The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

Maturity profile of defined benefit obligation:

	2021	2020
Within 1 year	**2.91**	1.61
1 - 2 year	**3.89**	2.48
2 - 3 year	**5.03**	3.59
3 - 4 year	**7.44**	4.60
4 - 5 year	**22.80**	6.83
5 - 10 years	**141.99**	83.16

The weighted average duration of the defined benefit obligation as at March 31, 2021 is 16.95 years (March 31, 2020 is 17.6 years)

* Amount less than Rs. 50000

39 Leases

The details of additions, carrying value and depreciation on right to use assets held by the Company is given in Note No. 5.

Interest expenses on leases is Rs. 5.31 Lakhs for the year ended March 31, 2021 (Rs 3.10 Lakhs year ended March 31, 2020). Company incurred Rs. 113.09 Lakhs for the year ended March 31, 2021 (Rs. 51.20 Lakhs for year ended March 31, 2020) towards expenses relating to short-term lease and leases of low-value assets. Total cash outflow for leases is Rs. 139.62 Lakhs for the year ended March 31, 2021 (Rs. 45.27 Lakhs for the year ended Mar 31, 2020) including cash outflow for short term and low value leases.

40 The Company has used the principles of prudence in applying judgments, estimates and assumptions in significant areas like estimating the remaining useful life of the tangible and intangible assets, provision for warranties, projection used to test investments for impairment, fair valuation of financial assets and liabilities etc. Considering the continuing COVID-19 pandemic, the result in the upcoming period may significantly vary and may affect the recoverability of assets and liabilities, However, this will depend upon future developments including actions taken to contain or treat the disease and to mitigate its impact on the economy.

The Company based on internal and external sources of information up to the date of approval of these financial statements, has assessed that as a result of Covid-19 outbreak, there is no significant financial impact on the financial statements for the year ended March 31, 2021 as at the date of approval of these financial statements.

41 Previous year’s figures have been regrouped/reclassified wherever necessary

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF BSA COMPANY LIMITED

Opinion

We have audited the financial statements of BSA Company Limited (the 'company') for the year ended 31 March 2021 which comprise the profit and loss account, the balance sheet, the statement of changes in equity and notes to the financial statements, including significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including FRS 102 *The Financial Reporting Standard applicable in the UK and Republic of Ireland* (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

- give a true and fair view of the state of the company's affairs as at 31 March 2021 and of its loss for the year then ended;
- have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and
- have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the annual report other than the financial statements and our auditor's report thereon. The directors are responsible for the other information contained within the annual report. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon. Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the course of the audit, or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of our audit:

- the information given in the directors' report for the financial year for which the financial statements are prepared is consistent with the financial statements; and
- the directors' report has been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or
- the financial statements are not in agreement with the accounting records and returns; or
- certain disclosures of directors' remuneration specified by law are not made; or
- we have not received all the information and explanations we require for our audit; or
- the directors were not entitled to prepare the financial statements in accordance with the small companies regime and take advantage of the small companies' exemption in preparing the directors' report and take advantage of the small companies exemption from the requirement to prepare a strategic report.

Responsibilities of directors

As explained more fully in the directors' responsibilities statement, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities is available on the Financial Reporting Council's website at: https:// www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Extent to which the audit was considered capable of detecting irregularities, including fraud

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above and on the Financial Reporting Council's website, to detect material misstatements in respect of irregularities, including fraud.

We obtain and update our understanding of the entity, its activities, its control environment, and likely future developments, including in relation to the legal and regulatory framework applicable and how the entity is complying with that framework. Based on this understanding, we identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. This includes consideration of the risk of acts by the entity that were contrary to applicable laws and regulations, including fraud.

In response to the risk of irregularities and non-compliance with laws and regulations, including fraud, we designed procedures which included

- Enquiry of management and those charged with governance around actual and potential litigation and claims as well as actual, suspected and alleged fraud;
- Reviewing minutes of meetings of those charged with governance;
- Assessing the extent of compliance with the laws and regulations considered to have a direct material effect on the financial statements or the operations of the company through enquiry and inspection;
- Reviewing financial statement disclosures and testing to supporting documentation to assess compliance with applicable laws and regulation;
- Performing audit work over the risk of management bias and override of controls, including testing of journal entries and other adjustments for appropriateness, evaluating the business rationale of significant transactions outside the normal course of business and reviewing accounting estimates for indicators of potential bias.

Because of the inherent limitations of an audit, there is a risk that we will not detect all irregularities, including those leading to a material misstatement in the financial statements or non-compliance with regulation. This risk increases the more that compliance with a law or regulation is removed from the events and transactions reflected in the financial statements, as we will be less likely to become aware of instances of non-compliance. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members, as a body, for our audit work, for this report, or for the opinions we have formed.

NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 MARCH 2021

1 Accounting policies

Company information:

BSA Company Limited is a private company limited by shares incorporated in England and Wales. The principal place of business is Unit 14, HPL Prototypes Ltd, Birmingham Road, Allesley, Coventry, CV5 9QE.

1.1 Accounting convention

These financial statements have been prepared in accordance with FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" ("FRS 102") and the requirements of the Companies Act 2006 as applicable to companies subject to the small companies regime. The disclosure requirements of section 1A of FRS 102 have been applied other than where additional disclosure is required to show a true and fair view.

The financial statements are prepared in sterling, which is the functional currency of the company. Monetary amounts in these financial statements are rounded to the nearest £.

The financial statements have been prepared on the historical cost convention. The principal accounting policies adopted are set out below.

This company is a qualifying entity for the purposes of FRS 102, being a member of a group where the parent of that group prepares publicly available consolidated financial statements, including this company, which are intended to give a true and fair view of the assets, liabilities, financial position and profit or loss of the group. The company has therefore taken advantage of exemptions from the following disclosure requirements:

- Section 7 'Statement of Cash Flows': Presentation of a statement of cash flow and related notes and disclosures;
- Section 11 'Basic Financial Instruments' and Section 12 'Other Financial Instrument Issues': Interest income/expense and net gains/losses for each category of financial instrument; basis of determining fair values; details of collateral, loan defaults or breaches, details of hedges, hedging fair value changes recognised in profit or loss and in other comprehensive income;
- Section 26 'Share based Payment': Share-based payment expense charged to profit or loss, reconciliation of opening and closing number and weighted average exercise price of share options, how the fair value of options granted was measured, measurement and carrying amount of liabilities for cash-settled share-based payments, explanation of modifications to arrangements;
- Section 33 'Related Party Disclosures': Compensation for key management personnel.

The financial statements of the company are consolidated in the financial statements of Classic Legends Private Limited. These consolidated financial statements are available from its registered office, Mahindra Towers, P.K. Kurne Chowk, Worli, Mumbai - 400018.

1.2 Going concern

At the time of approving the financial statements, the directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future.The ongoing Covid-19 pandemic does not alter this expectation. The development of an electric motorcycle in the UK would be met through Capital infusion. Thus the directors continue to adopt the going concern basis of accounting in preparing the financial statements.

1.3 Turnover

Turnover is recognised at the fair value of the consideration received or receivable for goods and services provided in the normal course of business, and is shown net of VAT and other sales related taxes. The fair value of consideration takes into account trade discounts, settlement discounts and volume rebates.

1.4 Intangible fixed assets other than goodwill

Intangible assets acquired separately from a business are recognised at cost and are subsequently measured at cost less accumulated amortisation and accumulated impairment losses.

Intangible assets acquired on business combinations are recognised separately from goodwill at the acquisition date where it is probable that the expected future economic benefits that are attributable to the asset will flow to the entity and the fair value of the asset can be measured reliably; the intangible asset arises from contractual or other legal rights; and the intangible asset is separable from the entity.

Amortisation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Patents and licences: Straight line over 15 years

1.5 Tangible fixed assets

Tangible fixed assets are initially measured at cost and subsequently measured at cost or valuation, net of depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives on the following bases:

Fixtures, fittings & equipment: 25% reducing balance

1.6 Fixed asset investments

Interests in subsidiaries, associates and jointly controlled entities are initially measured at cost and subsequently measured at cost less any accumulated impairment losses. The investments are assessed for impairment at each reporting date and any impairment losses or reversals of impairment losses are recognised immediately in profit or loss.

A subsidiary is an entity controlled by the company. Control is the power to govern the financial and operating policies of the entity so as to obtain benefits from its activities.

1.7 Impairment of fixed assets

Where a reasonable and consistent basis of allocation can be identified, assets are allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

1.8 Cash and cash equivalents

Cash and cash equivalents are basic financial assets and include cash in hand, deposits held at call with banks, other short-term liquid investments with original maturities of three months or less, and bank overdrafts. Bank overdrafts are shown within borrowings in current liabilities.

1.9 Financial instruments

Financial instruments are recognised in the company's statement of financial position when the company becomes party to the contractual provisions of the instrument. The company considers all of its financial assets basic.

Financial assets and liabilities are offset, with the net amounts presented in the financial statements, when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis or to realise the asset and settle the liability simultaneously.

Basic financial assets

Basic financial assets, which include debtors and cash and bank balances, are initially measured at transaction price including transaction costs and are subsequently carried at amortised cost using the effective interest method unless the arrangement constitutes a financing transaction, where the transaction is measured at the present value of the future receipts discounted at a market rate of interest. Financial assets classified as receivable within one year are not amortised.

Classification of financial liabilities

Financial liabilities and equity instruments are classified according to the substance of the contractual arrangements entered into. An equity instrument is any contract that evidences a residual interest in the assets of the company after deducting all of its liabilities.

1.10 Leases

Rentals payable under operating leases, including any lease incentives received, are charged to profit or loss on a straight line basis over the term of the relevant lease except where another more systematic basis is more representative of the time pattern in which economic benefits from the leases asset are consumed.

1.11 Foreign exchange
Transactions in currencies other than pounds sterling are recorded at the rates of exchange prevailing at the dates of the transactions. At each reporting end date, monetary assets and liabilities that are denominated in foreign currencies are retranslated at the rates prevailing on the reporting end date. Gains and losses arising on translation in the period are included in profit or loss.

Notes forming part of the Financial Statements

NOTE 1 - GENERAL INFORMATION

Mahindra Two Wheelers Europe Holdings S.à r.l., hereinafter the "Company", was incorporated on December 2, 2014 as a "société à responsabilité limitée" for an unlimited period. The Company is organised under the laws of Luxembourg, in particular the law of August 10, 1915 on commercial companies, as amended.

The registered office of the Company is established in Luxembourg City and is registered at the Trade and Companies register in Luxembourg under the number B 192 444.

The financial year of the Company starts on April 1 and ends on March 31 of each year.

Object

The purpose of the Company is the acquisition of ownership interests, in Luxembourg or abroad, in any companies or enterprises in any form whatsoever and the management of such ownership interests. The Company may in particular acquire by subscription, purchase, and exchange or in any other manner any stock, shares and any other securities, including without limitation any bonds, debentures, certificates of deposit, trust units, any other debt instruments and more generally any securities and financial instruments issued by any public or private entity whatsoever, including partnerships. It may participate in the creation, development, management and control of any company or enterprise. It may further invest in the creation, acquisition and management of a portfolio of patents or any intellectual property rights of whatsoever nature or origin.

The Company may borrow in any form, except for borrowing from the public. It may issue notes, bonds, debentures and any other kind of debt and/or equity securities, including but not limited to preferred equity certificates and warrants, whether convertible or not in all cases. The Company may lend funds, including the proceeds of any borrowings and/or issues of equity/debt securities, to its subsidiaries, affiliated companies or to any other company. It may also give guarantees and grant security interests in favor of third parties to secure its obligations or the obligations of its subsidiaries, affiliated companies or any other company. The Company may further mortgage, pledge, transfer, encumber or otherwise hypothecate all or some of its assets.

The Company may generally employ any techniques and utilize any instruments relating to its investments for the purpose of their efficient management, including techniques and instruments designed to protect the Company against creditors, currency fluctuations, interest rate fluctuations and other risks. The Company may carry out any commercial, financial or industrial operations and any transactions with respect to real estate or movable property, which directly or indirectly, further or relate to its purpose.

The accounts of the Company are included in the consolidated accounts of Mahindra & Mahindra Limited, forming the largest body of undertakings of which the Company forms a part as a subsidiary undertaking. The registered office of that company is located at Gateway Building, Apollo Bunder, in Mumbai (400 001), where the consolidated financial statements are available.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of preparation

These annual accounts have been prepared in accordance with Luxembourg legal and regulatory requirements under the historical cost convention. Accounting policies and valuation rules are, besides the ones laid down by the law of December 19, 2002, as amended by the law of December 10, 2010 (the "Law"), determined and applied by the managers of the Company (the "Board of "Managers").

The preparation of annual accounts requires the use of certain critical accounting estimates. It also requires Management to exercise its judgement in the process of applying the accounting policies. Changes in assumptions may have a significant impact on the annual accounts in the period in which the assumptions changed. Management believes that the underlying assumptions are appropriate and that the annual accounts therefore present the financial position and results fairly.

The Company makes estimates and assumptions that affect the reported amounts of assets and liabilities in the next financial year. Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant accounting policies

The main valuation rules applied by the Company are the following:

Financial assets

Shares in affiliated undertakings are valued at purchase price including the expenses incidental thereto.

In the case of durable depreciation in value according to the opinion of the Board of the Managers, value adjustments are made in respect of financial fixed assets, so that they are valued at the lower figure to be attributed to them at the balance sheet date. These value adjustments are not continued if the reasons for which they were made have ceased to apply.

Debtors

Debtors are valued at their nominal value. They are subject to value adjustments where their recovery is compromised. These value adjustments are not continued if the reasons for which they were made have ceased to apply.

Foreign currency translation

The Company maintains its accounting records in Euro (EUR) and the balance sheet and the profit and loss accounts are expressed in this currency.

Transactions expressed in currencies other than EUR are translated into EUR at the exchange rate effective at the time of the transaction.

Cash at bank is translated at the exchange rate effective at the balance sheet date. Exchange losses and gains are recorded in the profit and loss account of the year.

In accordance with prudence principles found within generally accepted accounting principles in Luxembourg ("LuxGaap"), other assets are translated separately, at the lower of the value converted using the historical exchange rate and the value converted using the exchange rate at the balance sheet date. Conversely, other liabilities are translated separately, at the higher of the value converted using the historical exchange rate and the exchange rate at the balance sheet date. Consequently, both realised and unrealised exchange losses are recorded in the profit and loss account while exchange gains are recorded in the profit and loss account when realised only.

Where there is an economic link between an asset and a liability, these are valued in total according to the method described above and the net unrealised losses are recorded in the profit and loss account while the net unrealised gains are not recognised.

Prepayments

This asset caption comprises expenditures incurred during the financial year but relating to a subsequent financial year.

Creditors

Creditors are stated as their nominal value. Where the amount repayable on account is greater than the amount received, the difference is shown in the profit and loss account when the debt is issued.

Current tax provisions

Provisions for taxation corresponding to the tax liability estimated by the Company for the financial years for which the tax assessments have not yet been received are recorded under the caption "tax authorities". The advance payments are shown in the assets of the balance sheet under the caption "Other debtors", if applicable.

NOTE 3 - FINANCIAL FIXED ASSETS

a) The movements for the year are as follows:

	Affiliated undertakings		Total
	Number of Shares	Value of Shares EUR	EUR
	31/03/2021	31/03/2021	31/03/2021

Total	**–**	661.49

NOTE 9 - STAFF

There were no staff employed during the year (31/03/2020: nil).

NOTE 10 - TAXATION

The Company is subject to the general tax regulation applicable to all Luxembourg commercial companies.

NOTE 11 - OFF BALANCE SHEET COMMITMENTS AND CONTINGENCIES

The Company does not have any off balance sheet commitments or contingencies at the end of the financial year.

NOTE 12 - SUBSEQUENT EVENTS

In the first months of 2020, a pandemic of coronavirus disease 2019 (COVID-19) spread around the world, leading to numerous cases and casualties and causing an economic instability.

The company's operations have not been materially impacted by the COVID 19 pandemic and business continuity can be ensured.

However and whilst it too early to assess the future impact precisely, the current environment may lead to have an impact on the value of the participation in the next financial year.

INDEPENDENT AUDITORS' REPORT

Peugeot Motocycles S.A.S.

Registered office: 103 rue du 17 Novembre
25350 MANDEURE Share capital: €.4,993,360

Statutory Auditor's report on the financial statements

For the year ended December 31st, 2020

To the sole Shareholder,

Opinion

In compliance with the engagement entrusted to us by the Annual General Meeting, we have audited the accompanying financial statements of Peugoet Motocyles S.A.S. for the year ended December 31st, 2020.

In our opinion, the financial statements give a true and fair view of the assets and liabilities and of the financial position of the Company as at December 31th, 2020 and of the results of its operations for the year then ended in accordance with French accounting principles.

Basis for Opinion

Audit Framework

We conducted our audit in accordance with professional standards applicable in France. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Our responsibilities under those standards are further described in the *Statutory Auditor's' Responsibilities for the Audit of the Financial Statements* section of our report.

Independence

We conducted our audit engagement in compliance with independence requirements of the French Commercial Code (code de commerce) and the French Code of Ethics (code de déontologie) for statutory auditors rules applicable to us, for the period from January 1st, 2020 to the date of our report.

Justification of Assessments

Due to the global crisis related to the Covid-19 pandemic, the financial statements of this period have been prepared and audited under specific conditions. Indeed, this crisis and the exceptional measures taken in the context of the state of sanitary emergency have had numerous consequences for companies, particularly on their operations and their financing, and have led to greater uncertainties on their future prospects. Those measures, such as travel restrictions and remote working, have also had an impact on the companies' internal organization and the performance of the audits.

It is in this complex and evolving context that, in accordance with the requirements of Articles L.823-9 and R.823-7 of the French Commercial Code (code de commerce) relating to the justification of our assessments, we inform you of the following matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period.

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on specific items of the financial statements.

<u>Intangible and tangible assets' impairment</u>

Intangible and tangible assets, whose net value at year-end 2020 amounted to €. 1.520.549, are stated at cost value and impaired if their net realizable value is lower, as described in the Notes « 1. Règles et méthodes comptables », « 5. Immobilisations au 31 Décembre 2020 » and « 9. Provisions inscrites au bilan au 31 Décembre 2020 » to the financial statements.

On the basis of the information provided to us, our work consisted in assessing the data on which these values are based, in particular to review the discounted prospects of profitability of concerned activities and of achieving these goals, and to check the consistency of assumptions retained with forecasts based on the strategic business plans established for each activity and supervised by General Management.

<u>Inventories and receivables' impairment</u>

Your Company recognizes depreciations of its inventories and receivables according to the methods described in the Note « 1. Règles et méthodes comptables » to the financial statements.

We carried out the approach assessment of the Company Peugeot Motocycles S.A.S. as described in the Notes « 1.4. Stocks » and « 1.5. Créances » to the financial statements, based on information available up to date and performed tests to verify, using sampling techniques, the application of these approach.

<u>Provisions for risks and charges</u>

Your Company recognizes provisions to cover risks resulting for guarantees given to customers, as well as the costs of the restructuring plans and other risks, as described in the Note « 9. Provisions inscrites au bilan au 31 Décembre 2020 » to the financial statements.

We carried out the assessment of the approach of the Company Peugeot Motocycles S.A.S. as described in this Note to the financial statements, based on information available up to date and performed tests to verify, using sampling techniques, the application of these approach. We also have assessed the reasonableness of these estimates.

Specific Verifications

We have also performed, in accordance with professional standards applicable in France, the specific verifications required by French laws and regulations.

We have no matters to report as to the fair presentation and the consistency with the financial statements of the information given in the President's report and in other documents with respect to the financial position and the financial statements provided to the sole Shareholder calld to approve the financial statements.

We attest the fair presentation and the consistency with the financial statements of the information relating to payment terms, required under Article D.441-6 of the French Commercial Code (*Code de commerce*).

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of thefinancial statements in accordance with French accounting principles and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless it is expected to liquidate the Company or to cease operations.

The financial statements were approved by the President.

Statutory Auditor's Responsibilities for the Audit of the Financial Statements

Our role is to issue a report on the financial statements. Our objective is to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with professional standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As specified in Article L.823-10-1 of the French Commercial Code (code de commerce), our statutory audit does not include assurance on the viability of the Company or the quality of management of the affairs of the Company.

As part of an audit conducted in accordance with professional standards applicable in France, the statutory auditor exercises professional judgment throughout the audit and furthermore:

- Identifies and assesses the risks of material misstatement of the financial statements, whether due to fraud or error, designs and performs audit procedures responsive to those risks, and obtains audit evidence considered to be sufficient and appropriate to provide a basis for his opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtains an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the internal control.
- Evaluates the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management in the financial statements.
- Assesses the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. This assessment is based on the audit evidence obtained up to the date of his audit report. However, future events or conditions may cause the Company to cease to continue as a going concern. If the statutory auditor concludes that a material uncertainty exists, there is a requirement to draw attention in the audit report to the related disclosures in the financial statements or, if such disclosures are not provided or inadequate, to modify the opinion expressed therein.
- Evaluates the overall presentation of the financial statements and assesses whether these statements represent the underlying transactions and events in a manner that achieves fair presentation.

Schiltigheim, on the May 12th, 2021

Notes to Financial Statements

The information below forms the Notes to the Balance Sheet prior to the breakdown of the financial year ending 31st December 2020 which totals € 62,676,367, and to the Profit and Loss account that, under the form of a list, that shows a loss of € (5,299,097).

The financial statements cover the 12-month period from January 1st to December 31st, 2020.

The notes and tables N° 1 to 29 hereunder form an integral part of the annual financial statements.

1. Accounting rules and methods

The general accounting conventions below have been applied in accordance with the principle of prudence, and in compliance with legal and regulatory requirements in France and the basic assumptions that are intended to provide an accurate picture of the company :

- going concern,
- consistency of accounting methods from one period to the next,
- independence of financial years.

The annual accounts comply in particular with the provisions of the Accounting Standards Authority N°2016-07, dated 4th November 2016 and amending the regulation n°2014-03 relating to the General Chart of Accounts, approved by decree on 26 December 2016.

The basic method used when stating the value of items in the financial statements is the historical cost method.

The main accounting rules and methods used are the followings:

1.1. Tangible fixed assets

Tangible fixed assets are assessed at their acquisition cost (purchase price and incidental expenses), or at their production cost.

Interests on loans specifically for the production of fixed assets are not included in the assets production cost.

Expenses incurred in purchased of fixed assets are not included in the assets production cost.

Depreciation is recognized as an expense on a straight-line basis, based on the estimated useful life of each component, as described hereunder:

- Heavy component of industrial plants 40 years
- Buildings improvement 16 years
- Industrial equipment for production 16 years
- Machinery and tooling 16 years
- Specific machining equipment 16 years
- Specific tooling 6 years
- Die cast moulds 3 years

1.2. Intangible fixed assets

The intangible assets are assessed according to their acquisition cost (purchase price and related expenses).

The depreciation rules are applied according to the straight-line method following the useful lives below:

- Software: 1 year
- Leasehold right: non-depreciable
- Land: non-depreciable
- Business premises: non-depreciable

1.3. Participating, other long-term investments, short-term investments

The gross book value of long-term investments is their acquisition price, net of acquisition expenses. When their balance sheet value is less than their cost of acquisition, a provision for depreciation is set aside for the amount of the difference. The economic value of these stacks is estimated according to the relevant share acquired of the carrying value of net assets of the subsidiary.

1.4. Inventories

Inventories are measured using the Weighted Average Unit Cost method.

The gross value of goods and supplies includes the purchase price and the related expenses.

Manufactured goods are valued at production cost including supplies consumed, direct and indirect production expenses and allowances to depreciation of assets used in production. Idle capacity costs are excluded from inventories valuation.

Financial interests are always excluded from inventories valuation.

A provision for impairment is recorded based on the following modalities:

- Inventories amounting to over 1 year of consumption: 75%;
- Inventories amounting to over 3 years of consumption: 90%;
- Inventories related to the EURO 4 norm: 100%.

1.5. Receivables

Receivables are recorded at their nominal value. A provision for impairment is recorded when the fair value is lower than the net book value.

A factoring process is in place. The accounting processing of trade receivables transferred to the factor is mentioned in point 2.6 of these notes, related to significant events of this financial year.

1.6. Transactions in foreign currencies

Expenses and incomes in foreign currencies are accounted for their amount in euros to the date of the transaction.

Payables, receivables and cash in foreign currencies, are accounted at their fair value at closing date or at the guaranteed exchange rate if hedged.

1.7. Research and Development expenses

Research and Development expenses relating to new products or enhancement of existing products are included in the general expenses. In 2020, the amount was € 8,167 K.

Research & development has been significant in 2020 to prepare for the incoming EURO 5 norm for the European market. Emission levels have been lowered thanks to catalysts with an increased proportion of rare materials, and a new on-board diagnostic system « OBD2 ». Arrangements for the transition between EURO 4 and EURO 5 may allow to sell the remaining EURO 4 inventories. For the sake of prudence, these inventories have been impaired, as mentionned in point 1.4.

2. Significant events during financial year

Afin que le lecteur des comptes puisse porter un jugement avisé, les informations complémentaires suivantes sont données:

2.1. The company has initiated in July 2018 a rightsizing plan, validated in December 2018, providing for the departure of 102 employees and has also put in place an legal Employment Protection Plan. For this reason, the 2020 annual accounts present an extraordinary charges of € 3,748 K including payroll (€ 3,699 K) and other fees (€ 49 K). The provision covering the estimated costs of this plan, amounting to € 5,375 K at 31/12/2019, has been reversed for € 3,748 K and thus amounts to € 1,627 K at 31/12/2020; this amount will be used between 2021 and 2023 for the 22 remaining departures.

2.2. The goods coming from Asia and still in sea freight on 31/12/2020 (FOB) amount to 2 079 K€ .

2.3. A authorities have sent their first notifications following the tax audit related to financial accounts from 2015 to 2017. The impact of this audit are further mentioned in point 9.

2.4. The company decided to liquidate its Italian subsidiary in October 2019 and transfer the management of the Italian market to an exclusive retailer (GAM). Said liquidation was followed by the complete impairment of related assets (shares and trade receivables) in the Company's 2019 financial statements. In 2020, the Company decided to waive € 1,500 K of these receivables and to reverse their impairment by the same amount. At 31/12/2020, the remaining receivables amount to € 1,211 K, fully impaired.

2.5. Movements related to shareholder's equity are presented in point 8.

Until 31/12/2019, the company had adopted a non-deconsolidating presentation of receivables assigned to the factor. Following a review of the conditions of the factoring contract and the accounting rules applicable in this area, the company now presents a deconsolidating approach from the 31/12/2020 closing. For the sake of comparability of the accounts, the impacts on the 2019 accounts of this error correction are the following:

2019 financial statements	Original statements	Correction	Amounts after correction
Trade receivables (gross)	€ 21,703 K	€ (10,386) K	€ 11,317 K
Other liabilities	€ 13,248 K	€ (10.386) K	€ 2,862 K
Impairment of trade receivables	€ 5,826 K	€ (123) K	€ 5,703 K
Provisions for risks	€ 4,208 K	€ 123 K	€ 4,331 K

2.6. The full impairment of equity interests in the Chinese Joint-Venture have been fully reversed in 2020. Their net value rose from € 0 to € 6,836 K. This change is further detailed in point 9.

2.7. Considering the Covid 19 containment measures, the company has to close its factory from March 16th to May 11th. The support departments worked remotely for 50% during this period. The company used both the partial operation measures and paid vacation leave. R&D projects have also been suspended.

3. Going concern

During the year 2020, the company's activity remained loss-making, with a net loss of EUR 5.3 million.

Because of this deficit, and despite a recapitalization of 16,0 million euros by the sole shareholder in July 2020, the shareholder's equity of the Company are again negative at year end, of -13.3 million euros.

Financial debts reach 26.8 million euros at year end and are guaranteed by the sole shareholder. Accounts payable reach 28.7 million euros and include some overdue payments.

In a difficult 2020 health context, and a significant debt to the Joint Venture in China, a payment plan has been put in place throughout 2020. At the end of the year, the outstanding payments to the Chinese JV amounted to € 6.0m.

The company was supported by its parent company with a capital injection of € 16m in July 2020 and € 21m in February 2021, which allowed it to finance its activity and reduce its financial debts from € 24m at the end of 2019 to € 14.75m in February 2021 (€ 26.75m at end December 2020).

The consolidation of financial data in the new ERP will also have allowed for better control of the company's flows and working capital requirements despite significant activity in the last quarter of 2020 due to the shift in seasonality after the first confinement. The sole shareholder continues to guarantee the company's bank debt. The company has also been in contact with the state services to obtain support in the form of a loan within the framework of the FDES (Economic and Social Development Fund).

The discussions were not successful after analysis by the sole shareholder, but a moratorium was obtained in October 2020 on tax and social security debts by the Doubs Departmental Commission of Heads of Financial Services and Representatives of Social Security Bodies (CCSF) - confirmed in March 2021 with the implementation of a 24-month repayment plan.

In addition, the sole shareholder continues to support the company, notably through

- The guarantee of its bank debt,
- The commitment to continue its financial support to allow it to continue its activity. This support was confirmed in a post closing letter.

On this basis, taking into account the measures taken in terms of equity consolidation with, in particular, the new capital contribution from the sole shareholder at the beginning of 2021, which has led to a return to positive equity, an improvement in the cash position and a reduction in debt, as well as a more favourable short- and medium-term outlook, the 2020 annual financial statements have been prepared on a going concern basis.

4. Subsequent events following 31/12/2020

The global health crisis that impacted the company throughout 2020 continues into 2021 with shortages of certain materials/components and increased transportation costs in the first quarter as a result of the global economic recovery. In addition, during March 2021, the company is experiencing delivery delays due to the grounding of a ship in the Suez Canal. At this stage it is difficult to assess the situation of return to normal, which will depend on the needs of global freight.

The company has undertaken a cost overrun analysis and a recovery plan through vehicle price increases is being considered. The global shortage of semiconductors also reduces the company's visibility of the supply of these parts from suppliers. The peak season could be delayed by these supply issues and possibly the annual volume as envisaged could be reduced on an ad hoc basis (with a likely carry-over to subsequent years in a dynamic demand environment) in all our markets including China. The assessment is ongoing at the time of the 2020 closing.

The activity of the Mandeure plant was reduced at the beginning of 2021 due to the transition to the new € 5 standards for the Pulsion model and the reduction of the product portfolio compared to 2020. The company had to close the activity during the first quarter at a rate of one day per week with holidays and partial activity.

The company has obtained from the CCSF a deferment in March 2021 of its tax and social security debt as at 31 December 2020 and the debt of € 3.9 million will be deferred over a period of 24 months.

We inform you that the new curfew measures due to the health crisis have little impact on the company's activities. With regard to the new containment period starting on 6 April 2021, the company does not expect to be significantly impacted.

The sole shareholder recapitalized the Company to an amount of 21 million euros on 2021, immediately followed by a capital reduction of 37 million euros, as described in section 8.1.

Comment on tangible and intangible assets

A depreciation is recorded should the fair value of assets become lower than their book value.

Considering fair value at 31/12/2020, based on past performance and future cash-flow expectations, an extraordinary impairment has been recorded for several financial years to bring their net book value to zero.

At 31/12/2020, this total extraodinary impairment of tangible and intangible assets amounts to € 12,971,306.

Commentaires sur les immobilisations financières

Contribution to French social construction tax was made under the form of a loan of 73.228 €. The same contribution for 2021 will also be made under the form of a loan.6.

Mahindra Two Wheelers Europe S.à.r.l., sole shareholder of the Company, carried out a recapitalisation dated July 8th, 2020, increasing share capital to € 20,993,360, divided in 1,312,085 shares with an unchanged nominal value of 16 euros.

Shareholder's equity amounts to € (13,257,334) including the 2020 loss of € (5,299,097).

The sole shareholder then carried out another recapitalisation in 2021, for 21 million euros, immediately followed by a capital reduction of 37 million euros, bringing the share capital back to € 4,993,360.

8.2. Inception of the extraordinary result

As per the impaiment method described in point 5, an extraordinary impairment is recorded to bring the net book value of tangible and intangible fixed assets to zero (except for business goodwill and land).

The Company also waived a part of its receivables regarding its Italian subsidiary being liquidated. The impairment of said receivables has been reversed for the same amount (booked in operating result).

Comments on provision for warranties

As of 31/12/2020 the provision for warranties amounts to € 2,333 K. It is composed of a statistic provision on parts and labor for € 1,712 K and recall campaigns for € 622 K, pour un montant total de 622 K€ , corresponding to the estimate made by the Executive Management during accounts closing, based on data available at that time (list of vehicles involved, rate of return and potential cost of repairs), regarding the campaign launched end of 2017 and regarding an new campaign launched end of 2018.

Comments on provision for restructuring plan

This provision amounts to € 1,627 K as of 31/12/2020 following a reversal for € 3,748 K in 2020. It covers the commitment linked to the restrucuting plan initiated in July 2018 related to 102 possible net departures and the set up of a job preservation plan. Provision as of 31/12/2020 is based on information available to the management at the closing date.

The provision includes the estimated cost of the various measures : internal mobility, actions to restart a part of the operations, creation of new positions, efforts to make external mobility easier, support for business creation or takeover, training and retraining opportunities. It also includes the estimated cost of the dismissals, and the estimated cost related to economic revitalization commitments.

Comments on the provision for depreciation of tangible and intangible assets

See section 5 above.

Comments on the provision for miscellanous risks

The provision booked in 2019 for € 1,108 K to adress tax audit risks related to the 2015, 2016 and 2017 financial statements has been reversed for € 242 K, following the decision from tax authorities to abandon grievances related to VAT in intra-european sales. The provision represents the maximal risk according to information available at the closing date, and is mainly related to potential fines for insufficient justification of transfert pricing (€ 781 K). However, the Company is currently preparing new answers to tax authorities asking to lower these fines.

Comments on the provision for depreciation of equity interests

Equity interests of the Chinese Joint-Venture amount for a net book value of € 6,836 K as of 31/12/2020. They used to be impaired for 100%, starting from 2011. This depreciation has been completely reversed in 2020, following a change in evaluation. The new financial structure of the JV and its activity on its local market allowed its fair value to be estimated independently from the Company. The 2020 reversal is thus justified by the fair value of the Chinese JV as of 31/12/2020, valued by methods based on net assets and discounted cash-flows.

Equity interests of the Italian subsidiary, currently being liquidated, remain completely impaired.

Comments on the provision on trade receivables :

As mentioned in point 8.2 above, depreciation of trade receivables related to the PMI subsidiary has been partly reversed in 2020 (reversal being booked in operating result) for the amount of the waiver (booked in extraordinary result) accepted in 2020.

Changes in the presentation of factored receivables, as mentioned in point 2.6 above result in a lower impairment of trade receivables for € 487 K, and a new provision for risk for the same amount.

16. Deferred charges and income

As of 31/12/2020, deferred charges amount to € 3,834. There is no deferred income.

There were no deferred charges or income in the 2019 financial statements.

17. Turnover

Thanks to the deployment of the new ERP late 2019, trading operations have been isolated and the related inventories have been reclassified as trading goods as of 31/12/2019. However, due to the change in the information system, the Company can not distinguish trading from production operations for the whole 2019 financial year, be it for sales or for purchases.

Unrealised losses are covered by a provision for exchange rate included in the provisions for risks on the balance sheet.

22. Off balance sheet committments given

22.1. Retirement commitments

The Company provides the employees with retirement benefits and, under certain conditions, a minimum level of pensions. As of 31/12/2020, the estimated current value of future contributions amounts for € 2,452 K (€ 2,258 K as of 31/12/2019) related to retirement indemnities, € 1,079 K (vs. € 1,004 K) for additional pensions, and € 229 K (vs. € 220 K) for long-service awards. The amount related to long-service awards is the only one covered by a provision in the balance sheet.

This amount is covered for € 1,630 K (vs. € 1,647 K) by instalments to external funds. The main actuarial assumptions in the calculation of this value are a discount rate of 0.65%, and an inflation rate of 1.80%.

22.2. Other commitments given

NOTES FOR THE FINANCIAL YEAR 2019

1. General declarations

PEUGEOT MOTOCYCLES DEUTSCHLAND GmbH is located at 64546 Mörfelden-Walldorf, Kurhessenstraße 13. It is registered in the Commercial Register of the district court of Darmstadt under HRB 53925.

The PEUGEOT Motocycles Deutschland GmbH (PMD) fulfils the size criteria for a small corporation. The available annual financial statements have been prepared in accordance with §§ 242 et seq. and §§ 264 et seq. of the German Commercial Code (HGB), as well as with the relevant regulations pursuant to the German Limited Liability Companies Act.

The financial year is identical to the calendar year.

PMD is serving Germany and Austria markets since August 2018. Costs and revenues are combined and reflect the total cost and revenue situation for PMD. There are no separate statements for Austria only.

The income statement is prepared on a consistent basis as followed in the previous year (prepared according to the nature of expense method.)

2. Accounting and valuation principles

As in the prior year, the following accounting and valuation principles were applied when preparing the annual financial statements.

2.1. Fixed assets

Tangible assets are valued at acquisition cost less depreciation in accordance with their ex-pected useful life.

Since the financial year 2008, minor-value assets with acquisition cost of between € 250.00 and € 1,000.00 have been capitalized and written off at 20% of their acquisition cost p.a. over a period of five years. Minor-value assets with acquisition cost of less than € 150.00 are expensed in the year of purchase.

In the case of financial assets, the profit participation rights are valued at the lower of acquisition cost or fair value.

2.2. Inventories

Merchandise are valued at acquisition cost. Write-downs to the lower market value have been made where necessary.

2.3. Receivables, other assets and liquid funds

Receivables, other assets and liquid funds are stated at face value. Default risks associated with trade accounts receivable have been duly taken into account through provision at the balance sheet date.

2.4. Accruals

The accruals take into account all identifiable risks and uncertain liabilities; they are formed on the basis of estimates according to reasonable commercial judgement. There are no pension commitments and pre-retirement part-time working agreements.

2.5. Liabilities

Accounts payable are shown at their repayment value.

2.6. Currency translation

There are no assets/liabilities in foreign currency as at the balance sheet date. No transactions were undertaken in foreign currencies during the financial year.

3. Notes to the balance sheet

3.1. Receivables and other assets

As in the prior year, all receivables and other assets have a remaining term of less than one year.

Receivables from affiliated companies exist only towards the shareholder. These receivables don't include trade receivables.

3.2. Accruals

Other accruals in the amount of € 704k (prior year: € 976k) primarily comprise the following:

- Volume and loyalty bonuses for the dealership: € 530k (prior year: € 699k)
- Holidays not yet taken: € 18k (prior year: € 18k)
- Other personnel costs: € 59k (prior year: € 35k)
- Unpaid invoices: € 97k (prior year: € 98k)

3.3. Liabilities

As in the prior year, all accounts payable have a remaining term of less than one year. The liabilities are not secured.

4. Notes to the income statement

4.1. Sales revenue

The sales (€ 17.501k) are essentially attributable to the sale of scooters to dealers (€ 16.027k), as well as to the sale of spare parts (€ 1.474k).

4.2. Other operating income

Other operating income in the amount of € 53.3k primarily comprises charges to consumers for issuing copies of vehicle paperwork.

4.3. Income/expenses relating to other periods

The result for the financial year 2020 doesn't included income from reversing accruals.

Due to a tax audit for the fiscal years 2015 to 2018, we received taxes back from government in the amount of 49K€

5. Other declarations

5.1 Other financial commitments and contingent liabilities

The company has concluded leases and leasing arrangements. These commitments total € 132k as at the balance sheet date. A bank guarantee in the amount of € 23k exists to the benefit of the landlord. The advantage of leases and leasing arrangements lies in the optimization of liquidity. There are no identifiable significant risks.

5.2 Workforce

On average, the company employed 18 women and men in the financial year (prior year: 18).

5.3. Management

The company's managing directors in the financial year 2020 were:

- Mr. Jan Breckwoldt (Int. Diplom Betriebswirt (graduate in International Mangement)), Wiesbaden (Germany)
- Mr. Costantino Sambuy (CEO, Peugeot Motocycles S.A.S), Belfort (France)

Concerning the remuneration of the management the option permitted by § 286 (4) of the German Commercial Code (HGB) is exercised.

5.4. Parent company

PMD is a wholly owned (100%) subsidiary of **Peugeot Motocycles S.A.S, Valentigney Mandeure/France**, and included in their (sub-) consolidated financial statements. The company belongs to the group **Mahindra & Mahindra Limited, Mumbai/India**, which prepares the consolidated financial statements.

These consolidated financial statements are available at the companies' head office & at the corporate website.

Mörfelden-Walldorf, March 31, 2021

Jan Breckwoldt

REPORT BY THE INDEPENDENT AUDITING FIRM

Pursuant to art. 14 Of legislative decree no. 39 Of 27 january 2010

PEUGEOT MOTOCYCLES ITALIA S.R.L.

In liquidation interim liquidation financial statements as at 31 december 2020

REPORT BY THE INDEPENDENT AUDITING FIRM ON THE INTERIM LIQUIDATION FINANCIAL STATEMENTS AS AT 31 DECEMBER 2020

To the Shareholders of Peugeot Motocycles Italia S.r.l. in Liquidation

Report on the auditing of the interim liquidation financial statements

Opinion and findings

We have audited the Interim liquidation financial statements of Peugeot Motocycles Italia S.r.l. in liquidation (the Company), drawn up according to the dispositions of art. 2435-bis of the Italian Civil Code and constituted by the balance sheet and income statement for the financial year closed on said date and the explanatory notes.

We are unable to express an opinion on the initial balances, referable to 2019, which were audited by another Independent auditing firm, which, on 13 October 2019, stated that It was impossible to express an opinion regarding the financial statements as at that date; see the considerations contained therein for details.

In our opinion, taking into account that stated in the paragraph entitled “elements on which the opinion and findings are based”, the annual financial statements provide a truthful and correct representation of the economic, equity and financial situation of the Company as at 31 December 2020, the economic result and the cash flows for the year closed on said date in compliance with the Italian laws on the criteria for preparation.

Elements on which the opinion and findings are based

We acknowledged that the sole Statutory Auditor stated in their own report on the financial statements as at 31 December 2019, which see, that the accounts administration system had some shortcomings. We would observe that, during the current year, the business of the company essentially Involved receipts and payments without any other significant business activities being carried out. In this context, the audit conducted on the substance of the balances, albeit with the limitations described, were not under the same circumstances as those in the previous year.

The trade receivables, net of the provision for bad debts, amounted to 0.4 million Euros and represent 45% of the total assets, and we would confirm that for some of these receivables, we were unable to verify the initial balance. However, the clients, with instalment plans ongoing, which amount to an overall total of 0.2 million euros, represent 49% of the net balance of the trade receivables as at 31 December 2020 and further agreements are currently being finalised with delayed payments that in fact neutralise the difficulties in identifying certain initial balances in the receivables.

We would also point out that the provision for bad debts was increased in past years through the reclassification of the payables no longer due, without passing through the corresponding items In the income statement. During the current year, the Company has allocated a further 0.5 million, recorded in the income statement, to realign the receivables to their presumable realisation value.

The overall total of the payables amounts to 1.3 million Euros, and of this, approximately 91% is represented by the payables to the reference Shareholder, totalling 1.2 million Euros. It was not possible to verify the initial balances of some of the payable Items, but the Liquidator has stated that, as of the date of Issue of our report, approximately 16% of the payables had been extinguished.

The considerations made highlight that there are problems which must be properly dealt with so as to remove the uncertainties highlighted which, although significant, are defined as non-pervasive, given the reduced impact on the financial statements in overall terms.

Informative notes

The effects of the SARS-COv-2 pandemic could, as stated by the Liquidator, have effects that are currently difficult to quantify, also as regards the instalment plans agreed to with certain debtors.

In the explanatory notes, which see, the Liquidator states that as a result of the status of liquidation, there is no longer a presupposition of business continuity and there are objective uncertainties as regards the possibility of realising some of the items in the assets, the arising of other liquidation charges and any eventual capital gains.

In this regard, our opinion is expressed without additional findings.

Other aspects

The sole Shareholder has stated, as described In the explanatory notes, which see, that it would be willing for some of its receivables to be considered as financial receivables and would also be willing to make further allocations, should this be deemed necessary by the Liquidator, in order to support the activities that the latter has undertaken to complete their mandate.

This ascertainment constitutes an exclusive power of the Liquidator, and therefore, on the basis of our duties, this aspect does not require our assessment.

The auditing of the accounts was carried out in the context of the situation created by the spread of the health emergency known as the COVID 19 pandemic and the related measures, including those restricting circulation, emanated by the Italian government to protect the health of its citizens. Consequently, as a result of objective situations - classifiable as force majeure - the auditing procedures envisaged by the reference professional standards have been carried out in the framework (i) of a remodelled staff organization and (ii) of different approach methods with the corporate referents and consequently of collecting the probatory elements required. The collection of information was, unless otherwise possible, carried out through the use, in the main part, of documentation in electronic format sent to us using distance communication techniques.

Responsibility of the Liquidator for the intermediate liquidation financial statements

The Liquidator is responsible for the preparation of the interim liquidation financial statements and ensuring that they provide a truthful and correct representation in compliance with the Italian laws governing the criteria for preparation and within the terms envisaged by the law as regards the internal auditing aspects deemed necessary to enable the preparation of financial statements that do not contain significant errors due to fraud or unintentional conduct or events.

Responsibility of the independent auditing firm for auditing the interim liquidation financial statements

Our objectives are to acquire a reasonable level of certainty that the annual financial statements in overall terms do not contain significant errors due to fraud or unintentional conduct or events, and to issue an auditing report which includes our opinion. Reasonable certainty is intended as being a high level of certainty which, however, does not provide the guarantee that an audit carried out In compliance with the international auditing standards (ISA Italia) always identifies significant errors, should there be any. Errors may derive from fraud or unintentional conduct or events and are considered to be significant when it can reasonably be expected that, either individually or together, they may be capable of influencing the economic decisions taken by the users on the basis of the annual financial statements.

During the audit carried out in compliance with the international auditing standards (IAS Italia), we used our professional judgement and maintained a certain level of scepticism for the duration of the audit. Furthermore:

- we identified and assessed the risks of significant errors in the interim liquidation financial statements due to fraud or unintentional conduct or events; we defined and carried out auditing procedures in response to such risks; we acquired sufficient and appropriate probatory elements on which to base our opinion. The risk of not identifying a significant error due to fraud is higher than the risk of not identifying a significant error due to unintentional conduct or events, given that fraud may imply the existence of collusion, falsification, intentional omissions, misleading representations or forcing the internal audit procedure;
- we acquired an understanding of the internal audit relevant in terms of auditing the accounts in order to define auditing procedures appropriate to the circumstances and not express an opinion on the effectiveness of the Company's internal auditing procedure;
- we assessed the appropriateness of the accounting standards used and the reasonableness of the accounting estimates made by the Liquidator, including the relative disclosure;
- we assessed the presentation, structure and contents of the annual financial statements in overall terms, including disclosure, and whether the interim liquidation financial statements represent the underlying operations and events so as to provide an accurate representation and ensure that our opinion does not derive, as stated in the paragraph "elements on which the opinion and findings are based", from errors still present in the financial statements, even if not considered pervasive as a result of the actions of the Liquidator.

We have informed the Liquidator of the range and planned timeframe of the audit and the significant results that emerged, including any significant shortcomings in internal auditing identified during the course of the auditing of the accounts.

We are independent with respect to the Company in compliance with the laws and standards concerning ethics and independence applicable in Italian law to the auditing of financial statements.

Rome, 29 March 2021
RB Audit Italia
Mr. Roberto Mallardo - Partner

PROFIT AND LOSS ACCOUNT

		12/31/2020	12/31/2019

Notes to the Financial Statement, assets

Fixed Assets

Variation of fixed assets

Details of fixed assets are provided, information that will be better defined later in this Note.

	Tangible assets	Total fixed assets
Opening Balance		
Cost	1,78,028	1,78,028
Amortizations (Amortization Fund)	1,78,028	1,78,028
Book value of the end of the year		
Cost	1,78,028	1,78,028
Amortizations (Amortization Fund)	1,78,028	1,78,028

Tangible assets

Variation of tangible assets

	Tangible assets	Total fixed assets
Opening Balance		
Cost	1,78,028	1,78,028
Amortizations (Amortization Fund)	1,78,028	1,78,028
Book value of the end of the year		
Cost	1,78,028	1,78,028
Amortizations (Amortization Fund)	1,78,028	1,78,028

Current assets

Inventories

Balance as of 31/12/2020	Balance as of 31/12/2019	Variations

The value of inventories recorded, gross of the provision for obsolescence, amounting to Euro 80,961 is entirely written off by the provision for obsolescence itself.

There were no changes in the inventories and related provisions during the year.

Current receivables

Balance as of 31/12/2020	Balance as of 31/12/2019	Variations
6,13,229	25,25,213	(19,11,984)

The reduction of receivables is due in part to the collection of receivables following the collection activities carried out in 2020 and partially (Euro 500,000) to the provision made necessary following a more detailed analysis of the status of receivables.

Variations and expiration of receivables included in current assets

	Opening balance	Change in the year	closing balance	Due within one year
Towards customers	22,97,939	(18,81,517)	4,16,422	4,16,422
Tax receivables	80,700	79,060	1,59,760	1,59,760
Other trade receivables	1,46,573	(1,09,527)	37,046	37,046
Total outstanding trade receivables	**25,25,213**	**(19,11,984)**	**6,13,229**	**6,13,228**

Partition of trade receivables by geographical area

The distribution of trade receivables at 31/12/2020 according to geographical area is summarized in the following table.

Region	Italy	ExtraEU	Total
Trade receivables to customers enrolled in the current asset	4,16,222	200	4,16,422
Tax receivables enrolled in the current asset	1,59,760	–	1,59,760
Other trade receivables	37,046	–	37,046
Total outstanding receivables	**6,13,028**	**200**	**6,13,229**

The adjustment of the face value of the receivables was achieved through the appropriate credit write-down fund, which underwent the following adjustments during the year:

Description	Depreciation fund pursuant to article 2426 of the Italian Civil Code	Total
Balance at 31/12/2019	11,25,700	11,25,700
Use in the year	1,77,775	1,77,775
Operating provision	5,36,637	5,36,637
Balance at 31/12/2020	**14,84,562**	**14,84,562**

The provision was necessary as a matter of prudence in view of the recovery trend of receivables. Also in light of the first 2021 quarter and of the settlement finalized the liquidator believes that the Company is able to recover receivables from customers equal to the net exposure as of 31 December 2020.

The provision for the year, for the portion exceeding the limits allowed for tax purposes, is taxed.

Financial assets that do not constitute fixed assets

Variations in financial assets that do not constitute fixed assets

Balance at 31/12/2020	Baance at 31/12/2019	Variations
1	271	(270)

The only holding still in the portfolio is the one related to 100% of the share capital of PMTC Engineering registered for Euro 1, taking into account:

- the continuation of PMTC Engineering's activity within the Mahindra Group under the direction and coordination of PMTC, the Company's Sole Shareholder;
- the ownership of engine testing machines available only to few companies in the world;
- the value of the net worth of Euro 1,261,036 emerging from the financial statements at March 31, 2020 approved on May 6, 2020;
- there are no potential liabilities that could affect the Company's Financial Statements;

the Liquidator deemed appropriate not to liquidate that share since there is a pending transfer to the Sole Shareholder PMTC or a sale to third parties at values that will be determined during the 2021 financial year on the basis of a special expert opinion. Despite significant operating losses during the triennium 2019 – 2021 also due to high depreciations, a transfer price is expected to exceed the value of Euro 1.

	Opening balance	variations in the fiscal year	Closing balance
Not fixed shareholdings in subsidiaries	1	–	1
Other not fixed shareholdings	270	(270)	–
Total Financial assets that do not constitute fixed assets	**271**	**(270)**	**1**

Liquid assets

Balance at 31/12/2020	Baance at 31/12/2019	Variations
340,468	468,163	(1,27,695)

	Opening balance	Variation in the year	Closing balance
Bank and postal deposits	4,68,163	(1,27,695)	3,40,468
Total cash	**4,68,163**	**(1,27,695)**	**3,40,468**

The balance reflects the cash-in-hand, cash-at-bank and cash equivalents at the year-end.

Accrued income and prepaid expenses

Balance as of 31/12/2020	Balance as of 31/12/2019	Variations
1,500		1,500

They measure income and expenses whose accrual is in advance or in arrears with respect to the monetary and/or documentary event. They do not take into account the date of payment or collection of the related income and expenses, which are common to two or more financial years and can be spread over time.

As of 31/12/2020, there are no accruals or deferrals with a duration of more than five years.

	Opening balance	Change in the year
Accrued, deferred and estimated amounts.	1,500	1,500
Total accrued, deferred and estimated amounts.	**1,500**	**1,500**

Abbreviated note, liabilities and equity

Equity

Balance at 31/12/2020	Baance at 31/12/2019	Changes
(4,90,449)	(13,59,594)	8,69,145

The Liquidator, following a careful evaluation of the in bonis management of the liquidation and, in the view of the payment of Euro 1,500,000 to cover losses through a pro-quota waive of its trade receivable during 2020 and, considering the availability of the Sole Shareholder to waive its credit in order to cover losses that might be detected at the end of the procedure, did not deem necessary to activate any emergency procedure for the restoration of the same under Articles 2482 bis and ter of the Italian Civil Code.

Variation in Shareholders' equity items

	Opening balance	Allocation of previous year's result	Other variations		Operating income	End-of-year value
		Other allocations	Increasings	Decreasings

Formation and use of net worth items

As required by art. 2427, paragraph 1, number 4) of the Civil Code provides information on the training and use of net worth items:

	Share Capital	Legal reserve	Riserves	Operating income	Total
At the beginning of the previous year	2,64,000	26,760	(4,561)	(1,32,803)	1,53,396
Other variations					
- Decreasing			2,32,804	12,80,186	15,12,990
Result of the previous fiscal year				(14,12,989)	
At the end of the previous fiscal year	2,64,000	26,760	(2,37,365)	(14,12,989)	(13,59,594)
Other variations					
- Increasing			15,00,000	8,21,006	23,21,006
- Decreasing		26,760	13,86,230		14,12,990
Result of the current fiscal year				(6,30,855)	
At the end of the fiscal year	**2,64,000**		**(1,23,594)**	**(6,30,855)**	**(4,90,449)**

Funds for risks and charges

Balance as of 31/12/2020	Balance as of 31/12/2018	Variations
93,357	1,32,500	(39,143)

	Other funds	Total funds for risks and charges
Opening balance	132,500	132,500
Changes in the year		
Other variation	(39,143)	(39,143)
Total variation	(39,143)	(39,143)
Closing value	**93,357**	**93,357**

Funds include

i. fund for the prize competition accrued in the fiscal year for Euro 13,700;

ii. the litigation risk fund for Euro 5,000,

iii. fund for liquidation costs for Euro 74,657.

The value of this last item was reduced of Euro 25,433 considering its use in the procedure.

During the fiscal year 2014, PMI was sued by Piaggio for alleged violations of the Italian components of European and Italian Piaggio patents, with particular reference to the Metropolis scooter. After a long investigation phase, the CTU definitively pronounced on May 1, 2017, claiming that only one of the European patents indicated by Piaggio would have been "violated by the Metropolis scooter". The Court of Milan subsequently ruled in favor of PMI in the related judgment, which was appealed by Piaggio and is currently pending before the Milan Court of Appeal.

Due to the letter of indemnity received from the Sole Shareholder confirming to hold the Company harmless for any potential loss deriving from the pending judgment, including attorney's fees, and that the entire Mahindra Group is also expressly indemnified by PSA for any loss arising from the dispute with Piaggio pursuant to of the agreement of 2014 through which the scooter branch of the Peugeot group was sold by PSA to the Mahindra Group, the Liquidator deemed appropriate not to allocate any fund.

The legal dispute fund of the Euro 5,000 is due to the claim of Mr. Pasquale Domenico Belcastro, who appealed before the Court of Crotone against his dismissal in 2019. Although the claims seams groundless, the Company has prudently allocated a fund for Euro 5,000 in relation to the costs of the judgment. Such allocation has been confirmed to be appropriate by the lawyer in charge of the litigation.

Account payable

Balance at 31/12/2020	Baance at 31/12/2019	Changes
13,52,290	42,20,741	(28,68,451)

Variations and expiration date of payables

Payables' expiration date is divided as follows:

	Opening balance	**Change in the year**	**Closing balance**	**Due within the year**
Accounts payable to other financings institutions	26,400	(26,400)	–	–
Down payments	1,490	(1,490)	–	–

Tax losses relating to previous years were realized in the 2019 financial year in the amount of € 770,031 in the pre-liquidation period from 01/01/2019 to 16/12/2019 and € 151,932 in the post-liquidation period from 17/12/2019 to 31/12/2019

Abbreviated note, other information

Employment data

The Company has no employees in force.

Compensation, advance payments and receivables – due within one year granted to directors and mayors and commitments made on their behalf

	Directors	Auditors
Compensation	34,320	3,708

Compensation to the independent auditor

Pursuant to the law, the fees for the year for services rendered by the statutory auditor / or the statutory auditing firm and by entities belonging to its network are shown in the following table:

	Value
Statutory audit of annual accounts	6,000
Total fees payable to the statutory auditor or audit firm	**6,000**

Details of other financial instruments issued by the company

Information on the fair value of derivative financial instruments

The company has no derivative financial instruments.

Information about related party operations

The company did not enter into any transactions with related parties, except for the payment of past invoices to the sole shareholder Sole Shareholder PMTC S.A.S.

During 2020, the Receivable of the Sole Shareholder Peugeot Motocycles S.A.S went from Euro 3,325,404 at 31 December 2019 to Euro 1,210,659 as a result of the following reasons:

A. Payment of € 1,500,000 to cover losses and related compensation;

B. Offsetting of mutual receivables for € 44,411;

C. Payments from PMI to PMTCE for PMTC's receivables of Euro 89,340;

D. Payments from PMI to PMTC for Euro 480,994.

Information about non-balance sheet agreements

The Company has no agreements in place that do not result from the Balance Sheet.

Information on major events after the end of the financial year

The collections recorded in the first quarter of 2021 and the execution of new settlement agreements with customers for the recovery of receivables in instalments confirm the positive trend that allows the Liquidator to believe that the net receivable from customers can be recovered in 2021 or at the latest in the first months of 2022.

In the first quarter of 2021, the prize competition was completed in accordance with the law, for which the Liquidator had set aside a provision that proved sufficient to fulfil all of the Company's commitments.

As regards the provisions of the Covid-19 protocol of 14 March 2020 and subsequent amendments and additions, since there have been no employees since 1 1 January 2020, and the registered office has been transferred to the Liquidator's office, it was not necessary to adopt specific measures for the Company.

In relation to the provision referred to in art. 1, paragraph 125, of Law 124/2017, concerning the obligation to give evidence in supplementary note of the sums of money possibly received in the year by way of subsidies, contributions, paid assignments and in any case economic benefits of any kind by the public administrations and persons referred to in paragraph 125 of the same article, the Company states that it has not received any sum in that capacity.

Profit target or loss hedging proposal

It is proposed to the Shareholders' meeting for the result for the year to be allocated as follows:

Result of Financial year at 31/12/2020	**Euro**	(6,30,855)
Full coverage of the 2020 loss through pro-rata use of the payment to cover losses	Euro	(6,30,855)

Dear Sole Shareholder

I hereby propose you to approve these financial statements as a whole and the individual entries, and I renew my request to cover the loss with the available reserves up to the amount of EUR 869,145 and to carry forward the amount of EUR 654,450.

I renew my request to cover the loss with the available reserves up to the amount of EUR 869,145 and to carry forward the amount of EUR 654,450.

These notes have been drawn up in accordance with the provisions of the Italian Civil Code and accounting principles. In order to comply with the obligations of publication in the Register of Companies, once approved, it will be converted into XBRL format; therefore, some formal changes may be made in order to make these notes compatible with the filing format.

These financial statements, consisting of the Balance Sheet, Income Statement and Notes to the Financial Statements, give a true and fair view of the financial position and results of operations for the year and correspond to the accounting records.

The Liquidator
Antonio Dis

AUDITOR'S REPORT

To the Shareholder of the Company PMTC ENGINEERING S.r.l.

Voluntary Audit Report Limited to the Financial Statements

Opinion

We have conducted a voluntary audit limited to the attached financial statements for PMTC ENGINEERING S.r.l. (the Company), which comprise the Balance Sheet for the year ending 31 March 2021, the Profit and Loss Account for the year ending on the same date and the Explanatory Notes to the Financial Statements.

In our opinion, taking into account the fact that the Financial Statements for the year ending 31 March 2021 are a voluntary limited audit, the matters discussed in the paragraph on disclosure give a true and fair view of the Company's financial position, the results of its operations and its cash flows for the year ending on the same date in compliance with the Italian provisions governing the criteria for their preparation.

Basis for our opinion

We have conducted our voluntary limited audit in accordance with International Standards on Auditing (ISA Italy). Our responsibilities under those standards are further described in the section Independent Auditors' Responsibilities for the Voluntary Auditing of the Financial Statements indicated in this report. This is restricted to the fact that this is a voluntary, limited audit and that the Board of Statutory Auditors is responsible for conducting the statutory audit. In accordance with the rules of ethics and the rules and principles on independence applied by Italian law to the auditing of financial statements, we are independent of the Company. We believe that we have obtained sufficient and appropriate evidence on which to base our opinion.

The Directors' and the Board of Statutory Auditors' responsibility for the financial statements

Within the limits of the law, the directors are responsible for drafting financial statements that give a true and fair view, in accordance with the provisions of Italian law governing the criteria for the drafting thereof, and for conducting those internal checks required for drafting financial statements free from material misstatements, whether due to fraudulent or unintentional conduct or events. The directors are responsible for assessing the Company's ability to continue as a going concern. In preparing the financial statements, they are also responsible for the appropriateness of the use of the going concern assumption, as well as for making adequate disclosures in relation thereto. Directors use the accounting going concern basis when preparing financial statements unless they are of the opinion that there are the conditions for winding up the Company or discontinuing operations or they have no realistic alternative to those choices. The Board of Statutory Auditors, which carries out the statutory audit, is also responsible for supervising, within the terms of the law, the process of preparing the Company's financial reports.

Auditor's responsibility for the voluntary audit limited to the financial statements

Our objectives are to obtain reasonable assurances, within the limits of our work, that the financial statements taken as a whole are free from material misstatements, whether due to fraudulent or unintentional conduct or events, and issue a limited, voluntary, non-statutory audit report that includes our opinion.

Disclosure

The sole shareholder, Peugeot Motocycles Italia S.r.l., has been placed in voluntary liquidation. The continuation of the assumption of business continuity for PMTCE is linked to the support that PMTCE or its shareholders will be able to provide, who shall conduct all of the necessary activities, including ones of a financial nature, so as to allow the cost rationalisation phase to be completed and all of the stakeholders to be satisfied.

Other information

This voluntary, limited audit report has been issued for the purpose of providing information to Peugeot Motocycles S.A. Therefore, this non-statutory report cannot be used for any other purpose and cannot be distributed to others without our consent.

NOTES TO THE FINANCIAL STATEMENTS AT 31/03/2021

Notes to the accounts, initial part

Dear Shareholders,

These financial statements, submitted for your examination and approval, show a profit (loss) for the year of EUR (446,053).

Area of Business

Your company, as you know, is active in the production of motorbikes.

Major events occurred during the company's fiscal year

With a view to simplifying and streamlining decision-making processes, the Shareholder decided to transform the company into a limited liability company.

Layout criteria

These financial statements have been drawn up in an abbreviated form as they meet the requirements of Article 2435 bis, paragraph 1 of the Italian Civil Code; therefore, the Report on Operations has not been prepared. To complete the necessary information, it should be noted that, pursuant to Article 2428, points 3) and 4) of the Italian Civil Code, the company does not hold any of its own shares or shares or shares in parent companies, including through trust companies or third parties, and that neither its own shares nor shares or shares in parent companies were purchased and/or sold by the company during the year, including through trust companies or third parties.

Balance sheet values are represented in Euro units by rounding off the relative amounts. Any rounding differences have been reported under the item "Euro rounding reserve" included in Shareholders' Equity and "Euro rounding" under "Extraordinary income and expenses" in the Income Statement.

Pursuant to Article 2423, paragraph 5 of the Italian Civil Code, the notes to the accounts have been drawn up in Euro units.

The criteria used in the preparation and measurement of the financial statements for the year ended 31/03/2021 take into account the changes introduced into national law by Legislative Decree 139/2015, through which EU Directive 34/2013 was implemented.

As a result of Legislative Decree 139/2015, the OIC national accounting standards were amended.

Drafting principles

The valuation of the items in the financial statements has been made on the basis of the general criteria of prudence and competence, with a view to the continuation of the business.

The application of the principle of prudence entailed the individual valuation of the components of individual items or items of assets or liabilities, in order to avoid offsetting losses that had to be recognised and profits that had not to be recognised because they had not been realised.

In accordance with the accrual principle, the effect of transactions and other events has been recognised in the accounts and attributed to the year to which these transactions and events relate, and not to the year in which the related cash movements (receipts and payments) occur.

In application of the principle of materiality, recognition, measurement, presentation and disclosure requirements have not been complied with when their observance was immaterial for the purpose of giving a true and fair view. The continuity of application of the valuation criteria over time is a necessary element for the comparability of the company's financial statements over the years.

The recognition and presentation of items in the financial statements has been made taking into account the substance of the transaction or contract.

Exceptional cases pursuant to Article 2423(5) of the Civil Code

There were no exceptional cases that made it necessary to resort to derogations pursuant to Article 2423, paragraph 5 of the Italian Civil Code.

Valuation criteria applied

Fixed assets

Intangible assets

They are recorded at historical acquisition cost and shown net of depreciation charged directly to individual items over the years.

Start-up and expansion costs and development costs with a multi-year useful life have been capitalised with the consent of the Board of Auditors. Start-up and expansion costs are amortised over a period not exceeding five years Development costs have been systematically amortised according to their useful life of five years.

Leasehold improvements are depreciated at rates that depend on the duration of the contract. If, irrespective of the depreciation already recorded, an impairment loss occurs,

The asset is written down accordingly. If, in subsequent years, the reasons for the write-down no longer apply, the original value is reinstated, adjusted only for depreciation.

Tangible Assets

They are recorded at purchase or production cost and adjusted by the corresponding accumulated depreciation.

The carrying amount took into account ancillary charges and costs incurred for the use of the asset, reducing the cost by trade discounts and cash discounts of significant amounts.

The depreciation rates charged to the profit and loss account have been calculated in view of the use, destination and economic-technical duration of the assets, on the basis of the criterion of the residual possibility of utilisation, a criterion that we considered to be well represented by the following rates, which have not changed with respect to the previous year and are reduced by half in the year the asset comes into use:

Plant and machinery:	15%
Equipment:	15%
Furniture and fittings:	12%
Security installation:	30%
Passenger cars:	25%
Office and electronic machines:	25%

If, regardless of the depreciation already booked, a permanent loss of value occurs, the fixed assets are written down accordingly. If, in subsequent years, the reasons for the write-down no longer apply, the original value, adjusted by depreciation, is restored.

Credits

Receivables are initially recognised at their estimated realisable value.

Receivables are derecognised when the contractual rights to the cash flows from the receivable are extinguished or when all risks inherent in the receivable being sold have been transferred.

Debts

They are recognised at their nominal value, adjusted for returns or billing adjustments.

Accruals and deferrals

They have been determined in accordance with the criterion of actual accrual for the year.

Inventories

Raw materials, auxiliaries and finished goods are recorded at the lower of purchase or production cost and realisable value based on market trends, applying specific cost.

Severance fund

It represents the actual debt accrued to employees in accordance with the law and current employment contracts, taking into account all forms of remuneration of an ongoing nature.

The provision corresponds to the total of individual indemnities accrued in favour of employees at the balance sheet date, net of advances paid, and is equal to the amount that would have been payable to employees if they had terminated their employment at that date.

Income tax

Taxes are accrued on an accrual basis; they therefore represent provisions for taxes paid or payable for the year, determined according to current rates and regulations.

Recognition of income

Proceeds from sales of products are recognised at the time of the transfer of ownership, which usually coincides with the delivery or forwarding of the goods;

Financial income and income from the provision of services is recognised on an accruals basis.

More information

The Company, as provided for by Legislative Decree no. 14/2019 (Code for business crisis and insolvency), adopts an organisational, administrative and accounting structure that is appropriate to the nature of the business, also in function of the timely detection of the business crisis and the taking of appropriate initiatives.

Details of other financial instruments issued by the company

Information on the fair value of derivative financial instruments

The company has no derivative financial instruments.

Information on transactions with related parties

Significant transactions with related parties carried out by the company, which are of a commercial nature, were concluded at normal market conditions.

Information on agreements not shown in the balance sheet

The company does not have any agreements in place that are not reflected in the balance sheet.

Enterprises that prepare consolidated financial statements for the smallest group of enterprises to which they belong as a subsidiary enterprise

Pursuant to law, the information set forth in Article 2427, first paragraph, no. 22 sexies), of the Italian Civil Code is highlighted.

	Smaller ensemble
Company name	Peugeot Motocycle SAS
City (if in Italy) or foreign country	103, Rue du 17 November - Valentigney Cedex - France
Place of filing of consolidated financial statements	103, Rue du 17 November - Valentigney Cedex - France

Information pursuant to Article 1, paragraph 125 of Law No. 124 of 4 August 2017

Pursuant to Article 1, paragraph 125-bis, of Law no. 124 of 4 August 2017, in compliance with the obligation of transparency, it should be noted that grants, paid assignments and in any case economic benefits of any kind were received from public administrations in the form of operating grants for €10,659.

Proposed appropriation of profits or coverage of losses

It is proposed to the Shareholders' Meeting to cover the loss for the year equal to EUR (446,053) by using the entire "payments to cover losses" reserve for EUR 235,132 and to cover the remaining loss by using the Extraordinary Reserve for EUR 210,921.

These notes have been prepared in accordance with the Italian Civil Code and accounting standards. In order to comply with the obligations of publication in the Register of Companies, once approved, it will be converted into XBRL format; therefore, some formal changes may be made to make this note compatible with the format for filing.

These financial statements, consisting of the balance sheet, income statement and notes, give a true and fair view of the financial position and result of operations for the year and correspond to the accounting records.

The Chairman of the Board of Directors
Wakankar Prakash Gopal

Declaration of conformity of the budget

The undersigned Antonio Diso, enrolled in the Register of Chartered Accountants and Bookkeeping Experts of Rome under no. AA_008606 as the person in charge of the company, pursuant to art. 31, paragraph 2-quinquies of law no. 340/2000, declares that the electronic document in xbrl format containing the balance sheet, the profit and loss account and the explanatory notes are in conformity with the corresponding original documents filed with the company.

Date, April 26, 2021

INDEPENDENT AUDITOR'S REPORT

Board of Directors

Mahindra Tractor Assembly, Inc.

We have audited the accompanying financial statements of **Mahindra Tractor Assembly, Inc.** ('the Company') which comprise of balance sheets as of March 31, 2021 and March 31, 2020 and the related statements of loss, stockholder's deficit and cash flows for the years then ended and the related notes to the financial statements.

Management's responsibility for the financial statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the organization's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the organization's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly in all material respects, the financial position of the Company as of March 31, 2021 and March 31, 2020 and the results of its operations and its cash flows for the years then ended, in accordance with the accounting principles generally accepted in the United States of America.

Emphasis of matter

We draw attention to Note *B(3)* to the financial statements, wherein the Company considers it appropriate to prepare the financial statements on a going concern basis as the date of closure of the Company is not certain. Our opinion is not modified with respect to this matter.

Other matter

The presentation of financial information in Indian rupees in the financial statements is not a required part of the basic financial statements. We have verified the arithmetic accuracy of the presentation based upon exchange rate provided by the Company's management. We did not audit and do not express an opinion on such information, and our opinion is not modified with respect to this matter.

NOTES TO FINANCIAL STATEMENTS

NOTE A - NATURE OF OPERATIONS

Mahindra Tractor Assembly, Inc. ("MTAI" or the "Company"), a company incorporated in the State of Delaware on January 25, 2013, commenced business on April 1, 2013. The Company was owned by Mahindra USA, Inc. ("MUSA"), a Texas Corporation. MUSA is a subsidiary of Mahindra & Mahindra Limited ("M&M"); a public listed India company ("the ultimate parent company").

Ownership of MTAI was transferred from Mahindra USA, Inc. to Mahindra Overseas Investment Company Mauritius Limited ("MOICML") in November 2014, by issuance of 5,600,000 additional shares of $1 each. Further 10,000 shares held by Mahindra USA, Inc. were also transferred to the new parent company, MOICML.

The Company was formed to manufacture, assemble and sell electric powered bikes and scooters (hereinafter the "Mahindra GenZe product" or "the product").

On September 30, 2020, the Company transferred the inventory and property and equipment to Mahindra North America Technical Center Inc. ("MNATC, Inc."). The Company also transferred a royalty free license to use GenZe's trademark, patent copyright, trade secrets or proprietary rights of the Company to the extent owned or licensed by the Company from the third parties. The Company has also authorized MNATC, Inc. to access and operate websites owned and operated by GenZe. The aggregate purchase amount paid by MNATC, Inc. was USD 200,000 (INR 14,718,000).

NOTE B - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies applied in the preparation of the accompanying financial statements is as follows:

1. *Basis of preparation*

   a. The accompanying financial statements are prepared under the historical cost convention on the accrual basis of accounting in accordance with the accounting and reporting requirements of generally accepted accounting principles in the United States of America ('US GAAP') to reflect the financial position, results of operation and cash flows of the Company.

   b. The financial statements are for the year April 1, 2020 to March 31, 2021 and April 1, 2019 to March 31, 2020.

   c. The financial information in this report is shown in both US Dollars (USD) and in Indian Rupees (INR). For March 31, 2021 and March 31, 2020, dollar amounts are translated for convenience into Indian Rupees at exchange rate of 73.59 INR per dollar as on March 31, 2021. Within the notes to the financial statements, Indian rupee amounts are shown parenthetically following the US dollar amounts.

   d. Certain reclassifications, regroupings and reworking have been made in the financial statements of prior periods to conform to the classifications used in the current year. These changes had no impact on previously reported net loss or stockholder's deficit.

2. *Use of estimates*

   The preparation of financial statements in accordance with US GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements. Significant items subject to such estimates and assumptions include the useful lives of property, plant and equipment and intangible assets, inventory reserve, income taxes, revenue recognition, allowance for sales return, doubtful receivables, warranties, rebates, estimation relating to unsettled transactions and other contingencies. Management believes that the estimates used in the preparation of the financial statements are reasonable. Although these estimates are based upon management's best knowledge of current events and actions, actual results could differ from these estimates. Any changes in estimates are adjusted prospectively in the financial statements.

3. *Going concern*

   During the year ended March 31, 2021, the management-initiated plans to shut down the operations as agreed by the board. The Company has an accumulated deficit of USD 110,481,840 (INR: 8,130,358,606) as of March 31, 2021. Although, these events and condition cast significant doubt on the Company's ability to continue as a going concern, in view of the continued support from the parent company, the management considers that it is appropriate to prepare these financial statements on a going concern basis, which assumes that the Company will continue in existence for the foreseeable future. The Company has received funding from its parent company amounting to USD 6,680,600 (INR: 491,625,354) during the current year by way of direct capital infusion for meeting the cash flow requirements. Also, the management has plans to mitigate the adverse effects, including:

   1. The Company continues to provide warranty services and fulfil other obligations towards its customers and other stakeholders.

   2. The closing date of the Company has not been finalized and the management believes that the liquidation is not imminent as at the balance sheet date.

   3. Obtain financial support from MOICML, the parent company, to meet near term working capital requirements.

   Based on the above mitigating factors, the financial statements have been prepared on the basis that the Company is a going concern and that no further adjustments are required to the carrying value of assets and liabilities.

4. *Cash and cash equivalents*

   Cash and cash equivalents include current balances on bank accounts and highly liquid, short-term deposits with an original maturity of three months or less. Cash balances in bank accounts are insured by the Federal Deposit Insurance Corporation up to an aggregate per bank of USD 250,000 (INR: 18,397,500). The Company believes it is not exposed to any significant risk on cash and cash equivalents.

5. *Revenue recognition*

   <u>*Sale of manufactured goods*</u>

   The Company recognizes revenues from sale of assembled E-bikes and manufactured Mahindra GenZe electronic scooters and their related accessories (collectively known as "GenZe products" or "products").

   Revenue is recognized when control of the product, parts or accessories have been transferred and the Company's performance obligation to the customers have been satisfied. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transfer of goods. The timing of when the Company transfers the goods to the customer may differ from the timing of the customer's payment.

   When the Company gives the customers the right to return eligible goods, the Company estimates the expected returns based on an analysis of historical experiences.

   The Company has determined that the customers from the sale of the products are generally distributors and individual customers. Transfer of control, and therefore revenue recognition occurs at a point in time, when the product or service parts are made available to customer, or when the product or service parts are released to the carrier responsible for transporting them to customer. This is also the point at which invoices are issued, with payment terms to the customers and the products are shipped.

   The Company also performs shipping and handling activities for its customers which is treated as a separate performance obligation as these activities are performed after the customer obtains control of the goods. The Company acts as an agent for shipping and handling services and recognize revenue on net basis.

6. *Provision for warranty costs*

   The Company generally provides for the estimated cost of product warranties at the time the related revenue is recognized. The Company estimates the warranty cost as a percentage of cost of goods sold. The Company assesses the adequacy of its accrued warranty liabilities and adjusts the amounts as necessary based on actual experience and changes in future estimates. These amounts are recorded as a liability in the balance sheet until they are ultimately paid. Accrued warranty liability was USD Nil (INR: Nil) at March 31, 2021 (March 31, 2020: USD 264,457 (INR: 19,461,391)).

7. *Intangibles*

Intangible assets are stated at cost of acquisition, less accumulated amortization and impairment losses, if any. Cost of intangible assets comprises of purchase price, non-refundable taxes, levies and any directly attributable cost of making the asset ready for its intended use. The Company amortizes intangible assets over their estimated useful lives unless such lives are determined to be indefinite. Intangible assets with indefinite lives are tested at least annually for impairment and written down to the fair value as required. The estimated useful lives of the amortizable intangible assets are as follows:

Class of asset	**Useful life**
Intellectual property rights	15 years

The estimated useful life of an intangible asset is based on a number of factors including the effects of obsolescence, demand, competition, and other economic factors (such as the stability of the industry and known technological advances) and the level of maintenance expenditures required to obtain the expected future cash flows from the asset.

8. *Internally developed software costs*

The Company has incurred costs related to development of internally developed software to be used for future consumer management. Software development costs incurred during the preliminary project work stage or conceptual stage are expensed as incurred until technological feasibility has been established in accordance with Accounting Standard Codification ("ASC") 985, at which time such costs are capitalized to the extent that the capitalized costs do not exceed the realizable value of such costs, until the product is available for general release to customers. Upon completion of the development of software, the capitalization ceases and the resulting intangible asset is amortized based on straight-line basis.

The estimated useful life of the internally developed software is 3 years.

9. *Property, plant and equipment*

Property, plant and equipment are stated at cost less accumulated depreciation and impairment. Cost of items of property, plant and equipment comprise cost of purchase and other costs necessarily incurred to bring it to the condition and location necessary for its intended use. The Company depreciates property, plant and equipment over the estimated useful life using the straight-line method except for production tools. Upon retirement or disposal of assets, the cost and accumulated depreciation will be eliminated from the accounts and the resulting gain or loss will be credited or charged to statement of loss.

The estimated useful life used to determine depreciation is:

Class of asset	**Useful life**
Engineering equipment	3 years
Machinery & equipment	5 to 7 years
Production tools	60,000 units
Computer equipment	3 years
Furniture equipment	3 years
Vehicles	2 to 5 years
Leasehold improvements	Lease term

The cost of property, plant and equipment not ready for use before the balance sheet date are disclosed under capital work-in-progress.

10. *Impairment of long-lived assets*

Long-lived assets, including certain identifiable intangible assets, to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Such assets are considered to be impaired if the carrying amount of the assets is higher than the future undiscounted net cash flows expected to be generated from the assets. The impairment amount to be recognized is measured by the amount by which the carrying value of the assets exceeds its fair value.

11. *Accounts receivable & allowance for doubtful debts*

Trade receivables represents receivable on sale of GenZe products and accessories. For the trade receivables, the Company follows the specific identification method for recognizing allowance for doubtful debts. Management analyzes composition of the accounts receivable aging, historical bad debts, current economic trends and customer credit worthiness of each accounts receivable when evaluating the adequacy of the allowance for doubtful debts. Allowance for doubtful debts is included in selling, distribution and administration expenses in the statement of loss.

12. *Research and development costs*

Revenue expenditure on research and development is expensed as incurred. Capital expenditure incurred on equipment and facilities that are acquired or constructed for research and development activities and having alternative future uses is capitalized as tangible assets when acquired or constructed.

13. *Income taxes*

In accordance with the provisions of FASB ASC Topic 740 "Income Taxes," income taxes are accounted for using the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The deferred tax asset is reduced by a valuation allowance if it is more likely than not that some portion or all of the assets will not be realized.

The Company recognizes liabilities for uncertain tax positions based on a two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step is to measure the tax benefit as the largest amount which is more than 50% likely of being realized upon ultimate settlement. The Company recognizes interest and penalties related to uncertain tax positions within the provision for income taxes.

14. *Inventories*

Raw materials, work in progress and finished goods inventories are stated at the lower of cost and net realizable value, with cost being determined on a weighted average basis. The measurement of inventories includes the direct cost of materials and labor as well as indirect costs (variable and fixed). A provision is made for obsolete and slow-moving raw materials, finished goods, spare parts and other supplies based on their expected future use and realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs for sale and distribution.

The Company makes adjustments to its inventory reserves based on the identification of specific situations and increases its inventory reserves accordingly. As further changes in future economic or industry conditions occur, the Company will revise the estimates that were used to calculate its inventory reserves.

15. *Fair value measurements and financial instruments*

The Company applies fair value measurements to certain assets, liabilities and transactions that are periodically measured at fair value.

Assets and liabilities recorded at fair value in the financial statements are categorized based upon the level of judgment associated with the inputs used to measure their fair value. Hierarchical levels which are directly related to the amount of subjectivity associated with the inputs to the valuation of these assets or liabilities are as follows:

Level 1 – unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access as of the measurement date.

Level 2 – inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data.

Level 3 – unobservable inputs for the asset or liability only used when there is little, if any, market activity for the asset or liability at the measurement date.

This hierarchy requires the Company to use observable market data, when available, and to minimize the use of unobservable inputs when determining fair value.

The Company's financial instruments consist of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities. The estimated fair value of cash, accounts receivable, accounts payable and accrued liabilities approximate their carrying amounts due to the short-term nature of these instruments. None of these instruments are held for trading purposes.

16. *Equity based compensation payment to employees*

The Company accounts for stock-based compensation expense relating to stock options that have been issued by the Company to the employees. The Company computes the fair value of options granted using the Black Scholes option pricing model. An amount equal to such compensation expense for the year is credited to additional paid in capital of the Company.

The Company has used guidance in ASC 718; "Compensation-Stock Compensation" to account for employee share-based payments. ASC 718 requires share-based payments to employees, including grants of employee stock options and purchases under employee stock purchase plans, to be recognized in statements of loss based on their fair values.

In accordance with ASC 718, the Company recognized stock-based compensation for awards granted, that the Company expects to vest on a straight-line basis over the requisite service period of the awards. In respect of awards that have a graded vesting schedule and with only service conditions, compensation cost is recognized on straight line basis over the requisite service period for each separately vesting portion of the award as if the award was-in-substance, multiple awards.

In March 2016, the FASB issued ASU 2016-09, "Compensation-Stock Compensation-Improvements to Employee Share-Based Payment Accounting". Under the new guidance, an entity can make an entity-wide accounting policy election to either estimate the number of awards that are expected to vest (current GAAP) or account for forfeitures when they occur. This ASU is effective for the Company beginning January 1, 2018. The Company elected to recognize forfeitures when they occur.

17. *Advertising*

Advertising costs are presented as part of selling, general, and administrative expenses in the statements of loss. Advertising costs are expensed as incurred. The amount of advertising and marketing cost incurred by the Company for the years ended March 31, 2021 and March 31, 2020 is $ 18,021 (INR 1,326,165) and $ 941,181 (INR 69,261,510), respectively.

18. *Operating leases*

Lease rent expenses on operating leases are charged to expense over the lease term. Certain operating lease agreements provide for scheduled rent increases over the lease term. Rent expense for such leases is recognized on a straight-line basis over the lease term.

19. *Capital leases*

Leases in which the Company has substantially all the risk and rewards of ownership are classified as capital leases. Capital leases are capitalized at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments.

20. *Commitments and contingencies*

Liabilities for loss contingencies arising from claims, assessments, litigation, fines, and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount can be reasonably estimated. Legal costs incurred in connection with loss contingencies are expensed as incurred.

NOTE C - CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise of the following:

	As at March 31, 2021		As at March 31, 2020	
	USD	**INR**	USD	INR

Total revenue by timing of revenue recognition	**1,790,112**	**131,734,342**	6,672,588	491,035,750

Contract Balances

The Company's contracts with customers with dealer agreements and purchase orders. These contracts with customers typically consist of sale of products which represent performance obligations that are satisfied upon transfer of control of the product to the customer at a point in time.

The following table provides information about contract assets and liability balances as of March 31, 2021 and March 31, 2020:

	As at March 31, 2021		As at March 31, 2020	
Particulars	**USD**	**INR**	USD	INR
Accounts receivable	**212,000**	**15,610,080**	493,463	36,313,942
Contract liabilities (deferred revenue)	**1,156,079**	**85,075,883**	1,036,527	76,278,022

NOTE P – COMMITMENTS AND CONTINGENCIES

Lease obligations

The Company has following lease obligations for business premises and locations:

1) Ann Arbor, Michigan – industrial and office use
The period of lease is from January 31, 2017 to February 29, 2020. The rent space was increased to 55,924 sq. feet. The rent expense for the year ended March 31, 2020 for this lease is $ 193,456 (INR 14,236,427). In addition to this the Company has provided a security deposit of $ 17,000 (INR 1,251,030) for period of three years. The lease term expired in the previous year on February 29, 2020.

