models over a period of three to five years adjusted for inflation and possible price increases in parts and labour used in the service of the selected model.

Provision for warranties

Warranty provisions are management's best estimate of the company's liability (after the expected reimbursement from the manufacturer) on vehicles under two, three or five year warranties based on the current year warranty claims occurred. The cost per day calculated on those claims is used to estimate the future cost for the remaining warranty days under consideration.

The warranty provision has been discounted to present value and the incremental amount pertaining to the current financial year has been adjusted in cost of sales.

Fair value estimation

The company measures financial instruments at fair value at each reporting date. The fair values of financial instruments measured at amortised cost are disclosed should it be determined that the carrying value of these instruments do not reasonably approximate their value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

In the principal market for the asset or liability; or

In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. At fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in the highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. At fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in the highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities; or
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable; or
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

1.3 Property, plant and equipment

An item of property, plant and equipment is recognised as an asset when it is probable that future economic benefits associated with the item will flow to the company, and the cost of the item can be measured reliably.

Property, plant and equipment is initially measured at cost. Cost includes all of the expenditure which is directly attributable to the acquisition or construction of the asset, including the capitalisation of borrowing costs on qualifying assets and adjustments in respect of hedge accounting, where appropriate.

Property, plant and equipment is subsequently stated at cost less accumulated depreciation and any accumulated impairment losses.

Depreciation of an asset commences when the asset is available for use as intended by management. Depreciation is charged to write off

NOTES TO THE ANNUAL FINANCIAL STATEMENTS (Contd.)

the asset's carrying amount over its estimated useful life to its estimated residual value, using a method that best reflects the pattern in which the asset's economic benefits are consumed by the company. Leased assets are depreciated in a consistent manner over the shorter of their expected useful lives and the lease term. Depreciation is not charged to an asset if its estimated residual value exceeds or is equal to its carrying amount. Depreciation of an asset ceases at the earlier of the date that the asset is classified as held for sale or derecognised.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Computer equipment	Straight line	4 years
Computer software	Straight line	5 years
Furniture and fixtures	Straight line	3 years
Leasehold improvements	Straight line	3 years
Motor vehicles	Straight line	4 years
Motor vehicles - Held for rental	Straight line	4 years
Office equipment	Straight line	6 years
Plant and machinery	Straight line	3 years

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its continued use or disposal. Any gain or loss arising from the derecognition of an item of property, plant and equipment, determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item, is included in profit or loss when the item is derecognised.

1.4 Financial instruments

Financial instruments held by the company are classified in accordance with the provisions of IFRS 9 Financial Instruments.

Broadly, the classification possibilities, which are adopted by the company, as applicable, are as follows:

Financial assets which are debt instruments:

- Amortised cost. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is met by holding the instrument to collect contractual cash flows); or
- Fair value through other comprehensive income. (This category applies only when the contractual terms of the instrument give rise, on specified dates, to cash flows that are solely payments of principal and interest on principal, and where the instrument is held under a business model whose objective is achieved by both collecting contractual cash flows and selling the instruments); or
- Mandatorily at fair value through profit or loss. (This classification automatically applies to all debt instruments which do not qualify as at amortised cost or at fair value through other comprehensive income); or
- Designated at fair value through profit or loss. (This classification option can only be applied when it eliminates or significantly reduces an accounting mismatch).

Financial liabilities:

- Amortised cost; or
- Mandatorily at fair value through profit or loss. (This applies to contingent consideration in a business combination or to liabilities which are held for trading); or
- Designated at fair value through profit or loss. (This classification option can be applied when it eliminates or significantly reduces an accounting mismatch; the liability forms part of a group of financial instruments managed on a fair value basis; or it forms part of a contract containing an embedded derivative and the entire contract is designated as at fair value through profit or loss).

Note 30 Financial instruments and risk management presents the financial instruments held by the company based on their specific classifications.

Trade and other receivables

Classification

Trade and other receivables, excluding, when applicable, VAT and prepayments, are classified as financial assets subsequently measured at amortised cost.

They have been classified in this manner because their contractual terms give rise, on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding, and the company's business model is to collect the contractual cash flows on trade and other receivables.

Recognition and measurement

Trade and other receivables are recognised when the company becomes a party to the contractual provisions of the receivables. They are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost.

The amortised cost is the amount recognised on the receivable initially, minus principal repayments, adjusted for any loss allowance.

Application of the effective interest method

For receivables which contain a significant financing component, interest income is calculated using the effective interest method, and is included in profit or loss in investment income.

The application of the effective interest method to calculate interest income on trade receivables is dependent on the credit risk of the receivable as follows:

- The effective interest rate is applied to the gross carrying amount of the receivable, provided the receivable is not credit impaired. The gross carrying amount is the amortised cost before adjusting for a loss allowance.
- If a receivable is a purchased or originated as credit-impaired, then a credit-adjusted effective interest rate is applied to the amortised cost in the determination of interest. This treatment does not change over the life of the receivable, even if it is no longer credit-impaired.
- If a receivable was not purchased or originally credit-impaired, but it has subsequently become credit-impaired, then the effective interest rate is applied to the amortised cost of the receivable in the determination of interest. If, in subsequent periods, the receivable is no longer credit impaired, then the interest calculation reverts to applying the effective interest rate to the gross carrying amount.

Trade and other receivables denominated in foreign currencies

When trade and other receivables are denominated in a foreign currency, the carrying amount of the receivables are determined in the foreign currency. The carrying amount is then translated to the Rand equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in other operating gains (losses).

Details of foreign currency risk exposure and the management thereof are provided in the financial instruments and risk management note.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS (Contd.)

Impairment

The company recognises a loss allowance for expected credit losses on trade and other receivables, excluding VAT and prepayments. The amount of expected credit losses is updated at each reporting date.

The company measures the loss allowance for trade and other receivables at an amount equal to lifetime expected credit losses (lifetime ECL), which represents the expected credit losses that will result from all possible default events over the expected life of the receivable.

Measurement and recognition of expected credit losses

The company makes use of a provision matrix as a practical expedient to the determination of expected credit losses on trade and other receivables. The provision matrix is based on historic credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current and forecast direction of conditions at the reporting date, including the time value of money, where appropriate.

An impairment gain or loss is recognised in profit or loss with a corresponding adjustment to the carrying amount of trade and other receivables, through use of a loss allowance account. The impairment loss is included in other operating expenses in profit or loss as a movement in credit loss allowance.

Write off policy

The company writes off a receivable when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Receivables written off may still be subject to enforcement activities under the company recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

Credit risk

Details of credit risk are included in the trade and other receivables note and the financial instruments and risk management note.

Derecognition

Refer to the derecognition section of the accounting policy for the policies and processes related to derecognition.

Any gains or losses arising on the derecognition of trade and other receivables is included in profit or loss in the derecognition gains (losses) on financial assets at amortised cost line item.

Trade and other payables

Trade payables are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Classification

Trade and other payables, excluding VAT and amounts received in advance, are classified as financial liabilities subsequently measured at amortised cost.

Recognition and measurement

They are recognised when the company becomes a party to the contractual provisions, and are measured, at initial recognition, at fair value plus transaction costs, if any.

They are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

If trade and other payables contain a significant financing component, and the effective interest method results in the recognition of interest expense, then it is included in profit or loss in finance costs.

Trade and other payables expose the company to liquidity risk and possibly to interest rate risk. Refer to note 30 for details of risk exposure and management thereof.

Trade and other payables denominated in foreign currencies

When trade payables are denominated in a foreign currency, the carrying amount of the payables are determined in the foreign currency. The carrying amount is then translated to the Rand equivalent using the spot rate at the end of each reporting period. Any resulting foreign exchange gains or losses are recognised in profit or loss in the other operating gains (losses).

Details of foreign currency risk exposure and the management thereof are provided in the financial instruments and risk management note.

Derecognition

Refer to the “derecognition” section of the accounting policy for the policies and processes related to derecognition.

Cash and cash equivalents

Cash and cash equivalents are stated at carrying amount which is deemed to be fair value.

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments that are readily convertible to a known amount of cash and are subject to an insignificant risk of changes in value. These are initially and subsequently recorded at fair value.

Bank overdrafts

Bank overdrafts are initially measured at fair value, and are subsequently measured at amortised cost, using the effective interest rate method.

Derecognition

Financial assets

The company derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the company retains substantially all the risks and rewards of ownership of a transferred financial asset, the company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

Financial liabilities

The company derecognises financial liabilities when, and only when, the company obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

Reclassification

Financial assets

The company only reclassifies affected financial assets if there is a change in the business model for managing financial assets. If a reclassification is necessary, it is applied prospectively from the reclassification date. Any previously stated gains, losses or interest are not restated.

The reclassification date is the beginning of the first reporting period following the change in business model which necessitates a reclassification.

Financial liabilities

Financial liabilities are not reclassified.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS (Contd.)

1.5 Tax

Current tax assets and liabilities

Current is based on taxable profit for the year.

Current tax for current and prior periods is, to the extent unpaid, recognised as a liability. If the amount already paid in respect of current and prior periods exceeds the amount due for those periods, the excess is recognised as an asset.

Current tax liabilities (assets) for the current and prior periods are measured at the amount expected to be paid to (recovered from) the tax authorities, using the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and liabilities

A deferred tax liability is recognised for all taxable temporary differences, except to the extent that the deferred tax liability arises from the initial recognition of an asset or liability in a transaction which at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised. A deferred tax asset is not recognised when it arises from the initial recognition of an asset or liability in a transaction at the time of the transaction, affects neither accounting profit nor taxable profit (tax loss).

A deferred tax asset is recognised for the carry forward of unused tax losses to the extent that it is probable that future taxable profit will be available against which the unused tax losses can be utilised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Tax expenses

Current and deferred taxes are recognised as income or an expense and included in profit or loss for the period, except to the extent that the tax arises from:

- a transaction or event which is recognised, in the same or a different period, to other comprehensive income, or
- a business combination.

Current tax and deferred taxes are charged or credited to other comprehensive income if the tax relates to items that are credited or charged, in the same or a different period, to other comprehensive income.

Current tax and deferred taxes are charged or credited directly to equity if the tax relates to items that are credited or charged, in the same or a different period, directly in equity.

1.6 Leases

The company assesses whether a contract is, or contains a lease, at the inception of the contract.

A contract is, or contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

In order to assess whether a contract is, or contains a lease, management determine whether the asset under consideration is "identified", which means that the asset is either explicitly or implicitly specified in the contract and that the supplier does not have a substantial right of substitution throughout the period of use. Once management has concluded that the contract deals with an identified asset, the right to control the use thereof is considered. To this end, control over the use of an identified asset only exists when the company has the right to substantially all of the economic benefits from the use of the asset as well as the right to direct the use of the asset.

In circumstances where the determination of whether the contract is or contains a lease requires significant judgement, the relevant disclosures are provided in the significant judgments and sources of estimation uncertainty section of these accounting policies.

Company as lessee

A lease liability and corresponding right-of-use asset are recognised at the lease commencement date, for all lease agreements for which the company is a lessee, except for short-term leases of 12 months or less, or leases of low value assets. For these leases, the company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

Details of leasing arrangements where the company is a lessee are presented in the Lease liability note.

Lease liability

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the company uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise the following:

- fixed lease payments, including in-substance fixed payments, less any lease incentives;
- variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- the amount expected to be payable by the company under residual value guarantees;
- the exercise price of purchase options, if the company is reasonably certain to exercise the option;
- lease payments in an optional renewal period if the company is reasonably certain to exercise an extension option; and
- penalties for early termination of a lease, if the lease term reflects the exercise of an option to terminate the lease.

Variable rents that do not depend on an index or rate are not included in the measurement of the lease liability (or right-of-use asset). The related payments are recognised as an expense in the period incurred and are included in operating expenses.

The lease liability is presented as a separate line item on the Statement of Financial Position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect lease payments made. Interest charged on the lease liability is included in finance costs.

The company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) when:

- there has been a change to the lease term, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change in the assessment of whether the company will exercise a purchase, termination or extension option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate;
- there has been a change to the lease payments due to a change in an index or a rate, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used);
- there has been a change in expected payment under a residual value guarantee, in which case the lease liability is remeasured by discounting the revised lease payments using the initial discount rate;
- a lease contract has been modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised payments using a revised discount rate.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS (Contd.)

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recognised in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Right-of-use assets

Lease payments included in the measurement of the lease liability comprise the following:

- the initial amount of the corresponding lease liability;
- any lease payments made at or before the commencement date;
- any initial direct costs incurred;
- any estimated costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, when the company incurs an obligation to do so, unless these costs are incurred to produce inventories; and
- less any lease incentives received.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. However, if a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. Depreciation starts at the commencement date of a lease.

For right-of-use assets which are depreciated over their useful lives, the useful lives are presented in the following table:

Item	Depreciation method	Average useful life
Buildings and infrastructure	Straight line	Over the lease term

The residual value, useful life and depreciation method of each asset are reviewed at the end of each reporting year. If the expectations differ from previous estimates, the change is accounted for prospectively as a change in accounting estimate. Each part of a right-of-use asset with a cost that is significant in relation to the total cost of the asset is depreciated separately.

The depreciation charge for each year is recognised in profit or loss unless it is included in the carrying amount of another asset.

Company as lessor

Leases for which the company is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases. Lease classification is made at inception and is only reassessed if there is a lease modification.

Operating leases

Lease payments from operating leases are recognised on a straight-line basis over the term of the relevant lease, or on another systematic basis if that basis is more representative of the pattern in which the benefits form the use of the underlying asset are diminished. Operating lease income is included in other operating income.

Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and are expensed over the lease term on the same basis as the lease income.

Modifications made to operating leases are accounted for as a new lease from the effective date of the modification. Any prepaid or accrued lease payments relating to the original lease are treated as part of the lease payments of the new lease.

1.7 Leases (Comparatives under IAS 17)

The following accounting policy applies to the comparative disclosures of leases. The company has adopted IFRS 16 in the current year, but has not restated the comparatives. These accounting policies are prepared on the basis of IAS 17. Refer to the note on changes in accounting policies for details of the impact of the adoption of IFRS 16 on these financial statements.

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Operating leases - lessor

Operating lease income is recognised as an income on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease income.

Income for leases is disclosed under revenue in profit or loss.

Operating leases – lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset. This liability is not discounted.

Any contingent rents are expensed in the period they are incurred.

1.8 Inventories

Inventories are measured at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories is assigned using the formula. The same cost formula is used for all inventories having a similar nature and use to the entity.

Inventories includes a “right to returned goods asset” which represents the company right to recover products from customers where customers exercise their right of return under the company returns policy. The company uses its accumulated historical experience to estimate the number of returns on a portfolio level using the expected value method. A corresponding adjustment is recognised against cost of sales.

1.9 Impairment of assets

The company assesses at each end of the reporting period whether there is any indication that an asset may be impaired. If any such indication exists, the company estimates the recoverable amount of the asset.

Irrespective of whether there is any indication of impairment, the company also:

- tests intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.
- tests goodwill acquired in a business combination for impairment annually.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined.

The recoverable amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS (Contd.)

If the recoverable amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in profit or loss. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets other than goodwill may no longer exist or may have decreased. If any such indication exists, the recoverable amounts of those assets are estimated.

The increased carrying amount of an asset other than goodwill attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation other than goodwill is recognised immediately in profit or loss. Any reversal of an impairment loss of a revalued asset is treated as a revaluation increase.

1.10 Share capital and equity

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Ordinary shares are classified as equity.

1.11 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits, (those payable within 12 months after the service is rendered, such as paid vacation leave and sick leave, bonuses, and non-monetary benefits such as medical care), are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs.

The expected cost of profit sharing and bonus payments is recognised as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Defined contribution plans

Payments to defined contribution retirement benefit plans are charged as an expense as they fall due.

1.12 Provisions and contingencies

Provisions are recognised when:

- the company has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the present value of the expenditure expected to be required to settle the obligation.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement shall be recognised when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The reimbursement shall be treated as a separate asset. The amount recognised for the reimbursement shall not exceed the amount of the provision.

Provisions are not recognised for future operating losses.

If an entity has a contract that is onerous, the present obligation under the contract shall be recognised and measured as a provision.

A constructive obligation to restructure arises only when an entity:

- has a detailed formal plan for the restructuring, identifying at least:
- the business or part of a business concerned;
- the principal locations affected;
- the location, function, and approximate number of employees who will be compensated for terminating their services;
- the expenditures that will be undertaken; and
- when the plan will be implemented; and
- has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

After their initial recognition contingent liabilities recognised in business combinations that are recognised separately are subsequently measured at the higher of:

- the amount that would be recognised as a provision; and
- the amount initially recognised less cumulative amortisation.

Contingent assets and contingent liabilities are not recognised.

1.13 Revenue from contracts with customers

Revenue comprises consideration received or receivable on contracts entered into with customers for the sale of goods and services in the ordinary course of the entities' activities. The performance obligation is identified as the distinct goods and services as agreed in the contract(s). Revenue is shown net of trade discounts, volume rebates and value added tax and is recognised when the entity satisfies its' performance obligations as set out in the contracts entered into with its customers. Revenue is recognised at the amount of the transaction price that is allocated to each performance obligation and this is determined at the amount as depicted in the contract for the exchange of the goods and services. Where a contract has multiple performance obligations, the transaction price is allocated to the performance obligations in the contract by reference to their relative standalone selling prices.

The principles of IFRS 15 are applied using the following five-step model:

- Identify the contract(s) with a customer
- Identify the performance obligations in the contract
- Determine the transaction price
- Allocate the transaction price to the performance obligations in the contract
- Recognise revenue when (or as) the entity satisfies a performance obligation.

Revenue streams

- Sale of spares
- Sales of vehicles
- Sale of service plan
- Sale of agricultural produce
- Sale of construction equipment
- Commission income

Revenue is recognised when an entity satisfies a performance obligation as control is passed, either over time or at a point in time. The above revenue is recognised at a point in time, except for Service plans which is recognised over time. Service Plan is recognised by reference to the stage of completion of the transaction at the end of the reporting period.

Contract liabilities relates to Service Plan Revenue and is reflected under Liabilities in the Statement of Financial Position.

Amounts not yet invoiced, for which revenue has been recognised are reflected under trade and other receivables.

Costs incurred on assembly of vehicles which do not yet meet the revenue recognition criteria are capitalised to inventories as work-in-progress and are expensed when the five principles of IFRS 15 are met.

Interest is recognised, in profit or loss, using the effective interest rate method.

NOTES TO THE ANNUAL FINANCIAL STATEMENTS (Contd.)

1.14 Cost of sales

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value, is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The related cost of providing services recognised as revenue in the current period is included in cost of sales.

1.15 Borrowing costs

All other borrowing costs are recognised as an expense in the period in which they are incurred.

1.16 Translation of foreign currencies

Foreign currency transactions

A foreign currency transaction is recorded, on initial recognition in Rands, by applying to the foreign currency amount the spot exchange rate between the functional currency and the foreign currency at the date of the transaction.

At the end of the reporting period:

- foreign currency monetary items are translated using the closing rate;
- non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction; and
- non-monetary items that are measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was determined.

Exchange differences arising on the settlement of monetary items or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous annual financial statements are recognised in profit or loss in the period in which they arise.

Cash flows arising from transactions in a foreign currency are recorded in Rands by applying to the foreign currency amount the exchange rate between the Rand and the foreign currency at the date of the cash flow.

1.17 Levies

IFRIC 21 addresses the issue of when to recognise a liability to pay a levy. The Interpretation defines a levy, and specifies that the obligating event that gives rise to the liability is the activity that triggers the payment of the levy, as identified by legislation. The Interpretation provides guidance on how different levy arrangements should be accounted for, in particular, it clarifies that neither economic compulsion nor the going concern basis of financial statements preparation implies that an entity has a present obligation to pay a levy that will be triggered by operating in a future period. The company has inventory stored in a bonded warehouse where duties, levies and taxes are due once the inventory leaves the bonded warehouse, or 24 months, whichever are earlier. IFRIC 21 is applied retrospectively.

Notes to the Annual Financial Statements

2. Changes in accounting policy

The financial statements have been prepared in accordance with International Financial Reporting Standards on a basis consistent with the prior year except for the adoption of the following new or revised standards.

Application of IFRS 16 Leases

In the current year, the company has adopted IFRS 16 Leases (as issued by the IASB in January 2016) with the date of initial application being 01 April 2019. IFRS 16 replaces IAS 17 Leases, IFRIC 4 Determining whether an Arrangement contains a Lease, SIC-15 Operating Leases - Incentives and SIC 27 - Evaluating the Substance of Transactions Involving the Legal Form of a Lease.

IFRS 16 introduces new or amended requirements with respect to lease accounting. It introduces significant changes to the lessee accounting by removing the distinction between operating and finance leases and requiring the recognition of a right-of-use asset and a lease liability at the lease commencement for all leases, except for short-term leases and leases of low value assets. In contrast to lessee accounting, the requirements for lessor accounting have remained largely unchanged. Details of these new requirements are described in the accounting policy for leases. The impact of the adoption of IFRS 16 on the company's financial statements is described below.

The company has applied the practical expedient available in IFRS 16 which provides that for contracts which exist at the initial application date, an entity is not required to reassess whether they contain a lease. This means that the practical expedient allows an entity to apply IFRS 16 to contracts identified by IAS 17 and IFRIC 4 as containing leases; and to not apply IFRS 16 to contracts that were not previously identified by IAS 17 and IFRIC 4 as containing leases.

Leases where company is lessee

Leases previously classified as operating leases

The company undertook the following at the date of initial application for leases which were previously recognised as operating leases:

- recognised a lease liability, measured at the present value of the remaining lease payments, discounted at the company's incremental borrowing rate at the date of initial application.
- recognised right-of-use assets measured on a lease by lease basis, at an amount equal to the lease liability adjusted for accruals or prepayments relating to that lease prior to the date of initial application.

The company applied IAS 36 to consider if these right-of-use assets are impaired as at the date of initial application.

As an exception to the above, no adjustments were made on initial application of IFRS 16 for leases previously classified as operating leases:

- for which the underlying asset is of low value. From the date of initial application, these leases are accounted for in accordance with paragraph 6 of IFRS 16 by recognising the lease payments on a straight-line basis or another systematic basis which is more representative of the pattern of benefits consume

The company applied the following practical expedients when applying IFRS 16 to leases previously classified as operating leases in terms of IAS 17. Where necessary, they have been applied on a lease by lease basis:

- when a portfolio of leases contained reasonably similar characteristics, the company applied a single discount rate to that portfolio;
- leases which were expiring within 12 months of 01 April 2019 were treated as short term leases, with remaining lease payments recognised as an expense on a straight-line basis or another systematic basis which is more representative of the pattern of benefits consumed;
- initial direct costs were excluded from the measurement of right-of-use assets at the date of initial application.

Leases where company is lessor

IFRS 16 does not change substantially how a lessor accounts for leases. Under IFRS 16, a lessor continues to classify leases as either finance leases or operating leases and account for those two types of leases differently. However, IFRS 16 has changed and expanded the disclosures required, in particular regarding how a lessor manages the risks arising from its residual interest in the leased assets. These additional disclosures have been made by the company.

Impact on financial statements

On transition to IFRS 16, the company recognised right-of-use assets as per note 5 and lease liabilities as per note 14.

When measuring lease liabilities, the company discounted lease payments using its incremental borrowing rate of 10.25%.

NOTES TO FINANCIAL STATEMENTS (Contd.)

3. New Standards and Interpretations

3.1 Standards and interpretations effective and adopted in the current year

In the current year, the company has adopted the following standards and interpretations that are effective for the current financial year and that are relevant to its operations:

IFRS 16 Leases

IFRS 16 Leases is a new standard which replaces IAS 17 Leases, and introduces a single lessee accounting model. The main changes arising from the issue of IFRS 16 which are likely to impact the company are as follows:

Company as lessee:

- Lessees are required to recognise a right-of-use asset and a lease liability for all leases, except short term leases or leases where the underlying asset has a low value, which are expensed on a straight line or other systematic basis.
- The cost of the right-of-use asset includes, where appropriate, the initial amount of the lease liability; lease payments made prior to commencement of the lease less incentives received; initial direct costs of the lessee; and an estimate for any provision for dismantling, restoration and removal related to the underlying asset.
- The lease liability takes into consideration, where appropriate, fixed and variable lease payments; residual value guarantees to be made by the lessee; exercise price of purchase options; and payments of penalties for terminating the lease.
- The right-of-use asset is subsequently measured on the cost model at cost less accumulated depreciation and impairment and adjusted for any re-measurement of the lease liability. However, right-of-use assets are measured at fair value when they meet the definition of investment property and all other investment property is accounted for on the fair value model. If a right-of-use asset relates to a class of property, plant and equipment which is measured on the revaluation model, then that right-of-use asset may be measured on the revaluation model.
- The lease liability is subsequently increased by interest, reduced by lease payments and re-measured for reassessments or modifications.
- Re-measurements of lease liabilities are affected against right-of-use assets, unless the assets have been reduced to nil, in which case further adjustments are recognised in profit or loss.
- The lease liability is re-measured by discounting revised payments at a revised rate when there is a change in the lease term or a change in the assessment of an option to purchase the underlying asset.
- The lease liability is re-measured by discounting revised lease payments at the original discount rate when there is a change in the amounts expected to be paid in a residual value guarantee or when there is a change in future payments because of a change in index or rate used to determine those payments.
- Certain lease modifications are accounted for as separate leases. When lease modifications which decrease the scope of the lease are not required to be accounted for as separate leases, then the lessee re-measures the lease liability by decreasing the carrying amount of the right of lease asset to reflect the full or partial termination of the lease. Any gain or loss relating to the full or partial termination of the lease is recognised in profit or loss. For all other lease modifications which are not required to be accounted for as separate leases, the lessee re-measures the lease liability by making a corresponding adjustment to the right-of-use asset.
- Right-of-use assets and lease liabilities should be presented separately from other assets and liabilities. If not, then the line item in which they are included must be disclosed. This does not apply to right-of-use assets meeting the definition of investment property which must be presented within investment property. IFRS 16 contains different disclosure requirements compared to IAS 17 leases.

Company as lessor:

- Accounting for leases by lessors remains similar to the provisions of IAS 17 in that leases are classified as either finance leases or operating leases. Lease classification is reassessed only if there has been a modification.
- A modification is required to be accounted for as a separate lease if it both increases the scope of the lease by adding the right to use one or more underlying assets; and the increase in consideration is commensurate to the stand alone price of the increase in scope.
- If a finance lease is modified, and the modification would not qualify as a separate lease, but the lease would have been an operating lease if the modification was in effect from inception, then the modification is accounted for as a separate lease. In addition, the carrying amount of the underlying asset shall be measured as the net investment in the lease immediately before the effective date of the modification. IFRS 9 is applied to all other modifications not required to be treated as a separate lease.
- Modifications to operating leases are required to be accounted for as new leases from the effective date of the modification. Changes have also been made to the disclosure requirements of leases in the lessor's financial statements.

Sale and leaseback transactions:

- In the event of a sale and leaseback transaction, the requirements of IFRS 15 are applied to consider whether a performance obligation is satisfied to determine whether the transfer of the asset is accounted for as the sale of an asset.
- If the transfer meets the requirements to be recognised as a sale, the seller-lessee must measure the new right-of-use asset at the proportion of the previous carrying amount of the asset that relates to the right-of-use retained. The buyer-lessor accounts for the purchase by applying applicable standards and for the lease by applying IFRS 16
- If the fair value of consideration for the sale is not equal to the fair value of the asset, then IFRS 16 requires adjustments to be made to the sale proceeds. When the transfer of the asset is not a sale, then the seller-lessee continues to recognise the transferred asset and recognises a financial liability equal to the transfer proceeds. The buyer-lessor recognises a financial asset equal to the transfer proceeds.

The effective date of the standard is for years beginning on or after 01 January 2019.

The company has adopted the standard for the first time in the 2020 annual financial statements.

The adoption of this standard has not had a material impact on the results of the company, but has resulted in more disclosure than would have previously been provided in the annual financial statements.

3.2 Standards and interpretations not yet effective

The company has chosen not to early adopt the following standards and interpretations, which have been published and are mandatory for the company's accounting periods beginning on or after 01 April 2020 or later periods:

Standard/ Interpretation:	Effective date: Years beginning on or after	Expected impact:
• Definition of a business - Amendments to IFRS 3	01 January 2020	Unlikely there will be a material impact
• Presentation of Financial Statements: Disclosure initiative	01 January 2020	Unlikely there will be a material impact
• Accounting Policies, Changes in Accounting Estimates and Errors: Disclosure initiative	01 January 2020	Unlikely there will be a material impact

Property, plant and equipment encumbered as security

The property, plant and equipment have been encumbered as security per note 31.

5. Right-of-use assets

The company leases various buildings as the need arises. Lease contracts are typically made for fixed periods between 3 years to 5 years. Lease contracts are negotiated on an individual basis and contain a wide range of different terms and conditions.

The company does not have the option to purchase any of the leased property on completion of the lease term.

The lease contracts do not impose any covenants.

Details pertaining to leasing arrangements, where the company is lessee are presented below:

	2020			2019		
	Gross carrying amount	Accumulated depreciation	Net carrying amount	Gross carrying amount	Accumulated depreciation	Net carrying amount
Buildings and infrastructure	10,522,727	(2,308,498)	8,214,229	–	–	–

	Opening balance	Additions	Disposals	Depreciation	Total
Buildings and infrastructure		**10,522,727**		**(2,308,498)**	**8,214,229**

Details of the lease liabilities are provided in note 14 Lease liabilities.

6. Investment in subsidiary

Name of company	% holding 2020	% Holding 2019	Carrying Amount 2020	Carrying Amount 2019
199,999 shares held in Mahindra West Africa Limited	99.99%	99.99%	3,014,200	3,014,200

Fair value of investment in subsidiary

The carrying amount of the investment in subsidiary is considered by management to approximate its fair values and is deemed as Level 3, as defined by IFRS 13 Fair Value Measurements.

There were no transfers between Levels 1, 2 and 3 during the financial year.

7. Retirement benefits

Defined contribution plan

It is the policy of the company to provide retirement benefits to all its employees. A defined contribution provident fund which is subject to the Pensions Fund Act exists for this purpose. The scheme is funded by company and employee contributions only, which are charged to the income statement as they are incurred. The total company contributions to such scheme in 2020 was R1 207 270 (2019: R860 179).

The company is under no obligation to cover any unfunded benefits.

8. Deferred tax

	2020 R	2019 R
At amortised cost	**44,005,025**	97,121,037
Non-financial instruments	**37,061,692**	46,478,276
	81,066,717	143,599,313

Trade and other receivables pledged as security

Trade and other receivables were pledged as security for overdraft facilities of the company. Refer to note 31 for full details on the facilities granted to the company.

Exposure to credit risk

Trade receivables inherently expose the company to credit risk, being the risk that the company will incur financial loss if customers fail to make payments as they fall due.

In order to mitigate the risk the company deals with reputed banks and customers and also demands bank guarantees or purchase credit insurance where applicable.

There have been no significant changes in the credit risk management policies and processes since the prior reporting period.

The average credit period on trade receivables is 15 days (2019: 35 days). No interest is charged on outstanding trade receivables.

The Company makes use of a provision matrix as a practical expedient to the determination of expected credit losses on trade and other receivables. The provision matrix has been applied to appropriate groupings of receivables based on shared credit risk characteristics. An additional provision of R13,835,086 has been added during the year relating to the Agricultural Produce Business. There is no material expected credit losses on application of the provision matrix for the Automotive and related businesses.

Furthermore, the company writes off a receivable where there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery. Receivables written off may still be subject to enforcement activities under the company recovery procedure, considering legal advice where appropriate. In the current year there has been sufficient information that the receivables for the Agricultural produce business are in severe financial difficulty and there is no realistic prospect of recovery. The amount that has been written-off for the Agricultural Produce Receivables amounts to R57,031,286 in the current period.

Reconciliation of loss allowances

The following table shows the movement in the loss allowance (lifetime expected credit losses) for trade and other receivables:

	2020 R	2019 R
Opening balance in accordance with IFRS 9	**43,196,200**	22,041,960
Provision raised on new trade receivables	**13,835,086**	21,154,240
Amounts written off as uncollectable	**(57,031,286)**	–
Closing balance	–	43,196,200

Fair value of trade and other receivables

The fair value of trade and other receivables approximates their carrying amounts.

All amounts are short term. The carrying amount of the trade and other receivables is considered by management to approximate their fair values and is deemed as Level 3, as defined by IFRS 13 Fair Value Measurements.

There were no transfers between Levels 1, 2 and 3 during the financial year.