2) Fremont, California – office premises
The lease period expired on May 31, 2019 and subsequently it was renewed from September 01, 2019 to August 31, 2021. The rent expense for the year ended March 31, 2021 is $ 87,165 (INR 6,414,472). In addition to this the Company had provided a security deposit of $ 16,716 (INR 1,230,130) for period of two years. However, the Company terminated the lease during the year at cost of $ 110,387 (INR 81,123,379).

3) Portland, Airport Business Center – office use
The period of lease is from June 1, 2014 to July 31, 2019. The rent expense the year ended March 31, 2020 for this lease was $ 19,984 (INR 1,470,623).

4) Mahindra North America Technical Center Inc. – Office use
The rent expense for the year ended March 31, 2021 for this lease is $ 220,834 (INR 16,251,174). The Company has obtained the lease from April 1, 2020 to March 31, 2021.

The rent expense for the year ended March 31, 2021 and March 31, 2020 is $ 403,670 (INR 29,703,291) and $ 413,715 (INR 30,445,287), respectively.

NOTE Q – INCOME TAXES

For the year ended March 31, 2021, the Company will file federal and state tax returns as per regulations applicable to Chapter C corporations in the United States.

The components of the provision for income taxes are as follows:

	For the year ended March 31, 2021		For the year ended March 31, 2020	
	USD	**INR**	USD	INR
Current taxes				
State	**1,650**	**121,424**	1,670	122,895
Total	**1,650**	**121,424**	1,670	122,895

The items accounting for the difference between income taxes computed at the federal statutory rate and the provision for income taxes are as follows:

	For the year ended March 31, 2021		For the year ended March 31, 2020	
	USD	**INR**	USD	INR
Income tax at federal rate	**(1,620,242)**	**(119,233,612)**	(6,175,355)	(454,444,374)
State tax, net of federal effect	**(3,549,323)**	**(261,194,646)**	(1,918,332)	(141,170,052)
Permanent differences	**103**	**7,545**	(12,065)	(887,863)
True-up	**2,446,063**	**180,005,754**	(143,505)	(10,560,533)
Change in net operating losses ("NOLs")	**(2,455,666)**	**(180,712,461)**	144,722	10,650,092
Change in tax credit	**394,727**	**29,047,972**	(490,412)	(36,089,419)
Change in valuation allowance	**4,785,988**	**352,200,872**	8,596,617	632,625,045
Total	**1,650**	**121,424**	1,670	125,818

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the Company's net deferred income taxes are as follows:

	March 31, 2021		March 31, 2020	
	USD	**INR**	USD	INR
Non-current deferred tax liability				
Property, plant and equipment	**45,524**	**3,350,111**	(693,209)	(51,013,250)
Non-current deferred tax assets				
Accrued expenses	**404,798**	**29,789,085**	1,796,127	132,176,986
Charitable contribution	**10,446**	**768,795**	11,199	824,134
Tax credit	**2,594,365**	**190,919,320**	2,989,092	219,967,280
Deferred revenue	**267,313**	**19,671,637**	273,978	20,162,041
Net operating loss	**31,396,573**	**2,310,473,807**	21,850,183	1,607,954,967
Intangibles	**–**	**–**	3,705,662	272,699,667
Less: valuation allowance	**(34,719,021)**	**(2,554,972,755)**	(29,933,032)	(2,202,771,825)
Non-current deferred tax assets	**(45,524)**	**(3,350,111)**	693,209	51,013,250

	March 31, 2021		March 31, 2020	
	USD	**INR**	USD	INR
Deferred taxes	**34,719,021**	**(2,554,972,755)**	29,933,032	2,202,771,825
Less: Deferred tax asset valuation allowance	**(34,719,021)**	**(2,554,972,755)**	(29,933,032)	(2,202,771,825)
Net deferred taxes	**–**	**–**	–	–

Realization of net deferred tax assets is dependent upon generation of sufficient taxable income in future years, benefit from the reversal of taxable temporary differences and tax planning strategies. Management assesses the available positive and negative evidence to estimate whether sufficient future taxable income will be generated to permit use of the existing deferred tax assets. The amount of net deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income change.

Based on the history of losses and current year significant losses, the management believes that it is more likely than not that the deferred tax assets may not be realized during foreseeable future and accordingly, a valuation allowance of $ 34,719,021 (INR 2,554,972,755) and $ 29,933,032 (INR 2,202,771,825) was recognized as at March 31, 2021 and March 31, 2020, respectively.

No deferred tax assets were recognized as at March 31, 2021 and March 31, 2020.

The Company has federal NOLs of $ 106,337,656 and $ 94,027,456 as at March 31, 2021 and March 31, 2020, respectively. The NOLs generated till 2017-18 which if unutilized will expire by the year 2037 and the NOLs generated after 2017-18 will be carry forwarded indefinitely.

The Company has state net operating loss carryforwards of approximately $ 155,129,764 and $ 133,569,227 as at March 31, 2021 and March 31, 2020 respectively, which if unutilized will expire based on the various state statutes.

The Company has R&D credit carryforwards and FTC carryforwards of $ 2,594,364 as on March 31, 2021.

Accounting for uncertain tax position

The Company recognizes the benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. The Company has no unrecognized tax positions as at March 31, 2021 and March 31, 2020.

The tax years of 2017 through 2019 remain subject to examination by the taxing authorities.

NOTE R – STOCK BASED COMPENSATION

In 2016, the Company adopted the incentive stock option plan for the employees of the Company. Under the Plan, incentive stock options to purchase the Company's common stock may be granted to employees at prices not lower than fair value at the date of grant. Stock options have a maximum term of 10 years.

Activity under the plan to the extent related to employees of the Company:

	Number of options	**Weighted-average exercise price**	**Weighted average remaining contractual life (Years)**
Balance as at April 1, 2019	7,630,000	0.20	7.5
Granted	–		
Exercised	–		
Cancelled	(1,041,000)	0.20	6.5
Balance as at March 31, 2020	6,589,000		
Balance as at April 1, 2020	6,589,000	0.20	6.5
Granted	–	–	
Exercised	–	–	
Cancelled	(6,559,000)	0.20	
Balance as at March 31, 2021	**30,000**	**0.20**	**5.5**

The grant date fair value of options has been estimated using the Black-Scholes single option pricing model using assumptions about expected risk free interest rate in the range of 1% to 1.3% and expected volatility rate in the range of 38% to 42%. The Company has de-recognized $ 44,872 (INR 3,302,130) and $ 68,712 (INR 5,056,516) as stock-based compensation expense for the year ended March 31, 2021 and March 31, 2020, respectively. The Company during the year ended March 31, 2021 and March 31, 2020 did not issue any new options and cancelled 6,559,000 options and 1,041,000 options for year ending March 31, 2021 and March 31, 2020, respectively.

NOTE T – SHIPPING AND HANDLING COST

The shipping and handling cost for the year ended March 31, 2021 is $ 79,212 (INR 5,829,211) and for March 31, 2020 is 650,545 (INR 47,873,607).

NOTE U – EMPLOYEE BENEFIT PLANS

The Company has voluntary 401(k) retirement plans covering substantially all employees. The Company may make annual contributions to the plans equal to a uniform percentage of participant compensation. The cost of the Company’s contributions charged to expense related to 401(k) contributions was USD 12,308 (INR: 905,707) and USD 80,902 (INR: 5,953,578) for the year ended March 31, 2021 and year ended March 31, 2020, respectively.

NOTE V – CONCENTRATIONS

Financial instruments that have a potential to subject the Company to concentrations of credit risk comprise principally of cash equivalents and accounts receivable. The fair values of these financial instruments approximate their book values.

During the year ended March 31, 2021, the Company has recognized 25% of it's revenue from single customer. Also, 94% of the total accounts receivable pertains to a single customer as at March 31, 2021.

During the year ended March 31, 2020, the Company has recognized 27% of its revenue from single customer which also accounts for 1% of the total accounts receivable as at March 31, 2020.

NOTE W– STOCKHOLDER'S EQUITY

Common stock

Ownership of the Company was transferred from Mahindra USA, Inc. to Mahindra Overseas Investment Company Mauritius Limited ("MOICM") on November 30, 2014, by issuance of 5,600,000 additional shares of $1 each. Further 10,000 shares held by Mahindra USA, Inc. were also transferred to the new parent company, MOICM.

Authorized share capital

The Company has authorized share capital of 600,000,000 of $0.2 per share totaling to $ 120,000,000 (INR 8,830,800,000) as at March 31, 2021 and March 31, 2020. The Company issued 80,801,425 shares during the year ended March 31, 2021. Out of this, 47,398,425 shares were issued against the conversion of loan to MOICML.

During the year ended March 31, 2020, the Company had increased the authorized share capital by an additional 305,000,000 shares and issued additional 173,675,000 shares at par value of $0.2 per share totaling to $ 34,735,000 (INR 2,556,148,650).

Voting

Each holder of common stock is entitled to one vote in respect of each share held by him in the records of the Company for all matters submitted to a vote.

Liquidation

In the event of liquidation of the Company, the holders of common stock shall be entitled to receive all of the remaining assets of the Company, after distribution of all preferential amounts, if any. Such amounts will be in proportion to the number of equity shares held by the shareholders.

NOTE X - EMPLOYEE RETENTION CREDIT

During the year the Company availed the benefit under the ERC (employee retention credit) scheme, a benefit given by the Federal government under the COVID stimulus package which allows businesses to take credit of the wages paid to employees on furlough and not working. The total ERC credit received by the Company for the year ended March 31, 2021 amounts to USD 150,780 (INR 11,095,900) and USD Nil (INR: Nil) for the year ended March 31, 2020. The Company is currently evaluating whether it is eligible for such credits and believes that there is reasonable probability that it will have to repay this credit back to the IRS and accordingly the Company has recorded an accrual amounting to USD 150,780 (INR 11,095,900) as of March 31, 2021.

NOTE Y – RISK AND UNCERTANITIES

The Company's future results of operations involve several risks and uncertainties. Factors that could affect the Company's future operating results and cause actual results to vary materially from expectations include, competitive factors, including but not limited to pricing pressures; deterioration in general economic conditions; the Company's ability to effectively manage operating costs and increase operating efficiencies; declines in revenues; technological and market changes; the ability to attract and retain qualified employees and the Company's ability to execute on its business plan.

NOTE Z – SUBSEQUENT EVENTS

The Company evaluated all events and transactions that occurred after March 31, 2021 through the date the financial statements were issued. Based on the evaluation, the Company is not aware of any events or transactions that would require recognition or disclosure in the financial statements.

INDEPENDENT AUDITORS' REPORT

TO THE MEMBERS OF
MAHINDRA AGRI SOLUTIONS LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Mahindra Agri Solutions Limited ("the Company"), which comprise the balance sheet as at 31 March 2021, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and loss and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those SAs are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's Director report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors' Responsibility for the Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, profit/loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. (A) As required by Section 143(3) of the Act, we report that:
    a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
    b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
    c) The balance sheet, the statement of profit and loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows dealt with by this Report are in agreement with the books of account.
    d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under Section 133 of the Act.
    e) On the basis of the written representations received from the directors as on 31 March 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2021 from being appointed as a director in terms of Section 164(2) of the Act.
    f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

    (B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    i. The Company has disclosed the impact of pending litigations as at 31 March 2021 on its financial position in its financial statements - refer note 42 to the financial statements.
    ii. The Company has made provision, as required under the applicable law or accounting standards, for material foreseeable losses, if any, on long-term contracts including derivative contracts - refer note 33 to the financial statements.
    iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year ended 31 March 2021.
    iv. The disclosures in the financial statements regarding holdings as well as dealings in specified bank notes during the period from 8 November 2016 to 30 December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31 March 2021.

    (C) With respect to the matter to be included in the Auditors' Report under Section 197(16):

In our opinion and according to the information and explanations given to us, the remuneration paid by the Company to its directors during the current year is in accordance with the provisions of Section 197 of the Act. The remuneration paid to any director is not in excess of the limit laid down under Section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

Annexure A to the Independent Auditors' Report – 31 March 2021

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

i. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) The Company has a programme of physical verification of its fixed assets by which all fixed assets are verified once in three years, pursuant to which all the fixed assets were physically verified in the current financial year ended 31 March 2021. No material discrepancies were noticed on such verification. All discrepancies have been dealt with in the books of account.

(c) In our opinion and according to the information and explanations given to us and on the basis of examination of records of the Company, the title deeds of immovable properties which are leasehold, freehold land, freehold building as disclosed in Note 4 to the financial statements are held in the name of the Company.

ii. The inventory, except for goods-in-transit and stocks lying with third parties, has been physically verified by the management during the year. In our opinion, the frequency of such verification is reasonable. In respect of stocks lying with third parties at the year-end, written confirmations have been obtained. The discrepancies noticed on verification between the physical stocks and the book records were not material and have been dealt with in books of account.

iii. According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, paragraph 3 (iii) of the Order is not applicable to the Company.

iv. In our opinion and according to the information and explanations given to us, the Company has complied with the provisions of Sections 185 and 186 of the Companies Act, 2013 in respect of grant of loans, making investments and providing guarantees and securities, as applicable.

v. In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits from the public during the year in terms of the provisions of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, paragraph 3 (v) of the Order is not applicable to the Company.

vi. In our opinion, and according to the information and explanations given to us, the maintenance of cost records under Section 148 (1) of the Act is not applicable to the Company under Companies (Cost Record and Audit) Rules, 2014.

vii. (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted/ accrued in the books of account in respect of undisputed statutory dues of Provident Fund, Employees' State Insurance, Income Tax, Goods and Service Tax, Profession Tax, Duty of Customs and other material statutory dues have been regularly deposited during the year by the Company with the appropriate authorities. As explained to us, the Company did not have any dues on account of Sales Tax, Excise Duty, Value added Tax and cess.

According to the information and explanations given to us, no undisputed amounts payable in respect of Provident fund, Employees' State Insurance, Income Tax, Goods and Service Tax, Profession Tax, Duty of Customs and other material statutory dues were in arrears as at 31 March 2021 for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, there are no dues of Income Tax, Goods and Service Tax and Duty of Customs as at 31 March 2021, which have not been deposited with the appropriate authorities on account of any dispute. According to the information and explanation given to us, the following dues of Sales Tax and Value Added Tax have not been deposited by the Company on account of disputes:

Rs in lakhs

Name of Statue	Nature of the Dues	Amount demanded	Amount deposited under protest	Period to which the amount relates	Forum where dispute is pending
West Bengal Sales Tax and Value Added Tax	Central Sales Tax	7.73	–	2016-17	Joint Commissioner Commercial Taxes, Kolkata South Circle
West Bengal Sales Tax and Value Added Tax	Value Added Tax	27.68	–	2016-17	Joint Commissioner Commercial Taxes, Kolkata South Circle
Maharashtra Sales Tax and Value Added Tax	Value Added Tax	13.12	–	2012-13	Joint Commissioner of State Tax, Appeal-VII, Mumbai

Maharashtra Sales Tax and Value Added Tax	Central Sales Tax	3.93	–	2016-17	Joint Commissioner of State Tax, Appeal-VII, Mumbai
Gujarat Sales Tax and Value Added Tax	Value Added Tax	13.03	–	2016-17	Assistant Commissioner of State Tax, Unit-13, Ahmedabad
Gujarat Sales Tax and Value Added Tax	Central Sales Tax	9.51	–	2016-17	Assistant Commissioner of State Tax, Unit-13, Ahmedabad
Gujarat Sales Tax and Value Added Tax	Value Added Tax	6.73	–	2017-18	Assistant Commissioner of State Tax, Unit-13, Ahmedabad
Gujarat Sales Tax and Value Added Tax	Central Sales Tax	46.64	–	2017-18	Assistant Commissioner of State Tax, Unit-13, Ahmedabad

viii. In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of loan or borrowing to the banks. The Company has not taken any loans or borrowings from any financial institution or government nor has issues any debenture during the year.

ix. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not raised any moneys by way of initial public offer or further public offer (including debt instruments) and has not obtained any term loans during the year. Accordingly, paragraph 3 (ix) of the Order is not applicable to the Company.

x. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have neither come across any instance of fraud by the Company or any material instances of fraud on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of any such case by the management.

xi. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has paid / provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Act.

xii. In our opinion and according to the information and explanations given to us, the Company is not a Nidhi Company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, paragraph 3 (xii) of the Order is not applicable to the Company.

xiii. In our opinion and according to the information and explanations given to us, the Company has entered into transactions with related parties in compliance with the provisions of Section 177 and Section 188 of the Act, where applicable and the details of such related party transactions have been disclosed in the financial statements as required by applicable Ind AS.

xiv. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year. Accordingly, paragraph 3 (xiv) of the Order is not applicable to the Company.

xv. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3 (xv) of the Order is not applicable to the Company.

xvi. According to the information and explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi) of the Order is not applicable to the Company.

Annexure B to the Independent Auditors' report on the financial statements of Mahindra Agri Solutions Limited for the year ended 31 March 2021

Report on the internal financial controls with reference to the aforesaid financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

(Referred to in paragraph 1(A)(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Opinion

We have audited the internal financial controls with reference to financial statements of Mahindra Agri Solutions Limited ("the Company") as of 31 March 2021 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2021, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to the financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2021

(Currency : Indian rupees in lakhs)

1. Corporate information

Mahindra Agri Solutions Limited (Formerly Known as Mahindra Shubhlabh Services Limited) ("the Company") a Public Limited Company domiciled in India and incorporated on 11 April 2000 under the provisions of the Companies Act, 1956 (CIN : U01400MH2000PLC125781).

The Company is engaged in the business of Agri inputs products and Food businesses. Grapes, Banana Cultivation, Seeds, Dairy and Banana Export etc. businesses are in operations during the year.

The Company is the subsidiary of Mahindra and Mahindra Limited.

The financial statements for the year ended 31 March 2021 were approved by the Board of Directors and authorised for issue on 28 April 2021.

2. Statement of compliance and basis of preparation and presentation

2.1 Basis of preparation and presentation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 (the 'Act') and other relevant provisions of the Act.

All assets and liabilities are classified as current if it is expected to realise or settle within 12 months after the Balance Sheet date.

2.2 Going concern

During the year, the Company has recognised a loss after tax for the year ended 31 March 2021 of Rs 5,672.72 lacs (31 March 2020: Rs 1,918.17 lacs) and as at that date, the Company's current liabilities exceed current assets by Rs 26,36.18 lacs (31 March 2020: Rs 3,597.52). The financial statements for the year ended 31 March 2021 are prepared on a going concern basis, the validity of which is premised on the continuing availability of credit facilities aggregating to Rs 15,200 lacs to the Company for the foreseeable future. Further, the Company has a board approval for borrowings for working capital purpose from Banks for Rs 9,000 lacs, out of which Rs 4,800 lacs is utilised as at 31 March 2021. The available limit for further borrowing is Rs 4,200 lakhs. The said non- fund based facility is approved by the Strategic Investment Committee of the Board of the Mahindra and Mahindra Limited at its meeting held on 12 June 2020.

Management has critically assessed its cash flows forecast and expect the Company's operating results and cash flows to continue to improve and be able to generate sufficient cash flows and resources to allow the Company to continue in its operations and meet its obligations for the foreseeable future and accordingly the accounts have been prepared on a going concern basis.

2.3 Functional and presentation currency

The financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest Rs. lakhs, unless otherwise indicated.

2.4 Basis of measurement

The financial statements have been prepared on the historical cost basis, except for certain financial instruments which are measured at fair values at the end of each reporting period. Historical cost is based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

2.5 Measurement of fair value

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant the fair value measurement is unobservable

2.6 Critical accounting judgements and key sources of estimation uncertainty

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates under different assumptions and conditions.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

i. Critical Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements.

Discount rate used to determine the carrying amount of the Company's employee defined benefit obligation

In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation.

ii. Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Useful lives of property, plant and equipment

As described in Note 3.5, the Company reviews the estimated useful lives and residual values of property, plant and equipment at the end of each reporting period. During the current financial year, the management has reassessed the useful lives of certain property, plant and equipment and the impact of the change is not material for the year. There were no changes in residual values of the property, plant and equipment.

(Currency : Indian rupees in lakhs)

Allowances for doubtful debts

The Company makes allowances for doubtful debts based on an assessment of the recoverability of trade and other receivables. The identification of doubtful debts requires use of judgments and estimates. Where the expectation is different from the original estimate, such difference will impact the carrying value of the trade and other receivables and doubtful debts expenses in the period in which such estimate has been changed.

Liability for sales return

In making judgment for liability for sales return, the management considered the detailed criteria for the recognition of revenue from the sale of goods set out in Ind AS 115 and in particular, whether the Company had transferred to the buyer the significant risk and rewards of ownership of the goods. Following the detailed quantification of the Company's liability towards sales return, the management is satisfied that significant risk and rewards have been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate liability for sales return. Accruals for estimated product returns, which are based on historical experience of actual sales returns and adjustment on account of current market scenario is considered by Company to be reliable estimate of future sales returns.

Allowances for inventories

Management reviews the inventory age listing on a periodic basis. This review involves comparison of the carrying value of the aged inventory items with the respective net realizable value. The purpose is to ascertain whether an allowance is required to be made in the financial statements for any obsolete and slow-moving items. Management is satisfied that adequate allowance for obsolete and slow-moving inventories has been made in the financial statements.

Taxes

There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. Where the final tax outcome of these matters is different from the amounts initially recorded, such differences will impact the current and deferred tax provisions in the period in which the tax determination is made. The assessment of probability involves estimation of a number of factors including future taxable income.

Defined benefit plans (gratuity benefits)

A liability in respect of defined benefit plans is recognised in the balance sheet and is measured as the present value of the defined benefit obligation at the reporting date less the fair value of the plan's assets. The present value of the defined benefit obligation is based on expected future payments at the reporting date, calculated annually by independent actuaries. Consideration is given to expected future salary levels, experience of employee departures and periods of service.

3. Significant accounting policies

3.1 Revenue recognition

The Company has applied Ind AS 115 Revenue from Contracts with Customers which establishes a comprehensive framework for determining whether, how much and when revenue is to be recognised.

Revenue is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration expected to receive in exchange for those products or services.

The core principle of Ind AS 115 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligation in contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Under Ind AS 115, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer.

The accounting policies for specific revenues streams of the Company is summarised below:

Sale of goods:

Revenue from the sale of goods is recognised upon transfer of control of promised products to customers in an amount that reflects the consideration expected to receive in exchange for those products, at which time all the following conditions are satisfied:

- the Company has transferred to the buyer the control of promised products to customers;
- the Company has identified the contract with customer and performance obligation in the contract.
- the transaction price can be measured reliably;
- it is expected that the consideration associated with the transaction will flow to the Company; and revenue is recognised when the company satisfy the performance obligation

Export benefits

Export benefits for sale of goods are accounted for in the year of export based on eligibility and accrual basis, when there is no uncertainty in receiving the same.

3.2 Interest income

Interest income from financial assets is recognised when it is probable that economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial assets to that asset's net carrying amount on initial recognition.

3.3 Employee benefits

The Company's contribution paid/payable during the year to Superannuation Fund, ESIC and Labour Welfare Fund are recognised in profit or loss.

Provident fund

Contributions to Provident Fund are made to a Trust administered by the Company/Regional Provident Fund Commissioners and are charged to profit or loss as incurred. The Company is liable for the contribution and any shortfall in interest between the amount of interest realised by the investments and the interest payable to members at the rate declared by the Government of India in respect of the Trust administered by the Company.

Post-employment benefit plans

Defined Contribution plans:

Payments to defined contribution retirement benefit scheme for eligible employees in the form of superannuation fund are charged as an expense as they fall due. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made.

(Currency : Indian rupees in lakhs)

Defined benefit plans

The Company operates a defined benefit plan – gratuity fund.

The liability recognised in the balance sheet in respect of its defined benefit plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the said obligation is determined by discounting the estimated future cash outflows, using market yields of government bonds that have tenure approximating the tenures of the related liability.

The interest income/(expense) are calculated by applying the discount rate to the net defined benefit liability. The net interest income/(expense) on the net defined benefit liability or asset is recognised in the Statement of Profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the Statement of Changes in Equity and in the Balance Sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service cost.

Short-term employee benefit

Compensated absences which accrue to employees and which can be carried to future periods but are expected to be encashed or availed in twelve months immediately following the year end are reported as expenses during the year in which the employees perform the services that the benefit covers and the liabilities are reported at the undiscounted amount of the benefits after deducting amounts already paid. Where there are restrictions on availment of encashment of such accrued benefit or where the availment or encashment is otherwise not expected to wholly occur in the next twelve months, the liability on account of the benefit is actuarially determined using the projected unit credit method.

Employee stock option scheme

Equity-settled share-based payments to employees are measured at the fair value of the equity instruments at the grant date. The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity.

3.4 Taxation

Income tax expense comprises current tax expense and the net change in the deferred tax asset or liability during the year. Current and deferred taxes are recognised in Statement of Profit and Loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity, respectively.

Current tax

Current tax is measured at the amount of tax expected to be payable on the taxable income for the year as determined in accordance with the provisions of the Income Tax Act, 1961.

Current tax assets and current tax liabilities are offset when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle the asset and the liability on a net basis.

Deferred tax

Deferred income tax assets and liabilities are recognised for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount, except when the deferred income tax arises from the initial recognition of an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction.

Deferred tax assets are recognised only to the extent that it is probable that either future taxable profits or reversal of deferred tax liabilities will be available, against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised.

The carrying amount of a deferred tax asset shall be reviewed at the end of each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilised.

Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets and liabilities and when the deferred tax balances relate to the same taxation authority.

3.5 Property, plant and equipment

Property, plant and equipment (other than bearer plant) held for use in the production or supply of goods or services, or for administrative purposes, are stated in the Balance sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation and accumulated impairment if any.

Cost includes financing cost relating to borrowed funds attributable to the construction or acquisition of qualifying tangible assets upto the date the assets are ready for use. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Bearer Plant cost includes cost of plant and land preparation upto the planting. Bearer plant are stated in the Balance sheet at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Depreciation is calculated on Straight Line method over the estimated useful life of all assets. These lives are in accordance with Schedule II to the Companies Act, 2013, other than the following asset classes based on the Company's expected usage pattern supported by technical assessment:

(a) Certain items of Plant and Equipment – 1 to 15 years

(b) Buildings (Roads) – 15 years

(c) Vehicles – 5 years

(d) Bearer Plant – 3 Years

3.6 Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated

(Currency : Indian rupees in lakhs)

impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Intangible assets under development

The Company expenses costs incurred during research phase to profit or loss in the year in which they are incurred. Development phase expenses are initially recognised as intangible assets under development until the development phase is complete, upon which the amount is capitalised as intangible asset.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible assets, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

Useful lives of intangible assets

Estimated useful lives of the intangible assets are as follows:

Computer software	3 years, 10 years
Non-compete fees	5 years
Trademarks	10 years
Technical knowhow	10 years

3.7 Impairment of assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount, which is the higher of the value in use or fair value less cost to sell, of the asset or cash-generating unit, as the case may be, is estimated and impairment loss (if any) is recognised and the carrying amount is reduced to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

When an impairment loss subsequently reverses, the carrying amount of the asset or a cash-generating unit is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) earlier.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

3.8 Biological assets

Biological assets growing on the bearer plant is estimated at fair value.

3.9 Inventories

Inventories are valued at lower of cost (on weighted average basis) and net realisable value after providing for obsolescence and other losses, where considered necessary. Cost includes all charges in bringing the goods to their present location and condition, including octroi and other levies, transit insurance and receiving charges.

Work-in-progress and finished goods include appropriate proportion of overheads.

Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

Stores, spares and tools other than obsolete and slow moving items are carried at cost. Obsolete and slow moving items are valued at cost or estimated net realisable value, whichever is lower.

3.10 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

3.11 Financial instruments

Financial assets and financial liabilities are recognised when a Company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Classification and subsequent measurement

Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on their respective classification.

On initial recognition, a financial asset is classified as - measured at :

- Amortised cost; or
- Fair Value through Other Comprehensive Income (FVTOCI) - equity investment; or
- Fair Value Through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL. This includes all derivative financial assets unless designated as effective hedge instruments which are accounted as per hedge accounting requirements discussed below.

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment expenses are recognised in profit or loss. Any gain and loss on derecognition is also recognised in profit or loss.

(Currency : Indian rupees in lakhs)

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVTOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserves.

The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for medium or long-term strategic purpose. Upon the application of Ind AS 109, the Company has chosen to designate these investments as at FVTOCI as the Company believes that this provides a more meaningful presentation for medium or long-term strategic investments, than reflecting changes in fair value immediately in profit or loss. Dividend income received on such equity investments are recognised in profit or loss.

Equity investments that are not designated to be measured at FVTOCI are designated to be measured at FVTPL. Subsequent changes in fair value are recognised in profit or loss.

Financial liabilities and equity instruments

Debt and equity instruments issued by the company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company is recognised at the proceeds received, net of directly attributable transaction costs.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is a derivative (that does not meet hedge accounting requirements) or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all of the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for the amount it may have to pay.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised and the proceeds received are recognised as a collateralised borrowing.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Derivative financial instruments

The Company enters into derivative financial instruments, primarily foreign exchange forward contracts to manage its exposure to foreign exchange. Derivatives embedded in non-derivative host contracts that are not financial assets within the scope of Ind AS 109 are treated as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

Derivatives are initially recognised at fair value at the date the contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedging relationship and the nature of the hedged item.

Changes in fair value of the designated portion of derivatives that qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk.

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in the profit or loss.

Impairment of financial assets

The Company applies the expected credit loss (ECL) model for recognising impairment loss on financial assets. With respect to trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write- off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

3.12 Foreign exchange transactions and translation

Transactions in foreign currencies i.e. other than the Company's functional currency of Indian Rupees are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the functional currency using exchange rates prevailing at the date when the fair value is determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange differences on monetary items are recognised in profit or loss in the period in which they arise except for exchange differences on transactions entered into in order to hedge certain foreign currency risks (refer policy on Derivative Financial Instruments).

3.13 Investments

Investments that are readily realisable and intended to be held for not more than a year from the date of acquisition are classified as current investments.

All other investments are classified as long-term investments.

Investment in subsidiaries are measured at cost as per Ind AS 27 - Separate Financial Statements.

(Currency : Indian rupees in lakhs)

Any reductions in the carrying amount and any reversals of such reductions are charged or credited to the Statement of profit and loss.

Cost of investments include acquisition charges such as brokerage, fees and duties.

3.14 Government grants

Government grants related to property, plant and equipment's are recognised and presented by deducting the grant from the carrying amount of the assets at fair value when there is reasonable assurance that they will be received and the Company will comply with the conditions associated with the grant.

3.15 Cost recognition

Costs and expenses are recognised when incurred and have been classified according to their primary nature.

The costs of the Company are broadly categorised in employee benefit expenses, depreciation and amortisation and other operating expenses. Employee benefit expenses include employee compensation, allowances paid, contribution to various funds and staff welfare expenses. Other operating expenses majorly include fees to external consultants, cost running its facilities, travel expenses, cost of hardware and software bought for reselling, communication costs and other expenses. Other expenses is an aggregation of costs which are individually not material such as commission and brokerage, bank charges, freight and octroi etc.

Finance costs

The Company's finance costs include:

(i) Interest expense on borrowings and overdrafts

(ii) Interest expense on inter corporate deposits

Interest expense is recognised using effective interest method based on interest rates specified/ implicit in the transactions.

3.16 Earnings per share

Basic EPS is computed by dividing the Profit or loss attributable to the equity shareholders of the Company by the weighted average number of Ordinary shares outstanding during the year.

Diluted EPS is computed by adjusting the profit or loss attributable to the ordinary equity shareholders and the weighted average number of ordinary equity shares, for the effects of all dilutive potential Ordinary shares except where the results would be anti-dilutive.

3.17 Research and development expenses

Research expenditure is charged to the Statement of Profit and Loss. Development costs of products are also charged to the Statement of Profit and Loss unless a product's technical feasibility has been established, in which case such expenditure is capitalised. Tangible assets used in research and development are capitalised.

3.18 Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Company is committed to a sale plan involving disposal of an investment, the investment that will be disposed of is classified as held for sale when the criteria described above are met.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell.

3.19 Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/ (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating investing and financing activities of the Company are segregated based on the available information.

3.20 Borrowing costs

Borrowing costs are interest and ancillary costs incurred in connection with the arrangement of borrowings. General and specific borrowing costs attributable to acquisition and construction of any qualifying asset (one that takes a substantial period of time to get ready for its designated use or sale) are capitalised until such time as the assets are substantially ready for their intended use or sale, and included as part of the cost of that asset. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All the other borrowing costs are recognised in the Statement of Profit and Loss within Finance costs of the period in which they are incurred.

3.21 Leases

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of- use asset reflects that the Company will exercise a purchase option. In that case the right-of- use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee:

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The Company presents right-of-use assets that do not meet the definition of investment property in 'property and equipment' and lease liabilities in the statement of financial position.

The Company has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term

(Currency : Indian rupees in lakhs)

of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the term of the relevant lease.

3.22 Segment reporting

Operating segments are defined as components of an enterprise for which discrete financial information is available that is evaluated regularly by the chief operating decision maker, in deciding how to allocate resources and assessing performance. The Company's chief operating decision maker is the Managing Director and CEO of the Company.

Segment revenue, segment expenses, segment assets and segment liabilities have been identified to segments on the basis of their relationship to the operating activities of the segment. Inter segment revenue is accounted on the basis of transactions which are primarily determined based on market/fair value factors. Revenue, expenses, assets and liabilities which relate to the Company as a whole and are not allocable to segments on a reasonable basis have been included under "unallocated revenue/expenses/assets/liabilities".

3.23 Accounting of Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised, when there is a present legal or constructive obligation as a result of past events, where it is probable that there will be outflow of resources to settle the obligation and when a reliable estimate of the amount of the obligation can be made.

Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. Where the effect is material, the provision is discounted to net present value using an appropriate current market based pre-tax discount rate and the unwinding of the discount is included in finance costs.

Contingent liabilities are recognised only when there is a possible obligation arising from past events, due to occurrence or non-occurrence of one or more uncertain future events, not wholly within the control of the Company, or where any present obligation cannot be measured in terms of future outflow of resources, or where a reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

Contingent assets are not disclosed in the financial statements unless an inflow of economic benefits is probable.

3.24 Cash and cash equivalents

The Group considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Company's cash management.

4 Property, plant and equipment and Capital work in-progress

Note:

Out of the total packhouse subsidy of Rs. 463.70 lacs granted by the Ministry of Food Processing Industries, the Company has receievd a subsidy of Rs. 152.48 lacs in the current year (Rs.185.48 lacs for year ended 31 March 2020) which has been shown as deduction/ adjustments during the year.

5A Other intangible assets

5A Assets held for sale

Board had approved in its meeting held on 20 March 2019, to transfer the Samriddhi and My Agri Guru Businesses to Mahindra and Mahindra Limited on the basis of valuation report by MSKA & Associates.

Further during the previous year, the Company had entered into a business transfer agreement (BTA) dated 12 October 2018 between Mahindra Agri Solutions Limited ("the Company") and Mahindra Summit Agriscience Limited ("MSAL"). Pursuant to this agreement, Cropcare business of the Company is transferred to MSAL on slump sale basis for fully paid equity shares of MSAL valued at Rs 12,810 Lakhs and acquired 100% shareholding in MSAL.

However in April 2019, 30% shareholding of MSAL was sold to Summito corporation and 10% sold to Summit Agri International Limited

A. Assets held for sale

 # Unrecognised deferred tax assets

Deferred tax assets (DTA) have not been recognised, because it is not probable that future taxable profit will be available against which the Company can use the benefits therefrom:

Deferred tax assets for the carry forward of unused tax losses are recognised to the extent that it is probable that future taxable profits will be available against which the unused tax losses can be utilised. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets - unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

The description of the nature and purpose of each reserve within equity is as follows:

a) Capital reserve is created on account of business combination.

b) Securities premium is received pursuant to the further issue of equity shares at a premium net of the share issue expenses. This is a non-distributable reserve except for the following instances where the the share premium account may be applied;

   i) towards the issue of unissued shares of the Company to the members of the Company as fully paid bonus shares;

   ii) for the purchase of its own shares or other securities;

   iii) in writing off the preliminary expenses of the Company;

   iv) in writing off the expenses of, or the commission paid or discount allowed on, any issue of shares or debentures of the Company; and

   v) in providing for the premium payable on the redemption of any redeemable preference shares or of any debentures of the Company.

c) Share options outstanding account represent the equity-settled shares and share options granted to employees (refer note 36). The reserve is made up of the cumulative value of services received from employees recorded over the vesting period commencing from the grant date of equity-settled shares and share options and is reduced by the expiry of the share options.

d) The Company has designated its hedging instruments obtained after 1 April 2017 as cash flow hedges and any effective portion of cash flow hedge is maintained in the said reserve. In case the hedging becomes ineffective, the amount is recognised in the Statement of profit and loss.

e) **Terms of Optionally Convertible Redeemable Preference Shares (OCRPS)**

   Conversion:- The conversion ration shall be 1 equity share for every 1 OCPRS held by the shareholders in the company. The minimum holding period will be 6 months. The conversion shall be at the discretion of the Option Holder at any time after the minimum holding period.

   Redemption:- The maturity of the OCPRs shall be 20 years from the date of allotment. The OCPRS shall be redeemed at face value at maturity.

   Transferability:- OCPRS shall be transferrable, subject to the prior consent of the company.

   Dividend:- The holders of the OCPRS shall carry a cumulative dividend at the fixed rate of 6% per year, out of the profits of the company and the payment of such dividend shall have priority over any dividend rights of the equity shares.

   Voting and other rights:- (i) The preference shares shall carry rights as per the provision of section 47(2) of the Companies Act, 2013. (ii) The Preference shares shall have priority with respect to payment of dividend and repayment of capital vis-a-vis equity shares.(iii) The Preference shareholdershall not have the right of participation in surplus assets and profits, on winding up of the company, which may remain after the entire capital has been repaid.

30 Employee benefits expenses

(i) Defined contribution plans:

The Company's contribution to Provident Fund and Superannuation Fund aggregating Rs. 120.10 lakhs 31 March 2021 (31 March 2020 : Rs.93.85 lakhs) has been recognised in the Statement of Profit or Loss under the head Employee benefits expenses.

(ii) Defined benefit plans:

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. The Company makes annual contribution to the group gratuity scheme administered by the Life Insurance Corporation of India.

	Funded Plan Gratuity	
Particulars	Year ended 31 March 2021	Year ended 31 March 2020
Expense recognised in the Statement of Profit and Loss:		
Current service cost	**33.18**	33.11
Net interest expense	**9.75**	14.31
Components of defined benefit costs reconised in profit or loss	**42.92**	47.42
1. Changes in financial assumptions	–	13.52

4. Benefit payments	**(14.97)**	(49.28)
5. Others (transfer of Cropcare buisness)	**120.21**	(61.50)
6. Present value of defined benefit obligation at the end of the year	**329.20**	193.59

(Currency : Indian rupees in lakhs)

Particulars	Funded Plan Gratuity Year ended 31 March 2021	Year ended 31 March 2020
III. Change in fair value of assets during the year		
1. Fair value of plan assets at the beginning of the year	**28.88**	26.81
2. Expenses recognised in Profit and Loss Account		
– Expected return on plan assets	**–**	–
3. Recognised in other comprehensive income	**–**	–
Remeasurement gains/(losses)	**–**	–
– Actual Return on plan assets in excess of the expected return	**1.93**	2.07
– Interest on plan assets	**–**	–
4. Contributions by employer (including benefit payments recoverable)	**14.97**	49.28
5. Benefit payments	**(14.97)**	(49.28)
6. Fair value of plan assets at the end of the year	**30.81**	28.88
IV. The major categories of plan assets		
Life insurance corporation fund	**30.81**	28.88
V. Actuarial assumptions		
1. Discount rate	**5.60%**	5.60%
2. Salary escalation	**8.50%**	8.50%
3. Attrition rate	**23%**	22%
4. Mortality rate	**The Indian Assured Lives Mortality (2006-08) Ult table**	The Indian Assured Lives Mortality (2006-08) Ult table

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Principal assumption		Changes in assumption	Impact on defined benefit obligation	
			Increase in assumption	**Decrease in assumption**
Discount rate	**31 March 2021**	**1.00%**	**-3.79%**	**4.09%**
	31 March 2020	1.00%	-4.34%	4.72%
Salary growth rate	**31 March 2021**	**1.00%**	**3.93%**	**-3.27%**
	31 March 2020	1.00%	4.54%	-4.27%

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous year.

The Company expects to contribute Rs.10 lakhs to the gratuity trusts during the next financial year.

Maturity profile of defined benefit obligation:

	As at 31 March 2021	As at 31 March 2020
Within 1 year	**71.51**	39.10
1 - 2 year	**58.45**	31.44
2 - 3 year	**86.22**	29.02
3 - 4 year	**35.26**	26.88
4 - 5 year	**30.55**	24.00
5 - 6 year	**25.16**	18.60
6 - 7 year	**28.28**	15.85
7 - 8 year	**15.81**	19.40
8 - 9 year	**15.13**	9.36
10 year and above	**54.56**	43.29

Plan assets

The fair value of Company's pension plan asset as of 31 March 2021 and 31 March 2020 by category are as follows:

	As at 31 March 2021	As at 31 March 2020
Asset category:		
Deposits with Insurance companies	**30.81**	28.88
	100%	100%

The Company's policy is driven by considerations of maximizing returns while ensuring credit quality of the debt instruments. The asset allocation for plan assets is determined based on investment criteria prescribed under the Indian Income Tax Act, 1961, and is also subject to other exposure limitations. The Company evaluates the risks, transaction costs and liquidity for potential investments. To measure plan asset performance, the Company compares actual returns for each asset category with published benchmarks.

The weighted average duration of the defined benefit obligation as at 31 March 2021 is 3.93 years (31 March 2020 - 4.52 years)

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation.

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The current service cost and the net interest expense for the year are included in the employee benefits expense in profit or loss of the expense for the year, an amount of Rs 42.92 lakhs (31 March 2020 : Rs. 47.42 lakhs) has been included in statement of profit or loss under the head Employee benefit expenses.

Compensated absenses :

Compensated absences for the employee benefits of Rs. 220.76 lakhs (31 March, 2020 - Rs. 182.60 lakhs) expected to be paid in exchange for the services recognised as a expenses during the year. (refer note 25)

Note No. 31 - Earnings per Share

Particulars	Year ended 31 March 2021 Per Share	Year ended 31 March 2020 Per Share
Basic and Diluted loss per share (Rs.)	**(6.49)**	(2.57)

(Currency : Indian rupees in lakhs)

Earnings per share

The earnings and weighted average number of ordinary shares used in the calculation of basic earnings per share are as follows:

Particulars	Year ended 31 March 2021	Year ended 31 March 2020
Loss for the year attributable to owners of the Company	**(5,672.71)**	(1,918.87)
Weighted average number of equity shares for the purpose of basic earnings per share	**87,421,594**	74,548,572
Basic loss per share (Rs.)	**(6.49)**	(2.57)
Weighted average number of equity shares for the purpose of dilutive earnings per share	**–**	–
Diluted loss per share (Rs.)	**#**	#

The effect of conversion of 6% Optionally Convertible Redeemable Preference Shares into equity shares being anti-dilutive, has not been considered for the purpose of computing diluted loss per share

32 Fair value measurement

Fair valuation techniques and inputs used - recurring items

The carrying values of financial assets and liabilities represent their approximate fair value.

There were no transfer between level 1 and level 2 during the year.

33 Financial risk management

A) Capital management

The Company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

The Company manages capital risk in order to maximize shareholders' value by maintaining sound/optimal capital structure through monitoring of financial ratios, such as net debt-to-equity ratio and net borrowings-to-equity ratio on a monthly basis and implements capital structure improvement plan when necessary. There is no change in the overall capital risk management strategy of the Company compared to last year.

The Company uses net debt equity ratio as a capital management index and calculates the ratio as total liabilities divided by total equity. Total liabilities and total equity are based on the amounts stated in the separate financial statements.

The Company is not subject to externally enforced capital regulation.

Net debt-to-equity ratio as of 31 March 2021 and 31 March 2020

	As at 31 March 2021	As at 31 March 2020
Borrowing from banks	**4,547.12**	4,375.74
Borrowing from related party	**–**	–
Gross debt	**4,547.12**	4,375.74
Less :		
Cash and cash equivalents	**737.00**	1,070.99
Net debt (A)	**3,810.12**	3,304.74
Equity share capital	**9,417.31**	8,127.10
Other equity	**(2,881.25)**	(104.57)
Equity (B)	**6,536.06**	8,022.54
Debt ratio (A/B)	**0.58**	0.41

B) Financial risk management framework

The Company's corporate treasury function provides services to the business, co-ordinates access to domestic financial markets, monitors and manages the financial risk relating to the operation of the Company through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

i) CREDIT RISK

Credit risk management

Credit risk arises when a customer defaults on its contractual obligations to pay resulting in financial loss to the Company. The Company has adopted a policy of categorising the customers based on the performance and accordingly credit limit ceiling of each category is defined. Company also takes credit insurance for business specific customers. The Company's exposure and categorisation of its customers are continuously monitored . Credit exposure is controlled by customer credit limits which are reviewed and approved. The Company also take security cheques from its domestic market customers.

The Company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company and individual receivable specific provision where applicable. Forward-looking information has been incorporated into the determination of expected credit losses.

There is no change in estimation techniques or significant assumptions during the reporting period.

The provision matrix at the end of the reporting period is as follow:-

Ageing	For the year ended 31 March 2021 Expected credit loss (%)	For the year ended 31 March 2021 Expected credit loss (Rs. In lakhs)	For the year ended 31 March 2020 Expected credit loss (%)	For the year ended 31 March 2020 Expected credit loss (Rs. In lakhs)
Within the credit period	**0.32%**	**17.80**	0.07%	2.90
0-3 month past due	**6.50%**	**7.36**	0.39%	4.39
3-6 month past due	**6.61%**	**13.62**	0.52%	1.51
6 -12 month past due	**16.32%**	**37.00**	5.87%	14.26
>1 year	**77.35%**	**726.76**	90.72%	714.26
Total		**802.54**		737.33

Age of receivables	As at 31 March 2021	As at 31 March 2020
Within the credit period	**5,608.55**	4,105.85
0-3 month past due	**113.24**	1,138.87
3-6 month past due	**206.21**	290.10
6 -12 month past due	**226.65**	243.08
>1 year	**939.59**	787.33
Total	**7,094.24**	6,565.23

(Currency : Indian rupees in lakhs)

Reconciliation of provision for doubtful Trade Receivables

Particulars	**As at 31 March 2021**	As at 31 March 2020
Balance as at beginning of the year	**737.33**	690.02
Impairment losses recognised in the year based on lifetime expected credit losses	**–**	53.13
Provision created during the year	**65.21**	47.31
Transferred on account of transfer of Business	**–**	–
Impairment losses reversed/ written back	**–**	(53.13)
Balance at end of the year	**802.54**	737.33

The concentration of credit risk is limited due to the fact that the customer base is large and unrelated.

The Company has pledged an aggregated carrying amount of Rs 7,094.24 lakhs (31 March 2020: Rs 6,565.23 lakhs) for bank loans.

ii) LIQUIDITY RISK

(a) Liquidity risk management

The board of directors has established an appropriate liquidity risk management framework for the management of the Company's short, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(b) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

Particulars	**Less than 1 Year**	**1-3 Years**	**3 Years to 5 Years**	**5 years and above**
Non-derivative financial liabilities				
As at 31 March 2021				
Borrowings	**5,076.49**	**560.00**	**587.65**	**3,122.97**
Trade payables	**9,545.49**	**–**	**–**	**–**
Other financial liabilities	**695.42**	**–**	**–**	**–**
Total	**15,317.40**	**560.00**	**587.65**	**3,122.97**
As at 31 March 2020

Trade payables	9,357.57	–	–	–
Other financial liabilities	621.91	–	–	–
Total	16,454.48	840.00	511.41	2,812.48

The following table details the Company's/Company's liquidity analysis for its derivative financial instruments. The table has been drawn up based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement.

Particulars	**Less than 1 Year**	**1-3 Years**	**3 Years to 5 Years**	**5 years and above**
Derivative financial instruments				
As at 31 March 2021				
Net settled:				
– Foreign exchange forward contracts	**–**	**–**	**–**	**–**
Gross settled:				
– Foreign exchange forward contracts	**20.39**	**–**	**–**	**–**
Total	**20.39**	**–**	**–**	**–**
As at 31 March 2020				
Net settled:				
– Foreign exchange forward contracts	–	–	–	–
Total	–	–	–	–
Gross settled:				
– Foreign exchange forward contracts	(52.64)	–	–	–
Total	(52.64)	–	–	–

(c) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Particulars	**Less than 1 Year**	**1-3 Years**	**3 Years to 5 Years**	**5 years and above**
Non-derivative financial assets				
As at 31 March 2021				
Non-interest bearing	**8,494.02**	**–**	**–**	**9,544.90**
Fixed interest rate instruments	**–**	**–**	**–**	**–**
Total	**8,494.02**	**–**	**–**	**9,544.90**
As at 31 March 2020				
Non-interest bearing	8,135.74	–	–	11,986.61
Fixed interest rate instruments	–	–	–	–
Total	8,135.74	–	–	11,986.61

In the case of assets falling short of liabilities, banking facilities are available to honor the obligation through as cash credit, short-term borrowing/long-term borrowing and other necessary banking facilities.

The carrying amount of inventories pledged as security for working capital loan is Rs.6155.86 lakhs (31 March 2020: Rs 5,532.66 lakhs).

iii) MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company uses

(Currency : Indian rupees in lakhs)

permitted derivatives to manage market risks . Derivatives are only used for economic hedging purposes and not as speculative investments. All such transactions are carried out within the guidelines set by the Board of Directors and Forex & investment Management Committee.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

a) Currency risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's exposure to currency risk relates primarily to the Company's operating activities and borrowings when transactions are denominated in a different currency from the Company's functional currency.

The Company manages its foreign currency risk by taking forward cover that are expected to occur within a maximum 12 month period for forecasted cash flow.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

Particulars	Currency	As at 31 March 2021	As at 31 March 2020
Trade receivables	USD	**2,434.49**	1,690.06
	EUR	**1,572.55**	1,658.89
	CAD	**995.42**	912.03
	GBP	**249.11**	433.67
Trade payables	USD	**838.20**	131.55
	EUR	**2.57**	211.68
	CAD	**–**	12.40
	GBP	**1.11**	41.73
Advance given	EUR	**–**	–
Advances received	USD	**112.41**	–
	EUR	**12.20**	145.26

Of the above foreign currency exposures, the following exposures are not hedged by a derivative:

Particulars	Currency	As at 31 March 2021	As at 31 March 2020
Trade receivables	USD	**1,736.22**	1,690.06
	EUR	**894.09**	188.89
	CAD	**439.36**	869.49
	GBP	**249.11**	433.67
Trade payables	USD	**838.20**	131.55
	EUR	**2.57**	211.68
	CAD	**–**	12.40
	GBP	**1.11**	41.73

Note :- Forward Cover in EURO 7.99 lakhs (Rs. 678.46 lakhs), USD 9.49 lakhs (Rs. 698.28 lakhs) and CAD 9.54 (Rs. 556.06 lakhs) as at 31 March 2021 Forward cover of EURO 17.90 lakhs (Rs 1,470.00 lakhs) and CAD 0.81 lakhs (Rs 42.54 lakhs) as at 31 March 2020

b) Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD and EUR exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives. The impact on the Company's pre-tax equity is due to changes in the fair value of forward exchange contracts.

Period	Currency	Change in rate	Effect on profit/ (loss) before tax	Effect on pre-tax equity
As at 31 March 2021	**USD**	**5%**	**44.90**	**44.90**
	USD	**3%**	**26.94**	**26.94**
	EUR	**5%**	**44.58**	**44.58**
	EUR	**3%**	**26.75**	**26.75**
	CAD	**5%**	**21.97**	**21.97**
	CAD	**3%**	**13.18**	**13.18**
	GBP	**5%**	**12.40**	**12.40**
	GBP	**3%**	**7.44**	**7.44**
As at 31 March 2020	USD	5%	77.93	155.85
	USD	3%	46.76	46.76
	EUR	5%	7.36	(2.28)
	EUR	3%	4.41	(0.68)
	CAD	5%	42.85	85.71
	CAD	3%	25.71	25.71
	GBP	5%	19.60	39.19
	GBP	3%	11.76	11.76

c) Interest rate sensitivity

The sensitivity analyses below have been determined based on exposure to interest rate for both derivative and non-derivative instruments at the end of reporting period. For floating rate liabilities, analysis is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole year.

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected, after the impact of hedge accounting. With all other variables held constant, the Company's profit before tax is affected through the impact on floating rate borrowings, as follows:

Period	Currency	Increase/ decrease in basis points	Effect on profit/(loss) before tax
As at 31 March 2021	**INR**	**100**	**(50.24)**
As at 31 March 2020	INR	100	(50.55)

The assumed movement in basis points for the interest rate sensitivity analysis is based on the currently observable market environment, showing a significantly higher volatility than in prior years.

Hedge accounting - forwards

It is the policy of the Company to enter into forward foreign exchange contracts to cover maximum up to 80% of the expected foreign currency exposure based on estimated cash flow. Forex Committee decide the time & quantum of hedging based on outlook.

(Currency : Indian rupees in lakhs)

(i) Details of forward foreign currency contracts outstanding at the end of reporting period

34 Segment information

A. Product and services from which reportable segments derive their revenue

Information reported to the Chief Operating Decision Maker (CODM) for the purpose of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. No operating segments have been aggregated in arriving at the reportable segments of the Group.

Specifically, the Company reportable segments under IND AS 108 are as follows:

1) Input Business

2) Food Business

3) Other Business

The Company is in the business of agricultural related products, Input business segment comprises of trading of Crop inputs. Food business comprises of trading of agricultural related outputs.

B. Segment revenue and results

The following is an analysis of the Company's revenue and results

Particulars	Segment revenue		Segment profit (loss)	
	Year ended 31 March 2021	Year ended 31 March 2020	**Year ended 31 March 2021**	Year ended 31 March 2020
Input Business	**8,735.28**	4,724.57	**(376.27)**	(2,000.99)
Food Business	**16,466.70**	22,772.91	**(706.37)**	91.70
Other Business	**–**	36.81	**(24.66)**	(295.69)
Total	**25,201.98**	27,534.29	**(1,107.30)**	(2,204.98)
Other income	–	–	**154.13**	1,707.88
Administration cost and directors' salary	–	–	**(1,245.54)**	(950.22)
Finance cost	–	–	**(592.25)**	(757.51)
Exceptional items	–	–	**(2,881.75)**	598.03
Loss before tax	–	–	**(5,672.71)**	(1,606.80)

Segment revenue reported above represents revenue generated from external customers. There were no intersegment sales.

Segment profit represents the profit before tax earned by each segment without allocation of central administration costs, director salary, other income as well as finance costs. This is the measure reported to the chief operating decision maker for the purpose of resource allocation and assessment of segment performance.

One customer contributed to the Company's revenue in year 2019-20 more than 10% (Rs 3,298.62 Lakhs) and no other single customer contributed 10% or more to the Company's revenue in the year.

C. Segment assets and liabilities

Particulars	**As at 31 March 2021**	As at 31 March 2020
Segment assets		
Input Business	**4,823.93**	4,488.82
Food Business	**12,413.35**	11,774.54
Other Business	**123.75**	203.42
Total segment assets	**17,361.03**	16,466.78
Unallocated	**11,511.18**	14,442.46
Total assets	**28,872.21**	30,909.25
Segment liabilities		
Input Business	**2,963.06**	1,830.37
Food Business	**7,107.20**	6,526.11
Other Business	**0.27**	19.46
Total segment liabilities	**10,070.53**	8,375.95
Unallocated	**12,265.65**	14,510.76
Total liabilities	**22,336.18**	22,886.71

For the purpose of monitoring segment performance:

(i) Unallocated asset includes investment in subsidaries, current and deferred taxes, loan , cash and bank balances etc.

(ii) Unallocated liability includes borrowings, current and deferred taxes, other statutory dues etc.

D. Segment depreciation and amortisation

Particulars	**Year ended 31 March 2021**	Year ended 31 March 2020

36 Employee benefits expenses - ESOP

Share based payment

A. Employees Stock Option Scheme - 2016:

This Plan shall be termed as the MASL Employees Stock Option Scheme - 2016 ("Plan"). The Plan has been approved by a Special Resolution at a General Meeting of the Shareholders held on 24 November 2016. The Plan has been approved for Eligible Employees of Mahindra Agri Solutions Limited. The Plan has also been approved to reward eligible employees whether they are working in India or abroad or Directors of the Company (including Managing Director/ Whole Time Director(s) but excluding Independent Directors) or Directors and Employees of the Holding Company or of the Subsidiary Company(ies) or of the Subsidiaries of its Holding Company.

In respect of Employee Stock Option Scheme :

The compensation cost of stock options granted to employees is measured by the Fair Value Method.

Fair value is the amount for which an asset could be exchanged, a liability settled, or an equity instrument granted could be exchanged, between knowledgeable, willing parties in an arm's length transaction, is recognised and amortised on straight line basis over the vesting period.

Eligibility:

Based on the criteria as may be decided by the Committee at its own discretion, including, but not limited to the date of joining of the Eligible Employee with the Company or the Group, performance evaluation, current compensation, criticality or any other criteria, KRA, future potential, such Eligible Employees, as determined by the Committee, may participate in the Plan. Employees joining the Company after the date of implementation of the Plan will be entitled to participate in the Plan, on a case to case basis and subject to such criteria as may be decided solely by the Committee.

The objective of the Plan is:

- To retain the best talent in the Industry
- To infuse a sense of entrepreneurship and ownership.

This purpose is sought to be achieved through the grant of Options to the Eligible Employees, to subscribe to the Equity Shares of the Company.

Details of the ESOP granted as per the above scheme

	Number of options	Grant date	Exercise price	Fair value of the option at Grant date
Cycle-I Equity Settled MASL Employees Stock Option Scheme - 2016	3,569,977	1 Feb 2017	47.5	24.15
Cycle-II Equity Settled MASL Employees Stock Option Scheme - 2016	285,401	1 May 2018	47.5	18.1
Cycle-III Equity Settled MASL Employees Stock Option Scheme - 2016	547,176	31 Jan 2020	10	22.87

Cycle-I Options granted under MASL Employees Stock Option Scheme - 2016 vest in 4 instalments bifurcated as 25% on the expiry of 14 months, 25% on the expiry of 26 months, 25% on the expiry of 38 months and 25% on the expiry of 50 months from the date of grant date.

Cycle-II Options granted under MASL Employees Stock Option Scheme - 2016 vest in 4 instalments bifurcated as 25% on the expiry of 23 months, 25% on the expiry of 35 months, 25% on the expiry of 47 months and 25% on the expiry of 59 months from the date of grant date.

Cycle-III Options granted under MASL Employees Stock Option Scheme - 2016 vest in 4 instalments bifurcated as 25% on the expiry of 14 months, 25% on the expiry of 26 months, 25% on the expiry of 38 months and 25% on the expiry of 50 months from the date of grant date.

The options may be exercised on any day over a period of 3 years from the date of vesting. Number of vested options exercisable is subject to a minimum of 250 or number of options vested whichever is lower.

Movement in share options

	Particulars	**Equity-settled share-based payments** Number of options	Weighted average exercise price
1	The number and weighted average exercise prices of share options outstanding at the beginning of the year;	3,390,374	47.50
2	Granted during the year	547,176	10.00
3	Forfeited during the year	–	–
4	Exercised during the year	–	–
5	Expired during the year	–	–
6	Outstanding at the end of the year	3,937,550	42.29
7	Exercisable at the end of the year	–	–

The share options outstanding at the end of the year had a weighted average exercise price of Rs 42.29, and a weighted average remaining contractual life of 3.9 years.

The fair value of the equity instruments is calculated based on Black Scholes model. The Black Scholes model requires the consideration of certain variables such as volatility, risk free rate, expected dividend yield, expected option life, market price and exercise price for the calculation of the option. These variables significantly influence the fair value and any change in these variables could significantly affect the fair value of the option.

The inputs used in the measurement of the fair values at grant date of the equity-settled share-based payment plans were as follows.

Share option programmes

	MASL Employees Stock Option Scheme - 2016	
	31 March 2021	31 March 2020
Share price at grant date	**47.50**	47.50
Exercise price	**47.50**	47.50
Expected volatility (weighted-average)	**58.3**	58.3
Expected life/option life (weighted-average)	**2.66**	2.66
Expected dividends yield	**0.00%**	0.00%
Risk-free interest rate (based on government bonds)	**6.25%**	6.25%

Employee share based payment	**For the Year 31 March 2021**	For the Year 31 March 2020
MASL Plan 2016	**99.11**	101.60
Debit to Mahindra HZPC Private Limited	**(1.84)**	(4.41)
Total	**97.27**	97.19

The amount of Rs. 1.84 lakhs (31 March 2020 : Rs 4.41 lakhs) charged to its subsidiary Mahindra HZPC Private Limited, for options issued to its employees.

ESOP scheme of parent company:

Certain employees of the Company are also covered by share option schemes offered by Parent Company, Mahindra & Mahindra Limited. The Company treats such share based payment as an equity settled share based payments arrangement. Options granted under Parent's ESOP scheme vests in 4 or 5 equal instalments on expiry of 12 months, 24 months, 36 months, 48 months and where applicable 60 months from the date of grant. The options may be exercised subject to condition of minimum number of option vesting, on any day over a period of four or five years, as the case may be from the date of vesting. The parent Company charges the subsidiary for the equity it provides

(Currency : Indian rupees in lakhs)

to the employees of the subsidiary over the vesting period. The charge is based on fair value of options calculated using Black and Scholes Option Pricing Model. The fair value charge in FY 2020-21 Rs. 16.14 Lakhs (FY 19-20 of Rs 22.31 Lakhs)is recognised as share based payment expenses under Employee Benefit Expenses.

B. Long-term Incentive Plan (LTI):

This Plan shall be termed as the MASL Long Term Incentive Plan (LTI) Bonus Grants for Business Leaders. The Plan has been approved by Board of Director in its meeting held on 2 May 2017. The Plan has been approved for Eligible Employees whether they are working in India or abroad as mentioned in the Plan.

In respect of Bonus Grants for Business Leaders Scheme :

The compensation cost of stock options granted to employees is measured by the Fair Value Method.

Fair value is the amount for which an asset could be exchanged, a liability settled, or an equity instrument granted could be exchanged, between knowledgeable, willing parties in an arm's length transaction, is recognised and amortised on straight line basis over the vesting period.

Eligibility:

Defined Business leaders as stated in the plan will be eligible for bonus grant. Actual vesting can be between 0 to 2x of grant based on business leaders performance. Performance of each Business shall be assessed based on the target (Revenue, PBT and ROC factors) on a cumulative basis from F18 to F20. Bonus grant vesting will be happen on achieving the qualifying target. Qualifying target is based on 80% of revenue budget and stretch level is at 130% of revenue budget as set in the plan.

The objective of the Plan is:

– To retain the best talent in the Industry

– To infuse a sense of entrepreneurship and ownership.

This purpose is sought to be achieved through the grant of Additonal Options to the eligible Business Leaders, to subscribe to the Equity Shares of the Company based on certain business performance parameters.

Details of the ESOP granted as per the above scheme

	Number of options	Grant date	Exercise price	Fair value at grant date
MASL Long Term Incentive Plan (LTI) Bonus Grants for Business Leaders	191,824	2 May 2017	47.5	105.4

Options granted under MASL Long-term Incentive Plan (LTI) Bonus Grants for Business Leaders will be vested post 12 months of F20 assessment i.e. 31 March 2021.

Movement in share options

	Particulars	MASL Long-term Incentive Plan (LTI) Bonus Grants for Business Leaders: Number of options	Weighted average exercise price
1	The number and weighted average exercise prices of share options outstanding at the beginning of the year;	191,824	47.50
2	Granted during the year	–	–
3	Forfeited during the year	–	–
4	Exercised during the year	–	–
5	Expired during the year	–	–
6	Outstanding at the end of the year	191,824	47.50
7	Exercisable at the end of the year	–	–

The fair value of the equity instruments is calculated based on Black Scholes model. The Black Scholes model requires the consideration of certain variables such as volatility, risk free rate, expected dividend yield, expected option life, market price and exercise price for the calculation of the option. These variables significantly influence the fair value and any change in these variables could significantly affect the fair value of the option.

The inputs used in the measurement of the fair values at grant date of the equity-settled share-based payment plans were as follows.

Share option programmes

	MASL Long-term Incentive Plan (LTI) Bonus Grants for Business Leaders
Share price at grant date	**132.69**
Exercise price	**47.50**
Expected volatility (weighted-average)	**55.57%**
Expected life/Option Life (weighted-average)	**5.42**
Expected dividends yield	**0.00%**
Risk-free interest rate (based on government bonds)	**6.99%**

We have not considered any provision for above scheme because based on Actual performance of F-18, Board approved budget of F-19 and projection for F-20, it evident that basic eligibility criterion and performance condition of Scheme for grant of options are not going to trigger in any business.

37 Capital commitments

Commitment

Estimated amount of contracts remaining to be executed on capital account and not provided for as at 31 March 2021 is Rs NIL (31 March 2020 is Rs 35.24 lakhs).

41 Exceptional items

The Company classifies items of income and expense within profit or loss from ordinary activities as exceptional items when they are of such size, nature or incidence that their disclosure is relevant to explain the performance for the period.

Exceptional Items (net) recognised in profit or loss

Particulars	31 March 2021	31 March 2020
Impairment of certain investments #	(2,881.75)	–
Gain of transfer of certain investments ##	–	598.03

The Company has long-term investments in subsidiaries, associates and joint ventures which are measured at cost less impairment or at Fair value through other comprehensive income. The management assesses the performance of these entities including the future projections and relevant economic and market conditions in which they operate to identify if there is any indicator of impairment in the carrying value of the investments. In case indicators of impairment exist, the impairment loss is measured by estimating the recoverable amounts based on the higher of (i) 'fair value less cost of disposal' determined using market price information, where available, and (ii) 'value-in-use' estimates determined using discounted cash flow projections, where available.

The fair value less costs of disposal is determined using the market approach and is categorised as Level 1 in the fair value hierarchy. The future cash flow projections are specific to the entity based on its business plan and may not be the same as those of market participants. The future cash flows consider key assumptions such as volume projections, margins, terminal growth rates, etc. with due consideration for the potential risks given the current economic environment in which the entity operates. The discount rates used are pre-tax rates based on weighted average cost of capital and reflects market's assessment of the risks specific to the asset as well as time value of money. The recoverable amount estimates are based on judgments, estimates, assumptions and market data as on reporting date and ignore subsequent changes in the economic and market conditions.

During the year ended 31 March 2021, the performance of certain subsidiaries and associates along with the relevant economic and market indicators including the impact of uncertainties arose from Covid-19 resulted in indicators of impairment in respect of certain entities. Accordingly, the Company determined the recoverable amounts for these investments and recorded a provision for impairment of Rs. 2,881.75 lakhs (31 March 2019 : Rs. Nil lakhs) for the year ended 31 March 2021. The value-in-use calculation use discount rates ranging from 19% - 20% and the terminal growth rates ranging from 4% - 5%.

Gain on Slump sale of Cropcare business

During the financial year 2018-19, the Company had entered into a business transfer agreement (BTA) dated 12 October 2018 between Mahindra Agri Solutions Limited ("the Company" or MASL) and Mahindra Summit Agriscience Limited ("MSAL"). Pursuant to this agreement, Cropcare business of the Company had been transferred to MSAL on slump sale basis for fully paid equity shares of MSAL valued at Rs 12,810 lakhs and acquired 100% shareholding in MSAL. The Company had recorded a gain of Rs 4,909.31 Lakhs on this transaction as an exceptional item for the year ended 31 March 2019.

Subsequent to the execution of the above slump sale transaction, in April 2019 30% shareholding of MSAL was sold to the Summito corporation and 10% shareholding of MSAL to Summit Agro International Ltd.

The Company has recorded a gain of Rs 598.03 lakhs on this transaction as an exceptional item for the year ended 31 March 2020.

42 Contingent liabilities

The Company is involved in a number of appellate, judicial and arbitration proceedings (including those described below) concerning matters arising in the course of conduct of the Company's businesses. Some of these proceedings in respect of matters under litigation are in early stages, and in some other cases, the claims are indeterminate. A summary of claims asserted on the Company in respect of these cases have been summarised below.

A. Tax contingencies

Amounts in respect of claims asserted by various revenue authorities on the Company, in respect of taxes, which are in dispute, have been tabulated below:

Nature of Tax	31 March 2021	31 March 2020
Value Added Tax	60.56	40.80
Sales Tax	67.81	11.66
Total	128.37	52.46

The management believes that the claims made are untenable and is contesting them. As of the reporting date, the management is unable to determine the ultimate outcome of above matters. However, in the event the revenue authorities succeed with enforcement of their assessments, the Company may be required to pay some or all of the asserted claims and the consequential interest and penalties, which would reduce net income and could have a material adverse effect on net income in the respective reported period.

B. In February 2019, the Supreme Court of India in its judgement clarified the applicability of allowances that should be considered to measure obligations under Employees Provident Fund Act, 1952. The Company has been legally advised that there are interpretative challenges on the application of judgement retrospectively and as such does not consider there is any probable obligations for past periods. Accordingly, based on legal advice the Company has made a provision for provident fund contribution from the date of the Supreme Court order.

43 Recent Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2021.

Recent pronouncements

On March 24, 2021, the Ministry of Corporate Affairs ("MCA") through a notification, amended Schedule III of the Companies Act, 2013 revising Division I, II and III of Schedule III and are applicable from April 1, 2021. The amendments primarily relate to

a) Change in existing presentation requirements for certain items in Balance sheet, for eg. lease liabilities, security deposits, current maturities of long term borrowings, effect of prior period errors on Equity Share capital

b) Additional disclosure requirements in specified formats, for eg. ageing of trade receivables, trade payables, capital work in progress, intangible assets, shareholding of promoters, etc.

c) Disclosure if funds have been used other than for the specific purpose for which it was borrowed from banks and financial institutions.

d) Additional Regulatory Information, for eg.,compliance with layers of companies, title deeds of immovable properties, financial ratios, loans and advances to key managerial personnel, etc.

e) Disclosures relating to Corporate Social Responsibility (CSR), undisclosed income and crypto or virtual currency.

(Currency : Indian rupees in lakhs)

The amendments are extensive and the Company is evaluating the same.

44 Impact of Covid-19

The country was in a crisis situation due to COVID-19, which had been declared as pandemic by World Health Organization. The countrywide lockdown was declared by Govt of India covered a part of financial year ended 31 March 2021. However, the Government of India has made certain allowances for movement of agricultural inputs during this period being essential item for agriculture. Based on the operations for the financial year ended 31 March 2021, the Company believes that, there is no significant impact of COVID-19 pandemic on the financial position and performance of the Company for the financial year ended 31 March 2021.

45 Disclosure on Specified Bank Notes (SBNs)

The disclosures in the financial statements regarding holdings as well as dealings in Specified Bank Notes during the period from 8 November 2016 to 30 December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31 March 2021.

46 The figures for the previous year have been regrouped/reclassified to correspond with the current year's classification/disclosures that include changes consequent to the issuance of "Guidance Note on Division II - Ind AS Schedule III to the companies Act 2013".

47 Other matters

Information with regard to other matters specified in Schedule III to the Act is either nil or not applicable to the Company for the year.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF
MAHINDRA SUMMIT AGRISCIENCE LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Mahindra Summit Agriscience Limited ("the Company"), which comprise the balance sheet as at 31 March 2021, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under Section 143(10) of the Act. Our responsibilities under those SAs are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's Director report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors' Responsibility for the Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, profit/loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. (A) As required by Section 143(3) of the Act, we report that:
    a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
    b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
    c) The balance sheet, the statement of profit and loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows dealt with by this Report are in agreement with the books of account.
    d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under Section 133 of the Act.
    e) On the basis of the written representations received from the directors as on 31 March 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2021 from being appointed as a director in terms of Section 164(2) of the Act.
    f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

    (B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    i. The Company does not have any pending litigations which would impact its financial position.
    ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
    iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year ended 31 March 2021.
    iv. The disclosures regarding holdings as well as dealings in specified bank notes during the period from 8 November 2016 to 30 December 2016 were not applicable since the Company was incorporated on 9 October 2018.

    (C) With respect to the matter to be included in the Auditors' Report under Section 197(16):

In our opinion and according to the information and explanations given to us, the remuneration paid by the Company to its directors during the current year is in accordance with the provisions of Section 197 of the Act. The remuneration paid to any director is not in excess of the limit laid down under Section 197 of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

ANNEXURE A TO THE INDEPENDENT AUDITORS' REPORT – 31 MARCH 2021

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

i. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) The Company has a programme of physical verification of its fixed assets by which all fixed assets are verified once in three years, pursuant to which the fixed assets were physically verified in the financial year ended 31 March 2020. No material discrepancies were noticed on such verification. All discrepancies have been dealt with in the books of account.

(c) In our opinion and according to the information and explanations given to us and on the basis of examination of records of the Company, the title deeds of immovable properties which are freehold land and freehold building as disclosed in Note 4 to the financial statements are held in the name of the Company.

ii. The inventory, except for goods-in-transit and stocks lying with third parties, has been physically verified by the management during the year. In our opinion, the frequency of such verification is reasonable. In respect of stocks lying with third parties at the year-end, written confirmations have been obtained. The discrepancies noticed on verification between the physical stocks and the book records were not material and have been dealt with in books of account.

iii. According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, paragraph 3 (iii) of the Order is not applicable to the Company.

iv. According to the information and explanations given to us, the Company has not granted any loan or made any investment or given any guarantee or provided any security under Section 185 and 186 of the Act. Accordingly, paragraph 3(iv) of the Order is not applicable to the Company.

v. In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits from the public during the year in terms of the provisions of Sections 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, paragraph 3 (v) of the Order is not applicable to the Company.

vi. In our opinion, and according to the information and explanations given to us, the maintenance of cost records under section 148 (1) of the Act is not applicable to the Company under Companies (Cost Record and Audit) Rules, 2014.

vii. (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted/ accrued in the books of account in respect of undisputed statutory dues of Provident Fund, Employees' State Insurance, Income Tax, Goods and Service Tax, Profession Tax and other material statutory dues have generally been regularly deposited with the appropriate authorities. As explained to us, the Company did not have any dues on account of Duty of Customs, Sales Tax, Excise Duty, Value added Tax and cess.

According to the information and explanations given to us, no undisputed amounts payable in respect of Provident fund, Employees' State Insurance, Income Tax, Goods and Service Tax, Profession Tax and other material statutory dues were in arrears as at 31 March 2021 for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, there are no dues of Income Tax and Goods and Service Tax as at 31 March 2021, which have not been deposited with the appropriate authorities on account of any dispute.

viii. In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of loan or borrowing to the bank. The Company has not taken any loans or borrowings from any financial institution or government nor has issues any debenture during the year.

ix. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not raised any moneys by way of initial public offer or further public offer (including debt instruments) and has not obtained any term loans during the year. Accordingly, paragraph 3 (ix) of the Order is not applicable to the Company.

x. During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India, and according to the information and explanations given to us, we have neither come across any instance of fraud by the Company or any material instances of fraud on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of any such case by the management.

xi. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has paid / provided for managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Act.

xii. In our opinion and according to the information and explanations given to us, the Company is not a Nidhi

Company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, paragraph 3 (xii) of the Order is not applicable to the Company.

xiii. According to the information and explanations given to us by the management, the Company has entered into transactions with related parties in compliance with the provisions of Section 188 of the Act, where applicable and the details of such related party transaction have been disclosed in the financial statements as required by Ind AS 24 Related Party Disclosures specified under Section 133 of the Act. The Company does not fall under the definition of a listed company or other class of companies which is required to constitute an audit committee under Section 177 of the Act and therefore the said Section is not applicable to the Company.

xiv. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year. Accordingly, paragraph 3 (xiv) of the Order is not applicable to the Company.

xv. According to the information and explanations given to us and based on our examination of the records of the Company, the Company has not entered into non-cash transactions with directors or persons connected with them. Accordingly, paragraph 3 (xv) of the Order is not applicable to the Company.

xvi. According to the information and explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi) of the Order is not applicable to the Company.

ANNEXURE B TO THE INDEPENDENT AUDITORS' REPORT ON THE FINANCIAL STATEMENTS OF MAHINDRA SUMMIT AGRISCIENCE LIMITED FOR THE YEAR ENDED 31 MARCH 2021

Report on the internal financial controls with reference to the aforesaid financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

(Referred to in paragraph 1(A)(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Opinion

We have audited the internal financial controls with reference to financial statements of Mahindra Summit Agriscience Limited ("the Company") as of 31 March 2021 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2021, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to the financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2021 (CURRENCY: INDIAN RUPEES IN LAKHS)

1. Corporate information

Mahindra Summit Agriscience Limited ("the Company") a Public Limited Company domiciled in India and incorporated on 9 October 2018 under the provisions of the Companies Act, 1956 (CIN : U01400MH2018PLC315558).

The Company is primarily engaged in the business of manufacture and marketing of Agri Inputs. The Company has its manufacturing facilities in India and sells in India. Mahindra Agri Solutions Limited owns 60% of the Company's equity share capital as at 31 March 2021.

The financial statements for the year ended 31 March 2021 were approved by the Board of Directors and authorised for issue on 26 April 2021.

2. Statement of compliance and basis of preparation and presentation

2.1 Basis of preparation and presentation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards as per the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 (the 'Act') and other relevant provisions of the Act.

The financial statements are presented in Indian Rupees (INR) which is also the Company's functional currency. All values are rounded to the nearest lakhs.

2.2 Basis of measurement

The financial statements have been prepared on the historical cost basis except for certain financial instruments and agricultural produce that are measured at fair value at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

2.3 Measurement of fair value

All assets and liabilities for which fair value is measured or disclosed in the Standalone financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

2.4 Functional and presentation currency

The financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All amounts have been rounded-off to the nearest Rupee in lakhs, unless otherwise indicated.

2.5 Critical accounting judgements and key sources of estimation uncertainty

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates under different assumptions and conditions.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

i. Critical Judgements

In the process of applying the Company's accounting policies, management has made the following judgements, which have the most significant effect on the amounts recognised in the financial statements.

Discount rate used to determine the carrying amount of the Company's employee defined benefit obligation

In determining the appropriate discount rate for plans operated in India, the management considers the interest rates of government bonds in currencies consistent with the currencies of the post-employment benefit obligation.

ii. Key sources of estimation uncertainty

The key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

Useful lives of property, plant and equipment

As described in Note 3.6, the Company reviews the estimated useful lives and residual values of property, plant and equipment at the end of each reporting period. During the current financial year, the management has reassessed the useful lives of certain property, plant and equipment and the impact of the change is not material for the year. There were no changes in residual values of the property, plant and equipment.

Allowances for doubtful debts

The Company makes allowances for doubtful debts based on an assessment of the recoverability of trade and other receivables. The identification of doubtful debts requires use of judgments and estimates. Where the expectation is different from the original estimate, such difference will impact the carrying value of the trade and other receivables and doubtful debts expenses in the period in which such estimate has been changed.

Allowances for inventories

Management reviews the inventory age listing on a periodic basis. This review involves comparison of the carrying value of the aged inventory items with the respective net realizable value. The purpose is to ascertain whether an allowance is required to be made in the financial statements for any obsolete and slow-moving items. Management is satisfied that adequate allowance for obsolete and slow-moving inventories has been made in the financial statements.

Liability for sales return

In making judgment for liability for sales return, the management considered the detailed criteria for the recognition of revenue from the sale of goods set out in Ind AS 115 and in particular, whether the Company had transferred to the buyer the significant risk and rewards of ownership of the goods. Following the detailed quantification of the Company's liability towards sales return, the management is satisfied that significant risk and rewards have been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate liability for sales return. Accruals for estimated product returns, which are based on historical experience of actual sales returns and adjustment on account of current market scenario is considered by Company to be reliable estimate of future sales returns.

Goodwill impairment

In making judgment for liability for sales return, the management considered the detailed criteria for the

Goodwill is tested for impairment on an annual basis and whenever there is an indication that the recoverable amount of a cash generating unit is less than its carrying amount based on a number of factors including operating results, business plans, future cash flows and economic conditions. The recoverable amount of cash generating units is determined based on higher of value-in-use and fair value less cost to sell. The goodwill impairment test is performed at the level of the cash-generating unit or groups of cash-generating units which are benefitting from the synergies of the acquisition and which represent the lowest level at which goodwill is monitored for internal management purposes.

Market related information and estimates are used to determine the recoverable amount. Key assumptions on which management has based its determination of recoverable amount include estimated long-term growth rates, weighted average cost of capital and estimated operating margins. Cash flow projections take into account past experience and represent management's best estimate about future developments.

Taxes

There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. Where the final tax outcome of these matters is different from the amounts initially recorded, such differences will impact the current and deferred tax provisions in the period in which the tax determination is made. The assessment of probability involves estimation of a number of factors including future taxable income.

Defined benefit plans (gratuity benefits)

A liability in respect of defined benefit plans is recognised in the balance sheet and is measured as the present value of the defined benefit obligation at the reporting date less the fair value of the plan's assets. The present value of the defined benefit obligation is based on expected future payments at the reporting date, calculated annually by independent actuaries. Consideration is given to expected future salary levels, experience of employee departures and periods of service.

3. Significant accounting policies

3.1 Revenue recognition

The Company has applied Ind AS 115 Revenue from Contracts with Customers which establishes a comprehensive framework for determining whether, how much and when revenue is to be recognised.

Revenue is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration expected to receive in exchange for those products or services.

The core principle of Ind AS 115 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligation in contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Under Ind AS 115, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer.

The accounting policies for specific revenues streams of the Company is summarised below:

Sale of goods:

Revenue from the sale of goods is recognised upon transfer of control of promised products to customers in an amount that reflects the consideration expected to receive in exchange for those products, at which time all the following conditions are satisfied:

- the Company has transferred to the buyer the control of promised products to customers;
- the Company has identified the contract with customer and performance obligation in the contract.
- the transaction price can be measured reliably;
- it is expected that the consideration associated with the transaction will flow to the Company; and revenue is recognised when the company satisfy the performance obligation

3.2 Interest income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and the effective rate applicable. The effective interest rate is the rate that exactly discounts estimated future cash receipts.

3.3 Employee benefits expenses

Employee benefits consist of contribution to provident fund, superannuation fund, gratuity fund, compensated absences, supplemental pay and director pension liability

Post-employment benefit plans

Defined Contribution plans:

Payments to defined contribution retirement benefit scheme for eligible employees in the form of superannuation fund are charged as an expense as they fall due. Such benefits are classified as Defined Contribution Schemes as the Company does not carry any further obligations, apart from the contributions made.

Defined benefit plans:

The Company operates a defined benefit plan – gratuity fund.

The liability recognised in the balance sheet in respect of its defined benefit plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by actuaries using the projected unit credit method.

The present value of the said obligation is determined by discounting the estimated future cash outflows, using market yields of government bonds that have tenure approximating the tenures of the related liability.

The interest income / (expense) are calculated by applying the discount rate to the net defined benefit liability. The net interest income / (expense) on the net defined benefit liability or asset is recognised in the Statement of Profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the Statement of Changes in Equity and in the Balance Sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service cost.

Short-term employee benefit

Compensated absences which accrue to employees and which can be carried to future periods but are expected to be encashed or availed in twelve months immediately following the year end are reported as expenses during the year in which the employees perform the services that the benefit covers and the liabilities are reported at the undiscounted amount of the benefits after deducting amounts already paid. Where there are restrictions on availment of encashment of such accrued benefit or where the availment or encashment is otherwise not expected to wholly occur in the next twelve months, the liability on account of the benefit is actuarially determined using the projected unit credit method.

3.4 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

3.5 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

3.6 Property, plant and equipment

Property, plant and equipment held for use in the production or supply of goods or services, or for administrative purposes, are stated in the Balance sheet at cost less accumulated depreciation and accumulated impairment losses. Freehold land is not depreciated.

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation and accumulated impairment if any.

Cost includes financing cost relating to borrowed funds attributable to the construction or acquisition of qualifying tangible assets upto the date the assets are ready for use. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. These lives are in accordance with Schedule II to the Companies Act, 2013, other than the following asset classes based on the Company's expected usage pattern supported by technical assessment. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

(a) Certain items of Plant and Equipment – 1 to 15 years

(b) Buildings (Roads) – 15 years

(c) Vehicles – 5 years

3.8 Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Goodwill arising on acquisition of business represents excess of purchase consideration over the book value of net assets acquired based on a valuation conducted by an independent firm of Chartered Accountants and will be tested for Impairment annually as per Ind AS 36.

Intangible assets under development

The Company expenses costs incurred during research phase to profit or loss in the year in which they are incurred. Development phase expenses are initially recognised as intangible assets under development until the development phase is complete, upon which the amount is capitalised as intangible asset. Intangible assets under development are carried at cost, comprising direct cost and related incidental expenses less impairment losses if any.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible assets, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

Useful lives of intangible assets

Estimated useful lives of the intangible assets are as follows:

Computer software	3 years and 5 years
Non-compete fees	5 years

3.9 Impairment of assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount, which is the higher of the value in use or fair value less cost to sell, of the asset or cash- generating unit, as the case may be, is estimated and impairment loss (if any) is recognised and the carrying amount is reduced to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted. When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

When an impairment loss subsequently reverses, the carrying amount of the asset or a cash- generating unit is increased to the revised estimate of its recoverable amount, so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) earlier.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

3.10 Inventories

Inventories are valued at lower of cost (on weighted average basis) and net realisable value after providing for obsolescence and other losses, where considered necessary. Cost includes all charges in bringing the goods to their present location and condition, including octroi and other levies, transit insurance and receiving charges. Work-in-progress and finished goods include appropriate proportion of overheads. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale.

3.11 Accounting of Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised, when there is a present legal or constructive obligation as a result of past events, where it is probable that there will be outflow of resources to settle the obligation and when a reliable estimate of the amount of the obligation can be made.

Where a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows. Where the effect is material, the provision is discounted to net present value using an appropriate current market based pre- tax discount rate and the unwinding of the discount is included in finance costs.

Contingent liabilities are recognised only when there is a possible obligation arising from past events, due to occurrence or non-occurrence of one or more uncertain future events, not wholly within the control of the Company, or where any present obligation cannot be measured in terms of future outflow of resources, or where a reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

Contingent assets are not disclosed in the financial statements unless an inflow of economic benefits is probable.