10. Inventories

	2020 R	2019 R
Agricultural produce	**6,236,979**	7,614,579

Balance on 31 March 2020	**8,602,065**	–

15. Contract liabilities

	2020	2019
	R	R
Summary of contract liabilities		
Service plan	**106,647,706**	86,837,370
Reconciliation of contract liabilities		
Opening balance	**86,837,370**	72,796,445
Raised in current year	**58,311,914**	41,714,854
Revenue in current year	**(38,501,578)**	(27,673,929)
	106,647,706	86,837,370
Split between non-current and current portions		
Non-current liabilities	**68,019,362**	54,673,056
Current liabilities	**38,628,344**	32,164,314
	106,647,706	**86,837,370**

Nature: Certain vehicles are sold with a service plan. This service plan then covers certain services for a predetermined number of years and kilometres travelled. The income from these service plans is deferred and recognised as these services are performed.

Assumptions: The fair value of contract liabilities from service plans is management's best estimate of the company's future income and cost based on the estimated service cost that would occur for the selected models over a period of three to five years adjusted for inflation and possible price increases in parts and labour used in the service of the selected model.

16. Financial liabilities

	2020	2019
	R	R
Amortised cost		
ICICI Bank	**30,242,900**	30,000,000
Interest repayable monthly calculated at JIBAR plus 2.15% (2019: 1.5%) and 0.44% (2019: 0.75%) handling fees, repayable on a quarterly basis from date of withdrawal		
Split between non current and current portions.		
Current liabilities	**30,242,900**	30,000,000

17. Trade and other payables

	2020	2019
	R	R
Financial instruments:		
Accrued expense	**23,682,089**	7,597,100
Accrued leave pay	**1,557,601**	1,549,529
Other payables	**1,189,843**	5,525,824
Provision for vehicle buy back	**35,366,928**	13,425,900
Sundry payables	**327,700**	331,983
Trade payables	**239,449,607**	62,367,283
	301,573,768	90,797,619

Fair value of trade and other payables

The fair value of trade and other payables approximates their carrying amounts.

All amounts are short term. The carrying amount of the trade and other payables is considered by management to approximate their fair values and is deemed as Level 3, as defined by IFRS 13 Fair Value Measurements.

There were no transfers between Levels 1, 2 and 3 during the financial year.

NOTES TO FINANCIAL STATEMENTS (Contd.)

18. Provisions

Reconciliation of provisions – 2020

	Opening balance	Additions	Utilised during the year	Change in discount factor	Total
Provision for warranty claims	**53,379,402**	**43,931,548**	**(41,963,347)**	**(293,966)**	**55,053,637**

Reconciliation of provisions – 2019

	Opening balance	Additions	Utilised during the year	Change in discount factor	Total
Provision for warranty claims	54,408,338	42,487,161	(41,368,727)	(2,147,370)	53,379,402

	2020	2019
	R	R
Non-current liabilities	**33,327,014**	30,715,998
Current liabilities	**21,726,623**	22,663,404
	55,053,637	53,379,402

Warranty Provision

Nature: This provision is raised due to the fact that certain vehicles, Gensets and Tractors sold are sold under a warranty, thus this provision estimates cost that would occur in the future for repairs under warranties.

Assumptions: Warranty provisions are managements best estimate of the company's liability (after the expected reimbursement from the manufacturer) on vehicles under two or three year warranties based on three years actual historical sales and warranty claims occurred. The warranty period for Gensets and Tractors being a twelve month period from date of sale.

Further, the warranty provision has been discounted to present value and the incremental amount pertaining to the current financial year has been adjusted in cost of sales.

19. Revenue

	2020	2019
	R	R
Revenue from contracts with customers		
Sale of goods	**1,632,027,742**	1,305,903,236
Commissions received	**13,327,647**	7,337,741
	1,645,355,389	1,313,240,977

Disaggregation of revenue from contracts with customers

The amount included in revenue arising from exchanges of goods or services included in revenue are as follows:

	2020	2019
Sale of spares	**182,194,463**	145,138,038
Sale of vehicles	**1,397,539,217**	1,067,772,331
Sale of service plan	**38,501,578**	27,673,929
Sale of agricultural produce	**12,629,272**	62,708,218
Sale of construction equipment	**269,640**	2,610,720
Commissions income	**13,327,647**	7,337,741
Sale of farm equipment	**893,572**	–
	1,645,355,389	1,313,240,977

Timing of revenue recognition:

	2020	2019
At a point in time	**1,606,853,811**	1 285,567,048
Over time	**38,501,578**	27,673,929
	1,645,355,389	1,313,240,977

Transaction price allocated to performance obligations that are unsatisfied or partially unsatisfied at the reporting date

The transaction price which has been allocated to performance obligations which are unsatisfied or partially unsatisfied at the reporting date are presented below, together with the expected timing of satisfying the performance obligations:

2020

	1 year	2 years	3-5 years
Transaction price allocated to:			
Service plan	**38,625,837**	**31,420,942**	**36,600,928**

2019

	1 year	2 years	3-5 years
Transaction price allocated to:			
Service plan	32,164,314	25,593,046	29,080,009

20. Cost of sales

	2020	2019
	R	R
Sale of goods	**1,482,365,522**	1,209,236,105
Write down of inventories to net realisable value	**(5,892,239)**	(1,141,647)
	1,476,473,283	1,208,094,458

21. Operating profit (loss)

Operating (loss) profit for the year is stated after charging (crediting) the following, amongst others:

Auditors' remuneration – external

	2020	2019
	R	R
Audit fees	**552,000**	500,000
Adjustment for previous year	**20,000**	5,012

26. Tax paid

	2020 R	2019 R
Balance at beginning of the year	**2,861,611**	2,757,096
Current tax for the year recognised in profit or loss	**(6,989,578)**	(10,854,525)
Balance at end of the year	**(4,039,522)**	(2,861,611)
	(8,167,489)	(10,959,040)

27. Commitments

Short term leases

	2020 R	2019 R
Minimum lease payments due		
– within one year	**516,837**	2,298,581
– in second to fifth year inclusive	–	3,392,341
	516,837	5,690,922

Operating lease payments represents rentals payable by the company for short term leases of its premises (residential and office properties). Short term leases are leases with a lease term of 12 months or less. No contingent rent is payable.

Operating leases – as lessor (income)

	2020 R	2019 R
Minimum lease payments due		
– first year	**499,762**	–

Certain of the company's vehicles are held to generate rental income under operating leases. Under these lease agreements vehicles are sold to the lessee at the initial lease date. After a period of 12 months the company will repurchase these vehicles at a discounted price. The difference between the sales price and repurchase price is recognised as lease income on a straight line basis over the period of the lease. Rental of vehicles are expected to generate rental yields of 5% on a ongoing basis. Lease agreements are non-cancelable and have terms of 1 year. There are no contingent rents receivable.

Capital risk management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern
- to provide an adequate return to shareholders

  by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position.

The company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Financial risk management

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty to a financial instrument fails to meet its contractual obligations.

The company's exposure to credit risk is limited to the carrying amount of financial assets recognised at the balance sheet date.

The maximum exposure to credit risk is presented in note 9.

Liquidity risk

The company manages its liquidity needs by carefully monitoring scheduled debt servicing payments for long-term financial liabilities as well as cash-outflows due in day-to-day business. Liquidity needs are monitored in various time bands, on a day- to-day and week-to-week basis, as well as on the basis of a rolling 30-day projection. Short-term liquidity needs for a 120-day or less are identified monthly.

Funding in regards to long-term liquidity needs is additionally secured by an adequate amount of committed credit facilities.

The company has contractual maturities which are summarised below:

At 31 March 2020	**Current**	**Within 6 months**
Trade and other payables	**301,573,760**	**300,405,559**

At 31 March 2019	**Current**	**Within 6 months**
Trade and other payables	90,910,486	89,360,957

The above contractual maturities reflect the gross cash flows, which may differ to the carrying values of the liabilities at the reporting date.

Foreign currency risk

Most of the company's transactions are carried out in Rands. Exposure to currency exchange rates arise from the operations in Kenya, as well as the company's overseas purchases and sea freight, which are primarily denominated in US Dollars. To mitigate the company's exposure to foreign currency risk, non Rand cash flows are monitored and forward exchange contracts are entered into in accordance with our risk management policies. Forward exchange contracts are generally entered into when the rate is more favourable than the budgeted rate.

Foreign currency denominated financial assets and liabilities, translated in Rands at the closing rate, are as follows:

NOTES TO FINANCIAL STATEMENTS (Contd.)

Foreign currency exposure at the end of the reporting period

	2020 R	2019 R
Assets		
Mahindra and Mahindra Limited (2020: USD 761 475; 2019: USD 465 304)	**13,660,635**	6,761,007
Bank balance (2020: USD 44 390, EGP 280 000; 2019: USD 49 942)	**1,113,597**	725,675
SsangYong Motor Company (2020: USD 27 591; 2019: USD 27 317)	**494,976**	401,166
Mahindra West Africa Limited (2020: USD Nil; 2019: USD 105 000).	–	1,525,682
Mahindra Europe (2020: USD 13 924; 2019: USD Nil)	**249,796**	–
	15,519,004	9,413,530
Liabilities		
Bank balance (2020: KES 145 487 684: 2019: KES Nil)	**24,742,383**	–
Bidvest Panalpina (2020: USD 106 450; 2019: USD Nil)	**1,909,681**	–
Mahindra and Mahindra Limited (2020: USD 1 787 636; 2019: INR 2 284 178, USD 1 561 629)	**32,069,661**	23,169,703
Savino Del Bene (2020: USD 1 890; 2019: USD Nil)	**33,913**	–
	58,755,638	23,169,703

Foreign currency sensitivity

The following table illustrates the sensitivity of the net result for the year and equity in regards to the company's financial assets and financial liabilities and the US Dollar Rand exchange rate.

It assumes a +12.54% and 4.89% change of the Rand / US Dollar exchange rate for the year ended 31 March 2020 (2019: +7.3% and 12.2%). This has been determined based on the average market volatility in exchange rates in the previous 12 months. The sensitivity analysis is based on the company's foreign currency financial instruments held at balance sheet date and also takes into account forward exchange contracts that offset effects from changes in currency exchange rates.

If the Rand had strengthened against the US Dollar by 12.54% (2019: 7.3%) then this would have had the following impact:

	2020 R	2019 R
Net results for the year	**5,421,447**	1,005,608

If the Rand had weakened against the US Dollar by 4.89% (2019: 12.2%) then this would have had the following impact:

	2020 R	2019 R
Net results for the year	**(2,115,619)**	**(1,673,953)**

Exposure to foreign exchange rates vary during the year depending on the volumes of overseas transactions. Nonetheless, the analysis above is considered to be representative of the company's exposure to currency risk.

Interest rate risk

The following table illustrates the sensitivity of the net result for the year and equity to a reasonably possible change in interest rates of +1% and 1% (2019: +0.5% and 0.5%), with effect from the beginning of the year. These changes are considered to be reasonably possible based on observation of current market conditions. The calculations are based on the company's financial instruments held at each balance sheet date. All other variables are held constant.

	2020 +1%	2020 1%	2019 +0,5%	2019 0,5%
Net results for the year	**1,173,542**	**(1,173,542)**	656,766	(656,766)

31. Banking facilities

The company avails credit facilities from ICICI Bank which has sanctioned a ZAR facility of R 30 million (2019: R 30 million with ICICI Bank) for working capital borrowings. At the year end, the company has utilised its entire facility from ICICI Bank. (2019: 30 million).

In order to facilitate working capital for Kenya branch, the company also avails credit facilities from ICICI Bank (DFS branch) which has sanctioned a facility of USD 5 million (2019: USD 5 million) towards working capital financing in the form of short term loans. The company's branch has utilised USD Nil (2019: USD 5 Million) of its facility with the bank.

Further, the company also avails credit facilities from Barclays Bank in Kenya which has sanctioned amounts of KES 242 500 000 for overdraft and USD 2 000 000 for short term loans and USD 500 000 for Letters of Credit. At the end of the year the company has utilised KES 145 487 684 (2019: KES 242 500 000) towards Overdraft, USD Nil (2019: USD 1 217 614) towards short term loans and USD Nil (2019: USD 423 875) towards Letters of Credit facilities.

The above facilities have been secured as follows:

- General notarial bond on all present and future moveable assets of the Company including stocks, whether in company's showroom, warehouse or in transit but excluding book debts.
- An unrestricted cessation of all present and future book debts due or to become due.

32. Events after the reporting period

In early January 2020, a human infection originating in China was traced to a novel strain of coronavirus. The virus has subsequently spread through-out the world, including South Africa and as a result caused unprecedented disruptions in the global economy as efforts to contain the spread of the virus have intensified.

On March 11, 2020, the World Health Organization officially declared this coronavirus outbreak (also referred to as COVID-19) a pandemic. On 15 March 2020, the pandemic was declared a national disaster in South Africa by the President. A national Lockdown was declared on 23 March 2020 which commenced on 26 March 2020. On 23 April, the President of South Africa announced that from 1 May 2020, a gradual and phased easing of the lockdown restrictions would begin, lowering the national alert to Level 4.

Due to the Lockdown, our business had to close offices from 26 March 2020 together with our business partners including dealer network. This also included port closures which affected the receipt of our inventory and it also included closure of our distributors. However, as of financial closure our business is holding enough inventory to be able to cater to immediate supply and also continuous supply for three months. We are interacting closely with our parent company in India. Our supply line from India has opened from May 2020 and vehicles which were stuck due to the lockdown will be shipped.

As of the date of Financial Statement release the country is at a national level 4 in terms of the ease of restrictions. For our business this has meant that the supply of parts and vehicles can commence to essential services workers needs. Our dealers are allowed to service vehicles and sell vehicles to industries allowed to do business at level 4. There is therefore a start to operations to us and our business partners which is gradual and limited.

It is evident that our Business has been and will continue to be affected by this pandemic.

The extent to which the coronavirus pandemic may impact our operating results, financial condition, and cash flows will depend on how the South African Economy and auto industry comes back in near future, which to some extent is uncertain and cannot be accurately predicted at this moment in time. Various measures have been taken by the South African Government in terms of a reduction in the Repo and Prime lending rate. The South African Government has announced various schemes in support of COVID-19 and to kickstart the economy. With farming and mining starting we expect the economic cycle to make a good beginning. As we move to lower levels of restriction, travelling will increase supporting our business, immediately to our spare parts business. We are aware however that there will be a decrease in revenue and therefore to be able to meet obligations we are taking measures to be more agile, flexible and manage costs and cash flow. We are getting support from our parent company in this regard.

Our Business has in the past two years shown handsome growth while the auto industry has not been growing. We feel we have a good product portfolio covering the bakkie and personal vehicles segment. With the right product positioning and with competitive pricing that will help us to operate in the available market in the automotive industry. We have plans to manage this trend to continue in present conditions when the economy is operational at the appropriate level alert. The company has adequate reserves and it is therefore reasonable to assume that our business will continue as a Going Concern as it will be able to settle debts as and when they become due and payable.

INDEPENDENT AUDITOR'S REPORT

Board of Directors
Mahindra North America Technical Center, Inc.

We have audited the accompanying balance sheets of Mahindra North America Technical Center, Inc. ('the Company') as of March 31, 2020 and March 31, 2019, and the related statements of loss, stockholder's equity and cash flows for the years ended on March 31, 2020 and March 31, 2019. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the organization's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the organization's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly in all material respects, the financial position of the Company as of March 31, 2020 and March 31, 2019, and the results of its operations and cash flows for the years then ended, in accordance with the accounting principles generally accepted in the United States.

Other matter

The presentation of financial information in Indian rupees in the financial statements is not a required part of the basic financial statements. We have verified the arithmetic accuracy of the presentation based upon exchange rate provided by the Company's management. We did not audit and do not express an opinion on such information, and our opinion is not modified with respect to this matter.

NOTES TO FINANCIAL STATEMENTS

NOTE A – ORGANIZATION AND NATURE OF OPERATIONS

Mahindra North American Technical Center, Inc. (hereinafter referred to as the "Company") was incorporated in the state of Delaware on December 18, 2013 and is a wholly owned subsidiary of Mahindra Automotive North America, Inc. ("MANA"). The Company engineers, designs, develops, assembles, and delivers parts and vehicles to the global automotive market, both for on and off-road use, as an Original Equipment Manufacturer ("OEM") headquartered in Auburn Hills, MI.

Ownership of the Company changed on April 30, 2017 when 100% of its stock was acquired by MANA from Mahindra USA, Inc. ("MUSA").

In Michigan, when engaged in automotive manufacturing activities, the Company does business as ("d/b/a") Mahindra Automotive North America Manufacturing ("MANAM"). MANAM produces ROXOR, an off-road side- by-side vehicle. MANAM shipped 3,041 vehicles during the fiscal year ended March 31, 2020.

The Company performed to a contract by the United States Postal Service ("USPS") issued under Solicitation Number 3D-16-A-007 for the development of Next Generation Delivery Vehicle ("NGDV") prototypes. Testing of the prototype vehicles was completed in March 2019. As part of its performance on the USPS NGDV prototype development contract, the Company utilized the engineering services provided by the US branch of Mahindra Vehicle Manufacturers Limited ("MVML"). The successful performance on the NGDV prototypes contract entitles the Company through its parent MANA to bid on the final production contract when it is issued by the USPS.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies are detailed below:

1. *Basis of preparation*

   a. The accompanying financial statements are prepared on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States ("US GAAP") to reflect the financial position, results of operation and cash flows of the Company.

   b. The financial statements are for the fiscal years ended March 31, 2020 and March 31, 2019.

   c. Financial information in this report is shown in U.S. dollars ("USD") and in Indian rupees ("INR"). For the fiscal years ended March 31, 2020 and March 31, 2019, dollar amounts are translated for convenience into Indian rupees at an exchange rate of 75.34 INR per dollar on March 31, 2020. Within the notes to the financial statements, Indian rupee amounts are shown parenthetically following the U.S. dollar amounts.

   d. Certain reclassifications, regroupings and reworking have been made in the financial statements of prior year to conform to the classifications used in the current year. These changes had no impact on previously reported net loss or stockholder's equity.

   e. The management has prepared future projections supported by business plans and business developmental activities to be undertaken. The Company depends on the continued support from its parent company to meet is liquidity contingency.

2. *Use of estimates*

   The preparation of financial statements in accordance with US GAAP requires management to make estimates and assumptions that affects the amounts reported in the financial statements. Significant items subject to such estimates and assumptions include the useful lives of plant, property and equipment and other contingencies. Management believes that the estimates used in the preparation of the financial statements are reasonable. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Any changes in estimates are adjusted prospectively in the financial statements.

3. *Cash and cash equivalents*

   The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. Cash balances in bank accounts are insured by the Federal Deposit Insurance Corporation up to an aggregate per bank of USD 250,000 (INR 18,835,000). The Company believes it is not exposed to any significant risk on cash and cash equivalents.

4. *Inventories*

   Raw materials, work in progress and finished goods inventories are stated at the lower of cost and net realizable value, with cost being determined on a weighted average basis. The measurement of inventories includes the direct cost of materials and labor as well as indirect costs (variable and fixed). A provision is made for obsolete and slow-moving raw materials, finished goods, spare parts and other supplies based on their expected future use and realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs for sale and distribution.

   The Company makes adjustments to its inventory reserve based on the identification of specific situations and increases its inventory reserves accordingly. As further changes in future economic or industry conditions occur, the Company will revise the estimates that were used to calculate its inventory reserves. The Company during the year did not identify any specific situation for which inventory reserve is required.

   If actual conditions are less favorable than those the Company has projected, the Company will increase its reserves for lower of cost or market ("LCM"), excess and obsolete inventory, accordingly. Any increase in the Company's reserves will adversely impact its results of operations. The establishment of a reserve for LCM, excess and obsolete inventory establishes a new cost basis in the inventory. Such reserves are not reduced until the product is sold. No reserve has been established for LCM in the current year.

5. *Income taxes*

   Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due, plus deferred taxes related primarily to differences between the basis of certain assets and liabilities for financial and tax reporting. The deferred taxes represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled, respectively.

   The Company has determined whether any tax positions have met the recognition threshold and has measured the Company's exposure to those tax provisions. Management believes that the Company has adequately addressed all relevant tax positions and that there are no unrecorded tax liabilities. Federal and state taxing authorities generally have the right to examine and audit the previous three years of tax returns filed. Any interest or penalties from federal and state taxing authorities were recorded in the accompanying financial statements.

6. *Revenue recognition*

   <u>*Sale of manufactured goods*</u>

   The Company recognizes revenues from sale of manufactured ROXOR off-road side by side vehicles and their related accessories.

   Revenue is recognized when control of the vehicles, parts or accessories have been transferred and the Company's performance obligation to the customer have been satisfied. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transfer of goods. The timing of when the Company transfers the goods to the customer may differ from the timing of the customer's payment.

   When the Company gives the customer the right to return eligible goods, the Company estimates the expected returns based on an analysis of historical experiences.

   The Company has determined that the customer is its affiliate company for the sale of vehicles and service parts. Transfer of control, and therefore revenue recognition, generally corresponds to the date when the vehicles or service parts are made available to the customer, or when the vehicles or service parts are released to the carrier responsible for transporting them to the customer. This is also the point at which invoices are issued, with payment terms for vehicles and for service parts. For component part sales, revenue recognition is consistent with that of service parts.

Revenue from contracts with customers

Effective April 1, 2019, the Company has adopted Financial Accounting Standards Board ("FASB") issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606), with a date of initial application of April 1, 2019 using the modified retrospective method and determined that the existing revenue recognition practices are in compliance with ASC 606. Accordingly, there was no cumulative effect adjustment to the balance of accumulated surplus in the balance sheet as of April 01, 2019, as the adoption did not result in a change to the timing of revenue recognition.

Erstwhile revenue recognition policy as per ASC 605

<u>Sale of manufactured goods</u>

The Company recognizes revenues from sale of manufactured ROXOR off-road side by side vehicles and their related accessories. Sales are recognized as revenue upon sale as these sales are considered to be final and no right of return or price protection exists.

Revenue from sale of goods is recognized specifically when all the following conditions are met:

a. There is a persuasive evidence that an arrangement exists.

b. Delivery has occurred, or services have been rendered.

c. The sales price is fixed or determinable.

d. Collectability is reasonably assured.

<u>Milestone payment</u>

Revenues from contracts are recognized when milestones are achieved. Anticipated losses on contracts are recorded when determinable. The Company received the final milestone payment from the USPS NGDV prototype development contract in April 2019.

7. *Property, plant and equipment*

Property, plant and equipment are stated at cost less accumulated depreciation and impairment. Cost of items of property, plant and equipment comprise cost of purchase and other costs necessarily incurred to bring it to the condition and location necessary for its intended use.

The Company depreciates property, plant and equipment over the estimated useful life using the straight-line method except for production tools. Upon retirement or disposal of assets, the cost and accumulated depreciation will be eliminated from the accounts and the resulting gain or loss will be credited or charged to operations.

The estimated useful life used to determine depreciation is:

Particulars	**Useful life**
Computers	3 years
Furniture	7 years
Leasehold improvements	15 years
Machinery & equipment	5 years
Tooling	5 years

The cost of property, plant and equipment not ready for use before such date are disclosed under capital work- in-progress.

The Company expenses all capital expenses below $5,000. Expenditures for maintenance and repairs are charged to expense. Property, plant and equipment is reviewed for impairment whenever events or changes in circumstances indicate the carrying value of the asset may not be recoverable.

8. *Intangible assets*

Intangible assets are comprised of computer software which has been recognized at cost and amortized over a period of 3 years or its estimated useful life. Subsequent expenditure is capitalized only when it increases the future economic benefit from the specific assets to which it relates.

9. *Government incentives*

The Company receives incentives from the Michigan Economic Development Corporation in the form of business development grants. These grants are recognized at their fair values in the statement of income where there is a reasonable assurance that all grant conditions have been complied with and the grant will be received.

10. *Fair value measurements and financial instruments*

Assets and liabilities recorded at fair value in the financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels which are directly related to the amount of subjectivity associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

Level 3 – unobservable inputs for the asset or liability only used when there is little, if any, market activity for the asset or liability at the measurement date.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

Some of Company's financial instruments, including cash and cash equivalents, accounts receivable and accounts payable are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature.

11. *Leases*

Accounting Standard Update ("ASU") 2016-02, Leases. On April 1, 2019, the Company early adopted Accounting Standards Codification 842 and all the related amendments ("new lease standard") using the modified retrospective method. The comparative information has not been restated and continues to be reported under the lease accounting standard in effect of those periods. The Company does not expect the adoption of the new lease standard to have a material impact to net income on an ongoing basis. The new lease standard requires all leases to be reported on the balance sheet as operating lease right-of-use assets and lease obligations. The Company elected the practical expedients permitted under the transition guidance of the new standard that retained the lease classification and initial direct costs for any leases that existed prior to adoption of the standard.

Right-of-use assets and lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date for leases exceeding 12 months. Minimum lease payments include only the fixed lease component of the agreement, as well as any variable rate payments that depend on an index, initially measured using the index at the lease commencement date. Lease terms may include options to renew when it is reasonably certain that the Company will exercise that option.

The Company estimates its incremental borrowing rate for each lease based on the respective weighted average term of the agreements. This estimation considers the market rates of the Company's outstanding collateralized borrowings and interpolations of rates outside of the terms of the outstanding borrowings, including comparisons to comparable borrowings of similarly rated companies with longer term borrowings.

Operating lease expense is recognized on a straight-line basis over the lease term and is included in cost of revenue or general and administrative expense. Amortization expense for finance leases is recognized on a straight-line basis over the lease term and is included in cost of revenue. Interest expense for finance leases is recognized using the effective interest method. Leases with a lease term of 12 months or less from the commencement date that do not contain a purchase option are recognized as an expense on a straight-line basis over the lease term.

As a result of the Company's adoption of ASC 842, the Company recognized operating lease right-of-use of assets and lease liabilities amounting to $7,620,345 (INR 574,116,792) and $7,600,061 (INR 572,588,596), respectively.

Operating leases as per old standard - ASC 840

The Company leases certain facilities and equipment. Lease rent expenses on operating leases are charged to statement of income over the lease term. Certain of the Company's leases contain renewal options, rent escalation clauses, and/or landlord incentives. Renewal terms generally reflect market rates at the time of renewal. Rent expense for non-cancellable operating leases with scheduled rent increases and/or landlord incentives is recognized on a straight-line basis over the lease term, including any applicable rent holidays, beginning with the lease commencement date, or the date the Company takes control of the leased space, whichever is sooner. The excess of straight-line rent expense over scheduled payment amounts and landlord incentives is recorded as a deferred rent liability. The Company followed the accounting policy to account for leases in accordance with ASC 840 for the year ended March 31, 2019.

12. Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the financial statements.

The Company is engaged in litigation with FCA US, LLC both at the International Trade Commission and at the United States District Court, Eastern District of Michigan. Both matters are ongoing. At this time no liability has been incurred and the amount of any future loss or award associated with these matters cannot reasonably be estimated. It is management's belief that it is more likely than not that Company's position will prevail in these matters. A final determination is expected from the International Trade Commission on June 1, 2020. A trial date for the United States District Court, Eastern District of Michigan matter was previously set but adjourned due to the Covid-19 pandemic. The trial date is scheduled for June 8, 2020.

NOTE C – CASH AND CASH EQUIVALENTS

The cash and cash equivalents of the Company comprise of:

	USD		**INR**	
	As at March 31,		**As at March 31,**	
Particulars	**2020**	2019	**2020**	2019
Bank balances	**599,719**	505,755	**45,182,829**	38,103,582
Total	**599,719**	505,755	**45,182,829**	38,103,582

Bank balances on operating and checking accounts with the bank are insured by the Federal Deposit Insurance Corporation up to an aggregate of USD 250,000 (INR: 18,835,000) (March 31, 2019: USD 250,000 (INR: 18,835,000)) per financial institution per depositor.

NOTE D – ACCOUNTS RECEIVABLE

Accounts receivable comprise the following:

NOTE J – LINE OF CREDIT

In June 2017, the Company obtained a line of credit with JP Morgan Bank with a maximum permissible limit of USD 10,000,000 (INR: 691,900,000). The line of credit was subsequently increased to USD 29,500,000 (INR: 2,222,530,000). As at March 31, 2020 the Company has made withdrawals to the tune of USD 29,500,000 (INR: 2,222,530,000) (March 31, 2019: USD 16,500,000 (INR 1,243,110,000).

Interest on the line of credit is payable at LIBOR plus 1.75% per annum, calculated at monthly intervals. The weighted average rate of interest for the years ended March 31, 2020 and March 31, 2019 was 3.67% and 3.71% per annum, respectively. As of March 31, 2020, and March 31, 2019, the applicable rate of interest on the outstanding line of credit was 3.00% and 4.31% per annum, respectively.

Total interest expense on the line of credit for the year is USD 1,027,725 (INR: 77,428,801) (March 31, 2019: USD 494,581 (INR 37,261,733).

NOTE K – RELATED PARTY LOAN

The Company during the fiscal year 2018, issued a loan to its related party, Mahindra Automotive North America, Inc. at an interest rate of 5.00% per annum. The loan amount receivable at March 31, 2020 is USD 7,442,675 (INR: 560,731,059) (March 31, 2019: USD 8,172,696 (INR: 615,730,917). Interest is calculated based on a 365-day annual term and payable along with the principal. The loan is repayable on demand. Interest receivables as at March 31, 2020 was USD 19,337 (INR 1,456,850) (March 31, 2019: USD Nil (INR Nil).

Interest income for the year ended March 31, 2020 was USD 417,742 (INR: 31,472,682) (March 31, 2019: USD 62,562 (INR: 4,713,421).

The Company during the fiscal year ended March 31, 2019, also obtained a loan from Mahindra Automotive North America, Inc. at an interest rate of 5.00% for short-term funding purpose. The loan amounting to USD 9,025,000 (INR 679,943,500) was repaid during the fiscal year ended March 31, 2019.

Interest expense for the year ended March 31, 2020 and March 31, 2019 amounted to USD Nil (INR Nil) and USD 71,644 (INR 5,397,659), respectively.

NOTE L – LEASES

The Company has entered various facility and equipment operating leases with varying terms. In most circumstances, management expects that in the normal course of business, leases will be renewed or replaced by other leases.

General description of the leases

The Company has entered into noncancelable operating lease agreements related to facility, office equipment, machinery and equipment and vehicles with varying terms.

Non-lease components: Leases that contain non-lease components are accounted for as a single component and recorded on the balance sheet for certain asset classes including equipment. Non-lease components include, but are not limited to, common area maintenance and service arrangements.

Package of practical expedients: The Company will not reassess whether any expired or existing contracts are leases or contain leases, the lease classification for any expired or existing leases or any initial direct costs for any expired or existing leases as of the transition date.

Additional transition method: The Company adopted the standard using a modified retrospective approach, applying the standard's transition provisions at the beginning of the period of adoption and maintain previous disclosure requirements for comparative periods.

The Company used the following policies and/or assumptions in evaluating the lease population:

Lease determination: The Company considers a contract to be or to contain a lease if the contract conveys the right to control the use of identified property, plant, or equipment (an identified asset) for a period of time in exchange for consideration.

Discount rate: When the lease contracts do not provide a readily determinable implicit rate, the Company uses the estimated incremental borrowing rate based on information available at the inception of the lease. The discount rate is determined by asset class.

Variable payments: The Company includes payments that are based on an index or rate within the calculation of right of use leased assets and lease liabilities, initially measured at the lease commencement date. There are variable payments in the nature of origination fees for office equipment, machinery and equipment and therefore are not treated as a part of lease payments.

Purchase options: Certain leases include options to purchase the office equipment. The depreciable life of assets are limited by the expected lease term, unless there is a transfer of title or purchase option reasonably certain of exercise.

Renewal options: Most leases include one or more options to renew, with renewal terms that can extend the lease term from one or more years. The exercise of lease renewal options is at the Company's sole discretion.

Residual value guarantees, restrictions, or covenants: The lease agreements do not contain any material residual value guarantees or material restrictive covenants.

Short-term leases: Leases with an initial term of 12 months or less are not recorded on the balance sheet; the Company recognizes lease expense for these leases on a straight-line basis over the lease term and expense the associated operating lease costs to administrative expenses on the statements of income.

The table below presents the classification of leasing assets and liabilities as reported on the balance sheet as of March 31, 2020.

	USD		INR	
	As at March 31,		As at March 31,

Particulars	**2020**	2019	**2020**	2019
United States	**47,362,538**	50,504,809	**3,568,293,613**	3,805,032,310

Contract balances

The Company's contracts with customers are comprised of purchase orders along with standard terms and conditions. These contracts with customers typically consist of sale of products which represent performance obligations that are satisfied upon transfer of control of the product to the customer at a point in time. The Company adopted the new revenue recognition standard using the modified retrospective transition approach and determined that the existing revenue recognition practices are in compliance with ASC 606. Accordingly, there was no cumulative effect adjustment to the balance of accumulated surplus in the balance sheet for the year ended March 31, 2020, as the adoption did not result in a change to the timing of revenue recognition.

The following table provides information about contract assets and liability balances as of March 31, 2020 and 2019:

	USD		INR	
	As at March 31,		As at March 31,	
Particulars	**2020**	2019	**2020**	2019
Accounts receivable (Refer Note C)	**1,507,306**	3,254,569	**113,560,434**	245,199,228

NOTE N – INCOME TAXES

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company is subject to federal taxation and in the State of Michigan. The provision for income tax (benefit) expense is as follows:

	USD		INR	
	Year ended March 31,		Year ended March 31,	
Particulars	**2020**	2019	**2020**	2019
Current tax benefit	–	–	–	–
Deferred tax expense (benefit)	**(1,400,643)**	1,627,963	**(105,524,444)**	**122,650,732**
Income tax expense (benefit)	**(1,400,643)**	1,627,963	**(105,524,444)**	**122,650,732**

The tax effects of significant temporary differences that resulted in deferred tax assets and liabilities and a description of the items that create such differences is as follows:

	USD		INR	
	Year ended March 31,		Year ended March 31,

In assessing the realization of deferred tax assets, the likelihood of whether it is more likely than not that some portion or all of the deferred tax assets will not be realized must be considered. The ultimate realization of deferred tax assets is dependent on the generation of future taxable income during the periods in which temporary difference become deductible. Management considers the projected future taxable income and tax planning strategies in making this assessment. Based on the level of projections for future taxable income for which the deferred tax assets are deductible, the management believes there exists reasonable certainty regarding the realization of deferred tax assets on the net operating losses and research & development credit.

The Company has federal net operating losses ("NOLs") carryforwards of USD 34,116,554 (INR: 2,570,341,178) as at March 31, 2020 (March 31, 2019: USD 28,521,191 (INR: 2,148,786,530)). Out of the total NOLs of USD 34,116,554 (INR: 2,570,341,178), if unutilized, NOLs of USD 29,355,508 (INR: 2,211,643,973) will begin to expire from the year 2035, whereas the remaining NOLs will be carried forward indefinitely.

The Company has state net operating losses carryforwards of USD 10,505,962 (INR: 791,519,177) as at March 31, 2020 (March 31, 2019: USD 9,262,318 (INR: 697,823,038)), which if unutilized will begin to expire from the year 2026.

The Company recognizes the financial statement impact of a tax position when it is more likely than not that the position will be sustained upon examination.

The tax years 2016, 2017, 2018 and 2019 remains subject to examination by the taxing authorities.

NOTE P – EMPLOYEE BENEFIT PLANS

The Company has voluntary 401(k) retirement plans. The Company may make annual contributions to the plans equal to a uniform percentage of participant compensation. The cost of the Company's contributions charged to expense related to 401(k) contributions was USD 72,069 (INR 5,429,678) and USD 55,208 (INR 4,159,371) for the years ended March 31, 2020 and March 31, 2019, respectively.

NOTE Q – COMMON STOCK

Common stock

The authorized share capital of the Company as of March 31, 2020 and March 31, 2019 was 100,000 shares of $ 25 each. As at March 31, 2020 and March 31, 2019, total shares issued and outstanding was 1,000 shares.

The authorized share capital of the Company as of March 31, 2020 and March 31, 2019 was 1,000,000 shares of $ 25 each. As at March 31, 2020 and March 31, 2019, total shares issued and outstanding was 971,000 shares.

Voting

Each holder of common stock is entitled to one vote in respect of each share held by him in the records of the Company for all matters submitted to a vote.

Liquidation

In the event of liquidation of the Company, the holder of common stock shall be entitled to receive all the remaining assets of the Company.

NOTE R – RISK AND UNCERTANITIES

The Company's future results of operations involve several risks and uncertainties.

Factors that could affect the Company's future operating results and cause actual results to vary materially from expectations include, competitive factors, including but not limited to pricing pressures; deterioration in general economic conditions; the Company's ability to effectively manage operating costs and increase operating efficiencies; declines in revenues; technological and market changes; the ability to attract and retain qualified employees and the Company's ability to execute on its business plan.

NOTE S – SUBSEQUENT EVENTS

In January 2020, the World Health Organization declared the outbreak of a novel coronavirus (COVID-19) as a "Public Health Emergency of International Concern," which continues to spread throughout the world and has adversely impacted global commercial activity and contributed to significant declines and volatility in financial markets.

The Company has evaluated subsequent events and transactions that occurred after the balance sheet date up to the date that the financial statements were issued. Management is currently evaluating the impact of this COVID-19 pandemic and has concluded that while it is reasonably possible that the virus could have a negative effect on the Company's financial position and results of its operations, the specific impact is not readily determinable as of the date of these financial statements. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

INDEPENDENT AUDITOR'S REPORT

Board of Directors

Mahindra Automotive North America, Inc.

We have audited the accompanying balance sheets of Mahindra Automotive North America, Inc. ("the Company") as of March 31, 2020 and March 31, 2019, the related statements of loss, stockholder's equity and cash flows for the years ended March 31, 2020 and March 31, 2019 and the related notes to the separate parent company financial statements.

Management's responsibility for the separate parent company financial statements

Management is responsible for the preparation and fair presentation of these separate parent company financial statements in accordance with accounting principles generally accepted in the United States; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of separate parent company financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these separate parent company financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the separate parent company financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate parent company financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the separate parent company financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the organization's preparation and fair presentation of the separate parent company financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the organization's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the separate parent company financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Basis of qualified opinion

As discussed in Note C. 1(a) to the separate parent company financial statements, the Company reports investment in its wholly owned subsidiary, Mahindra North American Technical Center, Inc. and Mahindra Vehicle Sales and Service, Inc., on cost basis. Accounting principles generally accepted in the United States of America require that all majority owned subsidiaries be accounted for as consolidated subsidiaries. If the financial statements of this subsidiary had been consolidated with those of the Company, total assets would have decreased by USD 27,897,626 (INR: 2,101,807,143) and USD 5,702,816 (INR:429,650,157) as on March 31, 2020 and March 31, 2019, respectively; total liabilities would have increased by USD 49,135,126 (INR: 3,701,840,393) and USD 33,622,264 (INR 2,533,101,370) as on March 31, 2020 and March 31, 2019, respectively; stockholder's equity would have decreased by USD 77,032,752 (INR:5,803,647,536) and USD 39,325,080 (INR: 2,962,751,527) as on March 31, 2020 and March 31, 2019, respectively and net loss would have increased by USD 37,707,672 (INR: 2,840,896,008) and USD 19,472,557 (INR: 1,467,062,435) for each of the years then ended.

Opinion

In our opinion, except for the effects of not consolidating the wholly owned subsidiary as discussed in the Basis of qualified opinion paragraph, the separate parent company financial statements referred to above present fairly, in all material respects, the financial position of the Company as of March 31, 2020 and March 31, 2019 and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

Other matter

The presentation of financial information in Indian rupees in the separate parent company financial statements is not a required part of the basic separate parent company financial statements. We have verified the arithmetic accuracy of the presentation based upon exchange rate provided by the Company's management. We did not audit and do not express an opinion on such information, and our opinion is not modified with respect to this matter.

NOTES TO SEPARATE PARENT COMPANY FINANCIAL STATEMENTS

NOTE A - ORGANIZATION AND NATURE OF OPERATIONS

Mahindra Automotive North America, Inc. (hereinafter referred to as the "Company") was incorporated in the state of Delaware on March 27, 2017 and is a wholly owned subsidiary of Mahindra Overseas Investment Company Mauritius, Limited ("MOICML"). Both, the Company and MOICML are consolidated subsidiaries of Mahindra and Mahindra Limited ("M&M"). The Company engineers, designs, develops, assembles and delivers parts and vehicles to the global automotive market for off-road use, as an Original Equipment Manufacturer ("OEM") headquartered in Auburn Hills, MI.

The Company owns 100% of two separate business units; Mahindra Vehicle Sales and Service, Inc. ("MVSS") which is engaged in the sales of off-road recreational vehicles and Mahindra North American Technical Centre, Inc. ("MNATC") which is involved in the manufacture of off-road vehicles as well as the development of prototype on road vehicles. The Company's vehicle brand, ROXOR, is an off-road side-by-side vehicle.

NOTE B - SUBSIDIARIES OPERATIONS

On April 30, 2017, the Company acquired all the stock of MNATC from Mahindra USA, Inc., another wholly owned subsidiary of M&M. MNATC has been engaged, in September 2016 with performance to a contract with the United States Postal Service ("USPS") issued under Solicitation Number 3D-16-A-007 for the development of Next Generation Delivery Vehicle ("NGDV") prototypes. Testing of the prototype vehicles is now completed. The Company has been invited to submit a cost estimate to supply 180,000 of its vehicles to the USPS. As part of its performance on the USPS NGDV prototype development contract, the Company utilized the engineering services provided by the US Company of Mahindra Vehicle Manufacturers, Limited ("MVML").

On January 15, 2018, MNATC began producing ROXOR vehicles from its facility in Auburn Hills, MI. In Michigan, when engaged in automotive manufacturing activities, MNATC does business as "d/b/a" Mahindra Automotive North America Manufacturing ("MANAM").

MVSS was formed on May 13, 2017 to function as the sales and distribution business unit for ROXOR. MVSS purchases the ROXORs manufactured by MANAM and wholesales them to MVSS's 392 dealerships.

(This space has been intentionally left blank)

NOTE C - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies are detailed below:

1. Basis of preparation

a. The accompanying separate parent company financial statements are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States ('US GAAP') to reflect the financial position, results of operations and cash flows of the Company. The Company reports its investments in its wholly owned subsidiary, MNATC and MVSS, on cost basis. Accounting principles generally accepted in the United States require that wholly owned and majority owned subsidiaries be accounted for as consolidated subsidiaries. If the financial statements of this subsidiary had been consolidated with those of the Company, total assets would have decreased by USD 27,897,626 (INR: 2,101,807,143) and USD 5,702,816 (INR:429,650,157) as on March 31, 2020 and March 31, 2019, respectively; total liabilities would have increased by USD 49,135,126 (INR: 3,701,840,393) and USD 33,622,264 (INR 2,533,101,370) as on March 31, 2020 and March 31, 2019, respectively; stockholder's equity would have decreased by USD 77,032,752 (INR:5,803,647,536) and USD 39,325,080 (INR: 2,962,751,527) as on March 31, 2020 and March 31, 2019, respectively and net loss would have increased by USD 37,707,672 (INR: 2,840,896,008) and USD 19,472,557 (INR: 1,467,062,435) for each of the years then ended.

b. The separate parent company financial statements are for the years ended March 31, 2020 and March 31, 2019.

c. Financial information in the separate parent company financial statements is shown in U.S. dollars ("USD") and in Indian rupees ("INR"). For the fiscal years ended March 31, 2020 and March 31, 2019, dollar amounts are translated for convenience into Indian rupees at an exchange rate of 75.34 INR per dollar on March 31, 2020. Within the notes to the financial statements, Indian rupee amounts are shown parenthetically following the U.S. dollar amounts.

d. Certain reclassifications, regroupings and reworking have been made in the separate parent company financial statements of prior year to conform to the classifications used in the current year. These changes had no impact on previously reported separate parent company net loss or stockholder's equity.

2. Use of estimates

The preparation of separate parent company financial statements in accordance with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the separate parent company financial statements. Significant items subject to such estimates and assumptions include the useful lives of property and equipment, the carrying amount of property and equipment and other contingencies. Management believes that the estimates used in the preparation of the separate parent company financial statements are reasonable. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Any changes in estimates are adjusted prospectively in the separate parent company financial statements.

3. Revenue recognition

Revenue of the Company comprise of fees for services rendered to its ultimate parent company and its subsidiaries. These fees have been accrued as the related services have been performed.

Interest for loan to its wholly owned subsidiary is presented with interest expense in the statements of loss. Interest is recognized on time proportion basis considering the amount outstanding and the applicable rate.

Revenue is recognized upon transfer of control of services promised to customers in an amount that reflects the consideration the Company expects to receive in exchange for these products or services.

Effective April 1, 2019, the Company has adopted Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, Revenue from Contracts with Customers (Topic 606), with a date of initial application of April 1, 2019 using the modified retrospective method.

4. Cash and cash equivalents

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. Cash balances in bank accounts are insured by the Federal Deposit Insurance Corporation up to an aggregate per bank of USD 250,000 (INR 18,835,000). The Company believes it is not exposed to any significant risk on cash and cash equivalents.

5. Property and equipment

Property and equipment are stated at cost less accumulated depreciation. Cost of items of property and equipment comprises cost of purchase and other costs necessarily incurred to bring it to the condition and location necessary for its intended use.

The Company depreciates property and equipment over the estimated useful life using the straight-line method. Upon retirement or disposal of assets, the cost and accumulated depreciation are eliminated from the accounts and the resulting gain or loss is credited or charged to statement of loss.

The estimated useful life used to determine depreciation is:

Buildings	40 years

Expenditures for maintenance and repairs are charged to statement of loss. Property and equipment is reviewed for impairment whenever events or changes in circumstances indicate the carrying value of the asset may not be recoverable.

The cost of property and equipment not ready for use before such date are disclosed under capital work-in-progress

6. Income taxes

Income taxes are provided for the tax effects of transactions reported in the separate parent company financial statements and consist of taxes currently due plus deferred taxes related primarily to differences between the basis of certain assets and liabilities for financial and tax reporting. The deferred taxes represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled, respectively.

The Company has determined whether any tax positions have met the recognition threshold and has measured the Company's exposure to those tax provisions. Management believes that the Company has adequately addressed all relevant tax positions and that there are no unrecorded tax liabilities. Federal and state taxing authorities generally have the right to examine and audit the previous three years of tax returns filed. Any interest or penalties from federal and state taxing authorities were recorded in the accompanying separate parent company financial statements.

7. Investments

Investments refer to investment in a Vasuki 2019 fund which are carried at cost.

8. Leases

Accounting Standard Update ("ASU") 2016-02, Leases. On April 1, 2019, the Company early adopted Accounting Standards Codification 842 and all the related amendments ("new lease standard") using the modified retrospective method. The comparative information has not been restated and continues to be reported under the lease accounting standard in effect of those periods. The Company does not expect the adoption of the new lease standard to have a material impact to net income on an ongoing basis. The new lease standard requires all leases to be reported on the balance sheet as operating lease right-of-use assets and lease obligations. The Company elected the practical expedients permitted under the transition guidance of the new standard that retained the lease classification and initial direct costs for any leases that existed prior to adoption of the standard.

The Company's leases are classified as operating leases, which are included in operating lease right-of-use assets and operating lease liabilities in the Company's balance sheet.

Right-of-use assets and lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date for leases exceeding 12 months. Minimum lease payments include only the fixed lease component of the agreement, as well as any variable rate payments that depend on an index, initially measured using the index at the lease commencement date. Lease terms may include options to renew when it is reasonably certain that the Company will exercise that option.

The Company estimates its incremental borrowing rate for each lease based on the respective weighted average term of the agreements. This estimation considers the market rates of the Company's outstanding collateralized borrowings and interpolations of rates outside of the terms of the outstanding borrowings, including comparisons to comparable borrowings of similarly rated companies with longer term borrowings.

Operating lease expense is recognized on a straight-line basis over the lease term and is included in selling, general and administrative expense. Amortization expense for finance leases is recognized on a straight-line basis over the lease term and is included in cost of revenue. Interest expense for finance leases is recognized using the effective interest method. Leases with a lease term of 12 months or less from the commencement date that do not contain a purchase option are recognized as an expense on a straight-line basis over the lease term.

As a result of the Company's adoption of ASC 842, the Company recognized operating lease right-of-use of assets and lease liabilities amounting to $1,305,644 (INR 98,357,248) and $1,347,544 (INR: 101,523,965), respectively.

Operating leases as per ASC 840

The Company leases certain facilities and equipment. Lease rent expenses on operating leases are charged to expense over the lease term. Certain of the Company's leases contain renewal options, rent escalation clauses, and/or landlord incentives. Renewal terms generally reflect market rates at the time of renewal. Rent expense for non-cancelable operating leases with scheduled rent increases and/or landlord incentives is recognized on a straight-line basis over the lease term, including any applicable rent holidays, beginning with the lease commencement date, or the date the Company takes control of the leased space, whichever is sooner. The excess of straight-line rent expense over scheduled payment amounts and landlord incentives is recorded as a deferred rent liability. The Company followed the accounting policy to account for leases for the year ended March 31, 2019.

9. Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the separate parent company financial statements.

The Company is engaged in litigation with FCA US, LLC both at the International Trade Commission and at the United States District Court, Eastern District of Michigan. Both matters are ongoing. At this time no liability has been incurred and the amount of any future loss or award associated with these matters cannot reasonably be estimated. It is management's belief that it is more likely than not that Company's position will prevail in these matters.

10. Fair value measurements and financial instruments

Assets and liabilities recorded at fair value in the financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels which are directly related to the amount of subjectivity associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

Level 3 – unobservable inputs for the asset or liability only used when there is little, if any, market activity for the asset or liability at the measurement date.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

Some of Company's financial instruments, including cash and cash equivalents, accounts receivable and accounts payable are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature.

NOTE D - CASH AND CASH EQUIVALENTS

The cash and cash equivalents of the Company comprise:

	USD		**INR**	
	As at March 31,		**As at March 31,**	
Particulars	**2020**	**2019**	**2020**	**2019**

Others	89,099	106,748	6,712,718	8,042,393
Total	**1,455,001**	**1,203,985**	**109,619,775**	**90,708,230**

NOTE I - LEASES

General description of the lease

The Company has entered into noncancelable operating lease agreements related to facility, office equipment, machinery and equipment and vehicles with varying terms.

Non-lease components: Leases that contain non-lease components are accounted for as a single component and recorded on the balance sheet for certain asset classes including equipment. Non-lease components include, but are not limited to, common area maintenance and service arrangements.

Package of practical expedients: The Company will not reassess whether any expired or existing contracts are leases or contain leases, the lease classification for any expired or existing leases or any initial direct costs for any expired or existing leases as of the transition date.

Additional transition method: The Company adopted the standard using a modified retrospective approach, applying the standard's transition provisions at the beginning of the period of adoption and maintain previous disclosure requirements for comparative periods.

The Company used the following policies and/or assumptions in evaluating the lease population:

Lease determination: The Company considers a contract to be or to contain a lease if the contract conveys the right to control the use of identified property, plant, or equipment (an identified asset) for a period of time in exchange for consideration.

Discount rate: When the lease contracts do not provide a readily determinable implicit rate, the Company uses the estimated incremental borrowing rate based on information available at the inception of the lease. The discount rate is determined by asset class.

Variable payments: The Company includes payments that are based on an index or rate within the calculation of right of use leased assets and lease liabilities, initially measured at the lease commencement date. There are variable payments in the nature of origination fees for office equipment, machinery and equipment and therefore are not treated as a part of lease payments.

Purchase options: Certain leases include options to purchase the office equipment. The depreciable life of assets are limited by the expected lease term, unless there is a transfer of title or purchase option reasonably certain of exercise.

Renewal options: Most leases include one or more options to renew, with renewal terms that can extend the lease term from one or more years. The exercise of lease renewal options is at the Company's sole discretion.

Residual value guarantees, restrictions, or covenants: The lease agreements do not contain any material residual value guarantees or material restrictive covenants.

Short-term leases: Leases with an initial term of 12 months or less are not recorded on the balance sheet; the Company recognizes lease expense for these leases on a straight-line basis over the lease term and expense the associated operating lease costs to administrative expenses on the statements of income.

The table below presents the classification of leasing assets and liabilities as reported on the balance sheet as of March 31, 2020.

Particulars	USD As at March 31, 2020	2019	INR As at March 31, 2020	2019
Assets				
Operating lease right-of-use assets	1,195,949	–	90,102,798	–
Total lease assets	**1,195,949**	–	**90,102,798**	–
Liabilities				
Current				
Operating lease liabilities	110,225	–	8,304,352	–
Long term				
Operating lease liabilities	1,201,444	–	90,516,791	–
Total lease liabilities	**1,311,669**	–	**98,821,143**	–

The table below presents the classification of lease related expenses as reported in the statements of income.

Particulars	USD As at March 31, 2020	USD As at March 31, 2019	INR As at March 31, 2020	INR As at March 31, 2019
Operating lease expense*	232,988	–	17,553,316	–
Total lease expense	**232,988**	**–**	**17,553,316**	**–**

*Operating lease expense are included in administrative expenses in the statements of income. Operating lease expense include short-term leases, variable lease costs and leases which did not meet the capitalization requirement of the Company.

Future minimum lease payments as of March 31, 2020, for operating leases having an initial or remaining non-cancelable lease term in excess of one year are as follows.

Year ended March 31	Amount (USD)	Amount (INR)
2021, 2022 and 2023	332,219	25,029,379
2024 and 2025	349,037	26,296,448
2026 onwards	900,965	67,878,703
Total minimum lease payments	**1,582,221**	**119,204,530**
Less: Interest	(270,552)	(20,383,387)
Present value of lease payments	**1,311,669**	**98,821,143**

The following table presents the weighted-average remaining lease term and discount rates as of March 31, 2020.

Weighted-average remaining lease term (years)	
Operating leases	8.8
Weighted-average discount rate	
Operating leases	4.31%

The following table presents supplemental information for operating leases for the year ended March 31, 2020.

Supplemental information	Amount (USD)	Amount (INR)
Cash paid for amounts included in the measurement of lease liabilities		
Operating cash flows used in operating leases	93,781	7,065,452

Disclosure related to year prior to adoption of the new lease standard

The following is a schedule by years of future minimum rental payments required under operating leases that have initial or remaining non-cancelleable lease terms in excess of one year as of March 31, 2019.

Year ended March 31	Amount (USD)	Amount (INR)
2020	106,981	8,059,949
2021	164,059	12,360,205
2022	168,160	12,669,174
2023 and onwards	1,250,002	94,175,151

Total rental expense for operating leases for the year ended March 31, 2019 amounted to USD 52,800 (INR:3,977,952).

NOTE J - INCOME TAXES

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company is subject to taxation in the United States and the State of Michigan. The income tax (benefit) expense is as follows:

	USD Year ended March 31, 2020	USD Year ended March 31, 2019	INR Year ended March 31, 2020	INR Year ended March 31, 2019
Deferred tax benefit	(1,609,064)	(1,970,691)	(121,226,882)	(148,471,860)
Income tax (benefit) expense	**(1,609,064)**	**(1,970,691)**	**(121,226,882)**	**(148,471,860)**

The tax effects of significant temporary differences that resulted in deferred tax assets and liabilities and a description of the items that create such differences is as follows:

	USD Year ended March 31, 2020	USD Year ended March 31, 2019	INR Year ended March 31, 2020	INR Year ended March 31, 2019

Prepaid expenses	(68,270)	(18,699)	(5,143,479)	(1,408,783)
Total deferred tax assets	**3,594,208**	**1,985,144**	**270,787,615**	**149,560,750**

The tax years 2016, 2017, 2018 and 2019 remains subject to examination by the taxing authorities.

In assessing the realization of deferred tax assets, the likelihood of whether it is more likely than not that some portion or all the deferred tax assets will not be realized must be considered. The ultimate realization of deferred tax assets is dependent on the generation of future taxable income during the periods in which temporary difference become deductible. Management considers the projected future taxable income and tax planning strategies in making this assessment. Based on the level of projections for future taxable income for which the deferred tax assets are deductible, the management believes there exists reasonable certainty regarding the realization of deferred tax assets on the accrued expenses, net operating losses and research & development credit. The Company recognizes the financial statement impact of a tax position when it is more likely than not that the position will be sustained upon examination.

The company has federal net operating losses (“NOLs”) carryforwards of USD 14,979,791 (INR: 1,128,577,454) as at March 31, 2020 (March 31, 2019: USD 4,611,176 (INR: 347,406,000), which if unutilized, will be carried forward indefinitely.

The Company has state net operating losses carryforwards of and USD 3,086,375 (INR: 232,527,493) as at March 31, 2020 (March 31, 2019: USD 911,804 (INR: 68,695,313)), which if unutilized will begin to expire from the year 2028.

NOTE K - RELATED PARTY LOAN

Loan transaction with Mahindra North American Technical Center, Inc.

The Company in 2018, obtained a loan from its subsidiary, Mahindra North American Technical Centre, Inc. at an interest rate of 5.00% per annum. The loan amount payable at March 31, 2020 was USD 7,442,675 (INR: 560,731,106) (March 31, 2019: USD 8,172,696 (INR: 615,730,992).

Interest is calculated based on a 365-day annual term and payable along with the principal. The loan is repayable on demand. Interest payable as at March 31, 2020 was USD 19,337 (INR: 1,456,850) (March 31, 2019: USD Nil (INR Nil).

Interest expense for the year ended March 31, 2020 and March 31, 2019 amounted to USD 417,742 (INR: 31,472,682) and USD 62,562 (INR: 4,713,397), respectively.

The Company during the fiscal year ended March 31, 2019, also provided an additional loan to Mahindra North American Technical Center, Inc. at an interest rate of 5.00% as a short-term funding. Entire loan amounting to USD 9,025,000 (INR 624,439,750) was repaid during the fiscal year ended March 31, 2019.

Interest income for the year ended March 31, 2020 and March 31, 2019 amounted to USD Nil (INR Nil) and USD 71,644 (INR 5,397,659), respectively.

Loan transaction with Mahindra Vehicle Sales and Services, Inc.

During the current year the Company provided a loan of USD 30,629,979 (INR:2,307,662,618) at an interest rate of 5.00% per annum. Loan balance to the tune of USD 250,000 (INR: 18,835,000) and entire interest was repaid in the current year. Remaining loan balance amounting to USD 30,379,979 (INR: 2,288,827,618) was converted into an investment. The loan amount receivable as at March 31, 2020 was USD Nil (INR: Nil). Interest was calculated based on a 365-day annual term and payable along with the principal.

The Company in 2018, provided a loan of USD 1,900,000 (INR: 143,146,000) to its subsidiary, Mahindra Vehicle Sales and Services, Inc. at an interest rate of 5.00% per annum. During the year ended March 31, 2019, the Company provided an additional loan amounting to USD 16,712,608 (INR: 1,259,127,887). Entire loan amount along with interest was repaid in same year. The loan amount receivable as at March 31, 2019 was USD Nil (INR: Nil). Interest was calculated based on a 365-day annual term and payable along with the principal.

Interest income for the year ended March 31, 2020 and March 31, 2019 amounted to USD 451,993 (INR: 34,053,153) and USD 276,011 (INR: 20,794,669), respectively.

Loan transaction with Mahindra Overseas Investment Company Mauritius Limited

The Company during the fiscal year ended March 31, 2019, obtained multiple loans from its parent company, Mahindra Overseas Investment Company Mauritius Limited with interest rates ranging from 4.51% - 4.87% per annum. The loan amount payable at March 31, 2020 was USD 9,400,000 (INR:708,196,000) (March 31, 2019: USD 9,400,000 (INR: 708,196,000)).

Interest is calculated based on a 365-day annual term and payable along with the principal. The loan is repayable on demand. Interest payable as at March 31, 2020 was USD 1,005,722 (INR 75,771,094) (March 31, 2019: USD: 563,861 (INR: 42,481,312)).

Interest expense for the year ended March 31, 2020 was USD 441,861 (INR 33,289,782) (March 31, 2019: USD: 563,861 (INR: 42,481,312)).

NOTE M - COMMITMENTS AND CONTINGENCIES

Long term purchase commitment

On September 24, 2019, the Company signed a Vendor Subscription Agreement ("VSA") with Icon International Inc.("ICON"), a subsidiary of Omnicom Media Group, for purchase of certain media advertising for 5 years in an amount not less than USD 2,263,022 (INR: 170,496,077) each year. In addition, the Company signed an indemnity bond amounting to USD 1,600,000 (INR: 120,544,000) with Atlantic Specialty Insurance Company which binds Mahindra Automotive North America, its subsidiaries to purchase media advertising through ICON. If the Company fails to place the minimum amount of advertising spend on the contract anniversary each year it will be assessed a penalty of 15% of the shortfall. ICON provides composition and consultation services at no charge for media placements. ICON's placement services include broadcast, digital, and print media advertising which will be billed to the Company at a competitive market rate. During the term of the agreement the Company agrees to provide ICON with the right of first refusal on any media being placed.

NOTE N - SHAREHOLDER'S EQUITY

Common stock

The authorized share capital of the Company as of March 31, 2020 is 4,500,000 shares of $ 25 each. As at March 31, 2020, total shares issued and outstanding were 3,750,000.

The authorized share capital of the Company as of March 31, 2019 was 2,050,000 shares of $ 25 each. As at March 31, 2019, total shares issued and outstanding were 1,760,000.

Voting

Each holder of common stock is entitled to one vote in respect of each share held by him/her in the records of the company for all matters submitted to a vote.

Liquidation

In the event of liquidation of the Company, the holders of common stock shall be entitled to receive all the remaining assets of the Company.

NOTE O - CONCENTRATIONS

The Company's future results of operations involve several risks and uncertainties.

Factors that could affect the Company's future operating results and cause actual results to vary materially from expectations include, competitive factors, including but not limited to pricing pressures; deterioration in general economic conditions; the Company's ability to effectively manage operating costs and increase operating efficiencies; declines in revenues; technological and market changes; the ability to attract and retain qualified employees and the Company's ability to execute on its business plan.

<u>Contract assets</u>

The Company's contracts with customers with dealer agreements and purchase orders. These contracts with customers typically consist of sale of products which represent performance obligations that are satisfied upon transfer of control of the product to the customer at a point in time. The Company adopted the new revenue recognition standard using the modified retrospective transition approach and determined that the existing revenue recognition practices are in compliance with ASC 606. Accordingly, there was no cumulative effect adjustment to the balance of accumulated surplus in the balance sheet for the year ended March 31, 2020, as the adoption did not result in a change to the timing of revenue recognition.

The following table provides information about contract assets as at March 31, 2020 and March 31, 2019:

	USD		INR	
	As at March 31, 2020	As at March 31, 2019	As at March 31, 2020	As at March 31, 2019
Accounts receivable	3,250,463	251,685	244,889,882	18,961,948

NOTE Q - EMPLOYEE BENEFIT PLANS

The Company has voluntary 401(k) retirement plans. The Company may make annual contributions to the plans equal to a uniform percentage of participant compensation. The cost of the Company's contributions charged to expense related to 401(k) contributions was USD 72,085 (INR: 5,430,884) (March 31, 2019: USD 75,443 (INR: 5,683,876)).

NOTE R - SUBSEQUENT EVENTS

Subsequent events have been evaluated through May 11, 2020 which is the date the separate parent company financial statements were issued. In January 2020, the World Health Organization declared the outbreak of a novel coronavirus (COVID-19) as a "Public Health Emergency of International Concern," which continues to spread throughout the world and has adversely impacted global commercial activity and contributed to significant declines and volatility in financial markets.

The Company has evaluated subsequent events and transactions that occurred after the balance sheet date up to the date that the financial statements were issued. Management is currently evaluating the impact of this COVID-19 pandemic and has concluded that while it is reasonably possible that the virus could have a negative effect on the Company's financial position and results of its operations, the specific impact is not readily determinable as of the date of these financial statements. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

INDEPENDENT AUDITOR'S REPORT

Board of Directors

Mahindra Vehicle Sales and Services, Inc.

We have audited the accompanying balance sheets of Mahindra Vehicle Sales and Services, Inc. ("the Company") as of March 31, 2020 and March 31, 2019, the related statements of loss, stockholder's equity and cash flows for the years ended March 31, 2020 and March 31, 2019 and the related notes to the financial statements. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the organization's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the organization's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly in all material respects, the financial position of the Company as of March 31, 2020 and March 31, 2019 and the results of its operations and cash flows for the years ended March 31, 2020 and March 31, 2019, in accordance with the accounting principles generally accepted in the United States.

Other matter

The presentation of financial information in Indian rupees in the financial statements is not a required part of the basic financial statements. We have verified the arithmetic accuracy of the presentation based upon exchange rate provided by the Company's management. We did not audit and do not express an opinion on such information, and our opinion is not modified with respect to this matter.

NOTES TO FINANCIAL STATEMENTS

NOTE A - ORGANIZATION AND NATURE OF OPERATIONS

Mahindra Vehicle Sales and Services, Inc. (hereinafter referred to as the "Company") was incorporated in the state of Delaware on April 19, 2017 and is a wholly owned subsidiary of Mahindra Automotive North America, Inc. ("MANA"). The Company delivers parts and vehicles to the global automotive market for off-road use.

The Company sells and distributes parts and vehicles to distributors and dealers (collectively "dealerships"), the majority of which are independently owned. As at March 31, 2020, the Company has contractual relationships in North America with approximately 396 dealerships. The only vehicle sold by the Company to dealerships is the ROXOR, an off-road side-by-side vehicle manufactured by Mahindra North American Technical Center, Inc. d/b/a Mahindra Automotive North America Manufacturing ("MANAM"). The Company shipped 3,003 vehicles during the fiscal year ended March 31, 2020.