3.12 Financial instruments

Financial assets and financial liabilities are recognised when a Company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Classification and subsequent measurement

Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on their respective classification.

On initial recognition, a financial asset is classified as - measured at :

- Amortised cost; or
- Fair Value through Other Comprehensive Income (FVTOCI) - equity investment; or
- Fair Value Through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

All financial assets not classified as measured at amortised cost or FVTOCI are measured at FVTPL. This includes all derivative financial assets unless designated as effective hedge instruments which are accounted as per hedge accounting requirements discussed below.

Financial assets at amortised cost are subsequently measured at amortised cost using effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment expenses are recognised in profit or loss. Any gain and loss on derecognition is also recognised in profit or loss.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

For equity investments, the Company makes an election on an instrument-by-instrument basis to designate equity investments as measured at FVTOCI. These elected investments are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the reserves

The cumulative gain or loss is not reclassified to profit or loss on disposal of the investments. These investments in equity are not held for trading. Instead, they are held for medium or long-term strategic purpose. Upon the application of Ind AS 109, the Company has chosen to designate these investments as at FVTOCI as the Company believes that this provides a more meaningful presentation for medium or long-term strategic investments, than reflecting changes in fair value immediately in profit or loss. Dividend income received on such equity investments are recognised in profit or loss.

Equity investments that are not designated to be measured at FVTOCI are designated to be measured at FVTPL. Subsequent changes in fair value are recognised in profit or loss.

Financial liabilities and equity instruments

Debt and equity instruments issued by the company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company is recognised at the proceeds received, net of directly attributable transaction costs.

Financial liabilities

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading or it is a derivative (that does not meet hedge accounting requirements) or it is designated as such on initial recognition. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all of the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for the amount it may have to pay.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised and the proceeds received are recognised as a collateralised borrowing.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the balance sheet when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Impairment of financial assets

The Company applies the expected credit loss (ECL) model for recognising impairment loss on financial assets. With respect to trade receivables, the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write- off. However, financial assets that are written off could still be subject to enforcement activities under the Company's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

3.13 Foreign exchange transactions and translation

Transactions in foreign currencies i.e. other than the Company's functional currency of Indian Rupees are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the functional currency using exchange rates prevailing at the date when the fair value is determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Exchange differences on monetary items are recognised in profit or loss in the period in which they arise except for exchange differences on transactions entered into in order to hedge certain foreign currency risks (refer policy on Derivative Financial Instruments).

3.14 Cost recognition

Costs and expenses are recognised when incurred and have been classified according to their primary nature.

The costs of the Company are broadly categorised in employee benefit expenses, depreciation and amortisation and other operating expenses. Employee benefit expenses include employee compensation, allowances paid, contribution to various funds and staff welfare expenses. Other operating expenses majorly include fees to external consultants, cost running its facilities, travel expenses, communication costs and other expenses. Other expenses is an aggregation of costs which are individually not material such as commission and brokerage, bank charges, freight etc.

3.15 Earnings per share

The basic earnings per share ('EPS ') is computed by dividing the net profit attributable to equity shareholders for the period, by the weighted average number of equity shares outstanding during the year.

Diluted EPS is computed using the weighted average number of equity and dilutive (potential) equity equivalent shares outstanding during the period except where the results would be anti-dilutive.

3.16 Lease

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee:

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The Company presents right-of-use assets that do not meet the definition of investment property in 'property and equipment' and lease liabilities in the statement of financial position.

The Company has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the term of the relevant lease.

3.17 Cash and cash equivalents

The Group considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above, net of outstanding bank overdrafts as they are considered an integral part of the Group's cash management.

Deferred tax assets (net) #	(48.62)	1,487.34	–	–	1,438.72	1,511.84	(73.11)

The Company offsets tax assets and liabilities if and only if it has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same tax authority.

Significant management judgement is required in determining provision for income tax, deferred income tax assets and liabilities and recoverability of deferred income tax assets. The recoverability of deferred income tax assets is based on estimates of taxable income and the period over which deferred income tax assets will be recovered. Any changes in future taxable income would impact the recoverability of deferred tax assets.

 # Unrecognised deferred tax assets

Deferred tax assets (DTA) have not been recognised, because it is not probable that future taxable profit will be available against which the Company can use the benefits therefrom:

Deferred tax assets for the carry forward of unused tax losses are recognised to the extent that it is probable that future taxable profits will be available against which the unused tax losses can be utilised. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets - unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

14 Short-term borrowings

(Currency: Indian Rupees in lakhs)

Particulars	As at 31 March 2021	As 31 March 2020
Working capital loan (refer note below)	**500.00**	2,000.00

28 Fair value

The management assessed that loans, cash and cash equivalents, trade receivables, borrowings, trade payables and other current liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

Fair Valuation measurement hierarchy

The following table shows the carrying amounts and fair values of financial assets and liabilities including their levels of fair value hierarchy:

(Currency: Indian Rupees in lakhs)

		As at 31 March 2021

Note:

There are no transfer between level 1 and level 2 during the year.

29 Financial risk management

A. Capital management

The Company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

The Company manages capital risk in order to maximize shareholders' value by maintaining sound/optimal capital structure through monitoring of financial ratios, such as net debt-to-equity ratio and net borrowings-to-equity ratio on a monthly basis and implements capital structure improvement plan when necessary. There is no change in the overall capital risk management strategy of the Company compared to last year.

The Company uses net debt equity ratio as a capital management index and calculates the ratio as total liabilities divided by total equity. Total liabilities and total equity are based on the amounts stated in the separate financial statements.

The Company is not subject to externally enforced capital regulation.

The Company's Net debt-to-equity ratio as at 31 March 2021 and 31 March 2020 is as follows:

(Currency: Indian Rupees in lakhs)

Particulars	As at 31 March 2021	As at 31 March 2020
Borrowing from bank	**815.08**	2,000.00
Gross debt (A)	**815.08**	2,000.00
Less :		
Cash and cash equivalents	**35.53**	631.57
Net debt (A)	**779.55**	1,368.43
Equity share capital	**12,811.00**	12,811.00
Other equity	**(2,391.78)**	(2,502.05)
Equity (B)	**10,419.22**	10,308.95
Debt ratio (A / B)	**7%**	19%

B. Financial risk management framework

The Company's corporate treasury function provides services to the business, co-ordinates access to domestic financial markets, monitors and manages the financial risk relating to the operation of the Company through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk

The use of financial derivatives is governed by the Company's policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivatives financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Company does not enter into or trade financial instrument, including derivative financial instruments, for speculative purposes.

i) CREDIT RISK

Credit risk management

Credit risk arises when a customer defaults on its contractual obligations to pay resulting in financial loss to the Company. The Company has adopted a policy of categorising the customers based on the performance and accordingly credit limit ceiling of each category is defined. Company also takes credit insurance for business specific customers. The Company's exposure and categorisation of its customers are continuously monitored . Credit exposure is controlled by customer credit limits which are reviewed and approved. The company also take security cheques from its domestic market customers.

The Company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company and individual receivable specific provision where applicable. Forward-looking information has been incorporated into the determination of expected credit losses.

There is no change in estimation techniques or significant assumptions during the reporting period.

The provision matrix at the end of the reporting period is as follow:-

(Currency: Indian Rupees in lakhs)

	As at 31 March 2021		As at 31 March 2020	
Ageing	Expected credit loss (%)	Expected credit loss	Expected credit loss (%)	Expected credit loss
Within the credit period	**0.90%**	**38.32**	1.03%	43.06
0-3 month past due	**3.66%**	**65.05**	2.48%	52.80
3-6 month past due	**6.52%**	**47.06**	6.42%	70.63
6 -12 month past due	**29.20%**	**43.04**	27.90%	157.58
>1 year	**95.35%**	**1,877.49**	91.96%	1,516.33
Total		**2,070.96**		1,840.39

Credit risk management

Age of receivables	As at 31 March 2021	As at 31 March 2020
Within the credit period	**4,239.60**	4,171.37
0-3 month past due	**1,776.65**	2,127.02
3-6 month past due	**722.08**	1,100.00
6 -12 month past due	**147.39**	564.69
>1 year	**1,969.09**	1,648.95
Total	**8,854.81**	9,612.03

The concentration of credit risk is limited due to the fact that the customer base is large and unrelated.

ii) LIQUIDITY RISK

(a) Liquidity risk management

The board of directors has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(b) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

(Currency: Indian Rupees in lakhs)

Particulars	Less than 1 Year	1–3 Years	3 Years to 5 Years	5 years and above
Non-derivative financial liabilities				
As at 31 March 2021				
Short-term borrowings	**815.08**	–	–	–
Trade payables	**6,694.62**	–	–	–
Other financial liabilities	**298.13**	–	–	–
Total	**7,807.82**	–	–	–
As at 31 March 2020				
Short-term borrowings	–	–	–	–
Trade Payables	5,004.81	–	–	5,004.81
Other Financial Liabilities	283.56	–	–	283.56
Total	**5,288.38**	–	–	**5,288.38**

(c) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

(Currency: Indian Rupees in lakhs)

Particulars	Less than 1 Year	1–3 Years	3 Years to 5 Years	5 years and above
Non-derivative financial assets				
As at 31 March 2021				
Non-interest bearing	**6,829.98**	–	–	–
Fixed interest rate instruments	–	–	–	–
Total	**6,829.98**	–	–	–
As at 31 March 2020				
Non-interest bearing	8,417.54	–	–	8,417.54
Fixed interest rate instruments	0.58	–	–	–
Total	8,418.12	–	–	8,417.54

In the case of assets falling short of liabilities, banking facilities are available to honor the obligation through as cash credit, short term borrowing / long term borrowing and other necessary banking facilities.

iii) MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company uses permitted derivatives to manage market risks. Derivatives are only used for economic hedging purposes and not as speculative investments. All such transactions are carried out within the guidelines set by the Board of Directors and Forex and investment Management Committee.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

a) Currency risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's exposure to currency risk relates primarily to the Company's operating activities and borrowings when transactions are denominated in a different currency from the Company's functional currency.

The Company manages its foreign currency risk by taking forward cover that are expected to occur within a maximum 12 month period for forecasted cash flow.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows:

(Currency: Indian Rupees in lakhs)

Particulars	Currency	As at 31 March 2021	As at 31 March 2020
Trade payables	USD	**4.22**	2.94

Of the above foreign currency exposures, the following exposures are not hedged by a derivative:

(Currency: Indian Rupees in lakhs)

Particulars	Currency	As at 31 March 2021	As at 31 March 2020
Trade payables	USD	**4.22**	2.94

b) Foreign currency sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives. The impact on the Company's pre-tax equity is due to changes in the fair value of forward exchange contracts.

(Currency: Indian Rupees in lakhs)

Period	Currency	Change in rate	Effect on loss before tax	Effect on pre-tax equity
As at 31 March 2021	**USD**	**5%**	**(0.21)**	**(0.21)**
	USD	**3%**	**(0.13)**	**(0.13)**
As at 31 March 2020	USD	5%	(0.15)	(0.15)
	USD	3%	0.90	0.90

c) Interest rate sensitivity

The sensitivity analyses below have been determined based on exposure to interest rate for both derivative and non-derivative instruments at the end of reporting period. For floating rate liabilities, analysis is prepared assuming the amount of liability outstanding at the end of the reporting period was outstanding for the whole year.

The Company does not have any derivative or non-derivative instrument which may have an impact due to changes in interest rates.

30 Business combination

The Company had entered into a Business Transfer Agreement on 12 October 2018 with its holding company, Mahindra Agri Solutions Limited (MASL), whereby the entire asset and liability of Cropcare business has been transferred to the Company on slump sale basis with appointed date of 29 March 2019. The Company has paid Rs 12,810 lakhs as sale consideration based on the fair valuation report of an independent valuation firm.

The above transaction has been accounted as a Business Combination under a transitory common control accordingly transaction has been accounted using acquisition accounting.

31 Disclosures under Section 22 of the Micro, Small and Medium Enterprises Development Act, 2006:

Trade payable includes amount payable to Micro, Small and Medium Enterprises as follows:

(Currency: Indian Rupees in lakhs)

Sr. No.	Particulars	As at 31 March 2020	As at 31 March 2019
I	Principal amount remaining unpaid to any supplier at the end of the accounting year	**716.10**	480.29
II	Interest due thereon remaining unpaid to any supplier at the end of the accounting year	**27.58**	101.60
III	The amount of interest paid by the buyer in terms of section 16 of the Micro, Small and Medium Enterprises Development Act, 2006 (27 of 2006), along with the amount of the payment made to the supplier beyond the appointed day during each accounting year	–	–
IV	The amount of interest due and payable for the period of delay in making payment (which has been paid but beyond the appointed day during the year) but without adding the interest specified under the Micro, Small and Medium Enterprises Development Act, 2006	**12.18**	90.03
V	Amount of interest accrued and remaining unpaid as at the year end	**15.41**	11.57
VI	The amount of interest accrued and remaining unpaid at the end of each accounting year	**12.18**	90.03
VII	The amount of further interest remaining due and payable even in the succeeding years, until such date when the interest dues above are actually paid to the small enterprise, for the purpose of disallowance of a deductible expenditure under section 23 of the Micro, Small and Medium Enterprises Development Act, 2006	**NIL**	NIL

Dues to Micro and Small Enterprises have been determined to the extent such parties have been identified on the basis of information collected by the Management.

32 Employee benefits expenses

(i) Defined contribution plans:

The Company's contribution to Provident Fund and Pension scheme aggregating to Rs. 71.23 lakhs 31 March 2021 (31 March 2020 : Rs. 70.83 lakhs) has been recognised in the Statement of Profit and Loss under the head Employee benefits expense.

(ii) Defined benefit plans:

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. The Company makes annual contribution to the group gratuity scheme administered by the Life Insurance Corporation of India.

(Currency: Indian Rupees in lakhs)

Particulars	Year ended 31 March 2021	Year ended 31 March 2020
1. Discount rate	**5.60%**	5.60%
2. Salary escalation	**8.50%**	8.50%
3. Attrition rate	**22%**	22%
4. Mortality rate*	**The Indian Assured Lives Mortality (2006-08) Ult table**	The Indian Assured Lives Mortality (2006-08) Ult table
3. Attrition rate	**18%**	18%

* Based on Indian standard mortality table with modification to reflect expected changes in mortality.

Amount recognised in the Standalone Statement of Profit and Loss in respect of these defined benefit plans are as follows

(Currency: Indian Rupees in lakhs)

Particulars	Gratuity Year ended 31 March 2021	Year ended 31 March 2020
Service Cost:		
Current service cost	**24.22**	21.38
Net interest expense	**5.04**	5.88
Components of defined benefit costs reconised in profit or loss	**29.26**	27.26
Remeasurement on the net defined benefit liability:		
1. Changes in financial assumptions	**–**	**7.08**
2. Changes in demographic assumptions	**(13.06)**	**(0.00)**
3. Experience adjustments	**(17.52)**	**(4.12)**
4. Actual return on plan assets less interest on plan assets	**–**	**–**
Components of defined benefit costs recognised in Other Comprehensive Income	**(30.57)**	2.95
Total	**(1.32)**	30.21

The current service cost and the net interest expenses for the year are included in the Employee benefits expense line item in the Statement of Profit and Loss. The remeasurement of the net defined benefit liability/asset is included in Other Comprehensive Income

The amount included in the Balance Sheet arising from the entity's obligation in respect of its defined benefit plans is as follows:

(Currency: Indian Rupees in lakhs)

	Particulars	Year ended 31 March 2020	Year ended 31 March 2019
I.	**Net liability recognised in the Balance sheet**		
1.	Present value of defined benefit obligation	**89.37**	104.91
4.	Current portion of the above	**35.80**	29.97
5.	Non current portion of the above	**53.57**	74.94
II.	**Change in the obligation during the year**		
1.	Present value of defined benefit obligation at the beginning of the year	**104.91**	–
2.	Expenses recognised in Profit and Loss Account		
	- Current service cost	**24.22**	21.38
	- Interest expense (income)	**5.04**	5.88
3.	Recognised in other comprehensive income		
	Remeasurement gains/(losses):		
-	Actuarial Gain (Loss) arising from:		
i.	Demographic Assumptions	**(13.06)**	–
ii.	Financial Assumptions	–	7.08
iii.	Experience Adjustments	**(17.52)**	(4.12)
4.	Benefit payments	**(14.23)**	(20.21)
5.	Others : Impact of liability assumed (transfer from Mahindra Agri Solutions Limited)	–	94.90
6.	**Present value of defined benefit obligation at the end of the year**	**89.37**	104.91

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

(Currency: Indian Rupees in lakhs)

Principal assumption		Changes in assumption	Impact on defined benefit obligation Increase in assumption	Decrease in assumption
Discount rate	**31 March 2021**	**1.00%**	**-2.64%**	**2.80%**
	31 March 2020	1.00%	-4.20%	4.58%
Salary growth rate	**31 March 2021**	**1.00%**	**2.70%**	**-2.59%**
	31 March 2020	1.00%	4.41%	-4.13%

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous year.

The Company expects to contribute Rs Nil to the gratuity trusts during the next financial year.

Maturity profile of defined benefit obligation:

(Currency: Indian Rupees in lakhs)

	As at 31 March 2021	As at 31 March 2020
Within 1 year	**35.80**	29.97
1 - 2 year	**15.43**	16.49
2 - 3 year	**13.42**	11.94
3 - 4 year	**11.69**	11.72
4 - 5 year	**8.68**	10.96
5 - 6 year	**6.73**	9.40
6 - 7 year	**4.26**	8.99
7 - 8 year	**3.18**	7.00
8 - 9 year	**2.00**	6.33
10 year and above	**4.47**	25.84

The weighted average duration of the defined benefit obligation as at 31 March 2021 is 2.71 years (31 March 2020 - 4.38 years)

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The current service cost and the net interest expense for the year are included in the employee benefits expense in profit or loss of the expense for the year, an amount of Rs 29.96 lakhs (31 March 2020 : Rs. 27.26 lakhs) has been included in statement of profit and loss under the head Employee benefit expenses.

Compensated absenses :

Compensated absences for the employee benefits of Rs. 76.30 lacs (31 March 2020 - Rs 112.61 lacs) expected to be paid in exchange for the services recognised as a expenses during the year.

33 Recent Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2021.

Recent pronouncements

On March 24, 2021, the Ministry of Corporate Affairs (""MCA"") through a notification, amended Schedule III of the Companies Act, 2013 revising Division I, II and III of Schedule III and are applicable from April 1, 2021. The amendments primarily relate to

a) Change in existing presentation requirements for certain items in Balance sheet, for eg. lease liabilities, security deposits, current maturities of long term borrowings, effect of prior period errors on Equity Share capital

b) Additional disclosure requirements in specified formats, for eg. ageing of trade receivables, trade payables, capital work in progress, intangible assets, shareholding of promoters, etc.

c) Disclosure if funds have been used other than for the specific purpose for which it was borrowed from banks and financial institutions.

d) Additional Regulatory Information, for eg.,compliance with layers of companies, title deeds of immovable properties, financial ratios, loans and advances to key managerial personnel, etc.

e) Disclosures relating to Corporate Social Responsibility (CSR), undisclosed income and crypto or virtual currency. The amendments are extensive and the Company is evaluating the same.

34 Impact of Covid-19

The country was in a crisis situation due to COVID-19, which had been declared as pandemic by World Health Organization. The countrywide lockdown was declared by Govt of India covered a part of financial year ended 31 March 2021. However, the Government of India has made certain allowances for movement of agricultural inputs during this period being essential item for agriculture. Based on the operations for the financial year ended 31 March 2021, the Company believes that, there is no significant impact of COVID-19 pandemic on the financial position and performance of the Company for the financial year ended 31 March 2021.

35 Segment reporting

The Company is engaged in the business of production and trading of Crop inputs, which is the primary business segment and has only domestic sales. The Company has only one reportable business segment, which is production and trading of Crop inputs and only one reportable geographical segment. Accordingly, these financial statements are not reflective of the information required under Ind AS 108.

36 Other matters

Information with regard to other matters specified in Schedule III to the Act is either nil or not applicable to the Company for the year.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF
MERAKISAN PRIVATE LIMITED

Report on the Ind AS Financial Statements

Opinion

1. We have audited the accompanying Ind AS financial statements of MeraKisan Private Limited ("the Company"), which comprise the Balance Sheet as at March 31, 2021, the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Cash Flow Statement for the year then ended, and notes to the financial statements, and a summary of significant accounting policies and other explanatory information.
2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements, give the information required by the Act, in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India of the state of affairs of the Company as at March 31, 2021, and its loss and cash flows for the year ended on that date.

Basis for Opinion

3. We conducted our audit in accordance with the Standards on Auditing specified under section 143(10) of the Act. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the code of ethics issued by the Institute of Chartered Accountants of India ("the ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

4. The Company's Board of Directors is responsible for the other information. The other information obtained at the date of this auditor's report is included in the Director's report, but does not include the financial statements and our auditor's report thereon.
5. Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
6. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated
7. If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibility of Management for Ind AS Financial Statements

8. The Company's Board of Directors is responsible for the matters in section 134(5) of the Act with respect to the preparation of these Ind AS financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act.
9. This responsibility also includes the maintenance of adequate accounting records in accordance with the provision of the Act for safeguarding of the assets of the Company and for preventing and detecting the frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of internal financial control, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.
10. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.
11. Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility

12. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
13. As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:
    a. Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

b. Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances.

c. Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

d. Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

e. Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Standalone Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Standalone Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Standalone Financial Statements.

14. We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

15. We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on other Legal and Regulatory Requirements

16. As required by the Companies (Auditor's Report) Order,2016, issued by the Central Government of India in term of sub-section (11) of section 143 of the Act (the "Order"), and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in the Annexure A, a statement on the matters specified in the paragraphs 3 and 4 of the Order, to the extent applicable.

17. As required by section 143(3) of the Act, we report that:
    a) we have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit;
    b) In our opinion proper books of account as required by law have been kept by the Company so far as appears from our examination of those books;
    c) the Balance Sheet, the Statement of Profit and Loss (including Other Comprehensive Income),the Statement of Changes in Equity and the Cash Flow Statement dealt with by this Report are in agreement with the books of account;
    d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014
    e) On the basis of written representations received from the directors as on March 31, 2021, taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2021, from being appointed as a director in terms of Section 164(2) of the Act.
    f) Section 143(3)(i) mandates the auditor to comment on whether the Company has an adequate internal financial control over financial reporting of the Company and the operating effectiveness of such controls. In terms of paragraph 5 of Ministry of Corporate Affairs notification number G.S.R. 583 (E) dated 13th June, 2017, as amended by circular dated 13th July, 2017, exemption has been provided to private limited companies fulfilling certain criteria mentioned in the notification, from the applicability of the requirement of reporting in terms of Section 143(3)(i). As the Company meets the relevant criteria specified in the said notification for the financial year ended as on March 31, 2020, the requirement of Section 143(3)(i) is not applicable to the Company and accordingly no report has been made under the said clause;
    g) With respect to the other matters included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014 (as amended) in our opinion and to the best of our information and according to the explanations given to us:
        i. The Company does not have any pending litigations which would impact its financial position.
        ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
        iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE AUDITOR'S REPORT

Referred to in paragraph 12 of our report of even date on the accounts of Members of MeraKisan Private Limited for the year ended March 31, 2021

1) i) According to the information and explanations given to us, the Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment and investment properties.

ii) The property, plant and equipment and investment properties are physically verified by the Company once in two years. The physical verification of property, plant and equipment and investment properties was conducted in the previous financial year and accordingly no physical verification is required to be carried out in the current year. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its property, plant and equipment and investment properties.

iii) According to the information and explanations given to us, the Company has no immoveable properties registered in its name. Accordingly, the reporting under Clause 3(i)(c) of the Order is not applicable to the Company.

2) According to the information and explanations given to us, the inventory comprising of traded goods, packing materials has been physically verified at reasonable intervals by the management during the year. In our opinion, coverage and procedure of such verification is appropriate and no material discrepancies for each class of inventory were noticed on such verification between the physical inventory and the book records.

3) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, the reporting under Clauses 3(iii)(a), 3(iii)(b) and 3(iii)(c) of the Order is not applicable to the Company.

4) According to the information and explanations given to us, the Company has not granted any loans or made any investments or provided any guarantees or security to the parties covered under Section 185 and 186 of the Act. Accordingly, the reporting under Clause 3(iv) of the Order is not applicable to the Company.

5) According to the information and explanations given to us, the Company has not accepted any deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Act and the rules framed there under, where applicable. Accordingly, the reporting under Clause 3(v) of the Order is not applicable to the Company.

6) The Central Government has not prescribed the maintenance of cost records under sub-section (1) of Section 148 of the Act for any of the products of the Company. Accordingly, the reporting under Clause 3(vi) of the Order is not applicable to the Company.

7) (a) According to the information and explanations given to us and on the basis of our examination of records of the Company, the amounts deducted/accrued in the books of account in respect of undisputed statutory dues including Goods and Services tax, Provident Fund, Employees' State Insurance, cess and other material statutory dues have been regularly deposited during the year by the Company with the appropriate authorities. The amounts deducted/accrued in the books of account in respect of undisputed statutory dues of Income-tax have generally been regularly deposited during the year by the Company with the appropriate authorities, though there have been slight delays in a few cases. According to the information and explanations given to us and on the basis of our examination of records of the Company, there were no undisputed statutory dues payable in respect of Sales tax, Service tax, Duty of Customs, Duty of Excise and Value Added Tax.

(b) According to the information and explanations given to us and on the basis of our examination of records of the Company, there were no arrears of undisputed statutory dues in respect of Goods and Services tax, Provident fund, Employees' State Insurance, Income-tax, Sales tax, Service tax, Duty of Customs, Duty of Excise, Value Added Tax, Cess and other material statutory dues as on the last day of the year for a period of more than six months from the date they became payable.

(c) According to the information and explanations given to us and on the basis of our examination of records of the Company, there are no statutory dues in respect of Goods and Services Tax, Sales tax, Service tax, Duty of Customs, Duty of Excise and Value Added Tax as at March 31, 2021, which have not been deposited with the appropriate authorities on account of any dispute.

8) According to the information and explanations given to us and on the basis of our examination of records of the Company, the Company has not defaulted in the repayment of loans or borrowings to banks and debenture holders. The Company has not taken any loans or borrowings from financial institutions and Government.

9) According to the information and explanations given to us, the Company has not raised any moneys by way of initial public offer, further public offer (including debt instruments) and term loans during the year. Accordingly, the reporting under Clause 3(ix) of the Order is not applicable to the Company.

10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India and according to the information and explanations given to us, we have neither come across any instance of material fraud by the Company or on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of any such case by the management.

11) The provisions of Section 197 read with Schedule V to the Act are applicable only to public companies. Accordingly, the reporting under Clause 3(xi) of the Order is not applicable to the Company. Also refer paragraph 2(h) of Independent Auditors' Report.

12) According to the information and explanations given to us, the Company is not a Nidhi company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, the reporting under Clause 3(xii) of the Order is not applicable to the Company.

13) In our opinion and according to the information and explanations given to us, the Company has entered into transactions with related parties in compliance with the provisions of Section 188 of the Act. The details of such related party transactions have been disclosed in the financial statements as required by Indian Accounting Standard (Ind AS) 24, Related Party Disclosures or Accounting Standard (AS) 18, Related Party Disclosures specified under Section 133 of the Act. Further, the Company is not required to constitute an Audit Committee under Section 177 of the Act, and accordingly, to this extent, the reporting under Clause 3(xiii) of the Order is not applicable to the company.

14) The Company According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year. Accordingly, the reporting under Clause 3(xiv) of the Order is not applicable to the Company.

15) In our opinion and according to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or directors of its holding company or persons connected with them during the year and hence the provisions of Section 192 of the Act are not applicable to the Company. Accordingly, the reporting under Clause 3(xv) of the Order is not applicable to the Company.

16) According to the information and explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the reporting under Clause 3(xvi) of the Order is not applicable to the Company.

* Capital Reserve includes the difference between the amount recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor.

Optionally convertible preference shares (0.01% OCPS): The Board Of Directors of the Company at their meeting held on 8th September, 2016 had resolved to create, offer, issue on right basis up to 76,50,000 unpaid warrants, convertible into OCPS and then in turn convertible into Equity share, pursuant to the provisions of the Companies Act 2013, Each warrant is convertible into one Optionally Convertible Preference Share ("OCPS") issued at par at Rs 10/- (Rupees Ten Only) each. Each OCPS is further convertible into one Equity Share of Rs. 10/- (Rupees Ten Only) each. The said unpaid warrants were allotted on 28th September, 2016.

During the year, 7,25,000 (2,25,000 and 5,00,000 OCPS on 28th April, 2020 and 19th October, 2020 respectively) warrants were converted into OCPS. As on 31.03.2021, 76,05,000 OCPS were allotted to MASL upon conversion of equal number of warrants. The balance warrants 45000 has been lapsed.

OCPS shall be redeemable at any time after 1 April 2020 (the "Conversion Period Commencement Date") at the option of the holders of the OCPS (MASL) at Rs. 10.5 (Rupees Ten and a Half) each.

The OCPS can be converted into equivalent number of Equity shares at any time from the Conversion Period Commencement Date until 28th September, 2022 on the basis of a ratio of 1 Equity Share: 1 OCPS. Without prejudice to MASL's right to conversion into equity shares or their right to redeem part or all OCPS, the OCPS shall be compulsorily redeemed at Rs. 10.5 (Rupees Ten and a Half) each at the expiry of 10 (Ten) years from the Closing date or at the expiry of the maximum period permitted under the Applicable Law, whichever is sooner.

Equity component of compound financial instruments includes equity component of such 76,05,000 Optionally Convertible Preference Shares derived as per the requirements of Paras 28 & 29 and of IND As 32 "Financial Instruments Presentation"

The Board Of Directors of the Company issued 5,00,000 6% Optionally Convertible Cumulative Redeemable Preference Shares (OCCRPS) of Rs. 10/- each aggregating Rs. 50,00,000/- on Rights Basis to the existing Equity Shareholder that is the Mahindra Agri Solutions Ltd. through circular resolution on 18th March, 2021. Such OCCRPS are convertible into Equity share at the option of share holder at fair market value on date of conversion.

OCCRPS will be redeemable after 10 years from the date of allotment and redemption will be at face value.

Equity component of compound financial instruments includes equity component of such 5,00,000 Optionally Convertible Cumulative Redeemable Preference Shares (OCCRPS) derived as per the requirements of Paras 28 & 29 and of IND As 32 "Financial Instruments Presentation"

NOTES FORMING PART OF FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2021

1. Corporate Information

Merakisan Private Limited ("the company") a private limited company domiciled in India and incorporated as on 13 July 2016 under provision of Companies Act, 2013, (CIN: U51909MH2016PTC283578)

The Company was incorporated to carry on the business of procuring agricultural produce like grocery items cereals, fruits and vegetables from the farmers and selling to customers, facilitated by a digital technology platform. Company have now focusing on organic products.

2. Significant accounting policies

2.1 Use of estimate –

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected.

Key source of estimation of uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of impairment of goodwill, impairment of investments and assets, useful lives of property, plant and equipment, valuation of deferred tax assets and provisions and contingent liabilities. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known/materialize.

2.2 Useful lives of property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

2.3 Provisions and contingent liabilities

A provision is recognised when the Company has a present obligation as a result of past event and it is probable that an outflow of resources will be required to settle the obligation, in respect of which the reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

2.4 Valuation of deferred tax assets

The Company reviews the carrying amount of deferred tax assets at the end of each reporting period.

2.5 Statement of compliance

The financial statements have been prepared in accordance with Ind AS's notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended).

2.6 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

2.7 Going Concern

During the current year the Company has continued to incur losses and as at the yearend it's net-worth is substantially eroded with the accumulated losses aggregating to 1211.95 Lakhs. However, the Company is able to operate uninterruptedly with the continued support from the Parent company with infusion of funds by way of Optionally Convertible Preference Shares. Also, based on the future business plans and the turnaround strategy adopted, in the opinion of the management, the Company will be able to generate profits in the future in excess of its accumulated losses and continue to operate as a going concern.

The principal accounting policies are set out below.

2.8 Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the company, liabilities incurred by the company to the former owners of the acquiree and the equity interests issued by the company in exchange of control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

Business combination/s involving entities or businesses under common control has been accounted for using the pooling of interests method.

The pooling of interest method is considered to involve the following:

(i) The assets and liabilities of the combining entities are reflected at their carrying values.

(ii) No adjustments are made to reflect fair values, or recognise any new assets or liabilities. The only adjustments that are made are to harmonise accounting policies.

The consideration for the business combination may consist of securities, cash or other assets. Securities shall be recorded at nominal value. In determining the value of the consideration, assets other than cash shall be considered at their fair values.

The balance of the retained earnings appearing in the financial statements of the transferor is aggregated with the corresponding balance appearing in the financial statements of the transferee. Alternatively, it is transferred to General Reserve, if any.

The difference, if any, between the amount recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor is transferred to capital reserve and is presented separately from other capital reserves with disclosure of its nature and purpose in the notes.

2.9 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

2.9.1. Sale of goods

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

2.10 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

2.10.1 The Company as lessee

Rental expense from operating leases is generally recognised on a straight-line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessor's expected inflationary cost increases, such increases are recognised in the year in which such benefits accrue. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

2.11 Employee benefits

2.11.1 Short-term and other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

2.12 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

2.12.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2.12.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

2.13 Property, plant and equipment

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Company's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

All Property, plant and equipments are stated at cost less depreciation. Costs comprise purchase price and any attributable costs of bringing the asset to its working condition for its intended use.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

Depreciation on tangible fixed assets has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013.

2.14 Intangible assets

2.14.1 Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

2.14.2 Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

2.14.3 Derecognising of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognising of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

2.15 Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

2.16 Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest company of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

2.17 Inventories

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in-first-out basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

2.18 Provisions

Provisions are recognised when the company has a present obligation (legal or constructive) as a result of a past event, it is probable that the company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

2.19 Financial instruments

Financial assets and financial liabilities are recognised when a company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

2.20 Earnings Per Share

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 on Earnings Per Share. Basic earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period as adjusted for the effects of all diluted potential equity shares except where the results are anti-dilutive.

2.21 Cash flow statement

The Cash Flow Statement is prepared by the indirect method set out in Ind AS 7 on Cash Flow Statements and presents cash flows by operating, investing and financing activities of the Company.

2.22 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets

2.22.1 Classification of financial assets

The company has not debt instruments. All other financial assets are subsequently measured at fair value.

For the impairment policy on financial assets measured at amortised cost.

2.22.2 Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, debt instruments at FVTOCI, lease receivables, trade receivables, other contractual rights to receive cash or other financial asset, and financial guarantees not designated as at FVTPL.

Expected credit losses are the weighted average of credit losses with the respective risks of default occurring as the weights. Credit loss is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate (or credit-adjusted effective interest rate for purchased or originated credit-impaired financial assets). The Company estimates cash flows by considering all contractual terms of the financial instrument (for example,prepayment, extension, call and similar options) through the expected life of that financial instrument.

The Company measures the loss allowance for a financial instrument at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition. If the credit risk on a financial instrument has not increased significantly since initial recognition, the Company measures the loss allowance for that financial instrument at an amount equal to 12-month expected credit losses. 12-month expected credit losses are portion of the life-time expected credit losses and represent the lifetime cash shortfalls that will result if default occurs within the 12 months after the reporting date and thus, are not cash shortfalls that are predicted over the next 12 months.

If the Company measured loss allowance for a financial instrument at lifetime expected credit loss model in the previous period, but determines at the end of a reporting period that the credit risk has not increased significantly since initial recognition due to improvement in credit quality as compared to the previous period, the Company again measures the loss allowance based on 12-month expected credit losses.

When making the assessment of whether there has been a significant increase in credit risk since initial recognition, the Company uses the change in the risk of a default occurring over the expected life of the financial instrument instead of the change in the amount of expected credit losses. To make that assessment, the Company compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information, that is available without undue cost or effort, that is indicative of significant increases in credit risk since initial recognition.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

2.22.3 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

On derecognition of a financial asset other than in its entirety (e.g. when the Company retains an option to repurchase part of a transferred asset), the Company allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

2.23 Current vs non current classification

The Company presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

– It is expected to be settled in normal operating cycle

– It is held primarily for the purpose of trading

– It is due to be settled within twelve months after the reporting period, or

– There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

The Company has identified twelve months as its operating cycle.

2.24 Financial liabilities and equity instruments

2.24.1 Classification as debt or equity

Debt and equity instruments issued by a company entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

2.24.2 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

However, financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, financial guarantee contracts issued by the Company, and commitments issued by the Company to provide a loan at below-market interest rate are measured in accordance with the specific accounting policies set out below.

2.24.3 Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange between with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

2.25 Significant accounting estimates

The Company used certain significant accounting estimates which have been disclosed in the financial statements.

These includes valuation of inventory, fair valuation of financial and non-financial assets and liabilities, testing of impairment of assets, going concern assessment etc. requiring significant management judgement in estimating the same. Considering the continuing COVID-19 pandemic, the results in upcoming period may significantly vary and may affect the recoverability of assets and settlement of liabilities.

The Company, based on internal & external sources of information including market research, economic forecast and other information, has assessed that as a result of Covid-19 outbreak, there is no significant financial impact on the financial statements for the year ended March 31, 2021 as at the date of approval of these financial statements.

Note

* Capital Reserve includes the difference between the amount recorded as share capital issued plus any additional consideration in the form of cash or other assets and the amount of share capital of the transferor.

Optionally convertible preference shares (0.01% OCPS): The Board Of Directors of the Company at their meeting held on 8th September, 2016 had resolved to create, offer, issue on right basis up to 76,50,000 unpaid warrants, convertible into OCPS and then in turn convertible into Equity share, pursuant to the provisions of the Companies Act 2013, Each warrant is convertible into one Optionally Convertible Preference Share ("OCPS") issued at par at Rs 10/- (Rupees Ten Only) each. Each OCPS is further convertible into one Equity Share of Rs 10/- (Rupees Ten Only) each. The said unpaid warrants were allotted on 28th September, 2016.

During the year, 7,25,000 (2,25,000 and 5,00,000 OCPS on 28th April, 2020 and 19th October, 2020 respectively) warrants were converted into OCPS. As on 31.03.2021, 76,05,000 OCPS were allotted to MASL upon conversion of equal number of warrants. The balance warrants 45000 has been lapsed.

OCPS shall be redeemable at any time after 1 April 2020 (the "Conversion Period Commencement Date") at the option of the holders of the OCPS (MASL) at Rs. 10.5 (Rupees Ten and a Half) each.

The OCPS can be converted into equivalent number of Equity shares at any time from the Conversion Period Commencement Date until 28th September, 2022 on the basis of a ratio of 1 Equity Share: 1 OCPS. Without prejudice to MASL's right to conversion into equity shares or their right to redeem part or all OCPS, the OCPS shall be compulsorily redeemed at Rs. 10.5 (Rupees Ten and a Half) each at the expiry of 10 (Ten) years from the Closing date or at the expiry of the maximum period permitted under the Applicable Law, whichever is sooner.

Equity component of compound financial instruments includes equity component of such 76,05,000 Optionally Convertible Preference Shares derived as per the requirements of Paras 28 & 29 and of IND As 32 "Financial Instruments Presentation"

The Board Of Directors of the Company issued 5,00,000 6% Optionally Convertible Cumulative Redeemable Preference Shares (OCCRPS) of Rs. 10/- each aggregating Rs. 50,00,000/- on Rights Basis to the existing Equity Shareholder that is the Mahindra Agri Solutions Ltd. through circular resolution on 18th March, 2021. Such OCCRPS are convertible into Equity share at the option of share holder at fair market value on date of conversion.

OCCRPS will be redeemable after 10 years from the date of allotment and redemption will be at face value.

Equity component of compound financial instruments includes equity component of such 5,00,000 Optionally Convertible Cumulative Redeemable Preference Shares (OCCRPS) derived as per the requirements of Paras 28 & 29 and of IND As 32 "Financial Instruments Presentation"

Total	**150,000.00**	125,000.00

Note No. 22 - Earnings per Share

Figures in Rupees

Particulars	For the year ended 31 March 2021	For the year ended 31 March 2020
	Per Share	Per Share
Basic Earnings per share		
From continuing operations	**(17.55)**	(26.53)
From discontinuing operations		
Total basic earnings per share	**(17.55)**	(26.53)
Diluted Earnings per share		
From continuing operations	**(3.09)**	(5.83)
From discontinuing operations		
Total diluted earnings per share	**(3.09)**	(5.83)

Basic earnings per share

The earnings and weighted average number of ordinary shares used in the calculation of basic earnings per share are as follows:

Figures in Rupees

Particulars	For the year ended 31 March 2021	For the year ended 31 March 2020
Profit/(loss) for the year attributable to owners of the Company	**(27,477,982)**	(40,079,050)
Less: Preference dividend and tax thereon	–	–
Profit/(loss) for the year used in the calculation of basic earnings per share	**(27,477,982)**	(40,079,050)
Profit for the year on discontinued operations used in the calculation of basic earnings per share from discontinued operations	–	–
Profits used in the calculation of basic earnings per share from continuing operations	**(27,477,982)**	(40,079,050)
Weighted average number of equity shares	**1,565,452**	1,510,640
Earnings per share from continuing operations - Basic	**(17.55)**	(26.53)

Diluted earnings per share

The diluted earnings per share has been computed by dividing the Net profit after tax available for Equity shareholders by the weighted average number of equity shares, after giving dilutive effect of the outstanding Warrants, Stock options and Convertible bonds for the respective periods. Since, the effect of the conversion of Preference shares was anti-dilutive, it has been ignored.

Figures in Rupees

Particulars	For the year ended 31 March 2021	For the year ended 31 March 2020
Profit/(loss) for the year used in the calculation of basic earnings per share	**(27,477,982)**	(40,079,050)
Add: Interest expense and exchange fluctuation on convertible bonds (net) - adjusted for attributable taxes	–	–
Profit/(loss) for the year used in the calculation of diluted earnings per share	**(27,477,982)**	(40,079,050)
Profit for the year on discontinued operations used in the calculation of diluted earnings per share from discontinued operations	–	–
Profits used in the calculation of diluted earnings per share from continuing operations	**(27,477,982)**	(40,079,050)

The weighted average number of ordinary shares for the purpose of diluted earnings per share reconciles to the weighted average number of ordinary shares used in the calculation of basic earnings per share as follows:

Figures in Rupees

Particulars	For the year ended 31 March 2021	For the year ended 31 March 2020
Weighted average number of equity shares used in the calculation of Basic EPS	**1,565,452**	1,510,640
Add: Effect of Warrants,	–	–
ESOPs	–	–
Convertible bonds	–	–
OCPS Issued	**8,105,000**	6,880,000
Weighted average number of equity shares (Including OCPS) used in the calculation of Diluted EPS	**8,897,644**	6,870,832

Note: The weighted average number of shares takes into account the weighted average effect of changes in treasury share transactions during the year.

Note: An entity shall disclose the list of Instruments (including contingently issuable shares) that could potentially dilute basic earnings per share in the future, but were not included in the calculation of diluted earnings per share because they are antidilutive for the period(s) presented.

Note: An entity shall disclose a description of ordinary share transactions or potential ordinary share transactions, other than those accounted for in accordance with paragraph 64, that occur after the reporting period and that would have changed significantly the number of ordinary shares or potential ordinary shares outstanding at the end of the period if those transactions had occurred before the end of the reporting period.

Financial instruments and other contracts generating potential ordinary shares may incorporate terms and conditions that affect the measurement of basic and diluted earnings per share. These terms and conditions may determine whether any potential ordinary shares are dilutive and, if so, the effect on the weighted average number of shares outstanding and any consequent adjustments to profit or loss attributable to ordinary equity holders. The disclosure of the terms and conditions of such financial instruments and other contracts is encouraged, if not otherwise required.

Short-term employee benefits	**6,160,000**	7,700,000
Post-employment benefits	–	–
Other long-term benefits	–	–
Termination benefits	–	–
Share-based payment	–	–

The remuneration of directors and key executives is determined by the remuneration committee having regard to the performance of individuals and market trends.

Note: Above disclosure is not required for the transactions/ balances with governments and an entity that is a related party because the same government has control or joint control of, or significant influence over, both the reporting company and the that entity.

However following disclosures shall be provided:

(a) name of the government and the nature of its relationship with the reporting company;

(b) (i) the nature and amount of each individually significant transaction; and

(b) (ii) for other transactions that are collectively, but not individually, significant, a qualitative or quantitative indication of their extent.

Note No. 26 - Provident Fund-In February 2019, the Supreme Court of India in its judgement clarified the applicability of allowances that should be considered to measure obligations under Employees Provident Fund Act, 1952. The Company has been legally advised that there are interpretative challenges on the application of judgement retrospectively and as such does not consider there is any probable obligations for past periods. Accordingly, based on legal advice the Company has made a provision for provident fund contribution from the date of the Supreme Court order.

INDEPENDENT AUDITOR'S REPORT

To The Members of Mahindra EPC Irrigation Limited

Report on the Audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **Mahindra EPC Irrigation Limited** ("the Company"), which comprise the Balance Sheet as at 31 March 2021, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the (Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and its profit total comprehensive income, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the standalone financial statements of the current period. We have determined that there are no key audit matters to be communicated in our report.

Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the financial highlights, management discussion & analysis, Board report and related annexure there to corporate governance, but does not include the standalone financial statements, consolidated financial statements and our auditor's report thereon.

- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit we report that:

    a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

    b. In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

c. The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Cash Flows and Statement of Changes in Equity dealt with by this Report are in agreement with the relevant books of account.

d. In our opinion, the aforesaid standalone financial statements comply with the Ind AS specified under Section 133 of the Act.

e. On the basis of the written representations received from the directors as on 31 March, 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March, 2021 from being appointed as a director in terms of Section 164(2) of the Act.

f. With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A". Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls over financial reporting.

g. With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended, in our opinion and to the best of our information and according to the explanations given to us, the remuneration paid by the Company to its directors during the year is in accordance with the provisions of section 197 of the Act.

h. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:

   i. The Company has disclosed the impact of pending litigations on its financial position in its standalone financial statements.

   ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.

   iii. There were no amounts which were required to be transferred, to the Investor Education and Protection Fund by the Company.

2. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure B" a statement on the matters specified in paragraphs 3 and 4 of the Order.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of Mahindra EPC Irrigation Limited ("the Company") as of March 31, 2021 in conjunction with our audit of the standalone Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls Over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2021, based on the criteria for internal financial control over financial reporting established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE “B” TO THE INDEPENDENT AUDITOR’S REPORT

(Referred to in paragraph 2 under `Report on Other Legal and Regulatory Requirements’ section of our report of even date)

i. (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment.

(b) The Company has a programme of verification of property, plant and equipment to cover all the items in a phased manner over a period of three years which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. Pursuant to the programme, certain fixed assets were physically verified by the Management during the year. According to the information and explanations given to us, no material discrepancies were noticed on such verification.

(c) According to the information and explanations given to us and the records examined by us and based on the examination of the registered sale deed / transfer deed / conveyance deed provided to us, we report that, the title deeds, comprising all the immovable properties of buildings which are freehold, are held in the name of the Company as at the balance sheet date. Immovable properties of buildings whose title deeds have been pledged as security for loans availed from banks are held in the name of the Company based on the confirmation directly received by us from the bank. In respect of immovable properties of land that have been taken on lease and disclosed as prepaid asset in the Ind AS financial statements, the lease agreements are in the name of the Company, where the Company is the lessee in the agreement.

ii. As explained to us, the inventories were physically verified during the year by the Management at reasonable intervals except stock lying with third parties for which confirmations have been obtained and no material discrepancies were noticed on physical verification.

iii. The Company has not granted any loans, secured or unsecured, to companies, firms, limited liability partnerships or other parties covered in the register maintained under Section 189 of the Act.

iv. The Company has not granted any loans, made investments or provided guarantees to which the provisions of Sections 185 and 186 of the Act apply, and hence reporting under clause (iv) of CARO 2016 is not applicable.

v. According to the information and explanations given to us, the Company has not accepted any deposit during the year. In respect of unclaimed deposits, the Company has complied with the provisions of Sections 73 to 76 or any other relevant provisions of the Act and the Companies (Acceptance of Deposits) Rules, 2014, as amended. According to the information and explanations given to us, no order has been passed by the Company Law Board or the National Company Law Tribunal or the Reserve Bank of India or any Court or any other Tribunal.

vi. The maintenance of cost records has been prescribed by the Central Government under Section 148(1) of the Act. We have broadly reviewed the cost records maintained by the Company pursuant to the Companies (Cost Records and Audit) Rules, 2014, as amended prescribed by the Central Government under Section 148(1) of the Act, and are of the opinion that, prima facie, the prescribed cost records have been made and maintained. We have, however, not made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

vii. According to the information and explanations given to us, in respect of statutory dues:

(a) The Company has generally been regular in depositing undisputed statutory dues, including provident fund, employees’ state insurance, income-tax, goods and services tax, customs duty, cess and other material statutory dues applicable to it with the appropriate authorities.

(b) There were no undisputed amounts payable in respect of provident fund, employees’ state insurance, income-tax, goods and services tax, customs duty, cess and other material statutory dues in arrears as at 31 March 2021 for a period of more than six months from the date they became payable.

(c) Details of dues of income-tax, goods and services tax, sales-tax, service tax, customs duty, excise duty, and value added tax which have not been deposited as on 31 March 2021 on account of disputes are given below:

Name of statute	Nature of dues	Forum where dispute is pending	Period to which the amount relates	Amount unpaid (Rs. in lakhs)
Central Excise Act, 1944	Excise Duty	Commissioner of Central Excise	FY 1996-97	174.33
		Commissioner of Central Excise	FY 1997-98	37.21
Madhya Pradesh Vat Act, 2002	Sales Tax	Addtl CCT/APP DC/DCAPP DC Bhopal	FY 2014-15	424.09
Chhattisgarh VAT Act, 2003	Sales Tax	Deputy Commissioner of Commercial Tax, Raipur	FY 2014-15	11.41
Income Tax Act, 1961	Income Tax	Commissioner of Income Tax (Appeals)	FY 2016-17	140.50
		Commissioner of Income Tax (Appeals)	FY 2011-12	193.94
		Commissioner of Income Tax (Appeals)	FY 2017-18	48.46
Tamil Nadu VAT Act, 2006	Sales Tax	State Tax Officer	FY 2016-17	13.62
	Sales Tax	State Tax Officer	FY 2017-18	5.13

viii. In our opinion and according to the information and explanations given to us, the Company has not defaulted in repayment of loans or borrowings to banks and government. The Company has not borrowed from financial institutions and has not issued any debentures.

ix. The Company has not raised moneys by way of initial public offer or further public offer (Including debt instruments) or term loans and hence reporting under clause (ix) of CARO 2016 is not applicable.

x. To the best of our knowledge and according to the information and explanations given to us, no fraud by the Company and no material fraud on the Company by its officers or employees has been noticed or reported during the year.

xi. In our opinion and according to the information and explanations given to us, the Company has paid / provided managerial remuneration in accordance with the requisite approvals mandated by the provisions of Section 197 read with Schedule V to the Act.

xii. The Company is not a Nidhi Company and hence reporting under clause (xii) of CARO 2016 is not applicable.

xiii. In our opinion and according to the information and explanations given to us, the Company is in compliance with Sections 177 and 188 of the Act, where applicable, for all transactions with the related parties and the details of related party transactions have been disclosed in the Ind AS financial statements etc. as required by the applicable accounting standards.

xiv. During the year, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures and hence reporting under clause (xiv) of CARO 2016 is not applicable to the Company.

xv. In our opinion and according to the information and explanations given to us, during the year, the Company has not entered into any non-cash transactions with its directors or directors of its holding company or persons connected with them and hence, provisions of Section 192 of the Act are not applicable.

xvi. The Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934.

CEO AND CFO CERTIFICATION

We, the undersigned in our respective capacities as Chief Executive Officer and Chief Financial Officer, to the best of our knowledge and belief certify that:

A) We have reviewed the financial statements and the cash flow statement for the year ended 31st March, 2021 and that to the best of our knowledge and belief, We confirm that:

   1) these statements do not contain any materially untrue statement or omit any material fact or contain statements that might be misleading;

   2) these statements together present a true and fair view of the Company's affairs and are in compliance with existing accounting standards, applicable laws and regulations.

B) To the best of our knowledge and belief, no transactions entered into by the Company during the year ended 31st March, 2021 are fraudulent, illegal or violative of the Company's code of conduct/ethics.

C) We accept responsibility for establishing and maintaining internal controls for financial reporting and that we have evaluated the effectiveness of the internal control systems of the Company pertaining to financial reporting and we have disclosed to the Auditors and the Audit Committee, deficiencies in the design or operation of internal controls, over financial reporting, if any, of which we are aware and the steps we have taken or propose to take to rectify these deficiencies.

D) We have indicated to the Auditors and the Audit Committee that:

   1) there has not been any significant change in internal control over financial reporting during the year under reference;

   2) there has not been any significant change in the accounting policies during the year requiring the disclosure in the notes to the financial statements; and

   3) We are not aware of any instance during the year of significant fraud with involvement therein of the Management or any employee having a significant role in the Company's internal control system over financial reporting.

NOTES TO THE STANDALONE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021

NOTE NO. 1 - GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

A. Corporate Information

Mahindra EPC Irrigation Limited (Formerly known as EPC Industrie Limited) is a Public Limited Company listed on the Bombay Stock Exchange Limited and National Stock Exchange. It was incorporated on November 28, 1981 under the Companies Act, 1956. It is engaged in the business of Micro Irrigation Systems such as Drip and Sprinklers, Agricultural Pumps, Greenhouses and Land Scape Products. The Company is a subsidiary of Mahindra and Mahindra Limited.

The Company is operating its manufacturing facilities within the guidelines set by the respective states. Based on immediate assessment and on the basis of available information of the impact of COVID-19 on the operations of the Company, and ongoing discussions with customers, vendors and related service providers, the Company is hopeful of serving customer orders, obtaining supply of raw materials and logistics services. Based on the assessment considering the internal and external sources of information including economic forecasts, the Company expects the carrying amounts of assets including trade receivables and inventories to be recoverable. However, the actual impact of COVID-19 may be different from the estimates as at the date of approval of these standalone financial results and the Company will continue to closely monitor the developments.

B. Statement of compliance

The standalone financial statements have been prepared in accordance with IND AS's notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended.

C. Basis of preparation and presentation

The standalone financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such basis, except for share-based payment transactions that are within the scope of Ind AS 102, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

D. Functional and presentation currency

These financial statements are presented in Indian Rupees ('Rupees') which is also the Company's functional currency. All amounts are rounded-off to the nearest rupee in lakhs (two decimals), unless otherwise indicated.

E. Recent Accounting Standards

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards.

The MCA notification for schedule 3 - On March 24, 2021, the Ministry of Corporate Affairs ("MCA") through a notification, amended Schedule III of the Companies Act, 2013. The amendments revise Division I, II and III of Schedule III and are applicable from April 1, 2021. The amendments are extensive and the Company will evaluate the same to give effect to them as required by law.

F. Property, Plant and equipment:

Property, Plant and equipment are carried at cost less accumulated depreciation and impairment losses, if any. Cost includes cost of acquisition or construction and is stated at historical cost.

Depreciation on all property, plant and equipment, is provided on Straight Line Method as per the estimated useful life. Leasehold Assets are depreciated over the shorter of the lease term and their useful lives. Depreciation on additions to assets or on sale / disposal of assets is calculated from the date of such addition or up to the date of such sale / disposal as the case may be.

Property, Plant and equipment retired from active use and held for sale are stated at the lower of their net book value and net realisable value and are disclosed separately in the Balance Sheet.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in statement of profit and loss.

Estimated useful life of the assets are as follows:

Assets	**Useful life**
Buildings	
Factory Building	30 Years
Office Building	60 Years
Extrusion Machines	19 Years
Other Machineries	15 Years
Electrical Installations, factory Equipments, furniture	10 Years
Moulds and Dies	6 Years
Office Equipment	5 Years
Computers	3 Years
Vehicles - Cars	8 Years
Vehicles - Cars (For employee use)	3 Years

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on prospective basis.

G. Intangible Assets:

Intangible assets are recognised only when economic benefit attributable to the assets will flow to the enterprise and cost can be measured reliably. They are being amortised over the estimated useful life of 36 months.

The estimated useful life of the intangible assets and the amortisation period are reviewed at the end of each financial year and the amortisation period is revised to reflect the changed pattern, if any.

Subsequent to initial recognition, intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in the statement of profit or loss when the asset is derecognised.

H. Impairment of Assets:

The carrying value of assets / cash generating units at each balance sheet date are reviewed for impairment. If any indication of impairment exists, the recoverable amount of such assets is estimated and impairment is recognised, if the carrying amount of these assets exceeds their recoverable amount. The recoverable amount is the greater of the fair value less costs of disposal and their value in use. Value in use is arrived at by discounting the future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life to their present value based on an appropriate discount factor. When there is indication that an impairment loss recognised for an asset in earlier accounting periods no longer exists or may have decreased, such reversal of impairment loss is recognised in the Statement of Profit and Loss of the amount. They are arrived at cost less accumulated amortisation and accumulated impairment losses.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years.

I. Inventories:

Inventories comprise of raw materials, work in progress, finished goods and stock in trade, are valued at costs of purchase, conversion and other costs incurred if any in bringing the inventories to their present location and condition. Inventories are stated at lower of cost and net realisable value.

Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Cost is determined on the basis of the weighted average method.

J. Foreign Exchange Transactions:

In preparing the financial statements transactions in other than the company's functional currency are recorded at the exchange rates prevailing on the date of transaction. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. The exchange difference between the rate prevailing on the date of transaction and on the date of settlement as also on translation of monetary items at the end of the year is recognised as income or expense, as the case may be. Non - Monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

K. Revenue recognition:

Revenue from contracts with customer

Revenue from contract with customers is recognised when the Company satisfies performance obligation by transferring promised goods to the customer. Performance obligations are satisfied at the point of time when the customer obtains controls of the asset.

Revenue is measured based on transaction price, which is the fair value of the consideration received or receivable, stated net of discounts, returns and value added tax.

The Company recognises revenue from the following major sources:

a) Sale of Products; and

b) Sale of services.

a) Sale of Products

The company sells Micro irrigation systems (MIS) both to the Open market and Project market. Sales-related warranties associated with MIS cannot be purchased separately and they serve as an assurance that the products sold comply with agreed-upon specifications. Accordingly, the Company accounts for warranties in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets (refer note no. 14).

For sales of MIS to open market, revenue is recognised when control of the good has transferred, being when the goods have been delivered to the dealer based on the terms and conditions in his agreement. Following delivery, the dealer has full discretion over the manner of distribution and price to sell the goods, has the primary responsibility when on selling the goods and bears the risks of obsolescence and loss in relation to the goods.

For sales of MIS to project market, revenue is recognised when control of the good has transferred, being when the goods have been installed at the farmers' place as per the approved design and acknowledged by the farmer. Following which farmer has full control of the MIS.

A receivable is recognised by the Company when the goods are delivered to the distributor /MIS installation acknowledged by the farmer as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due.

b) Sale of Services

Revenue relating to the services is recognised at a point in time.

L. Other income:

Dividend income from investments is recognised in statement of profit and loss when the shareholders right to receive payment has been established.

Interest income from financial assets is recognised when it is probable that the economic benefits will flow to the company and the amount of income can be measured reliably.

Interest income is accrued on time basis, by reference to the principal outstanding and at the effective interest rate applicable. The effective interest method is a method of calculating the amortised cost of the financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial assets, to that asset's net carrying amount on initial recognition.

M. Government Grants:

Government grants are not recognised until there is reasonable assurance that the Company will comply with the conditions attached to them and that the grants will be received.

Government grants are recognised in the statement profit or loss on a systematic basis over the periods in which the Company recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Company should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the balance sheet and transferred to statement of profit or loss on a systematic and rational basis over the useful lives of the related assets.

N. Employee benefits:

a) Short term and other long term employee benefits

A liability is recognised for benefits accruing to employees in respected of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that services. Liabilities recognised in respect of other long -term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees upto the reporting date.

b) Post-employment benefits

(i) Defined contribution plans

The Company's contribution to provident fund, employee state insurance scheme and superannuation fund are considered as defined contribution plans and are charged as an expense as they fall due based on the amount of contribution required to be made and when services are rendered by the employee.

(ii) Defined benefit plans

The employees' gratuity fund scheme, managed by Life Insurance Corporation (LIC) is a defined benefit plan. The present value of obligation is determined based on actuarial valuation carried out as at the end of each financial year using the Projected Unit Credit Method.

The obligation is measured at the present value of the estimated future cash flows. The discount rate used for determining the present value of the obligation under defined benefit plans, is based on the market yield on government securities, of a maturity period equivalent to the weighted average maturity profile of the related obligations at the Balance Sheet date.

Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised in the statement of profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset.

(iii) Share based payment

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 20.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Company's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate with a corresponding adjustment to the equity-settled employee benefits reserve.

O. Lease Policy:

The Company assesses whether a contract is, or contains a lease, at inception of the contract. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Company assesses whether: (1) the contract involves the use of an identified asset (2) the Company has substantially all of the economic benefits from use of the asset through the period of the lease and (3) the Company has the right to direct the use of the asset.

At the commencement date of the lease, the Company recognise a right-of-use asset and a corresponding lease liability for all lease arrangements in which it is lessee, except for short-term leases (leases with a term of twelve months or less), leases of low value assets and, for contract where the lessee and lessor has right to terminate a lease without permission from the other party with no more than an insignificant penalty. The lease expense of such short-term leases, low value assets leases and cancellable leases, are recognised as an operating expense on a straight-line basis over the term of the lease.

At commencement date, lease liability is measure at the present value of the lease payments to be paid during non-cancellable period of the contract, discounted using the incremental borrowing rate. The right-of-use assets is initially recognised at the amount of the initial measurement of the corresponding lease liability, lease payments made at or before commencement date less any lease incentives received and any initial direct costs.

Subsequently the right-of-use asset is measured at cost less accumulated depreciation and any impairment losses. Lease liability is subsequently measure by increasing the carrying amount to reflect interest on the lease liability (using effective interest rate method) and reducing the carrying amount to reflect the lease payments made. The right-of-use asset and lease liability are also adjusted to reflect any lease modifications or revised in-substance fixed lease payments.

As a lessor:

Income from operating leases where the Company is a lessor is recognised as income on a straight-line basis over the lease term.

P. Borrowing Costs:

All borrowing costs are charged to the Statement of Profit and Loss except, borrowing costs that are attributable to the acquisition or construction of qualifying assets which are those that necessarily take a substantial period of time to get ready for their intended use or sale, which are capitalised as part of the cost of such assets.

Q. Product Warranty:

In respect of warranties given by the Company on sale of certain products, the estimated costs of these warranties are accrued at the time of sale. The estimates for accounting of warranties are discounted when required and are reviewed and revisions are made as required by the management of the company.

R. Taxes on income:

- **Current Tax**

  Income Taxes are accounted for in accordance with IND AS-12. Tax expenses comprise both current tax and deferred tax. Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act 1961, and other applicable tax laws.

- **Deferred Tax**

  Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

  The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

  Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

S. Provisions, Contingent Liabilities and Contingent Assets:

A provision is recognised when the Company has a present obligation (legal or constructive) as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

Contingent liabilities and assets are not recognised but are disclosed in the notes.

T. Operating Segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker (CODM). The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the company. The CODM operation of the company reviews the operation of the company as Precision Farming Products & Services.

U. Investment in Joint Venture

The company accounts for its investments in Joint Venture at cost less accumulated impairment, if any.

V. Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Classification and subsequent measurement

Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Classification of financial assets:

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at fair value.

Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Company irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Debt instruments that do not meet the amortised cost criteria or FVTOCI criteria are measured at FVTPL. In addition, debt instruments that meet the amortised cost criteria or the FVTOCI criteria but are designated as at FVTPL are measured at FVTPL.

A financial asset that meets the amortised cost criteria or debt instruments that meet the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the ‘Other income’ line item.

Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, trade receivables, other contractual rights to receive cash or other financial asset.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Further, for the purpose of measuring lifetime expected credit loss allowance for trade receivables, the Company has used a practical expedient as permitted under Ind AS 109. This expected credit loss allowance is computed based on a provision matrix which takes into account historical credit loss experience and adjusted for forward-looking information.

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset’s carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities subsequently measured at amortised cost:

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the ‘Finance costs’ line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Derecognition of financial liabilities:

The Company derecognises financial liabilities when, and only when, the Company’s obligations are discharged, cancelled or have expired. An exchange with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

W. Use of judgements and estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company’s accounting policies and the reported amounts of assets, liabilities, income, expenses and the disclosures of contingent assets and liabilities. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an on going basis. Revisions to estimates are recognised prospectively.

Following are areas that involved a higher degree of estimate and judgement or complexity in determining the carrying amount of some assets and liabilities.

- useful life of property, plant and equipment and intangible assets
- estimation of defined benefit obligation (Refer Note 28)
- provision for warranty claims (Refer Note 14)
- income taxes - current and deferred taxes (Refer Note 7)
- impairment of trade receivables (Refer Note 5)
- impairment of investments

Detailed information about each of these estimates and judgements that have a significant risk of resulting in material adjustment within the next financial year is included in relevant notes for the above items.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

Notes to the standalone financial statements for the year ended March 31, 2021 (Contd.)

NOTE NO. 9 - INVENTORIES
[Lower of cost and net realisable value]

Rs. in Lakhs

Particulars	As at March 31, 2021	As at March 31, 2020
(a) Raw materials and components	**2,137.38**	2,049.59
(b) Work-in-progress	**235.59**	195.97
(c) Finished and semi-finished goods	**913.89**	1,131.15
(d) Stock-in-trade of goods acquired for trading	**142.22**	210.92
Total	**3,429.08**	3,587.63
Included above, goods-in-transit:		
Raw materials and Components	**69.19**	–
Total	**69.19**	–

All inventories are pledged as security for credit facilities from

banks. Mode of valuation of inventories is stated in Note 1(l).

Out of the above, Rs. 143.49 lakhs are lying with third parties (year ended March 31, 2020 Rs. 260.21 Lakhs).

The amount of inventories recognised as an expense is Rs.13,304.35 lakhs (for the year ended 31 March 2020 Rs. 13,433.68 lakhs) including Rs. 34.66 lakhs (for the year ended 31 March 2020 Rs.73.48 lakhs) in respect of write down of inventories to net realisable value, and has been reduced by Rs.7.80 lakhs (for the year ended 31 March 2020 - Rs. 8.57 lakhs) in respect of reversal of such write downs. Reversal in provision is due to sale and/or consumption of inventories provided for in earlier years.

Inventories are valued considering provision for allowance for obsolescence, inventory carrying risk and possible delayed usage in view of lower production due to slowly pacing off-take in present situation. In addition to the historical pattern of inventory provision, we have considered the likelihood of variations in sales price, possibilities of cancellation of order, nature and aging of inventories due to Covid-19. This assessment is not based on any mathematical model but it is based on an assessment considering the product demand, expected price trend and sales plan. Based on the above assessment, the Company is of the view that the carrying amounts of inventories are expected to be realisable.

Warranty Claims:

Provision for warranty represents present value of management's best estimate of the future outflow of economic benefits that will be required in respect of sale of certain products, the estimated cost of which is accrued at the time of sale. Management estimates the related provision for future warranty claims based on historical warranty claim information and is adjusted regularly to reflect new information. The products are generally covered under a free warranty period ranging from 6 months to 5 years. It is expected that most of these costs will be incurred in the next two financial years and all will have been incurred within five years after the reporting date.

	Sale of scrap	**35.75**	62.74
	Government Grant Incentives	**–**	7.12
Total - Other operating revenues		**35.75**	69.86

The company recognises revenue as per IND AS 115 'Revenue from contracts with customers'.

Accordingly, the Company recognises revenue when it transfers control of a product or service to a customer as and when it satisfies the performance obligation by transferring promised goods or services to a customer and customer obtains the control or benefit of the same.

The revenue is recognised on satisfaction of performance obligation / transferring control to the customer and hence the same is recognised at a point in time. The company believes that above disaggregation best depicts how the nature, amount, timing and uncertainty of revenues and cash flows are affected by industry, market and other economic factors.

(d) Staff welfare expenses	**103.91**	141.86
Total Employee Benefit Expense	**2,749.92**	2,649.35

Pursuant to the “Employees Stock Option Scheme – 2014” (ESOS) approved by the Shareholders in the Annual General Meeting held on July 31, 2014, the Company had granted 80,424, 3,228, 1,33,432, 11,129, 80,110 and 71,459 Stock Options to the eligible employees on October 28, 2014, October 31, 2015, November 22, 2016, November 22, 2017, February 28, 2019 and March 12, 2021 respectively as per the recommendations of the Nomination and Remuneration Committee, at an exercise price of Rs. 10/- each. In respect of the options granted in 2014, 2016, 2017, 2019 and 2021 the equity settled options vest in 5 tranches of 20% each upon the expiry of 12 months, 24 months, 36 months, 48 months and 60 months, respectively from the date of grant. Each tranche is exercisable within one year from the respective date of vesting. The number of options exercisable in each tranche is minimum 20% of the options vested, except in case of the last date of the exercise, where the employee can exercise all options vested but not exercised till that date. In respect of options granted in 2015, the equity settled options vest in 4 tranches of 25% each upon the expiry of 12 months, 24 months, 36 months and 48 months, respectively from the date of grant. Each tranche is exercisable within one year from the respective date of vesting. The number of options exercisable in each tranche is minimum 25% of the options vested, except in case of the last date of the exercise, where the employee can exercise all options vested but not exercised till that date.

The difference between the fair price of the share underlying the options granted on the date of grant of option and the exercise price of the option representing share based payment expenses is expected over the vesting period.

		Number of Shares	Grant Date	Expiry Date	Exercise Price	Fair value at Grant Date
Equity Settled						
1	Series 1 Granted on October 28, 2014	80,424	October 28, 2014	October 28, 2019	10	170.97

The fair value of the employee share options has been measured using the Black-Scholes option Pricing formula.

Expected volatility has been based on an evaluation of the historical volatility of the Company's share price, particularly over the historical period commensurate with the expected term. The expected term of the instruments has been based on historical experience and general option holder behaviour.

The Holding Company has recovered Rs. 0.56 lakhs (March 31, 2020 Rs. 0.88 lakhs) as ESOP cost from the Company in respect of employees deputed to the Company.

NOTE NO. 24 - FINANCIAL INSTRUMENTS

I Capital management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern.

- to provide an adequate return to shareholders by pricing products and services commensurate with the level of risk.

The Company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position.

The Company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

CREDIT RISK

Credit risk management

Credit risk arises when a counterparty defaults on its contractual obligations to pay, resulting in financial loss to the Company. The company has dealings with government organisation for subsidy related transaction and with private parties. For private non government parties credit limits are set quarterly. The Company has adopted a policy of only dealing with creditworthy non government parties and obtaining security cheques, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company's exposure and credit worthiness of such parties are continuously monitored and controlled by counterparty limits that are reviewed by Credit Control function based on the approved process.

No interest is charged on overdue balance.

Trade receivables consist of a large number of customers, spread across geographical areas. On going credit evaluation is performed on the financial condition of accounts receivable. There are no non government customers who represent more than 5% of the total balance of trade receivable.

The Company applies the simplified approach to provide expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The Company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company and individual receivable specific provision where applicable. Forward-looking information (including macroeconomic information) has been incorporated into the determination of expected credit losses.

The loss allowance provision is determined as follows:

Rs. in Lakhs

As at March 31, 2021

- Amounts Recovered during the year	**–**	–
Balance at end of the year	**1,789.32**	1,727.42

The loss allowance provision has changed during the year due to recovery from debtors and business circumstances.

During the year, the company has written off Rs. 197.69 lakhs (March 31, 2020 Rs. 71.18 lakhs) of trade receivables.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short - medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

(iii) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Rs. in Lakhs

MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such as equity price risk and commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

Currency Risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. As at the year end, there were no material foreign currency exposure.

NOTE NO. 25 - FAIR VALUE MEASUREMENT

The directors consider that the carrying amounts of financial assets and financial liabilities that are not measured at fair value, recognised in the financial statement approximate their fair values.

NOTE NO. 26 - LEASES (REFER NOTE 2B)

The Company has adopted Ind AS 116 'Leases' with the date of initial application being 1st April, 2019. Ind AS 116 replaces Ind AS 17 – Leases and related interpretation and guidance.

In adopting Ind AS 116, the Company has applied the below practical expedients:

The Company has applied a single discount rate to a portfolio of leases with reasonably similar characteristics

The Company has treated the leases with remaining lease term of less than 12 months as if they were "short term leases"

The Company has not applied the requirements of Ind AS 116 for leases of low value assets (assets of less than Rs. 3.5 lakhs in value)

The Company has excluded the initial direct costs from measurement of the right-of-use asset at the date of transition

The Company has used hindsight, in determining the lease term if the contract contains options to extend or terminate the lease

On transition to Ind AS 116, the Company has followed the Modified Retrospective Approach, accordingly recognised right-of-use assets amounting to Rs. 360.55 lakhs, lease liabilities amounting to Rs. 55.21 lakhs as at April 1, 2019.

The Company has discounted lease payments using the applicable incremental borrowing rate as at April 1, 2019, which is 8.50% for measuring the lease liability. In view of this, the operating lease rent which was hitherto accounted under 'Other expenses' in previous periods has now been accounted as depreciation and finance costs.

Reconciliation of operating lease commitments as at March 31, 2019 with the lease liabilities recognized in the Balance Sheet as at April 1, 2019

	Particulars	For the year ended March 31, 2020
A.	**Operating lease commitments disclosure as per Ind AS 17 as of March 31, 2019**	**18.01**
	Weighted average incremental borrowing rate	**8.50**
B.	**Present value using incremental borrowing rate as on April 1, 2019**	**227.18**
	Recognition exemption for short term leases	**(171.97)**
	Recognition exemption for low value assets	**–**
Total lease liabilities on transition date		**55.21**

Carrying Value of Right of use assets (Refer Note 2B)	**299.18**	311.33

The table below provides details regarding the contractual maturities of lease liabilities

Particulars	For the year ended March 31, 2021	For the year ended March 31, 2020
Less than one year	**2.64**	7.94
One to Three years	**–**	2.99

Rental expense recorded for short-term leases was Rs.219.84 Lakhs (Previous Year: Rs.171.97 Lakhs) for the year ended March 31, 2021.

NOTE NO. 27 - SEGMENT INFORMATION

The Company is engaged in the business of Precision Farming Products and Services and in a single geography viz, India. The Information reported to the chief operating decision maker (CODM) [Viz, The Managing Director] for assessment of performance of business and allocation of resources is under this segment.

Accordingly, The Company has identified a single segment under Ind AS 108 -"Operating Segments".

There is no single customer who accounts for 10% more of the company revenues.

Refer Note 17 for the analysis of revenue from it major products and services.

NOTE NO. 28 - EMPLOYEE BENEFITS

(a) Defined Contribution Plan

The Company's contribution to Provident Fund Rs.101.36 lakhs (year ended March 31, 2020 : Rs. 102.85 lakhs) and Superannuation Fund Rs. 33.58 lakhs (year ended March 31, 2020 : Rs.31.60 lakhs) has been recognised in the Statement of Profit or Loss under the head Employee Benefits Expense.

(b) Defined Benefit Plans:

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting. The Company makes annual contribution to the group gratuity scheme administered by the Life Insurance Corporation of India.

Through its defined plans the Company is exposed to a number of risks, the most significant of which are detailed below:

Asset Volatility

The plan liabilities are calculated using a discount rate set with reference to government bond yields; if plan assets under perform compared to the government bond discount rate, this will create or increase a deficit. The defined benefit plans hold on investment with LIC, which are expected to perform in line with government bonds in the long- term.

The company believes that due to the long-term nature of the plan liabilities, investments of funds with LIC is an appropriate element of the Company's long term strategy to manage the plans efficiently.

Changes in bond yields

A decrease in government bond yields will increase plan liabilities, although this is expected to be partially offset by an increase in the value of the plan assets.

Life expectancy

The plan's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan's liabilities.

Defined benefit plans - as per actuarial valuation

		Rs. in Lakhs
Particulars	**Funded Plan**	
	Gratuity	
	2021	2020
Ia. Expense recognised in the Statement of Profit and Loss		
1. Current service cost	**34.15**	27.55
2. Interest cost	**15.44**	15.69
3. Expected return on plan assets	**(14.97)**	(15.59)
	34.62	27.65
Ib. Included in other Comprehensive Income		
1. Return on plan assets	**(4.47)**	(6.50)

- Actual Return on plan assets in excess of the expected return	**4.47**	6.50
- Others (specify)	**(0.49)**	–
5. Contributions by employer (including benefit payments recoverable)	**72.30**	10.00
6. Benefit payments	**–**	–
7. Fair value of plan assets at the end of the year	**368.44**	277.29

Rs. in Lakhs

Particulars	Funded Plan Gratuity 2021	Funded Plan Gratuity 2020
IV. The Major categories of plan assets		
- Funds Managed By Insurer (LIC of India)	**368.44**	277.29
V. Actuarial assumptions		
1. Discount rate	**6.44%**	5.59%
2. Salary escalation	**5.70%**	5.36%

The sensitivity analysis of the defined benefit obligation to changes in the weighted principal assumptions is:

Rs. in Lakhs

Principal assumption		**Changes in assumption**	**Impact on defined benefit obligation: Increase in assumption**	**Impact on defined benefit obligation: Decrease in assumption**
Discount rate	2021	1.00%	15.80	17.30
	2020	1.00%	12.22	13.34
Salary growth rate	2021	1.00%	15.03	14.11
	2020	1.00%	12.23	11.41

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet..

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

Rs. in Lakhs

Maturity profile of defined benefit obligation:	**2021**	2020
Within 1 year	**67.61**	60.79
1 - 2 year	**44.22**	47.37
2 - 3 year	**45.46**	35.15
3 - 4 year	**56.85**	35.26
4 - 5 year	**46.22**	35.36
5 - 10 year	**105.80**	112.84

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation.

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

INDEPENDENT AUDITOR'S REPORT

To The Members of Mahindra Top Greenhouses Private Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **Mahindra Top Greenhouses Private Limited** ("the Company"), which comprise the Balance Sheet as at 31 March 2021, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and its loss total comprehensive loss, its cash flows and the changes in equity for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing specified under section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditor's Responsibility for the Audit of the Standalone Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the standalone financial statements.

Information Other than the Financial Statements and Auditor's Report Thereon

- The Company's Board of Directors is responsible for the other information. The other information comprises the Director's report but does not include the financial statements and our auditor's report thereon.
- Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
- In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.
- If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Standalone Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the Ind AS and other accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statement that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibility for the Audit of the Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on effectiveness of Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the standalone financial statements, including the disclosures, and whether the standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by Section 143(3) of the Act, based on our audit we report that:
   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
   c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Cash Flows and Statement of Changes in Equity dealt with by this Report are in agreement with the relevant books of account.
   d) In our opinion, the aforesaid standalone financial statements comply with the Ind AS specified under Section 133 of the Act.
   e) On the basis of the written representations received from the directors as on 31 March, 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March, 2021 from being appointed as a director in terms of Section 164(2) of the Act.
   f) Reporting on the adequacy of the Internal Control Over Financial Reporting of the Company and the operating effectiveness of such controls, under section 143(3)(i) of the Act is not applicable in view of the exemption available to the Company in terms of the notification no. G.S.R. 583(E) dated 13 June 2017 issued by the Ministry of Corporate Affairs, Government of India, read with general circular No. 08/2017 dated 25 July 2017.
   g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended,

      In our opinion and to the best of our information and according to the explanations given to us, the Company being a private company, section 197 of the Act related to the managerial remuneration is not applicable.
   h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended in our opinion and to the best of our information and according to the explanations given to us:
      i. The Company does not have any pending litigations which would impact its financial position in its financial statements in accordance with the generally accepted accounting practices.
      ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
      iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
2. As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order.

ANNEXURE A TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 2 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

(i) The Company does not have any fixed assets and hence reporting under clause (i) of the CARO 2016 is not applicable.

(ii) As explained to us, the inventories were physically verified during the year by the Management at reasonable intervals and no material discrepancies were noticed on physical verification.

(iii) The Company has not granted any loans, secured or unsecured, to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under section 189 of the Companies Act, 2013.

(iv) The Company has not granted any loans, made investments or provided guarantees, which are covered under the provision of Section 185 and 186 of the Companies Act, 2013 and hence reporting under clause (iv) of the CARO 2016 is not applicable.

(v) According to the information and explanations given to us, the Company has not accepted any deposit during the year hence the directive issued by Reserve Bank of India and the provisions of Sections 73 to 76 or any other relevant provisions of the Companies Act, 2013 and rules framed thereunder are not applicable to the company and hence reporting under clause (v) of the CARO 2016 is not applicable.

(vi) The maintenance of cost records has been specified by the Central Government under section 148(1) of the Companies Act, 2013. However, the company's operations were below the limits specified under the Companies (Cost Records and Audit) Rules, 2014 hence reporting under clause (vi) of CARO 2016 is not applicable.

(vii) According to the information and explanations given to us, in respect of statutory dues:

(a) The Company has generally been regular in depositing undisputed statutory dues, including Income-tax, Goods and Service Tax, cess and other material statutory dues applicable to it to the appropriate authorities.

(b) There were no undisputed amounts payable in respect of Income-tax, Goods and Service Tax, cess and other material statutory dues in arrears as at March 31, 2021 for a period of more than six months from the date they became payable.

(c) There are no dues of Income-tax, Goods and Service Tax, cess and other material statutory dues as on March 31, 2021 on account of disputes.

(viii) The Company has not taken any loans or borrowings from financial institutions, banks and government or has not issued any debentures. Hence reporting under clause (viii) of CARO 2016 is not applicable to the Company.

(ix) The Company has not raised moneys by way of initial public offer or further public offer (including debt instruments) or term loans and hence reporting under clause (ix) of the CARO 2016 Order is not applicable.

(x) To the best of our knowledge and according to the information and explanations given to us, no fraud by the Company and no material fraud on the Company by its officers or employees has been noticed or reported during the year.

(xi) The Company is a private company and hence the provisions of section 197 of the Companies Act, 2013 do not apply to the Company.

(xii) The Company is not a Nidhi Company and hence reporting under clause (xii) of the CARO 2016 Order is not applicable.

(xiii) The company is a private company and hence the provisions of Section 177 and second proviso to the section 188(1) of the Companies Act, 2013 are not applicable to the company. The Company has complied with the other provisions of Section 188 where applicable, for all transactions with the related parties and the details of related party transactions have been disclosed in the financial statements etc. as required by the applicable accounting standards.

(xiv) During the year the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures and hence reporting under clause (xiv) of CARO 2016 is not applicable to the Company.

(xv) In our opinion and according to the information and explanations given to us, during the year the Company has not entered into any non-cash transactions with its directors or directors of its holding, subsidiary or associate company or persons connected with them and hence provisions of section 192 of the Companies Act, 2013 are not applicable.

(xvi) The Company is not required to be registered under section 45-I of the Reserve Bank of India Act, 1934.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021

Note No. 1 - General information and Significant accounting policies

A. Corporate Information

Mahindra Top Greenhouses Private Limited was incorporated on November 16, 2018 under the Companies Act, 2013. It is engaged in the business of Protected cultivation Technology products. The Company is a joint venture of Mahindra EPC Irrigation Limited and Top Greenhouses Ltd., Israel.

The Management has evaluated the recoverability of receivables and realisability of inventories based on subsequent recoveries and customer orders on hand respectively. The impact of COVID-19 may be different from that estimated as at the date of approval of these financial results and the Company will continue to closely monitor the developments.

B. Statement of compliance

i) The financial statements have been prepared in accordance with IND ASs notified under the Companies (Indian Accounting Standards) Rules, 2015, as amended.

ii) As the company was incorporated on November 16, 2019 the comparative information is not for an equivalent period.

C. Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except for certain financial instruments that are measured at fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such basis, except for measurements that have some similarities to fair value but are not fair value, such as net realisable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

D. Functional and presentation currency

These financial statements are presented in Indian Rupees (‘Rupees’) which is also the Company’s functional currency. All amounts are rounded-off to the nearest rupee in lakhs (two decimals), unless otherwise indicated.

E. Inventories:

Inventories comprise all costs of purchase, conversion and other costs incurred in bringing the inventories to their present location and condition and are stated at lower of cost and net realisable value.

Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Cost is determined on the basis of the weighted average method.

F. Revenue recognition:

The Company recognises revenue from the following major sources:

a) Sale of Products; and

b) Sale of services.

Revenue is measured based on the consideration to which the Company expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties. The Company recognises revenue when it transfers control of a product or service to a customer.

a) Sale of Products

The company sells Protected Cultivation Technology Products and Kits. Sales-related warranties associated the products cannot be purchased separately and they serve as an assurance that the products sold comply with agreed-upon specifications. Accordingly, the Company accounts for warranties in accordance with IND AS 37 Provisions, Contingent Liabilities and Contingent Assets (refer note 9).

A receivable is recognised by the Company when the goods are delivered to the customer installation acknowledged by the farmers or delivery of the Kits to the customer as this represents the point in time at which the right to consideration becomes unconditional, as only the passage of time is required before payment is due.

b) Sale of Services

Revenue relating to the services is recognised at a point in time.

G. Other income:

Interest income from a financial asset is accrued on a time basis, by reference to the principal outstanding and the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset’s net carrying amount on initial recognition.

These income are recognised when it is probable that the economic benefit will flow to the Company and the amount of income can be measured reliably.

H. Leases:

The company does not have any lease which are covered under Ind AS 116 Leases.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021 (contd.)

I. Product Warranty:

In respect of warranties given by the Company on sale of certain products, the estimated costs of these warranties are accrued at the time of sale. The estimates for accounting of warranties are reviewed and revisions are made as required.

J. Taxes on income:

- Current Tax

  Income Taxes are accounted for in accordance with IND AS-12. Tax expenses comprise both current tax and deferred tax. Current tax is the amount of tax payable on the taxable income for the year as determined in accordance with the applicable tax rates and the provisions of the Income Tax Act 1961, and other applicable tax laws.

- Deferred Tax

  Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

  The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the asset to be recovered.

  Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

K. Provisions, Contingent Liabilities and Contingent Assets:

A provision is recognised when the Company has a present obligation (legal or constructive) as a result of past events and it is probable that an outflow of resources will be required to settle the obligation in respect of which a reliable estimate can be made. Provisions (excluding retirement benefits) are discounted to their present value and are determined based on the best estimate required to settle the obligation at the Balance Sheet date. These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

Contingent liabilities and assets are not recognised but are disclosed in the notes.