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies are detailed below:

1. *Basis of preparation*
   a. The accompanying financial statements are prepared on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States ("US GAAP") to reflect the financial position, results of operation and cash flows of the Company.
   b. The financial statements are for the fiscal years ended March 31, 2020 and March 31, 2019.
   c. Financial information in this report is shown in U.S. dollars ("USD") and in Indian rupees ("INR"). For the fiscal year ended March 31, 2020 and March 31, 2019, dollar amounts are translated for convenience into Indian rupees at an exchange rate of 75.34 INR per dollar on March 31, 2020. Within the notes to the financial statements, Indian rupee amounts are shown parenthetically following the U.S. dollar amounts.
   d. Certain reclassifications, regroupings and reworking have been made in the financial statements of prior year to conform to the classifications used in the current year. These changes had no impact on previously reported net loss or statement of stockholder's equity.
   e. The management has prepared future projections supported by business plans and business developmental activities to be undertaken. The Company depends on the continued support from its parent company to meet is liquidity contingency.

2. *Use of estimates*

   The preparation of financial statements in accordance with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements. Significant items subject to such estimates and assumptions include the useful lives of property and equipment, warranties, volume incentives, rebates, and co- operative advertising programs and other contingencies. Management believes that the estimates used in the preparation of the financial statements are reasonable. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Any changes in estimates are adjusted prospectively in the financial statements.

3. *Operating leases*

   Accounting Standard Update ("ASU") 2016-02, Leases. On April 1, 2019, the Company early adopted Accounting Standards Codification ("ASC") 842 and all the related amendments ("new lease standard") using the modified retrospective method. The comparative information has not been restated and continues to be reported under the lease accounting standard in effect of those periods. The Company does not expect the adoption of the new lease standard to have a material impact to net income on an ongoing basis. The new lease standard requires all leases to be reported on the balance sheet as operating lease right-of-use assets and lease obligations. The Company elected the practical expedients permitted under the transition guidance of the new standard that retained the lease classification and initial direct costs for any leases that existed prior to adoption of the standard.

   The Company's leases are classified as operating leases, which are included in operating lease right-of-use assets and operating lease liabilities in the Company's balance sheet.

   Right-of-use assets and lease liabilities are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date for leases exceeding 12 months. Minimum lease payments include only the fixed lease component of the agreement, as well as any variable rate payments that depend on an index, initially measured using the index at the lease commencement date. Lease terms may include options to renew when it is reasonably certain that the Company will exercise that option.

   The Company estimates its incremental borrowing rate for each lease based on the respective weighted average term of the agreements. This estimation considers the market rates of the Company's outstanding collateralized borrowings and interpolations of rates outside of the terms of the outstanding borrowings, including comparisons to comparable borrowings of similarly rated companies with longer term borrowings.

   Operating lease expense is recognized on a straight-line basis over the lease term and is included in cost of revenue or general and administrative expense. Amortization expense for finance leases is recognized on a straight-line basis over the lease term and is included in cost of revenue. Interest expense for finance leases is recognized using the effective interest method. Leases with a lease term of 12 months or less from the commencement date that do not contain a purchase option are recognized as an expense on a straight-line basis over the lease term.

   As a result of the Company's adoption of ASC 842, the Company recognized operating lease right-of-use of assets and lease liabilities amounting to USD 1,150,011 (INR 86,641,829) and USD 1,124,683 (INR 84,733,617), respectively.

   Operating leases as per old standard - ASC 840

   The Company leases certain facilities and equipment. Lease rent expenses on operating leases are charged to statement of income over the lease term. Certain of the Company's leases contain renewal options, rent escalation clauses, and/or landlord incentives. Renewal terms generally reflect market rates at the time of renewal. Rent expense for non- cancelable operating leases with scheduled rent increases and/or landlord incentives is recognized on a straight-line basis over the lease term, including any applicable rent holidays, beginning with the lease commencement date, or the date the Company takes control of the leased space, whichever is sooner. The excess of straight-line rent expense over scheduled payment amounts and landlord incentives is recorded as a deferred rent liability. The Company followed the accounting policy to account for leases in accordance with ASC 840 for the year ended March 31, 2019.

4. *Revenue recognition*

   <u>*Sale of manufactured goods*</u>

   The Company recognizes revenues from sale of manufactured ROXOR off-road side by side vehicles and their related accessories.

   Revenue is recognized when control of the vehicles, parts or accessories have been transferred and the Company's performance obligation to the customers have been satisfied. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transfer of goods. The timing of when the Company transfers the goods to the customer may differ from the timing of the customer's payment.

   When the Company gives the customers the right to return eligible goods, the Company estimates the expected returns based on an analysis of historical experiences.

   The Company has determined that the customers from the sale of vehicles and service parts are generally dealers and distributors. Transfer of control, and therefore revenue recognition, generally corresponds to the date when the vehicles or service parts are made available to the customer, or when the vehicles or service parts are released to the carrier responsible for transporting them to the customer. This is also the point at which invoices are issued, with payment terms for vehicles and for service parts vary with the dealers. For component part sales, revenue recognition is consistent with that of service parts.

   The Company sponsors certain sales incentive programs and accrues liabilities for estimated sales promotion expenses when products are sold to the dealerships to the extent that it is probable. The cost of incentives, if any, is estimated at the inception of a contract at the expected amount that will ultimately be paid. Sales promotion incentive programs include volume incentives, cash discounts, retail financing programs, and co-operative advertising programs. Sales promotions and incentives are recognized as a reduction to sales at the time of sale to the dealership. If the estimate of the incentive changes following the sale to the customer, the change in estimate is recognized as an adjustment to revenue in the period of the change.

   Revenue from contracts with customers

   Effective April 1, 2019, the Company has adopted Financial Accounting Standards Board ("FASB") issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606), with a date of initial application of April 1,

NOTES TO THE FINANCIAL STATEMENTS

2019 using the modified retrospective method and determined that the existing revenue recognition practices are in compliance with ASC 606. Accordingly, there was no cumulative effect adjustment to the balance of accumulated surplus in the balance sheet as of April 01, 2019, as the adoption did not result in a change to the timing of revenue recognition.

Erstwhile revenue recognition policy as per ASC 605

Sale of manufactured goods

The Company recognizes revenues from sale of manufactured ROXOR off-road side by side vehicles and their related accessories. Sales are recognized as revenue upon sale as these sales are considered to be final and no right of return or price protection exists.

Revenue from sale of goods is recognized specifically when all the following conditions are met:

a. There is a persuasive evidence that an arrangement exists.
b. Delivery has occurred, or services have been rendered.
c. The sales price is fixed or determinable.
d. Collectability is reasonably assured.

The Company sponsors certain sales incentive programs and accrues liabilities for estimated sales promotion expenses when products are sold to the dealerships to the extent that it is probable. Sales promotion incentive programs include volume incentives, cash discounts, retail financing programs, and co-operative advertising programs. Sales promotions and incentives are recognized as a reduction to sales at the time of sale to the dealership.

5. *Product warranty*

The Company provides a limited warranty for ROXOR for a period of two years or 12,000 miles whichever is lesser. The warranty reserve is established at the time of sale to the distributorship based on management's best estimate using historical rates and trends. These amounts are recorded as a liability in the balance sheet until they are ultimately paid. Accrued warranty liability was USD 1,184,095 (INR: 89,209,717) at March 31, 2020 (March 31, 2019: USD 391,391 (INR: 29,487,372)).

6. *Product liability*

The Company is subject to product liability claims in the normal course of business. Adequate insurance coverage is carried for catastrophic product liability claims. The Company self-insures product liability claims up to the purchased catastrophic insurance coverage. The estimated costs resulting from uninsured losses are charged to operating expenses when it is probable a loss has been incurred and the amount of the loss is reasonably determinable.

7. *Cash and cash equivalents*

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. Cash balances in bank accounts are insured by the Federal Deposit Insurance Corporation up to an aggregate per bank of USD 250,000 (INR: 18,835,000)). The Company believes it is not exposed to any significant risk on cash and cash equivalents.

8. *Inventories*

Inventory comprises of demonstration vehicles placed at dealer locations and with sales representative. Inventories are stated at the lower of cost and market value. Cost is the purchase price of the vehicle and attributable direct costs. Inventories are reviewed on a periodic basis for identification and write-down based on physical condition of the vehicle and considering the historical sales experience.

9. *Property and equipment*

Property and equipment are stated at cost less accumulated depreciation. Cost of items of property and equipment comprises cost of purchase and other costs necessarily incurred to bring it to the condition and location necessary for its intended use.

The Company depreciates property and equipment over the estimated useful life using the straight-line method. Upon retirement or disposal of assets, the cost and accumulated depreciation are eliminated from the accounts and the resulting gain or loss is credited or charged to operations.

The estimated useful life used to determine depreciation is:

Leasehold improvements	7 years or the lease period
Equipment	5 years
Furniture & fixtures	5 - 7 years
Computers	3 years
Vehicles	5 years

Expenditures for maintenance and repairs are charged to expense. Property and equipment is reviewed for impairment whenever events or changes in circumstances indicate the carrying value of the asset may not be recoverable.

10. *Intangible assets*

Intangible assets are comprised of computer software which has been recognized at cost and amortized over a period of 3 years or its estimated useful life. Subsequent expenditure is capitalized only when it increases the future economic benefit from the specific assets to which it relates.

11. *Income taxes*

Income taxes are provided for the tax effects of transactions reported in the financial statements and consist of taxes currently due plus deferred taxes related primarily to differences between the basis of certain assets and liabilities for financial and tax reporting. The deferred taxes represent the future tax return consequences of those differences, which will either be taxable or deductible when the assets and liabilities are recovered or settled, respectively.

The Company has determined whether any tax positions have met the recognition threshold and has measured the Company's exposure to those tax provisions. Management believes that the Company has adequately addressed all relevant tax positions and that there are no unrecorded tax liabilities. Federal and state taxing authorities generally have the right to examine and audit the previous three years of tax returns filed. Any interest or penalties from federal and state taxing authorities were recorded in the accompanying financial statements.

12. *Fair value measurements and financial instruments*

Assets and liabilities recorded at fair value in the financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels which are directly related to the amount of subjectivity associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

Level 3 – unobservable inputs for the asset or liability only used when there is little, if any, market activity for the asset or liability at the measurement date.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the level in the fair value hierarchy within which the fair value measurement in its entirety falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

Some of Company's financial instruments, including cash and cash equivalents, accounts receivable and accounts payable are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature.

13. *Commitments and contingencies*

Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred. Contingent liabilities are not recognized but are disclosed in the notes. Contingent assets are neither recognized nor disclosed in the financial statements.

The Company is engaged in litigation with FCA US, LLC both at the International Trade Commission and at the United States District Court, Eastern District of Michigan. Both matters are ongoing. At this time no liability has been incurred and the amount of any future loss or award associated with these matters cannot be estimated reasonably. A final determination is expected from the International Trade Commission on June 1, 2020. A trial date for the United States District Court, Eastern District of Michigan matter was previously set but adjourned due to the Covid-19 pandemic. The trial date is scheduled for June 8, 2020.

NOTES TO THE FINANCIAL STATEMENTS

NOTE C - CASH AND CASH EQUIVALENTS

The cash and cash equivalents of the Company comprise:

	USD		INR	
	As at March 31,		As at March 31,	
Particulars	**2020**	**2019**	**2020**	**2019**

NOTE J - SHORT TERM BORROWING – RELATED PARTY

The Company during the year ended March 31, 2020, obtained loan amounting to USD 30,629,979 (INR: 2,307,662,618) from MANA at an interest rate of 5.00% per annum. Loan amount of USD 250,000 (INR: 18,835,000) was repaid and balance outstanding of USD 30,379,979 (INR: 2,288,827,618) was converted to equity.

During the year ended March 31, 2019, the Company obtained loan amounting to USD 16,712,608 (INR: 1,259,127,887) from MANA at an interest rate of 5.00% per annum. Entire loan amount was repaid during the year ended March 31, 2019.

The loan amount payable at March 31, 2020 and March 31, 2019 was USD Nil (INR: Nil) and USD Nil (INR: Nil). Interest was calculated based on a 365-day annual term and payable along with the principal.

Interest expense for the year is USD 451,993 (INR: 34,053,153) (March 31, 2019: USD 276,011 (INR:20,794,669)).

NOTE K - LEASES

General description of the lease

The Company has entered into noncancelable operating lease agreements related to facility, office equipment, machinery and equipment and vehicles with varying terms.

Non-lease components: Leases that contain non-lease components are accounted for as a single component and recorded on the balance sheet for certain asset classes including equipment. Non-lease components include, but are not limited to, common area maintenance and service arrangements.

Package of practical expedients: The Company will not reassess whether any expired or existing contracts are leases or contain leases, the lease classification for any expired or existing leases or any initial direct costs for any expired or existing leases as of the transition date.

Additional transition method: The Company adopted the standard using a modified retrospective approach, applying the standard's transition provisions at the beginning of the period of adoption and maintain previous disclosure requirements for comparative periods.

The Company used the following policies and/or assumptions in evaluating the lease population:

Lease determination: The Company considers a contract to be or to contain a lease if the contract conveys the right to control the use of identified property, plant, or equipment (an identified asset) for a period of time in exchange for consideration.

Discount rate: When the lease contracts do not provide a readily determinable implicit rate, the Company uses the estimated incremental borrowing rate based on information available at the inception of the lease. The discount rate is determined by asset class.

Variable payments: The Company includes payments that are based on an index or rate within the calculation of right of use leased assets and lease liabilities, initially measured at the lease commencement date. There are variable payments in the nature of origination fees for office equipment, machinery and equipment and therefore are not treated as a part of lease payments.

Purchase options: Certain leases include options to purchase the office equipment. The depreciable life of assets are limited by the expected lease term, unless there is a transfer of title or purchase option reasonably certain of exercise.

Renewal options: Most leases include one or more options to renew, with renewal terms that can extend the lease term from one or more years. The exercise of lease renewal options is at the Company's sole discretion.

Residual value guarantees, restrictions, or covenants: The lease agreements do not contain any material residual value guarantees or material restrictive covenants.

Short-term leases: Leases with an initial term of 12 months or less are not recorded on the balance sheet; the Company recognizes lease expense for these leases on a straight-line basis over the lease term and expense the associated operating lease costs to administrative expenses on the statements of income.

The table below presents the classification of leasing assets and liabilities as reported on the balance sheet as of March 31, 2020.

	USD		INR	
	As at March 31,		As at March 31,

Brazil	**218,736**	–	**16,479,570**	–
Total revenue by geography	**38,572,831**	48,710,576	**2,906,077,088**	3,669,854,796

Contract balance

The Company's contracts with customers are comprised of dealer agreements and purchase orders. These contracts with customers typically consist of sale of products which represent performance obligations that are satisfied upon transfer of control of the product to the customer at a point in time. The Company adopted the new revenue recognition standard using the modified retrospective transition approach and determined that the existing revenue recognition practices are in compliance with ASC 606. Accordingly, there was no cumulative effect adjustment to the balance of accumulated surplus in the balance sheet for the year ended March 31, 2020, as the adoption did not result in a change to the timing of revenue recognition.

The following table provides information about contract assets and liability balances as of March 31, 2020 and 2019:

	USD		INR	
	As at March 31,		As at March 31,	
Particulars	**2020**	**2019**	**2020**	**2019**
Accounts receivable (Refer Note C)	**1,507,306**	3,254,569	**113,560,434**	245,199,228

NOTE M - INCOME TAXES

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company is subject to taxation in the United States and the State of Michigan.

NOTES TO THE FINANCIAL STATEMENTS

The provision for income tax benefit for the current period is as follows:

	USD		INR	
	Year ended March 31,		Year ended March 31,	
	2020	2019	2020	2019
Current tax benefit	–	–	–	–
Deferred tax benefit	(7,679,663)	(5,731,719)	**(578,585,810)**	(431,827,709)
Income tax benefit	**(7,679,663)**	(5,731,719)	**(578,585,810)**	(431,827,709)

The tax effects of significant temporary differences that resulted in deferred tax assets and liabilities and a description of the items that create such differences is as follows:

	USD		INR	
	As at March 31,		As at March 31,	
	2020	2019	2020	2019
Deferred tax asset (liability)				
Net operating loss	**14,112,245**	7,151,670	**1,063,216,538**	538,806,818
Interest expense limitation	**491,101**	246,236	**36,999,549**	18,551,420
Accrued merit pay	**208,242**	60,101	**15,688,952**	4,528,009
Accrued warranty	**260,716**	81,439	**19,642,343**	6,135,614
Accrued expenses	**107,147**	68,065	**8,072,455**	5,128,017
Contributions	**7,833**	8,195	**590,138**	617,411
Lease assets	**(2,814)**	–	**(212,007)**	–
Inventory capitalization	**105**	–	**7,911**	–
Prepaid expenses	**(38,776)**	(29,384)	**(2,921,384)**	(2,213,791)
Property and equipment	**(84,179)**	(204,365)	**(6,342,044)**	(15,396,858)
Total	**15,061,620**	7,381,957	**1,134,742,451**	556,156,640

In assessing the realization of deferred tax assets, the likelihood of whether it is more likely than not that some portion or all the deferred tax assets will not be realized must be considered. The ultimate realization of deferred tax assets is dependent on the generation of future taxable income during the periods in which temporary difference become deductible. Management considers the projected future taxable income and tax planning strategies in making this assessment. Based on the level of projections for future taxable income for which the deferred tax assets are deductible, the management believes there exists reasonable certainty regarding the realization of deferred tax assets on the accrued expenses and net operating losses.

The company has federal net operation losses ("NOLs") carry forwards of USD 66,964,131 (INR: 5,045,077,630) as at March 31, 2020 (March 31, 2019: USD 28,738,274 (INR: 2,165,141,563). Out of the total NOLs of USD 66,964,131 (INR: 5,045,077,630), if unutilized, NOLs of USD 6,721,616 (INR: 506,406,549) will begin to expire from the year 2037, whereas the remaining NOLs will be carried forward indefinitely.

The Company has state net operating losses carry forwards of USD 14,131,255 (INR: 1,064,648,752) as at March 31, 2020 (March 31, 2019: USD 5,875,758 (INR: 442,679,608)), which if unutilized will begin to expire from the year 2027.

The Company recognizes the financial statement impact of a tax position when it is more likely than not that the position will be sustained upon examination.

The tax years 2016, 2017, 2018 and 2019 remains subject to examination by the taxing authorities.

NOTE O - RISK AND UNCERTANITIES

The Company's future results of operations involve several risks and uncertainties.

Factors that could affect the Company's future operating results and cause actual results to vary materially from expectations include, competitive factors, including but not limited to pricing pressures; deterioration in general economic conditions; the Company's ability to effectively manage operating costs and increase operating efficiencies; declines in revenues; technological and market changes; the ability to attract and retain qualified employees and the Company's ability to execute on its business plan.

NOTE P - ADVERTISING AND MARKETING EXPENSE

Advertising costs are presented as part of selling, general and administrative expenses in the statement of loss. Advertising costs are expensed as incurred. The amount of advertising and marketing cost incurred by the Company for the year ended March 31, 2020 and March 31, 2019 is USD 13,683,291 (INR: 1,030,899,123) and USD 11,467,442 (INR: 863,957,061), respectively.

NOTE Q - COMMON STOCK

Common stock

The authorized share capital of the Company as of March 31, 2020 was 3,000,000 shares of $ 25 each. As at March 31, 2020, total shares issued and outstanding was 2,453,441.

The authorized share capital of the Company as of March 31, 2019 was 1,300,000 shares of $ 25 each. As at March 31, 2019, total shares issued and outstanding was 1,238,242.

Voting

Each holder of common stock is entitled to one vote in respect of each share held by him in the records of the Company for all matters submitted to a vote.

Liquidation

In the event of liquidation of the Company, the holder of common stock shall be entitled to receive all the remaining assets of the Company.

NOTE R - EMPLOYEE BENEFIT PLANS

The Company has voluntary 401(k) retirement plans covering substantially all employees. The Company may make annual contributions to the plans equal to a uniform percentage of participant compensation. The cost of the Company's contributions charged to expense related to 401(k) contributions was USD 109,711 (INR: 8,265,627) and USD 57,350 (INR: 4,320,749) for the year ended March 31, 2020 and year ended March 31, 2019, respectively.

NOTE S - SUBSEQUENT EVENTS

In January 2020, the World Health Organization declared the outbreak of a novel coronavirus (COVID-19) as a "Public Health Emergency of International Concern," which continues to spread throughout the world and has adversely impacted global commercial activity and contributed to significant declines and volatility in financial markets.

The Company has evaluated subsequent events and transactions that occurred after the balance sheet date up to the date that the financial statements were issued. Management is currently evaluating the impact of this COVID-19 pandemic and has concluded that while it is reasonably possible that the virus could have a negative effect on the Company's financial position and results of its operations, the specific impact is not readily determinable as of the date of these financial statements. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

INDEPENDENT AUDITOR'S REPORT

To the Automobili Pininfarina GmbH, München

Audit Opinion

We have audited the consolidated financial statements of Automobili Pininfarina GmbH, München, and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 March 2019, the consolidated statement of profit and loss, consolidated statement of changes in equity and consolidated statement of cash flows for the financial year from 1 April 2019 to 31 March 2020, and notes to the consolidated financial statements, including the presentation of the recognition and measurement policies.

In our opinion, on the basis of the knowledge obtained in the audit, the accompanying consolidated financial statements comply, in all material respects, with the requirements of German commercial law and give a true and fair view of the assets, liabilities and financial position of the Group as at 31 March 2020 and of its financial performance for the financial year from 1 April 2019 to 31 March 2020 in compliance with German Legally Required Accounting Principles.

Pursuant to section 322 paragraph 3 sentence 1 HGB, we declare that our audit has not led to any reservations relating to the legal compliance of the consolidated financial statements.

Basis for the Audit Opinions

We conducted our audit of the consolidated financial statements in accordance with section 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our auditor's report. We are independent of the group entities in accordance with the requirements of German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions on the consolidated financial statements.

Responsibilities of the Executive Director for the Consolidated Financial Statements

The executive director is responsible for the preparation of the consolidated financial statements that comply, in all material respects, with the requirements of German commercial law and that the consolidated financial statements, in compliance with German Legally Required Accounting Principles, give a true and fair view of the assets, liabilities, financial position, and financial performance of the Group. In addition, the executive director is responsible for such internal control as they, in accordance with German Legally Required Accounting Principles, have determined necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the executive director is responsible for assessing the Group's ability to continue as a going concern. He also has the responsibility for disclosing, as applicable, matters related to going concern. In addition, he is responsible for financial reporting based on the going concern basis of accounting provided no actual or legal circumstances conflict therewith.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, as well as to issue an auditor's report that includes our audit opinions on the consolidated financial statements.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with section 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

We exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinions. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal control relevant to the audit of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit opinion on the effectiveness of these systems.
- Evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive director and related disclosures.
- Conclude on the appropriateness of the executive director use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the consolidated

financial statements or, if such disclosures are inadequate, to modify our respective audit opinions. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to be able to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements present the underlying transactions and events in a manner that the consolidated financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Group in compliance with German Legally Required Accounting Principles.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express audit opinions on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinions.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES AS AT MARCH 31, 2020

Automobili Pininfarina GmbH, Munich

General information about the consolidated annual financial statement

The parent company was founded by shareholder contract dated February 5th, 2018.

The consolidated annual financial statements have been prepared in accordance with the provisions of the German Commercial Code (HGB) and the german provisions for companies with limited liability (GmbHG).

In accordance with the size categories stated in § 267 HGB, the company is a small company as defined by § 267 para. 1 HGB.

The group consolidated financial statements are prepared for the first time. On a voluntary basis we added figures for the comparative period as additional information.

Information identifying the company according to the registry court

Company name according to registry court:	Automobili Pininfarina GmbH
Registered company address according to registry court:	Munich
Registry entry:	Handelsregister
Registry court:	Munich
Registry court number:	HRB239596
Executive director:	Michael Perschke (until 25th March 2020) Per Svantesson (since 25th March 2020**)**

The consolidated financial statements include consolidation of audited financial statements of a wholly owned subsidiary – Automobili Pininfarina Americas Inc., registered in the state of Delaware in USA. The subscribed capital is 23,837.57 EUR/26,000 USD. The net loss of the financial year is 18,526.31 EUR.

Disclosures on accounting policies

Accounting policies

Assets and liabilities denominated in foreign currencies are translated at the mean spot exchange rate on the balance sheet date in accordance with § 256a HGB.

Purchased intangible assets were recognised at cost and are amortised.

Internally generated intangible assets were recognised at their development cost in accordance with § 255 para. 2 HGB. After completion, from start of sales, these are amortised over their expected useful life. The expected useful life is defined as the time period over which the relevant developed car will be distributed (straight-line depreciation). The option to capitalize costs acc. to section 255 par. 2 sent. 3 HGB was not exercised.

The companies are not involved in any basic research. Thus separation of research and development is not needed. Sometimes feasibility studies are performed prior to developing a car which would not be capitalized. After passing the stage of feasibility the development costs are recognized in balance sheet if following criteria are met:

- It is highly probable that the planned intangible asset will arise
- Criteria for recognition as an asset are met
- Development costs can be reliably attributed to this intangible asset
- No prohibition in acc. with section 248 para. 2 sent. 2 HGB

The group starts to capitalize development costs once those criteria are given.

Tangible assets were recognized at cost and are depreciated.

Depreciation and amortization is charged using the straight-line method on the basis of the expected useful life of the assets.

Low-value assets with acquisition costs up to EUR 800 are fully depreciated in the year of acquisition, whereby the disposal is also assumed in the year of acquisition.

Financial assets were recognized at acquisition costs.

If the value of fixed assets determined according to the above principles is higher than the value to be attached to them on the balance sheet date, this is taken into account by unscheduled depreciation.

Receivables and other assets were measured at their nominal value, reflecting all identifiable risks.

The right to choose an asset for deferred tax income in accordance with § 274 par. 1 sent. 2 HGB was exercised.

The deferred tax assets and liabilities are shown in the balance sheet. The valuation is made with the individual tax rate at the time of the reduction of the differences.

The other provisions consider all identifiable risks and are recognized at the settlement amount required by reasonable commercial judgment.

Liabilities are recognized at their settlement amount.

Subsidiaries which underlying currency is not Euro are converted by following currency rates as available from German federal bank:

1)	Balance Sheet:	Year-end exchange rate
2)	Profit & Loss Statement:	Average year exchange rate
3)	Equity:	Historical exchange rate

Balance sheet disclosures

Internally generated intangible assets

The schedule of movement of fixed assets is attached to notes.

Internally generated intangible assets

Expenditures incurred for internally generated intangible fixed assets were capitalized. The total amount of research and development costs at the end of the financial year was 72,621,475.96 EUR (previous year: 21,169,754.12 EUR).

As an activated Customer App is not useful in existing form, unscheduled depreciation of EUR 50,472.00 occurred in the business year.

Other liabilities - advanced payments

Refundable deposits received from clients are recognized as other liabilities, as those prepayments do not relate to a binding order. The total amount of advanced payments in the financial year was 3,138,177.83 EUR (previous year: 4,053,245.43 EUR).

Disclosure on remaining maturity comments

The amount of the liabilities with a remaining term of up to one year is 19,724,162.49 EUR (previous year: 11,019,192.94 EUR). The trade receivables and other assets are also terminating within one year is 1,474,242.13 EUR (previous year: 665,670.51 EUR).

Deferred taxes

Deferred taxes are attributable to the following differences:

German deferred taxes are measured using a tax rate of 32.975 %. Those deferred tax assets at the end of the financial year amounted to 28,863,741.94 EUR (previous year: 7,386,343.94 EUR) and result from loss carry forwards. Deferred tax liabilities at the end of the financial year amounted to 23,422,156.42 EUR (previous year: 6,980,726.42 EUR) and result from capitalized development costs.

Italian deferred taxes are measured using a tax rate of 24.00 % that relates to the branch in Italy. Deferred tax liabilities at the end of the financial year amounted to 12,942.19 EUR (previous year deferred tax asset: 208,545.45 EUR).

The increase in deferred tax liabilities relates to the increase in internally generated intangibles assets that have been capitalized in this year.

Income statement disclosures

Explanation of income and expenses of exceptional magnitude or importance

In accordance with § 285 no. 31 HGB the individual income and expenses of extraordinary magnitude or exceptional importance are reported as follows:

– Advertising costs in the amount of 1,565,560.73 EUR (previous year: 1,098,010.67 EUR), which were claimed by various service provider

– Event costs in the amount of 4,632,367.98 EUR (previous year: 2,343,137.35 EUR)

– Purchased services in the amount of 2,656,546.24 (previous year: 4,247,305.48 EUR)

– Other own work capitalized is reported in the amount of 4,405,848.00 EUR (previous year: 1,247,391.91 EUR).

The income from currency translation is reported in the income statement under "Other operating income" in the amount of 52,509.46 EUR (previous year: 103,837.30 EUR). Expenses from currency translation are reported under the item "Other operating expenses" in the amount of 84,586.22 EUR (previous year: 132,651.23 EUR).

Within other income 3,990.16 EUR and within other expenses 90,678.29 EUR related to another period.

Other disclosures

Average number of employees during the financial year

The average number of employees according to § 267 para. 5 HGB during the financial year in the company was 68,75 (previous year: 19). The staff can be shown as follows:

	2020	2019
Design & Engineering (Product Development)	35,75	9,00
Other functions	33,00	10,00
Total	68,75	19,00

Other financial obligations

Other financial obligations according to § 285 no. 3a HGB are made up of leasing contracts in the amount of 82,041.07 EUR and rent payments due to long term contracts in the amount of 394,644.00 EUR.

Fee for auditors

The auditor's fee for the fiscal year 2019/2020 amounted to 28,500.00 EUR and relates to audit services only.

Membership of group

Automobili Pininfarina GmbH is included in the consolidated financial statements of Mahindra & Mahindra Limited, based in Mumbai, India. Mahindra & Mahindra Limited prepares consolidated financial statements for the largest consolidated group. Automobili Pininfarina GmbH prepares consolidated financial statements for the smallest consolidated group.

Subsequent events

The recently occurred Coronavirus (SARS-CoV-2) resulted in a Pandemic and thus not only the groups locations but also the client market are hit by this crisis. Up to now the company is only partly effected by switching to short term work for a minor part of staff. Beyond a short term effect, if any, on the overall performance of Automobili Pininfarina GmbH group and its projections can hardly be quantified.

Signature of management

Munich, 27th April 2020 Per Svantesson

INDEPENDENT AUDITOR'S REPORT

Board of Directors

Automobili Pininfarina Americas Inc.

We have audited the accompanying balance sheet of Automobili Pininfarina Americas Inc. ('the Company') which comprise the balance sheet as at March 31, 2020 and the related statement of loss, stockholder's equity, and cash flows for the year then ended, and the related notes to the financial statements.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the organization's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the organization's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly in all material respects, the financial position of the Company as of March 31, 2020 and the results of its operations and the cash flow for the year then ended, in accordance with the accounting principles generally accepted in the United States.

(The accompanying notes are an integral part of these financial statements)

Notes to Financial Statements

NOTE A – NATURE OF OPERATIONS

Automobili Pininfarina Americas Inc. (hereinafter referred to as "APA" or "the Company") was converted to a Delaware corporation on January 23, 2019 through the conversion of a Delaware Limited Liability Company, under the name of Harkey Acquisition, LLC". The Company is a wholly owned subsidiary of Automobili Pininfarina GmbH (hereinafter referred to as "the Parent Company").

The Parent Company acquired 100% membership interest of Harkey Acquisition, LLC (hereinafter referred to as "the LLC") on January 15, 2019 from Oakland Standard Co., LLC ("Seller"). No capital contribution was made by the Seller in the LLC. Post acquisition, a plan of conversion to a Corporation was adopted and the LLC was converted and renamed as "Automobili Pininfarina Americas Inc.".

The Company is engaged directly or indirectly in designing, developing, manufacturing, selling, distributing, servicing and promoting automobiles globally (including electric vehicles) and spare parts as well as all activites in connection thereto. The Company is in start-up phase and is yet to start revenue generating activities.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies are detailed below:

1. *Basis of preparation*

   a) The accompanying financial statements are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States ('US GAAP') to reflect the financial position, results of operations and cash flows of the Company.

   b) The financial statements are for the year April 01, 2019 to March 31, 2020. All amounts are stated in US Dollars, unless specified otherwise. The LLC and the Company did not conduct any business operations between September 25, 2017, the date the LLC was first formed and March 31, 2019. The Company opened a banking account on June 17, 2019. These are the first year financial statements of the Company.

2. *Use of estimates*

   The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The management's estimates for realization of deferred tax assets and accruals at the balance sheet date represent certain of these particularly sensitive estimates. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. Any revision in accounting estimates are recognized prospectively in the current and future periods.

3. *Cash and cash equivalents*

   Cash equivalents consist of highly liquid investments with a maturity of three months or less on the date of purchase. The carrying value of cash and cash equivalents approximates fair value because of the short maturities of those financial instruments. Cash balances in bank accounts are insured by the Federal Deposit Insurance Corporation up to $ 250,000 for each insured bank for each account per depositor.

4. *Revenue recognition*

   The Company is currently in a start-up phase and is expected to start business operations once the Company obtains a sales license.

5. *Leases*

   Lease rent expenses on operating leases are charged to expense over the lease term. Certain operating lease agreements may provide for scheduled rent increases over the lease term. Rent expense for such leases is recognized on a straight-line basis over the lease term.

6. *Income taxes*

   In accordance with the provisions of Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 740 "Income Taxes," income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The deferred tax asset is reduced by a valuation allowance if it is more likely than not that some portion or all of the asset will not be realized.

   The Company has adopted Financial Accounting Standards Board ("FASB") Accounting Standards Update ("ASU") 2015-17 Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes. The guidance requires that all deferred tax assets and liabilities, along with any related valuation allowance, be classified as non-current on the statement of financial position. The guidance however does not change the existing guidance that prohibits offsetting deferred tax liabilities from one jurisdiction against deferred tax assets of another jurisdiction.

Notes to Financial Statements

7. *Fair value measurements and financial instruments*

   Assets and liabilities recorded at fair value in the financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels, which are directly related to the amount of subjectivity, associated with the inputs to the valuation of these assets or liabilities are as follows:

   Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

   Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

   Level 3 – unobservable inputs for the asset or liability only used when there is little, if any, market activity for the asset or liability at the measurement date.

   This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

   The Company's financial instruments consist of cash and cash equivalents and other current liabilities. The estimated fair value of cash and cash equivalents and other current liabilities approximate their carrying amounts due to the short-term nature of these instruments. None of these instruments is held for trading purposes.

8. *Commitments and contingencies*

   Liabilities for loss contingencies arising from claims, assessments, litigations, fines, penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred.

9. *Recently issued and adopted accounting standards*

   In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flows (Topic 230) - Classification of Certain Cash Receipts and Cash Payments. The new guidance applies to all entities that are required to present a statement of cash flows under Topic 230 and addresses specific cash flow items to provide clarification and reduce the diversity in presentation of these items. The guidance is effective for annual periods beginning after December 15, 2018, and interim periods within annual periods beginning after December 15, 2019. Early adoption is permitted. The ASU 2016-15 is effective for the Company beginning April 1, 2019.

10. *Recently issued accounting standard not yet adopted*

    In August 2018, the FASB issued ASU 2018-13, Fair Value Measurement (Topic 820) Disclosure Framework-Changes to the Disclosure Requirements for Fair Value Measurement, which modifies the disclosure requirements on fair value measurements. The updated guidance is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted for any removed or modified disclosures. The Company is currently assessing the impact of the adoption of this guidance on its financial statements and disclosures.

    In February 2016, the FASB issued ASU No. 2016-02, Leases. Under the new guidance, lessees are required to recognize a right-of-use asset and a lease liability on the balance sheet for all leases, other than those that meet the definition of a short-term lease. This update will establish a lease asset and lease liability by lessees for those leases classified as operating under current GAAP. Leases will be classified as either operating or finance under the new guidance. Operating leases will result in straight-line expense in the income statement, similar to current operating leases, and finance leases will result in more expense being recognized in the earlier years of the lease term, similar to current capital leases. This ASU is effective for the Company beginning January 1, 2021. The Company is currently evaluating the impact of this standard on its financial statements.

NOTE C – COMMITMENTS AND CONTINGENCIES

Premises

The Company has entered into a sub-lease arrangement with Issimi Inc. (hereinafter referred to as "Sub-lessor"). The lease arrangement consist of approximately 600 square feet of warehouse space and 210 square feet of office space for a period of 2 years commencing from October 1, 2019. The Company shall in addition to the lease rentals of $ 2,025 per month, share all the common area operating expenses with the Sub-lessor, such expenses will be determined based on Sub-lessor's estimate of common area operating expense. Under the said arrangement, the Company is required to pay security deposit equivalent to lease rent of 1 month amounting to $ 2,025. The lease rentals for the year ended March 31, 2020 amounted to $ 12,150. The common area operating expenses for the year ended March 31, 2020 amounted to $ 1,725.

Details of future commitments on operating leases are as follows:

Particulars	**Amount US$**
March 31, 2021	24,300
March 31, 2022	12,150

NOTE D - OTHER CURRENT LIABILITIES

Other current liabilities include the following:

	As at March 31, 2020
Accrued rent	13,875
Professional fees	3,000
Bank service fees	485
Total	**17,360**

Notes to Financial Statements

NOTE E – INCOME TAXES

The Company had no operations during the year hence no current or deferred taxes have been provided in the financial statements. Federal and state net operating losses generated during the year, would result in deferred tax assets, which have not been recognized, as they have been considered to be fully provided through a valuation allowance.

Accounting for uncertain tax position

The Company recognizes the benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company has no unrecognized tax positions as at March 31, 2020.

NOTE F – COMMON STOCK

Common stock authorized, issued and outstanding

The authorized share capital of the Company consists of 2,000 common shares of par value $ 25 each. At March 31, 2020 the Company had issued 1,040 common shares of par value $ 25 each. On January 23, 2019, the Parent Company subscribed to 40 common shares of the Company. The subscription amount of $ 1,000 towards these common shares was paid by the Parent Company on August 28, 2019 on issuance of the share certificate. On September 30, 2019, the Parent Company subscribed and paid $ 25,000 for the issuance of 1,000 common shares of the Company.

Voting

Each holder of common stock is entitled to one vote in respect of each share held by him in the records of the Company for all matters submitted to a vote.

Liquidation

In the event of liquidation of the Company, the holders of common stock shall be entitled to receive all of the remaining assets of the Company, after distribution of all preferential amounts, if any. Such amounts will be in proportion to the number of equity shares held by the shareholders.

NOTE G – FAIR VALUE MEASUREMENT

Financial assets and liabilities held by the Company are not measured at fair value on a recurring basis but are recorded at amounts that approximate fair value due to their liquid or short-term nature.

NOTE H – SUBSEQUENT EVENTS

The Company evaluated all events and transactions that occurred after March 31, 2020 through April 13, 2020, the date the financial statements are issued. Based on the evaluation, the Company is not aware of any events or transactions that would require recognition or disclosure in the financial statements.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Mahindra West Africa Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **Mahindra West Africa Limited** (the Company), which comprise the statement of financial position as at **31 March 2020** the statement of profit or loss, statement of financial position, statement of changes in equity and statement of cash flows for the year ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as at **31 March 2020**, and of its financial performance and its cash flows for the year ended in accordance with International Financial Reporting Standards (IFRSs), the Financial Reporting Council of Nigeria Act No. 6, 2011 and the provision of the Companies and Allied Matters Act, CAP C20 LFN, 2004.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants (IESBA Code)*, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic ·alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for Audit of the Financial Statements.

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

i) Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

ii) Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstance, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

iii) Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

iv) Conclude on the appropriateness of management's use of the going concern of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

v) Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transaction and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

The Companies and Allied Matters Act, CAP C20, LFN 2004 requires that in carrying out our audit we consider and report to you on the following matters. We confirm that:

i) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.

ii) In our opinion, proper books of account have been kept by the company; and

iii) The Company's Statement of Financial Position and Statement of Profit or Loss are in agreement with e books of account.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2020

1 Nature of Operation

The principal activity of the company is to develop business, assemble, buy, sell, distribute two, three or four wheeled vehicles, trucks, buses and any other vehicles of every kind and description, engines, generators, tractors (including implements), and construction equipments.

2 General Information, statement of compliance with IFRS and going concern assumption

The company was incorporated in Nigeria under the Companies and Allied Matters Act 2004 as a Private Limited Liability Company on 20 May 2016. It commenced full operation in May 2016. Its Authorized Share Capital was 200,000 ordinary shares of N196.10 each. The company is substantially owned by Mahindra & Mahindra South Africa. The company deals in business development of automobile and farm equipments.

The Financial Statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), the provisions of Financial Reporting Council Act, No 6, 2011 and the requirements of the Companies and Allied Matters Act, CAP C20 LFN, 2004. Where the provisions of IFRS are in conflict with provisions of Financial Reporting Council Act, No 6, 2011 and the requirements of the Companies and Allied Matters Act, CAP C20, 2004.

The financial statements for the year ended 31 March 2020 (including comparatives) were approved and authorised for issue by the board of directors of Mahindra West Africa Limited on **May 26 2020**.

3 New or Revised Standards or Interpretations

3.1 Standards, amendments and interpretations to existing standards adopted as at 1 January 2019

The Company adopted the following standards and amendments that are effective for the first time in 01 January 2019:

- IFRIC 23 Uncertainty over Income Tax Treatments
- IFRS 9 Prepayment Features with Negative Compensation (Amendments to IFRS 9)
- Annual Improvements to IFRS 2015–2017 Cycle
- Plan Amendment, Curtailment or Settlement (Amendments to IAS 19)

These amendments do not have a significant impact on these financial statements and therefore the disclosures have not been made. However,they do not affect these financials statements.

3.2 Standards, amendments and interpretations to existing standards that are not yet effective and have not been adopted early by the Company.

At the date of authorisation of these financial statements, certain new IFRS standards, amendments and interpretations to existing standards have been published by the IASB but are not yet effective, and have not been adopted early by the company. Management anticipates that all of the relevant pronouncements will be adopted in the company's accounting policies for the first period beginning after the effective date of the pronouncement.

Information on new standards, amendments and interpretations that are expected to be relevant to the company's financial statements is provided below. Certain other new standards and interpretations have been issued but are not expected to have a material impact on the company's financial statements.

3.2.1 IFRS 17, 'Insurance Contracts', Issued: May 2018 (Effective 1 January 2021)

IFRS 17, "Insurance Contracts" In May 2018, the IASB issued IFRS 17 "Insurance Contracts," which replaces an interim standard IFRS 4 "Insurance Contract" and related interpretations. The standard sets out the requirements that a company should apply in reporting information about insurance contracts.

The standard provides update of information about the obligations, risk and performance of insurance contracts, increases transparency in financial information reported by insurance companies, which will give investors and analysts more confidence in understanding the insurance industry, and introduces a consistent accounting for all insurance contracts based on a current measurement model. IFRS 17 requires that a company update the measurement of insurance obligations at each reporting date, using current estimates of the amount, timing and uncertainty of cash flows and of discount rate.

3.2.2 The amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors (the amendments) to align the definition of 'material' across the standards and to clarify certain aspects of the definition. Issued: October 2018 (Effective 1 January 2020

In October 2018, the International Accounting Standards Board (IASB or the Board) issued amendments to IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors (the amendments) to align the definition of 'material' across the standards and to clarify certain aspects of the definition.

New definition of material

The new definition states that "information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity."

4 Significant Accounting Policies

The accounting policies set out below have been applied consistently to all years presented in the financial statements.

4.1 Basis of preparation

The Company's financial statements have been prepared on an accrual basis and under the historical cost convention. Monetary amounts are expressed in Nigerian currency Naira (₦)

4.1.1 Functional and Presentation currency

These Financial Statements are presented in Nigeria Naira which is the company's functional currency.

4.2 Revenue

Revenue in the current year represents total expenses plus a mark up of 11% on the expenses excluding exchange loss and interest on bank loan, generated for Mahindra & Mahindra Ltd. (India) from its businesses in West African Countries.

To determine whether to recognize revenue, the Company follows a 5-step process:

1. Identifying the contract with a customer
2. Identifying the performance obligations
3. Determining the transaction price
4. Allocating the transaction price to the performance obligations
5. Recognising revenue when/as performance obligation(s) are satisfied.

The Company often enters into transactions involving services provided to customers on-bejalf of Mahindra India. In all cases, the total transaction price for a contract is allocated amongst the various performance obligations based on their relative stand-alone selling prices.

Revenue is recognized either at a point in time or over time, when (or as) the Company satisfies performance obligations by transferring the promised services to the customers.

The company recognizes contract liabilities for consideration received in respect of unsatisfied performance obligations and reports these amounts as other liabilities in the statement of financial position. Similarly, if the Company satisfies a performance obligation before it receives the consideration, the Company recognizes either a contract asset or a receivable in its statement of financial position, depending on whether something other than the passage of time is required before the consideration is due.

4.3 Administrative expenses

Administrative expenses are recognized in profit or loss upon utilization of the service or at the date of their origin.

4.4 Employee Benefits

4.4.1 Pension fund obligations

A defined contribution plan is a pension plan under which the company pays fixed contributions into a separate entity - Pension Fund Administrators (PFA) and has no legal or constructive obligations to pay further contributions. Obligations for contribution plans are recognized as personnel expenses in profit or loss in the periods during which related expenses are rendered. Contributions to a defined contribution plan that are due for more than 12 months after the end of the reporting period in which the employees render the service are discounted to their present value.

4.4.2 Short-term employee benefits

The cost of short-term employee benefits (those payable within 12 months after service is rendered) such as paid vacation, leave pay, sick leave and bonuses are recognized in the period in which the service is rendered and is not discounted. The expected cost of short-term accumulating compensated absences is recognized as an expense as the employees render service that increases their entitlement or, in the case of non-accumulating absences, when the absences occur. The expected cost of bonus payments is recognized as an expense when there is a legal or constructive obligation to make such payments as a result of past performance.

Provisions for leave pay and bonuses are recognized as a liability in the financial statements.

4.5 Taxation

4.5.1 Tax Expense

The tax expense represents the sum of the current and deferred tax. Current tax and deferred tax are recognized in profit or loss except to the extent that they relate to items recognized directly in equity or in other comprehensive income.

4.5.2 Current Tax

The current tax is based on taxable profit for the year. Taxable profit differs from net profit as reported in the statement of profit or loss and other comprehensive income because it excludes items of income or expense that are taxable or deductible. The company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting year, and any adjustment to tax payable in respect of the previous years.

4.5.3 Deferred Tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

The measurement of deferred tax reflects the tax consequences that would follow the manner in which the company expects, at the end of the reporting year, to recover or settle the carrying amount of its assets and liabilities. For investment property that is measured at fair value, the presumption that the carrying amount of the investment property will be recovered through sale has not been rebutted.

Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for unused tax losses, tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which it can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

4.5.4 Tax Exposure

In determining the amount of current and deferred tax, the company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. New information may become available that caused the company to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the year that such a determination is made.

4.6 Cash and Cash Equivalents

Cash and Cash Equivalents comprise of notes and coins on hand, demand deposits and other short term, highly liquid financial assets with original maturities of three months or less that are convertible to a known amount of cash which are subject to insignificant risk of changes in value, all of which are available for use by the company unless otherwise stated. In the statement of financial position, company overdrafts are included in current liabilities.

4.7 Trade Receivables

Trade receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market and that the company does not intend to sell immediately or in the near term.

4.8 Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of a qualifying asset are capitalized during the period of time that is necessary to complete and prepare the asset for its intended use or sale. Other borrowing costs are expensed in the period in which they are incurred and reported in finance costs.

4.9 Property, Plant and Equipment

4.9.1 IT equipment and other equipment

4.9.1.1 Recognition and measurement

Items of property and equipment are measured at cost less accumulated depreciation and any accumulated impairment losses.

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the following:

- The cost of material and direct labour;
- Any other costs directly attributable to bringing the assets to a working condition for their intended use;
- When the company has an obligation to remove the asset or restore the site, an estimate of the cost of dismantling and removing the items and restoring the site on which they are located; and
- Capitalized borrowing cost.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

When parts of an item of property have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property and equipment (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognized within other income in profit or loss.

When parts of an item of property have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Any gain or loss on disposal of an item of property and equipment (calculated as the difference between the net proceeds from disposal and the carrying amount of the item) is recognized within other income in profit or loss.

4.9.1.2 Subsequent costs

Subsequent expenditure is capitalized only when it is probable that the future economic benefits of the expenditure will flow to the company. On-going repairs and maintenance are expensed as incurred.

4.9.1.3 Depreciation

Items of property and equipment are depreciated from the date they are available for use or, in respect of self-constructed assets, from the date that the assets are completed and ready for use. Depreciation is calculated to write off the cost of items of property, plant and equipment less their estimated residual values using the straight line basis over their estimated useful lives. Depreciation is recognized in profit or loss. Leased assets under finance leases are depreciated over the shorter of the lease term and their useful lives.

The estimated useful life for the current and comparative years of significant items of property, plant and equipment are as follows:

- Motor Vehicles 4 years
- Furniture and Fittings 2–4 years
- Household equipment 4 years

Depreciation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

4.10 Share Capital

4.10.1 Ordinary Shares

Ordinary shares are classified as equity and (share capital) are recorded at the proceeds received net of incremental external costs directly attributable to the issue.

4.11 Financial Instruments

4.11.1 Recognition and derecognition

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset expire, or when the financial asset and substantially all the risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

4.11.2 Classification and initial measurement of financial assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with IFRS 15, all financial assets are initially measured at fair value adjusted for transaction costs (where applicable). Financial assets, other than those designated and effective as hedging instruments, are classified into the following categories:

- amortised cost
- fair value through profit or loss (FVTPL)
- fair value through other comprehensive income (FVOCI).

In the periods presented the corporation does not have any financial assets categorised as FVOCI.

The classification is determined by both:

- the entity's business model for managing the financial asset
- the contractual cash flow characteristics of the financial asset.

All income and expenses relating to financial assets that are recognised in profit or loss are presented within finance costs, finance income or other financial items, except for impairment of trade receivables which is presented within other expenses.

4.11.3.Subsequent measurement of financial assets

4.11.3.1 Financial assets at amortised cost

Financial assets are measured at amortised cost if the assets meet the following conditions (and are not designated as FVTPL):

- they are held within a business model whose objective is to hold the financial assets and collect its contractual cash flows.
- the contractual terms of the financial assets give rise to cash flows that are solely payments of its contractual cash flows principal and interest on the principal amount outstanding

4.11.3.2 Financial assets at amortised cost

After initial recognition, these are measured at amortised cost using the effective interest method. Discounting is omitted where the effect of discounting is immaterial. The Company's cash and cash equivalents, trade and most other receivables fall into this category of financial instruments as well as listed bonds that were previously classified as held-to-maturity under IAS 39.

4.11.3.3 Financial assets at fair value through profit or loss (FVTPL)

Financial assets that are held within a different business model other than 'hold to collect' or 'hold to collect and sell' are categorised at fair value through profit or loss. Further, irrespective of business model financial assets whose contractual cash flows are not solely payments of principal and interest are accounted for at FVTPL. All derivative financial instruments fall into this category, except for those designated and effective as hedging instruments, for which the hedge accounting requirements apply.

Assets in this category are measured at fair value with gains or losses recognised in profit or loss. The fair values of financial assets in this category are determined by reference to active market transactions or using a valuation technique where no active market exists.

4.11.3.4 Financial assets at fair value through other comprehensive income (FVOCI)

The Company accounts for financial assets at FVOCI if the assets meet the following conditions:

- they are held under a business model whose objective it is "hold to collect" the associated cash flows and sell and
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Any gains or losses recognised in other comprehensive income (OCI) will be recycled upon derecognition of the asset.

Financial assets classified as available for sale (AFS) under IAS 39 (comparative periods) AFS financial assets are non-derivative financial assets that are either designated to this category or do not qualify for inclusion in any of the other categories of financial assets (FVTPL or held to maturity and loans and receivables).

Within equity, except for interest and dividend income, impairment losses and foreign exchange differences on monetary assets, which are recognised in profit or loss. When the asset was disposed of or was determined to be impaired, the cumulative gain or loss recognised in other comprehensive income was reclassified from the equity reserve to profit or loss. Interest calculated using the effective interest method and dividends were recognised in profit or loss within finance income.

4.11.4 impairment of financial assets

IFRS 9's impairment requirements use more forward-looking information to recognise expected credit losses – the 'expected credit loss (ECL) model'. This replaces IAS 39's 'incurred loss model'. Instruments within the scope of the new requirements included loans and other debt-type financial assets measured at amortised cost and FVOCI, trade receivables, contract assets recognised and measured under IFRS 15 and loan commitments and some financial guarantee contracts (for the issuer) that are not measured at fair value through profit or loss.

Recognition of credit losses is no longer dependent on the Company first identifying a credit loss event. Instead the Company considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cashflows of the instrument.

In applying this forward-looking approach, a distinction is made between:

Stage 1: Financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk

Stage 2: Financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low

'Stage 3' would cover financial assets that have objective evidence of impairment at the reporting date.

'12-month expected credit losses' are recognised for the first category while 'lifetime expected credit losses' are recognised for the second category.

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

4.11.5 Previous financial asset impairment under IAS 39

In the prior year, the impairment of trade receivables was based on the incurred loss model. Individually significant receivables were considered for impairment when they were past due or when other objective evidence was received that a specific counterparty will default. Receivables that were not considered to be individually impaired were reviewed for impairment in groups, which are determined by reference to the industry and region of the counterparty and other shared credit risk characteristics. The impairment loss estimate was then based on recent historical counterparty default rates for each identified group.

4.11.6 Trade and other receivables and contract assets

The Company makes use of a simplified approach in accounting for trade and other receivables as well as contract assets and records the loss allowance as lifetime expected credit losses. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial instrument. In calculating, the Company uses its historical experience, external indicators and forward-looking information to calculate the expected credit losses using a provision matrix.

The Company assess impairment of trade receivables on a collective basis as they possess shared credit risk characteristics they have been grouped based on the days past due.

4.11.7 Classification and measurement of financial liabilities

As the accounting for financial liabilities remains largely the same under IFRS 9 compared to IAS 39, the Company's financial liabilities were not impacted by the adoption of IFRS 9. However, for completeness, the accounting policy is disclosed below.

The Company's financial liabilities include borrowings, trade and other payables and derivative financial instruments.

Financial liabilities are initially measured at fair value, and, where applicable, adjusted for transaction costs unless the Company designated a financial liability at fair value through profit or loss. Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for derivatives and financial liabilities designated at FVTPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss (other than derivative financial instruments that are designated and effective as hedging instruments). reported in profit or loss are included within finance costs or finance income.

Subsequently, financial liabilities are measured at amortised cost using the effective interest method except for derivatives and financial liabilities designated at FVTPL, which are carried subsequently at fair value with gains or losses recognised in profit or loss (other than derivative financial instruments that are designated and effective as hedging instruments).

All interest-related charges and, if applicable, changes in an instrument's fair value that are reported in profit or loss are included within finance costs or finance income.

4.12 Provisions

Provisions are liabilities of uncertain timing or amount, and are recognized when the company has a present obligation as a result of a past event, and it is probable that the company will be required to settle that obligation. Provisions are measured at the director's estimate of the expenditure required to settle that obligation at the end of each reporting period, and are discounted (at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability) to present value where the effect is material.

Provisions are not recognized for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognized even if the likelihood of an outflow with respect of any item included in the same class of obligations may be small.

4.13 Foreign Currency Transactions and Balances

Foreign Currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. The functional currency is the currency of the primary economic environment in which the entity operates, which is the Nigerian Naira.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end closing exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in profit or loss.

At the end of each reporting year, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items of historical cost in a foreign currency are not retranslated.

4.14 Significant management judgment in applying accounting policies and estimation uncertainty

When preparing the financial statements, management undertakes a number of judgments, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses.

The following are significant management judgments in applying the accounting policies of the entity that have the most significant effect on the financial statements.

4.14.1 Capitalization of internally developed software

Distinguishing the research and development phases of a new customized software project and determining whether the recognition requirements for the capitalization of development costs are met requires judgment. After capitalization, management monitors whether the recognition requirements continue to be met and whether there are any indicators that capitalized costs may be impaired.

4.14.2 Recognition of deferred tax assets

The extent to which deferred tax assets can be recognized is based on an assessment of the probability of the company's future taxable income against which the deferred tax assets can be utilized. In addition, significant judgment is required in assessing the impact of any legal or economic limits or uncertainties in various tax jurisdictions.

4.14.3 Impairment

In assessing impairment, management estimates the recoverable amount of each asset or cash-generating units based on expected future cash flows and uses an interest rate to discount them. Estimation uncertainty relates to assumptions about future operating results and the determination of a suitable discount rate.

4.14.4 Useful lives of depreciable assets

Management reviews its estimate of the useful lives of depreciable assets at each reporting date, based on the expected utility of the assets. Uncertainties in these estimates relate to technical obsolescence that may change the utility of certain software and IT equipment.

5. Financial Risk Management

5.1 Introduction

The company uses its financial skills to provide competitive product pricing and delivery to a broad range of customers.

Risk Management is essential to help ensure business sustainability thereby providing customers and the shareholders with a long-term value proposition.

Key elements of risk management are:

- Strong corporate governance including relevant and reliable management information and internal control processes;
- Ensuring significant and relevant skills and services are available consistently to the company;
- Influencing the business and environment by being active participants in the relevant regulatory and business forums; and
- Keeping abreast of technology and consumer trends and investing capital and resources where required.

The overall company focus within an appropriate risk framework is to give value to the customers through effective and efficient execution of transactions.

The board of directors acknowledges its responsibility for establishing, monitoring and communicating appropriate risk and control policies.

5.2 Significant Risks

The company has exposure to Significant Risks which are categorized as follows:

- Regulatory (capital adequacy, legal, accounting and taxation);
- Business environment (reputation and strategic);
- Operational (people, information technology and internal control processes);
- Market (equity prices, interest rate and currency); and
- Liquidity

Detailed Discussion of Significant Risks

5.2.1. Regulatory Risk

Regulatory risk is the risk arising from a change in regulations in any legal, taxation and accounting pronouncements or specific industry that pertain to the business of the Company. In order to manage this risk, the Company is an active participant in the IT industry and engages in discussions with policy makers and regulators.

5.2.1.1 Legal Risk

Legal risk is the risk that the company will be exposed to contractual obligations which have not been provided for.

The company has a policy of ensuring all contractual obligations are documented and appropriately evidenced to agreements with the relevant parties to the contract.

All significant contracted claims are reviewed by independent legal resources and amounts are provided for if there is consensus as to any possible exposure. At 31 March 2020, the directors are not aware of any significant obligation not provided for.

5.2.1.2 Taxation Risk

Taxation risk is the risk of suffering a loss, financial or otherwise, as a result of an incorrect interpretation and application of taxation legislation or due to the impact of new taxation legislation on existing products.

Taxation risk occurs in the following key areas:

- Transactional risk;
- Operational risk;
- Compliance risk; and
- Financial accounting risk.

5.2.1.2.1 Transactional Risk

The risk which concerns specific transactions entered into by the company, including restructuring projects and reorganizations.

5.2.1.2.2 Operational Risk

The underlying risks of applying tax laws, regulations and decisions to the day-to-day business operations of the company.

5.2.1.2.3 Compliance Risk

The risk associated with meeting the company's statutory obligations.

5.2.1.2.4 Financial Accounting Risk

The risk relates to the inadequacy of proper internal controls over financial reporting, including tax provisioning.

In managing the company's taxation risk, the company tax policy is as follows:

The company will fulfill its responsibilities under tax law in each of the jurisdictions in which it operates, whether in relation to compliance, planning or client service matters. Tax law includes all responsibilities which the company may have in relation to company taxes, personal taxes, capital gains taxes, indirect taxes and tax administration.

Compliance with this policy is aimed at ensuring that:

- All taxes due by the company are correctly identified, calculated, paid and accounted for in accordance with the relevant tax legislation;
- The company continually reviews its existing operations and planned operations in this context; and
- The company ensures that, where clients participate in company products, these clients are either aware of the probably tax consequences, or are advised to consult with independent professionals to assess these consequences, or both.

The identification and management of tax risk is the primary objective of the company tax function, and this objective is achieved through the application of a formulated tax risk approach, which measures the fulfillment of tax responsibilities against the specific requirements of each category of tax to which the company is exposed, in the context of the various types of activities the company conducts.

5.2.1.3 Accounting Risk

Accounting Risk is the risk that the company fails to explain the current events of the business in the financial statements.

Accounting risk can arise from the failure of management to:

- Maintain proper books and records, accounting system and to have proper accounting policies;
- Establish proper internal accounting controls;
- Prepare periodic financial statements that reflect an accurate financial position; and be transparent and fully disclose all important and relevant matters.

Measures to control accounting risk are the use of proper accounting systems, books and records based on proper accounting policies as well as the establishment of proper internal accounting controls. Proposed accounting changes are researched by accounting resources, and if required external resources, to identify and advise on any material impact on the company.

Financial statements are prepared in a transparent manner that fully discloses all important and relevant matters as well as accurately reflecting the financial position, results and cash flows of the company.

5.2.2 Business Environment

5.2.2.1 Reputational Risk

Reputational risk is the risk of loss caused by a decline in the reputation of the company or any of its specific business units from the perspective of its stakeholders, shareholders, customers, staff, business partners or the general public.

Reputational risk can both cause and result from losses in all risk categories such as market or credit risk.

5.2.2.2 Strategic Risk

Strategic Risk is the risk of an unexpected negative change in the company value, arising from the adverse effect of executive decisions on both business strategies and their implementation.

This risk is a function of the compatibility between strategic goals, the business strategies developed to achieve those goals and the resources deployed to achieve those goals. Strategic risk also includes the ability of management to effectively analyze and react to external factors, which could impact the future direction of the relevant business units.

Company risk identifies and assesses both those risks qualitatively as part of a quarterly evaluation. On the basis of this evaluation, company risk creates an overview of local and global risks which also includes reputational risks, analyses the risk profile of the company and regularly informs directors and management.

5.2.3 Operational Risk

Operational Risk is the risk of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from external events.

The initiation of all transactions and their administration is conducted on the foundation of segregation of duties that has been designed to ensure materially the completeness, accuracy and validity of all transactions. These controls are augmented by management and executive review of control accounts and systems, electronic and manual checks and controls, back-up facilities and contingency planning. The internal control systems and procedures are also subjected to regular internal audit reviews.

5.2.4 Market Risk

Market risk includes asset liability matching risk, currency risk, interest rate risk and equity price risk.

The company is exposed to market risk through its financial assets and financial liabilities. The most important components of this risk are interest rate risk and market price risk. These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements.

5.2.4.1 Interest Rate and Market Price Risk

These risks have very different impacts on the various categories of business used in the company's Assets and Liabilities Management framework. Interest rate and market price risk have been discussed together since they interact on certain types of liabilities.

5.2.4.2 Interest Rate Risk

Interest rate risk is the risk that the value and cash flow of a financial instrument will fluctuate due to changes in market interest rates.

5.2.4.3 Equity Price Risk

Equity price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices.

5.2.4.4 Foreign Currency Risk

In respect of other monetary assets and liabilities held in currencies other than the Naira, the company ensures that the net exposure is kept to an acceptable level, by buying or selling foreign currencies at spot rates, where necessary, to address short-term balances.

5.2.4.4.1 Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a loss to the other party by failing to discharge an obligation.

Key areas where the company is exposed to credit risk are:

* Certain classes of financial assets such as bonds, term deposits, cash and cash equivalent; and
* Certain accounts within trade and other receivables.

5.2.4.4.2 Financial Assets

Various debt instruments are entered into by the company in order to invest surplus shareholders funds. The company is exposed to the issuer's credit standing on these instruments.

The following policy and procedure is in place to mitigate the company's exposure to this credit risk:

* Exposure to outside financial institutions concerning financial instrument is monitored in accordance with parameters which have been approved by the company's audit committee and the company's board.

5.2.4.4.3 Other Receivables

Investment sale debtors are protected by the security of the underlying investment not being transferred to the purchaser prior to payment.

5.2.5 Liquidity Risk

Liquidity risk is the risk that the company will encounter difficulty in raising funds to meet commitments associated with financial instruments.

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities, the availability of funding through an adequate amount of committed credit facilities and the ability to close out market positions. Due to the dynamic nature of the underlying businesses, Company Treasury maintains flexibility in funding by keeping committed credit lines available.

5.2.5.1 Sensitivities

Management applies a number of sensitivity tests to the earnings of the company to better understand the exposure to and importance of each of the main drivers of profitability.

IFRS 7 requires management to report on the changes in the net income after tax following "reasonable possible" changes in each of the factors to which the company is exposed. Management has set the upside and downside movements for each factor at a level which represents the amount by which management believes that factor could reasonably change over the year following the valuation date. These opinions have been informed by an analysis of historical one year changes in those factors. The upper and lower limits have been set at the 75th and 25th percentiles of observed changes as these bound and interval which may be expected to contain 50% of the changes in the coming year. Management believes this represents in some sense what is "reasonably possible", though it is important to note that this opinion is based on past experience and the tested range is not sensitive to all the relevant information in the market at the reporting date.