L. Operating Segments

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker (CODM). The CODM, who is responsible for allocating resources and assessing performance of the operating segments, has been identified by the company. The CODM operation of the company reviews the operation of the company as Protected Cultivation Technology Products.

M. Financial instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

Classification and subsequent measurement

Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

<u>Classification of financial assets:</u>

Debt instruments that meet the following conditions are subsequently measured at amortised cost (except for debt instruments that are designated as at fair value through profit or loss on initial recognition):

- the asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at fair value.

<u>Financial assets at fair value through profit or loss (FVTPL)</u>

Debt instruments that do not meet the amortised cost criteria or FVTOCI criteria are measured at FVTPL. In addition, debt instruments that meet the amortised cost criteria or the FVTOCI criteria but are designated as at FVTPL are measured at FVTPL.

A financial asset that meets the amortised cost criteria or debt instruments that meet the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases. The Company has not designated any debt instrument as at FVTPL.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the ‘Other income’ line item.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021 (contd.)

Impairment of financial assets

The Company applies the expected credit loss model for recognising impairment loss on financial assets measured at amortised cost, trade receivables, other contractual rights to receive cash or other financial asset.

For trade receivables or any contractual right to receive cash or another financial asset that result from transactions that are within the scope of Ind AS 11 and Ind AS 18, the Company always measures the loss allowance at an amount equal to lifetime expected credit losses.

Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities subsequently measured at amortised cost:

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Derecognition of financial liabilities:

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired. An exchange with a lender of debt instruments with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the terms of an existing financial liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

N. Use of judgements and estimates

In preparing these financial statements, management has made judgements, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income, expenses and the disclosures of contingent assets and liabilities. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an on going basis. Revisions to estimates are recognised prospectively.

Following are areas that involved a higher degree of estimate and judgement or complexity in determining the carrying amount of some assets and liabilities.

- Provision for warranty claims
- Going Concern (Refer Note 22)

Detailed information about each of these estimates and judgements that have a significant risk of resulting in material adjustment within the next financial year is included in relevant notes for the above items.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

O. Foreign Exchange Transactions:

In preparing the financial statements transactions in other than the company's functional currency are recorded at the exchange rates prevailing on the date of transaction. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that rate. The exchange difference between the rate prevailing on the date of transaction and on the date of settlement as also on translation of monetary items at the end of the year is recognised as income or expense, as the case may be. Non - Monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Note No. 2 - Inventories (Refer Note 1E)
[Lower of cost and net realisable value]

Rs. in Lakhs

Particulars	**As at March 31, 2021**	As at March 31, 2020
Stock-in-trade of goods acquired for trading	**89.69**	40.27
(Lying with a third party Rs.24.31 Lakhs, Previous Year Rs.0.98 Lakhs)		
Total	**89.69**	40.27

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021 (contd.)

Inventories are valued considering provision for allowance for obsolescence, inventory carrying risk and delayed in usage in view of lower off-take in present situation. In addition, we have reviewed the likelihood of reduction in sales price and cancellation of orders, due to Covid-19. This is based on an assessment considering the orders in hand, product demand, expected price trend and sales plan. Based on the above assessment, the Company is of the view that the carrying amounts of inventories are expected to be realisable.

Note No. 3 - Cash and Bank Balances

Rs. in Lakhs

Particulars	**As at March 31, 2021**	As at March 31, 2020
Cash and cash equivalents		
Balance with bank		
- Current Accounts	**28.71**	40.94

Note No. 4 - Other Financial Assets

Rs. in Lakhs

	As at March 31, 2021		As at March 31, 2020	
Particulars	**Current**	**Non-Current**	Current	Non-Current
Security deposits	**3.80**	**–**	14.10	–
Interest accrued on Fixed Deposits	**3.17**	**–**	0.89	–
Total	**6.97**	**–**	14.99	–

Note No. 5 - Other Non Financial Assets

Rs. in Lakhs

	As at March 31, 2021		As at March 31, 2020	
Particulars	**Current**	**Non-Current**	Current	Non-Current
(a) Prepayments	**0.23**	**–**	0.22	–
(b) Balances with government authorities		**–**		–
(i) GST credit receivable	**19.25**	**–**	15.52	–
(c) Others				
Considered Good				
(i) Advance to Creditors	**7.90**	**–**	5.53	–
(ii) Advance to Employees	**0.50**	**–**	–	–
Total	**27.88**	**–**	21.27	–

Note No. 6 - Trade Receivables (Refer Note 18)

Rs. in Lakhs

	As at March 31, 2021		As at March 31, 2020	
Particulars	**Current**	**Non-Current**	Current	Non-Current
Unsecured, considered good	**161.25**	**–**	63.81	–
Total	**161.25**	**–**	63.81	–

Trade receivables are valued considering likelihood of increased credit risk and consequential default considering emerging situations due to COVID-19. This assessment is not based on any mathematical model but an assessment considering the nature of industries, impact immediately seen in the demand outlook of these industries and the financial strength of the customers in respect of whom amounts are receivable.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021 (contd.)

Note No. 7 - Equity Share Capital

Warranty Claims:

Provision for warranty represents present value of management's best estimate of the future outflow of economic benefits that will be required in respect of sale of certain products, the estimated cost of which is accrued at the time of sale. Management estimates the related provision for future warranty claims based on historical warranty claim information of shareholders entities past experience and is adjusted regularly to reflect new information. The products are generally covered under a free warranty period ranging from 1 year to 3 years. It is expected that most of these costs will be incurred in the next two financial years and all will have been incurred within 3 years after the reporting date.

I Capital management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern.
- to provide an adequate return to shareholders by pricing products and services commensurate with the level of risk.

The Company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position.

The Company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The Company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk. In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

CREDIT RISK

Credit risk management

Credit risk arises when a counterparty defaults on its contractual obligations to pay, resulting in financial loss to the Company. For parties credit limits are set quarterly. The Company has adopted a policy of only dealing with creditworthy parties and obtaining security cheques, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company's exposure and credit worthiness of such parties are continuously monitored.

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short - medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such as equity price risk and commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF MAHINDRA HZPC PRIVATE LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of **Mahindra HZPC Private Limited** ("the Company"), which comprise the balance sheet as at March 31, 2021, the statement of profit and loss including other comprehensive income, the statement of changes in equity and the statement of cash flows for the year ended on that date including a summary of significant accounting policies and other explanatory information (herein after referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2021, the loss and total comprehensive loss, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("the ICAI") together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Information other than the Financial Statements and Auditors' Report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Board's Report including Annexures to Board's Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management for the financial statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure-A", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
   (c) The balance sheet, the statement of profit and loss including other comprehensive loss, statement of changes in equity, and the statement of cash flows dealt with by this Report are in agreement with the books of account.
   (d) In our opinion, the aforesaid financial statements comply with the Accounting Standards specified under Section 133 of the Act.
   (e) On the basis of the written representations received from the directors as on March 31, 2021 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2021 from being appointed as a director in terms of Section 164 (2) of the Act.
   (f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate report in Annexure-B. Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls with reference to financial statements.
   (g) With respect to the other matters to be included in the Auditor's Report in accordance with the requirements of section 197(16) of the Act, as amended:

      In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid/provided managerial remuneration.
   (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
      (i) The Company does not have any pending litigations which would impact its financial position;
      (ii) The Company did not have any long- term contracts including derivative contracts for which there were any material foreseeable losses;
      (iii) There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company during the year.

ANNEXURE A TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

(i) In respect of its Fixed Assets/Property, Plant & Equipment:

a) According to the information and explanations given to us, the Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment.

b) The Company has a regular programme for physical verification of its property, plant and equipment once in a period of two years. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its property, plant and equipment. In accordance with the programme, the Company has not physically verified property, plant and equipment during the year.

c) According to the information and explanations given to us, the title deeds of immovable properties are held in the name of the Company.

(ii) In respects of Inventory:

a) According to the information and explanations given to us, the inventory comprising of finished goods, work-in-progress, agricultural produce and packing materials, has been physically verified at reasonable intervals by the management during the year.

b) In our opinion, coverage and procedure of such verification is appropriate and no material discrepancies for each class of inventory were noticed on such verification between the physical inventory and the book records.

c) We have relied on confirmations and representations from third parties in case of inventory lying in their locations, wherever applicable.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, the reporting under Clauses 3(iii)(a), 3(iii)(b) and 3(iii)(c) of the Order is not applicable to the Company.

(iv) In our opinion and according to the information and explanations given to us, the company has not granted any loans or made investments or provided any guarantees or securities to the parties covered under section 185 and 186 of the Companies Act, 2013. Therefore, the requirements of clause 3(iv) of the said Order are not applicable to the Company.

(v) According to the information and explanations given to us, the Company has not accepted any deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Act and the rules framed there under, where applicable. Accordingly, the reporting under Clause 3(v) of the Order is not applicable to the Company.

(vi) On the basis of information given to us, the Central Government of India, has not prescribed the maintenance of cost records under sub section (1) of section 148 of the Companies Act 2013, for any of the products of the Company.

(vii) According to the information and explanations given to us, in respect of statutory dues:

(a) The Company has been generally regular in depositing undisputed statutory dues, including Provident Fund, Employees' State Insurance, Income-tax, Customs Duty, Goods and Service tax and other material statutory dues applicable to it to the appropriate authorities.

(b) There were no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income-tax, Customs Duty, Goods and Service tax and other material statutory dues in arrears as at March 31, 2021 for a period of more than six months from the date they became payable.

(c) According the information and explanations given to us and on the basis of the examination of the records of the Company, there are no disputed cases related to income tax, Good and Service tax and other taxes as applicable to the Company, which have not been deposited with the appropriate authorities on account of any dispute as at March 31, 2021.

(viii) In our opinion and according to the information and explanations given to us, the Company has not defaulted in the repayment of dues to Banks. The Company has not taken any loans or borrowings from financial Institutions, and Government. The Company has not issued debentures.

(ix) According to the information and explanations given to us, the Company has not raised any moneys by way of initial public offer, further public offer (including debt instruments) and term loans during the year. Accordingly, the reporting under Clause 3(ix) of the Order is not applicable to the Company.

(x) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India and according to the information and explanations given to us, we have neither come across any instance of material fraud by the Company or on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of any such case by the management.

(xi) Based upon the audit procedures performed and the information and explanations given by the management, the Company has not paid/provided managerial remuneration.

(xii) The Company is not a Nidhi Company and hence reporting under clause 3 (xii) of the Order is not applicable to the Company.

(xiii) In our opinion and according to the information and explanations given to us the Company is in compliance with Section 177 and 188 of the Companies Act, 2013, where applicable, for all transactions with the related parties and the details of related party transactions have been disclosed in the financial statements as required by the applicable accounting standards.

(xiv) During the year, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures and hence reporting under clause 3 (xiv) of the Order is not applicable to the Company.

(xv) In our opinion and according to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with them during the year and hence the provisions of Section 192 of the Act are not applicable to the Company. Accordingly, the reporting under Clause 3(xv) of the Order is not applicable to the Company.

(xvi) According to the information and explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the reporting under Clause 3(xvi) of the Order is not applicable to the Company.

ANNEXURE "B" TO THE INDEPENDENT AUDITOR'S REPORT

(Referred to in paragraph "2 (f)" under 'Report on Other Legal and Regulatory Requirements section of our report of even date)

Report on the Internal Financial Controls with reference to financial statements under Clause (i) of sub-section (3) of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to financial statements of **Mahindra HZPC Private Limited** ("the Company") as of March 31, 2021 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to financial statements.

Meaning of Internal Financial Controls with reference to financial statements

A company's internal financial control with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to financial statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2021, based on the criteria for internal financial control with reference to financial statements established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

NOTES FORMING PART OF FINANCIAL STATEMENTS

1 Corporate Information

Mahindra HZPC Private Limited (Joint Venture with HZPC) is engaged in the business of contract growing, corporate farming, wholesale, retail trading of potato seeds, minitubers, table potato and processing potato, tissue culture plants and services.

2 Significant Accounting Policies

Statement of compliance

The Company's financial statements have been prepared in accordance with the provisions of the Companies Act, 2013 and the Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 issued by Ministry of Corporate Affairs under section 133 of Companies Act, 2013.

2.1 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis except defined benefit plans - plan assets which has been fair valued. The financial statements of the Company have been prepared to comply with the Indian Accounting standards ('Ind AS'), including the rules notified under the relevant provisions of the Companies Act, 2013. Company's financial statements are presented in Indian Rupees (₹) which is also its functional currency.

2.2 Operating Cycle

All assets and liabilities are classified as current or non-current as per the Company's normal operating cycle and other criteria set out in the Schedule III to the companies act, 2013 and Ind AS 1 - Presentation of Financial Statements based on the nature of products and the time between the acquisition of assets for processing and their realisation in cash and cash equivalents.

2.3 Revenue recognition

The Ministry of Corporate Affairs notified Ind AS 115 "Revenue from Contracts with Customers" in respect of accounting periods commencing on or after April 1, 2018, superseding Ind AS 11 "Construction Contracts" and Ind AS 18 "Revenue".

The Company's current revenue recognition policy is aligned to the principles enunciated in Ind AS 115 which is effective from April 1, 2018.

Revenue is recognized upon transfer of control of promised products or services to customers in an amount that reflects the consideration expected to receive in exchange for those products or services.

The core principle of Ind AS 115 is that an entity should recognise revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the standard introduces a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligation in contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation

Under Ind AS 115, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when 'control' of the goods or services underlying the particular performance obligation is transferred to the customer.

2.3.1 Sale of goods

Revenue from the sale of goods is recognised upon transfer of control of promised products to customers in an amount that reflects the consideration expected to receive in exchange for those products, at which time all the following conditions are satisfied:

- the company has transferred to the buyer the control of promised products to customers;
- the company has identified the contract with customer and performance obligation in the contract;
- the amount of revenue can be measured reliably;
- revenue is recognised when the division satisfy the performance obligation
- it is probable that the economic benefits associated with the transaction will flow to the company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

2.3.2 Interest Income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

2.3.3 Other Income

Other items of income are accounted as and when the right to receive such income arises and it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably.

2.4 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

2.5 Employee benefits

Short Term Employee Benefits

The undiscounted amount of short term employee benefits expected to be paid in exchange for the services rendered by employees are recognised as an expense during the period when the employees render the services.

Post-Employment Benefits

Defined Contribution Plans

A defined contribution plan is a post-employment benefit plan under which the Company pays specified contributions to a separate entity. The Company makes specified monthly contributions towards Provident Fund, Superannuation Fund and Pension Scheme. The Company's contribution is recognised as an expense in the Statement of Profit and Loss during the period in which the employee renders the related service.

Defined Benefit Plans

The Company pays gratuity to the employees whoever has completed five years of service with the Company at the time of resignation/ superannuation. The gratuity is paid @15 days salary for every completed year of service as per the Payment of Gratuity Act 1972.

The liability in respect of gratuity and other post-employment benefits is calculated using the Projected Unit Credit Method and spread over the period during which the benefit is expected to be derived from employees' services. Re-measurement of defined benefit plans in respect of post-employment are charged to the Other Comprehensive Income.

2.5.1 Employee Share based compensation

Certain employees of the company / holding company on deputation are covered under the stock option plans of the holding company. These plans are assessed, managed and administered by the holding company.

NOTES FORMING PART OF FINANCIAL STATEMENTS

The fair value of options granted under the Employee stock Option scheme applicable to eligible employees of the Company is charged in the statement of Profit and loss on a straight line basis over the service period / option vesting period with a corresponding increase in equity net of reimbursements, if any.

2.6 Taxation

The tax expense for the period comprises current and deferred tax. Tax is recognised in Statement of Profit and Loss, except to the extent that it relates to items recognised in the comprehensive income or in equity. In which case, the tax is also recognised in other comprehensive income or equity.

Current tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates and laws that are enacted or substantively enacted at the Balance sheet date.

Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The carrying amount of Deferred tax liabilities and assets are reviewed at the end of each reporting period.

2.7 Property, plant and equipment

Property, plant and equipment are stated at cost, net of recoverable taxes, trade discount and rebates less accumulated depreciation and impairment losses, if any. Such cost includes purchase price, borrowing cost and any cost directly attributable to bringing the assets to its working condition for its intended use, net charges on foreign exchange contracts and adjustments arising from exchange rate variations attributable to the assets.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

Freehold land is not depreciated.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss. The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

2.7.1 Intangible Assets:

Intangible Assets are stated at cost of acquisition net of recoverable taxes, trade discount and rebates less accumulated amortisation/depletion and impairment loss, if any. Such cost includes purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for the intended use.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the entity and the cost can be measured reliably.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the Statement of Profit and Loss when the asset is derecognised. Intangible assets are amortized over the period of five years.

2.7.2 Impairment of non-financial assets - property, plant and equipment and intangible assets:

The Company assesses at each reporting date as to whether there is any indication that any property, plant and equipment and intangible assets may be impaired. If any such indication exists the recoverable amount of an asset is estimated to determine the extent of impairment, if any.

An impairment loss is recognised in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

The impairment loss recognised in prior accounting period is reversed if there has been a change in the estimate of recoverable amount.

2.8 Inventories

Inventories are valued as follows:

(a) Raw materials & components and stores & spares
At cost, arrived at on FIFO basis or net realizable value, whichever is lower. Cost comprises expenditure incurred in the normal course of business in bringing such inventories to its present location and condition.

(b) Traded goods
At cost arrived at on FIFO basis or net realizable value, whichever is lower. Costs are determined after deducting rebates and discounts. Net relisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and sale.

(c) Agricultural Produce
Agricultural produce is recognized at fair value less costs to sell at the date of harvest. Once harvested, these goods are subsequently accounts for under Ind AS 2 in the same manner as other inventories purchased from third parties.

Obsolete, slow moving and defective inventories are identified from time to time and, where necessary, a provision is made for such inventories.

2.9 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

2.10 Basis for classification of current and Non current assets

The basis for classification of current and non current assets is as per Ind AS 1- Presentation of financial statement

Current and Non current assets

An entity shall classify an asset as current when:

(a) it expects to realise the asset, or intends to sell or consume it, in its normal operating cycle;

(b) it holds the asset primarily for the purpose of trading;

(c) it expects to realise the asset within twelve months after the reporting period; or

NOTES FORMING PART OF FINANCIAL STATEMENTS

(d) the asset is cash or a cash equivalent (as defined in Ind AS 7) unless the asset is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

An entity shall classify all other assets as non-current.

Current and Non current liabilities

An entity shall classify a liability as current when:

(a) it expects to settle the liability in its normal operating cycle;

(b) it holds the liability primarily for the purpose of trading;

(c) the liability is due to be settled within twelve months after the reporting period; or

(d) it does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting period. Terms of a liability that could, at the option of the counterparty, result in its settlement by the issue of equity instruments do not affect its classification.

An entity shall classify all other liabilities as non-current.

2.11 Foreign Currency Transactions

In preparing the financial statements of entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. Gains and losses arising out of subsequent fluctuations are accounted for on actual payment or realisation. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise.

2.12 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

2.13 Depreciation / amortisation and useful lives of property plant and equipment / intangible assets

Property, plant and equipment / intangible assets are depreciated / amortised over their estimated useful lives, after taking into account estimated residual value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation / amortisation to be recorded during any reporting period. The useful lives and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological changes. The depreciation / amortisation for future periods is revised if there are significant changes from previous estimates.

2.14 Provisions for doutful debtors

As per applicable credit policy company make a provision for doubtful debtors where outstanding remain unpaid for more than 180 days.

2.15 Biological assets and agricultural produce

The Company's operations include activities which are agricultural in nature and are subject to the recognition, measurements and disclosure requirements of Ind AS 41 - Agriculture. Biological Assets are recognised when the Company controls the assets as a result of past events and it is probable that the future economic benefits associated with the asset will flow to the Company and fair value can be measured reliably. On initial recognition and at the end of each reporting period, the biological assets are measured at fair value less cost to sell. Cost to sell includes the incremental cost to sell including commission to traders, brokers and dealers and estimated cost to transport to the market but excludes finance costs and income taxes. harvested biological assets (i.e. agriculture produce) are transferred to inventory at fair value less costs to sell when harvested.

Cost approximates fair value when little biological transformation has taken place since the costs were originally incurred or the impact of biological transformation on price is not expected to be material. Gains and losses arising on initial recognition of both biological assets and agricultural produce and any subsequent changes in fair value are recognised in the statement of Profit and Loss in the period in which they arise.

Cost for this purpose includes all direct costs incurred up to the stage of production of the respective inventories.

2.16 Earning per share

Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they were entitled to participate in dividends relative to a fully paid equity share during the reporting period.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.

2.17 Critical Accounting Judgements and Key Sources of Estimation Uncertainty

The preparation of financial statements in conformity with IND AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of financial statements and the reported amounts of revenues and expenses for the year presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

Note No. 1 - Property, Plant & Equipment – estimated useful life

Note No. 2 - Intangible assets – impairment and estimated useful life

Note No. 17 - Revenue Recognition – satisfaction of performance obligation and price of the performance obligation.

Note No. 28 - Recoverability of trade receivables and determining provision as per ECL model of the Company.

Note No. 5 Fair value measurements and inventory valuation processes

2.18 Leasing

Company has no significant transactions, all transactions are short term in nature.

2.19 Financial instruments, Financial assets, Financial liabilities and Equity Instruments

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the relevant instrument and are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities measured at fair value through profit or loss) are added to or deducted from the fair value on initial recognition of financial assets or financial liabilities. Purchase or sale of financial assets that require delivery of assets within a time frame established by regulation or convention in the market place (regular way trades) are recognized on the trade date, i.e., the date when the Company commits to purchase or sell the asset.

Financial assets

Recognition: Financial assets include Investments, Trade Receivables, Advances, Security Deposits, Cash and cash equivalents. Such assets are initially recognised at transaction price when the Company becomes party to contractual obligations. The transaction price includes transaction costs unless the asset is being fair valued through the Statement of Profit and Loss.

NOTES FORMING PART OF FINANCIAL STATEMENTS

Classification: Management determines the classification of an asset at initial recognition depending on the purpose for which the assets were acquired. The subsequent measurement of financial assets depends on such classification.

Financial assets are classified as those measured at:

(a) amortised cost, where the financial assets are held solely for collection of cash flows arising from payments of principal and / or interest.

(b) fair value through other comprehensive income (FVTOCI), where the financial assets are held not only for collection of cash flows arising from payments of principal and interest but also from the sale of such assets. Such assets are subsequently measured at fair value, with unrealised gains and losses arising from changes in the fair value being recognised in other comprehensive income.

(c) fair value through profit or loss (FVTPL), where the assets are managed in accordance with an approved investment strategy that triggers purchase and sale decisions based on the fair value of such assets. Such assets are subsequently measured at fair value, with unrealised gains and losses arising from changes in the fair value being recognised in the Statement of Profit and Loss in the period in which they arise.

Trade receivables, Advances, Security Deposits, Cash and cash equivalents etc. are classified for measurement at amortised cost while investments may fall under any of the aforesaid classes. However, in respect of particular investments in equity instruments that would otherwise be measured at fair value through profit or loss, an irrevocable election at initial recognition may be made to present subsequent changes in fair value through other comprehensive income.

Impairment: The Company assesses at each reporting date whether a financial asset (or a group of financial assets) such as investments, trade receivables, advances and security deposits held at amortised cost and financial assets that are measured at fair value through other comprehensive income are tested for impairment based on evidence or information that is available without undue cost or effort. Expected credit losses are assessed and loss allowances recognised if the credit quality of the financial asset has deteriorated significantly since initial recognition.

Reclassification: When and only when the business model is changed, the Company shall reclassify all affected financial assets prospectively from the reclassification date as subsequently measured at amortised cost, fair value through other comprehensive income, fair value through profit or loss without restating the previously recognised gains, losses or interest and in terms of the reclassification principles laid down in the Ind AS relating to Financial Instruments.

De-recognition: Financial assets are derecognised when the right to receive cash flows from the assets has expired, or has been transferred, and the Company has transferred substantially all of the risks and rewards of ownership. Concomitantly, if the asset is one that is measured at:

(a) amortised cost, the gain or loss is recognised in the Statement of Profit and Loss;

(b) fair value through other comprehensive income, the cumulative fair value adjustments previously taken to reserves are reclassified to the Statement of Profit and Loss unless the asset represents an equity investment in which case the cumulative fair value adjustments previously taken to reserves is reclassified within equity.

Income Recognition: Interest income is recognised in the Statement of Profit and Loss using the effective interest method. Dividend income is recognised in the Statement of Profit and Loss when the right to receive dividend is established.

Financial Liabilities

Borrowings, trade payables and other financial liabilities are initially recognised at the value of the respective contractual obligations. They are subsequently measured at amortised cost. Any discount or premium on redemption / settlement is recognised in the Statement of Profit and Loss as finance cost over the life of the liability using the effective interest method and adjusted to the liability figure disclosed in the Balance Sheet.

Financial liabilities are derecognised when the liability is extinguished, that is, when the contractual obligation is discharged, cancelled and on expiry.

Offsetting Financial Instruments

Financial assets and liabilities are offset and the net amount is included in Balance Sheet where there is legally enforceable right to offset the recognised amounts and there is an intension to settle on a net basis or realise the asset and settle the liability simultaneously.

Equity Instruments

Equity instruments are recognised at the value of the proceeds, net of direct costs of the capital issue.

2.20 Going Concern

During the current financial year, the shareholders has infused required equity. The performance of the Company in term of revenue is exceeding the budgeted expectations . Considering the order intake and advance received from the customers for the next financial years, the Company is confident of its ability to meet the future funds requirements and to continue its business as a going concern.

(a)	Salaries and wages	**31,437,776**	26,935,889
(b)	Contribution to provident and other funds	**1,820,885**	2,309,384
(c)	Staff welfare expenses	**444,857**	561,625
Total Employee Benefit Expenses		**33,703,518**	29,806,898

Note No. 23.1 - Employee benefits

(a) Defined Contribution Plan

The Company's contribution to Provident Fund aggregating Rs. 12,280,904/- (2020 : Rs. 11,50,331/-) has been recognised in the Statement of Profit and Loss under the head Employee Benefits Expense.

Note: Where required by Ind AS 24 an entity discloses information about contributions to defined contribution plans for key management personnel.

(b) Defined Benefit Plans:

Gratuity

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting.

Defined benefit plans – as per actuarial valuation on March 31, 2021

Amount in Rs.

Particulars	Unfunded Plan Gratuity 2021	Unfunded Plan Gratuity 2020
Ia. Expense recognised in the Statement of Profit and Loss for the year ended March 31:		
1. Current service cost	**856,306**	646,993
2. Interest cost	**236,973**	174,798
Ib. Included in other Comprehensive Income		
1. Actuarial (Gain)/Loss on account of:		
- Financial Assumptions	**216,772**	403,889
- Experience Adjustments	**(494,345)**	1,576
- Demographic Assumptions	**(387,589)**	0
Amounts recognised in comprehensive income in respect of these defined benefit plans are as follows:		
Current Service Cost	**856,306**	646,993
Net interest expense	**236,973**	174,798
Components of defined benefit costs reconised in profit or loss	**1,093,279**	821,791
Actuarial gains and loss arising form changes in financial assumptions	**216,772**	403,889
Actuarial gains and loss arising form experience adjustments	**(494,345)**	1,576
Actuarial gains and loss arising form demographic assumptions	**(387,589)**	–
Componenets of defined benefit costs recognised in other comprehensive income	**(665,162)**	405,465
Total	**428,117**	1,227,256

Amount in Rs.

Particulars	Unfunded Plan Gratuity 2021	Unfunded Plan Gratuity 2020
I. Net Asset/(Liability) recognised in the Balance Sheet as at March 31		
1. Present value of defined benefit obligation as at March 31	**3,810,232**	3,485,962
2. Fair value of plan assets as at March 31	**–**	–
3. Surplus/(Deficit)	**(3,810,232)**	(3,485,962)
4. Current portion of the above	**463,941**	103,138
5. Non current portion of the above	**3,346,291**	3,382,824
II. Change in the obligation during the year ended March 31		
1. Present value of defined benefit obligation at the beginning of the year	**3,485,962**	2,258,706
2. Expenses Recognised in Profit and Loss Account		
- Current Service Cost	**856,306**	646,993
- Interest Expense (Income)	**236,973**	174,798
4. Recognised in Other Comprehensive Income		
Remeasurement gains / (losses)		
- Actuarial Gain (Loss) arising from:		
i. Demographic Assumptions		
ii. Financial Assumptions	**(665,162)**	405,465
5. Others (Liabilities assumed on acquisition)	**(103,847)**	**–**
6. Present value of defined benefit obligation at the end of the year	**3,810,232**	3,485,962
III. Actuarial assumptions		
1. Discount rate	**6.95%**	6.90%

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Principal assumption		Impact on defined benefit obligation: Increase in assumption	Impact on defined benefit obligation: Decrease in assumption
Discount rate	**2021**	**4,358,467**	**3,261,997**
	2020	3,930,034	3,041,890
Salary growth rate	**2021**	**4,318,263**	**3,302,201**
	2020	3,921,707	3,050,217

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

Note No. 29 - Financial Risk Management

Financial Risk Management Framework

The company activities expose it to avariety of financial risks: market risk, credit risk and liquidity risk. The company primary focus is to foresee the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance. The primary market risk to the company is price risk. The company's exposure to credit risk is influenced mainly by the individual characteristic of each customer.

CREDIT RISK

Credit risk is the risk that a counter party will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable.

The company does not have significant credit risk exposure to any single counterparty.

The Company applies the simplified approach to providing for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company and individual receivable specific provision where applicable. Forward-looking information has been incorporated into the determination of expected credit losses.

There is no change in estimation techniques or significant assumptions during the reporting period.

The provision matrix at the end of the reporting period is as follow:-

Ageing	For the year ended 31st March, 2021	
	Expected credit loss (%)	Expected credit loss (Rs.)
0-3 month past due	0.00%	–
3-6 month past due	0.00%	–
>180 Days	100.00%	7,654,037.00
Total		**7,654,037.00**

Market risk is the risk that changes in market prices – such as foreign exchange rates and interest rates will affect the company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

All such transactions are carried out within the guidelines set by the Risk Management Committee.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021

LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the company's short-, medium- and long-term funding and liquidity management requirements. The company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

The Company is required to maintain ratios (including total debt to EBITDA / net worth, EBITDA to gross interest, debt service coverage ratio and secured coverage ratio) as mentioned in the loan agreements at specified levels. In the event of failure to meet any of these ratios these loans become callable at the option of lenders, except where exemption is provided by lender.

(ii) Financing arrangements

The Company had access to following undrawn borrowing facilities at the end of the reporting period:

Particulars	**31-Mar-21 Amount in Rs.**	31-Mar-20 Amount in Rs.

INDEPENDENT AUDITOR'S REPORT

To the Members of MAHINDRA GREENYARD PRIVATE LIMITED

Report on the Audit of the Ind AS Financial Statements

Opinion

We have audited the Ind AS financial statements of **Mahindra Greenyard Private Limited** ("the Company"), which comprise the balance sheet as at 31st March 2021, and the statement of Profit and Loss, statement of changes in equity and statement of cash flows for the year then ended, and notes to the Ind AS financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Ind AS financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2021, and profit, changes in equityand its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the Ind AS financial statements under the provisions of the Companies Act, 2013 and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The company's Board of Directors is responsible for the other information. The other information comprises the Board report.

Our opinion on Ind AS financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Ind AS financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Ind AS financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Companies Act, 2013 ("the Act") with respect to the preparation of these Ind AS Ind AS financial statements that give a true and fair view of the financial position, financial performance, (changes in equity) and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the accounting Standards specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Ind AS financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Ind AS financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Ind AS Financial Statements

Our objectives are to obtain reasonable assurance about whether the Ind AS financial statements as a wholeare free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with Standard on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken based on these Ind AS financial statements.

As part of an audit in accordance with Standard on Auditing, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that aresufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Companies Act, 2013, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the Ind AS financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Ind AS financial statements, including the disclosures, and whether the Ind AS financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the Ind AS financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure-B", a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
   (a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
   (b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
   (c) The Balance Sheet, the Statement of Profit and Loss, and the Cash Flow Statement dealt with by this Report are in agreement with the books of account.
   (d) In our opinion, the aforesaid Ind AS financial statements comply with the Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Accounts) Rules, 2014.
   (e) On the basis of the written representations received from the directors as on 31st March, 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31st March, 2021 from being appointed as a director in terms of Section 164 (2) of the Act.
   (f) With respect to the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure A".
   (g) In our opinion and to the best of our information and according to the explanations given to us, the Company has not paid any remuneration to its directors.
   (h) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
      i. The company does not have any pending litigations which will impact its financial positions.
      ii. the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;
      iii. there were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITOR'S REPORT

Report on the Internal Financial Controls Over Financial Reporting under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Mahindra Greenyard Private Limited** ("the Company") as of March 31, 2021 in conjunction with our audit of the Ind AS financial statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditor's Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting (the "Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing whether the risk of a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the Ind AS financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Ind AS financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of Ind AS financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the Ind AS financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected, Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2021, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE B TO THE AUDITOR'S REPORT

Referred to in paragraph 9 of our report of even date on the financial statements of **Mahindra Greenyard Private Limited** for the year ended March 31, 2021

Annexure to the Auditor's Report referred to in our report of even date:

1) i) The Company has maintained proper records showing full particulars including quantitative details and situation of fixed assets.

   ii) Fixed assets have been physically verified by the management during the year and no material discrepancies were noted on such verification.

   iii) The Company does not have any immovable property as on March 31, 2021.

2) The inventory has been physically verified by management during the year the frequency of which, in our opinion, is reasonable. The discrepancies noticed on physical verification of inventory as compared to book records were not material and have been dealt with in books of account.

3) The company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other related parties covered in the register maintained under section 189 of the Act.

4) In our opinion and according to information and explanations given to us, the provisions of section 185 and section 186 of the Act have been complied with in respect of the loan granted, investments made and guarantees given by the company as at March 31, 2021. We are informed that the company has not given any security during the year.

5) In our opinion and according to the information and explanations given to us, the Company has not accepted any deposits under the provisions of section 73 to 76 of the Act and the Rules framed thereunder.

6) We have been informed that the Central Government has not prescribed maintenance of Cost records under section 148(1) of the Act.

7) i) According to the records of the Company, the Company has been generally regular in depositing with appropriate authorities undisputed statutory dues including Provident Fund, Income Tax, Service Tax, Value Added Tax, GST and other statutory dues applicable to it. According to information and explanation given to us, no undisputed amounts in respect of the above were outstanding, as on March 31, 2021 for a period of more than 6 months from the date they become payable.

   ii) There are no dues of income tax, sales tax, service tax, duty of customs, and duty of excise or value added tax, GST and cess which have not been deposited on the account of any dispute.

8) The Company has not defaulted in repayment of loans or borrowing to a financial institution, bank or Government. The Company has not raised any money through debentures.

9) The Company has not raised money by way of initial public offer or further public offer (including debt instruments) and the money raised by the Company by the way of Buyer's credit term loans were applied for the purpose for which those are raised.

10) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing principles in India, and according to the information and explanations given to us, we have neither come across any instance of fraud on or by the Company, noticed or reported during the year, nor have we been informed of such case by the management.

11) According to the information and explanations given to us, the Company has not paid any remuneration to managerial personnel as defined in the Act and accordingly the provisions of para 3(xi) of the Order are not applicable to the Company.

12) The Company, not being a Nidhi Company, the para 3(xii) of the Order is not applicable to the Company.

13) According to the information and explanations given to us, all transactions with related parties are in compliance with sections 177 and 188 of the Companies Act, 2013 and the details of the same have been disclosed in the financial statements as required by the applicable accounting standards.

14) The Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year under review. Hence, the provisions of para 3(xiv) of the Order are not applicable to the Company.

15) According to the information and explanations given to us, the Company has not entered into non-cash transactions with directors or persons connected with him. Hence, the provisions of para 3(xv) are not applicable to the Company.

16) The Company is not required to be registered under section 45-IA of the Reserve Bank of India Act, 1934. Hence, the provisions of para 3(xvi) of the Order are not applicable to the Company.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2021

Corporate Information

Mahindra Greenyard Private Limited (Formerly known as Mahindra Univeg Private Limited) is a Joint Venture company formed by Mahindra Agri Solutions Limited (Formerly known as Mahindra Shubhlabh Services Limited) and Greenyard Fresh Holding NL BV with 60:40 sharing basis and incorporated on 9th July, 2014 under the provisions of the Companies Act, 1956 (CIN:U01403MH2014PTC55946). The Company deals in sourcing, storing and distribution of fresh fruits in domestic market.

1. Significant accounting policies

1.1 Statement of compliance

The financial statements of the Company have been prepared in accordance with Ind ASs notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended.

1.2 Basis of preparation and presentation

The financial statements have been prepared on the historical cost basis.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Company takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of Ind AS 102, leasing transactions that are within the scope of Ind AS 17, and measurements that have some similarities to fair value but are not fair value, such as net realizable value in Ind AS 2 or value in use in Ind AS 36.

In addition, for financial reporting purposes, fair value measurements are categorized into Level 1, 2, or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

1.3 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable.

Sale of goods

Revenue from the sale of goods is recognized when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Company; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

1.4 Interest income

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding.

1.5 Employee benefits

1.5.1 Retirement benefit costs and termination benefits

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Defined benefit costs are categorized as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement

The Company presents the first two components of defined benefit costs in profit or loss in the line item ‘Employee benefits expense’. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company’s defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

1.5.2 Short-term and other long-term employee benefits

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

Liabilities recognised in respect of other long-term employee benefits are measured at the present value of the estimated future cash outflows expected to be made by the Company in respect of services provided by employees up to the reporting date.

1.6 Taxation

Deferred tax assets and liabilities are recognised for future tax consequences attributable to the timing differences between taxable income and accounting income that are capable of reversal in one or more subsequent periods and are measured using tax rates enacted or substantively enacted as at the Balance Sheet date. Deferred Tax assets are not recognised unless, in the management judgment, there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. The carrying amount of Deferred Tax is reviewed at each Balance Sheet date.

1.7 Property, plant and equipment

Furniture & Fixtures, equipment and Vehicles are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost of assets less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2021

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

1.8 Intangible assets

1.8.1 Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

1.8.2 Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

1.8.3 Useful lives of intangible assets

Estimated useful lives of the intangible assets are as follows:

IT Software - 10 Years

1.8.4 Impairment of Assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss.

1.9 Inventories

Inventories are stated at the lower of cost and net realisable value. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

1.10 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

1.11 Financial instruments

Financial assets and financial liabilities are recognised when a Company entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

1.12 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

1.12.1 Impairment of financial assets

This being the third full year of operations, there is no trend to depict expected credit losses. The company deals in fresh fruits which is a seasonal business & the commodity is perishable in nature. The Company has used the practical expedient as permitted by IND AS 109 and has maintained a policy of providing for debtors outstanding for a period exceeding 180 days. This policy will be regularly reviewed in line with the type of business that the company is in.

1.12.2 Derecognition of financial assets

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss if such gain or loss would have otherwise been recognised in profit or loss on disposal of that financial asset.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2021

1.12.3 Foreign exchange gains and losses

The fair value of financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of each reporting period.

For foreign currency denominated financial assets measured at amortised cost and FVTPL, the exchange differences are recognised in profit or loss except for those which are designated as hedging instruments in a hedging relationship.

1.13 Financial liabilities

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

1.13.1 Financial liabilities subsequently measured at amortised cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortised cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortised cost are determined based on the effective interest method. Interest expense that is not capitalised as part of costs of an asset is included in the 'Finance costs' line item.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

1.13.2 Foreign exchange gains and losses

For financial liabilities that are denominated in a foreign currency and are measured at amortised cost at the end of each reporting period, the foreign exchange gains and losses are determined based on the amortised cost of the instruments and are recognised in 'Other income'.

1.13.3 Derecognition of financial liabilities

The Company derecognises financial liabilities when, and only when, the Company's obligations are discharged, cancelled or have expired.

1.14 Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period to get ready for their intended use or sale, are added to the cost of those assets, until the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

1.15 Taxation:

Income tax expense represents the sum of the tax currently payable and deferred tax.

1.15.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the statement of profit and loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

1.15.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

1.15.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively.

1.16 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks & rewards of ownership to the leases. All other leases are classified as operating leases.

The Company as lessee:

The assets held under finance leases are initially recongnised as assets of the company at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the balance sheet as a finance lease obligation. Lease payments are apportioned between finance expense and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognized immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalized in accordance with the Company's general policies on borrowing cost. Contingent rentals are recognized as expense in the period in which they are incurred.

Rental expense from the operating lease is generally recognized on a straight line basis over the term of the relevant lease. Where the rentals are structured solely to increase in line with expected general inflation to compensate for the lessors expected inflationary cost increases, such increases are recognized in the year in which such benefits accrue.

2. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Company's accounting policies, the management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only the period of the revision and future periods if the revision affects both current and future periods.

Capital management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position.

The capital structure is monitored on the basis of net debt to equity of the company.

CREDIT RISK

(i) Credit risk management

Credit risk arises when a counterparty defaults on its contractual obligations to pay resulting in financial loss to the Company. The Company has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collatarel, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Company only transacts with entities that are rated the equivalent of investment grade and above. This information is supplied by independent rating agencies where available and, if not available, the Company uses other publicly available financial information and its own trading records to rate its major customers. The Company's exposure and credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2021

Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable, and where appropraite, credit guarantee insurance cover is purchased.

The Company applies the simplified approach to provide for expected credit losses prescribed by Ind AS 109, which permits the use of the lifetime expected loss provision for all trade receivables. The company has computed expected credit losses based on a provision matrix which uses historical credit loss experience of the Company and individual receivable specific provision where applicable. Forward-looking information (including macroeconomic information) has been incorporated into the determination of expected credit losses.

There is no change in estimation techniques or significant assumptions during the reporting period.

The loss allowance provision is determined as follows:

	As at 31st March 2021			
	Not due	**Less than 6 months past due**	**More than 6 months past due**	**Total**
Expected loss rate	**0.0%**	**22.3%**	**100.0%**	**75.7%**
Gross carrying amount	**–**	**86.13**	**188.94**	**275.07**
Loss allowance provision	**–**	**19.19**	**188.94**	**208.13**

	As at 31st March 2020			
	Not due	Less than 6 months past due	More than 6 months past due	Total
Expected loss rate	0.0%	1.2%	82.7%	30.2%
Gross carrying amount	–	425.57	190.98	616.55
Loss allowance provision	–	2.23	183.88	186.11

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows -

(Amt in lacs)

Particulars	Currency	31-Mar-21	31-Mar-20
Trade Payables	USD	–	5.42
	EUR	–	–

Of the above foreing currency exposures, the following exposures are not hedged by a derivative:

(Amt in lacs)

Particulars	Currency	31-Mar-21	31-Mar-20
Trade Payables	USD	–	5.42
	EUR	–	–

Foreign Currency Sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD and EUR exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities including non-designated foreign currency derivatives and embedded derivatives. The impact on the Company's pre-tax equity is due to changes in the fair value of forward exchange contracts designated as cash flow hedges. The Company's exposure to foreign currency changes for all other currencies is not material.

Amt. In Lacs

	Currency	Change in rate	Effect on profit before tax	Effect on pre-tax equity

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 2021

Note No. 27 - Employee benefits

(a) Defined Contribution Plan

The Company's contribution to Provident Fund and other Funds aggregating Rs. 10,65,055/- (P.Y. - Rs. 14,92,732) has been recognised in the Statement of Profit or Loss under the head Employee Benefits Expense.

(b) Defined Benefit Plans:

Gratuity

The Company has an obligation towards gratuity, a defined retirement plan covering eligible employees. The plan provides a lump sum payment to vested employees at retirement, death while in employment or on termination of employment. Vesting occurs upon completion of five years of service. The company accounts for liability of future gratuity benefits based on an external actuarial valuation on Projected Unit Credit method carried out for assessing the liability as at each balance sheet date.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

	Valuation as at	
	31-Mar-21	**31-Mar-20**
Discount rate(s)	**7.05%**	6.80%
Expected rate(s) of salary increase	**8.50%**	8.00%

Defined benefit plans – as per actuarial valuation on 31st March, 2021

Rs in lacs

Particulars	Unfunded Plans Gratuity **2021**	2020
Ia. Expense recognised in the Statement of Profit and Loss for the year ended 31st March:		
Service Cost		
Current Service Cost	**5.91**	4.70
Net interest expense	**1.08**	0.64
Components of defined benefit costs reconised in profit or loss	**6.98**	5.34
Ib. Included in other Comprehensive Income		
Actuarial gains and loss arising form changes in financial assumptions	**0.04**	1.78
Actuarial gains and loss arising form changes in demographic assumptions	**(1.71)**	–
Actuarial gains and loss arising form experience adjustments	**(15.96)**	0.42
Componenets of defined benefit costs recognised in other comprehensive income	**(17.62)**	2.20
Total	**(10.64)**	7.54
I. Net Asset/(Liability) recognised in the Balance Sheet as at 31st March		
1. Present value of unfunded defined benefit obligation as at 31st March	**4.68**	15.95
2. Fair value of plan assets as at 31st March	**–**	–
3. Surplus/(Deficit)	**4.68**	15.95
4. Current portion of the above	**1.04**	0.28
5. Non current portion of the above	**3.64**	15.67
II. Change in the obligation during the year ended 31st March		
1. Present value of defined benefit obligation at the beginning of the year	**15.95**	8.41
2. Expenses Recognised in Profit and Loss Account		
- Current Service Cost	**5.91**	4.70
- Past Service Cost	**–**	–
- Interest Expense (Income)	**1.08**	0.64
3. Recognised in Other Comprehensive Income		
Remeasurement gains / (losses)		
- Actuarial Gain (Loss) arising from:		
i. Demographic Assumptions	**(1.71)**	–
ii. Financial Assumptions	**0.04**	1.78
iii. Experience Adjustments	**(15.96)**	0.42
4. Benefit payments	**(0.63)**	–
5. Present value of defined benefit obligation at the end of the year	**4.68**	15.95
III. Actuarial assumptions		
1. Discount rate	**7.05%**	6.80%
2. Salary Growth rate	**8.50%**	8.00%

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Rs in lacs

Principal assumption	Changes in assumption	Impact on defined benefit obligation: Increase in assumption	Decrease in assumption
Discount rate			
2021	**1.00%**	**4.51**	**4.86**
2020	1.00%	13.99	18.29
Salary growth rate			
2021	**1.00%**	**4.85**	**4.51**
2020	1.00%	18.24	13.99

The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analyses did not change compared to previous period.

Maturity profile of defined benefit obligation:

Rs in lacs

Particulars	2021	2020
Within 1 year	**1.04**	0.28
1 - 2 year	**0.84**	0.43
2 - 3 year	**1.01**	0.66
3 - 4 year	**0.83**	0.88
4 - 5 year	**0.63**	1.33
5 - 10 years	**1.93**	42.73

The current service cost and the net interest expense for the year are included in the employee benefits expense in profit or loss of the expense for the year.

Note No. 30 Recent accounting Pronouncement

Ind AS 115 – 'Revenue from Contracts with Customers':

This standard establishes a single comprehensive model for accounting of revenue arising from contracts with customers. Ind AS 115 will supersede the current revenue recognition guidance under Ind AS 18 Revenue. The Company is currently assessing the impact of application of Ind AS 115 on Company's financial statements.

Amendment to Ind AS 12 – Income Taxes:

The amendments clarify the requirement for recognising deferred tax assets on unrealised losses on debt instruments that are measured at fair value. The amendment also clarify certain other aspects of accounting for deferred tax assets. The changes will not have any material impact on the financial statements of the Company.

Amendment to Ind AS 21 – The Effect of Changes in Foreign Exchange Rates:

This amendment clarifies translation of advance payments denominated in foreign currency into functional currency at the spot rate on the day of payment. The guidance aims to reduce diversity in practice. The changes will not have any material impact on the financial statements of the Company.

Amendment to Ind AS 28 - Investments in Associates and Joint Ventures:

The amendment clarifies accounting options in consolidated financial statements of a venture capital or similar entity and investment entity. These amendments are not applicable to the Company's financial statements.

Amendment to Ind AS 40 – Investment Property:

The amendments clarify transfers of investment property to or from the portfolio in the case of a change of use. The changes will not have any material impact on the financial statements of the Company's Financial Statements.

Note No. 31

The Company has made cumulative losses of Rs. 1846.24 Lakhs at the balance sheet date from the date of incorporation. These accounts have been prepared on the going concern basis, on the understanding that the shareholders will continue to financially support the company for the foreseeable future.

Note No. 32

From December 2019, COVID - 19, has spread globally, including India. This event has significantly affected economic activity globally and in India and as a result could / would impact the operations and financial results of the Company. The Company has performed an initial assessment of the likely impact this would have on the operations of the Company and its financial performance in the coming year.

For FY 20 financial reporting, the Company has used the principles of prudence in applying judgments, estimates and assumptions in significant areas like inventory valuation, estimating the remaining useful life of the tangible and intangible assets, cost to complete provision for long term contracts, evaluating the long term contracts for any onerous elements, recoverability of receivables including unbilled receivables, provision for receivables under ECL model, provision for warranties, recoverability of contract assets and contract costs, projection used to test goodwill and investments for impairment, evaluation of financial implications of probable cancellations of any long term commitments, impact of cancellation or modifications to the terms of the revenue contracts, cancellation or deferment of revenue contracts, penalties due to non-fulfilment of service legal obligations, fair valuation of financial assets and liabilities etc.

The Company has considered internal and external information upto the date of approval of these financial statements including credit reports and economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets.

The impact of the global health pandemic may be different from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions.

The Company has also evaluated the cash flows for FY 21 and based on the present estimate of the management, the Company does not foresee any impact on its ability to meet the statutory dues and creditors payment on due dates and honouring its loan repayment and forward contract contractual commitments. There has been no downgrade in ratings of the existing borrowing facilities of the Company. The Company also has undrawn sanctioned limits and this could be availed to meet the obligations. Accordingly based on the projected cash flows for the next twelve months, the management is of the view that the use of going concern assumption in preparing these financial statements is appropriate.

Note No. 33 - Comparitives

The figures for previous year have been regrouped wherever necessary to conform to current year's classification.

INDEPENDENT AUDITORS' REPORT

A. Report on the audit of the financial statements 1 November 2019 until 31 October 2020

Our opinion

We have audited the financial statements for the year ended 31 October 2020 of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V., based in Rotterdam.

In our opinion the accompanying financial statements give a true and fair view of the financial position of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. as at 31 October 2020, and of its result for the period 1 November 2019 until 31 October 2020 in accordance with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

1. the balance sheet as at 31 October 2020;
2. the income statement for 1 November 2019 until 31 October 2020; and
3. the notes comprising a summary of the accounting policies and other explanatory information.

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the 'Our responsibilities for the audit of the financial statements' section of our report.

We are independent of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. in accordance with the Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

B. Report on the other information included in the annual report

In addition to the financial statements and our auditor's report thereon, the annual report contains no other information.

C. Description of responsibilities regarding the financial statements

Responsibilities of the board for the financial statements

The board is responsible for the preparation and fair presentation of the financial statements in accordance with Part 9 of Book 2 of the Dutch Civil Code. Furthermore, the board is responsible for such internal control as the board determines is necessary to enable the preparation of the financial statements that are free from material misstatements, whether due to fraud or error.

As part of the preparation of the financial statements, the board is responsible for assessing the company's ability to continue as a going concern. Based on the financial reporting framework mentioned, the board should prepare the financial statements using the going concern basis of accounting unless the board either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

The board should disclose events and circumstances that may cast significant doubt on the company's ability to continue as a going concern in the financial statements.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit assignment in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not detect all material errors and fraud during our audit.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgement and have maintained professional skepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. Our audit included among others:

- Identifying and assessing the risks of material misstatements of the financial statements, whether due to fraud or error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatements resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board;
- Concluding on the appropriateness of the board's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our

auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company to cease to continue as a going concern;

- Evaluating the overall presentation, structure and content of the financial statements, including the disclosures; and
- Evaluating whether the financial statements represents the underlying transactions and events free from material misstatements.

Because we are ultimately responsible for the opinion, we are also responsible for directing, supervising and performing the group audit. In this respect we have determined the nature and extent of the audit procedures to be carried out for group entities. Decisive were the size and/or the risk profile of the group entities or operations. On this basis, we selected group entities for which an audit or review had to be carried out on the complete set of financial information or specific items.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS

Entity information

Registered address and registration number trade register

The registered and actual address of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. is Albert Plesmanweg 250, 3088 GD in Rotterdam. Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. is registered at the Chamber of Commerce under number 70100438.

General notes

The most important activities of the entity

The principal activity of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. is to participate in group companies.

Disclosure of group structure

Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. is part of a group. The head of this group is Mahindra Agri Solutions Limited which is located in India. The financial statements of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. are included in the consolidated financial statements of Mahindra Agri Solutions Limited.

Disclosure of estimates

In applying the principles and policies for drawing up the financial statements, the directors of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. make different estimates and judgments that may be essential to the amounts disclosed in the financial statements. If it is necessary in order to provide the transparency required under Book 2, article 362, paragraph 1, the nature of these estimates and judgments, including related assumptions, is disclosed in the notes to the relevant financial statement item.

The exemption of consolidation in connection with the application of Section 2:408

In accordance with article 408, Title 9, Book 2 of the Netherlands Civil Code, consolidated financial statements of the Company are not disclosed because its financial figures together with its subsidiaries are included in the consolidated financial statements of Mahindra Agri Solutions Limited, which are filed with the Dutch Chamber of Commerce together with these financial statements.

General accounting principles

The accounting standards used to prepare the financial statements

The financial statements are drawn up in accordance with the provisions of Title 9, Book 2 of the Dutch Civil Code and the Dutch Accounting Standards, as published by the Dutch Accounting Standards Board ('Raad voor de Jaarverslaggeving').

Assets and liabilities are generally valued at historical cost, production cost or at fair value at the time of acquisition. If no specific valuation principle has been stated, valuation is at historical cost.

The outbreak of the Covid-19 pandemic has sparked one of the greatest crises worldwide in recent decades. The (partial) lockdowns have, among others, resulted in business activities in many sectors being affected. In preparing the financial statements (including the substantiation of the going concern assumption), the impact of Covid-19 on our organization was explicitly analyzed and weighted. This analysis takes into account the neutral impact of Covid-19 on the company in 2020 and the expected neutral impact on the company in 2021 and beyond. It is important that in determining the expected impact on the company in 2021 and beyond, and therefore also the expected development in result and liquidity, an inherent uncertainty remains with regard to the duration of the Covid-19 pandemic and the resulting impact on the economy as a whole and on our organization.

Description if there have been no changes in accounting policies

The principles of valuation and determination of the result used have remained unchanged compared to the previous year.

Conversion of amounts denominated in foreign currency

Transactions in foreign currencies are stated in the financial statements at the exchange rate of the functional currency on the transaction date.

Items included in the financial statements are measured using the currency of the primary economic environment in which the company operates (the functional currency). The financial statements are presented in euro; which is the functional and presentation currency of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V.

Accounting principles

Financial assets

The financial assets comprise the investments in subsidiary companies. In conjunction with exemption article 408, Title 9, Book 2 of the Dutch Civil Code, the investments are carried at cost. Provisions against the cost of investments are made for any permanent decline in the carrying value of the investments. Income from investments are recognised only to the extent of dividends declared.

Impairment of non-current assets

On each balance sheet date, Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. assesses whether there are any indications that a fixed asset may be subject to impairment. If there are such indications, the recoverable amount of the asset is determined. If it is not possible to determine the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined. An impairment occurs when the carrying amount of an asset is higher than the recoverable amount; the recoverable amount is the higher of the realisable value and the value in use. An impairment loss is directly recognised in the profit and loss account while the carrying amount of the asset concerned is concurrently reduced.

The realisable value is initially based on a binding sale agreement; if there is no such agreement, the realisable value is determined based on the active market, whereby usually the prevailing bid price is taken as market price. For the determination of the value in use, an estimate is made of the future net cash flows in the event of continued use of the asset/cash-generating unit; these cash flows are discounted.

If it is established that an impairment that was recognised in the past no longer exists or has reduced, the increased carrying amount of the asset concerned is set no higher than the carrying amount that would have been determined if no impairment value adjustment for the asset concerned had been reported. An impairment of goodwill is not reversed.

Cash and cash equivalents

Cash at banks and in hand represent bank balances with terms of less than twelve months. Overdrafts at banks are recognised as part of debts to lending institutions under current liabilities. Cash at banks and in hand is valued at nominal value.

Other reserves

Other reserves are all reserves, except the legal and statutory reserves. Other reserves can freely be distributed to the shareholders.

Non-current liabilities

On initial recognition long term debts are recognised at fair value. Transaction costs which can be directly attributed to the acquisition of the long-term debts are included in the initial recognition. After initial recognition long-term debts are recognised at the amortised cost price, being the amount received taking into account premiums or discounts and minus transaction costs. If there is no premium/discount or if there are no transaction costs, the amortised cost price is the same as the nominal value of the debt.

The difference between stated book value and the mature redemption value is accounted for as interest cost in the income statement on the basis of the effective interest rate during the estimated term of the long-term debts.

Current liabilities

On initial recognition current liabilities are recognised at fair value. After initial recognition current liabilities are recognised at the amortised cost price, being the amount received taking into account premiums or discounts and minus transaction costs. This is usually the nominal value.

Accounting principles for determining the result

The result is the difference between the realisable value of the goods/services provided and the costs and other charges during the year. The results on transactions are recognised in the year in which they are realised.

Other operating expenses

Costs are determined on a historical basis and are attributed to the reporting year to which they relate.

Financial income and expenses

Interest income and expenses are recognised on a pro rata basis, taking account of the effective interest rate of the assets and liabilities to which they relate. In accounting for interest expenses, the recognised transaction expenses for loans received are taken into consideration.

Disclosure of financial assets

The result of OFD Holding B.V. 2019/2020 amounts € 289.406 negative. The equity of OFD Holding B.V. on 31 October 2020 amounts € 4.698.328.

Current assets

Receivables from group companies

The annual interest rate on receivables from group companies amounts to 0% (2019: 0%) calculated over the average outstanding amount. No special conditions on these receivables or on repayments were agreed upon.

Disclosure of cash and cash equivalents

The cash at bank and in hand is at the Company's free disposal.

Equity

Movements are as follows:

	Share capital paid called up	Other reserves	Total
	€	€	€
Balance as at 1 November 2019	10.000	(32.647)	(22.647)
Appropriation of result	–	(73.467)	(73.467)
Balance as at 31 October 2020	10.000	(106.114)	(96.114)

Disclosure of equity

The share capital of Mahindra Fresh Fruits Distribution Holding Company (Europe) B.V. amounts to € 10.000, divided into 10.000 ordinary shares. All shares each have a nominal value of € 1.

Of the shares, 10.000 ordinary shares have been issued and fully paid up.

Statement of the proposed appropriation of the result

During the general meeting at which the financial statements will be adopted, will be proposed to subtract the 2019/2020 result after tax from the other reserves.

This proposal is already incorporated in the 2019/2020 financial statements of the company.

Long-term liabilities

Disclosure of non-current liabilities

On 26 September 2018 the company entered into a loan facility with Bank of America Merrill Lynch International Limited with a maximum of EUR 5 million which in November 2018 has been utilized for € 4,4 million. The facility bears interest at 1,5% per annum plus Euribor. The facility may be terminated at any time by Bank of America Merrill Lynch International Limited. There is no redemption scheme agreed upon. This loan is considered as non-current by management.

The following securities have been agreed upon:

- Pari passu with the claims of all its other unsecured and unsubordinated creditors except those creditors whose claims are mandatorily preferred by laws of general application to companies;
- The borrower shall not create, grant or permit to subsist any security interest over any of its present or future business assets or undertakings;
- The Borrower shall not enter into any amalgamation, demerger, merger, consolidation or corporate reconstruction without giving the Lender 15 days prior notice;
- The Borrower shall procure that no substantial change is made to the general nature of the business of the Borrower.

Current liabilities

Liabilities to group companies

The annual interest rate on liabilities to group companies amounts to 0% (2019: 0%) calculated over the average outstanding amount. No special conditions on these liabilities or on repayments were agreed upon.

Accruals and deferred income

All currrent liabilities have a remaining term of maturity of less than one year. The fair value of current liabilities approximates the carrying amount, because of their short-term character.

3 NOTES TO THE FINANCIAL STATEMENTS

General

Activities

The main activities of the company are to participate in and to hold the shares of group companies.

Registered office, legal form and registration number at the chamber of commerce

The registered and actual address of OFD Holding B.V. is Albert Plesmanweg 250 in Rotterdam of business and is registered at the chamber of commerce under number 24264988.

Estimates

The preparation of financial statements in conformity with the relevant rules requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Group's accounting policies. If necessary for the purposes of providing the view required under Section 362(1), Book 2, of the Dutch Civil Code, the nature of these estimates and judgments, including the related assumptions, is disclosed in the notes to the financial statement items in question.

GENERAL ACCOUNTING PRINCIPLES FOR THE PREPARATION OF THE ANNUAL ACCOUNTS

The financial statements are drawn up in accordance with the provisions of Title 9, Book 2, of the Dutch Civil Code and the Dutch Accounting Standards applicable to small legal entities, as published by the Dutch Accounting Standards Board ('Raad voor de Jaarverslaggeving').

Assets and liabilities are generally valued at historical cost, production cost or at fair value at the time of acquisition. If no specific valuation principle has been stated, valuation is at historical cost. In the balance sheet and profit and loss account, references are made to the Notes.

Comparison with previous year

The valuation principles and method of determining the result are the same as those used in the previous year, with the exception of the changes in accounting policies as set out in the relevant sections.

Foreign currency

Functional currency

Items included in the financial statements of OFD Holding B.V. are valued with due regard for the currency in the economic environment in which the company carries out most of its activities (the functional currency). The financial statements are denominated in euros; this is both the functional currency and presentation currency of OFD Holding B.V.

Transactions, receivables and liabilities

Transactions in foreign currencies are stated in the financial statements at the exchange rate of the functional currency on the transaction date.

Monetary assets and liabilities in foreign currencies are converted to the closing rate of the functional currency on the balance sheet date. The translation differences resulting from settlement and conversion are credited or charged to the profit and loss account.

Non-monetary assets valued at historical cost in a foreign currency are converted at the exchange rate on the transaction date.

Non-monetary assets valued at fair value in a foreign currency are converted at the exchange rate on the date on which the fair value was determined.

The exemption of consolidation

In accordance with article 408, Title 9, Book 2 of the Netherlands Civil Code, consolidated financial statements of the Company are not disclosed because its financial figures together with its subsidiaries are included in the consolidated financial statements of Mahindra Agri Solutions Limited, which are filed with the Dutch Chamber of Commerce together with these financial statements.

ACCOUNTING PRINCIPLES APPLIED TO THE VALUATION OF ASSETS AND LIABILITIES

Intangible fixed assets

Intangible fixed assets are stated at historical cost less amortisation. Impairments are taken into consideration; this is relevant in the event that the carrying amount of the asset (or of the cash-generating unit to which the asset belongs) is higher than its recoverable amount.

Positive goodwill resulting from acquisitions and calculated in accordance with note "Participations" is capitalised and amortised on a straight-line basis over the estimated economic life.

Financial fixed assets

Participations

Participations, over which significant influence can be exercised, are valued according to the net asset value method. In the event that 20% or more of the voting rights can be exercised, it may be assumed that there is significant influence.

The net asset value is calculated in accordance with the accounting principles that apply for these financial statements; with regard to participations in which insufficient data is available for adopting these principles, the valuation principles of the respective participation are applied.

If the valuation of an associate based on the net asset value is negative, it will be stated at nil. If and insofar as OFD Holding B.V. can be held fully or partially liable for the debts of the associate, or has the firm intention of enabling the participation to settle its debts, a provision is recognised for this.

Participations over which no significant influence can be exercised are valued at historical cost. The result represents the dividend declared in the reporting year, whereby dividend not distributed in cash is valued at fair value.

Securities

Receivables are initially valued at the fair value of the consideration to be received, including transaction costs if material. Receivables are subsequently valued at the amortised cost price. Provisions for bad debts are deducted from the carrying amount of the receivable.

Cash and cash equivalents

Cash at banks and in hand represent cash in hand, bank balances and deposits with terms of less than twelve months. Overdrafts at banks are recognised as part of debts to lending institutions under current liabilities. Cash at banks and in hand is valued at nominal value.

Long-term debts

On initial recognition long-term debts are recognised at fair value. Transaction costs which can be directly attributed to the acquisition of the long-term debts are included in the initial recognition. After initial recognition long-term debts are recognised at the amortised cost price, being the amount received taking into account premiums or discounts and minus transaction costs.

The difference between stated book value and the mature redemption value is accounted for as interest cost in the profit and loss account on the basis of the effective interest rate during the estimated term of the long-term debts.

The difference between stated book value and the mature redemption value is accounted for as interest cost in the profit and loss account on the basis of the effective interest rate during the estimated term of the long-term debts.

Current liabilities

On initial recognition current liabilities are recognised at fair value. After initial recognition current liabilities are recognised at the amortised cost price, being the amount received taking into account premiums or discounts and minus transaction costs. This is usually the nominal value.

ACCOUNTING PRINCIPLES FOR THE DETERMINATION OF THE RESULT

General

The result is the difference between the realisable value of the goods/services provided and the costs and other charges during the year. The results on transactions are recognised in the year in which they are realised

Expenses general

Costs are determined on a historical basis and are attributed to the reporting year to which they relate

Amortisation and depreciation

Intangible fixed assets including goodwill are amortised and depreciated from the date of when they are available for use, based on the estimated economic life / expected future useful life of the asset.

Financial income and expenses

Interest income and interest expenses

Interest income and expenses are recognised on a pro rata basis, taking account of the effective interest rate of the assets and liabilities to which they relate. In accounting for interest expenses, the recognised transaction expenses for loans received are taken into consideration.

4 NOTES TO THE BALANCE SHEET AS OF OCTOBER 31, 2020

Taxes

Tax on the result is calculated based on the result before tax in the profit and loss account, taking account of the losses available for set-off from previous financial years (to the extent that they have not already been included in the deferred tax assets) and exempt profit components and after the addition of non-deductible costs.

Result participating interests

The result is the amount by which the carrying amount of the participation has changed since the previous financial statements as a result of the earnings achieved by the participation to the extent that this can be attributed to OFD Holding B.V.

INDEPENDENT AUDITOR'S REPORT

TO THE MEMBERS OF ORIGIN DIRECT ASIA LIMITED (INCORPORATED IN HONG KONG WITH LIMITED LIABILITY)

Opinion

We have audited the consolidated financial statements of Origin Direct Asia Limited (the "Company") and its subsidiary (together, the "Group") set out on pages herein which comprise the consolidated statement of financial position as at 31 October 2020, and the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 31 October 2020, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the Hong Kong Companies Ordinance.

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material Uncertainty Related to Going Concern

We draw attention to Note 4 in the financial statements, which indicates that as at 30 October 2020, the Group's current liabilities exceeded its current assets by USD218,235. As stated in Note 4, these events or conditions indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Information Other than the Consolidated Financial Statements and Auditor's Report Thereon

The directors are responsible for the other information. The other information comprises all the information included in the directors' report, but does not include the consolidated financial statements and our auditor's report thereon.

Responsibilities of Directors and Those Charged with Governance for the Consolidated Financial Statements

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

The directors are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body, in accordance with section 405 of the Hong Kong Companies Ordinance, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

ORIGIN DIRECT ASIA LIMITED NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 OCTOBER 2020

1. General information

Origin Direct Asia Limited is a company incorporated in Hong Kong with limited liability. The Company's registered office is located at 10/F., Guangdong Investment Tower, 148 Connaught Road Central, Hong Kong. The principal activity of the Company is trading of fresh fruit. The principal activities of its subsidiary and associate are set out in notes 13 and 28 to the consolidated financial statements.

The immediate parent of the Company is OFD Holding B.V., a company incorporated in Netherlands, who holds 60% shares in capital of the Company. The ultimate parent of the Company is Mahindra & Mahindra Ltd., a company incorporated in India and is listed on Bombay Stock Exchange and National Stock Exchange of India.

2. Adoption of new and revised Hong Kong Financial Reporting Standards ("HKFRSs")

Of these new and revised standards, Amendments and Interpretations, the following developments are relevant to the Group's financial statements:

- HKFRS 16, Leases

HKFRS 16 replaces HKAS 17, Leases, and the related interpretations, HK(IFRIC) 4, *Determining whether an arrangement contains a lease*, HK(SIC) 15, *Operating leases – incentives*, and HK(SIC) 27, *Evaluating the substance of transactions involving the legal form of a lease*. It introduces a single accounting model for lessees, which requires a lessee to recognise a right-of- use asset and a lease liability for all leases, except for leases that have a lease term of 12 months or less ("short-term leases") and leases of low-value assets. The lessor accounting requirements are brought forward from HKAS 17 substantially unchanged.

The Group has initially applied HKFRS 16 as from 1 November 2019. The Group has elected to use the modified retrospective approach and has therefore recognised the cumulative effect of initial application as an adjustment to the opening balance of equity at 1 November 2019. Comparative information has not been restated and continues to be reported under HKAS 17.

Further details of the nature and effect of the changes to previous accounting policies and the transition approach are set out below:

a. New definition of a lease

The change in the definition of a lease mainly relates to the concept of control. HKFRS 16 defines a lease on the basis of whether a customer controls the use of an identified asset for a period of time, which may be determined by a defined amount of use. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

The Group applies the new definition of a lease in HKFRS 16 only to contracts that were entered into or changed on or after 1 November 2019. For contracts entered into before 1 November 2019, the Group has used the transitional practical expedient to grandfather the previous assessment of which existing arrangements are or contain leases. Accordingly, contracts that were previously assessed as leases under HKAS 17 continue to be accounted for as leases under HKFRS 16 and contracts previously assessed as non-lease service arrangements continue to be accounted for as executory contracts.

b. Lessee accounting and transitional impact

HKFRS 16 eliminates the requirement for a lessee to classify leases as either operating leases or finance leases, as was previously required by HKAS 17. Instead, the Group is required to capitalise all leases when it is the lessee, including leases previously classified as operating leases under HKAS 17, other than those short-term leases and leases of low-value assets which are exempt. As far as the Group is concerned, these newly capitalised leases are primarily in relation to property, plant and equipment.

At the date of transition to HKFRS 16 (i.e. 1 November 2019), the Group determined the length of the remaining lease terms and measured the lease liabilities for the leases previously classified as operating leases at the present value of the remaining lease payments, discounted using the relevant incremental borrowing rates at 1 November 2019. The weighted average of the incremental borrowing rates used for determination of the present value of the remaining lease payments was 5%.

To ease the transition to HKFRS 16, the Group applied the following recognition exemption and practical expedients at the date of initial application of HKFRS 16:

i. the Group elected not to apply the requirements of HKFRS 16 in respect of the recognition of lease liabilities and right-of-use assets to leases for which the remaining lease term ends within 12 months from the date of initial application of HKFRS 16, i.e. where the lease term ends on or before 31 October 2020;

ii. when measuring the lease liabilities at the date of initial application of HKFRS 16, the Group applied a single discount rate to a portfolio of leases with reasonably similar characteristics (such as leases with a similar remaining lease term for a similar class of underlying asset in a similar economic environment); and

iii. when measuring the right-of-use assets at the date of initial application of HKFRS 16, the Group relied on the previous assessment for onerous contract provisions as at 31 October 2019 as an alternative to performing an impairment review. The following table reconciles the operating lease commitments as at 31 October 2019 to the opening balance for lease liabilities recognised as at 1 November 2019:

Operating lease commitments at 31 October 2019	1 November 2019 HK$
commitments relating to leases exempt from capitalisation:	50,479
Less:	
Adjustment	(2,852)
Leases with lease term ending	
within 12 months from the date of initial application	(5,135)
Total future interest expenses	(1,272)
Present value of remaining lease payments, discounted using the incremental borrowing rate at 1 November 2019	41,220

The right-of-use assets in relation to leases previously classified as operating leases have been recognised at an amount equal to the amount recognised for the remaining lease liabilities, adjusted by the amount of any prepaid or accrued lease payments relating to that lease recognised in the statement of financial position at 31 October 2019.

3. New and revised HKFRSs issued but not yet effective

Up to the date of these consolidated financial statements, certain new and revised HKFRSs which may be relevant to the Group's operations and consolidated financial statements have been issued by the HKICPA but are not yet effective for the accounting year ended 31 October 2020. The Group is not yet in a position to state whether the adoption of them would have a significant impact on the Group's results of operations and financial position.

4. Going concern

The financial statements have been prepared on a going concern basis notwithstanding that there are net current liabilities and net liabilities in the financial position of the Group as the holding Group has pledged its continuous financial support for the operations of the Group.

5. Significant accounting policies

(a) Basis of preparation

These consolidated financial statements have been prepared in accordance with the HKFRSs issued by the HKICPA and the disclosure requirements of the Hong Kong Companies Ordinance.

The measurement basis used in the preparation of the consolidated financial statements is the historical cost basis.

The consolidated financial statements are presented in United States dollars, which is the same as the functional currency of the Group. All amounts are rounded to the nearest one.

(b) Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiary. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

The consolidated financial statements included the financial statements of the Company and its subsidiary made up to 31 October 2020. Significant intercompany transactions are eliminated on consolidation and all figures in the consolidated financial statements relate to external transactions only.

(c) Revenue recognition

Income is classified by the Company as revenue when it arises from the sale of goods or the provision of services in the ordinary course of the Company's business.

Revenue is recognized when control over a product or service is transferred to the customer, at the amount of promised consideration to which the Company is expected to be entitled, excluding those amounts collected on behalf of third parties. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

Revenue from sales of products was recognised on a similar basis in the comparative period under HKAS 18.

Sales of products

Revenue from sales of products is recognised when the customer takes possession and accepts the products.

Interest income

Bank interest income is recognised on a time proportion basis, by reference to the principal outstanding and at the interest rate applicable.

(d) Taxation

Income tax for the year comprises current tax and deferred tax.

Current tax is based on taxable profit for the year. Taxable profit differs from net profit as reported in the consolidated statement of profit and loss and other comprehensive income because it excludes items of income and expenses that are taxable or deductible in other years, and it further excludes items that are never taxable and deductible.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for by using the liability method. Deferred tax liabilities are generally recognised for all taxable temporary differences, and deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised.

The carrying amount of a deferred tax asset is reviewed at the end of each reporting period and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is recognised in profit or loss, except when it relates to items that are recognised in other comprehensive income or directly in equity, in which cases, the deferred tax is recognised in other comprehensive income or directly in equity respectively.

(e) Translation of foreign currencies

(i) Functional and presentation currency

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of preparation for the consolidated financial statements, the results and financial position of each entity are expressed in United States dollars, which is the Group's functional currency and the presentation currency for the consolidated financial statements.

(ii) Transactions and balances

In preparing the consolidated financial statements of the individual entity, transactions in currencies other than the Group's functional currency (foreign currencies) are initially recorded at the rates of exchange ruling at the dates of the transactions. At the end of each reporting period, monetary assets and liabilities denominated in foreign currencies are retranslated at the exchange rates ruling at the end of the reporting period. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the exchange rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss. Exchange differences arising on the retranslation of non-monetary items carried at fair value are recognised in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised in other comprehensive income or directly in equity. For such non-monetary items, any exchange component of that gain or loss is also recognised in other comprehensive income or directly in equity.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foregin operations are expressed in United States dollars using exchange rate ruling at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuated significantly during the period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising are classified as equity and transferred to the Group's exchange reserve. Such translation differences are recognized in the profit or loss in the period in which the foreign operation is disposed of.

(f) Borrowing costs

Borrowing costs are expensed when incurred, unless relating to the acquisition, construction and production of a qualifying asset where they are capitalised as part of cost of the asset. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale.

(g) Property, plant and equipment

Property, plant and equipment, including right-of-use assets arising from leases over properties where the Group is not the registered owner of the property, are stated at cost less accumulated depreciation and any accumulated impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to working condition for its intended use. Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, only when it is probable that future economic benefits associated with the asset will flow to the Group and the cost can be measured reliably. All other expenditure incurred after the assets have been put into operation, such as repairs and maintenance, is recognised as expenses during the period in which it is incurred.

The gain or loss on disposal of an item of property, plant and equipment is the difference between the net sale proceeds and the net carrying value of the relevant asset, and is recognised in profit or

Depreciation is provided to write off the cost of property, plant and equipment, after deducting estimated scrap value, over their estimated useful lives by using the straight-line method at the following annual rates:

Computer equipment	20%–30%
Furniture and fixtures	25%
Office equipment	18%–33.33%
Property leased for own use	Over the lease period

(h) Associate

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment, or a portion thereof, is classified as held for sale. Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate. When the Group's share of losses of an associate exceeds the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of the investment in an associate, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The entire carrying amount of an investment in an assoicate (including goodwill) will be subject to test and review annually for any indication that the investment is impaired by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised to the extent that the recoverable amount of the investment subsequently increases.

(i) Leased assets

At inception of a contract, the Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

(A) Policy applicable from 1 November 2019

Where the contract contains lease component(s) and non-lease component(s), the Group has elected not to separate non-lease components and accounts for each lease component and any associated non-lease components as a single lease component for

At the lease commencement date, the Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Group enters into a lease in respect of a low-value asset, the Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the right-of-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses, except for the following types of right-of-use asset:

– right-of-use assets that meet the definition of investment property are carried at fair value;

– right-of-use assets related to leasehold land and buildings where the Group is the registered owner of the leasehold interest are carried at fair value; and

– right-of-use assets related to interests in leasehold land where the interest in the land is held as inventory are carried at the lower of cost and net realisable value.

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in the Group's estimate of the amount expected to be payable under a residual value guarantee, or there is a change arising from the reassessment of whether the Group will be reasonably certain to exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right- of-use asset has been reduced to zero.

The Group presents right-of-use assets that do not meet the definition of investment property in 'property, plant and equipment' and presents lease liabilities separately in the statement of financial position.

(B) Policy applicable prior to 1 November 2019

In the comparative period, as a lessee the Group classified leases as finance leases if the leases transferred substantially all the risks and rewards of ownership to the Group. Leases which did not transfer substantially all the risks and

– property held under operating leases that would otherwise meet the definition of an investment property was classified as investment property on a property- by-property basis and, if classified as investment property, was accounted for as if held under a finance lease; and

– land held for own use under an operating lease, the fair value of which could not be measured separately from the fair value of a building situated thereon at the inception of the lease, was accounted for as being held under a finance lease, unless the building was also clearly held under an operating lease. For these purposes, the inception of the lease was the time that the lease was first entered into by the Group, or taken over from the previous lessee.

Where the Group acquired the use of assets under finance leases, the amounts representing the fair value of the leased asset, or, if lower, the present value of the minimum lease payments, of such assets were recognised as property, plant and equipment and the corresponding liabilities, net of finance charges, were recorded as obligations under finance leases. Depreciation was provided at rates which wrote off the cost or valuation of the assets over the term of the relevant lease or, where it was likely the Group would obtain ownership of the asset, the life of the asset. Impairment losses were accounted for in accordance with the accounting policy. Finance charges implicit in the lease payments were charged to profit or loss over the period of the leases so as to produce an approximately constant periodic rate of charge on the remaining balance of the obligations for each accounting period. Contingent rentals were charged to profit or loss in the accounting period in which they were incurred.

Where the Group had the use of assets held under operating leases, payments made under the leases were charged to profit or loss in equal instalments over the accounting periods covered by the lease term, except where an alternative basis was more representative of the pattern of benefits to be derived from the leased asset. Lease incentives received were recognised in profit or loss as an integral part of the aggregate net lease payments made. Contingent rentals were charged to profit or loss in the accounting period in which they were incurred.

(ii) As a lessor

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying assets to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis. The rental income from operating leases is recognised in profit or loss in equal instalments over the periods covered by the lease term.

When the Group is an intermediate lessor, the sub-leases are classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the Group applies the exemption, then the Group classifies the sub-lease as an operating lease.

(j) Trade and other receivables

A receivable is recognised when the Group has an unconditional right to receive consideration. A right to receive consideration is unconditional if only the passage of time is required before payment of that consideration is due.

Receivables are stated at amortised cost using the effective interest method less allowance for credit losses.

(k) Credit losses and impairment of financial assets other than investments

The Group recognises a loss allowance for expected credit losses ("ECLs") on financial assets measured at amortised cost (including cash and cash equivalents, trade and other receivables, rental and sundry deposits and amount due from related parties).

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all expected cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive). The expected cash shortfalls are discounted using the effective interest rate determined at initial recognition or an approximation thereof where the effect of discounting is material.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Group is exposed to credit risk. In measuring ECLs, the Group takes into account reasonable and supportable information that is available without undue cost or effort. This includes information about past events, current conditions and forecasts of future economic

Loss allowances for trade and other receivables are always measured at an amount equal to lifetime ECLs. Lifetime ECLs are losses that are expected to result from all possible default events over the expected lives of the items to which the ECL model applies. ECLs on these financial assets are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors and an assessment of both the current and forecast general economic conditions at the reporting date.

At each reporting date, the Group assesses whether a financial asset is credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred. Evidence that a financial asset is credit- impaired includes the following observable events:

- significant financial difficulties of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation; or
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor.

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. Subsequent recoveries of an asset that was previously written off are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

(l) Impairment of non-financial assets

At the end of each reporting period, the carrying amounts of the Group's tangible and intangible assets are reviewed to determine whether there is any indication that those assets are impaired. If any such indication exists, the recoverable amount of the asset is estimated and where relevant, an impairment loss is recognised to reduce the asset to its recoverable amount. Such impairment losses are recognised in profit or loss except where the asset is carried at valuation and the impairment loss does not exceed the revaluation surplus for that same asset, in which case, it is treated as a revaluation decrease.

(m) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost, which comprises all costs of purchase and where applicable, costs of conversion and other costs that have been incurred in bringing the inventories to their present location and condition, is calculated using the first-in, first out method. Net realisable value represents the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

(n) Operating leases

Leases where substantially all the rewards and risks of ownership of assets remain with the lessor are accounted for as operating leases. Operating lease rentals payable are charged to profit or loss on a straight-line basis over the respective lease terms.

(o) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of obligation can be made. Expenditures for which a provision has been recognised are charged against the related provision in the year in which the expenditures are incurred. Provisions are reviewed at the end of each reporting period and adjusted to reflect the current best estimate. Where the effect of the time value of money is material, the amount provided is the present value of the expenditures expected to be required to settle the obligation. Where the Group expects a provision to be reimbursed, the reimbursement is recognised as a separate asset but only when the reimbursement is virtually certain.

(p) Related parties

A related party is a person or entity that is related to the Group.

(i) A person or a close member of that person's family is related to the Group if that person:

(a) has control or joint control over the Group;

(b) has significant influence over the Group; or

(c) is a member of the key management personnel of the Group or of a parent of the Group.

(ii) An entity is related to the Group if any of the following conditions applies:

(a) The entity and the Group are members of the same Group (which means that each parent, subsidiary and fellow subsidiary is related to the others).

(b) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a Group of which the other entity is a member).

(c) Both entities are joint ventures of the same third party.

(d) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.

(e) The entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group.

(f) The entity is controlled or jointly controlled by a person identified in (i).

(g) A person identified in (i)(a) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

(h) The entity, or any member of a group of which it is a part, provides key management services to the Group or to the Group's parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

(q) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and in hand, demand deposits with banks and other financial institutions, and short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are also included as a component of cash and cash equivalents for the purpose of the consolidated statement of cash flows.

6. Turnover

Turnover represents revenue from contracts with customers in respect of sales of goods during the year.

Disaggregated of revenue
Revenue from contracts with customers within the scope of HKFRS 15 is further analysis as follows:

	2020	2019
	USD	USD
Disaggregated by major revenue		
Sales of goods	13,442,143	9,567,693
Disaggregated by location of the revenue		
Hong Kong	1,085,182	1,126,171
China	10,767,702	6,428,376
South Korea	354,304	1,296,016
Malaysia	695,884	615,522
Taiwan	–	52,478
Thailand	239,768	–
New Zealand	169,484	–
Myanmar	129,818	–
America	–	49,130
	13,442,143	9,567,693

7. Other income

	2020	2019
	USD	USD
Bank interest income	–	1,282
Net exchange gain	72,918	–
Sundry income	42,943	28,670
	115,861	29,952

8. Finance costs

	2020	2019
	USD	USD
Bank interest expenses	371	1,094
Interest on lease liabilities	1,832	–
Interest on loan from a fellow subsidiary	46,254	54,300
	48,457	55,394

9. Profit/(loss) before taxation

Profit/(loss) before taxation is arrived at after charging/(crediting), inter alia, the following items:

	2020	2019
	USD	USD
Auditor's remuneration	18,265	19,510
Depreciation on plant and equipment	6,092	5,363
Depreciation on right-of-use assets	40,303	–
Net exchange (gain)/loss	(72,918)	25,212
Operating lease rental	14,484	40,838
Staff costs		
– Gross salaries	347,132	289,126

10. Taxation

	2020	2019
	USD	USD
Current tax:		
Hong Kong profits tax for the year	3,211	–
Tax reduction, capped at HK$10,000 (2019:HK$20,000)	(1,287)	–
	1,924	–
Deferred tax:		
Origination and reversal of temporary differences	3,103	3,582
Total income tax charge	5,027	3,582

Hong Kong profits tax is provided at 16.5% of the estimated assessable profits for the year after setting off the unused tax loss brought forward from the previous year and taking into account a 100% reduction capped at HK$10,000 (2019: Nil).

No PRC enterprise income tax has been provided in the consolidated financial statements as the Company's subsidiary incurred a tax loss for the year (2019: Nil).

The tax charge for the year can be reconciled to the profit/(loss) before taxation per the consolidated statement of profit or loss and other comprehensive income as follows:

	2020	2019
	USD	USD
Profit/(loss) before taxation	540,417	(1,161,600)
Notional tax (credit)/charge on profit/(loss) before taxation, calculated at application tax rate	47,716	(95,831)
Tax effect of non-deductible expenses	226,602	144,953
Tax effect of non-taxable offshore income	(264,270)	(43,884)
Tax effect of unrecognition of temporary differences	–	1,385
Tax effect of utilization of losses not previously recognised	–	(3,041)
Total income tax charge	5,027	3,582

11. Directors' remuneration

Particulars of the directors' remuneration for the year disclosed pursuant to section 383(1) of the Hong Kong Companies Ordinance are as follows:-

	2020	2019
	USD	USD
Fee	–	–
Other emoluments		
– Salary and allowance	–	–
– Contributions to Mandatory Provident Fund	–	–
– Quarter expenses	–	–
Retirement benefit	–	–
Compensation for loss of office	–	–
Key Management personnel's remuneration	–	–

12. Property, plant and equipment

	Property leased for own use carried at cost USD	Computer equipment USD	Furniture and fixtures USD	Office equipment USD	Total USD

At 31 October 2020	**40,423**	**39,154**	**2,920**	**3,036**	**85,533**
Net book value					
At 31 October 2020	**19,377**	**14,814**	–	659	34,850
At 31 October 2019	–	13,456	250	884	14,590

13. Interest in an associate

	2020 **USD**	2019 USD
Investment in an associate:-		
Unlisted shares, at cost	**645**	645
Share of post acquisition profit or loss and other comprehensive income, net of dividends received	**3,977**	(644)
End of the year	**4622**	1

At 31 October 2020, the Company has interests in the following:-

Name of associate	HDG-Asia Limited
Form of business structure	Incorporated
Place of incorporation	Hong Kong
Class of shares held	Ordinary
Percentage of issued/registered capital held	50% (2019: 50%)
Nature of business	Quality inspectors and surveyors of fresh fruit and vegetables

Based on the audited financial statements of HDG-Asia Limited made up to 31 October 2020, the financial information in respect of the Group's associate is summarised as follows:-

	2020 **USD**	2019 USD
HDG-Asia Limited		
Current assets	**62,861**	39,567
Non-current assets	–	29
Current liabilities	**53,617**	47,986
The above amounts of assets and liabilities include the following:		
Cash and cash equivalents	**8,811**	21,005
Current financial liabilities (excluding trade and other payables and provision)	–	–
Non-current financial liabilities (excluding trade and other payables and provision)	–	–
Revenue	**153,013**	149,572
Profit for the year	**17,630**	13,597
Other comprehensive income for the year	–	–
Total comprehensive income for the year	**17,630**	13,597
Dividends received from the associate during the year	–	–

The summarised financial information in respect of the Group's interest in the above associate is set out below:-

	2020 **USD**	2019 USD
Net assets/(liabilities) of the associate	**9,244**	(8,390)
Proportion of the Company's ownership interest in the associate	**50%**	50%
Group's share of net assets/(liabilities) of the associate	**4,622**	(4,195)

14. Inventories

	2020 USD	2019 USD
Merchandise - Fruits	**327,179**	186,606

15. Amount due from a former director

	Maximum balance outstanding during the year USD	2020 USD	2019 USD
Mr. Jason Dean BOSCH	**10,066**	**10,066**	10,066

The above amount is unsecured, interest free and has no fixed repayment terms.

16. Cash at bank and on hand

	2020 USD	2019 USD
Cash at bank and on hand	**633,310**	116,782
Cash and cash equivalents in cash flows statement	**633,310**	116,782

Reconciliation of liabilities arising from financing activities:

The table below details changes in the Group's liabilities from financing activities, including both cash and non-cash changes. Liabilities arising from financing activities are liabilities for which cash flows were, or future cash flows will be, classified in the cash flow statement as cash flows from financing activities.

	Lease liabilities USD
Effect of adoption of HKFRS 16	41,220
At 1 November 2019	41,220
Changes from financing cash flows	
Capital element of finance lease payments	(38,035)
Interest element of lease liabilities	(1,832)
Other changes	
New lease liabilities arising from additional leases during the year	16,892
Finance charges on lease liabilities	1,832
At 31 October 2020	20,077

17. Amount due from/(to) an associate

The above amount is unsecured, interest free and has no fixed repayment terms.

18. Amount due to a fellow subsidiary

The amount is unsecured, at 4% interest per annum on the average outstanding balance and has no fixed repayment terms.

19. Lease liabilities

The following table shows the remaining contractual maturities of the Company's lease liabilities at the end of the current and previous reporting periods and at the date of transition to HKFRS 16:

	31 October 2019		1 November 2019		31 October 2020	
	Present value of the minimun lease payments USD	**Total minimum lease payments USD**	**Present value of the minimun lease payments USD**	**Total minimum lease payments USD**	**Present value of the minimun lease payments USD**	**Total minimum lease payments USD**
Within 1 year	–	–	32,759	33,994	17,704	18,088
After 1 year but within 2 years	–	–	8,461	8,498	2,373	2,383
	–	–	41,220	42,492	20,077	20,471
Less: total future interest expenses		–		(1,272)		(394)
Present value of lease liabilities		–		41,220		20,077

Note:-

The Company has initially applied HKFRS 16 using the modified retrospective approach and adjusted the opening balances at 1 November 2019 to recognise lease liabilities relating to leases which were previously classified as operating leases under HKAS 17. These liabilities have been aggregated with the brought forward balances relating to leases previously classified as finance leases. Comparative information as at 31 October 2019 has not been restated and relates solely to leases previously classified as finance leases. Further details on the impact of the transition to HKFRS 16 are set out in note 2.

20. Deferred taxation

The component of deferred tax liability recognised in the consolidated statement of financial position and the movements during the year are as follows:-

	Accelerated tax depreciation USD	Unused tax losses USD	Total USD
At 1 November 2018	523	(6,390)	(5,867)
Debited to profit or loss	540	3,042	3,582
At 31 October 2019	1,063	(3,348)	(2,285)
(Credited)/ debited to profit or loss	(245)	3,348	3,103
At 31 October 2020	**1,063**	–	**818**

Deferred tax asset amounts to approximately USD1,587,250 (2019: USD1,291,166) arising from unused tax losses of the Company's subsidiary has not been recognised in the consolidated financial statements due to the uncertainty of future profit stream against which the asset can be utilised.

21. Financial instruments

The carrying amounts of each of the categories of financial instruments of the Group as at end of the reporting period are as follows:

	2020 USD	2019 USD
Financial assets at amortised costs		
Trade and other receivables	**996,228**	753,954
Rental and other deposits	**534,056**	129,996
Amount due from a former director	**10,066**	10,066
Cast at bank and in hand	**633,310**	116,782
	2,173,660	1,010,798
Financial liabilities at amortised costs		
Trade and other payables	**2,652,874**	733,140
Accrued expenses	**48,223**	30,239
Amount due to an associate	**13,503**	8,959
Amount due to a fellow subsidiary	**7,857**	872,206
Lease liabilities	**20,077**	–
	2,742,534	1,644,544

The fair values of the Group's financial assets and liabilities are not materially different from their carrying amounts.

22. Risks related to financial instruments

The Group's overall policy on risk management remained the same as in the previous year. The risks associated with the Group's financial instruments at the end of the reporting period are as follows:-

Currency risk

The Group's foreign currency risk primarily relates to trade and other receivables, bank deposits and trade and other payables that are denominated in a currency other than its functional currency. The currency giving rise to this risk is primarily Renminbi (RMB). The Group has not used any forward exchange contracts, currency borrowings or other means to hedge its foreign currency exposure. United States dollars against RMB was relatively stable during the year and as result, the Group considers it has no material foreign currency risk.

The directors consider that any reasonable changes in foreign exchange would not result in significant change in the Group's results and therefore no sensitivity analyse is presented for foreign exchange risk.

Credit risk

The carrying amounts of trade and other receivables and bank deposits as stated in the consolidated statement of financial position represent the Group's maximum exposure to credit risk at the end of the reporting period. The Group has a credit policy in place and exposures to the credit risk are monitored on an ongoing basis. At the end of the reporting period, the Group has a concentration of credit risk as the trade receivables accounted for 40% (2019: 62%) of the Group's current assets.

An analysis of the age of trade receivables that were past due as at the end of the reporting period but not impaired is as follows:-

	2020 USD	2019 USD
0 to 180 days	**669,213**	431,351
Over 180 days	**20,816**	18,050
	690,029	449,401

Receivables that were past due but not impaired relate to a number of customers that have a good track record with the Group. Based on past experience, the directors believe that no provision for doubtful debt is necessary in respect of these balances as there has not been a significant change in credit quality and the balances are still considered fully recoverable. The Group does not hold any collateral over these balances.

Receivables that were neither past due nor impaired relate to a range of customers for whom there was no recent history of default.

Liquidity risk

The Group's policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

The maturity analysis for the Group's financial liabilities at the end of the reporting period, based on the contractual undiscounted cash flows, is as follows:-

At 31 October 2020	Lease liabilities USD	Amounts due to related parties USD	Payables and accruals USD	Total financial liabilities USD
Carrying amount	**20,077**	**21,360**	**2,701,097**	**2,742,534**
Without fixed repayment terms	**–**	**21,360**	**–**	**21,360**
Within 3 months	**10,938**	**–**	**2,701,097**	**2,712,035**
More than 3 months but within 1 year	**7,150**	**–**	**–**	**7,150**
More than 1 year	**2,383**	**–**	**–**	**2,383**
Total contractual undiscounted cash flows	**20,471**	**21,360**	**2,701,097**	**2,742,928**

At 30 October 2019	Lease liabilities USD	Amounts due to related parties USD	Payables and accruals USD	Total financial liabilities USD
Carrying amount	–	881,165	763,379	1,644,544
Without fixed repayment terms	–	881,165	–	881,165
Within 3 months	–	–	763,379	763,379
More than 3 months but within 1 year	–	–	–	–
More than 1 year	–	–	–	–
Total contractual undiscounted cash flows	–	881,165	763,379	1,644,544

23. Capital management

The Group's primary objectives when managing capital, which comprises all capital and reserves attributable to the equity holders are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital structure in order to support its business and maximize shareholder value.

The Group actively and regularly reviews and manages its capital structure to ensure optimal capital structure and shareholders returns, taking into consideration the future capital requirements of the Group and capital efficiency. In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to the equity holders, issue new shares or sell assets to reduce debt. The Group's overall policy on managing capital remained the same as in the previous year.

24. Critical accounting estimates and judgements

In preparing these consolidated financial statements, the management is required to exercise significant judgements in the selection and application of accounting principles, including making estimates and assumptions concerning the future. The resulting accounting estimate will, by definition, seldom equal to the related actual results. The following is a review of the more significant accounting policies that are impacted by judgements and uncertainties and for which different amounts may be reported under a different set of conditions or using different assumptions.

Impairment

The Group assesses annually whether property, plant and equipment and investment in an associate have any indication of impairment. The recoverable amounts of the assets have been determined based on value-in-use calculations. These calculations require the use of judgements and estimates.

Depreciation

The Group's net book value of property, plant and equipment as at 31 October 2020 was USD34,850 (2019: USD14,590). The Group depreciates the assets on a straight-line basis, after deducting estimated scrap value, over their estimated useful life. The estimated useful life reflects the directors' estimate of the periods that the Group intends to derive future economic benefits from the use of the assets.

Income taxes

No deferred tax asset was recognised in the Group's consolidated statement of financial position at 31 October 2020 in relating to the estimated unused tax losses arising from the Company's subsidiary of USD1,587,250 (2019: USD1,291,166) due to the unpredictability of future profit streams. The realisability of the deferred tax assets mainly depends on whether sufficient future profits or taxable temporary differences will be available in the future. In cases where the actual future profits generated are more than expected, a material recognition of deferred tax asset may arise, which would be recognised in profit or loss for the period in which such a recognition takes place.

Recognition of deferred tax assets, which principally relate to tax losses, depends on the management's expectation of future taxable profit that will be available against which tax losses can be utilised. The outcome of their actual utilisation may be different.

Provision

The Group recognises provisions when it has present legal or constructive obligation arising as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. The recording of provisions requires the application of judgements about the ultimate resolution of these obligations. As a result, provision are reviewed at the end of each reporting period and adjusted to reflect the Group's current best estimate.

25. Operating lease commitments

At the end of the reporting period, the Group had future aggregate minimum lease payments under non-cancellable operating leases as follows:

	2020 USD	2019 USD
Within one year	**1,152**	39,143
In the second to fifth year inclusive	–	11,336
	1,152	50,479

26. Related party transactions

In addition to the transactions / information disclosed elsewhere in these consolidated financial statements, during the year, the Group had the following transactions with related party.

	2020 USD	2019 USD
Company controlled by the immediate parent		
Commission fee paid	–	38,503
Interest paid	**46,254**	54,300

27. Statement of financial position and reserve movement of the Company

Information about the statement of financial position of the Company at the end of the reporting period is as follow:-

	2020 USD	2019 USD
Non-current assets		
Plant and equipment	**20,897**	12,975
Interest in an associate	**645**	1
Interest in a subsidiary	**1**	1

To the shareholders of
Origin Fruit Direct B.V.
Albert Plesmanweg 250
3029 BP Rotterdam

A. Report on the audit of the financial statements in the period 1 November 2019 until 31 October 2020

Our opinion

We have audited the financial statements for the year ended 31 October 2020 of Origin Fruit Direct B.V., based in Rotterdam.

In our opinion the accompanying financial statements give a true and fair view of the financial position of Origin Fruit Direct B.V. as at 31 October 2020, and of its result for the period 1 November 2019 until 31 October 2020 in accordance with Part 9 of Book 2 of the Dutch Civil Code.

The financial statements comprise:

1. the balance sheet as at 31 October 2020;
2. the income statement for 1 November 2019 until 31 October 2020; and
3. the notes comprising a summary of the accounting policies and other explanatory information.

Basis for our opinion

We conducted our audit in accordance with Dutch law, including the Dutch Standards on Auditing. Our responsibilities under those standards are further described in the 'Our responsibilities for the audit of the financial statements' section of our report.

We are independent of Origin Fruit Direct B.V. in accordance with the Wet toezicht accountantsorganisaties (Wta, Audit firms supervision act), Verordening inzake de onafhankelijkheid van accountants bij assurance-opdrachten (ViO, Code of Ethics for Professional Accountants, a regulation with respect to independence) and other relevant independence regulations in the Netherlands. Furthermore we have complied with the Verordening gedrags- en beroepsregels accountants (VGBA, Dutch Code of Ethics).

We believe the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

B. Report on the other information included in the annual report

In addition to the financial statements and our auditor's report thereon, the annual report contains other information that consists of:

- The directors report;
- Other information as required by Part 9 of Book 2 of the Dutch Civil Code.

Based on the following procedures performed, we conclude that the other information:

- is consistent with the financial statements and does not contain material misstatements;
- contains the information as required by Part 9 of Book 2 of the Dutch Civil Code.

We have read the other information. Based on our knowledge and understanding obtained through our audit of the financial statements or otherwise, we have considered whether the other information contains material misstatements.

By performing these procedures, we comply with the requirements of Part 9 of Book 2 of the Dutch Civil Code and the Dutch Standard 720. The scope of the procedures performed is substantially less than the scope of those performed in our audit of the financial statements.

Management is responsible for the preparation of the management board's report in accordance with Part 9 of Book 2 of the Dutch Civil Code and other information as required by Part 9 of Book 2 of the Dutch Civil Code.

C. Description of responsibilities regarding the financial statements

Responsibilities of the board for the financial statements

The board is responsible for the preparation and fair presentation of the financial statements in accordance with Part 9 of Book 2 of the Dutch Civil Code. Furthermore, the board is responsible for such internal control as the board determines is necessary to enable the preparation of the financial statements that are free from material misstatements, whether due to fraud or error.

As part of the preparation of the financial statements, the board is responsible for assessing the company's ability to continue as a going concern. Based on the financial reporting framework mentioned, the board should prepare the financial statements using the going concern basis of accounting unless the board either intends to liquidate the company or to cease operations, or has no realistic alternative but to do so.

The board should disclose events and circumstances that may cast significant doubt on the company's ability to continue as a going concern in the financial statements.

Our responsibilities for the audit of the financial statements

Our objective is to plan and perform the audit assignment in a manner that allows us to obtain sufficient and appropriate audit evidence for our opinion.

Our audit has been performed with a high, but not absolute, level of assurance, which means we may not detect all material errors and fraud during our audit.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial statements. The materiality affects the nature, timing and extent of our audit procedures and the evaluation of the effect of identified misstatements on our opinion.

We have exercised professional judgement and have maintained professional skepticism throughout the audit, in accordance with Dutch Standards on Auditing, ethical requirements and independence requirements. Our audit included among others:

- Identifying and assessing the risks of material misstatements of the financial statements, whether due to fraud or error, designing and performing audit procedures responsive to those risks, and obtaining audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatements resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- Obtaining an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control;
- Evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the board;
- Concluding on the appropriateness of the board's use of the going concern basis of accounting, and based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause a company to cease to continue as a going concern;
- Evaluating the overall presentation, structure and content of the financial statements, including the disclosures; and
- Evaluating whether the financial statements represents the underlying transactions and events free from material misstatements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant findings in internal control that we identify during our audit.

NOTES TO THE FINANCIAL STATEMENTS

Entity information

Registered address and registration number trade register

The registered and actual address of Origin Fruit Direct B.V. is Albert Plesmanweg 250, 3029 BP in Rotterdam. Origin Fruit Direct B.V. is registered at the Chamber of Commerce under number 24067257.

General notes

The most important activities of the entity

Origin Fruit Direct B.V.'s main activities are trading (in- and export) in fruit.

Disclosure of group structure

Origin Fruit Direct B.V. is part of a group. The head of this group is Mahindra & Mahindra Ltd. The financial statements of Origin Fruit Direct B.V. are included in the consolidated financial statements of Mahindra & Mahindra Ltd.

Disclosure of estimates

In applying the principles and policies for drawing up the financial statements, the directors of Origin Fruit Direct B.V. make different estimates and judgments that may be essential to the amounts disclosed in the financial statements. If it is necessary in order to provide the transparency required under Book 2, article 362, paragraph 1, the nature of these estimates and judgments, including related assumptions, is disclosed in the notes to the relevant financial statement item.

General accounting principles

The accounting standards used to prepare the financial statements

The financial statements are prepared according to the stipulations in chapter 9 Book 2 of the Dutch Civil Code.

Valuation of assets and liabilities and determination of the result takes place under the historical cost convention, unless presented otherwise.

Income and expenses are accounted for on accrual basis. Profit is only included when realized on balance sheet date. Liabilities and any losses originating before the end of the financial year are teaken into account if they have become known before preparation of the financial statements.

Conversion of amounts denominated in foreign currency

Transactions in foreign currencies are stated in the financial statements at the exchange rate of the functional currency on the transaction date.

Items included in the financial statements are measured using the currency of the primary economic environment in which the company operates (the functional currency). The financial statements are presented in euro; which is the functional and presentation currency of Origin Fruit Direct B.V.

Foreign currency translation for the balance sheet

Monetary assets and liabilities in foreign currencies are converted to the closing rate of the functional currency on the balance sheet date. The translation differences resulting from settlement and conversion are credited or charged to the income statement, unless hedge accounting is applied.

Non-monetary assets valued at historical cost in a foreign currency are converted at the exchange rate on the transaction date.

Non-monetary assets valued at fair value in a foreign currency are converted at the exchange rate on the date on which the fair value was determined.

Translation differences on intragroup long-term loans that effectively constitute an increase or decrease in net investments in a foreign operation are directly recognised in equity as a component of the legal reserve for translation differences.

Translation differences on foreign currency loans contracted to finance a net investment in a foreign operation are recognised in the legal reserve for currency translation differences if and when such loans effectively hedge the exchange rate exposure on that net investment in a foreign operation.

Assets and liabilities of consolidated subsidiaries with a functional currency different from the presentation currency are translated at the rate of exchange prevailing at the balance sheet date; income and expenses are translated at average exchange rates during the financial year. Goodwill and fair value adjustments arising on the acquisition of a foreign operation are treated as assets and liabilities of these subsidiaries and translated at the closing rate. Any resulting exchange differences are taken directly to the legal reserve for translation differences within equity.

Operating leases

The vennootschap has lease contracts whereby a large part of the risks and rewards associated with ownership are not for the benefit of or incurred by the vennootschap. The lease contracts are recognised as operational leasing. Lease payments are recorded on a straight-line basis, taking into account reimbursements received from the lessor, in the income statement for the duration of the contract.

Financial instruments

Securities included in financial and current assets are stated at fair value, if these are related to securities held for trading or if they relate to equity instruments not held for trading, as well as derivatives of which the underlying object is listed on a stock exchange. All other on-balance financial instruments are carried at (amortised) cost.

Accounting principles

Intangible assets other

Other intangible fixed assets at the costs incurred less the accumulated amortisation costs. Impairments expected on the balance sheet date are taken into account. An impairment occurs when the carrying amount of an asset is higher than the recoverable amount; the recoverable amount is the higher of the realisable value and the value in use.

Property, plant and equipment

Tangible fixed assets are presented at cost less accumulated depreciation and, if applicable, less impairments in value. Depreciation is based on the estimated useful life and calculated as a fixed percentage of cost, taking into account any residual value. Depreciation is provided from the date an asset comes into use.

Tangible fixed assets are capitalised if the economic ownership held by the company, and its group companies, is governed by a financial lease agreement. The commitment arising from the financial lease agreements is accounted for as a liability. The interest included in the future lease instalments is charged to the result over the term of the financial lease agreement.

Other tangible assets

Other tangible assets are valued at historical cost plus additional costs or production cost less straight-line depreciation based on the expected useful life and impairments expected.

Impairment of non-current assets

On each balance sheet date, Origin Fruit Direct B.V. assesses whether there are any indications that a fixed asset may be subject to impairment. If there are such indications, the recoverable amount of the asset is determined. If it is not possible to determine the recoverable amount of the individual asset, the recoverable amount of the cash-generating unit to which the asset belongs is determined. An impairment occurs when the carrying amount of an asset is higher than the recoverable amount; the recoverable amount is the higher of the realisable value and the value in use.

An impairment loss is directly recognised in the profit and loss account while the carrying amount of the asset concerned is concurrently reduced.

The realisable value is initially based on a binding sale agreement; if there is no such agreement, the realisable value is determined based on the active market, whereby usually the prevailing bid price is taken as market price. For the determination of the value in use, an estimate is made of the future net cash flows in the event of continued use of the asset / cash-generating unit; these cash flows are discounted.

If it is established that an impairment that was recognised in the past no longer exists or has reduced, the increased carrying amount of the asset concerned is set no higher than the carrying amount that would have been determined if no impairment value adjustment for the asset concerned had been reported. An impairment of goodwill is not reversed.

Inventories

Inventories for resale are valued at acquisition price or lower net realizable value. This lower net realizable value is determined by individual assessment of the inventories. The valuation of inventories for resale is based on fifo prices.

Receivables

Upon initial recognition the receivables are valued at fair value and then valued at amortised cost. The fair value and amortised cost equal the face value. Provisions deemed necessary for possible bad debt losses are deducted. These provisions are determined by individual assessment of the receivables.

NOTES TO THE FINANCIAL STATEMENTS

Cash and cash equivalents

Cash at banks and in hand represent cash in hand, bank balances and deposits with terms of less than twelve months. Overdrafts at banks are recognised as part of debts to lending institutions under current liabilities. Cash at banks and in hand is valued at nominal value.

Share capital paid called up

When Origin Fruit Direct B.V. purchases treasury shares, the consideration paid is deducted from equity (other reserves or any other reserve if the articles of association allow so) until the shares are cancelled or reissued. Where such shares are subsequently reissued, any consideration received is included in equity (other reserves or any other reserve). The consideration received will be added to the reserve from which earlier the purchase price has been deducted.

Incremental costs directly attributable to the purchase, sale and/or issue of new shares are shown in equity as a deduction, net of tax, from the proceeds.

Other reserves

Other reserves are all reserves, except the legal and statutory reserves. Other reserves can freely be distributed to the shareholders.

Current liabilities

Upon initial recognition, loans and liabilities recorded are stated at fair value and then valued at amortised cost.

Accounting principles for determining the result

The result is the difference between the realisable value of the goods/services provided and the costs and other charges during the year. The results on transactions are recognised in the year in which they are realised.

Revenue recognition

Net turnover represents amounts invoiced for goods and services supplied during the financial year reported on, net of discounts and value added taxes.

Revenues ensuing from the sale of goods are accounted for when all major entitlements to economic benefits as well as all major risks have transfered to the buyer. The cost price of these goods is allocated to the same period.

Wages

The benefits payable to personnel are recorded in the income statement on the basis of the employment conditions.

Applied policy of pension costs

The pension plans of Origin Fruit Direct B.V. are financed through contributions to industry pension funds. The pension obligations are valued according to the 'valuation to pension fund approach'. This approach accounts for the contribution payable to the pension provider as an expense in the profit and loss account.

Based on the administration agreement it is assessed whether and, if so, which obligations exist in addition to the payment of the annual contribution due to the pension provider as at balance sheet date. These additional obligations, including any obligations from recovery plans of the pension provider, lead to expenses for the company and are included in a provision on the balance sheet. With final salary pension plans an obligation (provision) for (upcoming) past service is included if future salary increases have already been defined as at balance sheet date.

The valuation of the obligation is the best estimate of the amounts required to settle this as at balance sheet date. If the effect of the time value of money is material the obligation is valued at the present value. Discounting is based on interest rates of high quality corporate bonds.

Additions to and release of the obligations are recognized in the profit and loss account.

A pension receivable is included in the balance sheet when the group has the right of disposal over the pension receivable and it is probable that te future economic benefits which the pension receivable holds will accrue to the group, and the pension receivable can be reliably established.

As at year-end 31 October 2020 and 31 October 2019 no pension receivables and no obligations existed for the group in addition to the payment of the annual contribution due to the pension provider.

The industry pension fund AVH has stated that the funding ratio is 85,6% as per October 2020. Based on the administrative regulations the group has no obligation to make additional contributions in the event of a deficit other than through higher future contributions.

Amortisation of intangible assets and depreciation of property, plant and equipment

Intangible fixed assets, including goodwill, and tangible fixed assets are depreciated or amortised from the date of initial use over the expected future economic life of the asset, while taking into account any applicable restrictions with respect to buildings, investment property, other tangible fixed assets and capitalised goodwill. Land is not depreciated.

Future depreciation and amortisation is adjusted if there is a change in estimated future useful life.

Gains and losses from the occasional sale of property, plant or equipment are included in depreciation.

Other operating expenses

Costs are determined on a historical basis and are attributed to the reporting year to which they relate.

Other interest income and related income

Other interest income and related income are recognised on a pro rata basis, taking account of the effective interest rate of the assets to which they relate.

Interest expenses and related expenses

Interest expenses and other income expenses are recognised on a pro rata basis, taking account of the effective interest rate of the liabilities to which they relate. In accounting for interest expenses, the recognised transaction expenses for loans received are taken into consideration.

Income tax expense

Corporate income tax is calculated at the applicable rate on the result for the financial year, taking into account permanent differences between profit calculated according to the financial statements and profit calculated for taxation purposes, and with which deferred tax assets (if applicable) are only valued insofar as their realisation is likely.

Cash flow statement

The cash flow statement has been prepared using the indirect method. The cash items disclosed in the cash flow statement comprise cash at banks and in hand except for deposits with a maturity longer than three months. Cash flows denominated in foreign currencies have been translated at average estimated exchange rates. Exchange differences affecting cash items are shown separately in the cash flow statement. Interest paid and received, dividends received and income taxes are included in cash from operating activities. Dividends paid are recognised as cash used in financing activities. The purchase consideration paid for the acquired group corporation has been recognised as cash used in investing activities where it was settled in cash. Any cash at banks and in hand in the acquired group corporation have been deducted from the purchase consideration. Transactions not resulting in inflow or outflow of cash, including finance leases, are not recognised in the cash flow statement. Payments of finance lease instalments qualify as repayments of borrowings under cash used in financing activities and as interest paid under cash generated from operating activities.

AUDIT REPORT

To Origin Direct Asia (Shanghai) Trading Company Limited,

I. Audit opinion

We have audited the financial statements of Origin Direct Asia (Shanghai) Trading Company Limited (hereinafter referred to as ODA Trading), including balance sheet on December 31, 2020, profit statement, cash flow statement, statement of changes in owners' equity and notes to financial statements of year 2020.

In our opinion, the accompany financial statements have been prepared in accordance with provisions of accounting standards for business enterprises in all material respects, and they reflect fairly the financial status of ODA Trading on December 31, 2020 as well as the operating results and cash flow of year 2020.

II. Material uncertainty related to going concern

We remind users of financial statements that ODA Trading incurred a net loss of RMB9,733,556.54 in 2020 as stated in Note VIII to the financial statements. On December 31, 2020, ODA Trading's current liabilities exceeded total current assets by RMB 10,321,791.59. As stated in Note VIII to the financial statements, these matters or circumstances as well as other matters stated in Note VIII to the financial statements indicate a material uncertainty which may give rise to significant doubts about ODA Trading's ability to continue as a going concern. Such matters do not affect the published audit opinion.

III. Responsibility of management and governance toward financial statements

The management of ODA Trading (hereinafter referred to as management) is responsible for preparing financial statements according to provisions of accounting standards for business enterprises to realize fair presentation, and is also responsible for planning, implementing and maintaining necessary internal control so as to ensure that there is no material misstatement caused by fraud or error in the financial statements.

When preparing financial statements, management is responsible for assessing the ability to continue as a going concern of ODA Trading, disclosing matters related to going concern(if applicable) and applying the going concern assumption unless management plans to liquidate ODA Trading, ceases operations or has no other realistic option.

Governance is responsible for supervising the financial reporting process of ODA Trading.

IV. Responsibility of certified public accountants toward audit of financial statements

Our objective is to obtain reasonable assurance as to whether the financial statements as a whole are free of material misstatement due to fraud or error or not, and to issue audit reports that contain audit opinion. Reasonable assurance is a high level of assurance, but there is no guarantee that a material misstatement will always be found when existing in an audit performed in accordance with auditing standards. The misstatement can be caused by fraud or error, and is generally considered to be material if it is reasonably expected that the misstatement, alone or aggregated, may affect economic decision made by users of the financial statements based on the financial statements.

In the process of performing audit in accordance with auditing standards, we have applied professional judgment and maintained professional doubt. At the same time, we have also performed the following tasks:

(I) Identify and assess the risk of material misstatement of financial statements due to fraud or error, design and implement audit procedures to address these risks, and obtain sufficient and appropriate audit evidence as a basis for the publication of audit opinion. Because a fraud may involve collusion, forgery, deliberate omission, misrepresentation or override of internal control, the risk of failing to discover a material misstatement due to fraud is higher than the risk of failing to discover a material misstatement due to a mistake.

(II) Understand the internal control related to audit so as to design appropriate audit procedures, but not for the purpose of expressing an opinion on effectiveness of internal control.

(III) Appraise appropriateness of the accounting policies selected by management and reasonableness of making accounting estimates and related disclosures.

(IV) Draw a conclusion on appropriateness of management using the going concern assumption. At the same time, based on audit evidence obtained, draw a conclusion as to whether there is any material uncertainty about the issues or circumstances that may give rise to major doubts about the ability to continue as a going concern of ODA Trading or not. If we conclude that there is a material uncertainty, the auditing standards require us to remind users of the statements to pay attention to relevant disclosures in financial statements in the audit report; if the disclosures are not sufficient, we should issue an unqualified opinion. Our conclusion is based on the information available up to the date of audit report. However, future events or circumstances may make ODA Trading unable to continue as a going concern.

(V) Assess overall presentation, structure and content of the financial statements, and assess whether the financial statements have fairly reflected relevant transactions and events or not.

Notes to Financial Statements of 2020

Origin Direct Asia (Shanghai) Trading Company Limited All amounts in RMB unless otherwise stated.

I. Basic Information of the Company

Origin Direct Asia (Shanghai) Trading Company Limited is an enterprise invested and founded by Origin Direct Asia Limited. On February 11, 2010, Shanghai Municipal People's Government approved its establishment and issued the Approval Certificate for the Establishment of Enterprises with Investments of Taiwan,Hong Kong, Macao and Overseas Chinese in PRC (No. 0438 [2010] Certificate for Wholly-owned Foreign Investment Enterprise in Jing'an District in Shanghai). The Company was founded on May 28, 2010. It now possesses a Business License for Enterprise's Legal Person issued by Shanghai Administration for Industry & Commerce (Unified social code91310000551501987A). Its registered capital totals 140,000 U.S. dollars, and its operation period is 20 years.

The Company mainly engages in the wholesale, import & export, and agent service with commission (excluding auction) of prepackaged foods (including frozen foods and refrigerated foods; excluding delicatessen and braised foods) and edible agricultural products (excluding unprocessed pork products). It also offers after-sale services regarding those products aforementioned. (Excluding goods subject to the state-run trade administration; for goods subject to administration of quotas and license, related applications shall be transacted in line with corresponding state provisions.) (Operating with administrative permits where they areapplicable.)

II. Primary Accounting Policies and Estimates of the Company

1. **Accounting Standard & Accounting System:** The Company adopts the Accounting Standards for Enterprises and Accounting System for Business Enterprises and corresponding supplementary provisions launched by the state.

2. **Fiscal Year:** From January 1 to December 31 of a calendar year.

3. **Recording Currency:** RMB.

4. **Base of Accounting:** Accrual Basis; **Valuation Principle:** Based on Historical Cost

5. **Translation Method of Transactions in Foreign Currency**

Within a fiscal year, the amount of an economical business involving foreign currency shall be translated into RMB and recorded based on the market exchange rate (medium rate) on the first date of the month when related business occurs launched by People's Bank of China and cross exchange rate provided by State Administration of Foreign Exchange. At the end of each month, balance in foreign currency in foreign currency account shall be adjusted based on market exchange rate (medium rate) and cross exchange rate at the end of that month. For the difference incurred (profit and loss), if the special borrowing in foreign currency is related to the acquisition and construction of fixed assets, principle and interest incurred before they are ready for the intended use shall be capitalized. For those incurred during preparation period shall be recorded as long-term deferred expense. The rest shall be recorded as current expense.

6. **Recognition Standard of Cash Equivalents**

The Company recognizes short-term (expires within 3 months after they are purchased) and highly liquid investments that are readily convertible to known amount of cash and which are subject to an insignificant risk of change in value it holds as cash equivalents.

7. **Accounting Method for Bad Debt Losses of Accounts Receivable**

(1) Recognition Standard of Bad Debt Losses

(i) Accounts receivable whose collection is still not possible after the use of the bankruptcy assets for settlement or the estate for repayment due to the bankruptcy or death of the debtor;

(ii) Accounts receivable with obvious features that its collection is impossible due to the failure of the debtor to fulfill repayment obligations.

All accounts receivable mentioned above that are for sure irrecoverable shall be recognized as bad debt write-off after being approved by authorized department.

(2) Measurement Method of Bad Debts Losses

Losses on bad debts shall be measured by adopting allowance method. The Company shall withdraw bad debts provisions on all accounts receivable and all other accounts receivable by adopting the specific identification method.

8. **Accounting Method of Inventories**

(1) Classification of the Company's Inventories

Inventories are those finished products or merchandises or those in the process of production for the purpose of selling, and materials and goods used in the production or services providing process as well as others under the Company's possession during the normal production and operation process.Inventories of the Company can be classified as: commodities in storage and low-value consumables.

(2) Determination Method of Entry Value of Inventories Acquired

All inventories shall be initially accounted with their actual costs when they are acquired.

(3) Measurement Method of Inventories on Delivery

Normally, inventories shall be accounted based on their actual costs, while inventories on delivery shall be accounted with First-in First-out method.

(4) Amortization Method of Low-value Consumables

Low-value consumables are amortized on on-off amortization.

(5) Inventory System

The Company uses perpetual inventory system.

(6) Recognition Standard of Depreciation Provision and Related Withdrawing Method

At the end of year, the Company accounts inventories depending on which is lower between the cost and the net realizable value. When the cost of inventories can't be recovered because the inventories suffer from disuse or all or part is stale or out of date, or the sales price is lower than the cost, impairment provision on the exceeding part shall be withdrawn. Related depreciation provisions shall be accounted according to the difference between the cost of individual inventory item and corresponding net realized value. For inventories with huge quantity but lower unit price, cost and net realized value shall be determined based on categories.

Net realized value of inventories shall be determined based on the amount after deducting estimated cost for completion and estimated expense for sales from the estimated sales price during the Company's normal production and operation process.

9. **Measure and Depreciation Policies of Fixed Assets and Method to Withdraw**

Corresponding Impairment Provisions

(1) Standards to Recognize Fixed Assets: Fixed assets refer to as tangible assets having all features as follows synchronously: (i) held for the purpose of producing goods, providing services, lease or for operation and management; (ii) having more than one year of service life; and (iii) respective value is high. Detailed standards are: (i) buildings, structures, machines, machinery and transportation facilities with a service life over a year as well as other equipments, appliances and tools related to production and operation; and (ii) articles that are not major devices of production and operation and bear the unit value of over RMB 2,000 and a service life over 2 years.

(2) **Classification of Fixed Assets:** Electrical Equipments

(3) **Measurement of Fixed Assets and Methods for Impairment Examination and Withdrawing Impairment Provisions:** Fixed assets shall be recorded at actual costs or determined values. At the end of each year, the Company will take the impairment examination each by each. When recoverable amount is lower than carrying value, related differenceshall be recognized as impairment provision and be recorded into current profits and losses. Impairment provisions of fixed assets shall be withdrawn on a single item assets base.

(4) **Depreciation Method of Fixed Assets**

Straight-line method is adopted in depreciation of fixed assets. Depreciation rate of each category of fixed assets was determined according to their original costs and their estimated economical usable lives after deducting their retained values (0% of original costs). Depreciation rate of each category of fixed assets is:

Category	Depreciation Age (Years)	Annual Depreciation Rate (%)
Electrical Equipments	3	33.33
Office furniture	5	20.00

For a fixed asset whose provision for depreciation had been made, when making depreciation, its depreciation rate and amount shall be re-determined based on its carrying amount and retained usable life. For a fixed asset whose provision for depreciation had been made, when its value resumes, its depreciation rate and amount shall be re-determined based on its resumed carrying amount and retained usable life.

10. Recognition Method of Revenues

(1) From Selling Goods

The Company recognizes related amount as operating revenue when it already transferred the significant risks and rewards of ownership of the goods to the buyer, when it retains neither continuous management right nor actual control over the sold goods, when relevant economic benefits may flow into the company, and when relevant amount of revenue and relevant costs incurred can be measured in a reliable way.

11. Accounting Treatment on Lease Business

(1) The Company's Accounting Treatment on Operating Lease Business as the Lessee

The rents from operating leases shall be recognized as the expense by using straight-line method over each period of the lease term.

12. Accounting Treatment Method on Income Tax

The Company adopts the tax payable method.

13. Taxes

Tax types and rates available for the Company are:

Tax Type	Income Tax	Value-added Tax
Tax Rate	25%	9%
Tax Base	Income Tax Payable	Output Tax for the Period Deducting Input Tax for the Period

III. Changes on Significant Accounting Policies & Estimates and Explanations on Corrections of Material Accounting Errors

Till the date of these financial statements, the Company conducted no change on significant accounting policies and estimates and had no correction on material accounting errors.

IV. Notes to Items in Financial Statements

1. Cash and Cash Equivalents

Item	Ending Amount	Beginning Amount
Cash	20,298.46	36,899.44

To the Board of Directors
Bristlecone Limited

We have audited the accompanying special purpose parent-only financial statements ("special purpose financial statements") of **Bristlecone Limited** (the 'Company', a Cayman Islands corporation and subsidiary of Mahindra Holdings Limited), which comprise the statement of assets and liabilities as of March 31, 2021, and the related statements of revenues and expenses, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the special purpose financial statements.

Management's responsibility for the special purpose financial statements

Management is responsible for the preparation and fair presentation of these special purpose financial statements in accordance with the basis of accounting as described in Note A(3.1) to the special purpose financial statements. Management is also responsible for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of special purpose financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's responsibility

Our responsibility is to express an opinion on these special purpose financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the special purpose financial statements referred to above present fairly, in all material respects, the financial position of the Company as of March 31, 2021, and the results of its operations and its cash flows for the years then ended in accordance with the basis of accounting as described in Note A(3.1).

Basis of accounting

We draw attention to Note A(3.1) of the accompanying special purpose financial statements, which describes the basis of accounting for the aforesaid special purpose financial statements. These special purpose financial statements have been prepared for the information and use of the management of Bristlecone Limited and to enable Mahindra Holdings Limited to prepare its consolidated financial statements for the year ended 31 March 2021 and therefore, these special purpose financial statements may not be suitable for any other purpose. Our opinion is not modified with respect to this matter.

Restriction on use

This report is intended solely for the use of the management of Bristlecone Limited and Mahindra Holdings Limited for the aforementioned purpose, and accordingly, may not be suitable for any other purpose, and should not be used, referred to or distributed for any other purpose or to any other party without our prior written consent. Further, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this report is shown or into whose hands it may come without our prior consent in writing.

NOTES TO SPECIAL PURPOSE PARENT-ONLY FINANCIAL STATEMENTS

NOTE A – BACKGROUND INFORMATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. NATURE OF OPERATIONS

Bristlecone Limited (the "Company") is the Holding Company for the Bristlecone Group, which comprises of the Company and its wholly owned subsidiaries, Bristlecone India Limited, Bristlecone Inc., Bristlecone UK Ltd, Bristlecone GmbH, Bristlecone (Singapore) Pte. Limited, Bristlecone (Malaysia) SDN BHD, Bristlecone Consulting Limited (Canada), Bristlecone International AG (Switzerland) and Bristlecone Middle East DMCC (UAE). The Group is engaged in providing technology solutions and consulting services with principal operations in the United States of America, India, Singapore, Malaysia, Germany, Switzerland, Canada, United Kingdom and UAE. The Group's primary focus is on providing supply chain services ranging from supply chain strategy and network design to supply chain system implementations. The Group also provides application outsourcing services, data management services and development and integration services to independent software vendors.

Estimation uncertainty relating to the global health pandemic - COVID-19

In assessing the carrying value of investments in subsidiaries, the Company has considered internal and external information up to the date of these financial statements including future business projections and related net cash flow projections and economic forecasts for each of the subsidiaries basis the economic environment in which each of these subsidiaries operate. The Company has performed sensitivity analysis on the assumptions used and based on the current indicators of future economic conditions, the Company believes that fair value of investments in subsidiaries is expected to be higher than the carrying value of investments. The impact of the global health pandemic may be different from the estimates as at the date of these financial statements and the Company will closely monitor any material changes to future economic conditions as and when they arise and respond accordingly.

2. GENERAL INFORMATION

The Company was incorporated under the laws of 'The Cayman Islands' on February 3, 2004. The Company commenced commercial operations on May 17, 2004 and is a subsidiary of Mahindra Holdings Limited ("Holding Company"), an Indian Company, which is ultimately held by Mahindra & Mahindra Limited ("the Group's ultimate Holding Company").

The Company does not have active commercial operations. It engages in financing and treasury functions for the Group as a whole.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies applied in the preparation of the accompanying special purpose parent-only financial statements is as follows:

3.1. OVERALL CONSIDERATIONS

The accompanying financial statements have been prepared under the historical cost convention on the accrual basis of accounting in accordance with the group accounting policies as contained in consolidated financial statements of the holding Company, Bristlecone Limited and its subsidiaries and described herein these notes to reflect the financial position, revenues and expenses and cash flows of the Company.

These special purpose parent – only financial statements have been prepared for the purpose of consolidation with the financial statements of Mahindra Holdings Limited, the Holding Company and are not intended to be a presentation in conformity with accounting principles generally accepted in the United States of America.

These special purpose financial statements have been prepared on a going concern basis, which assumes the realization of assets and satisfaction of liabilities in the normal course of business. These financial statements have been presented in the United States Dollars ('$'), which is the functional and reporting currency of the Company.

3.2. USE OF ESTIMATES

In preparing the Company's financial statements in conformity with the accounting policies stated herein, the Company's management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements as well as the reported amounts of other income and expenses during the reporting period. Although these estimates are based on management's best knowledge of current events and actions, actual results may ultimately differ from those estimates. The management's estimates for expected forfeitures of employee stock options and realization of carrying value of investments represent certain of these particularly sensitive estimates.

3.3. CASH AND CASH EQUIVALENTS

The Company considers all highly liquid investments and deposits with an original maturity of three months or less to be cash equivalents. Cash comprises cash on hand and balance with banks.

3.4. INVESTMENTS

Investments in subsidiaries are carried at cost. Cost is determined based on the cash paid and other liabilities assumed by the Company. Consideration that has been settled by issue of the Company's shares is also considered in arriving at the cost of investments. Provision for impairment is made, whenever the estimated fair value of investments is expected to be lower than the carrying value of investments.

3.5. DIVIDEND INCOME

Dividend received from subsidiaries is recorded as income for the year and is recognised when the Company's right to receive the payment is established, it is probable that the economic benefits associated with the dividends will flow to the Company and the amount of the dividend can be measured reliably. The taxes payable as per the applicable tax laws in respective jurisdictions are recorded as tax expense for the year.

3.6. INTEREST EXPENSE

Interest expense on loans/borrowings is recorded on accrual basis.

3.7. STOCK COMPENSATION

The Company accounts for equity-settled options granted to employees in accordance with ASC 718, "Stock Compensation". ASC 718 addresses the accounting for stock payment transactions in which an enterprise receives employee services in exchange for equity instruments of the enterprise or liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments.

In accordance with the provisions of ASC 718, stock compensation for the awards is recognized on a straight line basis over the requisite service period, which is generally the vesting period of the award.

ASC 718 requires the use of a valuation model to calculate the fair value of stock awards. The Company elected to use the Black-Scholes-Merton pricing model to determine the fair value of stock awards on the date of grant.

NOTE B – CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise of:

	As at March 31, 2021 US$	As at March 31, 2020 US$
Balance in checking and money market accounts	**1,209,821**	496,258

The balances of the Company are held in checking accounts and money market accounts, with the banks participating in the Transaction Account Guarantee Program of Federal Deposit Insurance Corporation (FDIC). Under that program, through March 2021, all transaction accounts are fully guaranteed by the FDIC for US$ 250,000 per tax ID for balances held in checking and money market accounts.

As at March 31, 2021, the Company has US$ 959,821 [2020: US$ 246,258] as balances in excess of the federally insured amounts.

NOTE C – INVESTMENTS

Investments as at year end comprise of investment in subsidiary companies:

	As at March 31, 2021 US$	As at March 31, 2020 US$
Bristlecone India Limited	**5,141,789**	5,141,789
Bristlecone Inc.	**23,214,889**	23,214,889
Bristlecone UK Limited (net)	**–**	–
Bristlecone (Malaysia) SDN. BHD.	**129,261**	129,261
Bristlecone Consulting Ltd.	**1**	1
Bristlecone International AG.	**58,761**	58,761
Bristlecone Middle East DMCC	**13,703**	13,703
	28,558,404	28,558,404

The Company has investment of US$ 4,134,053 [2020: US$ 4,134,053] in Bristlecone UK Limited, a wholly owned subsidiary company. The accumulated losses, as at March 31, 2021, of the subsidiary on the basis of audited financial statements for the year ended March 31, 2021 are GBP 1,806,287 [2020: GBP 1,831,708].

During the previous year, considering the expected future operations of Bristlecone UK Limited, the management had created provision towards impairment of US$ 826,810.

Accordingly, the cumulative provision towards impairment of the value of investments is US$ 4,134,053 [2020: US$ 4,134,053], which represents difference between total investment value and the estimated fair value of investments in the subsidiary.

The Company has investment of US$ 13,703 in Bristlecone Middle East DMCC, a wholly owned subsidiary company. The accumulated reserves, as at March 31, 2021, of the subsidiary on the basis of audited financial statements for the year ended March 31, 2021 are AED 3,644,097 [2020: AED 965,064].

During the previous year, considering the expected future operations of Bristlecone Middle East DMCC, the management had reversed provision towards impairment of US$ 13,703.

NOTE D – INCOME

Bristlecone India Limited paid a dividend of US$ 13,67,989 [2020: NIL]. The tax on the dividend amounting to US$ 290,287, it is classified as foreign taxes under income tax expenses.

During the previous year, Bristlecone Consulting Limited had paid a dividend of US$ 751,650, the tax on the dividend amounting to US$ 187,910 is classified as foreign taxes under income tax expenses.

During the current year, the Company has earned interest income of US$ 3 [2020: US$ 3] on Money market account with Silicon Valley Bank.

NOTE E – SHORT TERM BORROWING

During the previous year, the Company had obtained an uncommitted line of credit amounting to US$ 12,250,000 from Bank of America, N.A. The terms of line of credit provided a ceiling for the total limit at US$ 12,250,000 and the amount drawn was repayable on demand. The interest rate was 3.565% p.a , which was 150 basis points over LIBOR. As at March 31, 2020, the entire amount was drawn against the said line of credit. The line of credit was unsecured and the agreement did not contain any financial covenants.

During the current year, the terms and conditions of aforesaid line of credit were amended. The revised terms of line of credit specify that the borrowings are repayable on September 30, 2021. It bears an interest rate of 1.8765% p.a. which is 150 basis points over LIBOR. As at March 31, 2021, the entire amount was drawn against the said line of credit.

During the previous year, the Company has also obtained a loan of US$ 500,000 from Bristlecone Inc., on March 27, 2020. It bears an interest rate of 3.565% p.a. and is repayable on demand with final maturity date of 9 years from the first utilisation date. The line of credit is unsecured. The agreement does not contain any financial covenants.

Interest expense for the year ended March 31, 2021 towards the line of credit was US$ 328,863 [2020: US$ 492,476] and towards the loan from Bristlecone Inc. was US$ 17,825 [2020: US$ 244].

NOTE F – STOCKHOLDERS' EQUITY

The Company's authorized share capital comprise of 9,000,000 Series A Preferred Stock at par of US$ 0.001 each, 12,000,000 Series B Preferred Stock at par of US$ 0.001 each and 37,000,000 Common Stock at par of US$ 0.001 each as at March 31, 2021 of which 8,075,526 Series A Preferred Stock, 6,920,000 Series B Preferred Stock and 10,283,860 Common Stock at par and outstanding as at March 31, 2021.

Conversion of Preferred Stock

Each Series A Preferred Stock and Series B Preferred Stock are entitled to be converted, without payment of any additional consideration, into one fully paid Common Stock.

Voting

Every member, present in person or by proxy, is entitled to one vote for each Common Stock held. Each Series A Preferred Stockholder and Series B Preferred Stockholder is entitled to votes derived based on ratio of conversion between Preferred Stock and Common Stock on the record date of the Meeting or if no record date is established, the date the poll is taken.

Liquidation

In the event of any liquidation, dissolution or winding up of the Company, holders of Series A & B Preferred Stock are entitled to an amount of one hundred and fifty percent (150%) of the original purchase price of such Stock (as adjusted for any recapitalization, stock combinations, dividends, stock splits and the like) in preference to any distribution to holders of Common Stock.

Additional Paid in Capital

Additional Paid in Capital comprises the capital contributions relating to the issue of the Company's Common Stock and Preferred Stock and amounts adjusted on accounting for the Group reorganization involving acquisition of stake in various subsidiary companies and on accounting for stock compensation.

NOTE G – STOCK COMPENSATION

Bristlecone Limited has four Stock Option Plans:

1. Bristlecone Limited 2004 Stock Option Plan (arising out of conversion of the earlier Bristlecone Inc. Existing Stock Option Plan) and Bristlecone Limited 2008 Stock Option Plan:

   Pursuant to the terms of the acquisition of Bristlecone Inc. on May 17, 2004 by Bristlecone Limited (the "transaction"), the then existing outstanding options of Bristlecone Inc., aggregating to a total of 2,058,493 options were cancelled and fresh options were issued by Bristlecone Limited under 2004 stock option plan based on the exchange criteria set out in the transaction documents.

Options granted under these plans include incentive stock options and non-statutory stock options. As per these plans, 25 per cent of the Shares subject to the Option, vest on the one (1) year anniversary of the vesting commencement date, and 1/48 of the options vest each month thereafter on the same day of the month as the vesting commencement date, subject to the grantee continuing to be an employee through each such date. The term of each Option is stated in the Option Agreement; provided, however, that the term shall be no more than 10 years from the date of grant thereof. The exercise price of each option, (a) granted to an employee who at the time of grant of such option, owns stock representing more than 10 per cent of the voting power of all classes of stock of the Company or any Parent or Subsidiary, shall be no less than 110 per cent of the Fair Market Value per Share as determined by the Board on the date of grant (b) granted to any other employee, shall be no less than 100 per cent of the Fair Market Value per Share determined by the Board on the date of grant, unless otherwise ratified by the Board.

2. Bristlecone Limited Amended and Restated 2004 Stock Option Plan and Bristlecone Limited 2005 Stock Option Plan for Bristlecone India employees:

Options granted under these plans include incentive stock options and non-statutory stock options. As per these plans, 25 cent of the Shares subject to the Option, vest on the completion of 12 calendar months from the vesting commencement date, and no vesting shall occur prior to the completion of such period of 12 months. Subsequently, 6.25 per cent of the options vest on the completion of each 3 month period thereafter until full vesting is completed, subject to the grantee continuing to be an employee through each such date. The term of each Option is stated in the Option Agreement; provided, however, that the term shall be no more than 10 years from the date of grant thereof. The exercise price of each option, (a) granted to an employee who at the time of grant of such option, owns stock representing more than 10 per cent of the voting power of all classes of stock of the Company or any Parent or Subsidiary, shall be no less than 110 per cent of the Fair Market Value per Share as determined by the Board on the date of grant (b) granted to any other employee, shall be no less than 100 per cent of the Fair Market Value per Share determined by the Board on the date of grant.

The following table summarizes information about the options issued under different Plans:

Particulars	Options outstanding Year ended March 31, 2021	Weighted average exercise price March 31, 2021	Options outstanding Year ended March 31, 2020	Weighted average exercise price March 31, 2021
Stock Option 2008 Plan				
Outstanding at April 1	**903,250**	**US$ 2.37**	1,770,042	US$ 1.24
Granted	**503,774**	**US$ 2.03**	271,500	US$ 2.87
Exercised	**101,875**	**US$ 0.17**	46,875	US$ 0.77
Expired / forfeited	**292,584**	**US$ 2.32**	1,091,417	US$ 1.66
Outstanding at March 31	**1,012,565**		903,250	
Stock Option 2004 Amended Plan				
Outstanding at April 1	–	–	–	–
Granted	–	–	–	–
Exercised	–	–	–	–
Expired / forfeited	–	–	–	–

Stock Option 2005 Plan				
Outstanding at April 1	–	–	–	–
Granted	–	–	–	–
Exercised	–	–	–	–
Expired / forfeited	–	–	–	–
Outstanding at March 31	–		–	

The Company has a total option pool of 2,109,061 options as at March 31, 2021 towards all the above options and the unallocated options against this pool as at March 31, 2021 is 1,096,496 options.

Additional information on outstanding options:

Exercise price range for the options outstanding is given below:

Grant Price	No of options outstanding	
	March 31, 2021	March 31, 2020
US$ 0.10 (2014)	**126,500**	238,375
US$ 0.77 (2015)	**59,000**	84,000
US$ 1.26 (2016)	**15,000**	15,000
US$ 1.41 (2017)	**40,000**	40,000
US$ 2.14 (2018)	**143,291**	179,000
US$ 2.38 (2019)	**75,000**	175,000
US$ 2.87 (2020)	**50,000**	171,875
US$ 2.03 (2021)	**503,774**	–

Options outstanding that have vested and are expected to vest as of the end of the year, are as follows:

	March 31, 2021			March 31, 2020		
Particulars	**Outstanding options**	**Weighted average exercise price (in US$)**	**Weighted average remaining contract term (in years)**	Outstanding options	Weighted average exercise price (in US$)	Weighted average remaining contract term (in years)
Stock Option 2008 Plan						
Vested	**419,985**	**1.29**	**4.92**	595,787	1.15	5.46
Expected to vest	**592,580**	**2.1**	**9.29**	307,463	2.5	8.53
Stock Option 2004 Amended Plan						
Vested	–	–	–	–	–	–
Stock Option 2005 Plan						
Vested	–	–	–	–	–	–

Stock compensation expense has been determined based on the fair values of the options estimated on the date of grant using the Black-Scholes model with the following assumptions:

Particulars	Year ended March 31, 2021	Year ended March 31, 2020
Dividend yield	**0 percent**	0 percent
Expected life	**6.25 years**	6.25 years
Risk free interest rate	**1.56 percent**	1.15 percent
Volatility	**53.57 percent**	33.26 percent

The Black-Scholes option-pricing model was developed for estimating fair value of traded options that have no vesting restrictions and are fully transferable. Since options pricing models require use of subjective assumptions, changes therein can materially affect fair value of the options. The options pricing models do not necessarily provide a reliable measure of fair value of the options.

Additional disclosures pertaining to compensation expense, net of costs allocated to Group entities:

The Company has recognized stock compensation expense of US$ 18,411 [2020: US$ 26,379] for the year ended March 31, 2021. The Company received an amount of US$ 16,888 [2020: US$ 36,094] for exercise of stock options in the current year.

Unrecognized compensation expense associated under the fair value method for shares expected to vest (unvested options net of expected forfeitures) as of March 31, 2021 was approximately US$ 6,240 [2020: US$ 27,522] and is expected to be recognized over a weighted average period of 0.80 years.

NOTE H – CONTINGENCIES

The Company may be subject to legal claims in the normal course of business. Management believes that there are no such claims that would be material to the financial condition or results of operations.

NOTE I – RELATED PARTY TRANSACTIONS

NOTE J - FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amount of the Company's cash equivalents, current assets and current liabilities approximated their fair values due to their short maturities.

NOTE K – RECENT ACCOUNTING PRONOUNCEMENT

New Accounting Standards yet to be adopted by the Company:

In February 2016, the FASB issued ASU 2016-02, Leases. The standard requires all leases with lease terms over twelve months to be capitalized as a right-of-use asset and lease liability on the balance sheet at the date of lease commencement. Leases will be classified as either finance or operating. This distinction will be relevant for the pattern of expense recognition in the income statement. This standard will be effective for the financial year ending March 31, 2023.

NOTE L – SUBSEQUENT EVENTS

The Company has evaluated subsequent events through May 06, 2021, the date these financial statements were available to be issued. The Company is not aware of any additional subsequent events that would require recognition or disclosure in the financial statements.

INDEPENDENT AUDITORS' REPORT

To the Members of Bristlecone India Limited

Report on the audit of the Financial statements

Opinion

We have audited the accompanying Financial Statements of **Bristlecone India Limited** ("the Company"), which comprise the Balance Sheet as at March 31, 2021, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Cash Flows and the Statement of Changes in Equity for the year then ended, and a summary of significant accounting policies and other explanatory information (herein after referred to as "the Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Financial Statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under Section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2021, its profit and total comprehensive income, its changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the Financial Statements in accordance with the Standards on Auditing specified under Section 143(10) of the Act (SAs). Our responsibilities under those Standards are further described in the 'Auditors' Responsibilities for the audit of the Financial Statements' section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India ("the ICAI") together with the ethical requirements that are relevant to our audit of the Financial Statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence obtained by us is sufficient and appropriate to provide a basis for our audit opinion on the Financial Statements.

Information other than the Financial Statements and Auditors' Report thereon

The Company's Board of Directors is responsible for the other information. The other information comprises the Directors' Report and the related annexures, but does not include the Financial Statements and our Auditors' Report thereon.

Our opinion on the Financial Statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the Financial Statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Financial Statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in Section 134(5) of the Act with respect to the preparation of these Financial Statements that give a true and fair view of the financial position, financial performance including other comprehensive income, cash flows and changes in equity of the Company in accordance with the accounting principles generally accepted in India.

This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the Financial Statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the Financial Statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those Board of Directors are also responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the Financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under Section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the Financial Statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Financial Statements, including the disclosures, and whether the Financial Statements represent the underlying transactions and events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the Financial Statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the Financial Statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the Financial Statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2016 ("the Order"), issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Act and on the basis of such checks of the books and records of the Company as we considered appropriate and according to the information and explanations given to us, we give in Annexure B, a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. As required by Section 143(3) of the Act, we report that:
   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
   c) The Balance Sheet, the Statement of Profit and Loss including Other Comprehensive Income, the Statement of Changes in Equity and the Statement of Cash Flows dealt with by this report are in agreement with the books of account.
   d) In our opinion, the aforesaid Financial Statements comply with the Accounting Standards specified under Section 133 of the Act.
   e) On the basis of the written representations received from the directors as on March 31, 2021 taken on record by the Board of Directors, none of the directors is disqualified as on March 31, 2021 from being appointed as a director in terms of Section 164(2) of the Act.
   f) With respect to the adequacy of the internal financial controls with reference to Financial Statements of the Company and the operating effectiveness of such controls, refer to our separate report in Annexure A. Our report expresses an unmodified opinion on the adequacy and operating effectiveness of the Company's internal financial controls with reference to Financial Statements.
   g) In our opinion, the managerial remuneration for the year ended March 31, 2021 has been paid / provided by the Company to its directors in accordance with the provisions of Section 197 read with Schedule V to the Act which also requires the approval of shareholders in the ensuing general meeting (Refer Note 24 to the Financial Statements). Also refer paragraph (xi) of Annexure B to the Independent Auditors' Report.

h) With respect to the other matters to be included in the Auditors' Report in accordance with the requirements of Rule 11 of the Companies (Audit and Auditors) Rules, 2014, as amended, in our opinion and to the best of our information and according to the explanations given to us:

   i. The Company has disclosed the impact of pending litigations on its financial position in its Financial Statements – Refer Note 30 to the Financials Statements;

   ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses; and

   iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.

ANNEXURE "A" TO THE INDEPENDENT AUDITORS' REPORT

[Referred to in paragraph 2(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date]

Report on the Internal Financial Controls with reference to financial statements under Clause (i) of sub-section (3) of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls with reference to financial statements of **Bristlecone India Limited** ("the Company") as of March 31, 2021 in conjunction with our audit of the Financial Statements of the Company for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business including adherence to the Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Act.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements of the Company based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting ("the Guidance Note") issued by the Institute of Chartered Accountants of India and the Standards on Auditing prescribed under Section 143(10) of the Act, to the extent applicable to an audit of internal financial controls. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to financial statements.

Meaning of Internal Financial Controls with reference to financial statements

A company's internal financial control with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorisations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to financial statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system with reference to financial statements and such internal financial controls with reference to financial statements were operating effectively as at March 31, 2021, based on the criteria for internal financial control with reference to financial statements established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

ANNEXURE “B” TO THE INDEPENDENT AUDITORS’ REPORT

[Referred to in paragraph 1 under ‘Report on Other Legal and Regulatory Requirements’ section of our report of even date]

(i) (a) According to the information and explanations given to us, the Company has maintained proper records showing full particulars, including quantitative details and situation of property, plant and equipment.

(b) The property, plant and equipment are physically verified by the Company once in two years. The physical verification of property, plant and equipment and investment properties was conducted in the previous financial year and accordingly no physical verification is required to be carried out in the current year. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its property, plant and equipment.

(c) In respect of immovable properties (building) that have been taken on lease, according to the information and explanation given to us and on the basis of our examination of records of the company, the lease agreements of immovable properties are held in the name of the Company, where the Company is the lessee in the agreements. The Company does not have any other immovable property.

(ii) The Company is in the business of rendering services and consequently, does not hold any inventory. Accordingly, the reporting under Clause 3(ii) of the Order is not applicable to the Company.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, the reporting under Clauses 3(iii)(a), 3(iii)(b) and 3(iii)(c) of the Order is not applicable to the Company.

(iv) According to the information and explanations given to us, the Company has not granted any loans or made any investments or provided any guarantees or security to the parties covered under Sections 185 and 186 of the Act. Accordingly, the reporting under Clause 3(iv) of the Order is not applicable to the Company.

(v) According to the information and explanations given to us, the Company has not accepted any deposits from the public within the meaning of Sections 73 to 76 or any other relevant provisions of the Act and the rules framed there under, where applicable. Accordingly, the reporting under Clause 3(v) of the Order is not applicable to the Company.

(vi) The Company’s operations do not involve processing or manufacturing activities. Accordingly, the reporting under Clause 3(vi) of the Order is not applicable to the Company.

(vii) (a) According to the information and explanations given to us and on the basis of our examination of records of the Company, the amounts deducted / accrued in the books of account in respect of undisputed statutory dues including Goods and Services Tax, Provident Fund, Employees’ State Insurance, Income-tax, Cess and other material statutory dues have been regularly deposited during the year by the Company with the appropriate authorities. According to the information and explanations given to us and on the basis of our examination of records of the Company, there were no undisputed statutory dues payable in respect of Sales tax, Service tax, Duty of Customs, Duty of Excise and Value Added Tax.

According to the information and explanations given to us and on the basis of our examination of records of the Company, there were no arrears of undisputed statutory dues in respect of Goods and Services Tax, Provident Fund, Employees’ State Insurance, Income-tax, Sales tax, Service tax, Duty of Customs, Duty of Excise, Value Added Tax, Cess and other material statutory dues as on the last day of the year for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us and on the basis of our examination of records of the Company, there are no statutory dues in respect of Goods and Services Tax, Sales tax, Service tax, Duty of Customs, Duty of Excise and Value Added Tax as at March 31, 2021, which have not been deposited with the appropriate authorities on account of any dispute. According to the information and explanations given to us and records of the Company examined by us, the particulars of dues of Income Tax which have not been deposited as on March 31, 2021 on account of disputes are as under:

Nature of the Statute	Nature of the dues	Amount (Rs. in lakhs)*	Period to which the amount relates	Forum where dispute is pending
The Income-tax Act, 1961	Income Tax	36.19	Assessment Year 2009-2010	Commissioner of Income Tax (Appeals)
The Income-tax Act, 1961	Income Tax	83.59	Assessment Year 2010-2011	Commissioner of Income Tax (Appeals)
The Income-tax Act, 1961	Income Tax	55.21	Assessment Year 2011-2012	Commissioner of Income Tax (Appeals)

*Net of amounts paid including under protest.

(viii) According to the information and explanations given to us, the Company has neither taken any loans or borrowings from banks, financial institutions and Government nor issued any debentures. Accordingly, the reporting under Clause 3(viii) of the Order is not applicable to the Company.

(ix) According to the information and explanations given to us, the Company has not raised any moneys by way of initial public offer, further public offer (including debt instruments) and term loans during the year. Accordingly, the reporting under Clause 3(ix) of the Order is not applicable to the Company.

(x) During the course of our examination of the books and records of the Company, carried out in accordance with the generally accepted auditing practices in India and according to the information and explanations given to us, we have neither come across any instance of material fraud by the Company or on the Company by its officers or employees, noticed or reported during the year, nor have we been informed of any such case by the management.

(xi) In our opinion, the managerial remuneration for the year ended March 31, 2021 has been paid / provided by the Company to its directors in accordance with the provisions of Section 197 read with Schedule V to the Act which also requires the approval of shareholders in the ensuing general meeting (Refer Note 24 to the Financial Statements). Also refer paragraph 2(g) of Independent Auditors' Report.

(xii) According to the information and explanations given to us, the Company is not a Nidhi company and the Nidhi Rules, 2014 are not applicable to it. Accordingly, the reporting under Clause 3(xii) of the Order is not applicable to the Company.

(xiii) In our opinion and according to the information and explanations given to us, the Company has entered into transactions with related parties in compliance with the provisions of Sections 177 and 188 of the Act. The details of such related party transactions have been disclosed in the financial statements as required by Indian Accounting Standard (Ind AS) 24, Related Party Disclosures specified under Section 133 of the Act.

(xiv) According to the information and explanations given to us, the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures during the year. Accordingly, the reporting under Clause 3(xiv) of the Order is not applicable to the Company.

(xv) In our opinion and according to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with them during the year and hence the provisions of Section 192 of the Act are not applicable to the Company. Accordingly, the reporting under Clause 3(xv) of the Order is not applicable to the Company.

(xvi) According to the information and explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, the reporting under Clause 3(xvi) of the Order is not applicable to the Company.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2021

1 Corporate information

Bristlecone India Limited is a public company domiciled in India and is incorporated under the provisions of the Companies Act applicable in India. The Company is principally engaged in Business Consulting, Software Implementation and related support activities.

The financial statements prepared herewith are the separate financial statements of the Company and the Company has elected not to present its consolidated financial statements since its ultimate parent produces consolidated financial statements that are available for public use and comply with IND AS.

2 Statement of Compliance

The financial statements have been prepared in accordance with Ind AS notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended).

3 Significant accounting policies

3.01 Basis of preparation and presentation

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 (as amended). The financial statements have been prepared on a historical cost basis. The financial statements are presented in Indian Rupees (INR or Rs.) and all values are rounded to the nearest lakhs (INR 00,000), except when otherwise indicated.

3.02 Use of estimate

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected.

Key source of estimation of uncertainty at the date of the financial statements, which may cause a material adjustment to the carrying amounts of assets and liabilities within the next financial year, is in respect of impairment of goodwill, impairment of investments and assets, useful lives of property, plant and equipment, valuation of deferred tax assets and provisions and contingent liabilities. Future results could differ due to these estimates and the differences between the actual results and the estimates are recognised in the periods in which the results are known / materialize.

Useful lives of property, plant and equipment

The Company reviews the useful life of property, plant and equipment at the end of each reporting period. This reassessment may result in change in depreciation expense in future periods.

Provisions and contingent liabilities

A provision is recognised when the Company has a present obligation as a result of past event and it is probable than an outflow of resources will be required to settle the obligation, in respect of which the reliable estimate can be made. Provisions (excluding retirement benefits and compensated absences) are not discounted to its present value and are determined based on best estimate required to settle the obligation at the balance sheet date. These are reviewed at each balance sheet date adjusted to reflect the current best estimates. Contingent liabilities are not recognised in the financial statements. A contingent asset is neither recognised nor disclosed in the financial statements.

Valuation of deferred tax assets

The Company reviews the carrying amount of deferred tax assets at the end of each reporting period. (Refer Note No. 10)

Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of Ind AS 116. Identification of a lease requires significant judgment. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option 'on lease by lease basis'. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Company revises the lease term if there is a change in the non-cancellable period of a lease. The discount rate is generally based on the incremental borrowing rate specific to the lease being evaluated or for a portfolio of leases with similar characteristics.

3.03 Revenue recognition

The Company is principally engaged in Business Consulting, Software Implementation, and related support services.

Revenue is recognised upon transfer of control of contracted products or services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those products or services.

a. Revenue from time and material contracts is recognised on output basis measured by units delivered, efforts expended, time booked etc.

b. Revenue related to fixed price maintenance and support services contracts where the Company provides services is recognised based on time elapsed mode and revenue is straight lined over the period of performance.

c. In respect of other fixed-price contracts, revenue is recognised using percentage-of-completion method ('POC method') of accounting with contract costs incurred determining the degree of completion of the performance obligation.

d. Revenue from the sale of third party software is recognised upfront at the point in time when the software is delivered to the customer.

e. Revenue from the sale of distinct third party hardware is recognised at the point in time when control is transferred to the customer.

f. Revenue from subsidiaries is recognised based on transaction price which is at arm's length.

g. Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled receivables when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

h. Unearned and deferred revenue is recognised when there is billing in excess of revenues. The billing schedules agreed with customers include periodic performance based payments and / or milestone based progress payments. Invoices are payable within contractually agreed credit period.

i. In accordance with Ind AS 37, the Company recognizes an onerous contract provision when the unavoidable costs of meeting the obligations under a contract exceed the economic benefits to be received.

j. Contracts are subject to modification to account for changes in contract specification and requirements. The Company reviews modification to contract in conjunction with the original contract, basis which the transaction price could be allocated to a new performance obligation, or transaction price of an existing obligation could undergo a change. In the event transaction price is revised for existing obligation, a cumulative adjustment is accounted for.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2021 (contd.)

k. For all instruments measured either at amortized cost or at fair value through other comprehensive income, interest income is recorded using the effective interest rate (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the gross carrying amount of the financial asset or to the amortized cost of a financial liability. When calculating the effective interest rate, the Company estimates the expected cash flows by considering all the contractual terms of the financial instrument (for example, prepayment, extension, call and similar options) but does not consider the expected credit losses. Interest income is included in finance income in the statement of profit and loss.

l. Dividend is recognised when the Company's right to receive the payment is established, it is probable that the economic benefits associated with the dividends will flow to the company and the amount of the dividend can be measured reliably.

<u>Use of significant estimates and judgments</u>

a. The Company uses judgment to determine an appropriate standalone selling price for a performance obligation. The Company allocates the transaction price to each performance obligation on the basis of the relative standalone selling price of each distinct product or service promised in the contract. Where standalone selling price is not observable, the Company uses the expected cost plus margin approach to allocate the transaction price to each distinct performance obligation.

b. Use of the percentage-of-completion method requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended. Efforts or costs expended are used to measure progress towards completion as there is a direct relationship between input and productivity.

c. The Company uses significant judgments while determining the transaction price allocated to performance obligations using the expected cost plus margin approach.

d. Provisions for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the expected contract estimates at the reporting date.

3.04 Leases

Ind AS 116 is replaced the existing leases standard, Ind AS 17 Leases. Ind AS 116 sets out the principles for the recognition, measurement, presentation and disclosure of leases for both lessees and lessors. It introduces a single, on balance sheet lessee accounting model for lessees. A lessee recognises right-of-use asset representing its right to use the underlying asset and a lease liability representing its obligation to make lease payments. The standard also contains enhanced disclosure requirements for lessees.

Ind AS 116 substantially carries forward the lessor accounting requirements in Ind AS 17. The amendment is effective for annual periods beginning on or after 01st April 19.

3.05 Foreign currencies

The functional currency of Bristlecone India Limited is Indian Rupee.

Income and expenses in foreign currencies are recorded at exchange rates prevailing on the date of the transaction. Foreign currency monetary assets and liabilities are translated at the exchange rate prevailing on the balance sheet date and exchange gains and losses arising on settlement and restatement are recognised in the statement of profit and loss.

3.06 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

3.07 Employee benefits

1. Defined Contribution Plan:

   Provident Fund: The eligible employees of the Company are entitled to receive benefits under the provident fund, a defined contribution plan, in which both employees and the Company make monthly contributions at a specified percentage of the covered employee's salary. The contributions as specified under the law are paid to the Central Government Provident Fund and the Family Pension Fund and the same is charged to the Statement of Profit and Loss of the year when the contributions to the respective funds are due and when services are rendered by the employees.

2. Defined Benefit Plan:

   For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorized as follows:

   - service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
   - net interest expense or income; and
   - remeasurement.

   (i) Gratuity: The Company has an obligation towards gratuity, a defined benefit retirement plan covering eligible employees. The plan provides for a lump sum payment to vested employees at retirement, death while in employment or on termination of employment of an amount equivalent to 15/26 days salary payable for each completed year of service. Vesting occurs upon completion of five years of service. The Company accounts for the liability for gratuity benefits payable in future based on an independent actuarial valuation.

3. Other Long Term employee benefits:

   (i) Compensated Absences: The Company provides for the encashment of compensated absences with pay subject to certain rules. The employees are entitled to accumulate compensated absences subject to certain limits, for future encashment. Accumulated leave, which is expected to be utilised within the next twelve months, is treated as short-term employee benefit and the accumulated leave expected to be carried forward beyond twelve month is treated as long-term employee benefit which are provided based on the number of days of un utilised compensated absence on the basis of an independent actuarial valuation.

3.08 Taxes

<u>Current income tax</u>

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss (either in other comprehensive

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2021 (contd.)

income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss.
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognised only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items is recognised outside profit or loss (either in other comprehensive income or in equity). Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, are recognised subsequently if new information about facts and circumstances change. Acquired deferred tax benefits recognised within the measurement period reduce goodwill related to that acquisition if they result from new information obtained about facts and circumstances existing at the acquisition date. If the carrying amount of goodwill is zero, any remaining deferred tax benefits are recognised in OCI/ capital reserve depending on the principle explained for bargain purchase gains. All other acquired tax benefits realised are recognised in profit or loss.

3.09 Property, plant and equipment

All Property, plant and equipments are stated at cost less depreciation. Costs comprise purchase price and any attributable costs of bringing the asset to its working condition for its intended use.

Depreciation on tangible fixed assets has been provided on the straight-line method as per the useful life prescribed in Schedule II to the Companies Act, 2013.

Owned Assets	Useful life
Leasehold improvement*	5 years
Right of Use Asset- Building	Lease Term
Furniture and fittings	10 years
Office equipment	5 years
Office equipment -mobile handset*	3 years
Computer and equipment	
IT equipment -server	6 years
IT equipment – non server	3 years
Vehicles	8 years

* For these class of assets, based on internal assessment the management believes that the useful lives as given above best represent the period over which management expects to use these assets. Hence the useful life for these assets is different from the useful lives as prescribed under Part C of Scheduled II of the companies Act 2013.

3.10 Intangible assets

Intangible assets are amortised on a straight line basis over their useful life of 5 years, which reflects the pattern in which the asset's economic benefits are consumed. The estimated useful life of the intangible assets and the amortisation period are reviewed at the end of each financial year and the amortisation period is revised to reflect the change in pattern if any.

3.11 Impairment

(i) Financial assets (other than at fair value)

The Company assesses at each date of balance sheet whether a financial asset or a Group of financial assets is impaired.

Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company recognises lifetime expected losses for all contract assets and all trade receivables that do not constitute a financing transaction. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

(ii) Non-financial assets

Tangible and intangible assets Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount (i.e. higher of the fair value less cost to sell and the value-in-use) is determined on an individual asset basis unless the asset does not generate cash flows that are largely independent of those from other assets. In such cases, the recoverable amount is determined for the cash generating unit (CGU) to which the asset belongs.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2021 (contd.)

If the recoverable amount of an asset (or CGU) is estimated to be less than its carrying amount, the carrying amount of the asset (or CGU) is reduced to its recoverable amount. An impairment loss is recognised in the statement of profit or loss.

3.12 Financial instruments

Financial assets and liabilities are recognised when the Company becomes a party to the contractual provisions of the instrument. Financial assets and liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value measured on initial recognition of financial asset or financial liability.

Cash and cash equivalents

The Company considers all highly liquid financial instruments, which are readily convertible into known amounts of cash that are subject to an insignificant risk of change in value and having original maturities of three months or less from the date of purchase, to be cash equivalents. Cash and cash equivalents consist of balances with banks which are unrestricted for withdrawal and usage.

Financial assets at amortised cost

Financial assets are subsequently measured at amortised cost if these financial assets are held within a business whose objective is to hold these assets in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through other comprehensive income

Financial assets are measured at fair value through other comprehensive income if these financial assets are held within a business whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at fair value through profit or loss

Financial assets are measured at fair value through profit or loss unless it is measured at amortised cost or at fair value through other comprehensive income on initial recognition. The transaction costs directly attributable to the acquisition of financial assets and liabilities at fair value through profit or loss are immediately recognised in profit or loss.

Financial liabilities

Financial liabilities are measured at amortised cost using the effective interest method.

Equity instruments

An equity instrument is a contract that evidences residual interest in the assets of the company after deducting all of its liabilities. Equity instruments recognised by the Company are recognised at the proceeds received net off direct issue cost.

Reclassification of financial assets

The Company determines classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities. For financial assets which are debt instruments, a reclassification is made only if there is a change in the business model for managing those assets. Changes to the business model are expected to be infrequent. The Company's senior management determines change in the business model as a result of external or internal changes which are significant to the company's operations. Such changes are evident to external parties. A change in the business model occurs when a company either begins or ceases to perform an activity that is significant to its operations. If the Company reclassifies financial assets, it applies the reclassification prospectively from the reclassification date which is the first day of the immediately next reporting period following the change in business model. The Company does not restate any previously recognized gains, losses (including impairment gains and losses) or interest.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the Balance Sheet if there is currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.

3.13 EPS

The Company reports basic and diluted earnings per share in accordance with Ind AS 33 on Earnings Per Share. Basic earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period. Diluted earnings per share is computed by dividing the net profit or loss for the period by the weighted average number of equity shares outstanding during the period as adjusted for the effects of all diluted potential equity shares except where the results are anti-dilutive.

3.14 Business Segments

Information reported to the chief operating decision maker (CODM) for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided. The Company is in the business of Business Consulting, Software Implementation and related support activities, which in the context of Indian Accounting Standard 108 'Segment Information' represents single reportable business segment. The accounting policies of the reportable segments are the same as the accounting policies disclosed in Note 3. The revenues, total expenses and net profit as per the Statement of profit and loss represents the revenue, total expenses and the net profit of the sole reportable segment. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance.

3.15 Cash Flow Statement

The Cash Flow Statement is prepared by the indirect method set out in Ind AS 7 on Cash Flow Statements and presents cashflows by operating, investing and financing activities of the Company.

3.16 Current versus non-current classification

The Company presents assets and liabilities in the balance sheet based on current/ non-current classification. An asset is treated as current when it is:

- Expected to be realized or intended to be sold or consumed in normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realized within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- t is expected to be settled in normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2021 (contd.)

The Company classifies all other liabilities as non-current.

Deferred tax assets and liabilities are classified as non-current assets and liabilities.

The operating cycle is the time between the acquisition of assets for processing and their realization in cash and cash equivalents.

The Company has identified twelve months as its operating cycle.

3.17 Share Capital

Ordinary shares are classified as equity. Incremental costs, if any, directly attributable to the issue of ordinary shares are recognized as a deduction from equity, net of any tax effects.

3.18 Fair value measurement

The Company measures financial instruments, such as, derivatives at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

– In the principal market for the asset or liability, or

– In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the Company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

This note summarises accounting policy for fair value. Other fair value related disclosures are given in the relevant notes.

<u>Service Tax, GST, Sales/ value added taxes paid on acquisition of assets or on incurring expenses</u>

Expenses and assets are recognised net of the amount of Service Tax, GST, sales/ value added taxes paid, except:

– When the tax incurred on a purchase of assets or services is not recoverable from the taxation authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable

– When receivables and payables are stated with the amount of tax included the net amount of tax recoverable from, or payable to, the taxation authority is included as part of receivables or payables in the balance sheet.

3.19 Derivatives & Hedging

Derivatives are initially recognised at fair value on the date a derivative contract is entered into and are subsequently re-measured to their fair value at the end of each reporting period. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged and the type of hedge relationship designated.

<u>Cash flow hedges that qualify for hedge accounting:</u>

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in the other comprehensive income in cash flow hedging reserve within equity, limited to the cumulative change in fair value of the hedged item on a present value basis from the inception of the hedge. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, within other gains/(losses).

Amounts accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss.

<u>Derivatives that are not designated as hedges:</u>

The Company enters into certain derivative contracts to hedge foreign exchange risks which are not designated as hedges as in case of such transactions, the underlying is re-stated at closing exchange rates. Such contracts are accounted for at fair value through profit or loss and are included in other gains/(losses).

3.20 Provisions

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. When the Company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

3.21 Recent Accounting Pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2021.

(i) The Company has investment of SGD 1,670,000 (Rs. 501.47 lakhs) in Bristlecone (Singapore) Pte. Ltd., a wholly owned subsidiary company. The accumulated losses as at 31 March, 2021 of the subsidiary on the basis of audited financial statements for the year ended 31 March, 2021 are SGD 669,334 (previous year SGD 1,030,979). During past few years, the subsidiary company achieved significant improvement in its business operations and earned profits which resulted in improved financial position. Considering the healthy volume of closed customer contracts, the Management of the Company believes that there is a significant improvement in the value of investment in the subsidiary company. Accordingly, the Company has reversed the provision by Rs. NIL (previous year Rs. 100.29 lakhs). However, considering the accumulated losses, the Company continues to carry provision of Rs. 100.29 lakhs (previous year Rs.100.29 lakhs) i.e. 20% of the value of investment (previous year 20% of the value of investment) as at the year ended 31 March, 2021.

(ii) Includes Rs. 248.54 Lakhs (previous year Rs. 248.54 Lakhs) invested towards capital reserve of the company in accordance with German Commercial Code.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2021 (contd.)

Note No. 28 - Financial Instruments

Capital Management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The company monitors capital on the basis of the carrying amount of equity less cash and cash equivalents as presented on the face of the statement of financial position.

The company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities.

The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk such as equity price risk and commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

Currency Risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's exposure to currency risk relates primarily to the Company's operating activities.

The Company manages its foreign currency risk by hedging transactions that are expected to occur within a maximum 12 month period for hedges of forecasted sales and purchases.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

Balances in Functional Currency (INR)

Rs. in Lakhs

Particulars	Currency	As at 31 March, 2021	As at 31 March, 2020
Trade Receivables	USD	**4,828.48**	3,639.92

Foreign Currency Sensitivity

The following tables demonstrate the sensitivity to a reasonably possible change in USD, MYR, SGD and EUR exchange rates, with all other variables held constant. The impact on the Company's profit before tax is due to changes in the fair value of monetary assets and liabilities. The Company's exposure to foreign currency changes for all other currencies is not material.

	SGD	-10%	(66.65)
	EUR	+10%	7.39
	EUR	-10%	(7.39)

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is not significantly exposed to the risk of changes in market interest rates.

Note No. 29 - Segment information

The Company is in the business of Business Consulting, Software Implementation and related support activities, which in the context of Indian Accounting Standard 108 'Segment Information' represents single reportable business segment. The accounting policies of the reportable segments are the same as the accounting policies disclosed in Note 3.

Geographic information

The company operates in 2 principal geographical areas - India (country of domicile) and outside India. The Company's revenue from external customers by location of operations and information about its non current assets by location of assets are detailed below:

Rs. in Lakhs

Particulars	Year Ended 31 March, 2021	Year Ended 31 March, 2020
Revenue from external customers		
India	**12,626.96**	15,824.86
Outside India	**21,425.94**	17,628.17
Total revenue per statement of profit or loss	**34,052.90**	33,453.03

Non-current operating assets:

Rs. in Lakhs

Particulars	As at 31 March, 2021	As at 31 March, 2020
India	**1,563.87**	1,705.29
Outside India	–	–
Total	**1,563.87**	1,705.29

Non-current assets for this purpose consist of property, plant and equipment and intangible assets and Capital work in progress.

Revenue from major services

The Company's business activity falls within a single line of services viz. Business Consulting, Software Implementation and related support activities.

Information about major customers

Included in revenues arising from sale of services & products are revenue of approx. Rs. 28,095.82 lakhs (31 March, 2020: Rs 24,673.41 lakhs) which arose from sales to the Company's top 2 customers (31 March, 2020 top 2 customers). No other customer contributed to 10% or more to the Company's revenue for both the years 2020-21 and 2019-20.