Management has considered the impact of upside and downside movements in foreign exchange rates. In relation to these sensitivities:

* The earnings are sensitive to changes in both the shape and level of the yield curve. Management has not considered changes in the shape of the yield curve due to several constraints although this may be reviewed in the following year.
* The foreign exchange movements have been considered together in the same sensitivity. Observed historic negative correlations between factors would tend to dampen the effects presented. These correlations are not very large and they have not been adjusted for. This treatment has resulted in the presentation of a slightly more extreme view of what could reasonably occur over the following year.

Future rates of expense inflation, catastrophes and tax assumptions were considered but no sensitivities are presented as it is unlikely, in management's opinion that, these assumptions will change over the following year.

It should be noted that each impact on profit after tax is shown individually for each sensitivity being changed, keeping all other assumptions constant. In practice this is unlikely to occur, as changes in some of the variables may be correlated.

INDEPENDENT AUDITOR'S REPORT

To

The Members of

GROMAX AGRI EQUIPMENT LIMITED

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the Ind AS financial statements of **Gromax Agri Equipment Limited** ("the Company"), which comprise the balance sheet as at 31st March 2020, and the statement of Profit and Loss (including Other Comprehensive Income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the Ind AS financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and profit, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013("the Act"). Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The company's Board of Directors is responsible for the other information. The other information comprises the information included in the Directors' Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these Ind AS financial statements.

As part of an audit in accordance with Standard on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that are sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Act, we give in the "Annexure-B", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

   (e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.

   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A".

   (g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

      i. The company does not have any pending litigations which will impact its financial positions.

      ii. the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

      iii. there were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph under "Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Gromax Agri Equipment Limited** ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing whether the risk of a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected, Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE B TO THE AUDITOR'S REPORT

Referred to in paragraph under "Report on Other Legal and Regulatory Requirements" section of our report of even date)

Annexure to the Auditor's Report referred to in our report of even date:

i. a) The Company has maintained proper records showing full particulars including quantitative details and situation of Property, plant and equipment.

b) The property, plant and equipment were physically verified during the year by the management in accordance with a regular programme of verification which, in our opinion, provides for physical verification of all the fixed assets at reasonable intervals. According to the information and explanation given to us, no material discrepancies were noticed on such verification.

c) According to the information and explanations given by the management and the records examined by us, the title deeds of immovable properties included in property, plant and equipment are held in the name of the Company.

ii. The inventory has been physically verified by the management during the year. In our opinion, the frequency of verification is reasonable. No material discrepancies were noted on such physical verification.

iii. The Company has not granted any loans, secured or unsecured to companies, firms, limited liability partnerships or other related parties covered in the register maintained under section 189 of the Act.

iv. According to the information and explanations given to us, the Company has not granted any loans, made investments nor provided guarantees nor securities during the year and hence reporting under clause (iv) of the CARO 2016 is not applicable.

v. In our opinion, and according to the information and explanations given to us, the Company has not accepted deposits as per the directives issued by the Reserve Bank of India and the provisions of Sections 73 to 76 or any other relevant provisions of the Act and the rules framed thereunder. Accordingly, paragraph 3 (v) of the Order is not applicable to the Company.

vi. The Central Government has not prescribed the maintenance of cost records under section 148(1) of the Act, for any of the services rendered by the Company.

vii. i) According to the records of the Company, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Income Tax, Sales Tax, GST and other statutory dues applicable to it. According to information and explanation given to us, no undisputed amounts in respect of the above were outstanding, as on March 31, 2020 for a period of more than 6 months from the date they become payable.

ii) The dues of income tax, sales tax, service tax, duty of customs, and duty of excise or value added tax, GST and cess which have not been deposited on the account of any dispute, are as follows

Name of the statue	Nature of the dues	Amount (Rs. in lakhs)	Period to which the amount relates	Forum where the dispute is pending
The Income Tax Act, 1962	Income Tax	66.73	AY 2014-15	CIT-Appeals

viii. The Company does not have any loans / dues towards any financial institution, bank or Government. The Company has not raised any money through debentures during the year.

ix. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not raised any moneys by way of initial public offer or further public offer (including debt instruments) and has not obtained any term loans during the year. Accordingly, paragraph 3 (ix) of the Order is not applicable to the Company.

x. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have neither come across any instance of material fraud by the Company or on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of any such case by the management.

xi. According to the information and explanations given to us, the Company has not paid any remuneration to managerial personnel as defined in the Act and accordingly the provisions of para 3(xi) of the Order are not applicable to the Company.

xii. In our opinion and according to the information and explanations given to us, the Company is not a Nidhi company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, paragraph 3 (xii) of the Order is not applicable to the Company.

xiii. In our opinion and according to the information and explanations given to us, the Company has entered into transactions with related parties in compliance with the provisions of Sections 177 and 188 of the Act. The details of such related party transactions have been disclosed in the financial statements as required by Indian Accounting Standard (Ind AS) 24, Related Party Disclosures specified under Section 133 of the Act.

xiv. The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under audit. Hence, the provisions of para 3(xiv) of the Order are not applicable to the Company.

xv. According to the information and explanations given to us, the Company has not entered into non- cash transactions with directors or persons connected with him. Hence, the provisions of para 3(xv) are not applicable to the Company.

xvi. The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, the provisions of para 3(xvi) of the Order are not applicable to the Company.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in Rupees Lakhs unless otherwise stated

Note No. 1&2: Accounting Policies

1. Corporate Information

Gujarat Tractor Corporation Limited (GTCL) a Public Limited Company domiciled in India and incorporated on 31st March, 1978 under the provisions of the Companies Act, 1956 (CIN : U34100GJ1978PLC003127) and a Government of Gujarat Undertaking. As a part of Disinvestment by Government of Gujarat, the Mahindra & Mahindra Ltd. acquired 60% stake in Equity Shares of the Company in 1999-2000. The name of the Company changed to Mahindra Gujarat Tractor Limited (MGTL / the Company) in the year 2000. The name of company further changed to Gromax Agri Equipment Limited w.e.f. from 24.08.2017.

Currently Mahindra Group hold 60% and Government of Gujarat hold 40% Equity in the Company. The Company is mainly engaged in the Manufacture and Sale of Tractors under the brand name "Shaktimaan"", ""Hindustan"", ""Farm Plus"", "Trakstar" and spares of the same. The Company carries out its business activities in India and Nepal. The Factory and Registered Office of the Company is located at Vishwamitri, Vadodara, Gujarat and Sales & Distribution Offices and Yards in major States of India.

2. Significant Accounting Policies

2.1 Statement of compliance

The financial statements have been prepared taking into consideration all material aspects with Indian Accounting Standards (Ind-AS) notified under section 133 of the Companies Act, 2013 (the "Act") [Companies (Indian Accounting Standards) Rules, 2015,as amended] and the other relevant provisions of the Act.

2.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the value paid for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 116, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

The financial statements have been prepared on historical convention except Defined benefit plans.

Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

Level 3 inputs are unobservable inputs for the asset or liability.

The principal accounting policies are set out below:

2.3 Revenue recognition

The Company has applied Ind AS 115 – 'Revenue from Contracts with customers' ("hereinafter referred to as Ind AS 115"), using modified retrospective approach for the purpose of transition. The application of Ind AS 115 did not have any material impact on the financial results of the Company.

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances. Upon satisfaction of performance obligation which is at a point in time when control of the goods is transferred to the customer, generally on delivery of the goods. Depending on the terms of the contract, which differs from contract to contract, the goods are sold on a reasonable credit term. The Revenue is excluding taxes and after deducting various Dealer Incentives and Discounts.

2.3.1. Sale of goods

1) Timing of recognition- Sales are recongnized when control parameters as laid down in IND AS 115 are satisfied. Control means customer has accepted the product, legal title has been transferred, transfer of significant risk and rewards, right to receive the payment and transfer of physical possession. Sales are recognised at a point in time based on the revenue recognition standard.

2) Measurement of revenue:-

A) Revenue is measured based on the consideration specified in a contract with a customer and excludes amounts collected on behalf of third parties. The Company recognises revenue when it transfers control of a product.

B) Any change resulting in increase or decrease in estimated revenue or cost are reflected in the profit or loss in the period in which the circumstances that give rise to the revision become known by Management.

C) Transaction price is the amount of consideration expected to be entitled to in exchange for transferring of goods and services excluding the amount collected from third party.

D) Revenue from sales is based on the price specified in the sales contracts, net of the estimated volume discounts and returns at the time of sale. Accumulated experience is used to estimate and provide for the discounts and returns. The volume discounts are assessed based on anticipated annual purchases

2.3.2 Royalties

Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement (provided that it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably). Royalties determined on a time basis are recognised on a straight-line basis over the period of the agreement. Royalty arrangements that are based on production, sales and other measures are recognised by reference to the underlying arrangement.

2.3.3 Dividend and interest income

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.4 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2.5 Employee benefits

2.5.1 Retirement benefit costs and termination benefits

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item ‘Employee benefits expense’. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company’s defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

2.5.2 Short-term and other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

2.5.3 Contributions from employees or third parties to defined benefit plans

Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan.

When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting depends on whether the contributions are linked to service, as follows:

If the contributions are not linked to services (e.g. contributions are required to reduce a deficit arising from losses on plan assets or from actuarial losses), they are reflected in the remeasurement of the net defined benefit liability (asset).

If contributions are linked to services, they reduce service costs. For the amount of contribution that is dependent on the number of years of service, the Company reduces service cost by attributing the contributions to periods of service using the attribution method required by Ind AS 19.70 for the gross benefits. For the amount of contribution that is independent of the number of years of service, the Company reduces service cost in the period in which the related service is rendered / reduces service cost by attributing contributions to the employees’ periods of service in accordance with Ind AS 19.70.

2.6 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.6.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from ‘profit before tax’ as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company’s current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.6.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying Amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.6.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

2.6.4 Minimum Alternate Tax

Minimum Alternate tax is recognised only when and to the extent there is convincing evidence that Company will pay normal Income-Tax during the specified period. The carrying amount of MAT Credit asset is reviewed at each Balance Sheet date.

2.7 Property, plant and equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the balance sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Freehold land is not depreciated.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Assets held under lease are depreciated over the lease term of the ROU (Right of use).

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

On transition to Ind AS, the company has elected to continue with the carrying value of all its property, plant and equipment recognised as at April 1, 2016 measured as per the previous GAAP and use that carrying value as the deemed cost of the property, plant and equipment which will be depreciated over its remaining useful life.

2.7.1 Useful lives of tangible assets

Depreciation is calculated using the straight-line method to allocate their cost, net of their residual values, over their estimated useful lives as prescribed in Part C of Schedule II of the Companies Act, 2013

Particulars	Life (Years)
Building - Non Factory	60
Building - Factory	30
Plant & Machineries, Jig& Fixtures and Pattern & Moulds	15
Furniture & Fixtures, Electrical Installation	10
Motor Vehicles- Cars & Tractors	8
Computer-Servers and Network	6
Office Equipments	5
Computer-Enduse devices (Desktop, Laptop, Printer etc.)	3
Assets Value < Rs.5000	1

2.8 Intangible assets

2.8.1 Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Under IND AS First time adoption Exemptions company has adopted historical cost as carrying amount for various tangible assets

2.8.2 Internally-generated intangible assets - research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

2.8.3 Useful lives of intangible assets

Estimated useful lives of the intangible assets are as follows:

Particulars	Life (Years)
Development Expenditure	5
Softwares	3

2.9 Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest Company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.10 Inventories

Inventories are stated at the lower of cost and net realisable value after providing for obsolescence and other losses, where considered necessary. Costs of inventories are determined on a weighted average basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Cost of raw material and traded goods comprises of purchases. Cost of work-in-progress and finished goods comprises direct materials, direct labour and an appropriate proportion of variable and fixed overhead expenditure, the latter being allocated on the basis of normal operating capacity. Cost of Inventories also include all other cost incurred in bringing the inventories to their present location and condition. Cost of purchase inventory are determined after deducting rebates and discounts.

2.11 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

Provisions are not recongnized for future operationg losses.

2.11.1 Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

2.11.2 Warranties

Provisions for the expected cost of warranty obligations under local sale of goods legislation are recognised at the date of sale of the relevant products, at the directors' best estimate of the expenditure required to settle the Company's obligation.

2.11.3 Contingent liabilities acquired in a business combination

A disclosure for a contingent liability is made where there is a possible obligation that arises from past events and the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from the past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

2.12 Financial instruments

Financial assets and financial liabilities are recognised when a entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2.12.1 Cash and cash equivalents:-

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents.

2.13 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

2.13.1 Classification of financial assets

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Debt instruments that meet the following conditions are subsequently measured at fair value through other comprehensive income (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Interest income is recognised in profit or loss for FVTOCI debt instruments. For the purposes of recognising foreign exchange gains and losses, FVTOCI debt instruments are treated as financial assets measured at amortised cost. Thus, the exchange differences on the amortised cost are recognised in profit or loss and other changes in the fair value of FVTOCI financial assets are recognised in other comprehensive income and accumulated under the heading of 'Reserve for debt instruments through other comprehensive income'. When the investment is disposed of, the cumulative gain or loss previously accumulated in this reserve is reclassified to profit or loss.

All other financial assets are subsequently measured at fair value.

2.13.2 Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL. Interest income is recognised in profit or loss and is included in the "Other income" line item.

2.13.3 Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Debt instruments that do not meet the amortised cost criteria or FVTOCI criteria (see above) are measured at FVTPL. In addition, debt instruments that meet the amortised cost criteria or the FVTOCI criteria but are designated as at FVTPL are measured at FVTPL.

A financial asset that meets the amortised cost criteria or debt instruments that meet the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'Other income' line item. Dividend on financial assets at FVTPL is recognised when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

2.13.4 Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. 12-month expected credit losses are portion of the life-time expected credit losses and represent the lifetime cash shortfalls that will result if default occurs within the 12 months after the reporting date and thus, are not cash shortfalls that are predicted over the next 12 months.

If the Company measured loss allowance for a financial instrument at lifetime expected credit loss model in the previous period, but determines at the end of a reporting period that the credit risk has not increased significantly since initial recognition due to improvement in credit quality as compared to the previous period, the Company again measures the loss allowance based on 12-month expected credit losses.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

The impairment requirements for the recognition and measurement of a loss allowance are equally applied to debt instruments at FVTOCI except that the loss allowance is recognised in other comprehensive income and is not reduced from the carrying amount in the balance sheet.

2.14 Financial Liabilities

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.14.1 Classification of financial liabilities

The company classifies all financial liabilities as subsequently measured at ammortised cost.

2.14.2 Initial recignition of financial liabilities

Financial liabilities are carried at ammortised cost using the effective interest method.

2.14.3 Subsequent measurement of financial liabilities

The measurement of financial liabilities depends on their classification (Refer Note 29)

2.15 Leases

The Company has applied IND AS 116 Determining whether an Arrangement contains a Lease to determine whether an arrangement existing at the transition date contains a lease on the basis of facts and circumstances existing at that date.

2.15.1 Initial Recognition:

The determination of whether an arrangement is (or contains) a lease is based on the substance of the arrangement at the inception of the lease. The arrangement is, or contains, a lease if fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset or assets, even if that right is not explicitly specified in an arrangement. For arrangements entered into prior to April 1, 2016, the Company has determined whether the arrangement contain lease on the basis of facts and circumstances existing on the date of transition.

2.15.2 Company as a lessee:

Leases, other than short term lease and low value assets, of property, plant and equipment are classified as finance leases. Finance leases are capitalized at the lease's inception at the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding rental obligations, net of finance charges, are included in borrowings or other financial liabilities as appropriate. Each lease payment is allocated between the liability and finance cost. The finance cost is charged to the profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period.

2.16 EPS

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 on Earnings per share. Basic earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period as adjusted for the effects of all diluted potential equity shares except where the results are anti-dilutive.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all years presented for any share splits and bonus shares issues including for changes effected prior to the authorization for issue of the financial statements by the Board of Directors.

2.17 Cash flow statement

The Cash Flow Statement is prepared by the indirect method set out in Ind AS 7 on Cash Flow Statements and presents cash flows by operating, investing and financing activities of the Company."

2.18 Rounding off amounts

All amounts disclosed in the financial statements and notes have been rounded off to the nearest lakhs as per the requirement of Schedule III, unless otherwise stated.

2.19 Current v/s Non-Current classification:-

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

a) Expected to be realized or intended to be sold or consumed in normal operating cycle

b) Held primarily for the purpose of trading

c) Expected to be realized within twelve months after the reporting period, or

d) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

a) It is expected to be settled in normal operating cycle

b) It is held primarily for the purpose of trading

c) It is due to be settled within twelve months after the reporting period, or

d) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

The Company has identified twelve months as its operating cycle for the purpose of current and non-current classification of assets and liabilities

2.20 Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, which are described in note 2.1 to 2.18, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

This note provides an overview of the areas that involved a higher degree of judgement or complexity, and of items which are more likely to be materially adjusted due to estimates and assumptions turning out to be different than those originally assessed.

Detailed information about each of these estimates and judgements included in relevant notes together with information about the basis of calculation of each different line item in the financial statements.

Areas involving judgements and estimations:

1) Provision for warranty and service coupon

2) Provision for ECL

3) Provision for Employee Benefits

Statement of changes in Equity for the year ended 31st March 2020

All amounts are in Rupees Lakhs unless otherwise stated

A. Equity share capital

Particulars	**Amount**
As at 1st April, 2018	**5,430.20**
Changes in equity share capital during the year	–
As at 31st March, 2019	**5,430.20**
Changes in equity share capital during the year	–
As at 31st March, 2020	**5,430.20**

Note:

During the FY 2016-17, Company has raised fund through right issue of equity shares 3,90,00,000 of Rs.10 each to existing equity shareholders in their shareholding ratio.

Utilisation of proceeds from right equity issue :

	e)	Lease Liability	**24.48**	–
	f)	Others	**30.86**	24.87
	Total other financial liabilities		**1,971.25**	**2,084.94**

Note:

5,000,000 8.5% Cumulative Redeemable Preference Shares of Rs.10 each issued solely to Government of Gujarat (GOG) as fully paid up on 23rd May, 2000 consequent upon conversion of loan of Rs.50,000,000.

These shares were redeemable at par at the end of fours years from the date of allotment i.e. 22nd May, 2004. and the terms of the issue of the shares can be varied with the express consent of the Company and the holders of the shares at any time during the period the shares are outstanding.

The Preference Shares issued have right to receive dividend from year to year as decided by terms of Issue i.e. 8.5% per annum from the date of allotment.

The Preference share holders will not be entitled to any of the rights and privileges available to the members of the company including right to receive notice of or to attend and vote at general meeting or to receive annual reports of the company. If, however any resolution affecting the rights attached to the share is placed before the member of the Company , such resolution will first be placed before the Preference shareholders for their consideration.

Considering book losses the Board of Directors had not declared dividend on preference share since allotment. Thus no provision was made for 8.5% dividend, amounting to Rs.631.46 lakhs on preference shares for the period from 23rd May, 2000 (being the date of allotment) to the year ended 31st March, 2015 and additional tax thereon as per the accounting treatment under IGAAP.

Under IND AS, accrued Dividend on Preference Shares is defined as Other Current Financial Liabilities under Unpaid Dividends and are currently excluding taxes.

Note No. 17 - Provisions

Particulars	As at 31st March, 2020 Current	As at 31st March, 2020 Non-Current	As at 31st March, 2019 Current	As at 31st March, 2019 Non-Current
1. Provision for employee benefits				
a) Employee Benefits	**40.66**	**191.09**	50.38	202.94
2. Other Provisions				
a) Provision for Warranty	**55.92**	–	38.43	–

Net cash inflows/outflows from financing activities	**216.19**	607.79
Net Cash inflows	**(488.20)**	(591.17)

Note No. 27 - Earnings per Share

Particulars	Year Ended on 31st March, 2020	Year Ended on 31st March, 2019
Basic Earnings per share		
From continuing operations	**(0.40)**	0.21
Total basic earnings per share	**(0.40)**	0.21
Diluted Earnings per share		
From continuing operations	**(0.40)**	0.21
Total diluted earnings per share	**(0.40)**	0.21

Basic earnings per share

The earnings and weighted average number of ordinary shares used in the calculation of basic earnings per share are as follows:

Particulars	Year Ended on 31st March, 2020	Year Ended on 31st March, 2019
Profit/(loss) for the year attributable to owners of the Company	**(219.37)**	114.45
Less: Preference dividend and tax thereon		
Profits used in the calculation of basic earnings per share	**(219.37)**	114.45
Weighted average number of equity shares	**543.02**	543.02
Nominal value of Shares	**10.00**	10.00
Earnings per share from continuing operations – Basic	**(0.40)**	0.21

Diluted earnings per share

Particulars	Year Ended on 31st March, 2020	Year Ended on 31st March, 2019
Profit / (loss) for the year used in the calculation of basic earnings per share	**(219.37)**	114.45
Add: Interest expense and exchange fluctuation on convertible securities	**–**	–
Profits used in the calculation of diluted earnings per share	**(219.37)**	114.45

The weighted average number of ordinary shares for the purpose of diluted earnings per share reconciles to the weighted average number of ordinary shares used in the calculation of basic earnings per share as follows:

Particulars	Year Ended on 31st March, 2020	Year Ended on 31st March, 2019
Weighted average number of equity shares used in the calculation of Basic EPS	**543.02**	543.02
Add:		
ESOPs	**–**	–
Convertible bonds	**–**	–
Weighted average number of equity shares used in the calculation of Diluted EPS	**543.02**	543.02

Note:

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 on Earnings per share. Basic earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period as adjusted for the effects of all diluted potential equity shares except where the results are anti-dilutive.

The number of equity shares and potentially dilutive equity shares are adjusted retrospectively for all years presented for any share splits and bonus shares issues including for changes effected prior to the authorization for issue of the financial statements by the Board of Directors.

Note No. 28 - Financial Instruments

Capital management

The Company manages capital risk in order to maximize shareholders' profit by maintaining optimal capital structure through monitoring of financial ratios, such as debt-to-equity ratio and net borrowings-to-equity ratio on a monthly basis and implements capital structure improvement plan when necessary. There is no change in the overall capital risk management strategy of the Company compared to last year.

The Company uses debt ratio as a capital management index and calculates the ratio as total liabilities divided by total equity. Total liabilities and total equity are based on the amounts stated in the separate financial statements.

The Company is not subject to externally enforced capital regulation.

Debt-to-equity ratio is as follows:

	As at 31st March, 2020	As at 31st March, 2019
Debt (A)	**2,561.31**	2,183.74
Equity (B)	**2,382.31**	2,600.08
Debt Ratio (A/B)	**1.08**	0.84

Financial Risk Management Framework

The Company's activities expose it to credit risk. In order to manage the aforementioned risk, the Company operates a risk management policy and a program that performs close monitoring of and responding to risk factors.

CREDIT RISK

(i) Credit risk management

Credit risk arises when a counterparty defaults on its contractual obligations to pay resulting in financial loss to the Company. The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collatarel (As on 31 March 2019: INR 490.40 Lakhs, 31 March 2019: INR 382.02 Lakhs), where appropriate, as a means of mitigating the risk of financial loss from defaults.Credit exposure is controlled by counterpaty limits that are reviewed and approved by the risk management committee periodically.

Trade receivables consist of a large number of customers, spread across diverse geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable. In case of Exports to Nepal credit guarantee insurance cover is purchased.

In addition, the Company is exposed to credit risk in relation to financial gurantees given to banks provided by the Company. The Company's maximum exposure in this respect is the maximum amount the Company could have to pay if the guarantee is called on. As at 31 march 2019, an amount of INR 181.54 Lakhs (31 March 2019: INR 109.16 Lakhs) has been recognised as contigent.

The Company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company and individual receivable specific provision where applicable. Forward-looking information (including macroeconomic information) has been incorporated into the determination of expected credit losses. The Company has taken dealer deposit and bank guarantees of Dealer which is considered as collateral and these are considered in determination of expected credit losses, where applicable.

The financial instruments of the company mainly consist of trade receivables carried at ammortised cost after providing for expected credit loss based on historical credit loss experience and adjusted for forward looking information. None of the assets are marked to active market thereby relieving the company from market uncertainities arising out of COVID-19.

In calculating expected credit loss, the Company has also considered other related credit information for its customers to estimate the probability of default in future and has taken into account estimates of possible effect from the pandemic relating to COVID -19.

There is no change in estimation techniques or significant assumptions during the reporting period.

The loss allowance provision is determined as follows:

	As at 31st March 2020		
	Less than 6 months past due	**More than 6 months past due**	**Total**
Expected loss rate	**–**	**0.45**	**0.18**
Gross carrying amount (Unsecured)	**2,884.13**	**1,985.83**	**4,869.96**
Loss allowance provision	–	**892.32**	**892.32**

	As at 31st March 2019		
	Less than 6 months past due	More than 6 months past due	Total
Expected loss rate	–	0.39	0.12
Gross carrying amount (Unsecured)	3,409.38	1,418.88	4,828.26
Loss allowance provision	–	560.07	560.07

Reconciliation of loss allowance provision for Trade Receivables

Particulars	As at 31st March, 2020	As at 31st March, 2019
Balance as at beginning of the year	**560.07**	369.86
As per ECL in Opening Provisions	**–**	–
Impairment losses recognised in the year based on lifetime expected credit losses		
– On receivables originated in the year	**644.20**	190.21
Amounts written off during the year as uncollectible	**(311.94)**	–
Balance at end of the year	**892.32**	560.07

The loss allowance provision has changed during the period due to amounts written off as uncollectible.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

Particulars	Less than 1 Year	1-3 Years	3 Years to 5 Years	5 years and above
Non-derivative financial liabilities				
As at 31st March, 2020				
Non-interest bearing	**6,472.70**	–	–	–
Fixed interest rate instruments	**1,343.95**	–	–	–
Total	**7,816.65**	–	–	–
As at 31st March, 2019				
Non-interest bearing	6,686.95	–	–	–
Fixed interest rate instruments	1,301.45	–	–	–
Total	7,988.40	–	–	–

(iii) Financing arrangements

The Company had access to following undrawn borrowing facilities at the end of the reporting period:

Particulars	As at 31st March, 2020	As at 31st March, 2019
Secured Cash Credit facility		
– Expiring within one year	**2,100.00**	500.00
Secured Letter of Credit facility		
– Expiring within one year	**50.00**	50.00
Secured Bank Guarantee facility		
– Expiring within one year	**50.00**	50.00
Working Capital Facilities with Bank	**2,200.00**	600.00
Commercial Card Facility		
Continuing Agreement till Termination	**–**	500.00
Credit Card Facility	**–**	500.00

(iv) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Particulars	Less than 1 Year	1-3 Years	3 Years to 5 Years	5 years and above
Non-derivative financial assets				
As at 31st March, 2020				
Non-interest bearing	**4,500.77**	–	–	–
Total	**4,500.77**	–	–	–
As at 31st March, 2019				
Non-interest bearing	5,313.70	–	–	–
Total	5,313.70	–	–	–

Note No. 29 – Fair Value Measurement

Fair value of financial assets and financial liabilities that are not measured at fair value:

Particulars	As at 31st March, 2020 Carrying Amount	As at 31st March, 2020 Fair Value	As at 31st March, 2019 Carrying Amount	As at 31st March, 2019 Fair Value
Financial assets				
Financial assets carried at Amortised Cost:				
1) Trade and other receivables	**3,977.64**	**3,977.64**	4,268.19	4,268.19
2) Loans	**162.81**	**162.81**	198.54	198.54
3) Deposits and similar assets	**1,700.48**	**1,700.48**	1,386.08	1,386.08
Financial liabilities				
Financial liabilities held at amortised cost:				
1) Bank loans	**1,217.36**	**1,217.36**	882.30	882.30
2) Loans from Related Party	**1.63**	**1.63**	–	–

Note No. 30 - Segment information

Revenue from Major Geographic Location

Particulars	Year Ended on 31st March, 2020	Year Ended on 31st March, 2019
Revenue from India		
Revenue from External Customers	**13,190.74**	13,855.15
Revenue from Related Parties	**215.11**	23.72
	13,405.85	13,878.87
Outside India		
Nepal	**288.30**	740.19
Total revenue as per profit or loss	**13,694.15**	14,619.06

Revenue from major products and services

The following is an analysis of the company's revenue from continuing operations from its major products and services:

Particulars	Year Ended 31st March, 2020	Year Ended 31st March, 2019
Manufactured Goods	**13,339.26**	14,384.96
Traded Goods	**354.89**	234.10
Total	**13,694.15**	14,619.06

Extent of the reliance on its major customers

There is no Dealer whose revenue is more then 10% as against the total turnover of the company for the Financial Year 2019-20

Note No. 31 - Employee benefits

(a) Defined Benefit Plans:

Gratuity

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. The Company makes annual contribution to the group gratuity scheme administered by the Life Insurance Corporation of India through its Gratuity Trust Fund.

Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

Asset volatility

The plan liabilities are calculated using a discount rate set with references to government bond yields; if plan assets under perform compared to the government bonds discount rate, this will create or increase a deficit. The defined benefit plans hold a significant proportion of equity type assets, which are expected to outperform government bonds in the long-term while providing volatility and risk in the short-term.

As the plans mature, the Company intends to reduce the level of investment risk by investing more in assets that better match the liabilities.

However, the Company believes that due to the long-term nature of the plan liabilities and the strength of the supporting group, a level of continuing equity type investments is an appropriate element of the Company's long term strategy to manage the plans efficiently.

Changes in bond yields

A decrease in government bond yields will increase plan liabilities, although this is expected to be partially offset by an increase in the value of the plans' bond holdings and interest rate hedging instruments.

Inflation risk

Some of the Company's pension obligations are linked to inflation, and higher inflation will lead to higher liabilities (although, in most cases, caps on the level of inflationary increases are in place to protect the plan against extreme inflation). The plans hold a significant proportion of assets in index linked gilts, together with other inflation hedging instruments and also assets which are more loosely correlated with inflation. However an increase in inflation will also increase the deficit to some degree.

Life expectancy

The majority of the plan's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan's liabilities. This is particularly significant in the Company's defined benefit plans, where inflationary increases result in higher sensitivity to changes in life expectancy.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

Particulars	Valuation as at 31-Mar-20	31-Mar-19
Discount rate	**6.88%**	7.66%
Expected rate of salary increase	**5.00%**	5.00%
Average Longevity	**38**	38

Defined benefit plans – as per actuarial valuation on 31st March, 2019

Particulars	Unfunded Plan Gratuity 2020	2019
Amounts recognised in comprehensive income in respect of these defined benefit plans are as follows:		
Service Cost:		
Current Service Cost	**14.60**	13.14
Net interest expense	**11.18**	13.92
Components of defined benefit costs recognised in profit or loss	**25.78**	27.06
Remeasurement on the net defined benefit liability:		
Actuarial gains and loss arising from changes in Demographic Assumptions	**–**	–
Actuarial gains and loss arising from changes in financial assumptions	**7.97**	0.83
Actuarial gains and loss arising from experience adjustments	**(9.58)**	(25.26)
Components of defined benefit costs recognised in other comprehensive income	**(1.61)**	(24.43)
Total	**24.17**	**2.63**
I. Net Asset/(Liability) recognised in the Balance Sheet as at 31st March 2019		
1. Present value of defined benefit obligation as at 31st March 2019	**153.31**	162.82
2. Fair value of plan assets as at 31st March 2019	**–**	–
3. Surplus/(Deficit)	**153.31**	162.82
4. Current portion of the above	**24.81**	30.93
5. Non current portion of the above	**128.50**	131.89
II. Change in the obligation during the year ended 31st March 2019		
1. Present value of defined benefit obligation at the beginning of the year	**162.82**	199.12
2. Expenses Recognised in Profit and Loss Account		
– Current Service Cost	**14.60**	13.14
– Interest Expense (Income)	**11.18**	13.92
3. Recognised in Other Comprehensive Income		
Remeasurement gains/(losses)		
– Actuarial Gain (Loss) arising from:		
i. Demographic Assumptions	**–**	–
ii. Financial Assumptions	**7.97**	0.83
iii. Experience Adjustments	**(9.58)**	(25.26)
4. Benefit payments	**(33.68)**	(38.93)
5. Present value of defined benefit obligation at the end of the year	**153.31**	162.82
V. Actuarial assumptions		
1. Discount rate	**6.88%**	7.66%

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Principal assumption	Year	Changes in assumption	Impact on defined benefit obligation	
			Increase in assumption	Decrease in assumption
Discount rate	**2020**	**1.00%**	**(6.60)%**	**7.70%**
	2019	1.00%	(5.50)%	6.40%
Salary growth rate	**2020**	**1.00%**	**8.30%**	**(7.20)%**
	2019	1.00%	7.10%	(6.30)%
Withdrawal Rate	**2020**	**1.00%**	**0.90%**	**(1.00)%**
	2019	1.00%	1.10%	(1.30)%

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

Maturity profile of defined benefit obligation:

Particulars	2020	2019
Within 1 year	**24.81**	30.93
1 – 2 year	**15.41**	23.50
2 – 3 year	**23.07**	14.73
3 – 4 year	**15.69**	21.79
4 – 5 year	**15.73**	21.62
5 – 10 years	**45.15**	53.45

The Company's policy is driven by considerations of maximizing returns while ensuring credit quality of the debt instruments. The asset allocation for plan assets is determined based on investment criteria prescribed under the Indian Income Tax Act, 1961, and is also subject to other exposure limitations. The Company evaluates the risks, transaction costs and liquidity for potential investments. To measure plan asset performance, the Company compares actual returns for each asset category with published benchmarks.