Note No. 30 - Contingent liabilities and commitments

Rs. in Lakhs

Particulars	As at 31 March, 2021	As at 31 March, 2020
Contingent liabilities		
(a) Income tax matters under litigations (including interest)	**638.45**	582.34
(b) Service tax matters under litigations (including interest)	–	–
(c) Standby Letter of Credit Issued in favour of subsidiary company	–	–
(d) Claim against Company not acknowledged as debt	**35.00**	35.00

Note: As on 31 March, 2021 the company's management does not expect any outflow in respect of these pending litigations related to tax matters stated above based on the legal advice obtained.

In a recent judgement, the Honourable Supreme Court of India opined that fixed and uniformly applicable allowances are part of basic salary for calculating provident fund contributions . Based on advise of legal counsel and in the opinion of management, there is uncertainty and lack of clarity regarding the period of applicability of the judgement. The company has paid the liability in accordance with the judement from the date of pronouncement and retrospective liability , if any, will be provided when the final legal view emerges.

Capital Commitments as at 31 March, 2021 Rs. 87.13 Lakhs (Previous Year Rs. 25.44 Lakhs).

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2021 (contd.)

Note No. 31 - Employee benefits

(a) Defined Contribution Plan

Contribution for the year to Defined Contribution Plan is recognised in the Statement of Profit and Loss included under employee benefits expense note 21. Contribution to provident and other funds as disclosed in note 22 are as under:

Particulars	**For the year ended 31 March, 2021**	For the year ended 31 March, 2020
Employer's Contribution to Provident Fund	**379.91**	356.42
Employer's Contribution to Family Pension Fund	**255.79**	224.69
Employer's Contribution to Superannuation Fund	**–**	10.38

(b) Defined Benefit Plans:

Gratuity

The Company operates a gratuity plan covering qualifying employees. The benefit payable is as per the amount calculated as per the Payment of Gratuity Act, 1972. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting.

Through its defined benefit plans the Company is exposed to a number of risks, the most significant of which are detailed below:

<u>Changes in bond yields</u>

A decrease in government bond yields will increase plan liabilities.

<u>Life expectancy</u>

The majority of the plan's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan's liabilities. This is particularly significant in the Company's defined benefit plans, where inflationary increases result in higher sensitivity to changes in life expectancy.

The significant actuarial assumptions used for the purposes of the actuarial valuations were as follows:

Particulars	**Valuation as at**	
	31 March, 2021	**31 March, 2020**
Discount rate(s)	6.30%	5.60%
Expected rate(s) of salary increase	7.00%	6.00%
Rate of Leaving Service	Age 21-44 Years- 18.2% Age 45-59 Years- 11.2%	Age 21-44 Years- 25% Age 45-59 Years- 10%
Mortality Rate	As per Indian Assured Lives Mortality (2012-14) Ult table	As per Indian Assured Lives Mortality (2012-14) Ult table

Defined benefit plans – as per actuarial valuation

Gratuity (Unfunded)

Amounts recognised in comprehensive income in respect of these defined benefit plans are as follows:

Rs. in Lakhs

Particulars	**For the Year Ended 31 March, 2021**	**For the Year Ended 31 March, 2020**
Service Cost		
Current Service Cost	**184.31**	146.28
Past service cost	**–**	–
Net interest expense	**42.51**	41.60
Components of defined benefit costs recognised in profit or loss	**226.82**	187.88
Remeasurement on the net defined benefit liability		
Actuarial gains and loss arising from changes in financial assumptions	**18.52**	47.99
Actuarial gains and loss arising from changes in demographic assumptions	**32.68**	–
Actuarial gains and loss arising form experience adjustments	**60.82**	16.69
Components of defined benefit costs recognised in other comprehensive income	**112.02**	64.68
Total	**338.84**	252.56

	Particulars	**For the Year Ended 31 March, 2021**	**For the Year Ended 31 March, 2020**
I.	**Net Liability recognised in the Balance Sheet as at 31 March**		
1.	Present value of defined benefit obligation	**1,087.08**	840.92
2.	Fair value of plan assets	**–**	–
3.	**Surplus/(Deficit)**	**1,087.08**	840.92
4.	Current portion of the above	**155.84**	163.77
5.	Non current portion of the above	**931.24**	677.15
II.	**Change in the obligation during the year ended 31 March**		
1.	Present value of defined benefit obligation at the beginning of the year	**840.92**	687.38
2.	Expenses Recognised in Profit and Loss Account		
	– Current Service Cost	**184.31**	146.28
	– Past Service Cost	**–**	–
	– Interest Expense (Income)	**42.51**	41.60
3.	Recognised in Other Comprehensive Income		
	Remeasurement gains / (losses)		
	– Actuarial Gain (Loss)	**112.02**	64.68
4.	Benefit payments	**(92.67)**	(99.03)
5.	**Present value of defined benefit obligation at the end of the year**	**1,087.08**	840.92

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH, 2021 (contd.)

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Principal Assumption	For the year ended	Changes in assumption	Impact on defined benefit obligation	
			Increase in assumption	Decrease in assumption
Discount rate	31 March, 2021	100 basis points	-5.78%	6.21%
	31 March, 2020	100 basis points	-4.80%	5.30%
Salary growth rate	31 March, 2021	100 basis points	6.46%	-5.72%
	31 March, 2020	100 basis points	5.14%	-4.81%

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice this is unlikely to occur, and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied as when calculating the defined benefit liability recognised in the Balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to previous period.

Maturity profile of defined benefit obligation:

Rs. in Lakhs

Maturity Profile	**As at 31 March, 2021**	As at 31 March, 2020
Expected benefits for Year 1	**152.56**	163.77
Expected benefits for Year 2	**157.97**	140.80
Expected benefits for Year 3	**145.05**	131.63
Expected benefits for Year 4	**131.18**	113.35
Expected benefits for Year 5	**133.01**	84.62
Expected benefits for Year 6	**105.44**	82.07
Expected benefits for Year 7	**97.64**	57.24
Expected benefits for Year 8	**82.64**	51.30
Expected benefits for Year 9	**78.24**	39.95
Expected benefits for Year 10 and above	**636.70**	303.10

The weighted average duration of the defined benefit obligation as at 31 March, 2021 is 6.10 years (31 March, 2020: 5.04 years).

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

The current service cost and the net interest expense for the year are included in the employee benefits expense in Profit or Loss.

(c) Compensated Absences:

Compensated absences charged to Statement of Profit and Loss Rs. 115.30 lakhs (previous year Rs.135.15 lakhs) and liability as at 31 March, 2021 Rs. 674.65 lakhs (As at 31 March, 2020 Rs. 608.84 lakhs)

The CSR committee has identified, various long term projects. The Company has spent Rs.76.40 lakhs on CSR activities during the year ended March 31, 2021. (Rs.68.26 lakhs for the year ended March 31, 2020).

(e) Impact of COVID 19:

The Company has considered internal and external information upto the date of approval of these financial statements including credit reports and economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on the current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets. The Company has also evaluated the cash flows for the forthcoming Financial Year and based on the projected cash flows for the next twelve months, the management is of the view that the use of going concern assumption in preparing these financial statements is appropriate.

The impact of the global health pandemic may be different from that estimated as at the date of approval of these financial statements and the Company will continue to closely monitor any material changes to future economic conditions.

(e) Previous Year Groupings

Previous Year's figures have been regrouped / rearranged wherever necessary in order to confirm to current year's groupings and classifications.

INDEPENDENT AUDITOR'S REPORT

To the Board of Directors and Shareholders of
Bristlecone Consulting Limited

Opinion

1. We have audited the accompanying financial statements of Bristlecone Consulting Limited ('the Company') (a wholly owned subsidiary of Bristlecone Limited), which comprise of Balance Sheet as at March 31, 2021, the Statement of Operations, Statement of Changes in Equity and Statement of Cash Flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2021, and of its financial performance and cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

3. We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ('IESBA Code') together with the ethical requirements that are relevant to our audit of the financial statements in India and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the Financial Statements and Auditor's Report thereon

4. Management is responsible for the other information. Other information does not include the financial statements and our auditor's report thereon.

   Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

   In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

   If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. Reporting under this section is not applicable as no other information is obtained at the date of this auditor's report.

Responsibilities of Management for the Financial Statements

5. Management is responsible for the preparation of these financial statements that give a true and fair view in accordance with accounting principles generally accepted in the United States of America, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

6. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

7. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

8. As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

9. We communicate with management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

NOTES FORMING PART OF FINANCIAL STATEMENTS

NOTE A – BACKGROUND INFORMATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. NATURE OF OPERATIONS

Bristlecone Consulting Limited (the "Company") is engaged in providing technology solutions and consulting services, with operations and customers primarily in North America and Canada. The Company's primary focus is on providing supply chain services ranging from supply chain strategy and network design to supply chain system implementations. The Company also provides application outsourcing services, data management services and development and integration services to independent software vendors.

2. GENERAL INFORMATION

The Company was incorporated under the laws of Canada on June 1, 2010. The Company is a wholly-owned subsidiary of Bristlecone Limited, a Cayman Islands Company. Mahindra & Mahindra Limited, an Indian Company is the Company's ultimate parent.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies applied in the preparation of the accompanying financial statements is as follows:

3.1. OVERALL CONSIDERATIONS

The accompanying financial statements have been prepared on a going concern basis under the historical cost convention and on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

These financial statements have been presented in Canadian Dollars ('CAD$'), which is the functional and reporting currency of the Company. Also refer note 'F' regarding convenience translation of CAD$ figures to Indian Rupees (INR) in the financial statements.

3.2. USE OF ESTIMATES

In preparing the Company's financial statements in conformity with accounting principles generally accepted in the United States of America, the Company's management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of current events and actions, actual results may ultimately differ from those estimates. The management's estimates for allowances for uncollectable amounts, efforts to completion for fixed price projects and provision for variable pay represent certain of these particularly sensitive estimates.

3.3. FOREIGN CURRENCY TRANSACTIONS AND TRANSLATIONS

Transactions in foreign currencies are translated at the rate of exchange prevailing on the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at the rate of exchange prevailing at the balance sheet date. All foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities at year-end are recorded in the statement of operations.

3.4. CASH AND CASH EQUIVALENTS

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Cash equivalents are readily convertible into known amounts of cash and are subject to an insignificant risk of changes in value. Cash comprises balance held with banks.

3.5. ACCOUNTS RECEIVABLE

Accounts receivable that management has the intent and ability to hold for the foreseeable future, or until maturity or payoff, are reported in the balance sheets at outstanding amount less any charge-offs and the allowance for doubtful accounts. The Company performs ongoing credit evaluations of its customers, and generally extends credit without requiring collateral. The Company maintains an allowance for doubtful accounts based on management's expectations of future losses, which is determined based on historical experience and current economic environment.

Accounts are charged to bad debt expense when they are deemed uncollectible based upon management's periodic review of the accounts.

3.6. REVENUE RECOGNITION

The Company is principally engaged in Business Consulting, Software Implementation and related support services.

Effective April 1, 2019, the Company has adopted new standard "Revenue from Contracts with Customers" ("ASC 606"). ASC 606 supersedes the revenue recognition requirements in ASC Topic 605, "Revenue Recognition" ("ASC 605") and nearly all other existing revenue recognition guidance under US GAAP. The core principle of ASC 606 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. The Company has adopted ASC 606 using the full retrospective method. The effect of initially applying this standard is recognised at the date of initial application (i.e. April 1, 2018). The standard is applied retrospectively only to contracts that are not completed as at the date of initial application.

Revenue is recognised upon transfer of control of contracted products or services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those products or services.

Revenues with respect to time and material contracts are recognized on input method basis i.e. based on time /efforts spent.

Revenue related to fixed price maintenance and support services contracts where the Company provides services is recognised based on time elapsed mode and revenue is straight lined over the period of performance.

In respect of other fixed-price contracts, revenue is recognised using percentage-of-completion method ('POC method') of accounting with contract costs incurred determining the degree of completion of the performance obligation.

Revenue from the sale of third- party software is recognised upfront at the point in time when the software is delivered to the customer.

Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled receivables when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.

Unearned and deferred revenue is recognised when there is billing in excess of revenues. The billing schedules agreed with customers include periodic performance -based payments and / or milestone-based progress payments. Invoices are payable within contractually agreed credit period.

Contracts are subject to modification to account for changes in contract specification and requirements. The Company reviews modification to contract in conjunction with the original contract, basis which the transaction price could be allocated to a new performance obligation, or transaction price of an existing obligation could undergo a change. In the event transaction price is revised for existing obligation, a cumulative adjustment is accounted for.

Use of significant estimates and judgments

The Company uses the expected cost- plus margin approach to allocate the transaction price to each distinct performance obligation.

Use of the percentage-of-completion method requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended. Efforts or costs expended are used to measure progress towards completion as there is a direct relationship between input and productivity.

The Company uses significant judgments while determining the transaction price allocated to performance obligations using the expected cost-plus margin approach.

Notes to Financial Statements

Provisions for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the expected contract estimates at the reporting date.

Disaggregation of Revenue

The Company disaggregates revenue from contracts with customers by contract-type, as it believes it best depicts how the nature, amount, timing and uncertainty of revenue and cash flows are affected by industry, market and other economic factors.

The Company's revenue by type of contract is as follows:

Type of contract	**Year ended March 31, 2021**		Year ended March 31, 2020	
	CAD$	**INR**	CAD$	INR
Time and materials	**181,280**	**10,519,678**	682,003	39,576,634
Fixed-price	**3,987**	**231,366**	230,738	13,389,726
Total	**185,267**	**10,751,044**	912,741	52,966,360

3.7. COST OF REVENUES

Cost of revenues comprises salaries and employee benefits, sub-contractor fees, off-shore consultancy charges, project related travel and other costs.

3.8. INCOME TAXES

The Company accounts for income taxes and the related accounts in accordance with ASC 740, "Income Taxes." Deferred income tax assets and liabilities, if any, are computed annually, for differences between financial statements' base and tax base of assets and liabilities that will result in taxable or deductible amounts in the future based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Deferred tax assets are reduced by valuation allowances when, in the opinion of the management, it is more likely than not that some portion or the entire deferred tax assets will not be realised. Valuation allowance is reversed when new evidence is available on future realisation of deferred tax assets. Tax expense comprises of tax payable or refundable for the period plus or minus the changes during the period in deferred tax assets and liabilities.

NOTE B – CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise of:

Particulars	**As at March 31, 2021 CAD$**	**As at March 31, 2021 INR (refer Note F)**	As at March 31, 2020 CAD$	As at March 31, 2020 INR (refer Note F)
Bank balances	**407,550**	**23,650,127**	668,413	38,788,006

Cash balances of the Company are held in checking accounts, which are non-interest bearing, and as per the Canada Deposit Insurance Corporation Act, all non-interest bearing transaction accounts are guaranteed by the CDIC for CAD$ 100,000 per depositor for Bank of Nova Scotia.

As at March 31, 2021, the Company has CAD$ 307,550 (INR17,847,134) [2020 CAD$ 568,413 (INR32,985,023)] as balances in excess of the insured amount.

NOTE C – INCOME TAXES

Income tax expense/(refund) for the year comprise of the following:

Particulars	**Year ended March 31, 2021 CAD$**	**Year ended March 31, 2021 INR (refer Note F)**	Year ended March 31, 2020 CAD$	Year ended March 31, 2020 INR (refer Note F)
Income tax expense/(refund)	**(51,709)**	**(3,000,673)**	73,024	4,237,583
Total	**(51,709)**	**(3,000,673)**	73,024	4,237,583

NOTE D – RELATED PARTY TRANSACTIONS

1. List of related parties and their relationships (where there are transactions):

Name of related party	**Relationship**
Bristlecone Limited	Holding Company
Bristlecone India Limited	Fellow Subsidiary
Bristlecone Inc.	Fellow Subsidiary

2. Related party transactions and balances:

Notes to Financial Statements

Nature of transaction/ balance	Name of related party	March 31, 2021		March 31, 2020	
		Amount (in CAD$)	Amount (in INR) (refer Note F)	Amount (in CAD$)	Amount (in INR) (refer Note F)
Reimbursement of expenses from	Bristlecone Inc	–	–	3,511	203,743
Amount payable as at year end	Bristlecone Inc	664	38,532	20,154	1,169,537
Amount receivable as at year end	Bristlecone Inc	123,979	7,194,501	80,963	4,698,283

NOTE E – FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amount of the Company's cash equivalents, account receivables, other current assets, accounts payable and accrued expenses approximated their fair values due to their short maturities.

NOTE F – CONVENIENCE TRANSLATION

For the convenience of the readers, the financial statements for the year ended March 31, 2021 along with comparatives for the year ended March 31, 2020 have been translated into Indian Rupees ("INR") at the rate of 1 CAD$ = 58.03 INR. The convenience translation should not be construed as a representation that the CAD$ amounts or the Indian Rupee amounts referred to in these financial statements have been, could have been, or could in the future be, converted into INR or CAD$, as the case may be, at this or at any other rate of exchange, or at all.

NOTE G – STOCKHOLDERS' EQUITY

The Company's authorized stock comprised of unlimited number of common shares without nominal or par value, out of which 1 common share was issued and outstanding as at March 31, 2021 and March 31, 2020 which is held entirely by the Holding Company, Bristlecone Limited.

NOTE H – CONTINGENCIES

The Company evaluates contingencies as per its assessments of probable, reasonably possible and remote, as per ASC 450 "Contingencies". It is subject to legal claims in the normal course of business. However, based on its evaluation, management believes that there are no claims or contingencies, potential outcomes of which could be material to the financial condition or results of operations of the Company.

NOTE I – RECENT ACCOUNTING PRONOUNCEMENT

New Accounting Standards yet to be adopted by the Company

In February 2016, the FASB issued ASU 2016-02, Leases. The standard requires all leases with lease terms over twelve months to be capitalized as a right-of-use asset and lease liability on the balance sheet at the date of lease commencement. Leases will be classified as either finance or operating. This distinction will be relevant for the pattern of expense recognition in the income statement. This standard will be effective for the financial year ending March 31, 2023.

NOTE J – ESTIMATION UNCERTAINITY RELATING TO GLOBAL HEALTH PANDEMIC ON COVID-19

In assessing the recoverability of receivables including unbilled receivables, the Company has considered internal and external information up to the date of these financial statements including credit reports and economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on the current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets. The impact of the global health pandemic may be different from the estimated as at the date of these financial statements and the Company will closely monitor any material changes to future economic conditions and respond accordingly.

NOTE K SUBSEQUENT EVENTS

In accordance with ASC 855-10 "Subsequent events", the Company has evaluated subsequent events through April 29, 2021, the date these financial statements were available to be issued. The Company is not aware of any additional subsequent events that would require recognition or disclosure in the financial statements.

Independent Auditors' Report to the Members of Bristlecone (Malaysia) Sdn. Bhd.

Report on Audit of the Financial Statements

Opinion

We have audited the financial statements of Bristlecone (Malaysia) Sdn. Bhd., which comprise the statement of financial position as at 31 March 2021, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages herein.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 March 2021, and of its financial performance and its cash flows for the year then ended in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

Basis for Opinion

We conducted our audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing. Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence and Other Ethical Responsibilities

We are independent of the Company in accordance with the *By-Laws (on Professional Ethics, Conduct and Practice)* of the Malaysian Institute of Accountants ("By-Laws") and the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* ("IESBA Code"), and we have fulfilled our other ethical responsibilities in accordance with the By-Laws and the IESBA Code.

Information Other than the Financial Statements and Auditors' Report Thereon

The Directors of the Company are responsible for the other information. The other information comprises the Directors' Report but does not include the financial statements of the Company and our auditors' report thereon.

Our opinion on the financial statements of the Company does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements of the Company, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements of the Company or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Directors for the Financial Statements

The Directors of the Company are responsible for the preparation of financial statements of the Company that give a true and fair view in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia. The Directors are also responsible for such internal control as the Directors determine is necessary to enable the preparation of financial statements of the Company that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements of the Company, the Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements of the Company as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with approved standards on auditing in Malaysia and International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with approved standards on auditing in Malaysia and International Standards on Auditing, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements of the Company, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- Conclude on the appropriateness of the Directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements of the Company or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements of the Company, including the disclosures, and whether the financial statements of the Company represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other Matters

This report is made solely to the Members of the Company, as a body, in accordance with Section 266 of the Companies Act 2016 in Malaysia and for no other purpose. We do not assume responsibility to any other person for the content of this report.

Notes to the Financial Statements for the year ended 31 March 2021

1. Corporate information

The Company is a private limited company, incorporated and domiciled in Malaysia.

The registered office of the Company is located at Unit 30-01, Level 30, Tower A, Vertical Business Suite, Avenue 3, Bangsar South, No. 8, Jalan Kerinchi, 59200 Kuala Lumpur.

The principal place of business of the Company is located at Suite 8.01, Level 8, Menara Binjai, No. 2 Jalan Binjai, 50450 Kuala Lumpur, Malaysia.

The principal activities of the Company are to act as information technology service advisors, business consultants and implementers of computerised systems and to render a full range of information technology services including application and programming services, computer networks and other forms of computer and electronic technology services, administration and management control, technical, scientific and operational assistance, systems design, project management and technical training of personnel, management of a computer and electronic service facility and generally, any type of business or activity relating to the information technology and electronic industry and to provide support and training in connection therein.

The Directors regard Bristlecone Limited, a corporation incorporated in Cayman Island, as the immediate holding corporation, Mahindra Holding Limited, a corporation incorporated in India, as the penultimate holding corporation and Mahindra & Mahindra Ltd., a corporation incorporated in India, as the ultimate holding corporation.

There were no employees in the Company at the end of the current and previous financial years.

The financial statements were authorised for issue by the Board of Directors in accordance with a resolution of the Directors dated 16 April 2021.

2. Basis of preparation of the financial statements

The financial statements have been prepared in accordance with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia.

The financial statements of the Company have been prepared under the historical cost convention, unless otherwise indicated in the summary of significant accounting policies (Note 3).

The preparation of financial statements in conformity with Malaysian Financial Reporting Standards, International Financial Reporting Standards and the requirements of the Companies Act 2016 in Malaysia requires the Directors to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. Actual results could differ from those estimates.

The financial statements are presented in Ringgit Malaysia (RM).

3. Significant accounting policies

All significant accounting policies set out below are consistent with those applied in the previous financial year, except as disclosed in Note 4.

(a) Cash and cash equivalents

Cash and cash equivalents comprise cash in hand, bank balances, fixed deposits and other short term highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in fair value.

(b) Equity instruments

Ordinary shares are classified as equity instruments. Dividends on ordinary shares are recognised in equity in the period in which they are declared.

(c) Provision for liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, and it is probable that an outflow of economic resources will be required to settle the obligation and the amount of the obligation can be estimated reliably.

Provisions are reviewed at each financial year end and adjusted to reflect the current best estimate. If it is no longer probable that an outflow of economic resources will be required to settle the obligation, the provision is reversed. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as finance cost.

(d) Revenue recognition

The Company recognise revenue from contracts with customers for the sale of goods and provision of services based on the five-step model as set out below:

i Identify contract(s) with a customer. A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria that must be met.

ii Identify performance obligations in the contract. A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer.

iii Determine the transaction price. The transaction price is the amount of consideration to which the Company expect to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties.

iv Allocate the transaction price to the performance obligations in the contract. For a contract that has more than one performance obligation, the Company allocate the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the Company expect to be entitled in exchange for satisfying each performance obligation.

v Recognise revenue when (or as) the Company satisfy a performance obligation.

The Company satisfy a performance obligation and recognise revenue over time if the Company's performance:

i Do not create an asset with an alternative use to the Company and have an enforceable right to payment for performance completed to-date; or

ii Create or enhance an asset that the customer controls as the asset is created or enhanced; or

iii Provide benefits that the customer simultaneously receives and consumes as the Company perform.

For performance obligations where any one of the above conditions is not met, revenue is recognised at the point in time at which the performance obligation is satisfied.

When the Company satisfy a performance obligation by delivering the promised goods or services, it creates a contract based asset on the amount of consideration earned by the performance. Where the amount of consideration received from a customer exceeds the amount of revenue recognised, this gives rise to a contract liability.

Revenue is measured at the fair value of consideration received or receivable. The following describes the performance obligations in contracts with customers:

i Revenue from contracts with customers

a. Sale of goods/services

Revenue from contracts with customers is recognised by reference to each distinct performance obligation promised in the contract with customer when or as the Company transfers controls of the goods or services promised in a contract and the customer obtains control of the goods and services. Revenue from contracts with customers is measured at its transaction price, being the amount of consideration to which the Company expects to be entitled in exchange for transferring promised goods or services to a customer, net of indirect taxes, returns, rebates and discounts. The transaction price is allocated to each distinct good or service promised in the contract. Depending on the terms of the contract, revenue is recognised when the performance obligation is satisfied, which may be at a point in time or over time.

ii Other income

a. Interest income

Interest income is recognised on an accrual basis (taking into account the effective yield on the asset) unless its collectability is in doubt.

(e) Income tax

Income tax on the profit or loss for the year comprises current and deferred tax. Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the financial year end.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

Deferred tax is provided for, using the liability method on temporary differences at the financial year end between the tax bases of assets and liabilities and their carrying amounts in the financial statements. In principle, deferred tax liabilities are recognised for all taxable temporary differences and deferred tax assets are recognised for all deductible temporary differences, unused tax losses and unused tax credits, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, unused tax losses and unused tax credits can be utilised. Deferred tax is not recognised if the temporary difference arises from goodwill or negative goodwill or from the initial recognition of an asset or liability in a transaction which is not a business combination, and at the time of the transaction, affects neither accounting profit or loss nor taxable profit or loss.

The carrying amount of deferred tax assets are reviewed at each financial year end and reduced to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be utilised.

Unrecognised deferred tax assets are reassessed at each financial year end and are recognised to the extent that it has become probable that future taxable profit will allow the deferred tax assets to be utilised.

Deferred tax is measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the financial year end.

Deferred tax is recognised in profit or loss, except when it arises from a transaction which is recognised directly in equity, in which case the deferred tax is also charged or credited directly in equity.

Deferred tax assets and deferred tax liabilities are offset, if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

(f) Impairment of non-financial assets

The Company assess at each financial year end whether there is an indication that an asset may be impaired. If any such indication exists, or when an annual impairment assessment for an asset is required, the Company make an estimate of the asset's recoverable amount.

For goodwill, the recoverable amount is estimated at each financial year end or more frequently when indicators of impairment are identified.

An asset's recoverable amount is the higher of an asset's fair value less costs to sell and its value-in-use. For the purpose of assessing impairment, assets are Companyed at the lowest levels for which there are separately identifiable cash flows (i.e. CGUs). In assessing value-in-use, the estimated future cash flows expected to be generated by the asset are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Where the carrying amount of an asset exceeds its recoverable amount, the asset is written down to its recoverable amount. Impairment losses recognised in respect of a CGU or Companys of CGUs are allocated first to reduce the carrying amount of any goodwill allocated to those units or Companys of units and then, to reduce the carrying amount of the other assets in the unit or Companys of units on a pro-rata basis.

Impairment losses are recognised in profit or loss except for assets that were previously revalued where the revaluation was taken to other comprehensive income. In this case, the impairment loss is also recognised in other comprehensive income up to the amount of any previous revaluation.

An assessment is made at each financial year end as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. A previously recognised impairment loss for an asset, other than goodwill, is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised, in which case, the carrying amount of the asset is increased to its revised recoverable amount. The increase cannot exceed the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised previously. Such reversal is recognised in profit or loss unless the asset is measured at revalued amount, in which case the reversal is treated as a revaluation increase. Impairment loss on goodwill is not reversed in a subsequent period.

(g) Foreign currency

i Functional and presentation currency

The financial statements of the Company are measured using the currency of the primary economic environment in which the entity operates ("the functional currency").

ii Foreign currency transactions

In preparing the financial statements of the Company, transactions in currencies other than the Company's reporting currency (foreign currencies) are recorded in the functional currencies using the exchange rates prevailing at the date of the transactions. At each financial period end, monetary items denominated in foreign currencies are translated at the rates prevailing at financial period end. Non-monetary items carried at fair value that are denominated in foreign currencies are translated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not translated.

Exchange differences arising on the settlement of monetary items, and on the translation of monetary items, are included in the profit or loss for the period.

Exchange differences arising on the translation of non-monetary items carried at fair value are included in profit or loss for the period except for the differences arising on the translation of non-monetary items in respect of which gains and losses are recognised directly in equity. Exchange differences arising from such non-monetary items are also recognised directly in equity.

The principal closing rates used in translation of foreign currency amounts are as follows:

	2021 RM	2020 RM
1 United States Dollar (USD)	**4.15**	4.30

(h) Financial instruments

Financial instruments carried on the statement of financial position include cash and bank balances, deposits with financial institutions, receivables, payables and borrowings. The recognition methods adopted are disclosed in the respective accounting policy statements.

Financial instruments are classified as assets, liabilities or equity in accordance with the substance of the contractual arrangement. Interests, dividends and gains and losses relating to a financial instrument classified as assets or liabilities, are reported as expense or income. Distributions to holders of financial instruments classified as equity are recognised directly in equity. Financial instruments are offset when the Company has a legally enforceable right to offset and intends to settle either on a net basis or to realise the asset and settle the liability simultaneously.

Financial assets

Financial assets are recognised in the statements of financial position when, and only when, the Company become a party to the contractual provisions of the financial instrument.

When financial assets are initially recognised, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss ("FVTPL"), directly attributable transaction costs.

The Company determine the classification of financial assets upon initial recognition. The measurement for each classification of financial assets are as below:

i Financial assets measured at amortised cost

Financial assets that are debt instruments are measured at amortised cost if they are held within a business model whose objective is to collect contractual cash flows and have contractual terms which give rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets are measured at amortised cost using the effective interest method. Gains and losses are recognised in profit or loss through the amortisation process and when the financial assets are impaired or derecognised.

ii Financial assets measured subsequently at fair value

Financial assets that are debt instruments are measured at fair value through other comprehensive income ("FVTOCI") if they are held within a business model whose objectives are to collect contractual cash flows and selling the financial assets, and have contractual terms which give rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Subsequent to initial recognition, financial assets that are debt instruments are measured at fair value. Any gains or losses arising from the changes in fair value are recognised in other comprehensive income, except for impairment losses, exchange differences and interest income which are recognised in profit or loss. The cumulative gain or loss previously recognised in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment when the financial asset is derecognised.

Financial assets that are debt instruments which do not satisfy the requirements to be measured at amortised cost or FVTOCI are measured at FVTPL.

Equity instruments are classified as financial assets measured at FVTPL if they are held for trading or are designated as such upon initial recognition. Equity instruments are classified as held for trading if they are acquired principally for sale in the near term or are derivatives that do not meet the hedge accounting criteria (including separated embedded derivatives).

Subsequent to initial recognition, financial assets that are equity instruments are measured at fair value. Any gains or losses arising from the changes in fair value are recognised in other comprehensive income and are not subsequently transferred to profit or loss. Dividends on equity instruments are recognised in profit or loss when the Company's or the Company's right to receive payment is established.

A financial asset is derecognised when the contractual right to receive cash flows from the asset has expired. On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received and any cumulative gain or loss that had been recognised in other comprehensive income is recognised in profit or loss.

Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace concerned. All regular way purchases and sales of financial assets are recognised or derecognised on the settlement date, i.e. the date that the asset is delivered to or by the Company.

Financial liabilities

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definition of a financial liability.

Financial liabilities are recognised in the statements of financial position when, and only when, the Company become a party to the contractual provisions of the financial instruments. Financial liabilities are classified as either financial liabilities at FVTPL or other financial liabilities.

i Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL.

Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term. This includes derivatives entered into by the Company that do not meet the hedge accounting criteria. Derivative liabilities are initially measured at fair value and subsequently stated at fair value, with any resultant gains or losses recognised in profit or loss. Net gains or losses on derivatives include exchange differences.

ii Other financial liabilities

Other financial liabilities are recognised initially at fair value plus directly attributable transaction costs and subsequently measured at amortised cost using the effective interest method.

For other financial liabilities, gains and losses are recognised in profit or loss when the liabilities are derecognised, and through the amortisation process.

A financial liability is derecognised when the obligation under the liability is extinguished.

When an existing financial liability is replaced by another instrument from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amount is recognised in profit or loss.

(i) Impairment of financial assets

At each financial year end, the Company assess whether there has been a significant increase in credit risk for financial assets by comparing the risk of default occurring as at the financial year end with the risk of default since initial recognition.

In determining whether credit risk on a financial asset has increased significantly since initial recognition, the Company use external credit rating and other supportive information to assess deterioration in credit quality of a financial asset. The Company assess whether the credit risk on a financial asset has increased significantly on an individual or collective basis. For collective basis evaluation, financial assets are Companyed on the basis of similar risk characteristics.

The Company considers past loss experience and observable data such as current changes and future forecasts in economic conditions to estimate the amount of expected impairment loss. The methodology and assumptions including any forecasts of future economic conditions are reviewed regularly.

The amount of impairment loss is measured as the probability-weighted present value of all cash shortfalls over the expected life of the financial asset discounted at its original effective interest rate. The cash shortfall is the difference between all contractual cashflows that are due to the Company and all the cash flows that the Company expect to receive.

The Company measure the allowance for impairment loss on trade and other receivables based on the two-step approach as follows:

Financial liabilities at FVTPL

i 12-months expected credit loss

For a financial asset for which there is no significant increase in credit risk since initial recognition, the Company measure the allowance for impairment loss for that financial asset at an amount based on the probability of default occuring within the next 12 months considering the loss given default of that financial asset.

ii Lifetime expected credit loss

For a financial asset for which there is a significant increase in credit risk since initial recognition, a lifetime expected credit loss for that financial asset is recognised as the allowance for impairment loss by the Company. If, in a subsequent period the significant increase in credit risk since initial recognition is no longer evident, the Company revert the allowance for impairment loss measurement from lifetime expected credit loss to 12-months expected credit loss.

For trade and other receivables which are financial assets, the Company apply the simplified approach in accordance with MFRS 9 Financial Instruments and measure the allowance for impairment loss based on a 12-months expected credit loss from initial recognition.

The carrying amount of the financial asset is reduced through the use of an allowance for impairment loss account and the amount of impairment loss is recognised in profit or loss. When a financial asset becomes uncollectible, it is written off against the allowance for impairment loss account.

(j) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Company.

The fair value of an asset or a liability is measured using the assumptions that market participants act in their economic best interest when pricing the asset or liability.

The Company use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy based on the lowest level input that is significant to the fair value measurement as a whole.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Company determine whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the financial year end.

(k) Leases

The Company assesses whether a contract is or contains a lease, at inception of the contract. The Company recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets (such as tablets and personal computers, small items of office furniture and telephones). For these leases, the Company recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the Company uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise fixed lease payments (including in-substance fixed payments), less any lease incentives receivable.

The lease liability is presented as a separate line in the statements of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest methods and by reducing the carrying amount to reflect the lease payments made.

The Company remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- The lease term has changed or there is a significant event or change in circumstances resulting in a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- The lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using an unchanged discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- A lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured based on the lease term of the modified lease by discounting the revised lease payments using a revised discount rate at the effective date of the modification.

The Company did not make any such adjustments during the financial year.

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day, less any lease incentives received and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the Company incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under MFRS 137. To the extent that the costs relate to a right-of-use asset, the costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the Company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The right-of-use assets are presented as a separate line in the statement of financial position.

The Company applies MFRS 136 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, plant and Equipment' policy.

(l) Employee benefits

i Short term benefits

Wages, salaries, bonuses and social security contributions are recognised as an expense in the year in which the associated services are rendered by employees of the Company. Short term accumulating compensated absences such as paid annual leave are recognised when services are rendered by employees that increase their entitlement to future compensated absences, and short term non-accumulating compensated absences such as sick leave are recognised when the absences occur.

ii Defined contribution plan

Defined contribution plans are post-employment benefit plans under which the Company pays fixed contributions into separate entities or funds and will have no legal or construction obligation to pay further contributions if any of the funds do not hold sufficient assets to pay all employee benefits relating to employee services in the current and preceding financial years.

As required by law, the Company makes contributions to the statutory provident fund, the Employees Provident Fund. Such contributions are recognised as an expense in profit or loss in the period as incurred.

Termination benefits

Termination benefits are payable when employment is terminated before the normal retirement date or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Company recognises termination benefits as a liability and an expense when it is demonstrably committed to either terminate the employment of current employees according to a detailed plan without possibility of withdrawal or providing termination benefits as a result of an offer made to encourage voluntary redundancy. In the case of an offer made to encourage voluntary redundancy, the measurement of termination benefits is based on the number of employees expected to accept the offer. Benefits falling due more than twelve months after the financial year end are discounted to present value.

(m) Related parties

Parties are considered to be related to the Company if the Company has the ability, directly or indirectly, to control the party or exercise significant influence over the party in making financial and operating decisions, or vice versa, or where the Company and the party are subject to common control or common significant influence. Related parties may be individual or other entities.

Key management personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of the Company either directly or indirectly.

4. Adoption of new and revised Malaysian Financial Reporting Standards and interpretations

(a) MFRSs that have been issued and effective

The following new and revised MFRSs issued by MASB, have been adopted, and the adoptions do not have any or significant impact to the financial statements:

Title		**Effective Date**
Amendments to MFRS 3:	Business Combinations	1 January 2020
Amendments to MFRS 7:	Financial Instruments: Disclosures	1 January 2020
Amendments to MFRS 9:	Financial Instruments	1 January 2020
Amendments to MFRS 101:	Presentation of Financial Statements	1 January 2020
Amendments to MFRS 108:	Accounting Policies, Changes in Accounting Estimates and Errors	1 January 2020
Amendments to MFRS 139:	Financial Instruments: Recognition and Measurement	1 January 2020
Amendments to MFRS 4:	Insurance Contracts	17 August 2020
Amendments to MFRS 101:	Presentation of Financial Statements	17 August 2020

(b) MFRSs that have been issued but only effective for financial period beginning on 1 April 2021 and onwards

The following new and revised MFRSs issued by MASB, have not been adopted, and the adoptions are not expected to have any or significant impact to the financial statements:

Title		**Effective Date**
Amendments to MFRS 16:	Leases	1 June 2020
Amendments to MFRS 4:	Insurance Contracts	1 January 2021
Amendments to MFRS 7:	Financial Instruments: Disclosures	1 January 2021
Amendments to MFRS 9:	Financial Instruments	1 January 2021
Amendments to MFRS 16:	Leases	1 January 2021
Amendments to MFRS 139:	Financial Instruments: Recognition and Measurement	1 January 2021
Amendments to MFRS 16:	Leases	1 April 2021
Amendments to MFRS 1:	First-time Adoption of Malaysian Financial Reporting Standards	1 January 2022
Amendments to MFRS 3:	Business Combinations	1 January 2022
Amendments to MFRS 9:	Financial Instruments	1 January 2022
Amendments to MFRS 116:	Property, Plant and Equipment	1 January 2022
Amendments to MFRS 137:	Provisions, Contingent Liabilities and Contingent Assets	1 January 2022
Amendments to MFRS 141:	Agriculture	1 January 2022
MFRS 17:	Insurance Contracts	1 January 2023
Amendments to MFRS 101:	Presentation of Financial Statements	1 January 2023
Amendments to MFRS 108:	Accounting Policies, Changes in Accounting Estimates and Errors	1 January 2023
Amendments to MFRS 10:	Consolidated Financial Statement	Deferred
Amendments to MFRS 128:	Investments in Associates and Joint Ventures	Deferred

5. Significant accounting estimates

Key Sources of Estimation Uncertainty

The preparation of financial statements in accordance with MFRSs requires the use of certain accounting estimates and exercise of judgement. Estimates and judgements are continually evaluated and are based on past experience, reasonable expectations of future events and other factors.

The key assumptions concerning the future and other key sources of estimation uncertainty at the financial year end that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(a) Loss allowances for financial assets

The Company recognises impairment losses for receivables under the expected credit loss model. Individually significant trade receivables are tested for impairment separately by estimating the cash flows expected to be recoverable. All others are grouped into credit risk classes and tested for impairment collectively, using the Company's ageing of past due amounts and current economic trends. The actual eventual losses may be different from the allowance made and this may affect the Company's financial position and result.

(b) Income taxes

Significant judgement is involved in determining the provision for income taxes. There are certain transactions and computations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recognised, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

6. Trade receivables

	2021 RM	2020 RM
Trade receivables -non related parties	**–**	259,058
Less: Allowance for doubtful debts	**–**	–
	–	259,058
Amount due from related corporations		
Bristlecone Inc.	**–**	58,271
	–	317,329

The currency exposure profile of trade receivables of the Company is as follows:

	2021 RM	2020 RM
Ringgit Malaysia	**–**	317,329

The amount due from related corporation is unsecured, interest free and is repayable on demand.

7. Other receivables and deposits

	2021 RM	2020 RM
Deposit	**2,518**	2,518
Prepayment	**1,516**	1,458
	4,034	3,976

8. Fixed deposits with a licensed bank

Deposits with a licensed bank is pledged as securities for trade trading which bear interest at the rate of 2.20% per annum and have a maturity period of one month in prior year.

9. Share capital

	2021 Unit	2020 Unit	**2021 RM**	2020 RM
Issued and fully paid ordinary shares				
At beginning/end of the year	**500,000**	500,000	**500,000**	500,000

10. Trade payables

	2021 RM	2020 RM
Amount due to related corporations:		
Bristlecone India Limited	**–**	3,842
Bristlecone Inc.	**–**	68,876
	–	72,718
Amount due to non- related corporations:	**–**	469,480
Total	**–**	542,198

Amount due to related corporations is unsecured, interest free and repayable upon demand.

The currency exposure profile of trade payables of the Company is as follows:

	2021 RM	2020 RM
Ringgit Malaysia	**–**	469,480
United States Dollar	**–**	72,718
	–	542,198

11. Other payables and accruals

	2021 RM	2020 RM
Other payables	**758**	29,831
Provision for expenses	**16,667**	21,389
	17,425	51,220

12. Revenue

	2021 RM	2020 RM
Rendering of services	**–**	1,491,167

13. (Loss)/profit before taxation

	2021 RM	2020 RM
(Loss)/profit before taxation is arrived at after charging:		
Auditors' remuneration	**6,000**	10,000
Bad debts written off	**–**	30,592
Loss on foreign exchange – realised	**3,194**	–
Loss on foreign exchange – unrealised	**–**	304
Rental of premises	**7,908**	7,818
and crediting:		
Reversal of allowance for doubtful debts	**–**	43,955
Gain on foreign exchange – realised	**–**	4,667
Fixed deposits interest income	**13,872**	25,936

14. Taxation

	2021 RM	2020 RM
Income Tax expense		
Current year		
– taxes payable in Malaysia	–	6,225
Under/(over)provision in prior years		
– taxes payable in Malaysia	–	355
	–	6,580
Deferred tax		
Related to reversal and origination of temporary differences	–	–
	–	6,580

The reconciliation of income tax expense applicable to the results of the Company at the statutory income tax rate to income tax expense at the effective income tax rate of the Company is as follows:

	2021 RM	2020 RM
(Loss)/Profit before taxation	**(35,931)**	117,981
Tax at Malaysian statutory tax rate of 24%	**(8,623)**	28,315
Tax effects of:		
- expenses not deductible for tax purposes	**6,917**	9,191
- non-taxable income	–	(11,669)
- deferred tax assets not recognised in respect of current year losses	**1,706**	–
- utilization of deferred tax assets not recognized previously	–	(19,612)
Under/(over) provision in prior year	–	355
Tax expense for the year	–	6,580

15. Significant related party transactions

Significant transactions with related corporations during the year comprise the following:

	2021 RM	2020 RM
Services rendered to related corporations		
Bristlecone Inc.	–	58,271
Services rendered by related corporations:		
Bristlecone India Limited	–	45,947
Management fee charged by a related corporation:		
Bristlecone India Limited	–	3,842
Bristlecone Inc.	–	68,876

16. Non-cancellable operating lease commitment

The future aggregate minimum lease payments under non-cancellable operating leases contracted for as at financial year end but not recognised as liabilities are as follows:

	2021 RM	2020 RM
Rental of virtual office		
Future minimum rentals payments:		
Not later than 1 year	**1,997**	1,997

17. Financial risk management policies

The Company's financial risk management policy seeks to ensure that adequate financial resources are available for the development of the Company's businesses whilst managing its risks. The Board reviews and agrees policies for managing each of these risks and they are summarised below. It is, and has been throughout the year under review, the Company's policy that no trading in derivative financial instruments shall be undertaken.

The main areas of financial risks faced by the Company and the policy in respect of the major areas of treasury activity are set out as follows:

(a) Credit risk

Credit risk is the risk of loss that may arise on outstanding financial instruments should a counterparty default on its obligations. The Company is exposed to credit risk primarily from their trade receivables, other receivables which are financial assets, fixed deposits and cash and bank balances.

As at the current and previous financial year end, the Company's maximum exposure to credit risk is represented by the carrying amount of each class of financial asset recognised in the statements of financial position.

For fixed deposits, cash and bank balances, the Company minimises credit risk by adopting an investment policy which allows dealing with counterparties with good credit ratings only. The Company closely monitors the credit worthiness of their counterparties by reviewing their credit ratings and credit profiles on a regular basis. Receivables are monitored to ensure that exposure to bad debts is minimised.

For transactions that are not denominated in the functional currency of the relevant operating unit, the Company does not offer credit terms without the specific approval from the Head of Credit Control. Since the Company trades only with recognised and creditworthy third parties, there is no requirement for collateral.

Fixed deposits and cash and bank balances

The Company's fixed deposits and cash and bank balances at the financial year end are as follows:

	RM
At 31 March 2021	
Cash and bank balances	**1,707,571**
At 31 March 2020	
Fixed deposits with a licensed bank	975,155
Cash and bank balances	1,027,069
	2,002,224

No expected credit loss on the Company's balances were recognised arising from the deposits with financial institutions because the probability of default by these financial institutions were negligible.

Receivables

The ageing analysis of the Company's gross receivables (before deducting allowance for impairment loss) are as follows:

				Not credit impaired				
					Past due			
	Note	Total RM	Credit impaired RM	Not past due RM	1-60 days RM	61-120 days RM	>120 days RM	Total RM
At 31 March 2021								
Other receivables which are financial assets	6	**2,518**	**–**	**2,518**	**–**	**–**	**–**	**–**
At 31 March 2020								
Trade receivables	6	317,329	–	317,329	–	–	–	–
Other receivables which are financial assets	7	2,518	–	2,518	–	–	–	–
		319,847	–	319,847	–	–	–	–

Receivables that are neither past due nor credit impaired are creditworthy debtors with good payment records with the Company. The Company's trade receivables credit term ranges from 30 days to 60 days in prior year.

Other receivables which are financial assets consist of deposits.

None of the Company's receivables that are neither past due nor credit impaired have been renegotiated during the current and previous financial years. Receivables are not secured by any collaterals or credit enhancements.

Impairment on receivables

The Company applies the simplified approach whereby allowance for impairment are measured at 12-months ECL. The movement of the allowance for impairment loss on receivables is as follows:

	Trade receivables			Other receivables which are financial assets		
	Credit impaired (Note i) RM	12-months ECL allowance RM	Total allowance RM	Credit impaired (Note i) RM	12-months ECL allowance RM	Total allowance RM
At 1 April 2020	**–**	**–**	**–**	**–**	**–**	**–**
Charge for the year (Note ii)	**–**	**–**	**–**	**–**	**–**	**–**
At 31 March 2021	**–**	**–**	**–**	**–**	**–**	**–**
At 1 April 2019	43,955	–	43,955	–	–	–
Charge for the year (Note ii)	(43,955)	–	(43,955)	–	–	–
At 31 March 2020	–	–	–	–	–	–

i Receivables that are individually determined to be credit impaired at the financial year end relate to debtors who are in significant financial difficulties and have defaulted on payments.

ii The Company's allowance for impairment loss on receivables during the current financial year is none. In the previous financial year, the Company's allowance for impairment loss on receivables decreased by RM43,955.

(a) Credit risk

Credit risks concentration profile

The Company's concentration of credit risks relates to an amount owing by one major customer which constituted 81% of its trade receivables at the end of the previous reporting period.

As at the end of the previous reporting period, the maximum exposure of credit risk arising from trade receivables is represented by the carrying amount in the statement of financial position.

(b) Foreign currency risk

The Company is exposed to transactional currency risk primarily through sales and purchases that are denominated in a currency other than the functional currency of the operations to which they relate. The currency giving rise to this risk is mainly United States Dollar (USD). Foreign exchange exposures in transactional currencies other than functional currencies of the operating entities are kept to an acceptable level.

Foreign currency risk sensitivity analysis

The sensitivity analysis to a reasonably possible change in the foreign currencies as at the end of the reporting period with all other variables held constant is as follows:

	Increase/ (decrease) in the Company's results 2021 RM	Increase/ (decrease) in the Company's results 2020 RM
Effects on profit before taxation:		
USD		
– strengthened by 5% (2020: 5%)	**–**	(3,635)
– weakened by 5% (2020: 5%)	**–**	3,635

(c) Liquidity risks

The Company manages its debt maturity profile, operating cash flows and the availability of funding so as to ensure that refinancing, repayment and funding needs are met. As part of its overall liquidity management, the Company maintains sufficient levels of cash to meet its working capital requirements. In addition, the Company strives to maintain available banking facilities at a reasonable level to its overall debt position. As far as possible, the Company raises committed funding from both capital markets and financial institutions and balances its portfolio with some short term funding so as to achieve overall cost effectiveness.

The table below summarises the maturity profile of the Company's liabilities at the financial period end based on contractual undiscounted repayment obligations.

	Note	Carrying amount	Contractual undiscounted cash flow	Maturity: Less than 1 period	Maturity: Between 2 and 5 periods
2021		**RM**	**RM**	**RM**	**RM**
Other payables and accruals	11	**17,425**	**17,425**	**17,425**	**–**
2020					
Other payables and accruals	11	51,220	51,220	51,220	–

(d) Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

18. Categories of financial instruments

The table below provides an analysis of financial instruments categorised as follows:

(a) Amortised cost ("AC")

(b) Fair value through profit or loss ("FVTPL")

19. Significant event

The coronavirus (COVID-19) outbreak in early 2020 has reached a pandemic level affecting all businesses and economic activities globally. The Malaysian Government has enforced various measures to curb with the spreading of the virus including travel restrictions, reduced business operating capacity and total prohibition for certain businesses to operate.

The Company is unable to reasonably estimate the financial impact of COVID-19 for the financial year ending 31 March 2022 to be disclosed in the financial statements as the situation is still evolving and the uncertainty of the outcome of the current events. The Company will continuously monitor the impact of COVID-19 on its operations and its financial performance and will also be taking appropriate and timely measures to minimise the impact of the outbreak on the Company's operations.

To the general shareholders' meeting of
BRISTLECONE INTERNATIONAL AG
Rheinweg 7
8200 Schaffhausen

REPORT OF THE STATUTORY AUDITOR ON THE LIMITED STATUTORY EXAMINATION OF THE FINANCIAL STATEMENTS FOR THE YEAR 2020/2021

(for the period of 1 April 2020 until 31 March 2021)

21st April 2021

Report of the statutory auditor on the limited statutory examination to the general shareholders' meeting of **BRISTLECONE INTERNATIONAL AG, Schaffhausen**

As statutory auditor, we have examined the financial statements (balance sheet, income state-ment and notes) of BRISTLECONE INTERNATIONAL AG for the financial year ended 31 March 2021.

These financial statements are the responsibility of the Board of Directors. Our responsibility is to perform a limited statutory examination on these financial statements. We confirm that we meet the licensing and independence requirements as stipulated by Swiss law.

We conducted our examination in accordance with the Swiss Standard on the Limited Statutory Examination. This standard requires that we plan and perform a limited statutory examination to identify material misstatements in the financial statements. A limited statutory examination con-sists primarily of inquiries of company personnel and analytical procedures as well as detailed tests of company documents as considered necessary in the circumstances. However, the testing of operational processes and the internal control system, as well as inquiries and further testing pro-cedures to detect fraud or other legal violations, are not within the scope of this examination.

Based on our limited statutory examination, nothing has come to our attention that causes us to believe that the financial statements and the proposed appropriation of available earnings do not comply with Swiss law and the company's articles of incorporation.

Berne, 21st April 2021

NOTES TO THE FINANCIAL STATEMENTS AS PER 31 MARCH 2021

Accounting principles applied in the preparation for the financial statements

These financial statements have been prepared in accordance with the provisions on accounting and financial reporting of the Swiss Code of Obligations (Art. 957 to 963b CO, effective since 1 January 2013).

Disclosure on balance sheet items	**31-Mar-2021 CHF**	**31-Mar-2021 INR**	31-Mar-2020 CHF	31-Mar-2020 INR
Services in progress	**158,710.41**	**12,369,889.36**	121,568.07	9,475,015.38

The services in progress are valued as below:-

a) Fixed Price Projects - Based on the percentage-of-completion method

b) Time & Material Projects - Based on the efforts and customer approved billing rate card"

Full-time equivalents

The annual average number of full-time equivalents for the reporting period, as well as the previous year, were below 10.

Translation into Indian Rupees

The financial information in this financial statements is presented in Swiss Franc (CHF) and Indian Rupees (INR). CHF amounts as at end of the year ended 31 March 2021 and 31 March 2020 have been translated for convenience into Indian Rupees at the closing exchange rate of CHF 1 = INR 77.94 as at 31 March 2021.

Other Information

The impact of the COVID-19 pandemic is reflected in the 2020 financial statements of Bristlecone International AG to the extent that the relevant recognition criteria were met as at the balance sheet date. The Board of Directors and the Executive Board of Bristlecone International AG continue to monitor the events and take the necessary measures if required. At the time of the approval of these financial statements, the financial and economic consequences of the direct and indirect effects of a prolonged severe recession can, from today's perspective, be considered as not endangering the ability of Bristlecone International AG to continue as a going concern in the meaning of Art. 958a para. 2 of the Swiss Code of Obligations.

REPORT OF THE INDEPENDENT AUDITORS TO THE MEMBERS OF BRISTLECONE UK LIMITED

Opinion

We have audited the financial statements of Bristlecone UK Limited (the 'company') for the year ended 31 March 2021 which comprise the Statement of Comprehensive Income, Balance Sheet, Statement of Changes in Equity and Notes to the Financial Statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and United Kingdom Accounting Standards, including Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland' (United Kingdom Generally Accepted Accounting Practice).

In our opinion the financial statements:

— give a true and fair view of the state of the company's affairs as at 31 March 2021 and of its profit for the year then ended;

— have been properly prepared in accordance with United Kingdom Generally Accepted Accounting Practice; and

— have been prepared in accordance with the requirements of the Companies Act 2006.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We are independent of the company in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

The impact of uncertainties due to the COVID19 pandemic on our audit

Uncertainties related to the effects of COVID19 are relevant to understanding our audit of the financial statements. All audits assess and challenge the reasonableness of estimates made by the directors, and related disclosures and the appropriateness of the going concern basis of preparation of the financial statements. All of these depend on assessments of the future economic environment and the company's future property and performance.

COVID19 is one of the most significant public health, social and economic event and at the date of this report its effects are subject to unprecedented levels of uncertainty of outcomes, with the full range of possible effects unknown. We applied a standardised firm-wide approach in response to that uncertainty when assessing the company's future prospects and performance. However, no audit should be expected to predict the unknowable factors or all possible future implications for the company and this is particularly the case in relation to COVID19.

Conclusions relating to going concern

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the company's ability to continue as a going concern for a period of at least twelve months from when the financial statements are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The directors are responsible for the other information. The other information comprises the information in the Report of the Directors, but does not include the financial statements and our Report of the Auditors thereon.

Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether this gives rise to a material misstatement in the financial statements themselves. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Opinions on other matters prescribed by the Companies Act 2006

In our opinion, based on the work undertaken in the course of the audit:

— the information given in the Report of the Directors for the financial year for which the financial statements are prepared is consistent with the financial statements; and

— the Report of the Directors has been prepared in accordance with applicable legal requirements.

Matters on which we are required to report by exception

In the light of the knowledge and understanding of the company and its environment obtained in the course of the audit, we have not identified material misstatements in the Report of the Directors.

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

— adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us; or

— the financial statements are not in agreement with the accounting records and returns; or

— certain disclosures of directors' remuneration specified by law are not made; or

— we have not received all the information and explanations we require for our audit; or

— the directors were not entitled to take advantage of the small companies' exemption from the requirement to prepare a Strategic Report or in preparing the Report of the Directors.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement set out on page two, the directors are responsible for the preparation of the financial statements and for being satisfied that they give a true and fair view, and for such internal control as the directors determine necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue a Report of the Auditors that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities. This description forms part of our Report of the Auditors.

Use of our report

This report is made solely to the company's members, as a body, in accordance with Chapter 3 of Part 16 of the Companies Act 2006. Our audit work has been undertaken so that we might state to the company's members those matters we are required to state to them in a Report of the Auditors and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the company and the company's members as a body, for our audit work, for this report, or for the opinions we have formed.

BRISTLECONE UK LIMITED (REGISTERED NUMBER: 03169221)

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2021

1. STATUTORY INFORMATION

Bristlecone UK Limited is a private company, limited by shares, registered in England and Wales. The company's registered number and registered office address can be found on the Company Information page.

2. ACCOUNTING POLICIES

Basis of preparing the financial statements

These financial statements have been prepared in accordance with Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the Companies Act 2006. The financial statements have been prepared under the historical cost convention.

Financial Reporting Standard 102 - reduced disclosure exemptions

The company has taken advantage of the following disclosure exemption in preparing these financial statements, as permitted by FRS 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland":

- the requirements of Section 7 Statement of Cash Flows.

Turnover

Turnover represents the invoiced amounts of services provided and it is stated net of Value Added Tax.

Revenue for software services is recognised on the basis of services rendered. For time and material contracts, invoices are raised on the basis of customer approved timesheets. For fixed price projects, invoices are raised for prescribed milestones achieved on the basis of acceptance/ sign-off received from the customer. Revenue on fixed price contracts is recognised based on the percentage completion method.

Tangible fixed assets

Depreciation is provided at the following annual rates in order to write off each asset over its estimated useful life.

Plant and machinery	–	50% on cost
Computer equipment	–	50% on cost

Foreign currencies

Assets and liabilities in foreign currencies are translated into sterling at the rates of exchange ruling at the balance sheet date. Transactions in foreign currencies are translated into sterling at the rate of exchange ruling at the date of transaction. Exchange differences are taken into account in arriving at the operating result.

Going concern

The directors have a reasonable expectation that the company has adequate resources to continue in operational existence for the foreseeable future with the continuous support from the parent company.

Since the financial year end, there are uncertainties relating to the COVID19 pandemic which might impact the company. No provisions have been made in the financial statements in respect of these uncertainties.

3. EMPLOYEES AND DIRECTORS

	2021 **£**	2020 £
Wages and salaries	**–**	45,584
Social security costs	**–**	3,688
Other pension costs	**–**	1,170
	–	50,442

The average monthly number of employees during the year was as follows:

	2021	2020
Management	**–**	3
Administrative	**–**	–
Sales and Marketing	**–**	1
	–	4

	2021 **£**	2020 £
Directors' remuneration	–	–

4. OPERATING PROFIT/(LOSS)

The operating loss (2020 - operating profit) is stated after charging/(crediting):

	2021 **£**	2020 £
Auditors' remuneration	**2,850**	2,700
Foreign exchange differences	**4,900**	(484)

5. TAXATION

Analysis of the tax charge

The tax charge on the profit for the year was as follows:

	2021 **£**	2020 £
Current tax:		
UK corporation tax	78	**–**
Tax on (loss)/profit	78	**–**

UK corporation tax has been charged at 19% (2020 - 19%).

Reconciliation of total tax charge included in profit and loss

The tax assessed for the year is lower than the standard rate of corporation tax in the UK. The difference is explained below:

	2021 **£**	2020 £
Profit/(loss) before tax	**25,499**	(29)
Profit/(loss) multiplied by the standard rate of corporation tax in the UK of 19% (2020 - 19%)	**4,845**	(6)
Effects of:		
Tax losses brought forward	**(4,767)**	–
Adjustment for losses	**–**	6
Total tax charge	**78**	–

11. RELATED PARTY DISCLOSURES

The company has taken advantage of exemption, under the terms of Financial Reporting Standard 102 'The Financial Reporting Standard applicable in the UK and Republic of Ireland', not to disclose related party transactions with wholly owned subsidiaries within the group.

12. ULTIMATE CONTROLLING PARTY

In the opinion of the directors, the immediate parent company is Bristlecone Limited, a company incorporated in the Cayman Islands.

The Directors consider the company's ultimate holding company and controlling party to be Mahindra & Mahindra Limited which is incorporated in India.

The company's results are included in the consolidated financial statements of Mahindra & Mahindra Limited which are publicly available from Gateway Building, Apollo Bunder, Mumbai 400 001, India.

Independent auditor's report

To the Board of Directors and Shareholders of Bristlecone, Inc.

Opinion

1. We have audited the accompanying financial statements of Bristlecone, Inc. (the 'Company') (a California Corporation and a wholly owned subsidiary of Bristlecone Limited), which comprise the balance sheet as at March 31, 2021, the statements of operations, statements of changes in stockholders' equity and statements of cash flows, for the year then ended, and the notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

2. In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements present fairly, in all material respects, the financial position of the Company as at March 31, 2021, and of its financial performance and cash flows for the year ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

3. We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the 'Auditor's Responsibilities for the Audit of the Financial Statements' section of our report. We are independent of the Company in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants ('IESBA Code') together with the ethical requirements that are relevant to our audit of the financial statements in India and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information other than the Financial Statements and Auditor's Report thereon

4. Management is responsible for the other information. Other information does not include the financial statements and our auditor's report thereon.

   Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

   In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

   If, based on the work we have performed on the other information obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. Reporting under this section is not applicable as no other information is obtained at the date of this auditor's report.

Responsibilities of Management for the Financial Statements

5. Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

6. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

7. Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

8. As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

   - Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
   - Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
   - Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
   - Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material

uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Place: Mumbai, India

Notes to Financial Statements

NOTE A - BACKGROUND INFORMATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

1. NATURE OF OPERATIONS

Bristlecone, Inc. (the "Company") is engaged in providing technology solutions and consulting services, with operations and customers primarily in the United States of America (the 'US' or 'USA'). The Company's primary focus is on providing supply chain services ranging from supply chain strategy and network design to supply chain system implementations. The Company also provides application outsourcing services, data management services and development and integration services to independent software vendors.

2. GENERAL INFORMATION

The Company was incorporated under the laws of the State of California in 1998. In May 2004, the Company became a wholly-owned subsidiary of Bristlecone Limited, a Cayman Island Company. The Company's then stockholders and stock option holders, in exchange for their stock interest in Bristlecone, Inc., received cash, common stock, preferred stock, warrants and common stock options of Bristlecone Limited. Mahindra & Mahindra Limited, an Indian Company is the Company's ultimate parent.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A summary of the significant accounting policies applied in the preparation of the accompanying financial statements is as follows:

3.1. OVERALL CONSIDERATIONS

The accompanying financial statements have been prepared on a going concern basis under the historical cost convention and on the accrual basis of accounting in accordance with accounting principles generally accepted in the United States of America.

These financial statements have been presented in United States Dollars ('US$'), which is the functional and reporting currency of the Company. Also refer note 'Q' regarding convenience translation of US$ figures to Indian Rupees (INR) in the financial statements.

3.2. USE OF ESTIMATES

In preparing the Company's financial statements in conformity with accounting principles generally accepted in the United States of America, the Company's management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of current events and actions, actual results may ultimately differ from those estimates. The management's estimates for allowance for uncollectible amounts, useful lives of assets, efforts to completion for fixed price projects, realization of deferred tax assets, provision for variable pay and provision for sales commission represent certain of these particularly sensitive estimates.

3.3. FOREIGN CURRENCY TRANSACTIONS AND TRANSLATION

Transactions in foreign currencies are translated at the rate of exchange prevailing on the date of the transaction. Monetary assets and liabilities in foreign currencies are translated at the rate of exchange prevailing at the balance sheet date. All foreign exchange gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities at year-end are recorded in the statement of earnings.

3.4. REVENUE RECOGNITION

The Company is principally engaged in Business Consulting, Software Implementation, Software Implementation and related support services.

Effective April 1, 2019, the Company has adopted new standard "Revenue from Contracts with Customers" ("ASC 606"). ASC 606 supersedes the revenue recognition requirements in ASC Topic 605, "Revenue Recognition" ("ASC 605") and nearly all other existing revenue recognition guidance under US GAAP. The core principle of ASC 606 is to recognize revenues when promised goods or services are transferred to customers in an amount that reflects the consideration that is expected to be received for those goods or services. The Company has adopted ASC 606 using the full retrospective method. The effect of initially applying this standard is recognised at the date of initial application (i.e. April 1, 2018). The standard is applied retrospectively only to contracts that are not completed as at the date of initial application. The adoption of the new standard did not have any impact on the financial statements of the Company.

Revenue is recognised upon transfer of control of contracted products or services to customers in an amount that reflects the consideration which the Company expects to receive in exchange for those products or services.

- Revenues with respect to time and material contracts are recognized on input method basis i.e. based on time/efforts spent.
- Revenue related to fixed price maintenance and support services contracts where the Company provides services is recognised based on time elapsed mode and revenue is straight lined over the period of performance.
- In respect of other fixed-price contracts, revenue is recognised using percentage-of-completion method ('POC method') of accounting with contract costs incurred determining the degree of completion of the performance obligation.
- Revenue from the sale of third- party software is recognised upfront at the point in time when the software is delivered to the customer.
- Contract assets are recognised when there is excess of revenue earned over billings on contracts. Contract assets are classified as unbilled receivables when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms.
- Unearned and deferred revenue is recognised when there is billing in excess of revenues. The billing schedules agreed with customers include periodic performance -based payments and/or milestone- based progress payments. Invoices are payable within contractually agreed credit period.
- Contracts are subject to modification to account for changes in contract specification and requirements. The Company reviews modification to contract in conjunction with the original contract, basis which the transaction price could be allocated to a new performance obligation, or transaction price of an existing obligation could undergo a change. In the event transaction price is revised for existing obligation, a cumulative adjustment is accounted for.

Use of significant estimates and judgments

The Company uses the expected cost-plus margin approach to allocate the transaction price to each distinct performance obligation

Use of the percentage-of-completion method requires the Company to estimate the efforts or costs expended to date as a proportion of the total efforts or costs to be expended. Efforts or costs expended are used to measure progress towards completion as there is a direct relationship between input and productivity.

The Company uses significant judgments while determining the transactions price allocated to performance obligation using the expected cost-plus margin approach.

Provisions for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the expected contract estimates at the reporting date.

Disaggregation of Revenue

The Company disaggregates revenue from contracts with customers by geography and contract-type, as it believes it best depicts how the nature, amount, timing and uncertainty of our revenue and cash flows are affected by industry, market and other economic factors.

The Company's revenue by geography is as follows:

Geographic location	**Year ended March 31, 2021**		Year ended March 31, 2020	
	US$	**INR**	US$	INR
North America	**56,251,297**	**4,139,532,950**	58,540,047	4,307,962,059
Europe	**490,473**	**36,093,904**	515,757	37,954,558
Rest of the world	**983,329**	**72,363,181**	1,339,921	98,604,786
Total	**57,725,099**	**4,247,990,035**	60,395,725	4,444,521,403

The Company's revenue by type of contract is as follows:

Type of contract	Year ended March 31, 2021		Year ended March 31, 2020	
	US$	**INR**	US$	INR
Time and materials	**28,075,399**	**2,066,068,612**	28,761,995	2,116,595,212
Fixed-price	**29,649,700**	**2,181,921,423**	31,633,730	2,327,926,191
Total	**57,725,099**	**4,247,990,035**	60,395,725	4,444,521,403

3.5. ACCOUNTS RECEIVABLE

Account receivable are recorded net of allowance for doubtful accounts. Allowance for doubtful accounts are established through evaluation of the accounts receivable ageing and prior collection experience, current market conditions, customer's financial conditions and the amount of receivable in dispute to ascertain ultimate collectability of these receivables. Account balances are charged off against the allowance after all means of collection have been exhausted and potential for recovery is remote.

3.6. CASH AND CASH EQUIVALENTS

The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Cash equivalents are readily convertible into known amounts of cash and are subject to an insignificant risk of changes in value. Cash comprises balance held with banks.

3.7. DIVIDENDS

Final dividend on common stock and preferred stock are recorded as a liability on the date of declaration by the Board of Directors

3.8. PROPERTY, EQUIPMENT AND SOFTWARE

Equipment and software are stated at historical cost less accumulated depreciation and amortization.

Assets under capital lease obligations are recorded at lower of the present value of the minimum lease payments or the fair market value of the leased asset, at the inception of the lease.

Depreciation/amortization is calculated on the straight-line method over the estimated useful life of the respective assets. Assets under capital leases and leasehold improvements are amortized over lower of their estimated useful lives and the term of the lease.

The Company has determined the estimated useful lives of assets for depreciation/amortization purposes as follows:

Computers	3 – 5 years
Furniture and fixtures	5 – 7 years
Office equipment	3 – 5 years
Software	3 years
Leased furniture and fixtures	6 years or period of lease, whichever is lower
Leased computers	3 years or period of lease, whichever is lower
Leased office equipment	3 years or period of lease, whichever is lower
Leasehold improvements	Over the shorter of primary lease period and the useful life of the asset

Expenditure for maintenance and repairs are expensed as incurred. When assets are retired or otherwise disposed of, the cost of the asset and related accumulated depreciation and amortisation are eliminated from the financial records. Any gain or loss on disposal is credited or charged to the statement of operations.

3.9. SOFTWARE DEVELOPMENT COSTS

Costs related to research are expensed as incurred.

Development costs of new software products, are capitalised as deferred development costs if they can be measured reliably, the product is technically and commercially feasible, future economic benefits are probable and the Company intends to and has sufficient resources to complete development and to use or sell the product. Otherwise, development costs are expensed as incurred. Expenditure capitalized include the direct manpower costs and overhead costs that are directly attributable to preparing the asset for its intended use.

Deferred development costs are amortised, commencing when the product is available for general release and sale, over the estimated product life of three years using straight-line method.

The estimated useful life and amortisation method are reviewed as at each reporting date, with effect of any changes in estimate being accounted for on a prospective basis.

Subsequent to initial measurement, deferred development costs are stated at costs less accumulated amortisation and accumulated impairment losses.

3.10. IMPAIRMENT OF LONG LIVED ASSETS

Long-lived assets to be held and used are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Such assets are considered to be impaired if the carrying amount of the assets is higher than the future undiscounted net cash flows expected to be generated from the assets. The impairment amount to be recognized is measured at the amount by which the carrying value of the assets exceeds its fair value. Management has performed its impairment review and concludes that the Company's long lived assets are not impaired as of March 31, 2021.

3.11. COST OF REVENUES

Cost of revenues comprises salaries and employee benefits, stock compensation expense, sub-contractor fees, off-shore consultancy charges, project related travel and other costs, including those reimbursed by customers.

3.12. EMPLOYEE BENEFITS

Contributions to defined contribution plans are charged to statements of operations in the year in which they accrue.

The Company's liability towards compensated absences is determined on an arithmetical basis for the entire unavailed vacation balance standing to the credit of each employee as at year-end.

The Company has a 401(k) plan that provides defined contribution retirement benefits for all the employees. Participants may contribute a portion of their compensation to the plan, subject to the limitations under the Internal Revenue Code. The Company's contributions to the plan are at the discretion of the Board and expense is recorded in the year to which such contributions pertain.

3.13. STOCK COMPENSATION

The employees of the Company participate in various stock compensation plans which are operated by the Holding Company, based on which the employees of the Company have been granted stock options of the Holding Company. The Company accounts for stock compensation in accordance with ASC 718, "Stock Compensation".

The Company applies the same accounting principles as the Holding Company for recording stock compensation in respect of stock of the Holding Company granted to employees of the Company for the purposes of reporting in the separate financial statements of the Company. An amount equal to such compensation expense for the year is recorded as a capital contribution in stockholders' equity in the separate financial statements of the Company.

The Company accounts for the equity-settled options granted to its employees in accordance with ASC 718, "Stock Compensation". ASC 718 addresses the accounting for stock based compensation transactions in which an enterprise receives employee services in exchange for equity instruments of the enterprise or liabilities that are based on the fair value of the enterprise's equity instruments or that may be settled by the issuance of such equity instruments.

In accordance with the provisions of ASC 718, stock compensation for all awards granted, modified or settled, that the Company expects to vest is recognized on a straight line basis over the requisite service period, which is generally the vesting period of the award.

ASC 718 requires the use of a valuation model to calculate the fair value of stock-based awards. The Company elected to use the Black-Scholes-Merton pricing model to determine the fair value of stock-based awards on the date of grant.

3.14. INCOME TAXES

The Company applies the asset and liability method of accounting for income taxes as described in ASC 740, "*Income Taxes*". Under this method, deferred tax assets and liabilities are recognized for future tax consequences attributable to differences between the financial statements' carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards.

Deferred tax assets and liabilities are measured using tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in statement of operations in the period that includes the enactment date. Valuation allowances are recognized to reduce the deferred tax assets to an amount that is more likely than not to be realized. In assessing the likelihood of realization, management considers estimates of future taxable income and the effect of temporary differences.

In November 2015, the FASB issued ASU 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes*. The amendments in this update simplify the presentation of deferred income taxes and require that deferred tax liabilities and assets be classified as non-current in a classified statement of financial position.

Further, ASC 740-10 requires the Company to recognize a provision for uncertainty in income taxes based on minimum recognition threshold. The Company applies a two-step approach for recognizing and measuring uncertain tax positions. The first step is to evaluate the tax position for recognition by determining, based on the technical merits, that the position will be more likely than not sustained upon examination. The second step is to measure the tax benefit as the largest amount of the tax benefit that is greater than 50% likely of being realized upon settlement.

3.15. LEASES

The Company classifies all leases at the inception date as either a capital lease or an operating lease. Lease of assets under which there is transfer of substantially the entire risk and rewards incident to ownership as per ASC 840 "*Leases*" are classified as capital leases, otherwise all leases are classified as operating lease.

Assets under capital leases are capitalized and lease payments are appropriated towards the lease obligation and interest on the obligation amount.

Lease rental expenses on operating leases are charged to expense over the lease term as they become payable. Certain operating lease agreements provide for scheduled rent increases over the lease term. Rental expense for these leases is recognized on a straight-line basis over the primary lease term.

NOTE B - CASH AND CASH EQUIVALENTS

Cash and cash equivalents comprise of:

	As at March 31, 2021 US$	**As at March 31, 2021 INR (refer Note Q)**	As at March 31, 2020 US$	As at March 31, 2020 INR (refer Note Q)
Balance in checking and money market accounts	**6,840,921**	**503,423,376**	3,640,237	267,885,041

Cash balances of the Company are held in checking accounts, which are non-interest bearing, with the banks participating in the Transaction Account Guarantee Program of Federal Deposit Insurance Corporation (FDIC). Under that program, through March 2021, all non-interest-bearing transaction accounts are guaranteed by the FDIC for US$ 250,000 per tax ID for State Bank of India, California and Silicon Valley Bank.

As at March 31, 2021, the Company has US$ 6,340,921 (INR 466,628,376) [2020 US$ 3,140,237 (INR 231,090,041)] as balances in excess of the federally insured amounts.

NOTE C - ACCOUNTS RECEIVABLE, NET

Accounts receivables comprise of the following:

	As at March 31, 2021 US$	**As at March 31, 2021 INR (refer Note Q)**	As at March 31, 2020 US$	As at March 31, 2020 INR (refer Note Q)
Due from related parties	**161,402**	**11,877,573**	834,699	61,425,499
Due from others	**11,304,385**	**831,889,690**	13,297,161	978,538,078
	11,465,787	**843,767,263**	14,131,860	1,039,963,577
Less: Allowance for uncollectible accounts receivables	**(115,762)**	**(8,518,923)**	(828,519)	(60,970,713)
	11,350,025	**835,248,340**	13,303,341	978,992,864

Accounts receivable include unbilled accounts receivable which represent revenues on contracts to be billed, in subsequent periods, as per the terms of the related contracts. As of March 31, 2021 and 2020, the Company had US$ 2,475,193 (INR 182,149,417) [2020: US$ 2,024,277 (INR 148,966,561) of unbilled accounts receivable, respectively.

The allowance for uncollectible amounts reflected the following activity during the year:

	As at March 31, 2021 US$	**As at March 31, 2021 INR (refer Note Q)**	As at March 31, 2020 US$	As at March 31, 2020 INR (refer Note Q)
Balance at the beginning of the year	**828,519**	**60,970,713**	**279,662**	**20,580,327**
Add: Allowance created during the year	**61,410**	**4,519,191**	**579,326**	**42,632,600**
Less: Written off during the year	**(774,167)**	**(56,970,981)**	**(30,469)**	**(2,242,214)**
Balance at the end of the year	**115,762**	**8,518,923**	**828,519**	**60,970,713**

NOTE D - OTHER CURRENT ASSETS

Other current assets comprises of the following:

	As at March 31, 2021 US$	**As at March 31, 2021 INR (refer Note Q)**	As at March 31, 2020 US$	As at March 31, 2020 INR (refer Note Q)
Prepaid expenses	**378,659**	**27,865,498**	258,939	19,055,322
Prepaid expenses – software licenses	**323,929**	**23,837,935**	323,929	23,837,935
Advance income taxes	**126,171**	**9,284,924**	269,658	19,844,132
Others	**896,417**	**65,967,345**	437,787	32,216,745
	1,725,176	**126,955,702**	1,290,313	94,954,134

NOTE E - PROPERTY, EQUIPMENT AND INTANGIBLE ASSETS, NET

(a) Property and equipment consist of the following:

	As at March 31, 2021 US$	**As at March 31, 2021 INR (refer Note Q)**	As at March 31, 2020 US$	As at March 31, 2020 INR (refer Note Q)
Computers	**872,618**	**64,215,986**	814,547	59,942,514
Furniture and fixtures	**121,604**	**8,948,845**	246,602	18,147,441
Office equipment	**102,582**	**7,549,005**	16,080	1,183,327
Lease hold improvements	**775,008**	**57,032,870**	828,907	60,999,266
Capital lease – Computers	**162,069**	**11,926,624**	266,945	19,644,483
Capital lease – Furniture and fixtures	**21,743**	**1,600,042**	23,534	1,731,867
Capital lease – Office equipment	**278,801**	**20,516,966**	278,801	20,516,966
	2,334,425	**171,790,338**	2,475,416	182,165,864
Less: Accumulated depreciation	**(1,455,586)**	**(107,116,576)**	(2,209,861)	(162,623,672)
Property and equipment, net	**878,839**	**64,673,762**	265,555	19,542,192

Depreciation expense for the year ended March 31, 2021 was US$ 276,392 (INR 20,339,677) and March 31, 2020 was US$ 362,187 (INR 26,653,305).

(b) Intangible assets consist of the following:

	As at March 31, 2021 US$	**As at March 31, 2021 INR (refer Note Q)**	As at March 31, 2020 US$	As at March 31, 2020 INR (refer Note Q)
Software	**284,670**	**20,948,865**	284,670	20,948,865
Software development costs	**839,388**	**61,770,563**	839,388	61,770,563
	1,124,058	**82,719,428**	1,124,058	82,719,428
Less: Accumulated amortization	**(1,122,882)**	**(82,632,886)**	(1,051,491)	(77,379,222)
Intangible assets, net	**1,176**	**86,542**	72,567	5,340,206

Amortization expense for the year ended March 31, 2021 was US$ 71,391 (INR 5,253,674) and March 31, 2020 was US$ 74,850 (INR 5,508,248)

NOTE F - ACCRUED EXPENSES AND OTHER CURRENT LIABILITIES

Accrued expenses and other current liabilities comprise of the following:

	As at March 31, 2021 US$	**As at March 31, 2021 INR (refer Note Q)**	As at March 31, 2020 US$	As at March 31, 2020 INR (refer Note Q)
Provision for income tax expense	**658,580**	**48,464,902**	645,485	47,501,241
Accrued expenses	**1,320,527**	**97,177,616**	1,079,053	79,407,501
Deferred rent and lease incentive	**66,353**	**4,882,914**	153,099	11,266,555
	2,045,460	**150,525,432**	1,877,637	138,175,297

NOTE G - INCOME TAXES

Income tax expense for the year comprises of the following:

	Year ended March 31, 2021 US$	**Year ended March 31, 2021 INR (refer Note Q)**	Year ended March 31, 2020 US$	Year ended March 31, 2020 INR (refer Note Q)
Current tax expense	**48,368**	**3,559,401**	634,834	46,717,434
Deferred tax expense/(credit)	**287,789**	**21,178,393**	172,767	12,713,924
	336,157	**24,737,794**	807,601	59,431,358

The difference between the amount of income tax expense that would result from applying domestic federal statutory income tax rates to the net profit and the net deferred tax assets is related to certain non-deductible expenses, state income taxes and the change in the valuation allowance. Permanent differences are primarily on account of non-deductible meals and entertainment expenses. During the year, the Company utilised carry forward Net Operating Losses (NOL) of US$ 51,686 (INR 3,803,573) [2020: US$ 122,294 (INR 8,999,615)].

Following is the summary of deferred tax assets and liabilities:

	As at March 31, 2021 US$	**As at March 31, 2021 INR (refer Note Q)**	As at March 31, 2020 US$	As at March 31, 2020 INR (refer Note Q)
Deferred tax assets				
Net operating loss carry forwards	**748,599**	**55,089,400**	782,993	57,620,455
Accrued payroll	**1,048,147**	**77,133,138**	969,623	71,354,557
Provision for uncollectible receivables	**31,256**	**2,300,129**	232,897	17,138,890
Sub-total	**1,828,002**	**134,522,667**	1,985,513	146,113,902
Valuation allowance	**(566,149)**	**(41,662,905)**	(589,424)	(43,375,712)
Total deferred tax asset	**1,261,863**	**92,859,762**	1,396,089	102,738,190
Deferred tax liability				
Equipment and software	**(216,838)**	**(15,957,108)**	(63,285)	(4,657,144)
Net deferred tax asset	**1,045,015**	**76,902,654**	1,332,804	98,081,046

As at March 31, 2021, the Company has US$ 2,534,338 (INR 186,501,933) [2020: US$ 2,586,024 (INR 190,305,506)] in US Federal Net Operating Loss ("NOL") carryovers, which can be carried forward for future utilization within 20 years from the year in which such losses are generated subject to certain limitations under US tax laws.

As at March 31, 2021, the Company also has US$ 1,843,295 (INR 135,648,079) [2020: US $ 1,743,482 (INR 128,302,840)] in State Operating Losses carried forward, which can be carried forward for future utilization within 5-17 years.

The carry forward of the NOLs prior to the date of change of ownership will be impacted by Sec 382 limitation under the International Revenue Code. In terms of this limitation, while the carry forward of any of the NOL's will not be restricted, there will be a limitation on the annual amounts available for set-off under the Code, (currently computed as the value of Bristlecone Inc. prior to the Transaction * 4.45%).

During the year ended March 31, 2021, the Company has not reversed any valuation allowance. In evaluating the Company's ability to recover deferred tax assets, the Company considers all available positive and negative evidence, including scheduled reversals of deferred tax liabilities, Company's future plans and results of recent operations. In evaluating the objective evidence that historical results provide, the Company considers three years of cumulative operating income. Using all available evidence, the Company determined that it was uncertain that it will realize the deferred tax asset for certain of these carry forwards within the carry forward period.

No statutes have been extended on any of the Company's federal income tax filings. The statute of limitation on the Company's March 2018, March 2019 and March 2020 Federal income tax returns will expire on December 15, 2021, December 15, 2022 and December 15, 2023, respectively.

The Company is currently not under examination by any state authority for income tax purposes and no statutes of limitation for state income tax filings have been extended. As of March 31, 2021, the Company does not have any uncertain tax position in respect of unrecognized tax positions as per ASC 740-10.

NOTE H - LOAN TO RELATED PARTIES

The Company has granted unsecured loan, being inter-corporate deposits to a Fellow Subsidiary Company (Bristlecone Middle East DMCC) outstanding as on March 31, 2021 of US$ 500,000 (INR 36,795,000) [2020: US$ 750,000 (INR 55,192,500)]. The loan bears an interest rate of 2.35% p.a. as at March 31, 2021 [2020: 2.35% p.a.] and is repayable on demand.

Loans to related parties also comprised of an outstanding secured loan as at March 31, 2019, of US$ 240,000 (INR 17,661,600) granted to a Key Management Personnel (Irfan Khan) on August 8, 2016. The loan was secured by 388,081 shares of the Common Stock of the Company held by the Key Management Personnel which were issued on exercise of employee stock options granted to him. The loan carried an interest rate of 2.5% p.a. and repayable as per the agreed upon repayment schedule within four years from the date of the grant of loan. Key Management Personnel has resigned from the Company on May 8, 2019 and has surrendered 90,857 shares at price of $2.87 per share equivalent to the $ 260,760 [INR 19,189,328]. The principal loan amount of US$ 240,000 (INR 17,661,600) along with the interest of US$ 20,760 [INR 1,527,728] have been adjusted against these surrendered shares.

The Company has granted an unsecured loan of US$ 500,000 (INR 36,795,000) [2020: US$ 500,000 (INR 36,795,000)] being inter-corporate deposits to Holding Company (Bristlecone Limited), on March 27, 2020. The loan bears an interest rate of 3.56% p.a. as at March 31, 2021 and is repayable on demand.

NOTE I - STOCKHOLDERS' EQUITY

The Company's authorized stock comprised of 4,494,500 preferred stock at no par value and 30,000,000 common stock at no par value as at March 31, 2021 and March 31, 2020; of which 865,540 preferred stock Series A, 2,749,995 preferred stock series B and 8,492,157 common stock were issued and outstanding as at March 31, 2021 and March 31, 2020.

Conversion of preferred stock

Each preferred stock series A and preferred stock series B is entitled to be converted, without payment of any additional consideration, into one fully paid common stock.

Voting

Every holder of preferred stock series A and preferred stock series B is entitled to one vote for each common stock held into which such Series A or Series B preferred stock could be converted.

Liquidation

In the event of a liquidation, dissolution or winding up of the Company:

(a) holders of Preferred Stock series A and Preferred Stock series B, shall on a pari passu basis, in preference to any distribution to holders of Common Stock receive an amount per stock equal to (i) US$ 0.94 for each outstanding stock of preferred stock Series A and (ii) US$ 2.21 for each outstanding stock of preferred stock Series B subject to appropriate adjustments for stock splits, stock dividends, combinations or recapitalization etc. If upon the occurrence of such event, the assets available for distribution shall be insufficient to permit the payment of the full aforesaid preferential amounts, then the available funds shall be distributed rateably in proportion to the preferential amount each such holder is otherwise entitled to receive pursuant to this clause.

(b) Upon the completion of distribution required by clause (a) above, the remaining assets available for distribution shall be distributed among the holders of Series A Preferred Stock, Series B Preferred Stock and Common Stock pro rata based on the number of stocks of Common Stock held by each, provided that the Common Stock holders shall not receive any distribution unless the Series A Preferred Stock holders have received an aggregate of US$ 0.47 per stock and the Series B Preferred Stock holders have received an aggregate of US$ 1.11 per stock (not including amounts paid pursuant to clause (a) above).

NOTE J - EMPLOYEE BENEFIT PLANS

Accrual for compensated absences at current employee compensation rates as at March 31, 2021 is US$ - 551,113 (INR 40,556,401) [2020: US$ 364,490 (INR 26,822,819)].

The Company in the current year made a contribution of US$ 216,325 (INR 15,919,357) [2020: US$ 219,929 (INR 16,184,575)] to 401(k) plan.

NOTE K - STOCK COMPENSATION

Bristlecone Limited, the Holding Company has following Stock Option Plans under which the options are granted to the employees of the Company:

1. Bristlecone Limited 2004 Stock Option Plan (arising out of conversion of the earlier Bristlecone Inc. Existing Stock Option Plan) and Bristlecone Limited 2008 Stock Option Plan:

   Pursuant to the terms of the acquisition of Bristlecone Inc. on May 17, 2004 by Bristlecone Limited (the "transaction"), the then existing outstanding options of Bristlecone Inc., aggregating to a total of 2,058,493 options were cancelled and fresh options were issued by Bristlecone Limited under 2004 stock option plan based on the exchange criteria set out in the transaction documents.

   Features of these plans are as under:

   Options granted under these plans include incentive stock options and non-statutory stock options. As per these plans, 25 per cent of the Shares subject to the Option, vest on the one (1) year anniversary of the vesting commencement date, and 1/48 of the options vest each month thereafter on the same day of the month as the vesting commencement date, subject to the grantee continuing to be an employee through each such date. The term of each Option is stated in the Option Agreement; provided, however, that the term shall be no more than 10 years from the date of grant thereof. The exercise price of each option, (a) granted to an employee who at the time of grant of such option, owns stock representing more than 10 per cent of the voting power of all classes of stock of the Company or any Parent or Subsidiary, shall be no less than 110 per cent of the Fair Market Value per Share as determined by the Board on the date of grant (b) granted to any other employee, shall be no less than 100 per cent of the Fair Market Value per Share determined by the Board on the date of grant, unless otherwise ratified by the Board.

   The following table summarizes information about the options issued under different Plans:

	Options outstanding Year ended March 31, 2021	**Weighted average exercise price March 31, 2021**	Options outstanding Year ended March 31, 2020	Weighted average exercise price March 31, 2020
Stock Option 2008 Plan				
Outstanding at April 1	**659,025**	**US$ 1.86**	1,525,817	US$ 1.50
Granted	**503,774**	**US$ 2.03**	271,500	US$ 2.87
Exercised	**80,000**	**US$ 0.18**	46,875	US$ 0.77
Expired/forfeited	**224,584**	**US$ 2.64**	1,091,417	US$ 1.66
Outstanding at March 31	**858,215**		659,025	

Additional information on outstanding options

Exercise price range for the options outstanding is given below:

Exercise Price (US$)	**No of options outstanding**	
	March 31, 2021	March 31, 2020
US$ 0.10	**50,500**	120,500
US$ 0.77	**59,000**	69,000
US$ 1.41	**15,000**	15,000
US$ 2.03	**503,774**	–
US$ 2.14	**104,941**	107,650
US$ 2.38	**75,000**	175,000
US$ 2.87	**50,000**	171,875

Options outstanding that have vested and are expected to vest are as follows:

	March 31, 2021			March 31, 2020		
	Outstanding options	**Weighted average exercise price in US$**	**Weighted average remaining contract Term (in years)**	Outstanding options	Weighted average exercise price in US$	Weighted average remaining contract term (in years)
Stock Option 2008 Plan						
Vested	**273,452**	**1.51**	**5.32**	386,215	1.37	5.82
Expected to vest	**584,763**	**2.1**	**9.33**	272,810	2.56	8.65

Stock based compensation expense has been determined based on the fair values of the options estimated on the date of grant using the Black-Scholes model with the following assumptions:

	Year ended March 31, 2021	Year ended March 31, 2020
Dividend yield	0 percent	0 percent
Expected life	6.25 years	6.25 years
Risk free interest rate	1.56 percent	1.15 percent
Volatility	53.57 percent	33.26 percent

The Black-Scholes option-pricing model was developed for estimating fair value of traded options that have no vesting restrictions and are fully transferable. Since options pricing models require use of subjective assumptions, changes therein can materially affect fair value of the options. The options pricing models do not necessarily provide a reliable measure of fair value of the options.

The Company has recognized stock compensation expense of US$ 128,190(INR 9,433,502) [2020: US$ 98,029 (INR 7,213,954)] for the year ended March 31, 2021.

Unrecognized compensation expense associated under the fair value method for shares expected to vest (unvested options net of expected forfeitures) as of March 31, 2021 was approximately US $ 585,027 (INR 43,052,137) [2020: US$ 175,062 (INR 12,882,813)] and is expected to be recognized over a weighted average period of 2.24 years.

The aggregate fair value of all options granted during the year is US$ 533,129 (INR 39,232,963) and weighted average grant date fair value per option that vested during the year is US$ 1.058 (INR 77.86).

There have been no modifications or cancellations of these plans during the current or preceding year.

NOTE L - CONTINGENCIES

The Company evaluates contingencies as per its assessments of probable, reasonably possible and remote, as per ASC 450 “Contingencies”. It is subject to legal claims in the normal course of business. However, based on its evaluation, management believes that there are no claims or contingencies, potential outcomes of which could be material to the financial condition or results of operations of the Company.

NOTE M - OPERATING LEASES

During the year Company has entered into a new lease agreement and have cancelled the old lease agreement. The Company uses office space under operating lease expiring during FY 2026-2027 which contains an annual rent escalation clause. The rental expense on this lease is recognized on a straight-line basis. Total rent expense was US$ 243,054 (INR 17,886,344) [2020: US$ 378,440 (INR 27,849,400)] for the year ended March 31, 2021.

Future minimum lease payments under operating leases consisted of the following as of March 31, 2021:

Year ending March 31	**In US$ Operating lease**	**In INR Operating lease**
2022	289,988	21,340,217
Thereafter	1,304,493	95,997,640

NOTE O - CONCENTRATION OF CREDIT RISK

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash equivalents, trade receivables and bank deposits. By their nature, all such financial instruments involve risk including the credit risk of non-performance by counter parties.

The Company's cash equivalents and bank deposits are invested with banks with high investment grade credit ratings.

Trade receivables (primarily denominated in US$) are typically unsecured and are derived from revenues earned from large multinational customers. The Company monitors the credit worthiness of its customers to which it grants credit terms in the normal course of the business. In the current year, the Company had two major customers which individually accounted for more than 10% of Company's revenues. Revenues from these customers amounted to US$ 13,392,510 (INR 985,554,811 or 23.20% of the total revenue. Revenue from one major customer in 2020 which individually accounted for more than 10% of Company's revenues amounted to US$ 6,433,848 (INR 473,466,874) or 10.65% of total revenue. Total accounts receivable from such customers is US$ 2,466,946 (INR 181,542,556) [2020: US$ 1,102,844 (INR 81,158,290)] at March 31, 2021 or 21.74% [2020: 7.80%] of total receivables.

During the year ended March 31, 2021, the sales in United States of America and Canada accounted for 97.45% of the total sales (2020: 96.93%).

NOTE P - FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amount of the Company's cash equivalents, accounts receivables, loans, accounts payable and accrued expenses approximated their fair values due to their short maturities. The carrying value of short term borrowings and lease obligations approximates fair value based upon the market interest rate available to the Company for debt with similar risk and maturities.

NOTE Q - CONVENIENCE TRANSLATION

For the convenience of the readers, the financial statements for the year ended March 31, 2021 along with comparatives for the year ended March 31, 2020 have been translated unto Indian Rupees ("INR") at the average of the telegraphic buying and selling rates quoted by the Mumbai Branch of State Bank of India on March 31, 2021 of 1 US$ = 73.59 INR. The convenience translation should not be construed as a representation that the US$ amounts or the Indian Rupee amounts referred to in these financial statements have been, could have been, or could in the future be, converted into INR or US$, as the case may be, at this or at any other rate of exchange, or at all.

NOTE R - RECENT ACCOUNTING PRONOUNCEMENT

New Accounting Standards yet to be adopted by the Company

In February 2016, the FASB issued ASU 2016-02, Leases. The standard requires all leases with lease terms over twelve months to be capitalized as a right-of-use asset and lease liability on the balance sheet at the date of lease commencement. Leases will be classified as either finance or operating. This distinction will be relevant for the pattern of expense recognition in the income statement. This standard will be effective for the financial year ending March 31, 2023.

NOTE S - Estimation uncertainty relating to the global health pandemic - COVID-19

In assessing the recoverability of receivables including unbilled receivables, the Company has considered internal and external information up to the date of these financial statements including credit reports and economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on the current indicators of future economic conditions, the Company expects to recover the carrying amount of these assets. The impact of the global health pandemic may be different from the estimate as at the date of these financial statements and the Company will closely monitor any material changes to future economic conditions and respond accordingly.

NOTE T - SUBSEQUENT EVENTS

In accordance with ASC 855-10 "Subsequent events", the Company has evaluated subsequent events through May 06, 2021, the date these financial statements were available to be issued. The Company is not aware of any additional subsequent events that would require recognition or disclosure in the financial statements.

Independent Auditor's Report

To the Shareholder of Bristlecone Middle East DMCC

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Bristlecone Middle East DMCC (the "Company"), which comprise the statement of financial position as at March 31, 2021, and the statement of comprehensive income, statement of changes in equity and statement of cash flows, for the year ended March 31, 2021, and the notes to the financial statements, including a summary of significant accounting policies.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give a true and fair view of the financial position of the Company as at the end of the reporting period, and of its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditors' Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with *International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants'* (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with IFRS and their preparation in compliance with the applicable provisions of DMCC Companies Regulations 2020, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

We also confirm that, in our opinion, the financial statements of the Company have been properly prepared, in all material respects, in accordance with the applicable provisions of the DMCC Companies Regulations 2020. Based on the information that has been made available to us during our audit of the financial statements of the Company for the year ended March 31, 2021, nothing has come to our attention that causes us to believe that the activities undertaken by the Company and as disclosed in note 1 to these financial statements, are not significantly different from the activities mentioned in the license issued to the Company by DMCCA.

Notes to the financial statements
For the year ended March 31, 2021

1 Legal status and nature of operations

Bristlecone Middle East DMCC (the "Company") was incorporated in Dubai, United Arab Emirates ("UAE") on July 18, 2016 under the commercial license number DMCC-208734 issued by Dubai Multi Commodities Centre. The registered address of the Company is Unit No. 3O-01-3572, DMCC Business Center, Level No. 1, Jewellery & Gemplex 3, Dubai, UAE.

The principal activities of the Company is to provide supply chain services ranging from supply chain strategy and network design to supply chain system implementation.

The Company is a wholly-owned subsidiary of Bristlecone Limited (the "Parent Company"), a company incorporated in Cayman Islands.

2 Statement of compliance

These financial statements of the Company have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB).

3 Significant events during the reporting period

During the year, there was an outbreak of a global pandemic (COVID-19), causing significant disruption to economies and businesses across the globe including the Company. The impact of this outbreak on the macroeconomic forecasts did not have a significant impact in the Company's IFRS 9 estimates of expected credit loss provision at March 31, 2021. Management will continue to monitor the situation and assess the impact of this outbreak in fiscal year 2022.

4 Standards, interpretations and amendments to existing standards

4.1 Standards, interpretations and amendments to existing standards that are effective in 2020

Following relevant new amendments to existing standards were issued by the IASB, which are effective for the accounting period beginning on or after January 1, 2020 and have been adopted by the Company:

- Definition of a Business (Amendments to IFRS 3)
- Definition of Material (Amendments to IAS 1 and IAS 8)
- Interest Rate Benchmark Reform (Amendments to IFRS 9, IAS 39 and IFRS 7)
- Amendments to Refences to the Conceptual Framework (Various Standards)
- COVID-19 Rent Related Concessions (Amendments to IFRS 16)

The above amendments do not have a significant impact on these financial statements therefore the disclosures have not been made.

4.2 Standards, interpretations and amendments to existing standards not yet adopted early by the Company

At the date of authorisation of these financial statements, several new, but not yet effective, Standards and amendments to existing Standards, and Interpretations have been published by the IASB. None of these Standards or amendments to existing Standards have been adopted early by the Company.

Management anticipates that all relevant pronouncements will be adopted for the first period beginning on or after the effective date of the pronouncement. New Standards, amendments and Interpretations not adopted in the current year have not been disclosed as they are not expected to have a material impact on the Company's financial statements.

5 Summary of significant accounting policies

The significant accounting policies that have been used in the preparation of these financial statements are consistent with those used in prior year and are summarised below

5.1 Overall considerations

These financial statements have been prepared using the measurement bases specified by IFRS for each type of asset, liability, income and expense. The measurement bases are more fully described in the accounting policies below.

Functional and presentation currency

These financial statements are presented in UAE Dirham (AED), which is the Company's functional currency

5.2 Financial instruments Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency, using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-measurement of monetary items at year-end exchange rates are recognised in the statement of comprehensive income.

Non-monetary items measured at historical cost are translated using the exchange rates at the date of the transaction (not retranslated). Non-monetary items measured at fair value are translated using the exchange rates at the date when fair value was determined.

5.3 Financial instruments

Recognition, initial measurement and de-recognition

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument.

Financial assets are derecognised when the contractual rights to the cash flows from the financial asset has expired, or when the financial asset and all substantial risks and rewards are transferred.

A financial liability is derecognised when it is extinguished, discharged, cancelled or has expired.

Financial assets and financial liabilities are measured initially at fair value adjusted by transactions costs.

Financial assets and financial liabilities are measured subsequently as described below.

Classification and subsequent measurement of financial assets

For the purpose of subsequent measurement, financial assets are classified and measured at amortised cost if both of the following conditions are met:

- The asset is held in order to collect contractual cash flows; and
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest, if any, on the principal amount outstanding.

If the financial asset does not pass either of the above conditions, or only one of the above conditions, it is measured at fair value through profit or loss ('FVTPL'). Even if both conditions are met, management may designate a financial asset at FVTPL if doing so reduces or eliminates a measurement or recognition inconsistency.

As at the reporting date, the Company's financial assets comprise trade and most other receivables, amounts due from related parties, other financial assets and cash and cash equivalents. These are measured at amortised cost using the effective interest method, less provision for impairment. Discounting is omitted where the effect of discounting is immaterial.

All income and expenses relating to financial assets measured at amortised cost are recognised in profit or loss and presented within 'finance costs - net' or 'other income – net', except for impairment of trade receivables which is presented within 'administrative and general expenses'.

Individually significant receivables are considered for impairment when they are past due or when other objective evidence is received

Notes to the financial statements
For the year ended March 31, 2021 (continued)

that a specific counterparty will default. Receivables that are not considered to be individually impaired are reviewed for impairment in groups, which are determined by reference to the industry and region of a counterparty and other shared credit risk characteristics. The impairment loss estimate is then based on recent historical counterparty default rates for each identified group.

Impairment of financial assets

IFRS 9's impairment requirements use forward-looking information to recognise expected credit losses – the 'expected credit loss (ECL) model'. Instruments within the scope of the requirements included loans and other debt-type financial assets measured at amortised cost and FVOCI, trade receivables, contract assets recognised and measured under IFRS 15 and loan commitments and some financial guarantee contracts (for the issuer) that are not measured at fair value through profit or loss.

Recognition of credit losses is no longer dependent on the Company first identifying a credit loss event. Instead the Company considers a broader range of information when assessing credit risk and measuring expected credit losses, including past events, current conditions, reasonable and supportable forecasts that affect the expected collectability of the future cash flows of the instrument.

In applying this forward-looking approach, a distinction is made between:

- financial instruments that have not deteriorated significantly in credit quality since initial recognition or that have low credit risk ('Stage 1') and
- financial instruments that have deteriorated significantly in credit quality since initial recognition and whose credit risk is not low ('Stage 2').
- 'Stage 3' would cover financial assets that have objective evidence of impairment at the reporting date.

'12-month expected credit losses' are recognised for the first category while 'lifetime expected credit losses' are recognised for the second category.

Measurement of the expected credit losses is determined by a probability-weighted estimate of credit losses over the expected life of the financial instrument.

Trade and other receivables and contract assets

The Company makes use of a simplified approach in accounting for trade and other receivables as well as contract assets and records the loss allowance as lifetime expected credit losses. These are the expected shortfalls in contractual cash flows, considering the potential for default at any point during the life of the financial instrument. In calculating, the Company uses its historical experience, external indicators and forward-looking information to calculate the expected credit losses using a provision matrix.

The Company assess impairment of trade receivables on a collective basis as they possess shared credit risk characteristics, they have been grouped based on the days past due.

Classification and subsequent measurement of financial liabilities

Financial liabilities comprise trade and most other payables, amount due to related parties and loan from related parties.

Financial liabilities are measured subsequently at amortised cost using the effective interest method.

Discounting is omitted if the impact is immaterial.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously.

5.4 Cash and cash equivalents

Cash and cash equivalents are items, which are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Cash and cash equivalents in the statement of financial position comprise cash on hand and balance in bank accounts and are initially and subsequently recorded at fair value.

For purpose of the statement of cash flows, all cash and bank balances are considered to be cash and cash equivalents.

5.5 Employee benefits

Short-term employee benefits

The cost of short-term employee benefits (those payable within 12 months after the service is rendered) are recognised in the period in which the service is rendered and are not discounted.

The expected cost of compensated absences is recognised as an expense when the employee renders services that increase their entitlement or, in the case of non-accumulating absences, when the absences occur.

Employees' end of service benefits

A provision for employees' end of service benefits is made for the full amount due to employees for their periods of service up to the reporting date in accordance with the U.A.E. Labour Law and is reported as separate line item under non-current liabilities.

The entitlement to end of service benefits is based upon the employees' salary and length of service, subject to the completion of a minimum service period as specified in U.A.E. Labour Law. The expected costs of these benefits are accrued over the period of employment.

5.6 Equity and reserves

Share capital represents the nominal value of shares that have been issued.

Accumulated profits include all current and prior period profits/losses (net of earnings).

5.7 Provisions and contingent liabilities

Provisions are recognised when present obligations as a result of a past event will probably lead to an outflow of economic resources from the Company and amounts can be estimated reliably. Timing or amount of the outflow may still be uncertain. A present obligation arises from the presence of a legal or constructive commitment that has resulted from past events. Provisions are not recognised for future operating losses.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. Provisions are discounted to their present values, where the time value of money is material. All provisions are reviewed at each reporting date and adjusted to reflect the current best estimate.

In those cases where the possible outflow of economic resources as a result of present obligations is considered improbable or remote, no liability is recognised, unless it was assumed in the course of a business combination.

5.8 Revenue

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured regardless of when payment is being made. Revenue

Notes to the financial statements
For the year ended March 31, 2021 (continued)

is measured at the fair value of the consideration received or receivable by the Company, excluding discounts, rebates, and duty.

IFRS 15 'Revenue from Contracts with Customers' outlines a single comprehensive model of accounting for revenue arising from contracts with customers. It establishes a five-step model, explained below, which will apply to revenue arising from contracts with customers.

Step 1 Identify the contract with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for each of those rights and obligations.

Step 2 Identify the performance obligations in the contract: A performance obligation in a contract is a promise to transfer a good or service to the customer.

Step 3 Determine the transaction price: Transaction price is the amount of consideration to which the Company expects to be entitled in exchange for transferring the promised goods or services to a customer, excluding amounts collected on behalf of third parties.

Step 4 Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the Company will allocate the transaction price to each performance obligation in an amount that depicts the consideration to which the Company expects to be entitled in exchange for satisfying each performance obligation.

Step 5 Recognise revenue when (or as) the Company satisfies a performance obligation.

The Company recognises revenue over time if any one of the following criteria is met:

- The customer simultaneously receives and consumes the benefits provided by the Company's performance as the Company performs; or
- The Company's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- The Company's performance does not create an asset with an alternative use to the Company, and the Company has an enforceable right to payment for performance completed to date.

For performance obligations where one of the above conditions are not met, revenue is recognised at the point in time at which the performance obligation is satisfied.

The Company allocates the transaction price to the performance obligations in a contract based on the input method which requires revenue recognition on the basis of the Company's efforts or inputs to the satisfaction of the performance obligations.

When the Company satisfies a performance obligation by delivering the promised goods or services, it creates a contract asset based on the amount of consideration earned by the performance. Where the amount of consideration received from a customer exceeds the amount of revenue recognised, this gives rise to a contract liability.

The Company assesses its revenue arrangements against specific criteria to determine if it is acting as principal or an agent and has concluded that it is acting as a principal in all of its revenue arrangements.

Amounts included in the financial statements, which relate to recoverable costs and accrued margins, if any, not yet billed on contracts are classified as "Unbilled revenue".

5.9 Operating expenses

Operating expenses are recognised in profit or loss upon utilisation of the service or at the date of their origin.

Cost of sales comprises salaries and employee benefits, sub-contractor fees, project related travel and other costs.

5.10 Leases

The Company has elected to account for short-term leases and leases of low-value assets using the practical expedients. Instead of recognising a right-of-use asset and lease liability, the payments in relation to these are recognised as an expense in profit or loss on a straight-line basis over the lease term. Associated costs, such as maintenance and insurance, are expensed as incurred.

5.11 Significant management judgments and estimates in applying accounting policies

The preparation of these financial statements in conformity with the recognition and measurement principles of IFRS requires the management of the Company to make estimates and assumptions that affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of income and expense for the periods presented. Although these estimates are based on management's best knowledge of current events and actions, actual results may ultimately differ from those estimates.

Key source of estimation uncertainty at the date of the financial statements, which may cause material adjustments to the carrying amount of assets and liabilities within the next financial year, is in respect of allowance for uncollectible amounts and efforts to completion for fixed price projects represents certain of these particularly sensitive estimates.

Amounts which are not individually significant, but which are past due, are assessed collectively and a provision applied according to the length of time past due and based on historical recovery rates. Any difference between the amounts actually collected in future periods and the amounts expected will be recognised in the statement of comprehensive income.

Efforts to completion for fixed price contracts

The management considers man-days to be the best possible measure of progress in these contracts. Revenues from fixed-price contracts are recognized in accordance with percentage of completion method measured by the percentage of man-days incurred to date in relation to the estimated total man-days for such contracts.

16 Financial instrument risk

Risk management objectives and policies

The Company is exposed to various risks in relation to financial instruments. The main types of risks are market risk, credit risk and liquidity risk.

The Company's risk management is coordinated at Parent Company level, in close cooperation with the management, and focuses on actively securing the Company's short to medium-term cash flows by minimising the exposure to financial markets.

The Company does not actively engage in the trading of financial assets for speculative purposes nor does it write options. The most significant financial instrument risks to which the Company is exposed are described below.

16.1 Market risk

Market risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market.

The Company is exposed to market risk through its use of financial instruments and specifically to currency risk and interest rate risk, which result from both its operating and investing activities.

Foreign currency risk

Foreign currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Most of the Company's transactions are carried out in AED and US dollars (USD). The AED is effectively pegged to the USD thus balances in USD do not represent significant currency risks.

Interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates.

At the reporting date, the Company's loans from related parties are at fixed agreed rates, therefore, the interest rate risk is considered minimal.

16.2 Credit risk

Credit risk is the risk that the counterparty fails to discharge an obligation to the Company. The Company's maximum exposure to credit risk is limited to the carrying amount of financial assets recognised at the reporting date, as summarised below:

	2021	2020
	AED	AED
Trade and other receivables (note 6)	**2,982,600**	1,155,913
Cash at banks (note 7)	**3,902,546**	2,435,333
Other financial asset (note 8)	**–**	5,529,961
	6,885,146	9,121,207

The Company's management considers that all the above financial assets are not impaired and the same are of good credit quality. None of the Company's financial assets are secured by collateral or other credit enhancements. The credit risk for cash and cash equivalents is limited, since the counterparties are reputable banks with quality credit ratings.

Some of the unimpaired receivables are past due as at the reporting date. Financial assets past due but not impaired are given below:

	2021	2020
	AED	AED
Not more than 3 months	**1,111,124**	602,630
Between 3 and 6 months	**507,304**	75,336
	1,618,428	677,966

16.3 Liquidity risk

Liquidity risk also referred to as funding risk is the risk that an enterprise will encounter difficulty in raising funds to meet commitments associated with financial instruments. Liquidity risk may result from an inability to sell a financial asset quickly at close to its fair value.

	Less than 12 months
At March 31, 2021	**AED**
Loan from related party (note 11)	**1,836,300**

	8,178,384

Notes to the financial statements
For the year ended March 31, 2021 (continued)

17 Fair value measurement

Assets and liabilities measured at fair value in the statement of financial position are grouped into three levels of fair value hierarchy. This grouping is determined based on the lowest level of significant inputs used in fair value measurement, as follows:

- level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

None of the Company's financial instruments, non-financial assets and non-financial liabilities as at the reporting date are measured at fair value.

18 Capital management policies and procedures

The Company's capital management objectives are to ensure the Company's ability to continue as a going concern and to provide an adequate return to shareholder. Capital for the reporting period under review is summarised as follows:

	2021	2020
	AED	AED
Equity	**3,694,097**	1,015,065
Cash and cash equivalents (note 9)	**3,902,546**	2,435,333

A. Audit engagement

Our report below on the non-statutory audit of the annual financial statements of Bristlecone GmbH, Frankfurt am Main as at March 31, 2021 is addressed to the audited company.

At the shareholders' meeting held on March 29, 2021 of

Bristlecone GmbH, Frankfurt am Main
(im Folgenden auch "Gesellschaft" genannt)

we were appointed as auditors of the annual financial statements for the financial year from April 1, 2020 until March 31, 2021. Accordingly, the Company's management engaged us to audit the annual financial statements, together with the accounting records, for the financial year from April 1, 2020 until March 31, 2021 in analogous voluntary application of §§ 316 and 317 of the German Commercial Code (*Handelsgesetzbuch*, "HGB").

The Company is classified as a small corporation as defined in § 267 (1) HGB and, pursuant to §§ 316 *et seq*. HGB, is therefore exempt from the requirement to have its financial statements and management report audited.

We confirm that we have conducted our audit in compliance with the applicable independence regulations pursuant to § 321 (4a) HGB.

Our engagement is not subject to any reasons for exclusion pursuant to §§ 319, 319 a, 319 b HGB, §§ 49 and 53 of the German Public Accountants Act (*Wirtschaftsprüferordnung*, "WPO") and §§ 28 *et seq*. of the Professional Charter for Professional Accountants in Public Practice (*Berufssatzung für Wirtschaftsprüfer/ vereidigte Buchprüfer*, "BS WP/vBP").

We carried out our engagement at our offices in April 2021. The long form audit report was then completed.

We have documented the nature and scope of our audit procedures in our working papers.

We present the following report on the findings of our audit procedures.

We have appended the audited 2020/2021 annual financial statements, comprising the balance sheet **(Annex 1)**, the income statement **(Annex 2)** and the notes to the annual financial statements **(Annex 3)** to this report.

We have prepared this audit report in accordance with Auditing Standard IDW 450 (revised) "German Generally Accepted Standards on the Preparation of Long form Audit Reports" (*Grundsätze ordnungsmäßiger Erstellung von Prüfungsberichten*) as promulgated by the Institut der Wirtschaftsprüfer in Deutschland e.V. (IDW), Düsseldorf.

The terms governing this engagement and our liability, including towards third parties, are set out in the General Engagement Terms for Wirtschaftsprüfer and Wirtschaftsprüfungsgesellschaften [German Public Auditors and Public Audit Firms] (*Allgemeine Auftragsbedingungen für Wirtschaftsprüfer und Wirtschaftsprüfungsgesellschaften*) in the version dated 1 January 2017, which are attached to this report as **Annex 5**. The following modification applies with respect to the limitation of liability set out in no. 9 (2) of the "General Engagement Terms for Wirtschaftsprüfer and Wirtschaftsprüfungsgesellschaften" in the version dated 1 January 2017: The limitation applies only in instances of simple negligence, applies solely to claims for damages arising in connection with the contractual relationship between us and you and applies only if the maximum amount of the liability is insured. No. 1 (2) and No. 9 of the General Engagement Terms are controlling with respect to third parties.

This report on the audit of the annual financial statements is not intended for disclosure to third parties. If it is disclosed or made available to third parties with our consent, the Company shall undertake to agree with such third parties in writing that the agreed upon liability provisions shall also apply to potential thirdparty claims against us.

B. Basic findings

I. Opinion on the executive director's assessment of the company's position

In accordance with § 321 (1) sentence 2 HGB, we provide below in our report our opinion on the executive directors' assessment of the position of the Company in the annual financial statements.

We issue our opinion on the basis of our own assessment of the economic position of the Company, which we gained in the course of our audit of the annual financial statements.

Specifically, we examined the going concern assumption and the assessment of the future development of the Company, as expressed in the annual financial statements.

The documents audited by us in accordance with § 321 (1) sentence 2 HGB comprised those documents which constituted the direct subject matter of our audit of the annual financial statements, i.e., the accounting records, the annual financial statements as well as any documents such as cost accounting records, planning projections, significant agreements, sets of minutes and reports to the persons responsible for supervision and monitoring, which we examined in the course of our audit.

We considered the management's presentation and assessment of the Company's position and its expected development in the annual financial statements to be accurate.

The management has duly exercised the option exempting it from preparing a management report. It was therefore not possible for us to evaluate the management's assessment of the Company's position in accordance with § 321 (1) sentence 2 HGB in reference to the management report. Nor was it our responsibility as auditors to include such an assessment in the audit report on behalf of the executive directors.

Our audit has found that the going concern assumption is correct.

C. Replication of the Audit Opinion

We have granted the following audit opinion as stated below to the financial statements as of March 31, 2021 of Bristlecone GmbH, Frankfurt am Main:

Audit Opinion

To Bristlecone GmbH:

We have audited the annual financial statements of Bristlecone GmbH, Frankfurt am Main, which comprise the balance sheet as at March 31, 2021, and the income statement for the financial year from April 1, 2020 until March 31, 2021, and notes to the financial statements, including the recognition and measurement policies presented therein.

In our opinion, based on the findings of our audit, the accompanying annual financial statements comply in all material respects with the requirements of German commercial law applicable to corporations and give a true and fair view of the net assets and financial position of the Company as at March 31, 2021 as well as the results of operations for the financial year from April 1, 2020 until March 31, 2021 in accordance with German principles of proper accounting. Pursuant to § [Article] 322 Abs. [paragraph] 3 Satz [sentence] 1 HGB [Handelsgesetzbuch: German Commercial Code], we declare that our audit has not led to any reservations relating to the legal compliance of the annual financial statements.

Basis for the Audit Opinion

We conducted our audit of the annual financial statements in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Annual Financial Statements" section of our auditor's report. We are independent of the Company in accordance with the requirements of German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the annual financial statements.

Executive Directors' Responsibilities for the Annual Financial Statements

The executive directors are responsible for the preparation of the annual financial statements that comply, in all material respects, with the requirements of German commercial law, and that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles. Furthermore, management is responsible for such internal control as management determines in accordance with German principles of proper accounting is necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the executive directors are responsible for assessing the Company's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting, provided no actual or legal circumstances conflict therewith.

Auditor's Responsibilities for the Audit of the Annual Financial Statements

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion on the annual financial statements. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence economic decisions of users taken on the basis of these annual financial statements.

We exercise professional judgment and maintain professional scepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal control relevant to the audit of the annual financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit opinion on the effectiveness of this system of the Company.
- Evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive directors and related disclosures.
- Conclude on the appropriateness of the executive directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw

attention in the auditor's report to the related disclosures in the annual financial statements, if such disclosures are inadequate, to modify our audit opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to be able to continue as a going concern.

- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements present the underlying transactions and events in a manner that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

D. Subject, natur and scope of the audit

I. Subject of the audit

In accordance with § 317 HGB, as part of our engagement we have audited the accounting records and the annual financial statements, which were prepared in accordance with German accounting requirements, in order to verify compliance with the relevant statutory requirements.

The executive directors are responsible for the accounting, the accounting related internal controls and the information provided to us in our function as the auditors. Our responsibility as the auditors is to express an opinion on these documents based on the accounting records and the information provided to us in our audit.

The audit of compliance with other statutory requirements only falls within the scope of our audit to the extent that these other requirements commonly affect the annual financial statements prepared in accordance with German accounting requirements.

Our audit of the annual financial statements did not include any special review for the purposes of identifying irregularities in relation to monetary or service transactions (misappropriation audit). Our audit activities did not reveal any indications that would have necessitated any further examinations in that regard.

II. Nature and scope of the audit procedures

We conducted our audit in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW).

Pursuant to § 317 (4a) HGB, our audit does not extend to whether assurances can be made as to the continued existence of the audited entity as a going concern or the effectiveness and efficiency of its management.

The basis for our risk and process oriented audit approach was the development of an audit strategy. This is based on an assessment of the economic and legal bases for the Company, its objectives, strategies and business risks, which we assessed on the basis of critical success factors. The audit of the accounting related internal control system and its effectiveness was supplemented by process analyses, which we conducted with the objective of determining their influence on relevant items of the annual financial statements, thereby enabling us to estimate the risk of errors and our own audit risk.

We selected the analytical audit procedures (plausibility assessments) and tests of details in relation to the substantiation of balances, recognition, presentation and measurement in the annual financial statements based on the findings from our audit of processes and the accounting related internal control system. In the individual audit plan for the company, we defined the focal points of our audit, the nature and scope of our audit activities as well as the sequencing of audit procedures and the use of human resources. In so doing, we observed the principles of materiality and risk orientation and therefore arrived at our audit opinion primarily on a test basis.

The critical audit objectives identified in our audit strategy resulted in the identification of the following focal points for our audit:

Trade receivables as well as receivables from and payables to related parties.

Third-party confirmations were obtained as follows and subject to the following criteria:

Bank confirmations were obtained from credit institutions.

The opening balance sheet amounts were properly taken from the prior-year annual financial statements audited by us.

All necessary explanations and evidence requested by us at our due discretion to enable us to duly perform our audit were provided by the executive directors. The management has provided us with written confirmation of the completeness of the accounting records and the annual financial statements in the letter of representation obtained by us.

E. Findings and explanatory notes regarding the accounting

I. Propriety of the accounting

1. Accounting records and related documents

In our audit, we found that, in all material respects, the accounting records and further audited documents comply with the statutory requirements, including the German Legally Required Accounting Principles.

We found the Company's records of transactions to be complete, continuous and timely. The chart of accounts renders it possible to clearly and transparently organise the accounting data with a sufficient level of detail in keeping with the interests of the Company. In instances where accounting vouchers were inspected in the course of our audit, all such vouchers contained the necessary information to enable proper documentation. The vouchers were filed in a transparent manner. The accounting records therefore satisfied, in all material respects, the statutory requirements for the entire financial year.

The organisation of the accounting records, the internal control system, the flow of data and the records management system facilitate the complete, accurate, timely and orderly recognition and posting of transactions.

Our audit found that, in all material respects, the information obtained from further audited documents was properly reflected in the accounting records and in the annual financial statements prepared in accordance with German accounting requirements.

The Company's financial reporting (financial book keeping, fixed asset accounting, payroll accounting) is managed externally by the accounting and tax advising firm Schiff-Martini & Cie. GmbH, Frankfurt am Main.

No significant organisational changes were made to the accounting processes during the year under review.

In our opinion, there are no indications that the organisational and technical measures taken by the Company are not appropriate to ensure the security of accounting relevant data and IT systems.

2. Annual financial statements

In all material respects, the annual financial statements as at March 31, 2021, prepared in accordance with German accounting requirements and submitted to us for audit, complied with all applicable statutory requirements, including the German Legally Required Accounting Principles and all size-related, legal form related and sector specific requirements.

We found the balance sheet and the income statement of Bristlecone GmbH, Frankfurt am Main for the financial year from April 1, 2020 to March 31, 2021 to be properly derived from the accounting records and the other audited documents. The relevant recognition, presentation and measurement requirements were, in all material respects, complied with, as was the principle of continuity set out in § 252 (1) no. 6 HGB.

With respect to the propriety of the disclosures contained in the notes, which we do not report on elsewhere, we note that the reporting in the notes has been carried out by the executive directors in full and to the extent required by law.

II. Overall presentation of the annual financial statements

1. Conclusions on the overall presentation of the annual financial statements

In our opinion, the annual financial statements – i.e., the overall assertion of the annual financial statements provided by the interaction of balance sheet, income statement and notes – give a true and fair view of the net assets, financial position and results of operations of the Company in accordance with German Legally Required Accounting Principles (§ 264 (2) HGB).

2. Measurement bases

The measurement bases in accordance with § 321 (2) sentence 4 clause 1 HGB comprise the accounting and valuation methods and the relevant factors affecting the valuation of assets and liabilities (parameters, assumptions and the exercise of discretion).

No changes were made to the measurement bases during the reporting period.

For information on the presentation of the material measurement bases, please refer to the corresponding disclosures in the notes, because their inclusion in this audit report would only be repetive.

F. Concluding Remark

The audit report was prepared in accordance with legal requirements and the principles of drawing up audit reports established by the German Institute of Chartered Accountants ("Grundsätze ordnungsmäßiger Berichterstattung bei Abschlussprüfungen" (IDW PS 450)).

Any use of the above reproduced auditor's opinion outside of this audit report is subject to our prior consent.

Notes to the financial statements for the fiscal year from April 1, 2020 to March 31, 2021

I. GENERAL EXPLANATIONS TO THE BALANCE SHEET AND INCOME STATEMENT

Bristlecone GmbH, Frankfurt am Main (referred to below as the "Company"), has its seat in Frankfurt am Main and has been registered in the trade register at the local court in Frankfurt am Main in department B, with number 58387.

The financial statements of the Company for the fiscal year ended March 31, 2021 have been prepared according to the Sect. 242 ff. and 264 ff. of the German Commercial Code (HGB) and the relevant Sections of the Law on Limited Liability Companies (GmbHG).

The income statement is structured towards the cost-summary method in accordance with Sect. 275 Para. 2 German Commercial Code (HGB).

The Company is a small corporation according to Sect. 267 Para. 1 German Commercial Code (HGB).

II. ACCOUNTING POLICIES

1. Fixed assets

Purchased intangible assets are stated at acquisition cost less regular depreciation.

Tangible assets are stated at acquisition or production cost and, if utilizable, depreciated through the useful life.

Depreciation on additions to tangible assets is calculated pro rata temporis.

Low value items are fully depreciated in the year of acquisition.

Depreciation takes place as follows:

Item	Depreciation method	Useful lifetime
Other equipment, operational and office equipment	straight line	3 - 13 years

2. Accounts receivable and other assets

Accounts receivable and other assets are stated at nominal value or their net realizable value.

3. Provisions and accrued liabilities

Tax accruals, other provisions and accrued liabilities are stated with the settlement amount based on reasonable business judgement and cover all identifiable risks from uncertain liabilities and anticipated losses from pending transactions.

4. Liabilities

Liabilities are stated at the settlement amount.

5. Deferred assets and liabilities

Deferred taxes resulting from temporary or quasi-permanent differences between the commercial values and the respective tax base of assets, liabilities and deferred items as well as from tax loss carry forwards are measured at the tax rates specific to the Company that are expected to apply to the period when the asset is realised or the liability is settled and are not discounted. Deferred tax assets and deferred tax liabilities are offset. Deferred taxes were set up according to § 249 HGB and are stated within the tax provisions.

6. Receivables and payables in foreign currencies

Receivables and payables in foreign currencies are evaluated with the exchange rate at the business transaction date.

Receivables and payables in foreign currencies with a remaining term of less than one year are stated with the average spot exchange rate of the balance sheet date.

Receivables and payables in foreign currencies with a remaining term of more than one year are stated with the average spot exchange rate of the balance sheet date or the lower or higher of cost or market value.

III. INDIVIDUAL COMMENTS TO THE BALANCE SHEET

1. Fixed assets

Reference is made to the separate analysis of fixed assets (see page herein of this exhibit).

2. Other provisions and accrued liabilities

Other provisions and accrued liabilities in the amount of K€ 412 (Rs. 3,54,85,560) mainly represent provisions for outstanding invoices (K€ 154) (Rs. 1,32,64,020), accruals for personnel expenses (K€ 246) (Rs. 2,11,87,980) as well as accruals for the audit of the financial statements (K€ 8) (Rs. 6,89,040) and for legal and advisory fees (K€ 8) (Rs. 6,89,040).

3. Receivables and liabilities from shareholder and affiliated companies

Receivables and liabilities from the shareholder and affiliated companies result from current business operations.

IV. OTHER INDIVIDUAL COMMENTS

1. Affiliated companies

Companies which are directly or indirectly controlled by Mahindra & Mahindra Ltd., Mumbai, India, are considered as affiliated companies.

2. Financial commitments

Substantial financial commitments which are not stated in provisions, liabilities or contingent liabilities, exist of the following commitments from a rental and lease agreement:

	Total amount K€	Total amount K Rs.
Office premises	40	34,45,200
Vehicles	15	12,91,950
	55	47,37,150

The payments refer to the following years:

	Total amount K€	Total amount K Rs.
2021 / 2022	52	44,78,760
2022 / 2023	3	2,58,390
	55	47,37,150

3. Contingent liabilities

As of balance sheet date, there are no contingent liabilities according to Sect. 251 German Commercial Code (HGB) which have to be reported on.

4. Headcount

During the fiscal year the Company employed an average of 8 employees (prior year: 6 employees).

5. Consolidation scope

Mahindra & Mahindra Ltd., Mumbai, India is the ultimate parent company responsible for preparing the consolidated financial statements for the largest and smallest group of companies.

6. Translation into Indian Rupees

The financial information in this financial statements is presented in Euro (EUR) and Indian Rupees (INR). EUR amounts as at end of the year ended 31 March 2021 and 31 March 2020 have been translated for convenience into Indian Rupees at the closing exchange rate of EUR 1 = INR 86.13 as at 31 March 2021.

Annexure 4

Audit Opinion

To Bristlecone GmbH:

We have audited the annual financial statements of Bristlecone GmbH, Frankfurt am Main, which comprise the balance sheet as at March 31, 2021, and the income statement for the financial year from April 1, 2020 until March 31, 2021, and notes to the financial statements, including the recognition and measurement policies presented therein.

In our opinion, based on the findings of our audit, the accompanying annual financial statements comply in all material respects with the requirements of German commercial law applicable to corporations and give a true and fair view of the net assets and financial position of the Company as at March 31, 2021 as well as the results of operations for the financial year from April 1, 2020 until March 31, 2021 in accordance with German principles of proper accounting.

Pursuant to § [Article] 322 Abs. [paragraph] 3 Satz [sentence] 1 HGB [Handelsgesetzbuch: German Commercial Code], we declare that our audit has not led to any reservations relating to the legal compliance of the annual financial statements.

Basis for the Audit Opinion

We conducted our audit of the annual financial statements in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer [Institute of Public Auditors in Germany] (IDW). Our responsibilities under those requirements and principles are further described in the "Auditor's Responsibilities for the Audit of the Annual Financial Statements" section of our auditor's report. We are independent of the Company in accordance with the requirements of German commercial and professional law, and we have fulfilled our other German professional responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the annual financial statements.

Executive Directors' Responsibilities for the Annual Financial Statements

The executive directors are responsible for the preparation of the annual financial statements that comply, in all material respects, with the requirements of German commercial law, and that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles. Furthermore, management is responsible for such internal control as management determines in accordance with German principles of proper accounting is necessary to enable the preparation of annual financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the annual financial statements, the executive directors are responsible for assessing the Company's ability to continue as a going concern. They also have the responsibility for disclosing, as applicable, matters related to going concern. In addition, they are responsible for financial reporting based on the going concern basis of accounting, provided no actual or legal circumstances conflict therewith.

Auditor's Responsibilities for the Audit of the Annual Financial Statements

Our objectives are to obtain reasonable assurance about whether the annual financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion on the annual financial statements.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with § 317 HGB and in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW) will always detect a material misstatement. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence economic decisions of users taken on the basis of these annual financial statements.

We exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the annual financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our audit opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.
- Obtain an understanding of internal control relevant to the audit of the annual financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an audit opinion on the effectiveness of this system of the Company.
- Evaluate the appropriateness of accounting policies used by the executive directors and the reasonableness of estimates made by the executive directors and related disclosures.
- Conclude on the appropriateness of the executive directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in the auditor's report to the related disclosures in the annual financial statements, if such disclosures are inadequate, to modify our audit opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to be able to continue as a going concern.
- Evaluate the overall presentation, structure and content of the annual financial statements, including the disclosures, and whether the annual financial statements present the underlying transactions and events in a manner that the annual financial statements give a true and fair view of the assets, liabilities, financial position and financial performance of the Company in compliance with German Legally Required Accounting Principles.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDER OF BRISTLECONE (SINGAPORE) PTE. LTD.

Report on the Audit of the Financial Statements

Opinion

We have audited the accompanying financial statements of Bristlecone (Singapore) Pte. Ltd. (the "Company"), which comprise the balance sheet as at 31 March 2021, and statement of comprehensive income, statement of changes in equity and statement of cash flows for the financial year then ended, and notes to the financial statements, including a summary of significant accounting policies, as set out on pages herein.

In our opinion, the accompanying financial statements are properly drawn up in accordance with the provisions of the Companies Act, Chapter 50 (the "Act") and Financial Reporting Standards in Singapore ("FRSs") so as to give a true and fair view of the financial position of the Company as at 31 March 2021 and of the financial performance, changes in equity and cash flows of the Company for the financial year ended on that date.

Basis for Opinion

We conducted our audit in accordance with Singapore Standards on Auditing ("SSAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Accounting and Corporate Regulatory Authority ("ACRA") *Code of Professional Conduct and Ethics for Public Accountants and Accounting Entities* ("ACRA Code") together with the ethical requirements that are relevant to our audit of the financial statements in Singapore, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ACRA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. The other information comprises the Directors' Statement set out on pages herein.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Directors for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with the provisions of the Act and FRSs, and for devising and maintaining a system of internal accounting controls sufficient to provide a reasonable assurance that assets are safeguarded against loss from unauthorised use or disposition; and transactions are properly authorised and that they are recorded as necessary to permit the preparation of true and fair financial statements and to maintain accountability of assets.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The directors' responsibilities include overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on Other Legal and Regulatory Requirements

In our opinion, the accounting and other records required by the Act to be kept by the Company have been properly kept in accordance with the provisions of the Act.

NOTES TO THE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED 31 MARCH 2021

These notes form an integral part of and should be read in conjunction with the accompanying financial statements.

These financial statements for the financial year ended 31 March 2021 were authorised for issue in accordance with a resolution of the directors of Bristlecone (Singapore) Pte. Ltd. on 23 April 2021.

1. GENERAL INFORMATION

The Company is incorporated and domiciled in the Republic of Singapore. The registered office is at 77, Robinson Road, #13-00, Robinson 77, Singapore 068896 and the principal place of business is at 3, Temasek Avenue, #21-00 Centennial Tower, Singapore 039190.

The principal activity of the Company is those of providing software related consulting services.

The Company's immediate holding corporation is Bristlecone India Limited, incorporated in India. The Company's intermediate holding corporation is Bristlecone Limited, incorporated in Cayman Islands. The Company's penultimate holding corporation is Mahindra Holdings Limited, incorporated in India. The Company's ultimate holding corporation is Mahindra & Mahindra Ltd., incorporated in India.

2. SIGNIFICANT ACCOUNTING POLICIES

2.1 Basis of preparation

These financial statements have been prepared in accordance with Singapore Financial Reporting Standards ("FRS") under the historical cost convention, except as disclosed in the accounting policies below.

The preparation of financial statements in conformity with FRS requires management to exercise its judgement in the process of applying the Company's accounting policies. It also requires the use of certain critical accounting estimates and assumptions. The areas involving a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements, are disclosed in Note 3.

The financial statements are presented in Singapore Dollar ("$"), which is the functional currency of the Company.

Interpretations and amendments to published standards effective in 2020

On 1 April 2020, the Company adopted the new or amended FRS and Interpretations of FRS ("INT FRS") that are mandatory for application for the financial year. Changes to the Company's accounting policies have been made as required, in accordance with the transitional provisions in the respective FRS and INT FRS.

The adoption of these new or amended FRS and INT FRS did not result in substantial changes to the Company's accounting policies and had no material effect on the amounts reported for the current or prior financial years.

2.2 Financial assets

a) Classification and measurement

The Company classifies its financial assets into the following measurement categories:

- Amortised cost;
- Fair value through other comprehensive income (FVOCI); and
- Fair value through profit or loss (FVPL).

The Company classifies and measures its financial assets at amortised cost.

The classification of debt instruments depends on the Company's business model for managing the financial assets as well as the contractual terms of the cash flows of the financial assets.

Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payment of principal and interest.

The Company reclassifies debt instruments when and only when its business model for managing those assets changes.

(i) *<u>At initial recognition</u>*

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial assets.

(ii) *<u>At subsequent measurement</u>*

Debt instruments mainly comprise of cash and bank balances, trade and other receivables and other current assets.

The subsequent measurement category depending on the Company's business model formanaging the asset and the cash flow characteristics of the asset:

- Amortised cost: Debt instruments that are held for collection of contractual cash flows where those cash flows represent solely payments of principal and interest are measured at amortised cost. A gain or loss on a debt instrument that is subsequently measured at amortised cost and is not part of a hedging relationship is recognised in profit or loss when the asset is derecognised or impaired. Interest income from these financial assetsis included in interest income using the effective interest rate method.

b) Impairment

The Company assesses on forward looking basis the expected credit losses associated with its debt instruments carried at amortised cost.

For trade receivable, the Company applied the simplified approach permitted by the FRS 109, which requires expected lifetime losses to be recognised from initial recognition of the receivables.

For other financial assets, the general 3 stage approach is applied. Credit loss allowance is based on 12-month expected credit loss if there is no significant increase in credit risk since initial recognition of the assets. If there is a significant increase in credit risk since initial recognition, lifetime expected credit loss will be calculated and recognised.

2.3 Trade and other payables

Trade and other payables represent liabilities for goods and services provided to the Company prior to the end of financial year which are unpaid. They are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). Otherwise, they are presented as non-current liabilities.

Trade and other payables are initially recognised at fair value, and subsequently carried at amortised cost using the effective interest method.

2.4 Revenue recognition

Revenue is measured based on the consideration to which the Company expects to be entitled in exchange for transferring the promised services to a customer. Revenue is recognised when the Company satisfies a performance obligation by transferring a promised service to the customer, which is when the customer obtains control of the service. A performance obligation may be satisfied at a point in time or over time. The amount of revenue recognised is the amount allocated to the satisfied performance obligation. Revenue are presented, net of goods and services tax, rebates and discounts.

The Company provide software related consulting services. Revenue is recognised when the control over the agreed services has been transferred to the customer. At contract inception, the Company assesses whether the Company transfers control of the services over time or at a point in time by determining if (a) its performance does not create an asset with an alternative use to the Company; and (b) the Company has an enforceable right to payment for performance completed to date.

For contract where the asset created has no alternative use for the Company due to contractual restriction, and the Company has enforceable rights to payment arising from the contractual terms, revenue is recognised over time by reference to the Company's progress towards completing the asset. The measure of progress is determined based on the proportion of actual service provided to date relative to the estimated total services to be provided. This is determined based on the direct expenses incurred or actual labour hours spent relative to the total expected labour hours.

For contracts where the Company does not have an enforceable right to payment, revenue is recognised only when the asset is delivered to the customers and the customers have accepted it in accordance with the contract.

Estimates of revenues, costs or extent of progress toward completion are revised if circumstances change. Any resulting increases or decreases in estimated revenues or costs are reflected in the profit or loss in the period in which the circumstances that give rise to the revision become known by management.

The customer is invoiced on a milestone payment schedule. A contract asset is recognised when the Company has performed under the contract but has not yet billed the customer. Conversely, a contract liability is recognised when the Company has not yet performed under the contract but has billed the customer. Contract assets are transferred to the receivables when the rights to consideration become unconditional. Contract liabilities are recognised as revenue when the Company performs under the contract.

2.5 Employee compensation

Employee benefits are recognised as an expense, unless the cost qualifies to be capitalised as an asset.

Defined contribution plans

Defined contribution plans are post-employment benefit plans under which the Company pays fixed contributions into separate entities such as the Central Provident Fund on a mandatory, contractual or voluntary basis. The Company has no further payment obligations once the contributions have been paid.

2.6 Leases

When the Company is the lessee

At the inception of the contract, the Company assesses if the contract contains a lease. A contract contains a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Reassessment is only required when the terms and conditions of the contract are changed.

- Right-of-use assets

  The Company recognised a right-of-use asset and lease liability at the date which the underlying asset is available for use. Right-of-use assets are measured at cost which comprises the initial measurement of lease liabilities adjusted for any lease payments made at or before the commencement date and lease incentive received. Any initial direct costs that would not have been incurred if the lease had not been obtained are added to the carrying amount of the right-of-use assets.

  The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the earlier of the end of the useful life of the right-of-use asset or the end of the lease term.

- Lease liabilities

  Lease liability is measured at amortised cost using the effective interest method. Lease liability shall be remeasured when:

  - There is a change in future lease payments arising from changes in an index or rate;
  - There is a change in the Company's assessment of whether it will exercise an extension option; or
  - There is modification in the scope or the consideration of the lease that was not part of the original term.

  Lease liability is remeasured with a corresponding adjustment to the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

- Short-term and low-value leases

  The Company has elected to not recognise right-of-use assets and lease liabilities for short-term leases that have lease terms of 12 months or less and leases of low value leases. Lease payments relating to these leases are expensed to profit or loss on a straight-line basis over the lease term.

- Variable lease payments

  Variable lease payments that are not based on an index or a rate are not included as part of the measurement and initial recognition of the lease liability. The Company shall recognise those lease payments in profit or loss in the periods that triggered those lease payments.

2.7 Income taxes

Current income tax for current and prior periods is recognised at the amount expected to be paid to or recovered from the tax authorities, using the tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and considers whether it is probable that a tax authority will accept an uncertain tax treatment. The Company measures its tax balances either based on the most likely amount or the expected value, depending on which method provides a better prediction of the resolution of the uncertainty.

Deferred income tax is recognised for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements except when the deferred income tax arises from the initial recognition of an asset or liability that affects neither accounting nor taxable profit or loss at the time of the transaction.

A deferred income tax liability is recognised on temporary differences, except where the Company is able to control the timing of the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. A deferred income tax asset is recognised to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilised.

Deferred income tax is measured:

(i) at the tax rates that are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted by the balance sheet date; and

(ii) based on the tax consequence that will follow from the manner in which the Company expects, at the balance sheet date, to recover or settle the carrying amounts of its assets and liabilities.

Current and deferred income taxes are recognised as income or expense in profit or loss.

2.8 Cash at bank

For the purpose of presentation in the statement of cash flows, cash at bank include cash on hand and deposits with financial institutions which are subject to an insignificant risk of change in value.

2.9 Provisions for other liabilities and charges

Provisions for other liabilities and charges are recognised when the Company has a present legal or constructive obligation as a result of past events, it is more likely than not that an outflow of resources will be required to settle the obligation and the amount has been reliably estimated. Provisions are not recognised for future operating losses.

2.10 Currency translation

The financial statements are presented in Singapore Dollar ("$"), which is the functional currency of the Company.

Transactions in a currency other than the functional currency ("foreign currency") are translated into the functional currency using the exchange rates at the dates of the transactions. Currency exchange differences resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies at the closing rates at the balance sheet date are recognised in profit or loss. Non-monetary items measured at fair values in foreign currencies are translated using the exchange rates at the date when the fair values are determined.

Foreign exchange gains and losses that relate to borrowings are presented in the income statement within "finance expenses". All other foreign exchange gains and losses impacting profit or loss are presented in the income statement within "Other gain/(loss), net".

2.11 Share capital

Ordinary shares are classified as equity. Incremental costs directly attributable to the issuance of new ordinary shares are deducted against the share capital account.

2.12 Fair value estimation of financial assets and liabilities

The fair values of current financial assets and liabilities carried at amortised cost approximate their carrying amounts.

3. CRITICAL ACCOUNTING ESTIMATES, ASSUMPTIONS AND JUDGEMENTS

Estimates, assumptions and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Critical accounting estimates and assumptions

Impairment of trade receivables

As at 31 March 2021, the Company's trade receivables amounted to $368,808 (2020: $2,767,317) (Note 5), arising from the Company's software related consulting services.

Based on the Company's historical credit loss experience, management has determined the expected loss rates by grouping the receivables according to the category of internal credit rating.

The Company's credit risk exposure for trade receivables are set out in Note 17(b).

4. CASH AT BANK

	2021	2020
	$	$
Cash at bank	**2,023,954**	299,145

5. TRADE AND OTHER RECEIVABLES

	2021	2020
	$	$
Trade receivables		
– non-related parties	**368,808**	2,767,317
Other receivable		
– related corporation	**–**	11,167
	368,808	2,778,484

Other receivable from related corporation is unsecured, interest free and repayable on demand.

6. OTHER CURRENT ASSETS

	2021	2020
	$	$
Deposits	**10,995**	2,015
Prepayments	**3,999**	3,609
Other current assets	**–**	2,029
	14,994	7,653

7. TRADE AND OTHER PAYABLES

	2021	2020
	$	$
Trade payable		
– immediate holding corporation	**429,199**	1,258,798
Other payable		
– immediate holding corporation	**–**	6,411
– related corporation	**137,235**	68,121
– non-related parties	**656**	11,457
Accrued operating expenses		
– non-related parties	**16,500**	99,662
Goods and Service Tax payable	**52,559**	153,012
	636,149	1,597,461

Other payables to immediate holding corporation and related corporation are unsecured, interest free and repayable on demand.

8. PROVISION

	2021	2020
	$	$
Provision of legal claim	**71,200**	71,200

The provision is in respect of a legal claim brought against the Company by a customer. Since the case remain ongoing, the outcomes of these legal claims cannot be ascertained. However, the Company has recorded a provision of $71,200 as at 31 March 2021 based on management's best estimates.

9. SHARE CAPITAL

All issued ordinary shares are fully paid. There is no par value for these ordinary shares.

The Company's share capital comprises fully paid-up 1,670,000 (2020: 1,670,000) ordinary shares with no par value, amounting to a total of $1,670,000 (2020: $1,670,000).

Fully paid ordinary share carry one vote per share and carry a right to dividends as and when declared by the Company.

10. REVENUE

(a) Service revenue from contracts with customer

	2021	2020
	$	$
Rendering of service	**4,096,897**	2,754,858

(b) Contract assets and liabilities

	2021	2020
	$	$
Contract assets	**12,320**	100,088
Contract liabilities	**712,061**	877,688

The contract assets balance decreased due to lesser contracts in which the Company provided more services ahead of the agreed payment schedules.

The contract liabilities balance decreased due lesser contract in which the Company billed ahead of the provision of services to customer.

11. OTHER (LOSS)/GAIN, NET

	2021	2020
	$	$
Currency translation (loss)/gain, net	**(236,192)**	21,868

12. EXPENSES BY NATURE

	2021	2020
	$	$
Employee compensation (Note 13)	**64,344**	153,183
Professional and consulting fee	**19,827**	24,097
Legal fee	**65,069**	140,523

	2021	2020
	$	$
Lease expenses – Short-term lease	**4,026**	3,936
Management fees	**137,235**	74,532
Subcontractor cost	**3,178,999**	1,883,558

13. EMPLOYEE COMPENSATION

	2021	2020
	$	$
Salaries, bonus, commission and allowances	**61,844**	151,058
Directors' fees	**2,500**	2,125
	64,344	153,183

14. INCOME TAX EXPENSE

The tax on the Company's profit before income tax differs from the theoretical amount that would arise using the Singapore standard rate of income tax is as follows:

	2021	2020
	$	$
Profit before income tax	**361,645**	410,907
Tax calculated at a tax rate of 17% (2020: 17%)	**61,480**	69,854
Expenses not deductible for tax purposes	**27,853**	19,366
Utilisation of tax losses not recognised previously	**(89,333)**	(89,220)
Tax charge	**–**	–

Deferred tax assets are recognised for tax losses carried forward to the extent that realisation of the related tax benefits through future taxable profits is probable. The Company has unrecognised tax losses of approximately $274,642 (2020: $800,126) at the balance sheet date which can be carried forward and used to offset against future taxable income subject to the agreement of the tax authorities and compliance with certain statutory requirements. The tax losses have no expiry date.

15. RELATED PARTY TRANSACTIONS

In addition to the information disclosed elsewhere in the financial statements, the following transactions took place between the Company and related parties at terms agreed between the parties:

	2021	2020
	$	$
(a) Sales and purchases of services		
Rendering of services		
Immediate holding corporation		
Marketing fees	**–**	50,000
Related corporation		
Professional service charges	**80,672**	180,921
Purchase of services		
Immediate holding corporation		
Subcontractor fees	**3,154,348**	1,812,505
Management fees (Note 12)	**–**	6,411
Related corporation		
Management fees (Note 12)	**137,235**	68,121
Interest expense	**–**	14,723

Related parties comprise mainly companies which are controlled or significantly influenced by the Company's key management personnel and their close family members.

Outstanding balances as at 31 March 2021 and 2020, arising from sales and purchases of services, are unsecured and receivable/payable within 12 months from balance sheet date and are disclosed in Notes 5 and 7 to the financial statements.

(b) *Key management compensation*

Except for the directors of the Company, there are no other key management personnel. Among the three directors, other than Mr Tiong Hin Won, Eric (Note 13), remuneration for one of them is paid by its immediate holding corporation and for other is paid by a related corporation.

16. COMMITMENT

The future minimum lease payable under non-cancellable operating leases contracted for as at the balance sheet date but not recognised as liabilities are as follows:

	2021	2020
	$	$
Not later than one year	**3,222**	2,952

17. FINANCIAL RISK MANAGEMENT

The Company's activities expose it to market risk (including currency risk, interest rate and price risk), credit risk, liquidity risk and capital risk. The financial risk management is handled by the immediate holding corporation as part of the operations of the Group.

(a) *Market risk*

(i) *Currency risk*

The Company is exposed to transactional currency risk primarily through sales and purchases that are denominated in a currency other than the functional currency of the Company to which they relate. The currencies giving rise to this risk are mainly the United States Dollar ("USD") and Indonesian Rupiah ("IDR"). Foreign exchange exposures in transactional currencies other than functional currency of the Company are kept to an acceptable level.

The Company's currency exposure based on the information provided to the board of directors is as follows:

	SGD	USD	IDR	Total
	$	**$**	**$**	**$**
2021				
Financial Assets				
Cash at bank	**795,690**	**1,228,264**	**–**	**2,023,954**
Trade and other receivables	**11,787**	**357,021**	**–**	**368,808**
Contract assets	**–**	**12,320**	**–**	**12,320**
Other current assets	**3,196**	**7,799**	**–**	**10,995**
	810,673	**1,605,404**	**–**	**2,416,077**
Financial Liabilities				
Trade and other payables	**446,355**	**137,235**	**–**	**583,590**
	446,355	**137,235**	**–**	**583,590**
Currency exposure of financial assets	**–**	**1,468,169**	**–**	**1,468,169**

	SGD	USD	IDR	Total
	$	$	$	$
2020				
Financial Assets				
Cash at bank	105,298	193,847	–	299,145
Trade and other receivables	11,167	2,312,184	455,133	2,778,484
Contract assets	–	11,984	88,104	100,088
Other current assets	4,044	–	–	4,044
	120,509	2,518,015	543,237	3,181,761
Financial Liabilities				
Trade and other payables	1,300,924	143,525	–	1,444,449
	1,300,924	143,525	–	1,444,449
Currency exposure of financial assets	–	2,374,490	543,237	2,917,727

If the USD and IDR change against the SGD by 5% with all other variables including tax rate being held constant, the effects arising from net financial liabilities/assets position will be as follows:

	Increase/(decrease) 2021		Increase/(decrease) 2020	
	Net profit	**Equity**	Net profit	Equity
	$	**$**	$	$
USD against SGD				
– strengthened	**73,408**	**73,408**	118,725	118,725
– weakened	**(73,408)**	**(73,408)**	(118,725)	(118,725)

	Increase/(decrease) 2021		Increase/(decrease) 2020	
	Net profit	**Equity**	Net profit	Equity
	$	**$**	$	$
IDR against SGD				
– strengthened	**–**	**–**	**27,162**	**27,162**
– weakened	**–**	**–**	**(27,162)**	**(27,162)**

(ii) *Interest rate and price risks*

The Company has no significant financial assets or liabilities that are exposed to floating interest rate and price risks.

(b) Credit risk

Credit risk refers to the risk that counterparty will default on its contractual obligation, resulting in financial loss to the Company.

For banks and financial institutions, the Company mitigates its credit risks by transacting only with counterparties who are rated "A" and above by independent rating agencies.

There are no significant concentration of credit risk, whether through exposure to individual customers, specific industry sectors and/or regions.

The Company has applied the simplified approach by using the provision matrix to measure the lifetime expected credit losses for trade receivables from customers.

To measure the expected credit losses, these receivables have been grouped based on shared credit risk characteristics and days past due. In calculating the expected credit loss rates, the Company considers historical loss rates for each category of customers, and adjusts for forward-looking macroeconomic data.

Receivables are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the Company. The Company categorises a receivable for write off when a debtor fails to make contractual payment greater than 180 days past due based on historical collection trend. Where receivables have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, these are recognised in profit or loss.

The Company's credit risk exposure in relation to trade receivables from customers as at 31 March 2021 and 31 March 2020 are set out in the provision matrix as follows:

		Past due				
	Current	**Within 30 days**	**30 to 60 days**	**60 to 90 days**	**More than 90 days**	**Total**
	$	**$**	**$**	**$**	**$**	**$**
31 March 2021						
Expected loss rate	**–**	**–**	**–**	**–**	**–**	**–**
Trade receivables	**368,808**	**–**	**–**	**–**	**–**	**368,808**
Loss allowance	**–**	**–**	**–**	**–**	**–**	**–**

		Past due				
	Current	Within 30 days	30 to 60 days	60 to 90 days	More than 90 days	Total
	$	$	$	$	$	$
31 March 2020						
Expected loss rate	–	–	–	–	–	–
Trade receivables	2,063,543	703,774	–	–	–	2,767,317
Loss allowance	–	–	–	–	–	–

There are no credit loss allowance for other financial asset at amortised cost as at 31 March 2021 and 2020.

As the Company does not hold any collateral, the maximum exposure to credit risk for each class of financial instruments is the carrying amount of that class of financial instruments presented on the balance sheet.

The trade receivables of the Company comprise three debtors (2020: three debtors) that represented 97% (2020: 99%) of trade receivables.

The normal trade credit terms granted to customers ranged from 30 to 60 days (2020: 30 to 60 days) or contractual periods based on project contract sales.

The balance of receivables that are past due but not impaired are unsecured in nature. The management is confident that the remaining receivables are recoverable as these accounts are still active.

(c) Liquidity risk

The Company monitors and maintains a level of cash and bank balances deemed adequate by management to finance the Company's operations and to mitigate effects of fluctuations in cash flows.

All financial liabilities of the Company are current for the financial years ended 31 March 2021 and 2020.

(d) Capital risk

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern and to maintain an optimal capital structure so as to maximise shareholder value. In order to maintain or achieve an optimal capital structure, the Company may adjust the amount of dividend payout to shareholder or obtain borrowings.

The Company reviews its capital structure at least annually to ensure that the Company will be able to continue as a going concern. The capital structure of the Company comprises only of issued capital.

(e) Financial instruments by category

The carrying amount of the different categories of financial instruments is as disclosed on the face of the balance sheet, except for the following:

	2021	2020
	$	$
Financial assets, amortised cost	**2,416,077**	3,181,761
Financial liabilities at amortised cost	**583,590**	1,444,449

18. NEW OR REVISED ACCOUNTING STANDARDS AND INTERPRETATIONS

Certain new accounting standards and interpretations have been published that are not mandatory for 31 March 2021 reporting periods and have not been early adopted by the Company. These standards are not expected to have a material impact on the Company in the current or future reporting periods and on foreseeable future transactions.

INDEPENDENT AUDITORS' REPORT

TO THE MEMBERS OF MAHINDRA – BT INVESTMENT COMPANY (MAURITIUS) LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of **Mahindra – BT Investment Company** (Mauritius) Limited, the "Company", which comprise the statement of financial position as at 31 March 2021, and the statement of comprehensive income, statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Company as at 31 March 2021 and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards and the requirements of the Mauritius Companies Act 2001.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing. Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Matter

The supplementary information presented in Indian Rupee in the financial statements is solely for the convenience of the users of the financial statements. The supplementary information presented in Indian Rupee does not form part of the audited financial statements. We have therefore not audited the supplementary information and, accordingly, we do not express an opinion on this supplementary information. This paragraph has no impact on the audit opinion expressed in this auditors' report.

Information Other than the Financial Statements and Auditors' Report Thereon ("Other Information")

Management is responsible for the Other Information. The Other Information comprises the information included under the Corporate Data and Commentary of the Directors sections but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the Other Information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the Other Information and, in doing so, consider whether the Other Information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this Other Information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation of the financial statements in accordance with International Financial Reporting Standards and the requirements of the Mauritius Companies Act 2001, and for such internal control as management determines is necessary to enable the preparation of the financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with International Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with International Standards of Auditing, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal controls.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal controls that we identify during our audit.

Report on Other Legal and Regulatory Requirements

In accordance with the requirements of the Mauritius Companies Act 2001, we report as follows:

- we have no relationship with, or any interests in, the Company other than in our capacity as auditors;
- we have obtained all the information and explanations we have required; and
- in our opinion, proper accounting records have been kept by the Company as far as it appears from our examination of those records.

Use of this report

Our report is made solely to the members of the Company as a body in accordance with Section 205 of the Mauritius Companies Act 2001. Our audit work has been undertaken so that we might state to the Company's members those matters we are required to state to them in an auditors' report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company and the Company's members as a body, for our audit work, for this report, or for the opinion we have formed.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 2021

1. GENERAL INFORMATION AND STATEMENT OF COMPLIANCE WITH INTERNATIONAL FINANCIAL REPORTING STANDARDS ("IFRS")

The Company was incorporated in the Republic of Mauritius under the Mauritius Companies Act 2001 on 9 May 2005 as a private company with liability limited by shares and holds a Global Business Licence issued by the Financial Services Commission. The Company's registered office is SANNE House, Bank Street, TwentyEight, Cybercity, Ebene 72201, Republic of Mauritius.

The principal activity of the Company is to hold investments.

The financial statements of the Company have been prepared in accordance with International Financial Reporting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB").

Indian Rupee ("INR") amounts are included solely for convenience. These transactions should not be construed as representations that the USD amounts actually represent, or have been or could be converted into INR. As the amounts shown in INR are for convenience only, the rate of 1 USD = INR73.59 has been used for the purpose of presentation of the INR amounts in the accompanying financial statements for the year ended 31 March 2021 and 31 March 2020.

2. ADOPTION OF NEW AND AMENDED IFRS

2.1 New and amended standards that are effective for the current year

The Company has applied the following Standards, amendments and Interpretations to existing Standards for the first time for the annual reporting period commencing on 01 April 2020:

Various	Amendments to References to the Conceptual Framework in IFRS Standards
IFRS 3	Definition of a Business (Amendments to IFRS 3)
IAS 1 and IAS 8	Definition of Material (Amendments to IAS 1 and IAS 9)
IFRS 9, IAS 39 and IFRS 7	Interest Rate Benchmark Reform (Amendments to IFRS 9, IAS 39 and IFRS 7)

Management has assessed the impact of these new and revised standards and interpretations and concluded that none of these Standards have a material impact on the disclosure of these financial statements.

2.2 Standards, amendments and Interpretations to existing Standards that are not yet effective and have not been adopted early by the Company

At the date of authorisation of these financial statements, several new, but not yet effective, Standards, amendments to existing Standards and Interpretations have been published by the IASB. None of these Standards, amendments or Interpretations have been adopted early by the Company.

Management anticipates that all relevant pronouncements, will be adopted in the Company's accounting policies for the first period beginning on or after the effective date of the pronouncement. Information on new Standards, amendments to existing Standards and Interpretations is provided below.

IFRS 16	COVID - 19 Related Rent Concessions (Amendment to IFRS 16)
Various	Interest Rate Benchmark Reform Phase 2 (Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16)
IFRS 3	References to the Conceptual Framework (Amendments to IFRS 3)
IAS 16	Proceeds before Intended Use (Amendments to IAS 16)
IAS 37	Onerous Contract - Cost of Fulfilling a Contract (Amendments to IAS 37)
IFRS 1, IFRS 9, IFRS 16 and IAS 41	Annual improvements to IFRS Standards 2019-2020 Cycle (Amendments to IFRS 1, IFRS 9, IFRS 16, IAS 41)
IFRS 17	Insurance Contracts
IFRS 4	Extension of the Temporary Exemption from Applying IFRS 9 (Amendments to IFRS 4)
IAS 1	Classification of Liabilities as Current or Non-current (Amendments to IAS 1)

Management has yet to assess the impact of the above Standards, amendments to existing Standards and Interpretations on the Company's financial statements.

3. SUMMARY OF ACCOUNTING POLICIES

3.1 Overall considerations

The financial statements have been prepared using the significant accounting policies and measurement bases summarised below.

3.2 Revenue

Dividend income is recognised when the Company's right to receive such dividend is established.

Interest income is recognised on the accrual basis using the effective interest method, unless collectability is in doubt.

3.3 Expenses

All expenses are accounted for in the statement of comprehensive income on the accrual basis.

3.4 Taxation

Tax expense recognised in the statement of comprehensive income comprises the sum of deferred tax and current tax not recognised in other comprehensive income or directly in equity.

Current income tax assets and/or liabilities comprise those obligations to, or claims from, fiscal authorities relating to the current or prior reporting years, that are unpaid at the reporting date. Current tax is payable on taxable profit, which differs from profit or loss in the financial statements.

Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting date.

Deferred income taxes are calculated using the liability method on temporary differences between the carrying amounts of assets and liabilities and their tax bases.

3.5 Financial instruments

Recognition, initial measurement and derecognition

Financial assets and financial liabilities are recognised when the Company becomes a party to the contractual provisions of the financial instrument and are measured initially at fair value adjusted by transactions costs. Subsequent measurement of financial assets and financial liabilities is described below.

Financial assets are derecognised when the contractual rights to the cash flows from the financial assets expire, or when the financial asset and all substantial risks and rewards are transferred. A financial liability is derecognised when it is extinguished, discharged, cancelled or expires.

Classification and subsequent measurement of financial assets

Except for those trade receivables that do not contain a significant financing component and are measured at the transaction price in accordance with IFRS 15, all financial assets are initially measured at fair value adjusted for transaction costs, where appropriate.

Financial assets, other than those designated and effective as hedging instruments, are classified into the following categories:

- amortised cost;
- fair value through profit or loss (FVTPL); or
- fair value through other comprehensive income (FVOCI).

In the current year, the Company does not have any financial assets categorised as FVTPL.

The classification is determined by both:

- the Company's business model for managing the financial asset; and
- the contractual cash flow characteristics of the financial asset.

All income and expenses relating to financial assets are recognised in the statement of comprehensive income.

Subsequent measurement of financial assets

Financial assets at amortised cost

Financial assets are measured at amortised cost using the effective interest method if the assets meet the following conditions (and are not designated as FVTPL):

- they are held within a business model whose objective is to hold the financial assets and collect their contractual cash flows; and
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Discounting is omitted where the effect of discounting is immaterial. The Company's cash and cash equivalents fall into this category of financial instruments.

Financial assets at fair value through other comprehensive income ('FVOCI')

The Company accounts for financial assets at FVOCI if the assets meet the following conditions:

- they are held under a business model whose objective it is "hold to collect" the associated cash flows and sell; and
- the contractual terms of the financial assets give rise to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Any gains or losses recognised in other comprehensive income will be recycled upon derecognition of the asset.

Subsequent measurement of financial liabilities

The Company's financial liabilities consist of accruals.

Financial liabilities are measured subsequently at amortised costs, using the effective interest method.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis or realise the asset and settle the liability simultaneously.

3.6 Cash and cash equivalents

Cash and cash equivalents comprise cash at bank. Cash equivalents are short term, highly liquid investments maturing within 90 days from the date of acquisition that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value.

3.7 Equity and reserves

Stated capital is determined using the value of shares that have been issued.

Retained earnings include all current and prior years' results as disclosed in the statement of comprehensive income.

Fair value reserves comprises of accumulated gains and losses relating to financial asset at FVOCI.

3.8 Related parties

A related party is a person or company where that person or company has control or joint control of the reporting company; has significant influence over the reporting company; or is a member of the key management personnel of the reporting company or of a parent of the reporting company.

3.9 Foreign currency translation

Functional and presentation currency

The financial statements are presented in United States Dollar ("USD"), which is also the functional currency of the Company.

Foreign currency transactions and balances

Foreign currency transactions are translated into the functional currency of the Company using the exchange rates prevailing at the dates of the transactions (spot exchange rate). Foreign exchange gains and losses resulting from the settlement of such transactions and from the re-measurement of monetary items denominated in foreign currency at year-end exchange rates are recognised in the statement of comprehensive income.

Non-monetary items are not retranslated at year-end and are measured at historical cost (translated using the exchange rates at the transaction date), except for non-monetary items measured at fair value which are translated using the exchange rates at the date when fair value was determined.

3.10 Provisions

Provisions are recognised when the Company has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation and the amount can be estimated reliably. Timing or amount of the outflow may still be uncertain.

Provisions are measured at the estimated expenditure required to settle the present obligation, based on the most reliable evidence available at the reporting date, including the risks and uncertainties associated with the present obligation. The increase in the provision due to passage of time is recognised as interest expense in the statement of comprehensive income.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole.

3.11 Comparatives

Where necessary, comparative figures have been adjusted to conform to changes in presentation in the current year.

4. SIGNIFICANT MANAGEMENT JUDGEMENT IN APPLYING ACCOUNTING POLICIES AND ESTIMATION CERTAINTY

When preparing the financial statements, management undertakes a number of judgements, estimates and assumptions about the recognition and measurement of assets, liabilities, income and expenses.

Significant management judgements

Significant management judgement in applying the accounting policies of the Company that has the most significant effect on the financial statements is set below.

Determination of functional currency

The determination of the functional currency of the Company is critical since recording of transactions and exchange differences arising therefrom are dependent on the functional currency selected. The directors have considered those factors and have determined that the functional currency of the Company is the USD.

Estimation uncertainty

Information about estimates and assumptions that have the most significant effect on recognition and measurement of assets, liabilities, income and expenses is provided below. Actual results may be substantially different.

Impact of COVID-19

In January 2020, the World Health Organization has declared the outbreak of a novel coronavirus (COVID-19) as a "Public Health Emergency of International Concern," which continues to spread throughout the world and has adversely impacted global commercial activity and contributed to significant declines and volatility in financial markets.

The directors have considered the potential adverse impact of the COVID-19 pandemic on the Company's business activities. Given the nature of the outbreak and ongoing development, there is a high degree of uncertainty and it is not possible at this time to predict the nature of the overall impact on the Company.

FINANCIAL INSTRUMENT RISK

Risk management objectives and policies

The Company is exposed to various risks in relation to financial instruments. The main types of risks are market risk, credit risk and liquidity risk.

The Company's financial assets and financial liabilities by category are summarised below.

	2021	2021	2020	2020
	USD	**INR (Note 1)**	USD	INR (Note 1)
Financial assets				
Non-current				
Financial asset at fair value through other comprehensive income				
Investment in listed equity securities	**3,294,039**	**242,408,330**	1,822,121	134,089,885
Current				
Financial assets measured at amortised cost:				
Cash and cash equivalents	**18,194,837**	**1,338,958,055**	18,124,955	1,333,815,438
Total financial assets	**21,488,876**	**1,581,366,385**	19,947,076	1,467,905,323
Financial liabilities				
Current				
Financial liabilities measured at amortised cost:				
Accruals	**9,393**	**691,232**	15,141	1,114,226

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Company's risk management policies are established to identify and analyse the risks faced by the Company, to set appropriate measures and controls, and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and in the Company's activities.

The most significant financial risks to which the Company is exposed are described below.

5.1 Market risk analysis

The Company is exposed to market risk through its use of financial instruments and specifically to currency risk, interest rate risk and other price risk, which result from both its operating and investing activities.

Foreign currency sensitivity

Foreign currency risk, as defined in IFRS 7: Financial Instruments: Disclosures, arises as the value of future transactions, recognised monetary assets and monetary liabilities denominated in other currencies fluctuate due to changes in foreign exchange rates.

The Company is exposed to foreign exchange risk on account of its financial assets at fair value through other comprehensive income denominated in the Indian Rupee ("INR").

The currency profile of its financial assets and financial liabilities is as follows:

	Financial assets 2021	Financial liabilities 2021	Financial assets 2020	Financial liabilities 2020
	USD	**USD**	USD	USD
Long term exposure				
Indian Rupee (INR)	**3,294,039**	**–**	1,822,121	–
Short term exposure				
United States Dollar (USD)	**18,194,837**	**9,393**	18,124,955	15,141
Total exposure	**21,488,876**	**9,393**	19,947,076	15,141

	Financial assets 2021	Financial liabilities 2021	Financial assets 2020	Financial liabilities 2020
	INR (Note 1)	**INR (Note 1)**	INR (Note 1)	INR (Note 1)
Long term exposure				
Indian Rupee (INR)	**242,408,330**	**–**	134,089,885	–
Short term exposure				
United States Dollar (USD)	**1,338,958,055**	**691,232**	1,333,815,438	1,114,226
Total exposure	**1,581,366,385**	**691,232**	1,467,905,323	1,114,226

The following analysis illustrates the sensitivity of profit and equity with regard to the Company's financial assets and financial liabilities and the USD/INR exchange rate, "all other things being equal".

It assumes a 2% change of the USD/INR exchange rate for the year ended 31 March 2021 (31 March 2020: 9%). The sensitivity analysis is based on the Company's foreign currency financial instruments held at each reporting date.

If the USD had strengthened against the INR by 2%, other comprehensive income and equity would have decreased by **USD 65,881** (2020: USD 163,991). If the USD had weakened against the INR by 2%, then other comprehensive income and equity would have increased by **USD 65,881** (2019: USD 163,991). There would be no impact on profit or loss for the year as the investment denominated in INR comprises listed securities classified as financial asset at fair value through other comprehensive income.

Interest rate sensitivity

The Company's exposure to interest rate risk is limited to its bank balance and the interest thereon is based on market interest rates. At 31 March 2021, the bank balance stood at **USD 18,192,255** (2020: USD 18,079,849), excluding interest receivable and bank interest income earned during the year was **USD 65,990** (2020: USD 340,549). A change in the market interest rate would only impact marginally on the Company's operating cash flows.

Other price sensitivity

The Company is exposed to other price risk in respect of the listed securities held by it, which are listed on the Bombay Stock Exchange and the National Stock Exchange of India. The average volatility observed in the share price during the year ended 31 March 2021 is shown in the table below:

Name of investee company	% change in share price 2021	% change in share price 2020
Tech Mahindra Limited	**75%**	28%

	Other comprehensive income and equity			
	2021 USD	**2021 INR (Note 1)**	2020 USD	2020 INR (Note 1)
Increase	**2,470,529**	**181,806,229**	510,194	37,545,176
Decrease	**(2,470,529)**	**(181,806,229)**	(510,194)	(37,545,176)

The listed securities are classified as a financial asset at fair value through other comprehensive income and therefore no effect on profit has occurred.

5.2 Credit risk analysis

Credit risk is the risk that a counterparty fails to discharge an obligation to the Company.

The Company's exposure to credit risk is limited to the carrying amount of financial assets recognised at the reporting date, as summarised below:

	2021	2021	2020	2020
	USD	**INR (Note 1)**	USD	INR (Note 1)
ASSETS				
Non-current				
Financial asset at fair value through other comprehensive income	**3,294,039**	**242,408,330**	1,822,121	134,089,885

	2021	2021	2020	2020
	USD	INR (Note 1)	USD	INR (Note 1)
Current				
Cash and cash equivalents	**18,194,837**	**1,338,958,055**	18,124,955	1,333,815,438
Total assets	**21,488,876**	**1,581,366,385**	19,947,076	1,467,905,323

The Company holds investment in Tech Mahindra Limited, a listed company incorporated in the Republic of India. As at 31 March 2021, the Company held 242,904 ordinary shares in the investee company, representing a 0.0251% of its shareholding. The fair value of the investment has increased as at year end, resulting in a fair value gain of USD 1,471,918 (2020: loss of USD 902,553) (Note 9).

The credit risk for the bank balance is considered negligible, since the counterparty is a reputable bank with high quality external credit ratings. None of the Company's financial assets are secured by collateral or other credit enhancements.

5.3 Liquidity risk analysis

Liquidity risk is the risk that the Company might be unable to meet its obligations.

The Company manages its liquidity risk by carefully monitoring all its cash inflows and outflows. Cash inflows during the year mainly relate to dividend income and interest income and cash outflows mainly relate to operating expenses.

At 31 March 2021, the Company's financial liabilities have contractual maturities which are summarised below:

	Within 1 year	Within 1 year
	USD	INR (Note 1)
Accruals	**9,393**	**691,232**

This compares with the maturity of the Company's financial liabilities in the previous reporting year as follows:

	Within 1 year	Within 1 year
	USD	INR (Note 1)

6. FAIR VALUE MEASUREMENT

6.1 Fair value measurement of financial instruments

Financial assets and financial liabilities measured at fair value in the statement of financial position are grouped into three Levels of a fair value hierarchy. The three Levels are defined based on the observability of significant inputs to the measurement, as follows:

– Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;

– Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

– Level 3: unobservable inputs for the asset or liability.