The weighted average duration of the defined benefit obligation as at 31 March 2020 is 12.76 years (2019: 11.72 years)

Experience Adjustments :

	Gratuity				
	Period Ended				
Particulars	**2020**	2019	2018	2017	2016
1. Defined Benefit Obligation	**153.31**	162.82	199.11	227.53	237.49
2. Fair value of plan assets	**–**	–	–	–	–
3. Surplus/(Deficit)	**153.31**	162.82	199.11	227.53	237.49
4. Experience adjustment on plan liabilities [(Gain)/Loss]	**(1.61)**	(24.44)	(2.60)	11.86	(5.79)
5. Experience adjustment on plan assets [Gain/(Loss)]	**–**	–	–	–	–

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The current service cost and the net interest expense for the year are included in the employee benefits expense in profit or loss of the expense for the year.

Note No. 34 - Effect of COVID-19 on Financial Statements

From December 2019, COVID - 19, has spread globally, including India. This event has significantly affected economic activity globally and in India and as a result could / would impact the operations and financial results of the Company. The Company has performed an initial assessment of the likely impact this would have on the operations of the Company and its financial performance in the coming year. For FY 20 financial reporting, the Company has used the principles of prudence in applying judgments, estimates and assumptions in significant areas like inventory valuation, estimating the remaining useful life of the tangible and intangible assets, cost to complete provision for long term contracts, evaluating the long term contracts for any onerous elements, recoverability of receivables including unbilled receivables, provision for receivables under ECL model, provision for warranties, recoverability of contract assets and contract costs, projection used to test goodwill and investments for impairment, evaluation of financial implications of probable cancellations of any long term commitments, impact of cancellation or modifications to the terms of the revenue contracts, cancellation or deferment of revenue contracts, penalties due to non-fulfilment of service legal obligations, fair valuation of financial assets and liabilities etc.

The Company has considered internal and external information upto the date of approval of these financial statements including credit reports and economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets.

The impact of the global health pandemic may be different from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions.

The Company has also evaluated the cash flows for FY 21 and based on the present estimate of the management, the Company does not foresee any impact on its ability to meet the statutory dues and creditors payment on due dates and honouring its loan repayment and forward contract contractual commitments. There has been no downgrade in ratings of the existing borrowing facilities of the Company. The Company also has undrawn sanctioned limits and this could be availed to meet the obligations. Accordingly based on the projected cash flows for the next twelve months, the management is of the view that the use of going concern assumption in preparing these financial statements is appropriate.

Note No. 35 - Contingent liabilities and commitments

Contingent liabilities (to the extent not provided for)

	Particulars	As at 31st March, 2020	As at 31st March, 2019
	Contingent liabilities

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF AUTO DIGITECH PRIVATE LIMITED

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the Ind AS financial statements of **Auto Digitech Private Limited** ("the Company"), which comprise the balance sheet as at 31st March, 2020, and the statement of Profit and Loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows for the year then ended, and notes to the Ind AS financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2020, and its financial performance including other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Material Uncertainty related to Going Concern

We draw attention to Note 26 in the financial statements which indicates that the Company has accumulated losses Rs. 588.16 lakhs and its net worth has been fully eroded. The Company has incurred a net loss during the current and previous years and Company's current liabilities exceeds its current assets as at the Balance sheet date. These conditions along with other matters set forth in Note 26 indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern. However, the financial statements of the Company have been prepared on a going concern basis for the reasons stated in the said note.

Our opinion is not modified in respect of this matter.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The company's Board of Directors is responsible for the other information. The other information comprises the Board report. Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these Ind AS financial statements.

As part of an audit in accordance with Standard on Auditing, we exercise professional judgment and maintain professional scepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure-A", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
   (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
   (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
   (e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.
   (f) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
      i. The Company does not have any pending litigations;
      ii. the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;
      iii. there were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE A TO THE AUDITOR'S REPORT

Referred to in paragraph 1 of our report of even date on the financial statements of **Auto Digitech Private Limited** for the year ended 31st March, 2020

Annexure to the Auditor's Report referred to in our report of even date:

I. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) These fixed assets were physically verified by the Management during the year at reasonable intervals and discrepancies noticed during the verification were not material and have been properly dealt with in the books of accounts.

(c) The Company has no immovable properties and hence Clause 3(i)(c) is not applicable to the Company.

II. The Company is in the business of providing services through internet and consequently, does not hold any inventory. Therefore, the provisions of Clause 3(ii) of the said order are not applicable to the Company.

III. The Company has not granted any loans, secured or unsecured to companies, firms or other parties covered in the register maintained under section 189 of the Act. Accordingly, the provisions of para 3(iii) of the Order are not applicable to the Company.

IV. The Company has not granted any loans or provided any guarantees or security to the parties covered under Section 185 and 186. According to the information and explanations given to us and to the best of our knowledge, the provisions of section 185 and 186 have been complied with in respect of the investments made by the Company.

V. In our opinion and according to the information and explanations given to us the Company has not accepted any deposits to which directives of the Reserve Bank of India or the provisions of Sections 73-76 of the Act apply. According to the information and explanations given to us and to the best of our knowledge and belief, no order has been passed by the Company Law Board or the National Company Law Tribunal or the RBI or any other court or tribunal which is to be complied with by the Company.

VI. On facts, clause 3(vi) relating to maintenance of cost records is not applicable to the Company.

VII. (a) According to the information and explanations given to us and the records of the Company examined by us, in our opinion, the Company is regular in depositing the undisputed statutory dues, including provident fund, employees' state insurance, income tax, sales tax, Goods & Service tax, service tax, duty of customs, duty of excise, value added tax, cess and other material statutory dues, as applicable, with the appropriate authorities. According to the information and explanations given to us no undisputed amounts payable in respect of such statutory dues are in arrears, as on 31st March, 2020 for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, there are no amounts of the nature referred to clause 7(a) which have been deposited with the authority on account of any dispute.

VIII. On the basis of examination of relevant records and according to the information and explanations given to us, the Company has not borrowed any money from financial institution or bank or debenture holders as at the Balance Sheet date and accordingly, the provisions of para 3(viii) of the Order are not applicable to the Company.

IX. According to the information and explanations given to us and to the best of our knowledge and belief, the Company has neither raised any moneys by way of initial public offer or further public offer during the year nor have taken any term loans and accordingly, the provisions of para 3(ix) of the Order are not applicable to the Company.

X. On the basis of our examination of the relevant records of the Company, carried out in accordance with generally accepted auditing practices and according to the information and explanations given to us, no fraud by the Company or any fraud on the Company by its officers or employees has been noticed or reported during the year.

XI. The Company has not paid/ provided managerial remuneration hence clause (xi) is not applicable to company.

XII. According to the information and explanations given to us, the Company is not a Nidhi Company and hence, the provisions of para 3(xii) of the Order are not applicable to the Company.

XIII. On the basis of examination of relevant records and according to the information and explanations given to us, all transactions with the related parties are in compliance with sections 177 and 188 of Companies Act, 2013 where applicable. The Company has disclosed the details of transactions with related parties in the Financial Statements as required by the applicable accounting standards.

XIV. The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under audit; therefore, clause 3(xiv) of the Companies (Auditor's Report) Order, 2016 is not applicable to the company.

XV. According to the information and explanations given to us and to the best of our knowledge and belief, the Company has not entered into any non-cash transactions with its directors or persons connected with them. Accordingly, the provisions of para 3(xv) of the Order are not applicable to the Company.

XVI. On the basis of examination of relevant records and according to the information and explanations given to us, in our opinion, the Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in INR unless otherwise stated

Significant Accounting Policies

1) Corporate Information

Mahindra Punjab Tractors Private Limited was incorporated in the financial year 2009-10 under the Companies Act, 1956.

With effect from 22nd January, 2016, the name of the Company was changed from ‘Mahindra Punjab Tractors Private Limited’ to ‘Auto Digitech Private Limited’.

The Company is 100% subsidiary of Mahindra First Choice Services Limited (MFCSL), which is a subsidiary of Mahindra Holdings Limited. Auto Digitech Private Limited has developed B2B model “DearO”. DearO provides easy and convenient solutions to the invoicing and Inventory maintenance.

2) Statement of compliance

The financial statements have been prepared in accordance with Ind ASs notified under the Companies (Indian Accounting Standards) Rules, 2015. The date of transition to Ind AS is 1st April, 2015.

a) **Basis of accounting and preparation of financial statements**

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 on inventories or value in use in Ind AS 36 impairment of assets.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

(i) Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

(ii) Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and

(iii) Level 3 inputs are unobservable inputs for the asset or liability.

b) **Property, plant and equipment:**

Property, plant and equipment are stated at cost less depreciation and impairment losses. Costs comprise purchase price net of any trade discounts and rebates and other taxes (other than those subsequently recoverable from the tax authorities), any directly attributable expenditure on making the asset ready for its intended use and other incidental expenses directly attributable to acquisition of assets up to the date the asset is ready for its intended use.

Depreciation is recognised so as to write off the cost of assets (other than freehold land) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Estimated useful lives of the assets are given below

Category of assets	Life
Plant and Machinery	
– Machinery	10 Years
– Electrical equipments and tools	06 Years
– Mobile handsets	02 Years
– Barcode system & equipment	05 Years
Furniture and fittings - movable in nature	06 Years
Vehicles	06 Years and 8 months
Office Equipments	05 Years
Leasehold Premises	Over the period of lease
Computers	03 Years

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in the statement of profit and loss.

c) **Intangible assets:**

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Useful lives of intangible assets
Software are amortised over a period of three years on Straight line method.

Derecognition of intangible assets
An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in Statement of Profit and Loss when the asset is derecognised.

Intangible assets under development
Expenditure on research and development eligible for capitalisation are carried as Intangible assets under development where such assets are not yet ready for their intended use.

d) **Internally developed software costs:**

The Company has incurred costs for development of software internally. Costs are capitalized to the extent that the capitalized costs do not exceed the realizable value of such costs, until the product is available for general release to customers. Upon completion of the development of software, the capitalization ceases and the resulting intangible asset is amortized based on straight-line basis.

The estimated useful life of the internally developed software is 3 years.

e) **Impairment of tangible and intangible assets other than goodwill:**

The carrying amounts of tangible and intangible assets are reviewed at each Balance Sheet date if there is any indication of impairment based on internal / external factors. Impairment loss is provided to the extent the carrying amounts of assets exceed their recoverable amount. The impairment loss is recognised as an expense in the Statement of Profit and Loss, unless the asset is carried at revalued amount, in which case any impairment loss of the revalued asset is treated as a revaluation decrease to the extent a revaluation reserve is available for that asset. Recoverable amount is the higher of an asset’s net selling price and its value in use. Value in use is the

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in INR unless otherwise stated

present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Net selling price is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the cost of disposal.

f) **Cash flow statements**

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short term balances (with an original maturity upto three months from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

Cash flows from operating activities are reported using the indirect method, whereby profit before tax is adjusted for the effects of transactions of non cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

g) **Inventories:**

Inventories are valued at the lower of cost and net realisable value after providing for obsolescence and other losses, where considered necessary. Cost includes all charges in bringing the goods to the point of sale, including octroi, freight and other levies. Cost is arrived at on weighted average basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

h) **Revenue recognition:**

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

Sale of goods:

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

(i) the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;

(ii) the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;

(iii) the amount of revenue can be measured reliably;

(iv) it is probable that the economic benefits associated with the transaction will flow to the Company ; and

(v) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Income from services:

Income from services is recognised when services are rendered and related costs are incurred.

i) **Dividend and interest income:**

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

j) **Employee Benefits:**

Employee benefits include provident fund, superannuation fund, employee state insurance scheme, gratuity fund, compensated absences and post employment medical benefits.

1. **Short term employee benefits:**

The undiscounted amount of short-term employee benefits expected to be paid in exchange for the services rendered by employees are recognised during the year when the employees render the service. These benefits include performance incentive and compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related service.

The cost of short-term compensated absences is accounted as under:

a. in case of accumulated compensated absences, when employees render the services that increase their entitlement of future compensated absences; and

b. in case of non-accumulating compensated absences, when the absences occur.

2. **Long term benefits**

I. Defined contribution plan

The Company's contribution to provident fund, superannuation fund and employee state insurance scheme are considered as defined contribution plans and are charged as an expense based on the amount of contribution required to be made and when services are rendered by the employees

i. **Provident and family pension fund**

The eligible employees of the Company are entitled to receive post-employment benefits in respect of provident and family pension fund, in which both employees and the Company make monthly contributions at a specified percentage of the employees' eligible salary (currently 12% of employees' eligible salary). The contributions are made to Regional Provident Fund Commissioner. Provident Fund and Family Pension Fund are classified as Defined Contribution Plans as the Company has no further obligations beyond making the contribution. The Company's contribution to Defined Contribution Plans is charged to the Statement of Profit and Loss as incurred.

ii. **Superannuation**

The eligible employees of the Company are entitled to receive post-employment benefits in respect of superannuation fund in which the Company makes yearly contribution at a specified percentage of the employees' eligible salary (currently 15% of employees' eligible salary). The contributions are made to the Life Insurance Corporation of India. Superannuation is classified as Defined Contribution Plan as the Company has no further obligations beyond making the contribution. The Company's contribution to Defined Contribution Plans are charged to the Statement of Profit and Loss as incurred.

II. Defined benefit plan

For defined benefit plans in the form of gratuity fund, the cost of providing benefits is determined using the Projected Unit Credit method, with actuarial valuations being carried out at each Balance Sheet date. Actuarial gains and losses are recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised immediately to the extent that the benefits are already vested and otherwise is amortised on a straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognised in the Balance Sheet represents the present value of the defined benefit obligation as adjusted for unrecognised past service cost, as reduced by the fair value of scheme

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in INR unless otherwise stated

assets. Any asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the schemes.

i. **Gratuity**

The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15 days salary payable for each completed year of service or part thereof in excess of six months. Vesting occurs upon completion of five years of service. The Company accounts for gratuity benefits payable in future based on an independent actuarial valuation. Actuarial gains and losses are recognised in the Statement of Profit and Loss.

ii. **Compensated absences**

The Company provides for encashment of leave or leave with pay subject to certain rules. The employees are entitled to accumulate leave subject to certain limits, for future encashment/ availment. The liability is provided based on the number of days of unutilised leave at each Balance Sheet date on the basis of an independent actuarial valuation.

k) **Taxation:**

Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income tax Act, 1961 and other applicable tax laws. The Companies current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

l) **Provisions and contingencies:**

A provision is recognised when the Company has a present obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates. Contingent liabilities are disclosed in the notes. Contingent assets are not recognised in the financial statements.

Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

m) **Leases:**

The Company as lessee

Rental expense from operating leases is generally recognised as per agreement over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

n) **Financial instruments**

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

o) **Financial assets**

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Financial assets are subsequently measured at fair value.

A financial asset is held for trading if:

(i) it has been acquired principally for the purpose of selling it in the near term; or

(ii) on initial recognition it is part of a portfolio of identified financial instruments that the group manages together and has a recent actual pattern of short term profit taking; or

(iii) it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee

Dividends on these investments in equity instruments are recognised in profit or loss when the Company's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables,

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in INR unless otherwise stated

trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) through the expected life of that financial instrument.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay.

p) **Financial liabilities and equity instruments**

Classification as debt or equity

Debt and equity instruments issued by a Company entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognised at the proceeds received, net of direct issue costs.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities subsequently measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

q) **Critical accounting judgements and key sources of estimation uncertainty**

In the application of the Company's accounting policies, which are described in note 2, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Useful lives of property, plant and equipment

Depreciation on property, plant and equipment has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013 except in respect of the following categories of assets, in whose case the life of the assets has been assessed as under based on technical evaluation, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc.:

Sr. No	Category of assets	Life
(i)	Plant and Machinery	
	- Machinery	10 Years
	- Electrical equipments and tools	6 Years
	- Mobile handsets	2 Years
	- Barcode system & equipment	5 Years
(ii)	Furniture and fittings - movable in nature	6 Years
(iii)	Vehicles	6 Years and 8 months

3) **Recent accounting pronouncements**

Recent Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2020.

Loss for the year used in the calculation of basic earnings per share	(32,934,623)	(30,080,060)
Weighted average number of equity shares	10,000	10,000
Earnings per share - Basic and Diluted	(3,293.46)	(3,008.01)

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

All amounts are in INR unless otherwise stated

Note No. 22 - Financial instruments

A) Capital management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity as presented on the face of the statement of financial position.

Particulars	As at 31st March, 2020	As at 31st March, 2019

B) Financial risk management framework

The Company's activities expose it to a variety of financial risks, credit risk and liquidity risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factor.

1) Credit risk

Credit risk arises when customers defaults on its contractual obligations to pay resulting in financial loss to the Company.

The Company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The company has computed expected credit losses based on individual receivable specific provision where applicable.

The loss allowance provision is determined as follows:

	As at 31st March 2020			
Particulars	Not due	Less than 6 months past due	More than 6 months past due	Total
Expected loss rate	–	–	–	–
Gross carrying amount	–	–	–	–
Loss allowance provision	–	–	–	–

	As at 31st March 2019			
Particulars	Not due	Less than 6 months past due	More than 6 months past due	Total
Expected loss rate	–	0.0%	–	0.0%
Gross carrying amount	–	311,020	–	311,020
Loss allowance provision	–	–	–	–

Reconciliation of loss allowance provision for trade receivables

Particulars	As at 31st March, 2020	As at 31st March, 2019
Balance as at beginning of the year	**–**	19,787
Impairment losses recognised in the year based on lifetime expected credit losses		
– On receivables originated in the year	**–**	–
Amounts written off during the year as uncollectible	**–**	19,787
Balance at end of the year	**–**	–

During the period, the company has written off Rs NIL (Previous year - Rs 14,184) of trade receivable which were not provided as doubtful debt earlier (refer note no 20). These trade receivables are not subject to enforcement activity.

2) Liquidity risk

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements.

(ii) Maturity of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay.

(ii) Covid 19

The Company has accounted significant accounting estimates which have been disclosed in the financial statements.

These includes valuation of inventory, fair valuation of financial and non-financial assets and liabilities, testing of impairment of assets, going concern assessment etc. requiring significant management judgement in estimating the same. Considering the continuing COVID-19 pandemic where the results in upcoming period may significantly vary and may affect the recoverability of assets and settlement of liabilities.

The Company, based internal & external sources of information including market research, economic forecast and other information, has assessed that as a result of Covid-19 outbreak, there is no significant financial impact on the financial statements for the year ended March 31, 2020 as at the date of approval of these financial statements.

Note No. 26 - Going concern

The accumulated losses of the Company stands at Rs 58,816,087 and its paid-up equity and optionally convertible redeemable preference share capital by Rs 134,996,350. The Company has developed and launched a user friendly B2B Garage Management software, 'DearO'. This software is being implemented at Franchises of MFCSL. The company has also implemented DearO at some external corporate workshops on a pilot basis. The Company is also developing Supply solution software which is under development. As a result, the Company expects to grow further in the coming years in terms of volume and revenue. Further, the company is in discussion with several agencies for funding. Accordingly, the financial statements of the Company have been prepared on a going concern basis.

INDEPENDENT AUDITOR'S REPORT

To the Members of Trringo.com Limited

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the Ind AS financial statements of Trringo.com Limited("the Company"), which comprise the balance sheet as at 31st March 2020, and the statement of Profit and Loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the Ind AS financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2020, and its losses, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The company's Board of Directors is responsible for the other information. The other information comprises the Board report.

Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these Ind AS financial statements.

As part of an audit in accordance with Standard on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that are sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statement.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure-B", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:

   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   (c) The Balance Sheet, the Statement of Profit and Loss, Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.

   (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.

   (e) On the basis of the written representations received from the directors as on 31st March, 2020 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2020 from being appointed as a director in terms of Section 164 (2) of the Act.

   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A".

   (g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:

   In our opinion and to the best of our information and according to the explanations given to us, the company not paid any remuneration to its directors during the year, accordingly, requisite approvals mandated by the provisions of section 197 read with Schedule V to the Act are not applicable.

   (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

      i. The company does not have any pending litigations;

      ii. The Company did not have any long term contracts including derivative contracts for which there were any material foreseeable losses;

      iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Trringo.com Limited** ("the Company") as of March 31, 2020 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing whether the risk of a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected, also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2020, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE B TO THE AUDITOR'S REPORT

Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date.

Annexure to the Auditor's Report referred to in our report of even date:

1) i) The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.

ii) Fixed assets have been physically verified by the management during the year and no material discrepancies were noted on such verification.

iii) The company does not have any immovable property as on March 31, 2020.

2) The company does not hold any physical inventories. Accordingly para 3(ii) of the order is not applicable to the company.

3) The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the Register maintained under section 189 of Companies Act, 2013 by the Company. Therefore, clauses 3(iii) (a), (b) & (c) of the Companies (Auditor's Report) Order, 2016 is not applicable to the Company.

4) The company has not granted any loans or made any investments, or provided any guarantees or security during the year. Accordingly the provisions of Clause 3(iv) of the Order are not applicable to the company.

5) In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits under the provisions of section 73 to 76 of the Act and the Rules framed thereunder.

6) We have been informed that the Central Government has not prescribed maintenance of Cost records under section 148(1) of the Act and such accounts and records have been appropriately made and maintained.

7) i) According to the records of the Company, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Income Tax, Service Tax, Value Added Tax, GST and other statutory dues applicable to it. According to information and explanation given to us, no undisputed amounts in respect of the above were outstanding, as on March, 2020 for a period of more than 6 months from the date they become payable.

ii) There are no dues of income tax, sales tax, service tax, duty of customs, and duty of excise or value added tax, GST and cess which have not been deposited on the account of any dispute.

8) The Company has not defaulted in repayment of loans or borrowing to a financial institution, bank or Government. The Company has not raised any money through debentures.

9) The company has not raised moneys by way of initial public offer or further public (including debt instruments) or term loans and hence reporting under para 3(ix) of the Order is not applicable to the Company.

10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing principles – in India, and according to the information and explanations given to us, we have neither come across any instance of fraud on or by the Company, noticed or reported during the year, nor have we been informed of such case by the management.

11) According to the information and explanations given to us, the Company has not paid any remuneration to managerial personnel as defined in the Act and accordingly the provisions of para 3(xi) of the Order are not applicable to the Company.

12) The Company, not being a Nidhi Company, the para 3(xii) of the Order is not applicable to the Company.

13) According to the information and explanations given to us, all transactions with related parties are in compliance with sections 188 of the Companies Act, 2013 and the details of the same have been disclosed in the financial statements as required by the applicable accounting standards.

14) The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review.

15) According to the information and explanations given to us, the Company has not entered into non-cash transactions with directors or persons connected with him. Hence, the provisions of para 3(xv) are not applicable to the Company.

16) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, the provisions of para 3(xvi) of the Order are not applicable to the Company.

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

1. Corporate Information

Trringo.com Limited is a 100 % subsidiary of Mahindra and Mahindra Limited and incorporated on 23rd May, 2016 under the provisions of the Companies Act, 2013 (CIN:U01409MH2016PLC281449). The Companyis in the business of organized farm equipment rentals through a franchisee based model.

2. Significant accounting policies

(A) Statement of compliance

The financial statements of the Company have been prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended.

(B) Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis,presented in Indian rupees and rounded off to nearest lacs.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/ or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

(C) Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

(D) Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognisedso as to write off the cost of assets less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

(E) Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

Useful lives of intangible assets

Estimated useful lives of the intangible assets are as follows:

IT Software 3 to 6 years

(F) Impairment of tangible and intangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

(G) Foreign exchange gains and losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period.

- For foreign currency denominated financial assets measured at amortised cost and FVTPL, the exchange differences are recognised in profit or loss except for those which are designated as hedging instruments in a hedging relationship.
- Changes in the carrying amount of investments in equity instruments at FVTOCI relating to changes in foreign currency rates are recognised in other comprehensive income.

For the purposes of recognising foreign exchange gains and losses, FVTOCI debt instruments are treated as financial assets measured at amortised cost. Thus, the exchange differences on the amortised cost are recognised in profit or loss and other changes in the fair value of FVTOCI financial assets are recognised in other comprehensive income.

(H) Financial instruments

Financial assets and financial liabilities are recognised when a Company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, trade receivables, other contractual rights to receive cash and other financial asset.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls).

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and alsorecognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities subsequently measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired.

(I) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable.

Sale of Services

Revenue from the rental services is recognised when the service is delivered and completed, all the following conditions are satisfied:

- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the services rendered;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Interest income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding.

(J) Government Grants

The Company directly or indirectly is entitled to incentives from government authorities in respect of custom hiring and service centers. The Company accounts for its entitlement as income on accrual basis.

Government grants are recognized in profit or loss on a systematic basis over the periods in which the Company recognizes as expenses the related costs for which the grants are intended to compensate. When the grants relates to an asset, it is recognized as income in equal amounts over the useful life of the related asset.

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

(K) Employee benefits

Retirement benefit costs and termination benefits

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method. Re-measurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- re-measurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item 'Employee benefits expense'. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

Short-term and other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

(L) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

(M) Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax:

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax:

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year:

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

(N) Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks & rewards of ownership to the leases. All other leases are classified as operating leases.

The Company as lessee:

The assets held under finance leases are initially recongnised as assets of the company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance expense and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policies on borrowing cost. Contingent rentals are recognized as expense in the period in which they are incurred.

Rental expense from the operating lease is generally recognized on a straight line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessors expected inflationary cost increases, such increases are recognized in the year in which such benefits accrue.

(O) Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

Note No. 24 – Capital commitments

(a) The estimated amounts of contracts remaining to be executed on capital account and not provided for as at 31 March 2020 is Rs 5.56 lakhs (2019 - Rs.15.03 lakhs).

Note No. 25 – Financial Instruments

Capital management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity as presented on the face of the statement of financial position.

The capital structure is monitored on the basis of debt to equity and maturity profile of overall debt portfolio of the Company.

Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factor.

NOTES TO FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH, 2020

CREDIT RISK

Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Company. Credit risk arises from cash and cash equivalents, investments carried at amortised cost, deposits with banks and financial institutions as well as credit exposures to customers including outstanding receivables.

Trade Receivables:

The Companys trade receivables include receivables on sale of residential flats. As per the Company's flat handover policy, a flat is handed over to a customer only upon payment of entire amount of consideration. Thus, the Company is not exposed to any credit risk on receivables from sale of residential flats.

Balances with Banks, mutual funds and other financial assets:

For banks and financial institutions, only high rated banks/institutions are accepted. The Company holds cash and cash equivalents with bank and financial institution counterparties, which are having highest safety ratings based on ratings published by various credit rating agencies. The Company considers that its cash and cash equivalents have low credit risk based on external credit ratings of the counterparties.

For other financial assets, the Company assesses and manages credit risk based on reasonable and supportive forward looking information. The Company does not have significant credit risk exposure for these items.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

(iv) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk and other price risk such as equity price risk and commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. All such transactions are carried out within the guidelines set by the Board of Directors.

Note No. 27 – Employee benefits

(a) Defined Contribution Plan

The Company's contribution to Provident Fund aggregating to Rs. 1.60 Lakhs (2019 - Rs. 15.85 Lakhs) has been recognised in the Statement of Profit or Loss under the head Employee Benefits Expense.

(b) Defined Benefit Plans:

Gratuity

The Company has an obligation towards gratuity, a defined retirement plan covering eligible employees. The plan provides a lump sum payment to vested employees at retirement, death while in employment or on termination of employment. Vesting occurs upon completion of five years of service. The company accounts for liability of future gratuity benefits based on an independent actuarial valuation obtained using projected unit credit method.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

	Valuation as at 31-Mar-20	31-Mar-19
Discount rate(s)	**NA**	6.90%
Expected rate(s) of salary increase	**NA**	10.00%

INDEPENDENT AUDITOR'S REPORT

To the Stockholder and the Board of Directors,

Mahindra USA, Inc.

We have audited the accompanying separate parent company financial statements of Mahindra USA, Inc. ('the Company); a Texas corporation, which comprise the balance sheet as at March 31, 2020, and the related statements of comprehensive loss, changes in stockholder's(deficit) equity and cash flows for the year then ended and the related notes to the separate parent company financial statements.

Management's responsibility for the separate parent company financial statements

Management is responsible for the preparation and fair presentation of these separate parent company financial statements in accordance with accounting principles generally accepted in the United States; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of separate parent company financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' responsibility

Our responsibility is to express an opinion on these separate parent company financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the separate parent company financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the separate parent company financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the organization's preparation and fair presentation of the separate parent company financial statements to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the organization's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the separate parent company financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Basis for qualified opinion

As discussed in Note B.1 to the separate parent company financial statements, the Company reports its investment in its wholly owned subsidiary at cost. In our opinion, accounting principles generally accepted in the United States require that all majority-owned subsidiaries be accounted for as consolidated subsidiaries. If the financial statements of the subsidiary had been consolidated with those of Mahindra USA, Inc., total assets, and liabilities would have increased by $4,892,884 and net loss would have increased by $6,016,021, for the year then ended.

Qualified opinion

In our opinion, except for the effects of not consolidating the wholly-owned subsidiary as discussed in the basis for qualified opinion paragraph, the separate parent company financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of Mahindra USA, Inc. as at March 31, 2020, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States.

Other matter

The financial statements of Mahindra USA, Inc. for the year ended March 31, 2019, were audited by another auditor, who expressed a modified opinion on those statements on May 15, 2019. The modified opinion was based on non-consolidation of the Company's wholly owned subsidiary in the financial statements.

NOTES TO SEPARATE PARENT COMPANY FINANCIAL STATEMENTS

NOTE A – NATURE OF OPERATIONS

Mahindra USA, Inc. (the "Company") ("MUSA") was incorporated on June 8, 1994 in the State of Texas and commenced business on March 15, 1995. The Company is owned by Mahindra and Mahindra Ltd. ("M&M"). M&M is a publicly traded corporation, headquartered in Mumbai, India, which, among other activities, manufactures farming equipment and automobiles. The Company sells tractors, parts, attachments and accessories in North America under wholesale distribution agreements.

The Company formed a subsidiary on August 9, 2016, Mahindra Mexico S de. R.L. de. C.V. ("MML"), to assemble and sell tractors, parts, attachments and accessories in Mexico and Latin America. MML commenced commercial operations in July 2018.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies are detailed below:

1. Basis of preparation

a. The accompanying separate parent company financial statements (or "financial statements") are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States ('US GAAP'), except for investments in wholly-owned subsidiary. The Company reported its investment in Mahindra Mexico S de. R.L. de. C.V. ("MML") using the cost basis for the reporting requirements of its ultimate parent company and shareholder, Mahindra and Mahindra Ltd.

b. All amounts are stated in United States Dollars (USD), except as otherwise specified.

c. The financial statements are presented for the years ended March 31, 2020 and March 31, 2019.

d. Certain reclassifications, re groupings and reworking have been made in the financial statements of prior periods to conform to the classifications used in the current year. These changes had no impact on previously reported net loss or stockholder's (deficit)/equity.

2. Use of estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States (US GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The management's estimates for determination of useful lives for property, plant & equipment, and long-lived assets for impairment,revenue recognition,allowance for incentives and warranties, legal and tax contingencies,provision for doubtful debts and inventory valuation at the balance sheet date represent certain of these particularly sensitive estimates. Management believes that the estimates used in the preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates prospectively in the current and future periods.

3. Cash and cash equivalents

The Company's cash and cash equivalents comprises of cash and bank balances. The Company does not have any cash equivalents. The carrying value of cash and cash equivalents approximates fair value because of the short maturities of those financial instruments. Cash balances in US bank accounts are insured by the Federal Deposit Insurance Corporation up to an aggregate of $ 250,000. The Company believes it is not exposed to any significant risk on cash and cash equivalents.

4. Revenue recognition

Adoption of ASC 606

Financial Accounting Standards Board (FASB) issued Accounting Standards Codification (ASC) 606 – Revenue from Contracts with Customers in May 2014. This standard is mandatory for private entities for accounting period starting from December 31, 2018. However, the Company, to be in agreement with Mahindra & Mahindra's accounting policy early adopted the standard during the year ended March 31, 2019) using modified retrospective method of transition to change its accounting policies.

Revenue from sale of tractors, parts, attachments and accessories is recognized when each of the following criteria is met:

1. The Company and an independent dealer approve a contract with commercial substance.
2. The sales price is determinable, and collectability of the payment are probable based on the terms outlined in the contract
3. Control of the goods has transferred to the dealer, when the ordered goods are invoiced to the dealer after credit approval and when the ordered items are ready for shipment.