The following table shows the Levels within the hierarchy of financial assets measured at fair value on a recurring basis at 31 March 2021 and 31 March 2020:

31 March 2021	**Note**	**Level 1**	**Level 2**	**Level 3**	**Total**
		USD	**USD**	**USD**	**USD**
Assets					
Listed investment	(i)	**3,294,039**	–	–	**3,294,039**

31 March 2021	**Note**	**Level 1**	**Level 2**	**Level 3**	**Total**
		INR (Note 1)	**INR (Note 1)**	**INR (Note 1)**	**INR (Note 1)**
Assets					
Listed investment	(i)	**242,408,330**	–	–	**242,408,330**

31 March 2020	Note	Level 1	Level 2	Level 3	Total
		USD	USD	USD	USD
Assets					
Listed investment	(i)	1,822,121	–	–	1,822,121

31 March 2020	Note	Level 1	Level 2	Level 3	Total
		INR (Note 1)	INR (Note 1)	INR (Note 1)	INR (Note 1)
Assets					
Listed investment	(i)	134,089,885	–	–	134,089,885

There has been no transfers between Level 1 and Level 2 during the years ended 31 March 2021 and 31 March 2020.

Measurement of fair value of financial instruments

The methods used for the purpose of measuring fair value are unchanged compared with the previous reporting year.

(i) Listed investment (Level 1)

The listed equity investment is denominated in INR and is publicly traded on the Bombay Stock Exchange and the National Stock Exchange of India. Fair values have been determined by reference to its quoted closing share price at the reporting date.

The Company's other financial assets and financial liabilities are measured at their carrying amounts, which approximate to their fair values.

6.2 Fair value measurement of non-financial assets and non-financial liabilities

The Company's non-financial asset consists of prepayments and non-financial liability consists of current tax liability. For these items, fair value measurement is not applicable since these are not measured at fair value on a recurring or non-recurring basis in the statement of financial position.

7. CAPITAL MANAGEMENT POLICIES AND PROCEDURES

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to provide returns to its shareholders.

In order to maintain or adjust the capital structure, the Company may adjust the amount of dividends paid to its members, buy back shares or issue new shares.

The Company monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. For the years ended 31 March 2021 and 31 March 2020, the Company was not geared.

8. TAXATION

(i) Income tax

The Company, under current laws and regulations, is liable to pay income tax on its net income at the rate of 15%. The Company is, however, entitled to a tax credit equivalent to the higher of actual foreign tax suffered or 80% of Mauritian tax payable in respect of its foreign source income. Gains or profits arising from sale of units or securities are exempt from tax in the Republic of Mauritius and any dividends or redemption proceeds paid by the Company to shareholders would not attract withholding tax in the Republic of Mauritius.

The Company holds a Global Business Licence for the purpose of the Financial Services Act 2007 of Mauritius. Pursuant to the Finance Act 2018, with effect as from 1 January 2020, the deemed tax credit has been phased out, through the implementation of a new tax regime. Companies which had obtained their Global Business Licence on or before 16 October 2017, including the Company, have been grandfathered and will benefit from the deemed tax credit regime up to 30 June 2021.

Accordingly, the Company is entitled to a foreign tax credit equivalent to the higher of the actual foreign tax suffered or 80% of the Mauritian tax ("Deemed tax credit") on its foreign source income resulting in an effective tax rate on net income of up to 3%, up to 30 June 2021. Further, the Company is exempted from income tax in Mauritius on profits or gains arising from any sale of securities. In addition, there is no withholding tax payable in Mauritius in respect of payments of dividends to shareholders or in respect of redemptions or exchanges of shares.

After 30 June 2021, under the new tax regime and subject to meeting the necessary substance requirements as required under the Financial Services Act 2007 (as amended by the Finance Act 2018) and such guidelines issued by the Financial Services Commission, the Company will be entitled to either (a) a foreign tax credit equivalent to the actual foreign tax suffered on its foreign income against the Company's tax liability computed at 15% on such income, or (b) a partial exemption of 80% of some of the income derived, including but not limited to foreign source dividends or interest income.

Tax expense recognised in profit or loss comprises the sum of deferred tax and current tax not recognised in other comprehensive income or directly in equity.

Calculation of current tax is based on tax rates and tax laws that have been enacted or substantively enacted by the end of the reporting period. Deferred income taxes are calculated using the balance sheet liability method.

At 31 March 2021 the Company has a current tax liability of USD Nil (2020: USD 2,089).

	2021	**2021**	2020	2020
	USD	**INR (Note 1)**	USD	INR (Note 1)
31 March 2021	**–**	**–**	2,089	153,730

Movement in current tax liability

	2021	**2021**	2020	2020
	USD	**INR (Note 1)**	USD	INR (Note 1)
At 01 April	**2,089**	**153,731**	784	57,696
Charge for the year	–	–	2,089	153,731
Paid during the year	**(2,089)**	**(153,731)**	(784)	(57,696)
Current tax liability	**–**	**–**	2,089	153,731

(ii) Deferred taxation

Deferred income taxes are calculated on all temporary differences under the liability method at the rate of 3%. At 31 March 2021, the Company had no temporary differences and hence no deferred taxation is to be recognised in the financial statements

(iii) Income tax reconciliation

The income tax on the Company's profit before tax differs from the theoretical amount that would arise using the effective tax rate of the Company as follows:

	2021	**2021**	2020	2020
	USD	**INR (Note 1)**	USD	INR (Note 1)
Profit before tax	**91,082**	**6,702,726**	368,276	27,101,431
Tax calculated at the rate of 3%	**2,732**	**201,048**	11,048	813,022
Exempt income not subject to tax	**(1,980)**	**(145,708)**	(10,216)	(751,794)
Expenses not allowable for tax purposes	**595**	**43,786**	1,257	92,503
Foreign tax credit	**(1,355)**	**(99,715)**	–	–
Tax expense	–	–	2,089	153,731

(iv) Withholding tax

	2021	**2021**	2020	2020
	USD	**INR**	USD	INR
Withholding tax paid	**13,363**	**983,384**	–	–

At 31 March 2021, a withholding tax of 20%, amounting to USD 13,363 was charged on dividend income earned from investment in Tech Mahindra Limited, a listed company in the Republic of India.

9. FINANCIAL ASSET AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

	2021	**2021**	2020	2020
	USD	**INR (Note 1)**	USD	INR (Note 1)
(i) Fair value

(iii) Fair value reserves for financial asset at fair value through other comprehensive income

	2021	**2021**	2020	2020
	USD	**INR (Note 1)**	USD	INR (Note 1)
At beginning of year	**1,732,076**	**127,463,473**	2,634,629	193,882,348
Fair value adjustment for the year	**1,471,918**	**108,318,445**	(902,553)	(66,418,875)
At end of year	**3,203,994**	**235,781,918**	1,732,076	127,463,473

The World Health Organisation ("WHO") declared the new coronavirus ("COVID-19") outbreak to be a pandemic on 11 March 2020. The Management acknowledges the current outbreak of COVID-19 and its adverse impact on industries and markets. The Management is monitoring the situation closely and have adopted various measures to mitigate the risk involved such as business continuity planning. The fair value of the financial asset at fair value through other comprehensive income as at 31 March 2021 reflects the conditions known as at that date. On 8 April 2021, the fair value of the investment was USD 3,396,497.

(iv) During the year ended 31 March 2021, the Company has earned a dividend income of USD 64,242 inclusive of withholding tax of USD 13,363 (2020: USD 79,351).

10. CASH AND CASH EQUIVALENTS

	2021	2021	2020	2020
	USD	**INR (Note 1)**	USD	INR (Note 1)
Cash at bank – USD	**177,823**	**13,085,995**	735,267	54,108,298
Short term deposits	**18,014,432**	**1,325,682,051**	17,344,582	1,276,387,789
Interest receivable	**2,582**	**190,009**	45,106	3,319,351
Total	**18,194,837**	**1,338,958,055**	18,124,955	1,333,815,438

The Company has fixed deposit placements with HSBC Bank (Mauritius) Limited as at 31 March 2021 which will be matured within three months. During the year ended 31 March 2021, the Company has earned interest income of USD 65,990 (2020: USD 340,549) on its short-term deposits.

11. STATED CAPITAL

	2021& 2020	2021 & 2020
	USD	**INR (Note 1)**
Issued and fully paid:		
11,880,000 Ordinary shares of USD1 each	**11,880,000**	**874,249,200**

In accordance with the Company's Constitution, the main rights and obligations attached to the ordinary shares are as follows:

- confer to its holder the rights to attend and exercise one vote at meetings of members generally and class meetings of the ordinary shares;
- have a right to receive any dividend or distribution; and
- be entitled, on a winding up, to share in the assets of the Company available for distribution.

12. PROFESSIONAL FEES

Total	**28,143**	**2,071,043**	39,395	2,899,078

13. CONTINGENT ASSETS AND LIABILITIES

Contingent assets

On 22 March 2010, the Company disposed part of its shareholding in Tech Mahindra Limited, a listed company incorporated in the Republic of India, to AT&T International, Inc. ("AT&T"). Following the withholding tax order received from the Indian Tax Authorities, AT&T withheld an amount of INR190,061,898 as 'withholding tax' under Section 195 of the Indian Income Tax Act and remitted the amount to the treasury of the Government of India. In the opinion of the Company, there is no tax liability on this transaction as the Company is a resident of the Republic of Mauritius and capital gains realised in the Republic of India on this disposal are therefore exempt from tax under the Mauritius- India Tax Treaty. Accordingly, in line with the decision of its Board of Directors, the Company filed an application to the Authority for Advance Rulings ("AAR") in the Republic of India on the taxability of capital gains under the Mauritius-India Tax Treaty. The AAR pronounced its ruling in favour of the Company on 8 August 2016. However, the Indian Tax Authorities have filed a Writ Petition against the AAR ruling in the High Court of Bombay in India. On 24 January 2019, the Counsel granted the Company's Notice of Motion requesting an early hearing of the Writ Petition. The Writ Petition was listed for final hearing as from the week commencing on 11 February 2019 but has not yet been heard, owing to the volume of cases ahead of it in the list.

During the year ended 31 March 2020, the Counsels representing the Company had planned to mention the matter to Court for early hearing. However, the Counsels of the Indian Tax Authorities were not present at Court and hence the matter was postponed.

In January 2020, the tax bench of the Bombay High Court has changed. The Counsels are deliberating regarding mentioning of this matter before the new bench for an early hearing. Due to the COVID-19 pandemic and lockdown in the Republic of India, the Bombay High Court has prioritised to take urgent matters only for the time being. Matters which were filed and admitted in 2017 have still not been taken up by the High Court. Once Court starts functioning normally, the Counsels will strategise on approaching the court for an early hearing.

Contingent liabilities

At 31 March 2021, the Company had no material litigation claims outstanding, pending or threatened against it, which could have a material adverse effect on its financial position or results.

14. RELATED PARTY TRANSACTIONS

During the year ended 31 March 2021, the Company had no transaction with its related parties.

15. EVENTS AFTER REPORTING DATE

There have been no events after the reporting date, which require disclosure or adjustment to the 31 March 2021 financial statements.

16. HOLDING COMPANIES

The directors regard Mahindra Overseas Investment Company (Mauritius) Ltd, a company incorporated in the Republic of Mauritius, as the Company's immediate holding company and Mahindra and Mahindra Limited, a listed company incorporated in India, as the Company's ultimate holding company.

INDEPENDENT AUDITORS' REPORT

To the Members of Mahindra Intertrade Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Mahindra Intertrade Limited ("the Company"), which comprise the balance sheet as at 31 March 2021, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and profit and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors' Responsibility for the Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, profit/loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are

appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

   (A) As required by Section 143(3) of the Act, we report that:

   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   c) The balance sheet, the statement of profit and loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows dealt with by this Report are in agreement with the books of account

   d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under Section 133 of the Act.

   e) On the basis of the written representations received from the directors as on 31 March 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2021 from being appointed as a director in terms of Section 164(2) of the Act.

   f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

   (B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

   i. The Company has disclosed the impact of pending litigations as at 31 March 2021 on its financial position in its financial statements - Refer Note 32 to the financial statements

   ii. the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses

   iii. there were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company

   iv. The disclosures in the financial statements regarding holdings as well as dealings in specified bank notes during the period from 8 November 2016 to 30 December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31 March 2021.

   (C) With respect to the matter to be included in the Auditors' Report under section 197(16):

   In our opinion and according to the information and explanations given to us, the remuneration paid by the company to its directors during the current year is in accordance with the provisions of Section 197 of the Act read with Schedule V of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

ANNEXURE A TO THE INDEPENDENT AUDITOR'S REPORT – 31 MARCH 2021

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) All fixed assets have been physically verified by the management in accordance with regular programme of verification once in three year which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed on such verification. All discrepancies have been dealt with in the books of account.

(c) According to the information and explanations given by the management, the title deeds of immovable properties included in property, plant and equipment are held in the name of the Company. In respect of leasehold lands, we have verified the lease agreements are duly registered with appropriate authorities.

(ii) The inventories have been physically verified by management, except material in transit at the year end, at reasonable intervals during the year. In our opinion, frequency of verification is reasonable. No material discrepancies were noticed on such physical verification, discrepancies noted have been suitably dealt with in the books of account.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, paragraph 3(iii) of the Order is not applicable to the Company.

(iv) According to the information and explanations given to us, the Company has complied with provisions of Section 185 and 186 of the Act in respect of loans given and investments made. Further, as informed to us the Company has not provided any guarantees and securities during the year.

(v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits from the public within the meaning of Section 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, paragraph 3(v) of the Order is not applicable to the Company.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under Section 148(1) of the Act, for maintenance of cost records in respect of products manufactured by the Company, and are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. We have not, however, made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

(vii) (a) According to the information and explanations given to us and on the basis of our examination of the books of account of the Company, the Company is regular in depositing undisputed statutory dues accrued/ deducted including, Provident Fund, Employees' State Insurance, Income-Tax, Goods and Service Tax and other material statutory dues with the appropriate authorities. Further as informed to us, the Company did not have any dues on account of Sales-tax, Service tax, Customs Duty, Excise Duty, Value Added Tax and Cess.

According to the information and explanations given to us, no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income-Tax, Goods and Service Tax and other material statutory dues were in arrears as at 31 March 2021 for a period of more than six months from the date they became payable. Further as informed to us, the Company did not have any dues on Sales-tax, Service tax, Customs Duty, Excise Duty, Value Added Tax and Cess.

(b) According to the information and explanations given to us, there are no dues of Income Tax, Sales-Tax, Service Tax, Customs duty, Excise duty, Value Added Tax, Goods and Service Tax and Cess which have not been deposited with the authorities on account of any dispute other than those mentioned below:

Name of the Statute	Nature of the Dues	Rupees in Crores		Period to which the amount relates	Forum where dispute is pending
		Amount demanded	Amount not deposited under dispute		
Central Sales Tax Act, 1956	Central Sales Tax	1.12	0.94	2010-11	Appellate Tribunal

(viii) In our opinion and according to the information and explanations given to us by the management, the Company has not taken any loans or borrowings from a financial institutions, banks or government nor has issued any debentures during the year. Accordingly, paragraph 3(viii) of the Order is not applicable to the Company.

(ix) According to the information and explanations given to us by the management, the Company did not raise money by way of term loan, initial public offer or further public offer (including debt instruments) during the year. Accordingly, paragraph 3(ix) of the Order is not applicable to the Company.

(x) To the best of our knowledge and according to the information and explanations given to us, no material fraud by the Company or on the Company by its officers or employees has been noticed or reported during the course of our audit.

(xi) According to the information and explanations given by the management, managerial remuneration has been paid or provided is in accordance with the requisite approvals mandated by the provisions of Section 197 read with schedule V of the Act.

(xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi Company. Accordingly, paragraph 3(xii) of the Order is not applicable to the Company.

(xiii) According to the information and explanations given to us by the management, the Company has entered into transactions with related parties in compliance with the provisions of Section 177 and Section 188 of the Act, where applicable and the details of such related party transaction have been disclosed in the Ind AS financial statements as required by Ind AS 24 Related Party Disclosures specified under Section 133 of the Act.

(xiv) According to the information and explanations given to us by the management, during the year the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures and hence reporting under paragraph 3 (xiv)of the Order is not applicable to the company.

(xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with him. Accordingly, paragraph 3(xv) of the Order is not applicable to the Company.

(xvi) According to the information and explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi) of the Order is not applicable to the Company.

ANNEXURE B TO THE INDEPENDENT AUDITORS' REPORT ON THE FINANCIAL STATEMENTS OF MAHINDRA INTERTRADE LIMITED FOR THE PERIOD ENDED 31 MARCH 2021

Report on the internal financial controls with reference to the aforesaid financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

(Referred to in paragraph 2(A)(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Opinion

We have audited the internal financial controls with reference to financial statements of Mahindra Intertrade Limited ("the Company") as of 31 March 2021 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2021, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021

1. Corporate information

Mahindra Intertrade Limited is a public limited company domiciled in India and is incorporated on 20 March, 1978 under the erstwhile Companies Act, 1956. The registered office of the Company is located at Mahindra Towers, P.K. Kurne Chowk, Worli, Mumbai - 400018.

The Company's main activity is steel processing from the plants located at Nashik and Vadodara. The Company is principally engaged in processing of automotive and electrical steel.

2 Statement of Compliance and Basis of preparation and presentation:

2.1 The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under section 133 of the Companies Act 2013 and other relevant provision of the Act.

All assets and liabilities are classified as current if it is expected to realise or settle within 12 months after the Balance Sheet date.

The financial statements are presented in Indian Rupees (INR) which is also the Company's functional currency. All values are rounded to the nearest crores.

The financial statements were approved by the Board of Directors and authorised for issue on April 26, 2021.

2.2 Use of estimates and judgments:

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

Note No.3.1	Property, plant & equipment
Note No.3.2	Intangible asset acquired separately
Note No.3.8	Employee benefits
Note No.3.16	Leases

3 Significant accounting policies:

3.1 Property, plant & equipment:

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any. Cost includes financing cost relating to borrowed funds attributable to the construction or acquisition of qualifying tangible assets up to the date the assets are ready for use. The estimated useful lives, residual values, are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

When an asset is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit or loss, if any, is reflected in the Statement of Profit and Loss.

Depreciation is calculated on Straight Line method over the estimated useful life of all assets. These lives are in accordance with Schedule II to the Companies Act, 2013, other than the following asset class based on the Company's expected usage pattern :

(a) Vehicles : 5 years

(b) Blanking Line (Nashik) and Roll forming line (Nashik) : 20 years

3.2 Intangible asset acquired separately:

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses, if any. Amortisation is recognised on straight line basis over their estimated useful lives. The estimated useful lives and amortisation method are reviewed at the end of each reporting period, with the effects of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment loss.

3.3 Impairment of assets:

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing the value in use, the estimated future cash flows are discounted at their present value using the pre-tax discount rate that reflects current market assessment of time value of money and the risks specific to the assets for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the Statement of Profit or Loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit or Loss.

3.4 Inventories:

Inventories, except for Stores and spares which are valued at cost, are valued at the lower of cost (on weighted average basis) and the net realisable value after providing for obsolescence and other losses, where considered necessary.

Cost comprises of all costs of purchase, conversion and other costs incurred in bringing the inventories to their present location and condition.

Net Realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Work-in-progress and finished goods include appropriate proportion of overheads.

3.5 Foreign Currencies:

Transactions in currencies other than the Company's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in the Statement of Profit or Loss in the period in which they arise.

3.6 Financial assets and Financial liabilities:

Financial instruments:

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the Statement of Profit or Loss.

Financial assets:

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Impairment of financial assets:

The Company applies the expected credit loss model for recognising impairment loss on financial assets. With respect to trade receivables the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

Derecognition of financial assets:

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the Statement of Profit and Loss if such gain or loss would have otherwise been recognised in the Statement of Profit and Loss on disposal of that financial asset.

Financial liabilities and equity instruments:

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instrument:

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all its liabilities. Equity instrument issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instrument is recognised and deducted directly in equity. No gain or loss is recognised in the Statement of Profit or Loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Financial liabilities:

All the financial liabilities are subsequently measured at amortised cost using the effective interest method or at fair value through profit and loss.

Derecognition of financial liabilities:

The Company derecognises financial liabilities when, and only when, the Company's obligation are discharged, cancelled or have expired. An exchange between the lender of debt instrument with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the term of an existing liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the Statement of Profit or Loss.

Derivative financial instruments:

The Company enters into a variety of derivative financial instruments to manage its exposure to foreign exchange rate risks, including foreign exchange forward contracts. Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in the Statement of Profit and Loss immediately.

3.7 Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company assesses promises in the contract that are separate performance obligations to which a portion of transaction price is allocated.

Revenue is measured based on the transaction price as specified in the contract with the customer. It excludes taxes or other amounts collected from customers in its capacity as an agent. In determining the transaction price, the Company considers:

Significant financing component - Generally, the Company receives short-term advances from its customers. Using the practical expedient in Ind AS 115, the Company does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised good or service to the customer and when the customer pays for that good or service will be one year or less.

The accounting policies for specific revenue streams of the company is summarised below:

Sale of goods:

Customers obtain control of the goods when the goods are delivered to and have been accepted.

Sale of Services:

Service income is recognized over time based on as and when service is performed.

3.8 Employee benefits:

Retirement benefit costs and termination benefits:

Payment to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the return of plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in the other comprehensive income is reflected immediately in retained earnings and is not reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the defined benefit liability or asset. Defined benefit costs are categorised as follows

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);

- net interest expense or income; and
- remeasurement

The Company presents the first two components of defined benefit costs in the Statement of Profit or Loss in the line item “Employee benefits expense”. Curtailment gains and losses are accounted for as past service cost.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company’s defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for the termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring costs.

Short-term and other long-term employee benefits:

A liability is recognized for benefits accruing to the employees in respect of wages and salaries and annual leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange of that service.

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange of related service.

Liabilities recognized in respect of other long-term employee benefits are measured at present value of the estimated future cash outflows expected to be made by the company in respect of services provided by employee upto the reporting date.

3.9 Stock appreciation rights (SARs):

For cash-settled share-based payments, a liability is recognized for the services availed, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognized in the Statement of Profit or Loss for the year.

3.10 Borrowing costs:

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in the Statement of Profit or Loss in the period in which they are incurred.

3.11 Provisions:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

3.12 Taxes on income:

Income Tax expense represents the sum of the tax currently payable and deferred tax.

Current Tax:

The tax currently payable is based on taxable profit for the year. Taxable profit differs from ‘profit before tax’ as reported in the Statement of Profit and Loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company’s current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred Tax:

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences could be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year:

Current and deferred tax are recognized in the Statement of Profit or Loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

3.13 Cash and cash equivalents:

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

3.14 Cash Flow Statement:

Cash flows are reported using the indirect method, whereby profit/(loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating investing and financing activities of the Company are segregated based on the available information.

3.15 Earning per share:

Basic earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares outstanding during the year.

3.16 Leases:

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

As a lessee:

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The Company presents right-of-use assets that do not meet the definition of investment property in 'property and equipment' and lease liabilities in the statement of financial position.

The Company has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

4 Recent Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2021.

Recent pronouncements

On March 24, 2021, the Ministry of Corporate Affairs ("MCA") through a notification, amended Schedule III of the Companies Act, 2013 revising Division I, II and III of Schedule III and are applicable from April 1, 2021. The amendments primarily relate to

a) Change in existing presentation requirements for certain items in Balance sheet, for eg. lease liabilities, security deposits, current maturities of long term borrowings, effect of prior period errors on Equity Share capital.

b) Additional disclosure requirements in specified formats, for eg. ageing of trade receivables, trade payables, capital work in progress, intangible assets, shareholding of promoters, etc.

c) Disclosure if funds have been used other than for the specific purpose for which it was borrowed from banks and financial institutions

d) Additional Regulatory Information, for eg.,compliance with layers of companies, title deeds of immovable properties,financial ratios, loans and advances to key managerial personnel, etc.

e) Disclosures relating to Corporate Social Responsibility (CSR), undisclosed income and crypto or virtual currency.

The amendments are extensive and the Company is evaluating the same.

(ii) The Company has not allotted any equity shares for consideration other than cash , bonus shares, nor have any shares been bought back during the period of five years immediately preceding the Balance Sheet date.

Terms/rights attached to equity shares

The Company has only one class of equity share having a par value of Rs. 10/- per share. Each shareholder has the following voting rights (i) On a show of hands: one vote for a member present in person or being a company present by a representative duly authorised shall have one vote. and (ii) On a poll: the voting rights of every member entitled to vote and present in person (including a company present by representative duly authorised) or by proxy shall be in proportion to his share of the paid up equity capital of the Company. The dividend proposed by the Board of Directors is subject to the approval of the shareholders in the ensuing annual general meeting, except in case of interim dividend. In the event of winding up, the liquidator may, with the sanction of a special resolution of the Company and any other sanction required by the Act, divide amongst the members, in specie or kind, the whole or any part of the assets of the company, whether they shall consist of property of the same kind or not.

Note 35 - Stock Appreciation Rights

In accordance with the directions and recommendations of the Remuneration Committee of the Company, the Company grants SARs to eligible employees/directors. SARs granted would vest over a period of five years, or such period as stipulated by the Remuneration Committee, from the date of grant. Upon vesting of SARs eligible employees are entitled to earn cash benefits as prescribed.

One SAR shall be entitled to a cash benefit which would be the difference between the Fair Value of one fully-paid Equity Share of the Company on the exercise date less the Face Value of the Equity Share of the Company on the grant date. Provided, however, that once SARs have vested, an eligible employee will have the option to exercise the same within a maximum period of three years from the vesting date during such periods of time as determined by the Company.

An Eligible Employee must exercise all the accumulated vested SARs by the Maximum Exercise Period which would be the earlier of the following two events:

(i) 30th June 2024; OR

(ii) Any monetisation event involving the Company, including but not limited to Private Equity Funding/Preferential Allotment of Shares/ Public Offering of Shares/Merger/Demerger, etc.

SARs remaining unexercised at the end of the Maximum Exercise Period (as specified above) or such extended period as may be determined by the Remuneration Committee, shall lapse

The Company has granted Stock Appreciation Rights ("SARs") to eligible employees in accordance with the Stock Appreciation Rights Schemes

The Company has granted Stock Appreciation Rights ("SARs") to eligible employees in accordance with the Stock Appreciation Rights Scheme 2013 (SARS-2013) during the years ended 31st March, 2015, 31st March 2016, 31st March 2017, 31st March 2018, 31st March 2020 and as per Stock Appreciation Rights Scheme 2020 (SARS-2020) during the year ended 31st March 2021.

Details of stock appreciation rights outstanding as on March 31, 2021

The inputs used in the measurement of the fair values at grant date of the cash-settled share-based payment plans were as follows.

	Particulars	**For expiry upto 30 June 2024**	**For expiry upto 31 March 2025**
1	Share price (In Rs.)	243.36	243.36
2	Exercise price (In Rs.)	10	10
3	Expected volatility (weighted-average)	21.64%	19.88%
4	Expected life/Option Life (weighted-average)	3.25	4.00
5	Expected dividends yield	4.94%	4.94%
6	Risk–free interest rate (based on government bonds)	5.41%	5.66%

Note 36 - Employee benefits

(a) Defined Contribution Plan

The Company has recognized, in the Statement of profit and loss for the year, an amount of Rs. 0.83 Crore (March 31, 2020 Rs. 0.87 Crore) as expenses under defined contribution plans.

Benefit (Contribution to)	**For the year ended March 31, 2021**	For the year ended March 31, 2020
Provident fund	**0.42**	0.46
Pension fund	**0.30**	0.28
Superannuation fund	**0.11**	0.13
Total	**0.83**	0.87

(b) Defined Benefit Plans:

(i) Gratuity

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employees. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting.

Nature of benefits:

The gratuity benefits payable to the employees are based on the employee's service and last drawn salary at the time of leaving. The employees do not contribute towards this plan and the full cost of providing these benefits are met by the Company.

Regulatory framework:

There are no minimum funding requirements for a gratuity plan in India. The trustees of the gratuity fund have a fiduciary responsibility to act according to the provisions of the trust deed and rules. Since the fund is income tax approved, the Company and the trustees have to ensure that they are at all times fully compliant with the relevant provisions of the income tax and rules. Besides this if the Company is covered by the Payment of Gratuity Act, 1972 then the Company is bound to pay the statutory minimum gratuity as prescribed under this Act.

Governance of plan:

The Company has setup an income tax approved irrevocable trust fund to finance the plan liability. The trustees of the trust fund are responsible for the overall governance of the plan. The plan is funded under Group Gratuity Scheme which is administered by LIC. The Company makes annual contribution to the plan.

Inherent risk

The plan is of a final salary defined benefit in nature which is sponsored by the Company and hence it underwrites all the risks pertaining to the plan. In particular, there is a risk for the Company that any adverse salary growth or demographic experience or inadequate returns on underlying plan assets can result in an increase in cost of providing these benefits to employees in future. Since the benefits are lump sum in nature the plan is not subject to any longevity risks.

(ii) Post retirement medical benefits:

The Company provides post retirement medical cover to select grade of employees to cover the retiring employee and their spouse upto a specified age through Mediclaim policy on which the premiums are paid by the Company. The eligibility of the employee for the benefit as well as the amount of medical cover purchased is determined by the grade of the employee at the time of retirement.

Nature of benefits:

The Company operates a defined benefit post-retirement medical plan. The benefits payable to the employees are post their retirement from the Company. The employees do not contribute towards this plan and the full cost of providing these benefits are met by the Company.

Regulatory framework:

There are no minimum funding requirements for such a post-retirement medical plan in India. The Company has chosen not to fund the post-retirement benefit liabilities of the plan but instead carry a provision based on actuarial valuation in its books of accounts.

Governance of plan:

The Company is responsible for the overall governance of the plan. Since the plan is unfunded, the governance of the plan is limited to employees being paid the benefits as per the terms of the plan.

Inherent risk

The plan is of a defined benefit in nature which is sponsored by the Company and hence it underwrites all the risks pertaining to the plan. In particular, there is a risk for the Company that any adverse increase in healthcare costs or demographic experience can result in an increase in cost of providing these benefits to employees in future. The benefits are also paid post retirement upto a specified age of the beneficiaries and the plan carries the longevity risks.

Life expectancy

The majority of the plan's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan's liabilities. This is particularly significant in the Company's defined benefit plans, where inflationary increases result in higher sensitivity to changes in life expectancy.

Defined benefit plans – as per actuarial valuation on March 31, 2021

4. Mortality table	IALM (2012-14) ult	IALM (2012-14) ult	IALM (2012-14) ult	IALM (2012-14) ult

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation.

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

(c) Sensitivity analysis:

Gratuity

Gratuity is a lump sum plan and the cost of providing these benefits is typically less sensitive to small changes in demographic assumptions. The key actuarial assumptions to which the benefit obligation results are particularly sensitive to are discount rate and future salary escalation rate. The following table summarizes the impact on the reported defined benefit obligation at the end of the reporting period arising on account of an increase or decrease in the reported assumption by 100 basis points.

These sensitivities have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the accounting date. There have been no changes from the previous periods in the methods and assumptions used in preparing the sensitivity analyses.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Rs. in Crores

Principal assumptions	Year	Changes in assumption	Impact on defined benefit obligation: Increase in assumption	Decrease in assumption
Discount rate	**2021**	**1%**	**3.45**	**3.97**
	2020	1%	3.61	4.13
Salary growth rate	**2021**	**1%**	**3.97**	**3.45**
	2020	1%	4.12	3.61

Post retirement medical benefits

The benefit obligation results for the cost of paying hospitalization premiums to insurance company in future for the employee/beneficiaries during their lifetime is sensitive to discount rate and future increase in healthcare costs.

The following table summarizes the impact on the reported defined benefit obligation at the end of the reporting period arising on account changes in these three key parameters:

These sensitivities have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the accounting date. There have been no changes from the previous periods in the methods and assumptions used in preparing the sensitivity analyses.

The sensitivity of the defined benefit obligation to changes in the weighted principal assumptions is:

Rs. in Crores

Principal assumption	Year	Changes in assumption	Impact on defined benefit obligation: Increase in assumption	Decrease in assumption
Discount rate	**2021**	**1%**	**0.60**	**0.75**
	2020	1%	0.39	0.52
Medical inflation rate	**2021**	**1%**	**0.75**	**0.60**
	2020	1%	0.52	0.39

(d) Expected contributions for the next year:

The Company expects to contribute Rs. 0.15 Crores to the gratuity trusts during the next financial year of 2022.

(e) Expected future benefits payable :

Note 37 - Segment Reporting

Segment information:

The Company has identified 'Steel Processing' (for steel entities) as its only primary reportable segment. The Managing Director of the Company has been identified as the Chief Operating Decision Maker (CODM) as defined under Ind AS 108. CODM reviews overall financial information of the Company together for performance evaluation and allocation of resources and does not review any discrete information to evaluate performance of any individual product or geography.

Geographical Information

The amount of the Company's revenue from external customers broken down by location of the customers is shown in the table below:

		Rs. in Crores
Location	**For the year ended March 31, 2021**	For the year ended March 31, 2020
India	**1,017.14**	990.83
Overseas	**12.16**	20.41

The Company operates and has its manufacturing/processing facilities based out of Nashik and Vadodara in India.

There are two customers (FY 2019-20 : 2 Customers) contributing to more than 10% of the Company's revenue, total amount of revenue from such customers for the year ended on 31 March 2021 are Rs 204 Cr and Rs.110.75 Cr respectively (for the year ended on 31 March 2020 was Rs 188.18 Cr and Rs.121.12 Cr respectively).

1. * Represents amount less than Rs. 1 lakh
2. ** excluding taxes
3. Previous year's figures are in brackets
4. No amount has been written off/provided for or written back in respect of amounts receivable from or payable to the related parties.
5. The sales/provision of services to and purchases/provision of services from related parties are made on terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the year-end are unsecured and interest free and settlement occurs in cash. There have been no guarantees provided or received for any related party receivables or payables. For the year ended 31 March 2021, the Company has not recorded any impairment of receivables relating to amounts owed by related parties (31 March 2020: INR Nil). This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

Note 39 - Financial Instruments

Financial Risk Management Framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk . In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

[A] CREDIT RISK

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

(i) Trade receivables:

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on payment performance over the period of time and financial analysis including credit rating issued by credit rating agencies. Outstanding customer receivables are regularly monitored and any shipments to other small customers are generally covered by letters of credit . At 31 March 2021, the Company had 26 customers that owed the Company more than Rs. 1.75 Crores each and accounted for approximately 89% of all the receivables outstanding.

An impairment analysis is performed at each reporting date on an individual basis for major customers. The Company does not hold collateral as security.

(ii) Financial instruments and cash deposits:

Credit risk from balances with banks and financial institutions is managed by the Company in accordance with the Company's policy. Investments of surplus funds are made only with approved mutual funds or banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company on an annual basis, and may be updated throughout the year subject to approval of the Group's Finance Committee. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

[B] LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short, medium and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay.

Particulars	Less than 1 Year	1–3 Years	3–4 Years	5 Years and above	Total	Carrying value
Non-derivative financial liabilities						
March 31, 2021						
Non-interest bearing...........	**242.35**	**1.14**			**243.49**	**243.49**
Variable interest rate instruments*...	**73.78**				**73.78**	**73.64**
Total	**316.13**	**1.14**	**–**	**–**	**317.27**	**317.13**
March 31, 2020						
Non-interest bearing...........	105.31	0.90	–	–	106.21	106.21
Variable interest rate instruments*...	114.84	–	–	–	114.84	114.13
Total	220.15	0.90	–	–	221.05	220.34

**** Effective interest rate is 0.75 % (FY 2020 2.81 %)***

Sensitivity interest rate increase by 1%: Profit will decrease by Rs. 0.74 Crore for the year ended March 31, 2021 (Rs. 1.14 Crore for the year ended 31 March, 2020)

Sensitivity interest rate decrease by 1%: Profit will increase by Rs. 0.74 Crore for the year ended March 31, 2021 (Rs. 1.14 Crore for the year ended 31 March, 2020)

(iii) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Particulars	Less than 1 Year	1–3 Years	3–4 Years	5 Years and above	Total	Carrying amount
Non-derivative financial assets						
March 31, 2021						
Non-interest bearing...........	**350.85**	**–**	**–**	**–**	**350.85**	**350.85**
Variable interest rate instruments.....	**–**	**–**	**–**	**0.18**	**0.18**	**0.18**
Fixed interest rate instruments.....	**185.29**	**–**	**–**	**–**	**185.29**	**182.72**
Total...............	**536.14**	**–**	**–**	**0.18**	**536.32**	**533.75**
March 31, 2020						
Non-interest bearing...........	224.01	–	–	–	224.01	224.01
Variable interest rate instruments.....	–	–	–	0.17	0.17	0.17
Fixed interest rate instruments.....	175.84	–	–	–	175.84	170.50
Total	399.85	–	–	0.17	400.02	394.68

**** Effective interest rate is 5.14% (FY 2020 : 7.2%)***

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

(iv) Liquidity analysis for its derivative financial instruments

The following table details the Company's liquidity analysis for its derivative financial instruments. The table has been drawn up based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement.

Particulars	Less than 1 Year	1-3 Years	3-4 Years	5 Years and above
Derivative financial instruments				
March 31, 2021				
Gross settled:				
- foreign exchange forward contracts - liabilities	0.51	–	–	–
- foreign exchange forward contracts - assets....................	0.04	–	–	–
March 31, 2020				
Gross settled:				
- foreign exchange forward contracts - liabilities	–	–	–	–
- foreign exchange forward contracts - assets....................	2.15	–	–	–

(v) **Financing arrangements**

The Company had access to following undrawn borrowing facilities at the end of the reporting period:

Particulars	As at March 31, 2021	As at March 31, 2020
Bank Overdraft/ WCDL facility............	**15.50**	22.00
Non-Fund Based facility: (LC, BG, LUT, LER)	**171.86**	168.04

[C] MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company uses derivatives to manage market risks. Derivatives are only used for economic hedging purposes and not as speculative investments. All such transactions are carried out within the guidelines set by the Board of Directors.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

(i) **Currency Risk**

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's exposure to currency risk relates primarily to the Company's operating activities when transactions are denominated in a different currency from the Company's functional currency.

The Company manages its foreign currency risk by hedging transactions that are expected to occur within a maximum 12 month period for contracted purchases.

When a derivative is entered into for the purpose of being a hedge, the Company negotiates the terms of those derivatives to match the terms of the hedged exposure. For hedges, the derivatives covers the period of exposure from the point the cash flows of the transactions are forecasted up to the point of settlement of the resulting payable that is denominated in the foreign currency.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

Amounts in Crores

Particulars	Currency	As at March 31, 2021	As at March 31, 2020
Trade Payables	USD	**1.03**	1.69
Trade Receivable	USD	*	*
Receivable towards commission	USD	**0.01**	0.02

Of the above foreign currency exposures, the following exposures are not hedged by a derivative:

Amounts in Crores

Particulars	Currency	As at March 31, 2021	As at March 31, 2020
Trade Payables	USD	**0.31**	1.00
Trade Receivable	USD	*	*
Receivable towards commission	USD	**0.01**	0.02

* Represent amount USD 24,975 (FY 2020 :USD 48,523)

(ii) **Interest rate risk**

Refer comment given above in maturities of financial liabilities under liquidity risk.

(iii) **Raw material price risk**

The Company dose not have significant risk in raw material price variations. In case of any variation in price same is passed on to customers through appropriate adjustment to selling prices.

Note 40 - Fair value measurement

Fair valuation techniques and inputs used

This section explains the judgment and estimates made in determining the fair value of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair value are disclosed in financials statements. To provide an indication about the reliability of the inputs used in determining the fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standards.

Level 1 inputs

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date. A quoted market price in an active market provides the most reliable evidence of fair value and is used without adjustment to measure fair value whenever available, with limited exceptions. If an entity holds a position in a single asset or liability and the asset or liability is traded in an active market, the fair value of the asset or liability is measured within Level 1 as the product of the quoted price for the individual asset or liability and the quantity held by the entity, even if the market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price.

Level 2 inputs

Level 2 inputs are inputs other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 2 inputs include:

- quoted prices for similar assets or liabilities in active markets
- quoted prices for identical or similar assets or liabilities in markets that are not active
- inputs other than quoted prices that are observable for the asset or liability, for example
  - interest rates and yield curves observable at commonly quoted intervals
  - implied volatilities
  - credit spreads
- inputs that are derived principally from or corroborated by observable market data by correlation or other means ('market-corroborated inputs')

Level 3 inputs

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs are used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. An entity develops unobservable inputs using the best information available in the circumstances, which might include the entity's own data, taking into account all information about market participant assumptions that is reasonably available.

Fair value of financial assets and financial liabilities that are not measured at fair value

Financial assets/ financial liabilities measured at fair value

Financial assets/ financial liabilities measured at Fair value	Fair value as at As at 31 March, 2021	As at 31 March, 2020	Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value and sensitivity
Financial assets						
Investments						
Mutual fund investments	**19.50**	27.61	Level 1	Net assets value declared by the respective asset management companies	NA	NA
Other financial assets						
Foreign currency forward contracts	**0.04**	2.15	Level 2	Discounted cash flow. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rate at the end of the reporting period) and contract forward rate that reflects the credit risk of various counter parties.	NA	NA
Total financial assets	**19.54**	29.76				
Financial liabilities						
Other financial liabilities						
Foreign currency forward contracts	**0.51**	-	Level 2	Discounted cash flow. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rate at the end of the reporting period) and contract forward rate that reflects the credit risk of various counter parties.	NA	NA
Cash-settled share-based payments	**2.12**	4.63	Level 2	The Black-Scholes model. Inputs used: Current Stock Price of the base instrument, Annual Volatility based on Sensex, Risk Free Return based on Zero Coupon Yield, Exercise Price, time to option maturity, dividend yield.	NA	NA
Total financial liabilities	**2.63**	4.63				

The fair values of the financial assets and financial liabilities included in the level 2 category above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

Fair value of financial assets and financial liabilities that are not measured at fair value

The Company consider that the carrying amount of financial asset and financial liabilities recognised in the financial statements approximate their fair value.

Note 41 -

Previous year's figure have been regrouped/reclassified wherever necessary.

INDEPENDENT AUDITORS' REPORT

TO THE MEMBERS OF
MAHINDRA STEEL SERVICE CENTRE LIMITED

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Mahindra Steel Service Centre Limited ("the Company"), which comprise the balance sheet as at 31 March 2021, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and loss and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors' Responsibility for the Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, profit/loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
2. (A) As required by Section 143(3) of the Act, we report that:
    a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
    b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
    c) The balance sheet, the statement of profit and loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows dealt with by this Report are in agreement with the books of account.
    d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under section 133 of the Act.
    e) On the basis of the written representations received from the directors as on 31 March 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2021 from being appointed as a director in terms of Section 164(2) of the Act.
    f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

    (B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
    i. the Company has disclosed the impact of pending litigations as at 31 March 2021 on its financial position in its financial statements - Refer Note 31 to the financial statements
    ii. the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses
    iii. there were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company
    iv. the disclosures in the financial statements regarding holdings as well as dealings in specified bank notes during the period from 8 November 2016 to 30 December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31 March 2021.

    (C) With respect to the matter to be included in the Auditors' Report under section 197(16):

    In our opinion and according to the information and explanations given to us, the remuneration paid by the Company to its directors during the current year is in accordance with the provisions of Section 197 of the Act read with Schedule V of the Act. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

Annexure A to the Independent Auditor's Report – 31 March 2021

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) All fixed assets are physically verified by the management in accordance with regular program of verifying assets once in three years which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed on such verification.

(c) According to the information and explanations given by the management, the title deeds of immovable properties included in leasehold land are held in the name of the Company.

(ii) The inventories have been physically verified by management at reasonable intervals during the year. In our opinion, frequency of verification is reasonable. No material discrepancies were noticed on such physical verification, discrepancies noted have been suitably dealt with in the books of account.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, paragraph 3(iii) of the Order is not applicable to the Company.

(iv) According to the information and explanations given to us, the Company has not granted any loan or made any investment or given any guarantee or security during the year. Accordingly, paragraph 3(iv) of the Order is not applicable to the Company.

(v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits from the public within the meaning of Section 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, paragraph 3(v) of the Order is not applicable to the Company.

(vi) We have broadly reviewed the books of account maintained by the Company pursuant to the rules made by the Central Government for the maintenance of cost records under section 148(1) of the Act, for maintenance of cost records in respect of products manufactured by the Company, and are of the opinion that prima facie, the prescribed accounts and records have been made and maintained. We have not, however, made a detailed examination of the cost records with a view to determine whether they are accurate or complete.

(vii) (a) According to the information and explanations given to us and on the basis of our examination of the books of account of the Company, the Company is regular in depositing undisputed statutory dues accrued / deducted including, Provident Fund, Employees' State Insurance, Income-Tax, Goods and Service Tax and other material statutory dues with the appropriate authorities. Further as informed to us, the Company did not have any dues on account of Sales-tax, Service tax, Customs Duty, Excise Duty, Value Added Tax and Cess.

According to the information and explanations given to us, no undisputed amounts payable in respect of Provident Fund, Employees' State Insurance, Income-Tax, Goods and Service Tax and other material statutory dues were in arrears as at 31 March 2021 for a period of more than six months from the date they became payable. Further as informed to us, the Company did not have any dues on Sales-tax, Service tax, Customs Duty, Excise Duty, Value Added Tax and Cess.

(b) According to the information and explanations given to us, there are no dues of Income Tax, Sales-Tax, Service Tax, Customs duty, Excise duty, Value Added Tax, Goods and Service Tax and Cess which have not been deposited with the authorities on account of any dispute other than those mentioned below:

		Rupees in Lakhs			
Name of the Statute	**Nature of the Dues**	**Amount demanded**	**Amount not deposited under dispute**	**Period to which the amount relates**	**Forum where dispute is pending**
Central Excise Act, 1944	Excise Duty	406.88	391.62	2013-2014 to 2017-2018	Custom, Excise and Service Tax Appellate Tribunal
Madhya Pradesh Value Added Tax Act, 2002	Value Added Tax	8.95	6.85	2011-2012	Additional Commissioner Commercial Taxes (Appellate Authority)
Madhya Pradesh Value Added Tax Act, 2002 and Central Sales Tax Act, 1956	Value Added Tax	6.51	5.77	2012-2013	Additional Commissioner Commercial Taxes (Appellate Authority)

(viii) In our opinion and according to the information and explanations given by the management, the Company has not defaulted in repayment of loans or borrowing to bank. The Company has not taken any loans or borrowings from a financial institutions or government nor has issued any debentures during the year.

(ix) According to the information and explanations given by the management, the term loans taken by the Company has been applied for the purpose for they were raised. The Company did not raise money by way of initial public offer or further public offer (including debt instruments) during the year.

(x) To the best of our knowledge and according to the information and explanations given to us, no material fraud by the Company or on the Company by its officers or employees has been noticed or reported during the course of our audit.

(xi) According to the information and explanations given by the management, managerial remuneration has been paid or provided is in accordance with the requisite approvals mandated by the provisions of Section 197 read with schedule V of the Act.

(xii) In our opinion and according to the information and explanations given to us, the Company is not a Nidhi Company. Accordingly, paragraph 3(xii) of the Order is not applicable to the Company.

(xiii) According to the information and explanations given to us by the management, the Company has entered into transactions with related parties in compliance with the provisions of Section 177 and Section 188 of the Act, where applicable and the details of such related party transaction have been disclosed in the Ind AS financial statements as required by Ind AS 24 Related Party Disclosures specified under Section 133 of the Act.

(xiv) According to the information and explanations given to us by the management, during the year the Company has not made any preferential allotment or private placement of shares or fully or partly convertible debentures and hence reporting under paragraph 3(xiv) of the Order is not applicable to the Company.

(xv) According to the information and explanations given to us, the Company has not entered into any non-cash transactions with its directors or persons connected with him. Accordingly, paragraph 3(xv) of the Order is not applicable to the Company.

(xvi) According to the information and explanations given to us, the Company is not required to be registered under Section 45-IA of the Reserve Bank of India Act, 1934. Accordingly, paragraph 3(xvi) of the Order is not applicable to the Company.

Annexure B to the Independent Auditors' report on the financial statements of Mahindra Steel Service Centre Limited for the period ended 31 March 2021

Report on the internal financial controls with reference to the aforesaid financial statements under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013

(Referred to in paragraph 2(A)(f) under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

Opinion

We have audited the internal financial controls with reference to financial statements of Mahindra Steel Service Centre Limited ("the Company") as of 31 March 2021 in conjunction with our audit of the financial statements of the Company for the year ended on that date.

In our opinion, the Company has, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2021, based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India (the "Guidance Note").

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal financial controls with reference to financial statements criteria established by the Company considering the essential components of internal control stated in the Guidance Note. These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of such internal financial controls, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls with reference to financial statements.

Meaning of Internal Financial controls with Reference to Financial Statements

A company's internal financial controls with reference to financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to financial statements include those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial controls with Reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial controls with reference to financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED MARCH 31, 2021

1 Corporate information:

Mahindra Steel Service Centre Limited is a public limited company domiciled in India and is incorporated on 15 January 1993 under the erstwhile Companies Act, 1956. The registered office of the Company is located at Mahindra Towers, P.K. Kurne Chowk, Worli, Mumbai - 400018.

The Company's main activity is steel processing from the plants located at Kanhe (Pune), Bhopal and Noida. The Company is principally engaged in processing of automotive and electrical steel and manufacturing of electrical component.

The Company is the subsidiary of Mahindra Intertrade Limited, Mumbai, a Company incorporated in India. The ultimate parent Company is Mahindra and Mahindra Limited.

2 Significant accounting policies:

2.1 Statement of Compliance and Basis of preparation and presentation:

The financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended and notified under Section 133 of the Companies Act, 2013 (the 'Act') and other relevant provisions of the Act.

All assets and liabilities are classified as current if it is expected to realise or settle within 12 months after the Balance Sheet date.

The financial statements are presented in Indian Rupees (INR) which is also the Company's functional currency. All values are rounded to the nearest Lakhs.

The financial statements were approved by the Board of Directors and authorised for issue on April 23, 2021.

2.2 Use of estimates and judgments:

The preparation of financial statements in conformity with Ind AS requires management to make judgments, estimates and assumptions, that affect the application of accounting policies and the reported amounts of assets, liabilities, income, expenses etc. at the date of these financial statements and the reported amounts of revenues and expenses for the years presented. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each balance sheet date. Revisions to accounting estimates are recognised in the period in which the estimate is revised and future periods affected.

In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements are included in the following notes:

Note No. 2.3 Property, plant & equipment

Note No. 2.10 Employee benefits

2.3 Property, plant & equipment:

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation less accumulated impairment, if any. Cost includes financing cost relating to borrowed funds attributable to the construction or acquisition of qualifying tangible assets up to the date the assets are ready for use. The estimated useful lives, residual values, are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

When an asset is scrapped or otherwise disposed off, the cost and related depreciation are removed from the books of account and resultant profit or loss, if any, is reflected in the Statement of Profit and Loss.

Depreciation is calculated on Straight Line method over the estimated useful life of all assets. These lives are in accordance with Schedule II to the Companies Act, 2013, other than the following asset class based on the Company's expected usage pattern:

(a) Vehicles - 5 years

(b) Slitting Line (Plant and Equipment) – 20 Years

(c) Blanking Line (Plant and Equipment)-20 Years

(d) Washing Machine (Plant and Equipment)– 20 Years

2.4 Impairment of assets:

At the end of each reporting period, the Company reviews the carrying amounts of its tangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). When it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing the value in use, the estimated future cash flows are discounted at their present value using the pre-tax discount rate that reflects current market assessment of time value of money and the risks specific to the assets for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in the Statement of Profit or Loss.

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in the Statement of Profit or Loss.

2.5 Inventories:

Inventories, except for Stores and spares which are valued at cost, are valued at the lower of cost (on weighted average basis) and the net realisable value after providing for obsolescence and other losses, where considered necessary.

Cost comprises of all costs of purchase, conversion and other costs incurred in bringing the inventories to their present location and condition.

Net Realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

Work-in-progress and finished goods include appropriate proportion of overheads and, where applicable, excise duty.

2.6 Foreign exchange transactions and translations:

Transactions in currencies other than the Company's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in the Statement of Profit and Loss in the period in which they arise.

2.7 Financial assets and Financial liabilities:

Financial instruments:

Financial assets and financial liabilities are recognised when a Company becomes a party to the contractual provisions of the instruments. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in the Statement of Profit and Loss.

Financial assets:

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace. All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets.

Impairment of financial assets:

The Company applies the expected credit loss model for recognising impairment loss on financial assets. With respect to trade receivables the Company measures the loss allowance at an amount equal to lifetime expected credit losses.

Derecognition of financial assets:

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in the Statement of Profit and Loss if such gain or loss would have otherwise been recognised in the Statement of Profit and Loss on disposal of that financial asset.

Financial liabilities and equity instruments:

Debt and equity instruments issued by the Company are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instrument:

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all its liabilities. Equity instrument issued by the Company are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instrument is recognised and deducted directly in equity. No gain or loss is recognised in the Statement of Profit and Loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

Financial liabilities:

All the financial liabilities are subsequently measured at amortised cost using the effective interest method or at fair value through profit and loss.

Derecognition of financial liabilities:

The Company derecognises financial liabilities when, and only when, the Company's obligation is discharged, cancelled or have expired. An exchange between the lender of debt instrument with substantially different terms is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. Similarly, a substantial modification of the term of an existing liability (whether or not attributable to the financial difficulty of the debtor) is accounted for as an extinguishment of the original financial liability and the recognition of a new financial liability. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in the Statement of Profit and Loss.

Derivative financial instruments:

The Company enters into a variety of derivative financial instruments to manage its exposure to foreign exchange rate risks, including foreign exchange forward contracts. Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in the Statement of Profit and Loss immediately.

2.8 Revenue recognition:

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. The Company assesses promises in the contract that are separate performance obligations to which a portion of transaction price is allocated.

Revenue is measured based on the transaction price as specified in the contract with the customer. It excludes taxes or other amounts collected from customers in its capacity as an agent. In determining the transaction price, the Company considers:

Significant financing component - Generally, the Company receives short-term advances from its customers. Using the practical expedient in Ind AS 115, the Company does not adjust the promised amount of consideration for the effects of a significant financing component if it expects, at contract inception, that the period between the transfer of the promised good or service to the customer and when the customer pays for that good or service will be one year or less.

The accounting policies for specific revenue streams of the company is summarised below:

Sale of goods:

Customers obtain control of the goods when the goods are delivered to and have been accepted.

Sale of Services:

Service income is recognized over time based on as and when service is performed.

2.9 Government grants:

Government grants are not recognized until there is reasonable assurance that the Company will comply with the conditions attaching to them and that the grants will be received.

Government grants that are receivable for the purpose of giving immediate financial support to the Company with no future related costs are recognized in the Statement of Profit and Loss in the year in which they become receivable.

2.10 Employee benefits:

Retirement benefit costs and termination benefits:

Payment to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the return of plan assets (excluding net interest), is reflected immediately in the balance sheet with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in the other comprehensive income is reflected immediately in retained earnings and is not reclassified to Statement of profit and loss. Past service cost is recognised in Statement of profit and loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the defined benefit liability or asset. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement

The Company presents the first two components of defined benefit costs in the Statement of Profit or Loss in the line item "Employee benefits expense". Curtailment gains and losses are accounted for as past service cost.

The retirement benefit obligation recognised in the balance sheet represents the actual deficit or surplus in the Company's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for the termination benefit is recognized at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognizes any related restructuring costs.

Short-term and other long-term employee benefits:

A liability is recognized for benefits accruing to the employees in respect of wages and salaries and annual leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange of that service.

Liabilities recognized in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange of related service.

Liabilities recognized in respect of other long-term employee benefits are measured at present value of the estimated future cash outflows expected to be made by the company in respect of services provided by employee up to the reporting date.

2.11 Stock appreciation rights (SARs):

For cash-settled share-based payments, a liability is recognized for the services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognized in the Statement of Profit and Loss for the year.

2.12 Borrowing costs:

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in the Statement of Profit and Loss in the period in which they are incurred.

2.13 Provisions:

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

2.14 Taxes on income:

Income Tax expense represents the sum of the tax currently payable and deferred tax.

Current Tax:

The tax currently payable is based on taxable profit for the year. Taxable profit differs from ‘profit before tax’ as reported in the Statement of Profit and Loss because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company’s current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred Tax:

Deferred tax assets and liabilities are recognized for the future tax consequences of temporary differences between the carrying values of assets and liabilities and their respective tax bases. Deferred tax assets are recognized to the extent that it is probable that future taxable income will be available against which the deductible temporary differences could be utilized.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on the tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Current and deferred tax for the year:

Current and deferred tax are recognized in the Statement of Profit or Loss, except when they relate to items that are recognized in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognized in other comprehensive income or directly in equity respectively.

Minimum Alternate Tax (MAT):

Minimum Alternate Tax (MAT) paid in accordance with the tax laws, which gives future economic benefits in the form of adjustment to future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal income tax against which the MAT paid will be adjusted.

2.15 Cash and cash equivalents:

Cash comprises cash on hand and demand deposits with banks. Cash equivalents are short-term balances (with an original maturity of three months or less from the date of acquisition), highly liquid investments that are readily convertible into known amounts of cash and which are subject to insignificant risk of changes in value.

2.16 Cash Flow Statement:

Cash flows are reported using the indirect method, whereby profit/ (loss) before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

2.17 Earning per share:

Basic earnings per share is computed by dividing the profit after tax by the weighted average number of equity shares outstanding during the year.

2.18 Leases:

At inception of a contract, the Company assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Company as a lessee:

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non-lease components and account for the lease and non-lease components as a single lease component.

The Company recognises a right-of-use asset and a lease liability at the lease commencement date. The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received.

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The Company presents right-of-use assets that do not meet the definition of investment property in 'property and equipment' and lease liabilities in the statement of financial position.

The Company has elected not to apply the requirements of Ind AS 116 Leases to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term.

Operating lease payments are recognized as an expense in the Statement of Profit and Loss on a straight-line basis over the term of the relevant lease.

3 Recent Indian Accounting Standards (Ind AS)

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from April 1, 2021.

Recent pronouncements

On March 24, 2021, the Ministry of Corporate Affairs ("MCA") through a notification, amended Schedule III of the Companies Act, 2013 revising Division I, II and III of Schedule III and are applicable from April 1, 2021. The amendments primarily relate to

(a) Change in existing presentation requirements for certain items in Balance sheet, for eg. lease liabilities, security deposits, current maturities of long-term borrowings, effect of prior period errors on Equity Share capital

(b) Additional disclosure requirements in specified formats, for eg. ageing of trade receivables, trade payables, capital work in progress, intangible assets, shareholding of promoters, etc.

(c) Disclosure if funds have been used other than for the specific purpose for which it was borrowed from banks and financial institutions.

(d) Additional Regulatory Information, for eg., compliance with layers of companies, title deeds of immovable properties, financial ratios, loans and advances to key managerial personnel, etc.

(e) Disclosures relating to Corporate Social Responsibility (CSR), undisclosed income and crypto or virtual currency.

The amendments are extensive, and the Company is evaluating the same.

Note No. 31 - Employee benefits

(a) Defined Contribution Plan

The Company has recognized, in the Statement of Profit and Loss for the year, an amount of Rs. 57.13 Lakhs (FY 2020: Rs. 56.63 Lakhs as expenses under defined contribution plans).

Rs. in Lakhs

Particulars	For the year ended March 31, 2021	For the year ended March 31, 2020
Provident Fund	**37.15**	38.38
Pension Fund	**19.98**	18.25
Total	**57.13**	56.63

(b) Defined benefit plans:

(i) GRATUITY

The Company operates a gratuity plan covering qualifying employees. The benefit payable is the greater of the amount calculated as per the Payment of Gratuity Act, 1972 or the Company scheme applicable to the employee. The benefit vests upon completion of five years of continuous service and once vested it is payable to employees on retirement or on termination of employment. In case of death while in service, the gratuity is payable irrespective of vesting.

Nature of Benefits:

The gratuity benefits payable to the employees are based on the employee's service and last drawn salary at the time of leaving. The employees do not contribute towards this plan and the full cost of providing these benefits are met by the Company.

Regulatory framework:

There are no minimum funding requirements for a gratuity plan in India. The trustees of the gratuity fund have a fiduciary responsibility to act according to the provisions of the trust deed and rules. Since the fund is income tax approved, the Company and the trustees have to ensure that they are at all times fully compliant with the relevant provisions of the income tax and rules. Besides this if the Company is covered by the Payment of Gratuity Act, 1972 then the Company is bound to pay the statutory minimum gratuity as prescribed under this Act.

Governance of Plan:

The Company has setup an income tax approved irrevocable trust fund to finance the plan liability. The trustees of the trust fund are responsible for the overall governance of the plan. The plan is funded under Group Gratuity Scheme which is administered by LIC. The Company makes annual contribution to the plan.

Inherent Risk:

The plan is of a final salary defined benefit in nature which is sponsored by the Company and hence it underwrites all the risks pertaining to the plan. In particular, there is a risk for the Company that any adverse salary growth or demographic experience or inadequate returns on underlying plan assets can result in an increase in cost of providing these benefits to employees in future. Since the benefits are lump sum in nature the plan is not subject to any longevity risks.

(ii) POST-RETIREMENT MEDICAL BENEFITS

The Company provides post retirement medical cover to select grade of employees to cover the retiring employee and their spouse up to a specified age through mediclaim policy on which the premiums are paid by the Company. The eligibility of the employee for the benefit as well as the amount of medical cover purchased is determined by the grade of the employee at the time of retirement.

Nature of Benefits:

The Company operates a defined benefit post-retirement medical plan. The benefits payable to the employees are post their retirement from the Company. The employees do not contribute towards this plan and the full cost of providing these benefits are met by the Company.

Regulatory framework:

There are no minimum funding requirements for such a post-retirement medical plan in India. The Company has chosen not to fund the post-retirement benefit liabilities of the plan but instead carry a provision based on actuarial valuation in its books of accounts.

Governance of Plan:

The Company is responsible for the overall governance of the plan. Since the plan is unfunded, the governance of the plan is limited to employees being paid the benefits as per the terms of the plan.

Inherent Risk:

The plan is of a defined benefit in nature which is sponsored by the Company and hence it underwrites all the risks pertaining to the plan. In particular, there is a risk for the Company that any adverse increase in healthcare costs or demographic experience can result in an increase in cost of providing these benefits to employees in future. The benefits are also paid post retirement up to a specified age of the beneficiaries and the plan carries the longevity risks.

Life expectancy:

The majority of the plan's obligations are to provide benefits for the life of the member, so increases in life expectancy will result in an increase in the plan's liabilities. This is particularly significant in the Company's defined benefit plans, where inflationary increases result in higher sensitivity to changes in life expectancy.

(viii) The major categories of plan assets				
List the plan assets by category here				
– Insurer managed funds	**222.89**	215.52	**–**	–
(ix) Actuarial assumptions				
1) Discount rate	**6.55%**	6.50%	**6.55%**	6.50%
2) Medical premium inflation	**–**	–	**6.00%**	6.00%
3) Rate of increase in compensation levels	**7.00%**	7.00%	**–**	–
4) Mortality table	**IALM(2012-14) ult**			

The expected rate of return on plan assets is based on the average long term rate of return expected on investments of the fund during the estimated term of obligation.

The estimate of future salary increases, considered in actuarial valuation, takes account of inflation, seniority, promotion and other relevant factors, such as supply and demand in the employment market.

(x) Sensitivity analysis:

Gratuity

Gratuity is a lump sum plan and the cost of providing these benefits is typically less sensitive to small changes in demographic assumptions. The key actuarial assumptions to which the benefit obligation results are particularly sensitive to are discount rate and future salary escalation rate. The following table summarizes the impact on the reported defined benefit obligation at the end of the reporting period arising on account of an increase or decrease in the reported assumption by 100 basis points.

These sensitivities have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the accounting date. There have been no changes from the previous periods in the methods and assumptions used in preparing the sensitivity analyses.

The sensitivity of the gratuity benefits to changes in the weighted principal assumptions is:

Rs. in Lakhs

Principal assumption	Year	Changes in assumption	Impact on defined benefit obligation: Increase in assumption	Decrease in assumption
Discount rate	**2021**	**1%**	**193.70**	**225.19**
	2020	1%	179.06	207.58
Salary growth rate	**2021**	**1%**	**224.95**	**193.63**
	2020	1%	207.35	179.00

Post retirement medical benefits

The benefit obligation results for the cost of paying future hospitalization premiums to insurance company in future for the employee / beneficiaries during their lifetime is sensitive to discount rate and future increase in healthcare costs.

The following table summarizes the impact on the reported defined benefit obligation at the end of the reporting period arising on account changes in these three key parameters:

These sensitivities have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the accounting date. There have been no changes from the previous periods in the methods and assumptions used in preparing the sensitivity analyses.

The sensitivity of the post retirement medical benefit obligation to changes in the weighted principal assumptions is:

Rs. in Lakhs

Principal assumption	Year	Changes in assumption	Impact on defined benefit obligation: Increase in assumption	Decrease in assumption
Discount rate	**2021**	**1%**	**13.79**	**18.54**
	2020	1%	10.87	14.53
Medical inflation rate	**2021**	**1%**	**18.53**	**13.76**
	2020	1%	14.52	10.85

(xi) Expected contributions for the next year:

The Company expects to contribute Rs. 10 lakhs to the gratuity trusts during the next financial year of 2021.

(xii) Maturity profile:

Gratuity — Rs. in Lakhs

Maturity profile of defined benefit obligation:	2021	2020
Within 1 year	**26.59**	25.74
1 - 2 year	**17.72**	23.17

3 - 4 year	**0.39**	0.37
4 - 5 year	**0.42**	0.39
5 - 10 years	**2.88**	2.23
More than 10 years	**46.39**	35.27

Note No. 32 - Segment reporting

Segment information:

The company has identified ‘Steel Processing’ as its only primary reportable segment. The Managing Director of the Company has been identified as the Chief Operating Decision Maker (CODM) as defined under Ind AS 108. CODM reviews overall financial information of the Company together for performance evaluation and allocation of resources and does not review any discrete information to evaluate performance of any individual product or geography.

Geographical Information:

Almost all of the company's customer are located within India.

The Company operates and has its manufacturing / processing facilities based out of Pune, Bhopal and Noida in India.

There are 3 customers (having revenue more than Rs. 2057.99 Lakhs from each customer) who are individually contributing to more than 10% of the Company's revenue. [FY 2020: There were 2 customers (having revenue more than Rs. 4,217.92 Lakhs from each customer) who were individually contributing to more than 10% of the Company's revenue.]

Notes:

1) In respect of the outstanding balances recoverable, no provision for doubtful debts was made in respect of these parties.

2) During FY 2020: 0.06 was written off from such parties.

3) The sales/provision of services to and purchases/provision of services from related parties are made on terms equivalent to those that prevail in arm's length transactions. Outstanding balances at the year-end are unsecured and interest free and settlement occurs in cash. There have been no guarantees provided or received for any related party receivables or payables. During the year, the Company has not recorded any impairment of receivables relating to amounts owed by related parties (March 31, 2020: Rs. Nil). This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

Note No. 34 - Financial instruments

[I] Capital management

The company's capital management objectives are:

- to ensure the company's ability to continue as a going concern
- to provide an adequate return to shareholders by pricing products and services commensurately with the level of risk.

The capital structure of the Company consists of net debt (borrowings as detailed in note 13 and 16 and offset by cash and cash equivalents) and total equity of the Company.

The Company monitors capital using a gearing ratio, which is net debt divided by total capital. The Company's policy is to keep the gearing ratio within 150%.

The company sets the amount of capital in proportion to its overall financing structure, i.e. equity and financial liabilities. The company manages the capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of the underlying assets.

Rs. in Lakhs

Particulars	As at March 31, 2021	As at March 31, 2020
Debt	**4,225.67**	4,137.64
Less: Cash and cash equivalents (Refer note 10)	**11.35**	780.77
Net debt	**4,214.32**	3,356.87
Equity	**9,645.11**	10,298.55
Gearing ratio	**44%**	33%

[II] Financial risk management framework

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk and market risk . In order to manage the aforementioned risks, the Company operates a risk management policy and a program that performs close monitoring of and responding to each risk factors.

A. CREDIT RISK

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Company is exposed to credit risk from its operating activities (primary trade receivables) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

(i) Trade receivables

Customer credit risk is managed by each business unit subject to the Company's established policy, procedures and control relating to customer credit risk management. Credit quality of a customer is assessed based on payment performance over the period of time and financial analysis including credit rating issued by credit rating agencies. Outstanding customer receivables are regularly monitored and any shipments to other small customers are generally covered by letters of credit.

The Company follows expected credit loss method for determination of impairment of trade receivable. Additionally, an impairment analysis is performed at each reporting date on specific case basis for major customers.

(ii) Financial instruments and cash deposits:

Credit risk from balances with banks and financial institutions is managed by the Company in accordance with the Company's policy. Investments of surplus funds are made only with approved mutual fund or banks and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Company on an annual basis, and may be updated throughout the year subject to approval of the Group's Finance Committee. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through counterparty's potential failure to make payments.

B. LIQUIDITY RISK

(i) Liquidity risk management

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Company's short-, medium- and long-term funding and liquidity management requirements. The Company manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

(ii) Maturities of financial liabilities

The following tables detail the Company's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The amount disclosed in the tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to pay. The tables include both interest and principal cash flows.

To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Company may be required to pay.

Rs. in Lakhs

Particulars	Less than 1 Year	1-3 Years	3-5 Years	5 Years and above	Total	Carrying amount
Non-derivative financial liabilities						
As at March 31, 2021

Variable interest rate instruments	**5,662.03**	**3,016.86**	**831.50**	**3,127.22**	**12,637.61**	**10,317.95**
Total	**9,708.88**	**3,041.51**	**831.50**	**3,127.22**	**16,709.11**	**14,389.45**
As at March 31, 2020						
Non-interest bearing	2,985.76	17.68	4.07	–	3,007.51	3,007.51
Variable interest rate instruments	6,706.16	1,269.94	682.21	24.61	8,682.92	8,259.28
Total	9,691.92	1,287.62	686.28	24.61	11,690.43	11,266.79

Sensitivity interest rate increase by 1%:

Profit will decrease on variable interest rate instrument by Rs. 103.18 lakhs for the year ended 31 March, 2021 (Rs. 82.59 lakhs for the year ended March 31, 2020)

Sensitivity interest rate decrease by 1%:

Profit will increase on variable interest rate instrument by Rs. 103.18 lakhs for the year ended 31 March, 2021 (Rs. 82.59 lakhs for the year ended March 31, 2020)

The following table details the Company's liquidity analysis for its derivative financial instruments. The table has been drawn up based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement.

Rs. in Lakhs

Particulars	Less than 1 Year	1-3 Years	3-5 Years	5 Years and above
Derivative financial instruments				
31 March, 2021				
Gross settled:				
– foreign exchange forward contract payable	**53.22**	**–**	**–**	**–**
31 March, 2020				
Gross settled:				
– Foreign Exchange forward contracts receivable	68.15	–	–	–

(iii) Maturities of financial assets

The following table details the Company's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Company's liquidity risk management as the liquidity is managed on a net asset and liability basis.

Rs. in Lakhs

Particulars	Less than 1 Year	1-3 Years	3-4 Years	5 Years and above	Carrying amount
Non-derivative financial assets					
As at 31 March, 2021					
Non-interest bearing	**6,070.57**	**368.39**	–	**55.84**	**6,494.80**
Variable interest rate instruments	–	–	–	**21.61**	**21.61**
Total	**6,070.57**	**368.39**	–	**77.45**	**6,516.41**
As at 31 March 2020					
Non-interest bearing	3,584.03	204.87	–	143.26	3,932.16
Variable interest rate instruments	–	–	–	21.97	21.97
Total	3,584.03	204.87	–	165.23	3,954.13

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

(iv) Financing arrangements

The Company had access to following undrawn borrowing facilities at the end of the reporting period:

Rs. in Lakhs

Particulars	As at March 31, 2021	As at March 31, 2020
Secured bank overdraft/ WCDL facility	**3,974.49**	950.00
– Expiring within one year	**3,974.49**	950.00

Unsecured working capital non-fund based facility: (LC, BG, LUT, LER)	**4,975.28**	4,500.00
– Expiring within one year	**4,975.28**	4,500.00
Secured Capex Rupee Term Loan	–	–
– Expiring beyond one year	–	–
Total	**10,924.85**	8,261.00

C. MARKET RISK

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and other price risk. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimising the return. The Company uses derivatives to manage market risks. Derivatives are only used for economic hedging purposes and not as speculative investments. All such transactions are carried out within the guidelines set by the Board of Directors.

(i) Currency Risk

The Company undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. The Company's exposure to currency risk relates primarily to the Company's operating activities and borrowings when transactions are denominated in a different currency from the Company's functional currency.

The Company manages its foreign currency risk by hedging transactions that are expected to occur within a maximum 12 month period for hedges of forecasted sales and purchases and for 36 months period for borrowings.

When a derivative is entered into for the purpose of being a hedge, the Company negotiates the terms of those derivatives to match the terms of the hedged exposure. For hedges the derivatives cover the period of exposure from the point the cash flows of the transactions are forecasted up to the point of settlement of the resulting receivable or payable that is denominated in the foreign currency.

The carrying amounts of the Company's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

Figures in Lakhs

Particulars	Currency	As at March 31, 2021	As at March 31, 2020
Trade payables/acceptance	USD	**45.38**	53.48
Creditors for capital supplies/services	EURO	–	4.47

Of the above foreign currency exposures, the following exposures are not hedged by a derivative:

Figures in Lakhs

Particulars	Currency	As at March 31, 2021	As at March 31, 2020
Trade payables/acceptance	USD	**5.90**	28.14
Creditors for capital supplies/services	EURO	–	0.19

(ii) Interest rate risk

Refer note B (ii) for interest rate sensitivity

(iii) Raw material price risk

The Company does not have significant risk in raw material price variations. In case of any variation in price same is passed on to the customer through appropriate adjustments to selling prices.

There has been no significant changes to the company's exposure to market risk or the methods in which they are managed or measured.

Note No. 35 - Fair value measurement

Fair valuation techniques and inputs used

This section explains the judgment and estimates made in determining the fair value of the financial instruments that are (a) recognised and measured at fair value and (b) measured at amortised cost and for which fair value are disclosed in financials statements. To provide an indication about the reliability of the inputs used in determining the fair value, the Company has classified its financial instruments into the three levels prescribed under the accounting standards.

Level 1 inputs:

Level 1 inputs are quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date. A quoted market price in an active market provides the most reliable evidence of fair value and is used without adjustment to measure fair value whenever available, with limited exceptions. If an entity holds a position in a single asset or liability and the asset or liability is traded in an active market, the fair value of the asset or liability is measured within Level 1 as the product of the quoted price for the individual asset or liability and the quantity held by the entity, even if the market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price.

Level 2 inputs:

Level 2 inputs are other than quoted market prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Level 2 inputs include:

- quoted prices for similar assets or liabilities in active markets
- quoted prices for identical or similar assets or liabilities in markets that are not active
- inputs other than quoted prices that are observable for the asset or liability, for example-interest rates and yield curves observable at commonly quoted interval
- implied volatilities
- credit spreads
- inputs that are derived principally from or corroborated by observable market data by correlation or other means ('market-corroborated inputs')

Level 3 inputs:

Level 3 inputs are unobservable inputs for the asset or liability. Unobservable inputs are used to measure fair value to the extent that relevant observable inputs are not available, thereby allowing for situations in which there is little, if any, market activity for the asset or liability at the measurement date. An entity develops unobservable inputs using the best information available in the circumstances, which might include the entity's own data, taking into account all information about market participant assumptions that is reasonably available.

Note No. 37 - Corporate social responsibility (CSR)

The CSR obligation for the year as computed by the Company and relied upon by the auditors is Rs. 10.19 Lakhs (F.Y 2020 Rs. 21.43 Lakhs). CSR amount spent during the year is Rs. 10.60 Lakhs (F.Y 2020 Rs. 21.54 Lakhs).

Note No. 38 Stock Appreciation Rights

In accordance with the directions and recommendations of the Remuneration Committee of the Company, the Company grants SARs to eligible employees/ directors. SARs granted would vest over a period of five years, or such period as stipulated by the Remuneration Committee, from the date of grant. Upon vesting of SARs eligible employees are entitled to earn cash benefits as prescribed.

One SAR shall be entitled to a cash benefit which would be the difference between the Fair Value of one fully-paid Equity Share of the holding company on the exercise date less the face value of the equity share of the holding company on the grant date. Provided, however, that once SARs have vested, an eligible employee will have the option to exercise the same within a maximum period of three years from the vesting date during such periods of time as determined by the Company.

Once SARs are vested and exercised by an employee, the Company would, within a period of 90 days from the exercise date, compute the cash benefit due in respect of those SARs and pay the same to the employee after deducting the applicable income tax at source. The latest available fair value of the Company's equity share would be considered for computing the said cash benefit.

If an eligible employee fails to exercise the SARs within a period of three years as aforesaid, the unexercised SARs will lapse and the Company's liability for such unexercised SARs will cease.

The Company has granted Stock Appreciation Rights ("SARs") to eligible employees in accordance with the Stock Appreciation Rights Scheme 2013 (SARS-2013) during the years ended March 31, 2015, March 31, 2016, March 31, 2017, March 31, 2018 and March 31, 2020.

Details of stock appreciation rights outstanding as on March 31, 2021

Particulars	Number of Grants	Grant Date	Expiry Date	Exercise Price	Fair value at Grant Date
Cash settled					
F'18 grant	3,486	Apr 27, 2017	Feb 28, 2025	10.00	118.40
F'18 grant	789	Jan 29, 2018	Feb 28, 2025	10.00	118.40
F'18 grant	792	Jan 29, 2018	Feb 28, 2026	10.00	118.40
F'20 grant	14,653	Apr 23, 2019	Feb 28, 2022	10.00	178.76
F'20 grant	14,653	Apr 23, 2019	Feb 28, 2023	10.00	178.76
F'20 grant	14,694	Apr 23, 2019	Feb 28, 2024	10.00	178.76

Movement in Stock appreciation rights

Particulars	Number of Shares
(1) The number of share options outstanding at the beginning of the year;	97,871
(2) Granted during the year..	–
(3) Exercised during the year	48,804
(4) Expired/forfeited during the year	–
(5) Outstanding at the end of the year	49,067

Stock Appreciation Right's vested during the year

Persuant to the circular resolution passed by the Nomination and Remuneration Committee of the Board, during the financial year 2020, on account of business uncertainty & outbreak of COVID 19, the Company had deferred the opening of its exercise window for SARs in case of the following SARs which had vested on 28 February 2020. According to the resolution, the Excercise window will be opened before 31 Jan 2021 at an exercise price of Rs 236.57 per SARs being the share valuation of the holding company, Mahindra Intertrade Limited as on 31st March 2020. Accordingly, the SARs vested, but deferred for excercise has been paid at 226.57 per SARs being Rs. 236.57 (Excercise Price) less Rs. 10 (Grant Price) during the year. The details of such SARs as below:

SARs vested during the previous year but deferred for excercise and paid during the year

Particulars	Number of SAR's	Vesting date	Share price at Exercise date
F'15 grant	8,328	Feb 28, 2020	236.57
F'16 grant	1,311	Feb 28, 2020	236.57
F'18 grant	4,274	Feb 28, 2020	236.57
F'20 grant	14,653	Feb 28, 2020	236.57
Total	**28,566**		

The inputs used in the measurement of the fair values at grant date of the cash-settled share-based payment plans were as follows.

Particulars	Cash settled share appreciation rights
(1) Share price..	243.36
(2) Exercise price	10.00
(3) Expected volatility (weighted-average)	21.64%
(4) Option Life...	3.25
(5) Expected dividends yield	4.92%
(6) Risk-free interest rate (based on government bonds)	5.41%

Note No. 39 - Madhya Pradesh Industrial Investment Promotion Assistance

In terms of Madhya Pradesh Industrial Investment Promotion Assistance Scheme, the Company in respect of Plant set up in an earlier year at Bhopal is entitled for Industrial Investment Promotion Assistance (IIPA) equivalent to 75% of amount deposited as VAT or CST during each of the 10 years ending March 2020. During the year ended on 31 March 2018, the Company had recognised income of Rs 69.18 Lakhs for the period 1 April 2017 to 30 June 2017.

W.e.f. 1 July 2017, VAT has been subsumed in GST. On 22 June 2018 Madhyapradesh Government provided the notification for computation of Subsidy from 1 June 2017 under GST regime. Pursuant to the notification the Company had accounted for the benefit under the scheme of

Rs. 380.05 Lakhs for the period from 1 July 2017 to 31 March 2018 and Rs. 451.12 Lakhs for the financial year ended on 31 March 2019.

However, during F 20, the Madhya Pradesh Government issued a Notification dated 6 August 2019 which effectively adds restrictions on claiming the Subsidy retrospectively from 1 July 2017 (post GST) and revising the formula for computing the Subsidy. The order had certain ambiguities.

Based on the opinion taken by the Company from the leading GST consultant, the figure of Subsidy available for the year 2018 and 2019 had been recomputed in the light of the order dated 6 Aug 2019, read with the IIPA Scheme. The revised Subsidy receivable for the period 1 July 2017 to 31 March 2018 was revised to Rs. 19.06 Lakhs (instead of Rs 380. 05 Lakhs accrued earlier) and for the year ended 31 March 2019 was Rs. 89.98 Lakhs (instead of Rs 451.12 Lakhs accrued earlier) . Accordingly, in FY 2020, the Company had written off a figure of Rs 722.13 Lakhs accounted for the above period, being in excess of the revised computation pursuant to the Notification dated 6th August 2019.

Subsequently, during the current year, on 15 March 2021, The Madhya Pradesh State Government issued order revising the conditions for claiming the Subsidy under 'The Madhya Pradesh Industrial Investment Promotion Assistance'. However, there is still ambiguity in the said order. Due to ambiguity, being conservative, the Company has not revised the originally recognised Subsidy.

Note No. 40 - Previous year's figures have been regrouped/reclassified wherever necessary.

INDEPENDENT AUDITORS' REPORT

To the Members of
Mahindra Electrical Steel Private Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of Mahindra Electrical Steel Private Limited ("the Company"), which comprise the balance sheet as at 31 March 2021, and the statement of profit and loss (including other comprehensive income), statement of changes in equity and statement of cash flows for the year then ended, and notes to the financial statements, including a summary of the significant accounting policies and other explanatory information.

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31 March 2021, and loss and other comprehensive income, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those SAs are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the financial statements.

Other Information

The Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Company's annual report, but does not include the financial statements and our auditors' report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's and Board of Directors' Responsibility for the Financial Statements

The Company's Management and Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the state of affairs, profit/loss and other comprehensive income, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Management and Board of Directors are responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is also responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to financial statements in place and the operating effectiveness of such controls.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures in the financial statements made by the Management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditors' Report) Order, 2016 ("the Order") issued by the Central Government in terms of section 143 (11) of the Act, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.

2. (A) As required by Section 143(3) of the Act, we report that:

   a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.

   b) In our opinion, proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.

   c) The balance sheet, the statement of profit and loss (including other comprehensive income), the statement of changes in equity and the statement of cash flows dealt with by this Report are in agreement with the books of account.

   d) In our opinion, the aforesaid financial statements comply with the Ind AS specified under section 133 of the Act.

   e) On the basis of the written representations received from the directors as on 31 March 2021 taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2021 from being appointed as a director in terms of Section 164(2) of the Act.

   f) With respect to the adequacy of the internal financial controls with reference to financial statements of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".

   (B) With respect to the other matters to be included in the Auditors' Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:

   i. the Company does not have any pending litigations which would impact its financial position

   ii. the Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses

   iii. there were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company

   iv. The disclosures in the financial statements regarding holdings as well as dealings in specified bank notes during the period from 8 November 2016 to 30 December 2016 have not been made in these financial statements since they do not pertain to the financial year ended 31 March 2021.

   (C) With respect to the matter to be included in the Auditors' Report under section 197(16):

   In our opinion and according to the information and explanations given to us, there was no remuneration paid by the company to its directors during the current year and hence the provisions of Section 197 of the Act read with Schedule V of the Act are no applicable to the Company. The Ministry of Corporate Affairs has not prescribed other details under Section 197(16) which are required to be commented upon by us.

ANNEXURE A TO THE INDEPENDENT AUDITOR'S REPORT – 31 MARCH 2021

(Referred to in paragraph 1 under 'Report on Other Legal and Regulatory Requirements' section of our report of even date)

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) All fixed assets are physically verified by the management in accordance with regular program of verifying assets once in a year which, in our opinion, is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed on such verification.

(c) According to the information and explanations given by the management, the title deeds of immovable properties included in leasehold land are held in the name of the Company.

(ii) The Company does not have any physical inventories and, Accordingly, the requirement under paragraph 3(ii) of the Order is not applicable to the Company.

(iii) According to the information and explanations given to us, the Company has not granted any loans, secured or unsecured to companies, firms, Limited Liability Partnerships or other parties covered in the register maintained under Section 189 of the Act. Accordingly, paragraph 3(iii) of the Order is not applicable to the Company.

(iv) According to the information and explanations given to us, the Company has not granted any loan or made any investment or given any guarantee or security during the year. Accordingly, paragraph 3(iv) of the Order is not applicable to the Company.

(v) In our opinion, and according to the information and explanations given to us, the Company has not accepted any deposits from the public within the meaning of Section 73 to 76 of the Act and the Companies (Acceptance of Deposits) Rules, 2014 (as amended). Accordingly, paragraph 3(v) of the Order is not applicable to the Company.

(vi) To the best of our knowledge and as explained, the Central Government has not specified the maintenance of cost records under Section 148(1) of the Act, for the products of the Company.

(vii) (a) According to the information and explanations given to us and on the basis of our examination of the books of account of the Company, the Company has generally been regular in depositing undisputed statutory dues accrued/deducted including, Income-tax and other material statutory dues with the appropriate authorities. Further as informed to us, the Company did not have any dues on account of Provident Fund, Employees' State Insurance, Sales-tax, Service tax, Customs Duty, Excise Duty, Value Added Tax, Goods and Services Tax, and Cess.

According to the information and explanations given to us, no undisputed amounts payable in respect of income-tax and other material statutory dues were in arrears as at 31 March 2021 for a period of more than six months from the date they became payable. Further as informed to us, the Company did not have any dues on Provident Fund, Employees' State Insurance, Sales-tax, Service tax, Customs Duty, Excise Duty, Value Added Tax, Goods and Services Tax and Cess.