Transfer of control, and therefore revenue recognition is recorded at a point in time on the date when the tractors, parts, attachments or accessories are made available to the dealers.

The Company participates in various retail sales incentives with its dealers. The Company records the estimated retail sales incentive programs offered to dealers as a reduction to revenue at the time of sale to the dealer. The estimate is based on historical data, announced incentive programs, field inventory levels, and retail sales volumes.

Product warranties

The Company establishes reserves for product warranties at the time the related sale is recognized. The Company issues product warranties under which the performance of products delivered is generally guaranteed for a certain term. The accrual for product warranties includes the expected costs of warranty obligations imposed by law or contract, as well as the expected costs for policy coverage.

5. Accounts receivable and allowance for doubtful debts

Accounts receivable are stated at the amount invoiced to the dealers. The Company follows the specific identification method for recognizing allowance for doubtful debts. All amounts deemed to be uncollectible are charged against the allowance for doubtful debts in the period that determination is made. The Company charges off uncollectable amounts against the allowance for doubtful debts in the period in which it determines they are uncollectable. Allowance for doubtful debts is included in other selling, general and administrative expenses in the statements of comprehensive loss.

6. Inventories

Inventories are stated at moving average price or net realizable value whichever is lower. Cost comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realizable value is the estimated selling price less applicable selling expenses. The Company writes-down obsolete or otherwise unmarketable inventory to its estimated realizable value.

7. Investment in subsidiary

The Company accounts for its investment in subsidiary using the cost method.

8. Property, plant and equipment, net

Property, plant and equipment are stated at cost less accumulated depreciation and impairment. Cost of items of property, plant and equipment comprise cost of purchase, improvements and other costs necessarily incurred to bring it to the condition and location necessary for its intended use. Depreciation is provided over the useful lives of the related assets using the straight-line method for financial reporting and the modified accelerated cost recovery method for tax purposes. Leasehold improvements are amortized over the shorter of the lease term or their respective estimated useful lives.

The estimated useful life used to determine depreciation is:

Buildings and building improvements	7-10 Years
Furniture and fixtures	3-7 Years
Office equipment	3-7 Years
Computer and software	3-5 Years
Vehicles	5 Years

Deposits paid towards the acquisition of property, plant and equipment outstanding as of each balance sheet date and the cost of property, plant and equipment not ready for use before such date are disclosed under construction-in-progress.Upon retirement or disposal of assets, the cost and accumulated depreciation are eliminated from the accounts and the resulting gain or loss is a part of net operating loss.

Development costs related to internally generated software are capitalized once a project has progressed beyond a conceptual, preliminary stage to that of the application development stage. Costs of significant improvements on existing software for internal use, both internally developed and purchased, are also capitalized. Costs related to the preliminary project stage, data conversion and post-implementation/operation stage of an internal use software development project are expensed as incurred.

9. Leases

Operating leases

Lease rent expenses on operating leases are charged to expense over the lease term. Certain operating lease agreements provide for scheduled rent increases over the lease term. Rent expense for such leases is recognized on a straight-line basis over the lease term.

Capital leases

Capital leases, which effectively transfer substantially all the risks and benefits incidental to ownership of the leased item, are capitalized at the lower of the fair value and present value of the minimum lease payments at the inception of the lease term and disclosed as leased assets. Lease payments are apportioned between finance charges and reduction of the lease liability based on the implicit rate of return.

10. Income taxes

In accordance with the provisions of FASB ASC Topic 740 “Income Taxes,” income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The deferred tax asset is reduced by a valuation allowance if it is more likely than not that some portion or all of the asset will not be realized.

11. Foreign currency transactions

Transactions in foreign currencies are translated into the functional currency at the rates of exchange prevailing at the date of the transaction. Monetary items denominated in foreign currency remaining unsettled at the end of the year are translated at the closing rates as at the last day of the year. Gains or losses, if any, on account of exchange difference either on settlement or translation are recognized in statements of comprehensive loss, except those relating to acquisition of fixed assets which are adjusted to the cost of the respective asset.

12. Fair value measurements and financial instruments

The fair value hierarchy requires the use of observable market data when available. In instances where the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input significant to the fair value measurement in its entirety. The Company’s assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability. The following table sets forth by level within the fair value hierarchy, the Company’s financial assets and liabilities that are accounted for at fair value on a recurring basis at March 31, 2020 and 2019, according to the valuation techniques the Company used to determine their fair values.

- Level 1 – Quoted prices in active markets for identical assets or liabilities.
- Level 2 – Observable inputs other than quoted prices include in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.
- Level 3 – Unobservable inputs that are support by little or no market activity. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

The fair value of the interest rate swaps is the estimated amount that the Company would receive or pay to terminate such agreements, taking into account market interest rates and the remaining time to maturities or using market inputs with mid-market pricing as a practical expedient for bid-ask spread.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

The Company’s financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and related party dues. The estimated fair value of cash, accounts receivable, accounts payable and related party dues approximate their carrying amounts due to the short-term nature of these instruments. The Company has entered into cash flow hedge so as to protect the variability of the cash flow stemming from the floating rate interest payments on facility arrangement. None of these instruments are held for trading purposes.

13. Interest rate swaps

The Company has interest rate swaps with counterparties to reduce its exposure to variability in cash flows relating to interest payments on portion of its notes payable in an aggregate principal amount of $ 25 million. The Company applies hedge accounting and has designated these instruments as cash flow hedges of the risk associated with floating interest rates on designated future monthly interest payments. Management assumes the hedge is highly effective and therefore changes in the value of the hedging instrument are recorded in accumulated other comprehensive loss inthe balancesheets. Any ineffectiveness is recorded in earnings. Amounts in accumulated other comprehensive loss are reclassified into earnings in the same period during which the hedged transactions affect earnings, or upon termination of the hedging relationship.

14. Derivative financial instruments

The Company has taken floating rate borrowings which is linked to 1 months revolving LIBOR. For managing the interest rate risk arising from changes in LIBOR on such borrowings, the Company has entered into interest rate swap (IRS) for the loan liability amounting to $ 25 million. The Company has designated the IRS (hedging instrument) and the floating rate financial liability (hedged item) into a hedging relationship and applies hedge accounting.

Under the terms of the IRS, the Company pays interest at the fixed rate to the swap counterparty in USD and receives the floating interest payments based on LIBOR in USD. As the critical terms of the hedged item and the hedging instrument (notional, interest periods, underlying and fixed rates) are matching and the interest cashflows are off-setting, an economic relationship exists between the two. This ensures that the hedging instrument and hedged item have values that generally move in the opposite direction.

Hedge effectiveness testing is assessed at designation date of the hedging relationship, and on an ongoing basis. The ongoing assessment is performed at a minimum at each reporting date or upon a significant change in circumstances affecting the hedge effectiveness requirements, whichever comes first.

15. Advertising and marketing expenses

The Company subsidizes product advertising carried on by dealers within each dealer’s local market and conducts dealer conferences. The Company also advertises in trade magazines, at trade shows and uses various other means of promotion, including product brochures and digital media to increase brand awareness and sale of products in the market.Expenditures without extended advertising value are expensed in the year accrued. The amount of advertising and marketing costs incurred by the Company for the year ended March 31, 2020 amounts to $ 9,734,389 (March 31, 2019: $ 15,164,766).

16. Shipping and handling cost

The Company generally classifies freight billed to dealers as sales revenue, which is generally included in the list price to the dealer. Shipping and handling activities are fulfillment activities and are not considered to be a separate performance obligation.

17. Commitments and contingencies

Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred.

18. Liquidity

As on March 31, 2020, the Company has negative net worth of $ 58,582,806. The Company believes that cash flow from operations and the current credit line from the banks will be sufficient to meet the Company's current anticipated cash needs for at least the next twelve months, including working capital needs and various contractual obligations. The Company has initiated actions to reduce inventory substantially and bring down its working capital requirement by generating additional cash flow to support obligations over the next twelve months.

NOTE C – CASH AND CASH EQUIVALENTS

Cash and cash equivalents include the following:

	As at	
	March 31, 2020	March 31, 2019
Balances with banks	**12,545,874**	30,596,705
Cash in hand	**645**	–
Total	**12,546,519**	30,596,705

NOTE D – ACCOUNTS RECEIVABLE, NET

Accounts receivable, net, include the following:

	As at	
	March 31, 2020	March 31, 2019
Accounts receivable	**35,665,724**	34,744,199
Less: allowance for doubtful debts	**(2,383,824)**	(4,361,683)
Accounts receivable, net of allowances	**33,281,900**	30,382,516

Accounts receivable as at March 31, 2020 and March 31, 2019 are stated net of provision for doubtful debt and other allowances. The Company follows the specific identification method for recognizing allowance for doubtful debts. Accordingly, the Company maintains an allowance for doubtful debts on accounts receivable, based on present and prospective financial condition of the dealerand ageing of accounts receivable after considering historical experience and the current economic environment.

NOTE E – INVENTORIES, NET

Major classes of inventory include the following:

	As at	
	March 31, 2020	March 31, 2019
Tractors	**123,665,402**	157,051,812
Parts, accessories, and others	**89,609,334**	93,827,874
Total	**213,274,736**	250,879,686

NOTE F – PROPERTY, PLANT AND EQUIPMENT, NET

Property, plant and equipment, and intangiblesinclude the following:

	As at	
	March 31, 2020	March 31, 2019
Building and building improvements	**4,937,549**	4,462,044
Vehicles	**28,132**	28,132
Furniture and fixtures	**1,752,497**	1,602,111
Office equipment	**1,103,598**	1,142,028
Computers and software	**8,911,579**	3,607,828
Less: accumulated depreciation and amortization	**(6,163,472)**	(3,824,082)
Property, plant and equipment, and intangible assets	**10,569,883**	7,018,061
Construction-in-progress	**1,283,007**	4,244,081
Property, plant and equipment, and intangible assets net	**11,852,890**	11,262,142

Depreciationexpense for the year ended March 31, 2020 is $ 2,368,801 and for the year ended March 31, 2019 is $ 1,514,573.

During the year ended March 31, 2020 and March 31, 2019, construction-in-progress of $ 5,929,642 and $ 3,140,794, respectively, was completed and capitalized to computer and software, building and building improvements and the other property, plant and equipment.

NOTE G – NOTES PAYABLE

As at March 31, 2020 the total loan outstanding amounts to $ 172,041,658 from Bank of America N.A. and J. P. Morgan Chase Bank N.A. The Company has fund based and non-fund-based facilities from the Bank of America N.A. and J P Morgan Chase Bank N.A. The average interest rate during the year on these loans was 3.92%. The maturity dates for all the loans are in April 2020. Neither of the facilities from Bank of America N.A. or JP Morgan Chase Bank N.A. carry any restrictive covenants. The Company has a line of credit of $ 110,000,000 from Bank of America N.A and $ 65,000,000 from JP Morgan Chase Bank N.A.

Bank of America N.A. has issued an irrevocable standby letter of credit for $ 20,000,000 on behalf of the Company as a credit enhancement to De Lage Landen Financial Services, Inc., a related organization that offers financing to the Company's dealers in USA, Canada and also to dealers of related entities in Mexico and Brazil.

Additionally, the Company has repaid the borrowing of $ 25,000,000 from Mahindra Overseas Investment Company (Mauritius) Limited (a related entity) during the year.

	As at	
	March 31, 2020	March 31, 2019
Current portion		
Notes payable	**172,041,658**	209,531,001
Total	**172,041,658**	209,531,001

NOTE H – ACCOUNTS PAYABLE

	As at	
	March 31, 2020	March 31, 2019
Trade payables	**54,907,438**	44,869,193
Total	**54,907,438**	44,869,193

NOTE I – OTHER CURRENT LIABILITIES

Other current liabilities comprise of:

	As at	
	March 31, 2020	March 31, 2019
Accrued payables	**74,409,375**	74,983,719
Current obligations under capital leases	**421,074**	18,562
Total	**74,830,449**	75,002,280

Expenses accrued for the years ending March 31, 2020 and March 31, 2019 include advertising, marketing program costs, retail rate buy-downs, cash discounts, state franchise taxes, payroll and payroll taxes, employee bonuses, salesmen and customer bonuses, legal fees, property taxes, insurance deductibles and warranty reserves. The Company participates in various retail incentives with its dealers and has accrued for the costs of these programs in effect as of the date of these separate parent company financial statements.

NOTE J – DERIVATIVE FINANCIAL INSTRUMENTS

The following tables summarize the gross fair values of the financial instruments as of March 31, 2020 and March 31, 2019:

	As at	
	March 31, 2020	March 31, 2019
Derivatives designated as hedging instruments		
Interest rate swap	**533,910**	–
Total derivatives designated as hedging instruments	**533,910**	–
Total derivatives not designated as hedging instruments	**–**	–
Total derivative fair value	**533,910**	–

The fair value of the derivative instruments and their location in the financial statements of the Company is summarized in the table below:

	As at	
	March 31, 2020	March 31, 2019
Other current liabilities	**533,910**	–
Total	**533,910**	–

Gain (loss) recognition

There was no gain recognized with respect to fair value of derivative instruments not designated as hedges and ineffectiveness of designated derivative recognized in other income, net.

The following table summarizes the impact on accumulated other comprehensive income and earnings of derivative instruments designated as cash flow hedges and the amount of gain recognised in other comprehensive income for the year ended March 31, 2020 and March 31, 2019.

	Before-tax amount	**Tax (expense) or benefit**	**Net of tax Amount**
Opening balance as of March 31, 2019	–	–	–
Net losses reclassified into statement of income on completion of hedged transactions	–	–	–
Loss on cash flow hedging derivatives, net	533,910	–	533,910
Closing balance as of March 31, 2020	**533,910**	**–**	**533,910**

NOTE K – FAIR VALUE MEASUREMENT

The following table presents liabilities as of March 31, 2020 and March 31, 2019 that are measured and recognized at fair value on a recurring basis:

	Quoted price in active markets for identical assets (Level 1)	**Significant other observable inputs (Level 2)**	**Significant other unobservable inputs (Level 3)**
Balance as on March 31, 2019	–	–	–
Interest rate swap	–	533,910	–
Balance as of March 31, 2020	**–**	**533,910**	**–**

The fair value of the interest rate swaps is the estimated amount that the Company would receive or pay to terminate such agreements, taking into account market interest rates and the remaining time to maturities or using market inputs with mid-market pricing as a practical expedient for bid-ask spread.

NOTE L – LEASES

The Company entered into a lease covering a 98-month period for an office and warehouse on August 30, 2017. Total rent expense for all operating leases for the years ended March 31, 2020 and March 31, 2019 were $ 3,607,857 and $ 3,657,875, respectively.

The Company entered into a master lease agreement for their vehicle fleet.

Future minimum lease payments under the non-cancelable operating leases with initial or remaining terms of one year or more are as follows:

Year ending Mar 31,	**Equipment and others**
2021	3,739,438
2022	3,424,234
2023	2,852,738
2024	2,919,770
2025	3,007,373
Thereafter	1,791,075
Total	**17,734,628**

Future minimum lease payments under the finance lease with initial or remaining terms of one year or more are as follows:

Year ending March 31,	**Others**
2021	442,823
2022	10,659
Total	**453,482**
Less: imputed interest	(21,958)
Total capital lease obligation	**431,524**

Long term capital lease obligation is calculated as:

	As at	
	March 31, 2020	March 31, 2019
Total capital lease obligation	**431,524**	48,877
Less: Current portion	**(421,074)**	(18,562)
Long term capital lease obligation	**10,450**	30,315

NOTE M – INCOME TAXES

The Company files state tax returns and federal tax returns at the standalone level. The components of the provision for income tax expense/(benefit) are as follows:

	For the year ended	
	March 31, 2020	March 31, 2019
Current income tax expense	**369,052**	–
Deferred income tax benefit	**–**	(25,065,323)
Total	**369,052**	(25,065,323)

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

As of March 31, 2019, the Company had net deferred tax assets of $ 37,365,938. This was mainly attributable to two components, deferred tax on accrued dealer incentive of $ 11,486,552 and on net operating losses ("NOLs") of $ 25,065,323. Other components refer to deferred taxes on various expenses, including slow moving inventory, warranty reserves and allowance for uncollectible accounts receivable. Above stated deferred assets of $ 37,365,938 were entirely recognized.

As of March 31, 2020, the Company has net deferred tax assets of $ 55,108,252. This is mainly attributable to two components, deferred tax on accrued dealer incentive of $ 11,285,453 and on net operating losses $ 36,535,064. Other components refer to deferred taxes on various expenses, including slow moving inventory, warranty reserves, allowance for uncollectible accounts receivable and other comprehensive loss related items such as cash flow hedge reserve. Out of total deferred tax assets, the company has recognized deferred tax assets of $ 37,365,938 and created valuation allowance on the remaining balance of $ 17,742,313.

Realization of net deferred tax assets is dependent upon generation of sufficient taxable income in future years, benefit from the reversal of taxable temporary differences and tax planning strategies. Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income will be generated to permit use of the existing deferred tax assets. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change.

Based on the evaluation of positive and negative evidences, the Company has determined that the entire amount of deferred tax assets may not be realizable in near future and accordingly created a valuation allowance of $ 17,742,313 as of March 31, 2020.

The Company has federal NOLs of $ 147,777,687 and $ 96,596,241 as at March 31,2020 and March 31,2019, respectively. These NOLs generated will be carried forward indefinitely and are also available for carryback to five preceding years.

Accounting for uncertain tax position

The Company recognizes the benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company has no unrecognized tax positions as at March 31, 2020 and March 31, 2019.

The Company is currently under federal examination for the tax year 2016. Additionally, the tax years of 2017 and 2018 shall also remain subject to examination by the taxing authorities.Refer note U for contingencies pertaining to franchise tax assessments.

NOTE N – EMPLOYEE BENEFIT PLANS

The Company adopted a 401(k)-retirement plan effective April 1, 1998. All of the Company's employees who are at least 18 years of age are eligible at the beginning of the following month upon completion of 6 months of employment after their hire date to participate in a 401(k) profit sharing plan (the "Plan"). In most cases, qualified rollovers are accepted before an employee reaches eligibility. In 2019, eligible employees may make contributions up to the maximum limit of $ 19,000 for participants under the age of 50 and $ 25,000 for participants 50 and older. The Plan provides for matching contributions by the Company in an amount equal to the employee contributions for the first 3% of eligible contributions and 50% for the percentages 4 and 5 for a maximum of 4% employer matching. Employee contributions and employer matching contributions are invested in mutual funds. The total expense for employee retirement contribution plans for the year ended March 31, 2020 was $ 838,241(March 31, 2019 –$ 663,492).The amounts have been included in other selling, general and administrative expenses.

Ltd. for the years ended March 31, 2020 and March 31, 2019 were $ 111,336,054 and $ 140,761,608, respectively. The dealers of Mahindra USA Inc avail financing facility from Mahindra Finance USA LLC.

NOTE P – FINANCIAL INSTRUMENTS AND CONCENTEATION OF CREDIT RISK

Financial instruments that potentially subject the Company to significant credit risk consist principally of cash and accounts receivable. Risks associated with cash are mitigated by banking with financial institutions that management believes to be of high credit quality. The Company performs ongoing credit evaluations of its dealers and maintains reserves for potential credit losses. To date, such losses have been within management's expectations.

NOTE Q – RISK AND UNCERTAINTIES

The Company's future results of operations involve several risks and uncertainties.

Factors that could affect the Company's future operating results and cause actual results to vary materially from expectations include, competitive factors, including but not limited to pricing pressures; deterioration in general economic conditions; the Company's ability to effectively manage operating costs and increase operating efficiencies; declines in revenues; technological and market changes; the ability to attract and retain qualified employees and the Company's ability to execute on its business plan.

The extent of the impact of coronavirus (COVID 19) outbreak on operations of the Company will depend on future developments, including the duration and spread of the outbreak, related advisories and restrictions, government actions, the impact on financial markets and the overall economy, all of which are highly uncertain and cannot be predicted.

NOTE R – ASSEMBLY AND SERVICE AGREEMENT

The Company has entered into agreements with dealerships in Chattanooga, Bloomsburg, Lyons, Olivehurst and Adstock, Quebec. (collectively the "Assemblers" for the final assembly of tractors imported from various manufacturers overseas, including M&M. These agreements stipulate that assemblers are to assemble the tractors in accordance with procedures provided by the Company so that the tractors are ready for sale to dealers. The assemblers store inventory owned by the Company in a secure location.

The assemblers are paid based on a piecemeal basis at various rates depending on the respective model and related accessories. These rates are reviewed and negotiated at regular intervals.

The Company has closed its assembly facility in Lyons, Kansas during the fiscal year ended March 31, 2020. Additionally, the Company intends to close its assembly facility in Chattanooga,Tennessee in fiscal year 2021. The Company does not expect a material cost relating to the closure.

NOTE S – STOCKHOLDER'S EQUITY

Authorized common stock

The authorized common stock is 460,000,000 shares with a par value of $ 0.25 as at March 31, 2020.

Common stock issued

Common stock issued and outstanding as at March 31, 2020 was 456,000,000 shares at $ 0.25par value each. (March 31, 2019 – 456,000,000 shares of $ 0.25par value each.)

The Company issued 400,000,000 shares at $ 0.25 par value during the year ended March 31, 2019 to Mahindra and Mahindra Limited.

Voting

Each holder of common stock is entitled to one vote in respect of each share held by him in the records of the Company for all matters submitted to a vote.

Liquidation

In the event of liquidation of the Company, the holders of common stock shall be entitled to receive all of the remaining assets of the Company, after distribution of all preferential amounts, if any. Such amounts will be in proportion to the number of equity shares held by the shareholders.

NOTE T – SUBSEQUENT EVENTS

Subsequent events have been evaluated through May 20, 2020 which is the date the financial statements were issued. There are no material effects of the same on the financial statements as on March 31, 2020.

NOTE U – COMMITMENTS AND CONTINGENT LIABILITIES

The State of Texas conducted an audit of the Company's franchise tax returns for the years of 2008 through 2011. The results of the audit were issued in April 2013, and additional taxes were assessed. The Company requested judicial review of the findings noted by the State of Texas, and the State prevailed. The Company disagrees with the results of the audit and intends to vigorously challenge the amounts assessed. The Company has paid $ 654,060, which is inclusive of the penalty and interest under protest. This amount is recorded as an asset with an appropriate accrual for future tax liability in case of unfavorable verdict.

The Company is involved in various proceedings which are considered ordinary litigation incident to its business. In management's opinion, none of the current litigation will have a materially adverse effect on the Company's financial position.

As of March 31, 2020, the Company did not have any capital commitment outstanding.

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of
Mahindra México, S. de R. L. de C. V
(A 99% wholly owned Subsidiary of Mahindra USA Inc.)

Opinion

1. We have audited the financial statements of **Mahindra México, S. de R. L. de C. V.,** (the Company), which comprise the statements of financial position as of March 31, 2020, and 2019 the statements of income, statements of changes in Stockholders' equity and the related statements of cash flows for the years then ended as well the notes to the financial statements, including a summary of significant accounting policies.

2. In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of Mahindra Mexico, S. de R. L. de C. V as of March 31, 2020, and 2019, and its financial performance and its cash flows for the years then ended in accordance with Mexican Financial Reporting Standards (MFRS).

Basis for Opinion

3. We conducted our audits in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Mexico and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Matters

4. As mention Note 2 g) These financial statements are issued for legal and statutory purposes only seems they are stated in the recording currency of the Company, which is the Mexican Peso and have not been translated to its functional currency which is the USD in accordance with MFRS B-15 "Conversion of Foreign Currency's".

5. As mention Note 3 g) as of March 31, 2020 and 2019, the principal purchases was made by the Company with their related parties, which demonstrates a dependence on the supply of the products that Company commercialize, our opinion has not been modified in relation to this situation.

6. Management is responsible for the preparation and fair presentation of the financial statements in accordance with MFRS and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

7. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern including the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

8. Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements.

9. The objectives of our audits are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

10. As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

11. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR THEN ENDED AT MARCH 31, 2020 AND 2019

NOTE 1.- ACTIVITY OF THE COMPANY

Mahindra Mexico, S. de R. L. de C. V., (the Company) was incorporated on August 8, 2016 in accordance with Mexican law by public deed number 128,847 in México City, the Company's activities, among others: purchase and sale of all types of tractors, distribution, sale tools for transverse vehicles, as well as accessories and components.

Mahindra Mexico, S. de R. L. de C. V., is a 99% wholly owned subsidiary of Mahindra USA Inc. a company incorporated in the United States of America (USA).

NOTE 2.- BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS

a) The Authorization - On April 30, 2020, C.P. Juan Eduardo Mendez Enguilo, Accounting Manager, approved the issuance of the accompanying financial statements and related notes thereto. In accordance with the General Corporations Law and the bylaws of the Company the stockholders´ are empowered to modify the financial statements after issuance. The accompanying financial statements will be submitted to the next Stockholders' Meeting for approval. a) The Company prepares its financial statements in accordance with Mexican Financial Reporting Standards (MFRS) which are mandatory for all for-profitable entities. These financial reporting standards are issued by the Mexican Council of Financial Information Standards, A.C. (CINIF for its acronym in Spanish).

b) Monetary unit of the financial statements – financial statements and notes as of 31 March 2020 and 2019 and for the years then ended, include balances and transactions in Mexican pesos of different purchasing power.

c) The accumulated inflation of the three previous years at March 31, 2020, has been less than 26%, so in accordance with the Mexican Financial Reporting Standards, corresponds to a non-inflationary economic environment in both years and consequently, the effects of inflation are not recognized in the financial statements.

d) Use of estimates and judgments.- The preparation of financial statements requires Management to make a number of estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates and assumptions.

e) Statement of comprehensive income presentation

The Company presents comprehensive income in a single statement of net income entitled "Statement of Income" given that the Company did not generate Other Comprehensive Income (OCI) during the current year or the preceding year, which is presented for comparative purposes.

f) Statement of cash flows. The Company prepares this financial statement using the indirect method, the operating activities cash flows are determined based on utility or loss before tax income; This amount increased or decreased by the effects of the items associated with investment activities, financing activities and changes that have occurred in the period related to the working capital.

g) Functional and reporting currency. The aforementioned financial statements are presented in Mexican pesos reporting currency, which is the same as the local currency but different from the functional currency and were not remeasured or translated into the functional currency because, such financial statements are issued only for legal and tax purposes.

NOTE 3 .- SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies followed the Company in the preparation of these pre-operating stage financial statements, are in accordance with NIF, and are as follows:

a) Cash and cash equivalents -

Cash in banking accounts in Mexican pesos are expressed at their nominal value. The amounts of cash equivalents denominated in foreign currency are expressed at the current exchange rate.

b) Financial risk management -

The Company has exposure to the following risks arising from financial instruments:

- Credit risk
- Liquidity risk
- Market risk

Financial risk management policies

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company, through its procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

Credit risk

Accounts receivable, other accounts receivable and accounts receivable with related parties. The Company's exposure to credit risk maybe significant, however the credit policies do not permit ensure the costumers can pay.

Company has a credit policy this apply for each customer this establishing purchase limits, which represent the maximum open amount that does not require special approval. The Company has established criteria based on customer collection expectations to determine the creation of reserves for uncollectible accounts. Personnel from the Corporate Offices take part in the determination of the reservation.

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Company's approach to managing its liquidity consists of ensuring, insofar as possible, that it will have sufficient liquidity to settle its liabilities at the date of maturity, both in normal situations and in extraordinary conditions, without incurring unacceptable losses or jeopardize the reputation of the Company. The principal liabilities are with related parties. The corporative administration reviews the behavior of the operation in Mexico and determine if it should support liquidity.

Market risk

Market risk is the risk that changes in market prices – such as foreign exchange rates and interest rates will can affect the Company's income. Prices are determined by Corporate Administration and special discounts too. The corporative administration reviews the behavior of the operation in Mexico and determine if it should support liquidity.

Currency risk

The exchange rate risk arises when the Company carries out operations and maintains monetary assets and liabilities in currencies other than its functional currency. Corporate Administration periodically evaluate the effects and take action if its necessary.

Interest rate risk

Fluctuations in interest rates mainly impact the loans contracted by the Company, as well as long term Accounts Receivable. Management does not have a formal policy to determine how much of the Company's exposure should be at a fixed or variable rate. The principal issue is the interest rate associate with related with related parties' loans, "thin capitalization".

c) Accounts receivable and revenue recognition -

Sale of tractors and spare parts. The Company recognizes enforceable rights derived from the sale and transfer of the risks and benefits of products, which regularly happens to the delivery or shipment them to customers or related parties.

Revenue and receivables are recorded net of estimates for returns and doubtful accounts, respectively.

The Company have a politics to establish an estimate for credit losses in order to cover the balances of the accounts that are considered of doubtful collection taking into account the historical experience and the specific identification of the balances.

The Management in the main offices has evaluated the need to recognize and register a reservation on the discounts that are granted to the costumers when selling tractors used for the demonstration or those that are returned by the clients.

d) Inventories and cost of sales -

Inventories are stated at lower of cost and net realizable value. Cost is comprised of acquisition cost, import duties, transport, handling and storage cost. Cost of inventories (tractors) are determinate by using the identified cost method.

The Company have a politics to establish an estimate for obsolete inventory or damaged inventory. The basis for determine the estimate consider physical condition of the tractors and considering the historical sales experience.

e) Furniture equipment and depreciation -

Depreciation and amortization are calculated by the straight-line method based on estimated the useful lives of the assets, estimated by the Company:

	%
Equipment	10
Office equipment	10
Computer equipment	30

f) Lease -

The classification of leases as financial or operating depends on the substance of the transaction rather than the form of the contract.

Accounting policy that applied until December 31, 2018

Leases under which the Company assumes substantially all risks and rewards of ownership are classified as capitalizable leases. At the time of initial recognition, the leased asset is determined considering the amount that is lower between its fair value and the present value of the minimum payments of the lease. After initial recognition, the amount of the asset is modified in accordance with the accounting policy applicable to it.

Accounting policy that applies from January 1, 2019

The Company considers a lease to be operational when it does not transfer substantially all the risks and benefits inherent in the ownership of the underlying asset (asset subject to a lease, whose right of use has been granted by a lessor to a tenant).

Short-term leases and low-value asset leases

The Company has decided not to recognize right-of-use assets and lease liabilities for low-value assets and short-term leases. The Company recognizes the lease payments associated with these leases as an expense during the lease term.

g) Business concentration -

As of March 31, 2020 and 2019, the principal purchases was made by the Company with their related parties, which demonstrates a dependence on the supply of the products that Company commercialize, our opinion has not been modified in relation to this situation.

h) Accruals -

Are determined and recorded when the Company has a present obligation as a result of a past event, which is likely to result in the outflow of economic resources and which can reasonably be estimated.

i) Income Taxes -

Income Tax (ISR for its acronym in Spanish) is recorded in results in the year incurred. The deferred income tax is recognized under the asset and liability method.

Deferred tax is calculated by applying the corresponding rate to the temporary differences resulting from comparing the accounting and tax values of assets and liabilities, and if applicable, benefits from tax loss carryforwards and certain tax credits are included.

The deferred tax assets is recorded only when there is a high probability of recovery.

j) Prepaid expenses -

Mainly includes advances for the purchase of services that are received after the date of the statement of financial position and in the ordinary course of operations.

k) Foreign currency transactions -

Foreign currency transactions are recorded at the exchange rate at the date on which they are carried out. Foreign currency denominated assets and liabilities are stated in local currency at the current exchange rate at the closing date.

Foreign exchange differences resulting from exchange rate fluctuations between the dates on which transactions are carried out and the dates on which they are liquidated or valued at the balance sheet date are charged as income of the year.

Reimbursement agreement was agreed to facilitate the operations of the Company, on occasions which arise and which may be difficult to predict, it may be necessary or expeditious for MUSA to make financial expenditures on behalf of the Company.

On presentation by MUSA of a claim in this regard, presented with appropriate supporting documents, the Company have to pay such claim within 90 days of receipt of such claim. This transaction will not cause interest. Contracts between related parties are controlled from the Company's Corporate. Quotas between related parties are negotiated at the corporate level.

NOTE 11.- BENEFITS TO EMPLOYEES

The administrative and operational personnel services required by the Company are provided by a third party, consequently, it has no contingencies of labor order, social security contributions, or profit sharing to workers.

NOTE 12.- INCOME TAXES

Among the accounting and tax criteria there are items that cause that the real rate of income tax for the year is affected in relation to the rate that tax provisions are setting (30% 2019 and 2018).

The main differences between tax and accounting results are mainly due to different treatment of the effects of inflation for accounting and tax purposes, to the difference between the tax and book depreciation purposes.

Reconciliation of the legal Income Tax rate and the effective income tax rate is shown below:

Expense (benefit):

	2020	2019
